offshoot of Buddhism and to place its origin some centuries later than the time of Buddha. But the prevailing view to-day— of Bühler, Jacobi, Hopkins, and others—that Jainism in its origin is independent of Buddhism and, perhaps, is the more ancient of the two. The many points of similarity between the two sects are explained by the indebtedness of both to a common source, namely the teachings and practices of ascetic, monastic Brahminism. Of the reputed founder of Jainism we have but few details, and most of these are so like what we read of the beginnings of Buddhism that one is strongly led to suspect that here at least one is dealing with a variation of the Buddha-legend. According to Jainist tradition, the founder lived in the sixth century b.c., being either a contemporary or a precursor of Buddha. His family name was Jnatriputra (in Prakrit, Nattaputta), but, like Gotama, he was honoured with the laudatory names of Buddha, the enlightened, Mahavira, the great hero, and Jina, the conqueror. These last two epithets came to be his distinctive titles, while the name Buddha was associated almost exclusively with Gotama. Like Buddha, Jina was the son of a local raja who held sway over a small district in the neighbourhood of Benares. While still a young man he felt the emptiness of a life of pleasure, and gave up his home and princely station to become an ardent follower of the Brahmin ascetics. If we may trust the Jainist scriptures, he carried the principle of self-mortification to the extent that he went about naked, unsheltered from the sun, rain, and winds, and lived on the rudest vegetarian fare, practising incredible fasts. Accepting the principle of the Brahmin ascetics, that salvation is by personal effort alone, he took the logical step of rejecting as useless the Vedas and the Vedic rites. For this attitude towards the Brahmin traditions he was repudiated as a heretic. He gathered eleven disciples around him, and went about preaching his doctrine of salvation. Like Buddha he made many converts, whom he organized under a monastic rule of life. Associated with them were many who accepted his teaching in theory, but who in practice stopped short of the monastic life of extreme asceticism. These were the lay Jainists, who, like the lay Buddhists, contributed to the support of the monks.

The Jainists seem never to have been so numerous as the Buddhists. Though they claim a membership of over a million believers, laity included, recent statistics of India show that their number is not greater than half a million. On the question of the propriety of going about naked, the Jainist monks have for ages been split into two sects. The White-Robed Sect, whose monks are clothed in white garments, is the more numerous, flourishing chiefly in N. W. India. To this sect belong a few communities of Jainist nuns. The naked ascetics, forming the other sect, are strongest in the South of India, but even here they have largely restricted the custom of nakedness to the time of eating. As the Buddhist creed is summed up in three words, Buddha, the Law, the Order, so the Jainist creed consists of the so-called three jewels, Right Belief, Right

Knowledge, Right Conduct. Right Belief embraces faith in Jina as the true teacher of salvation and the acceptance of the Jainist scriptures as his authoritative teaching. These scriptures are less extensive, less varied, than the Buddhist, and, while resembling the latter to a large degree, lay great stress on bodily mortification. The canon of the White-robed Sect consists of forty-five Agamas, or sacred texts, in the Prakrit tongue. Jacobi, who has translated some of these texts in the "Sacred Books of the East", is of the opinion that they cannot be older than 300 b.c. According to Jainist tradition, they were preceded by an ancient canon of fourteen so-called Purvas, which have totally disappeared. With the Jainist, "Right Knowledge" embraces the religious view of life together with the end of man, while "Right Conduct" is concerned with the main ethical precepts and with the ascetic, monastic system.

The Jainist, like the Buddhist and the pantheistic Brahmin, takes for granted the doctrine of Karma and its implied rebirths. He, too, views every form of earthly, bodily existence as misery. Freedom from rebirth is thus the goal after which he aspires. But, while the pantheistic Brahmin and the primitive Buddhist looked for the realization of the end in the extinction of conscious, individual existence (absorption in Brahma, Nirvana), the Jainist has always tenaciously held to the primitive traditional belief in a final abode of bliss, where the soul, liberated from the necessity of rebirth on earth, enjoys forever a spiritual, conscious existence. To attain this end, the Jainist, like the Buddhist and the pantheistic Brahmin, holds that the traditional gods can aid but little. The existence of the gods is not denied, but their worship is held to be of no avail and is thus abandoned. Salvation is to be obtained by personal effort alone. To reach the longed-for goal, it is necessary to purify the soul of all that binds it to a bodily existence, so that it shall aspire purely and solely after a spiritual life in heaven. This is accomplished by the life of severe mortification of which Jina set the example. Twelve years of ascetic life as a Jainist monk and eight rebirths are necessary to constitute the purgatorial preparation for the Jainist heaven. While the Jains are not worshippers of the Hindu gods, they erect imposing temples to Jina and other venerated teachers. The images of these Jainist saints are adorned with lights and flowers, and the faithful walk around them while reciting sacred *mantras*. Jainist worship is thus little more than a veneration of a few saints and heroes of the past.

On its ethical side— sphere of Right Conduct— is largely at one with Brahminism and Buddhism. There are, however, a few differences in the application of the principle of not killing. The sacredness of all kinds of life implied in the doctrine of metempsychosis has been more scrupulously observed in practice by the Jain than by the Brahmin or the Buddhist. The Brahmin tolerates the slaughter of animals for food, to provide offerings for the sacrifice, or to show hospitality to a guest; the Buddhist does not scruple to eat meat prepared for a banquet; but the Jain reprobates meat-food without

exception as involving the unlawful taking of life. For similar reasons the Jain does not content himself with straining his drinking water and with remaining at home during the rainy season, when the ground is swarming with lower forms of life, but when he goes forth, he wears a veil before his mouth, and carries a broom with which he sweeps the ground before him to avoid destruction of insect life. The Jainist ascetic allows himself to be bitten by gnats and mosquitoes rather than risk their destruction by brushing them away. Hospitals for animals have been a prominent feature of Jainist benevolence, bordering at times on absurdity. For example, in 1834 there existed in Kutch a temple hospital which supported 5000 rats. With all this scrupulous regard for animal life the Jain differs from the Buddhist in his view of the lawfulness of religious suicide. According to Jainist ethics a monk who has practised twelve years of severe asceticism, or who has found after long trial that he cannot keep his lower nature in control, may hasten his end by self-destruction.

Jamaica

Jamaica

The largest of the British West Indian islands, is situated in the Caribbean Sea, between latitude 17 deg. 43 min. and 18 deg. 32 min. N., and longitude 76 deg. 11 min. and 78 deg. 30 min. W. It is 90 miles south of Cuba, 100 west of Haiti, and 554 miles from Colon. The nearest point of the continent of America is about 400 miles southwest of the island. The name Jamaica is said to be derived from Arawak words denoting water and wood, signifying a fertile land. The island is 144 miles long, and from 21.5 to 49 miles broad. Its area is 4207.5 square miles, of which about 646 are flat, consisting of alluvium, marl, and swamp. There are some mineral deposits in the island, the most abundant being copper. The surface of the island is very mountainous, almost 2000 square miles of it being above an altitude of 1000 feet. The culminating point, Blue Mountain Peak, is 7360 feet high.

FLORA AND FAUNA

There are over two thousand distinct species of flowering plants and some four hundred and seventy varieties of ferns in Jamaica. The economic woods include: log-wood, *lignum-vitae*, cedar, mahogany, mahoe, fustic, bullet-wood, yacca satin-wood,

and cashaw. The medicinal woods and plants are quassia, cinchona, gamboge, sarsaparilla, senna, belladonna, castor-oil, ginger, tamarind, and tobacco. Dietetic: coffee, cocoa, arrow-root, pimento, cane, plantain, yam, and sweet potato. Among the fruit trees, all the citrus family abound, mango, star-apple, bread-fruit, banana, cocoa-nut, custard-apple, avocado pear, pineapple, etc.

TOPOGRAPHY

The island is divided into three counties: Surrey, Middlesex, and Cornwall, and each into five parishes: Portland, St. Thomas, St. Andrew, Kingston, Port Royal; St. Mary, St. Ann, St. Catherine, Clarendon, Manchester; Hanover, St. James Trelawny, St. Elizabeth, Westmoreland.

POPULATION AND VITAL STATISTICS

The first recorded attempt at enumerating the population of Jamaica was in 1660, when "the relicts of the army" were stated to be 2200, and the planters, merchants, and others about the same number. In 1775, there were 13,737 whites, free coloured 4093, slaves 192,787. In 1834 — the year of negro emancipation — it was computed that there were 15,000 whites, 5000 free blacks, 40,000 coloured, 311,070 slaves, making a total of 371,070. In June, 1844, the census gave whites 13,816, coloured 81,074, and blacks 346,374; total 441,264. The population in 1891 was 639,493 of whom 14,692 were white, 121,755 were coloured, 486,624 black, 10,116 coolies (East Indians), 481 Chinamen, and 3623 not described. The total estimated population in 1907 was 830,261. The Registrar-General's statistics show that upwards of 65 per cent of births were those of illegitimate children. Many of these are the offspring of consistent or permanent concubinage rather than of promiscuity. In this connection it must not be forgotten that the ancestors of the majority of this people some two generations ago were permitted and encouraged to breed like cattle, and were denied admission to the marriage state. In 1881 there were over 10,000 Catholics in Jamaica; in 1891 there were 12,000, and at the present date (1908) about 14,000. The average annual birthrate for ten years 1896-7 to 1906-7, was 36.5 per 1000 of the estimated mean population. For the same period the mean average death-rate of population per 1000 was 23.2. The population of Kingston is some 50,000, Spanish Town 5690, Montego Bay 4760, Port Antonio 2500, Falmouth 3100, Mandeville 1500.

CLIMATE AND METEOROLOGY

Intimately associated with vital statistics comes the question of climate. Jamaica, being a tropical island, was formerly looked on as injurious as a residence to the inhabitants of northern latitudes. This theory has been completely refuted, and for many years past the invalid and tourist is resorting in increasing numbers to this "Riviera of

the West," which is an ideal sojourn for the health-seeker. The diversity of surface, from the plains to the plateaux and mountain slopes, affords a variety of climate suitable to any requirement. The table of 1899 given in the next column will illustrate this fact, at varying altitudes and localities.

Meteorological records are wanting for Manchester and St. Elizabeth highlands, which are much drier than other hill districts of the island. There are many mineral springs valuable for the cure of acute and chronic diseases, especially gout and rheumatism. Two of them possess very remarkable curative properties: the hot sulphurous springs of Bath, and the warm saline spring at Milk River.

Locality Temperature Humidity Rainfall Mean Mean Mean Annual
 Total Annual Annual Annual (%) (inches) (deg. F) Range 7 a.m. 3 p.m.
 (F deg.) Kingston, Public Gardens, elev. 60 ft. 79.4 16.2 81 63 46.78
 Hope Gardens, elev. 700 ft. 77.3 20.9 87 67 62.39 Cinchona Gardens
 elev. 4900 ft. 62.9 12.2 83 84 90.08

HISTORY

Jamaica was discovered by Columbus on 3 May, 1494. He landed probably at or near St. Ann's Bay, called by him Sancta Gloria, owing to the great beauty of the environs. Nine years later his caravels were wrecked at Puerto Bueno — the present Dry Harbour. He gave the name Santiago to the island, which was but partially colonized by the Spaniards, and was never popular with them. They first introduced horses, cattle, sheep, goats, pigs, and domestic poultry. To the Spaniards Jamaica is also indebted for the orange, lemon, lime, and other fruit trees; the coffee tree is due however to British initiative about the year 1721. From the constituents of the shell mounds throughout the island and the absence therefrom of all objects of a European character, it would appear that these accumulations represent the kitchen middens of the pre-Columban aboriginal inhabitants. These remains found principally in caves, comprise: (a) crania and other bones (human), (b) stone implements (celts, etc.), (c) objects of pottery (various), (d) ornamental beads (chalcedony), kitchen middens containing shells (principally marine), broken pottery, fish and coney bones, stone implements, and ashes. Their cottages were built on stockade posts set vertically side by side in a trench. For animal food they depended principally on the sea, and on their festivals or barbecues the entire village went out on marine or river excursions. Their gardens yielded arrow-root, beans, cassava, cucumbers, melons, maize, and yams; for fruit they cultivated the guava, mamee, papaw and star-apple. They cultivated cotton and wound it for cordage and twisted it into yarn for making garments. The only domestic animals were probably the muysa duck and the alca, a small dog. The aborigines were most probably a tribe of the Arawak Indians, and not Caribs, who were cannibals. The Arawaks were a gentle and inoffensive people as their name (meal-eaters) signifies. They believed in a Supreme Being (Jocahuna), in a future state, and had a tradition about a deluge. Their form of government was patriarchal. They smoked tobacco and played a football game called *bato*, in which both men and women joined.

Spanish Occupation

A review of the period of Spanish occupation is one which reflects very little credit on Spanish colonial administration in those days. Their treatment of the aboriginal inhabitants, whom they are accused of having practically exterminated, is a grave charge, and if true, cannot be condoned on the plea that such conduct was characteristic of the age, and that as bad or worse was perpetrated by other nations even in later years. In the few places where the Spaniards settled, they invariably built a church, sometimes a monastery, and occasionally a theatre. Sevilla-Nueva (or Sevilla d'Oro) was the capital of the island from 1510 till 1520, when Diego Columbo founded a new capital, Santiago de la Vega, which is now known as Spanish Town. In 1521 orders were received from Spain to cease from making the native Indians slaves. Las Casas, deservedly called "Protector-General of the Indians," was instrumental in inducing the pope to issue a Bull in 1542, restoring the Indians to freedom. Unhappily this concession came too late for the aboriginal inhabitants of the island. Soon after, Africans were imported into Jamaica as slaves. The discreditable failure to capture San Domingo by the expedition under Admiral Penn — father of the founder of Pennsylvania — and General Venables, described by Carlyle as "the unsuccessfulest enterprise Oliver Cromwell had concern with," ended in a successful descent on Jamaica, which was captured in May, 1655.

English Occupation

"To signalise the capture of St. Iago" by the English "a small leaven of Puritan feeling and a large amount of ruffianism led the troops into a display of energy. . . . The abbey and the two churches were demolished and the bells melted down for shot" (Gardner). The poet Milton, secretary to Cromwell, justified this invasion of the West Indies on the ground of "the most noble opportunities of promoting the Glory of God, and enlarging the bounds of the Kingdom of Christ, which we do not doubt will appear to be the chief end of our late expedition to the West Indies." The advent of the English adventurer gave a considerable impetus to trade with the outside world. The chief seaport of the island, now Port Royal, soon became "a nest of iniquity and a centre of rude luxury, the emporium of the loot of the buccaneer. . . . no form of vice was wanting, no indulgence too extravagant for its lawless population." But it paid the penalty of its lawlessness, being wiped out by an earthquake on 7 June, 1692, after which event Kingston, the present capital, was established. As a means of re-peopling the island, which was being decimated by fever, a large number of Royalists in Ireland were seized and sent out as slaves by the English. "As a result of Cromwell's Irish policy one thousand young women and the same number of young men were by order of the Council of State arrested in Ireland and shipped to Jamaica, while the sheriffs of several counties of Scotland were instructed to apprehend all known idle, masterless robbers and vagabonds, male and female, and transport them to the island" (Ellis). In 1660 the population of Jamaica was about 4500 whites and some 1500 negroes. Jamaica was ceded to England by the treaty of Madrid in 1670. On the accession of James II, the Duke of Albemarle (a Catholic), son of General Monk, was appointed governor of Jamaica. One of his suite was Sir Hans Sloane, founder of the British Museum.

Slavery

The war with the American colonies met with little sympathy in Jamaica. The assembly petitioned George III to grant more political autonomy to the struggling colonists. In 1778 France, which had recognized the independence of the new republic, was forced into war by England, and Jamaica, like the rest of the West Indies, suffered accordingly. Seven years later the maroons, or half-breed negroes, rose in rebellion, repulsed both the colonial militia and the regular troops, devastated large tracts of country, and were not finally overpowered till 1790. Some 600 of them, men, women, and children were deported to Nova Scotia, and subsequently to Sierra Leone. In the eighteenth century 700,000 negro slaves were landed in Jamaica. When, in 1807, the slave trade was abolished in the British colonies, there were some 320,000 slaves in Jamaica. Slavery was destined to continue there for more than another quarter of a century. The local Government, which consisted almost entirely of slave holders and sympathizers with slavery, was a negrophobic plutocracy, and the Anglican, or Episcopalian, clergy were in sympathy with the assembly, as they were dependent on it for their stipends. Ministers of other Protestant denominations were working for the education and enlightenment of the negroes, only to be reviled, hindered, and persecuted by the dominant party. A serious outbreak among the slaves occurred in 1831, property to the value of \$3,500,000 being destroyed. The law emancipating the slaves passed by the British Parliament was accepted by the Jamaica Assembly in 1833 under strong protests, and on 1 August, 1834, slavery was abolished in the island. The number of slaves for whom compensation was paid by the British Government was 225,290, the amount awarded having been \$29,269,875. As an immediate result of the emancipation of the negroes, the want of labourers was soon experienced. In 1844 immigration of hill-coolies from Hindustan was sanctioned by the Legislative Council. During the past sixty years, some 30,000 Hindu agricultural labourers have been imported into the island, of whom over 10,000 have, during the last twenty years, returned to India, taking back with them more than \$350,000 in government bills of exchange.

Catholic Revival

From the time of the expulsion of the Spaniards in 1655, and especially after the adoption of the Toleration Act of 1688, which "afforded liberty of conscience to all persons except papists" (Gardner), Catholic revival in the island was debarred. It was not until 1792 that the first instalment of freedom of worship was granted to them. Dr. Douglas, Vicar Apostolic of the London District, and ecclesiastical superior of the Catholics in the British West Indies, sent out an Irish Franciscan, Father Quigley, in 1798, who did pioneer work for seven years, and died in 1805. He was succeeded by Fathers Rodriguez d'Arango and Campos Benito, both Franciscans. By a Brief of Gregory XVI dated 10 January, 1837, the British West Indies were divided into three vicariates Apostolic: the Windward Islands, British Guiana and Jamaica. Father Benito was appointed first Vicar Apostolic of this island in 1837. The same year two Jesuits, Fathers Cotham, an Englishman, and Dupeyron, a Frenchman, arrived. They, with the Vicar Apostolic and Father Duquesnay, the first native of Jamaica raised to the priesthood, formed the whole ecclesiastical body. Asiatic cholera broke out in Jamaica in October, 1850, claiming over 30,000 victims; the Catholic clergy won the highest praise for their self-sacrifice and heroism during the plague. In 1835 the Vicar Apostolic, Benito, died and was succeeded by Father Dupeyron, S.J., the first Jesuit to act as Vicar Apostolic of Jamaica.

Jesuit Administration

We have now to deal with the mature development of the mission in the nineteenth century. Numerically it was small, but it had attracted public attention by its philanthropic and religious work. With the accession of Father Dupeyron the Jamaica mission came formally under the control of the Society of Jesus, and has remained so ever since. The new Vicar Apostolic, hampered like his predecessors by a paucity of labourers and scantiness of resources, could continue only to watch over and safeguard that which had already been effected.

In 1857 four Sisters of the Third Order Regular of St. Francis arrived in Jamaica from Glasgow, to instruct the coloured children. In a short time they opened a poor school and subsequently a high school for young ladies, both destined to do excellent work. In 1866 Father Joseph Sidney Woollett, S.J., of the English province, received sub-delegate powers of Vicar Apostolic. The following year Father Hathaway, S.J., arrived from England. He was a distinguished graduate of the University of Oxford, and had been a Fellow of Worcester College, and subsequently dean and bursar. In 1849 he accepted the incumbency of Shadwell, near Leeds. Becoming a Catholic in 1851, he joined the Society of Jesus at the age of thirty-eight. He was a most zealous, self-denying, hardworking priest, an eloquent and persuasive preacher, and a cultured scholar; yet for years he taught the poor school for boys (St. Joseph's), until his health broke down. He died in 1891. The number of Catholics in Jamaica in 1872 did not exceed 6000; the greater portion of them lived in Kingston, where there were two churches. Seven chapels supplied the wants of the sparsely scattered rural Catholic population. There were about 400 children, boys and girls, attending the convent schools and St. Joseph's in the capital. In August, 1880, a cyclone passed over the east end of the island, destroying nearly all the wharves in Kingston. The Catholic churches and schools were wrecked, but were soon replaced through the generosity of the faithful in England and the United States, and the efforts of Father Thomas Porter, S.J., Vicar Apostolic from 1877 till 1888. After some forty consecutive years of priestly labour, Father Joseph Dupont, S.J., died in 1887. To perpetuate his memory, the citizens of Kingston, irrespective of creed or class, erected a marble statue in the Parade Square of the city. The statue was overturned and broken by the earthquake of 1907.

Bishop Gordon

Before his arrival in Jamaica, the Right Reverend Charles Cordon, S.J., D.D., who succeeded Father Porter as Vicar Apostolic, had been consecrated Bishop of Thyatira *in partibus infidelium*. He set about supplying the most pressing needs of the mission. Efficient elementary schools were started. In 1891 Holy Trinity church was improved, a tower, the Lady chapel, a sacristy, and baptistery being added at a cost of \$12,500. Finally a hall to afford recreation and instruction for Catholic men, and for the meetings of the church guilds and sodalities, was completed in 1905 and named "Gordon Hall" after its founder. The hall and the church were both destroyed by the earthquake of 1907. Dr. Gordon also brought the Salesians into Jamaica, placing at their disposal a large property, Reading Pen, near Montego Bay, to be used for an agricultural college. In 1894 the care of the Jamaica mission was transferred to the Maryland-New York province of the Society, from the English province which had served it from the year 1855. In 1905 Father John Joseph Collins, S.J., was appointed administrator Apostolic of the vicariate, and in 1907 he was raised to the episcopacy as Bishop of Antiphellos *in partibus infidelium* and Vicar Apostolic of Jamaica.

Education

One of the first subjects to which the friends of emancipation turned their attention after the abolition of slavery was the education of the predial population of the West Indies. In Jamaica, however, there had been very little progress. The grant which had been made by the imperial Parliament was discontinued in 1844, and all that was done for elementary education in Jamaica was the grant of \$15,000 per annum by the legislature for the next twenty years. A training college for educating teachers was established in 1870. In 1850 some Spanish Jesuits, who had been banished from New Granada by the Liberal revolutionary party, arrived at Kingston and opened what was called the Spanish College and what is now St. George's College, a school of higher education for boys of the middle and upper classes. Most of the refugee priests left Jamaica shortly afterwards for Guatemala, but the work they inaugurated was carried on by Father Simond, S.J. The college was closed about 1865, and opened again in 1868. Many prominent men in the island of all denominations have been educated there. In 1870 it ceased to be a boarding establishment. On the coming of the American Jesuits, the college was transferred to Winchester Park, in the suburbs of Kingston.

Elementary education for Catholics had been left very much in abeyance up to Bishop Gordon's arrival in 1889. The convent primary school had not more than 150 children, St. Joseph's school for boys not as many, and some half-dozen schools in various parts of the island, with a fluctuating attendance of under one hundred, were all that represented Catholic elementary education in Jamaica. The advent of the Sisters of Mercy from the parent-house, Bermondsey, London, in December, 1890, soon gave an additional impetus to Catholic education. Fifteen years later there were in all some two thousand children attending the various schools of the Sisters of St. Francis, and considerably over one thousand in the schools of the Sisters of Mercy. In addition, there are two orphanages at the Convent of Mercy, as well as two industrial schools (under Government), and a high school for girls. A house of mercy has also been established for the protection of young women.

Recent Events

The history of the colony from 1850 till 1865 might be described as a political tempest in a teapot. The Assembly and the Executive were at a dead-lock. Trouble was brewing in the country. During 1864 a severe drought had greatly impoverished the people, and the American Civil War had increased the price of imported bread-stuffs. Agitators had called on the coloured population to assert themselves, and the cry of "colour for colour and blood for blood" was raised. A partial rebellion, limited to the parish of St. Thomas, broke out among the black population in 1865. Some magistrates and officials were butchered at the beginning of the outbreak, but martial law was proclaimed, and the rebellion was quickly suppressed by methods which a Royal Commission pronounced later to have been unnecessarily severe. The chief agitators were hanged, after which Governor Eyre was recalled by the British authorities and was succeeded by Sir John Peter Grant, during whose term of office (1865-74) a number of important reforms were introduced. He brought an order in council abolishing the Legislative Assembly and establishing Crown government. The new legislature was designated the "Legislative Council of Jamaica" consisting of the Governor, six official members, and three non-official members. A privy council was also provided; a new revenue system was established; the police were organized; and other useful departments — judicial, public works, and banks — were re-arranged or founded. In 1871 the State, or Anglican, Church in Jamaica was disestablished. The seat of the civil government was transferred from Spanish Town to Kingston during the same year. The Rio Cobre irrigation works completed at a cost of \$650,000 have in recent years converted the lowlands of the parish of St. Catherine into a huge banana plantation. In 1868 the cultivation of cinchona as an economic industry was started by Government; and the rapidly increase in banana trade between Port Antonio and the United States has been the salvation of the island financially during the last twenty-five years.

In Nov., 1875, a cyclone occurred, followed by another in Aug., 1880. The advent of Sir Henry Norman as governor to the colony in Dec., 1883, was signalized by the establishment of a revised constitution (promulgated by an order in council of Queen Victoria), consisting of a governor, a privy council, and a legislative council. The first is appointed by the sovereign for five years, and holds office during the sovereign's pleasure. The privy council consists of the senior military officer (not being below the rank of lieutenant-colonel), the colonial secretary, the attorney-general; and such other persons, not to exceed eight, provisionally appointed by the governor subject to the approval of the sovereign. The legislative council consists of the president (the governor), five ex-officio members, ten nominated members, and fourteen elected members (one for each of the fourteen parishes).

In 1890 the Jamaica Government Railway was sold to an American syndicate for \$500,000 in cash, and \$3,500,000 in second mortgage debentures. An international exhibition was opened (27 Jan., 1891), by the then Prince George of Wales. The guarantee fund was \$120,000, total visitors, 302,830. Sir Henry Blake was then administering the affairs of the colony as governor.

In 1893 a board of education was formed. The abolition of fees in elementary schools was provided for by a house tax. In 1896 a scheme for the sale of Crown lands to small settlers was instituted. In 1898 direct cable service between Jamaica and England was established. The Imperial Direct Line of steamers was inaugurated with \$200,000 annual subsidy — half from Jamaica, and half from the Imperial Government. Port Royal was created a separate parish in the same year.

AGRICULTURE AND COMMERCE

There is an agricultural society with some fifty affiliated branches in the various parishes of the island. Lectures and practical demonstrations have been organized by the society. Of the 2,500,000 acres of land in Jamaica, 1,310,000 are in wood and ruinate, and 775,000 under cultivation, 360,000 grazing land, and 215,000 under tillage). There are 143,000 acres of government or Crown land unoccupied. The following table shows the area under cultivation the last year of each of the three decades:

Year	Canes	Coffee	Cocoa	Ginger	Corn	Tobacco
Bananas 1885	40,500	19,650	415	148	925	86 ? 1895
30,970	23,640	1,687	84	384	230	18,850 1905 24,420
21,480	6,532	184	86	378	32,675	

In 1902-3 over 14,000,000 bunches of bananas valued at \$5,673,750 were exported. Over 95 per cent of these went to America. It was officially estimated that the loss to the island by the cyclone the following year, through destruction and damage to crops and buildings and loss of trade, was \$12,500,000. The estimated number of cattle, horses, etc. in the island in 1904-5 was: horned stock, 107,695; horses, 57,908; asses, 18,500.

Shipping

Number and tonnage of vessels that entered in the ports of the island for the year 1907:

Type	Nationality	Number	Tonnage	Sail	British	182
15,974	Sail Foreign	49	28,441	Steam	British	312 506,683
	Steam Foreign	932	968,189			

Quantity and value of the chief exports in 1907:

Commodity	Quantity	Value	Sugar	15,499	hhds.			
\$592,710	Rum	14,630	puns.	670,570	Coffee	54,861	cwts.	
442,320	Pimento	85,294	cwts.	394,480	Dyewood	34,004	tons	
417,560	Fruit	5,053,020	Tobacco	134,425	Minor		products	1,675,590

Thus the relative importance of the island's exports that year was: sugar 6.3, rum 7.1, coffee 4.7, dyewood 4.4, pimento 4.2, fruit 53.8, tobacco 1.4, minor products 17.8. Of the exports, 57.2 per cent in value went to the United States of America, and 29.8 per cent to the United Kingdom.

Currency

Gold and silver coins current in Great Britain and Ireland are legal tender to any extent, and local nickel pennies, half pennies, and farthings are legal tender to the extent of twelve pence (one shilling) in one payment. Paper money consists of the notes of the Colonial Bank, and of the Bank of Nova Scotia, of 1 to 5 pounds sterling and upwards. The other coins here are American gold coins. English weights and measures are in use in the colony. There are three daily newspapers published at Kingston and twelve others (six weekly, four monthly, and two quarterly) at Kingston and other parts of the island.

Means of Communication

The whole length of main roads on the island aggregates close on 2000 miles; they are sufficiently broad almost everywhere for a double line of traffic, and are generally maintained in excellent condition. The first railway in Jamaica was opened between Kingston and Spanish Town in 1845. It was extended to Old Harbour in 1867, and from there to Porus in 1885, as well as the branch line to Ewarton from Spanish Town in the same year. In 1890 American capitalists extended the line to Montego Bay, a distance of 113 miles, and to Port Antonio, a distance of 54 miles. An electric tram line, some 24 miles in extent, serves Kingston and its suburbs. The first steamship communication between Jamaica (Kingston) and the United States (New York) was begun in 1860. Jamaica joined the Universal Postal Union in 1877. There is a fortnightly mail service to and from England direct, also one via New York, a weekly service to the United States. There are 160 post and 64 telegraph offices in the island — and two lines of cables connect Jamaica with America.

THE EARTHQUAKE OF 1907

A shock of earthquake of great severity occurred about 3:30 p.m. on Monday, 14 January, 1907. It lasted for upwards of twenty seconds; its greatest intensity was experienced along the foreshore of Kingston harbour. A large proportion of the buildings of the capital were either destroyed or badly damaged. The injuries to the submarine cables indicated that the gravamen of the shock was experienced at a depth of about a mile. The greater part of the business area of the city was destroyed, most of it by fire. The loss of life and property was estimated at about 800 persons and about \$10,050,000 (Handbook of Jamaica, 1909). Almost of the churches in the city were either completely wrecked or damaged beyond repair, and the majority of the public buildings, institutions, and the two convents, and their schools suffered equally. The cataclysm was one of the most calamitous events which has occurred in the history of the colony. Generous offers of pecuniary aid were made by most of the large cities of the United States, but were declined by the local Government. Some of the ships of the United States Atlantic fleet landed a party of medical officers, and equipment for the temporary field hospital at the Jesuits' college at Winchester Park. These surgeons did excellent work. A body of American marines was landed at the request of the authorities to quell an uprising among the prisoners at the general penitentiary. This action was subsequently taken exception to by the governor, and consequently the American admiral had no alternative but to withdraw his squadron, leaving, however, supplies, medicines, etc. for the use of the sufferers. Subsequently the Imperial Government expressed regret at the action of its representative, who shortly afterwards resigned. A Mansion House (London) fund to relieve the distress was promptly started, and realized some \$277,000. A free grant was made by the Imperial Parliament of \$750,000 and a temporary loan of \$4,000,000 at 3 per cent. The funds subscribed from all sources were distributed by a relief committee. Up to 31 Dec., 1908, loans to the value of \$1,317,150 had been made. Thanks to the energy of Dr. Collins, the Vicar Apostolic, most of the damaged Catholic schools were repaired or rebuilt in a few months. A new Catholic church dedicated to the Holy Trinity is being erected near Winchester Park in place of the former one which was ruined by the earthquake.

DEPENDENCIES

The Turks and Caicos Islands, which geographically form part of the Bahama group, are dependencies of Jamaica. They have an area of 162.5 square miles and a population of some 5300. The exports are salt and sponges. The seat of government is at Grand Turk, the town containing 1750 inhabitants. The Cayman Islands, having an area of about 225 square miles, are situated some 180 miles to the W.N.W. of Negril Point, Jamaica. They were discovered by Christopher Columbus and named by him Las Tortugas, on account of the turtles with which the coast swarmed. The estimated population of the three islands, Grand Cayman, Cayman Brac, and Little Cayman, is 5000 for the largest island, and about 1000 between the two smaller islands. The exports are coconuts, turtles, phosphates, ropes, cordage, etc., made from the palm-thatch which grows in abundance. Shipbuilding to a limited extent goes on; sloops and schooners of from 40 to 70 tons register are built from native woods, mahogany, cedar, calabash, cashaw, etc., and sold in Cuba. The Cayman group has an administrator and local justices and forms a dependency under the jurisdiction of Jamaica.

J.F. DONOVAN

Jamay, Denis

Denis Jamay

Franciscan, missionary, date and place of birth unknown; died in France, 1625; an important figure in the early history of the Church in Canada. In 1615 he was chosen by his superiors in France as provincial commissary and chief of the first band of Recollect friars, who were also the first missionaries of Canada. Leaving France on the 24 April, 1615, he arrived at Tadoussac on 24 May, and went immediately with Champlain to meet the savages at Sault St. Louis. On 24 June, 1615, at Riviere des Prairies, he celebrated the first Mass said in the country by its first missionaries. In

1616 Father Jamay returned to France with Champlain to urge before the king and the "Associates" of Rouen the material and spiritual interests of the colony. In 1620, again elected commissary provincial, he returned to Canada with Champlain and his wife. On reaching Quebec he exhorted the colonists to obey the viceroy and his lieutenant, Champlain. Having completed the first regular convent of the Recollects at Quebec, he blessed it and dedicated it to Our Lady of the Angels. He returned to France in 1621.

ODORIC-M. JOUVE

Epistle of St. James

Epistle of St. James

The questions concerning this epistle are treated in the following order:

- I. Author and Genuineness;
- II. Tradition as to the Canonicity;
- III. Analysis and Contents of the Epistle;
- IV. Occasion and Object;
- V. To whom addressed;
- VI. Style;
- VII. Time and Place of composition.

I. AUTHOR AND GENUINENESS

The author is commonly identified with the Lord's brother, the Bishop of Jerusalem (see ST. JAMES THE LESS; the view that the Lord's brother must be identified with James, the son of Alphaeus, is by far the most probable). Internal evidence (contents of the Epistle, its style, address, date, and place of composition) points unmistakably to James, the Lord's brother, the Bishop of Jerusalem, as the author; he exactly, and he alone, fulfils the conditions required in the writer of the Epistle. External evidence begins at a comparatively late date. Some coincidences, or analogies, exist between the Epistle and the Apostolic Fathers (Clement of Rome, the Pastor Hermas, St. Justin, St. Irenæus; see Mienertz, "Der Jacobusbrief", Freiburg im Br., 1905, p. 55 sqq.). The literary relation between the Epistle of James and the Epistle to the Romans is doubtful. Its later recognition in the Church, especially in the West, must be explained by the fact that it was written for Jewish Christians, and therefore not widely circulated among the Gentile Churches. From the middle of the third century, ecclesiastical authors cite the Epistle as written by St. James, the brother of the Lord. See the testimonies in the section following. The greater number of the Fathers in the Western Church identify

the author with James the Apostle. In the Eastern Church, however, the authority of Eusebius and St. Epiphanius may explain some ecclesiastical doubts about the Apostolic origin of the Epistle, and consequently about its canonicity.

II. TRADITION AS TO CANONICITY

In the first centuries of the Church the authenticity of the Epistle was doubted by some, and amongst others by Theodore of Mopsuestia; it is therefore deutero-canonical. It is wanting in the Muratorian Canon, and because of the silence of several of the Western Churches regarding it, Eusebius classes it amongst the *Antilegomena* or contested writings (Hist. eccl., III, xxv; II, xxiii); St. Jerome gives the like information (De vir. ill., ii), but adds that with time its authenticity became universally admitted. In the sixteenth century its inspired nature was contested by Erasmus and Cajetan; Luther strongly repudiated the Epistle as "a letter of straw", and "unworthy of the apostolic Spirit", and this solely for dogmatic reasons, and owing to his preconceived notions, for the epistle refutes his heretical doctrine that Faith alone is necessary for salvation. The Council of Trent dogmatically defined the Epistle of St. James to be canonical. As the solution of this question of the history of the canonicity of the Epistle depends chiefly on the testimony of the ancient Fathers, it remains to be seen whether it is quoted by them as Scripture. (a) In the Latin Church it was known by St. Clement of Rome (before A.D. 100), the Pastor Hermas (about A.D. 150), St. Irenæus (125?-202?, 208), Tertullian (d. about 240), St. Hilary (d. 366), St. Philaster (d. 385), St. Ambrose (d. 397), Pope Damasus (in the canon of about A.D. 382), St. Jerome (346-420), Rufinus (d. 410), St. Augustine (430), and its canonicity is unquestioned by them. (b) In the Greek Church, Clement of Alexandria (d. 217), Origen (d. 254), St. Athanasius (d. 373), St. Dionysius the Areopagite (about A.D. 500), etc., considered it undoubtedly as a sacred writing. (c) In the Syrian Church, the Peshito, although omitting the minor Catholic Epistles, gives that of St. James; St. Ephraem uses it frequently in his writings. Moreover, the most notorious heretics of Syria recognised it as genuine. Thus we find that Nestorius ranked it in the Canon of Sacred Books, and James of Edessa adduces the testimony of James, v, 14. The Epistle is found in the Coptic, Sahidic, Ethiopic, Arabic, and Armenian versions. Although, therefore, the canonicity of the Epistle of St. James was questioned by a few during the first centuries, there are to be found from the very earliest ages, in different parts of the Church, numerous testimonies in favour of its canonicity. From the end of the third century its acceptance as inspired, and as the work of St. James, has been universal, as clearly appears from the various lists of the Sacred Books drawn up since the fourth century.

III. ANALYSIS AND CONTENTS OF THE EPISTLE

The subjects treated of in the Epistle are many and various; moreover, St. James not infrequently, whilst elucidating a certain point, passes abruptly to another, and presently resumes once more his former argument; hence it is difficult to give a precise division of the Epistle. It is doubtful whether the sacred writer intended any systematic arrangement of subject; indeed, it is more probable that he did not, for in the Hebrew Sapiential Books of the Old Testament, Proverbs, Ecclesiastes, Ecclesiasticus, to which the present Epistle may in many ways be likened, the order in which the moral sentences stand does not seem to suggest any connection between them. It will therefore be more expedient to give a simple enumeration of the subjects treated in the Epistle:

- Inscription (i, 1);
- persecutions are to be borne with patience and joy (2-4);
- wisdom must be asked of God with confidence (5-8);
- humility is recommended (9-11);
- God is not the author of evil but of good (12-18);
- we must be slow to anger (19-21);
- not faith only, but also good works are necessary (22-27).
- Against respect of persons (ii, 1-13);
- another exhortation to good works (14-26).
- Against the evils of the tongue (iii, 1-12);
- against envy and discord, 13-18.
- Against wars and contentions (iv, 1-3);
- against the spirit of this world and pride (4-10);
- against detraction (11-13a);
- against vain confidence in worldly things (13b-16).
- Against the rich that oppress the poor (v, 1-6);
- exhortation to patience in the time of oppression (7-11), and to avoid swearing (12);
- of the anointing of the sick (13-15);

- of prayer (16);
- we must have at heart the conversion of sinners (19-20).

This enumeration shows that St. James inculcates especially: patience and perseverance in adversity, temptations, and persecutions; the necessity of good works, mercy, and charity. For the question of apparent opposition between St. James and St. Paul with regard to "faith and works" see EPISTLE TO THE ROMANS.

IV. OCCASION AND OBJECT

A. Occasion

St. James seems to have been moved to write his Epistle on witnessing that the first fervour of the Jewish Christians had grown cold, and that, owing to various causes, both external and internal, a certain spirit of discouragement had declared itself amongst them.

(1) *External Causes.* The new Christian converts found themselves at first the object of the indifference only of their fellow townfolk, the greater number of whom still remained in unbelief; but this attitude very soon changed to one of hostility and even persecution. These early converts, belonging as they mostly did to the poorer classes, found themselves oppressed by the wealthy unbelievers; some were refused employment, others were denied their wages (v, 4); at other times they were mercilessly dragged before the tribunals (ii, 6); they were persecuted in the synagogues, and were, besides, reduced to extreme want and even starvation (ii, 15-17).

(2) *Internal Causes.* In the midst of these trials the faith of many began to languish (ii, 14, 20, 26), and the evil ways they had abandoned at their conversion were gradually indulged in once more. Thus it came to pass that the poor were despised in the sacred assemblies (ii, 1-9); there were breaches of brotherly charity (ii, 7); some arrogated to themselves the office of teacher who were unfitted (iii, 1, 13); many were guilty of detraction and other sins of the tongue (iii, 1-12; iv, 11-13); there were contentions and lawsuits (iv, 1-2); some indulged in swearing (v, 12); others neglected assiduous prayer (v, 13, 17-18); pride and vainglory were yielded to (iv, 6-10); even some of the sacred rites seem to have been overlooked (v, 14-16). Such were the evils that the Epistle sought to remedy.

B. Object

St. James wrote his Epistle for a moral purpose, and addressed his co-religionists as their pastor, in his quality of Bishop of Jerusalem, in order: (1) to exhort them to constancy in the faith in spite of the persecutions and trials they were undergoing, and to give them comfort in their tribulations; (2) to correct the abuses and extirpate the evils amongst them, by urging them to make their conduct conformable to their faith,

and by earnestly reminding them that faith alone would not save them unless they added good works.

V. TO WHOM ADDRESSED

St. James wrote his Epistle for the Jewish Christians outside Palestine, who, for the greater part, were poor and oppressed. This we gather with certitude from the inscription (i, 1), and from various indications in the text.

A. The words, i, 1, "to the twelve tribes" can mean the whole Jewish nation; but the words following, "which are scattered abroad", designate clearly the Jews of the Dispersion. The Jews in Palestine, surrounded by Gentiles, were not considered as "scattered abroad". That he addressed the Jewish Christians only becomes evident by the fact that the author styles himself "the servant of God, and of our Lord Jesus Christ", and by this title he indicates clearly that he writes to the disciples of Christ only.

B. That the readers were Jewish appears still more evidently from the Epistle itself. St. James takes for granted that those whom he addressed were well versed in the writings of the Old Testament. Moreover, he calls them not only his "brethren", which name taken by itself does not remove all doubt, but he so clearly shows them to be Christians that it is incomprehensible how any critics understand unconverted Jews to be the "brethren" to whom the Epistle was written. Thus in i, 18, he writes to those whom God "of his own will hath begotten by the word of truth, that they might be some beginning of his creature"; in ii, 1, he admonishes them as follows: "My brethren, have not the faith of our Lord Jesus Christ of glory with respect to persons"; in ii, 7, he refers to them when he writes of "the good name [of Christ] that is invoked upon you"; in v, 7, they are to be patient "until the coming of the Lord"; etc. Further proof is afforded by the date of composition.

C. The context does not reveal who were the particular Jewish converts, to whom the Epistle was addressed. We gather, however, that St. James appeals to certain Christians, labouring under the stress of particular circumstances, in order to warn them against special perils; no one will easily admit that the vices against which he inveighs and the errors which he condemns were to be met with in each and every community of Jewish converts. Therefore the conclusion that he addressed some particular Churches forces itself upon our minds. As, according to the most probable opinion, the Epistle was not written later than about A.D. 50, we may conclude that it was written to some of the Churches of Syria or of another country not far distant from Jerusalem.

VI. STYLE

The style is sententious, figurative, often poetical, and may be compared to that of the Prophetical and Sapiential Books of the Old Testament. It is rapid, betrays

emotion, and is not wanting in those vehement outbursts of feeling customary with the writers of that period, and which so powerfully set the force of the argument before the reader. It has already been noticed that the different sentences of the Epistle may be divided into hemistichs of parallel meaning; this is quite in keeping with the distinctly Hebraic style of the whole Epistle; it is a well known fact that the classical period is not found in Hebrew, but that the short members of a proposition are continually in juxtaposition.

VII. TIME AND PLACE OF COMPOSITION

A. Time

The Epistle was probably written about A.D. 47. The reference to the persecutions (ii, 6) is in the present tense, and indicates a stage of suffering which has not yet receded into the past of history. Now, in A.D. 44 the Churches of Judea were exposed to the persecution inflicted by Herod Agrippa, in which James, the son of Zebedee, was murdered (Acts, xii, 1 sqq.). Moreover, the author could not have written after the Council of Jerusalem (A.D. 51), where James acted as president, without some allusion to his decision unanimously accepted (Acts, xv, 4 sqq.). Another indication also derived from indirect internal evidence, is an allusion to the hungry and naked poor (of Jerusalem, ii, 15 sqq.); they suffered probably from the famine foretold by Agabus (Acts, xi, 28-30), and usually identified with one mentioned by Josephus (Antiq., XX, ii, 5), A.D. 45.

B. Place of Composition

The Epistle was probably written by St. James in Jerusalem; this we may conclude from the study of the life of the author (see JAMES THE LESS, SAINT), and this opinion finds favour with nearly all its critics.

Consult Introductions to the New Testament. It will suffice to indicate some recent commentaries and special studies in which the earlier bibliography is mentioned. A. CAMERLYNCK

James of Brescia

James of Brescia

Theologian of the fifteenth century. He entered the Dominican Order at Brescia, his native city, and in 1450 was appointed to the office of inquisitor. He aided the papal auditor, Bernardo da Bosco, in putting an end to the teaching of impious doctrines at Bergamo. He also took a prominent part in the controversy between the Dominicans and the Minorites with regard to the Precious Blood. During Easter Week, 1462, St. James of the Marches, a celebrated Minorite preacher, maintained in a sermon at Brescia that the Blood separated from the Body of Christ during His Passion was thereby separated from His Divinity, and consequently was not entitled to adoration during the time that Christ remained in the sepulchre. As this doctrine had been proscribed by Clement VI in 1351, James of Brescia cited James of the Marches to appear before his tribunal in case he should not retract. A dispute at once arose between the Dominicans and Friars Minor. Shortly before, in a Bull written at Tivoli, Pius II had declared that it was not contrary to Christian Faith to hold that Christ did not reassume *a part* of the Blood he shed in His Passion. This declaration narrowed down the controversy to the question: Whether the Blood which Christ shed in His Passion and *re-assumed* at His Resurrection was adorable as the Blood of the Son of God during the three days that it was separated from His Body. The affirmative was maintained by the Dominicans, the negative by the Minorites. The pope ordered a solemn disputation to be held before the pontifical court at Christmas, 1462 (1463, according to many). James of Brescia was one of three theologians who represented the Dominicans. Among the Minorite champions was Francesco della Rovere, later Pope Sixtus IV. After a debate of three days, a consultation was held by the pope and the cardinals, but no definitive decision was pronounced. In a Constitution dated 1 August, 1464, two weeks before his death, Pius forbade all further disputation on the subject. A full presentation of the Dominican side of this controversy is preserved in an unpublished treatise written by James of Brescia and his two colleagues. Other theological works attributed to James are no longer extant.

J.A. MCHUGH

James of Edessa

James of Edessa

A celebrated Syrian writer, b. most likely in A.D. 633; d. 5 June, 708. He was a native of the village of `En-debha, in the district of Gumyah, in the province of Antioch. During several years he studied Greek and Holy Writ at the famous convent of Kennesrhe, on the left bank of the Euphrates, opposite Europus (Carchemish). After his return to Syria he was appointed Bishop of Edessa, about A.D. 684, by the Patriarch Athanasius II, his former fellow-student. Equally unable to enforce canonical rules and to connive at their infringement, he resigned his see after a four years' episcopate, and withdrew to the convent of Kaisum (near Samosata), while the more lenient Habhibh succeeded him as Bishop of Edessa. Shortly afterwards he accepted the invitation of the monks of Eusebhona (in the Diocese of Antioch) to reside at their convent, and there he commented for eleven years on the Sacred Scriptures in the Greek text, doing his utmost to promote the study of the Greek tongue. Owing to the opposition which he met on the part of some of the monks who did not like the Greeks, he betook himself to the great convent of Tell-'Adda (the modern Tell-'Addi), where, for nine years more, he worked at his revision of the Old Testament. Upon Habhibh's death he took possession again of the episcopal See of Edessa, resided in that city for four months, and then went to Tell-Adda to fetch his library and his pupils, but died there. James of Edessa was a Monophysite, as is proved by the prominent part he took in the synod which the Jacobite patriarch Julian convened in 706, and by one of his letters in which he speaks of the orthodox Fathers of Chalcedon as "the Chalcedonian heretics". In the literature of his country he holds much the same place as St. Jerome does among the Latins (Wright). For his time, his erudition was extensive. He was not only familiar with Greek and with older Syriac writers, but he also had some knowledge of Hebrew, and willingly availed himself of the aid of Jewish scholars, whose views he often records. His writings, which are not all extant, were very varied and numerous. Among them may be noticed first, his important revision of the Old Testament. This work was essentially Massoretic. James divided the Sacred Books into chapters, prefixing to each chapter a summary of its contents. He supplied the text with numerous marginal notes, of which one part gives readings from the Greek and the Syrian versions at his disposal, and the other part indicates the exact pronunciation of the words of the text. Some of the notes contain extracts from Severus of Antioch; while, at times, glosses are inserted in the text itself. Unfortunately, only portions of this revision have come down to us. These are: practically the whole Pentateuch and the Book of Daniel, preserved in the Bibliothèque Nationale at Paris (Syric. nos. 26, 27); the two Books of Samuel with the

beginning of Kings, and the prophecy of Isaias, found in the British Museum (Add. 14429, 14441). The other principal writings of James of Edessa on Biblical topics are: (1) his unfinished "Hexameron", or work on the six days of creation, which is divided into seven treatises, and which opens with a dialogue between the author and Constantine, one of his disciples. James's "Hexameron" is preserved in two MSS., one of which is found in Leyden, and the other in Lyons; (2) commendaries and *scholia* on the Sacred Writings of both Testaments, which are cited by later authors such as Dionysius bar-Salibi, Bar-Hebraeus, and Severus. Some of his *scholia* have been published in the Roman edition of the works of St. Ephraem, and, at different times, by Phillips, Wright, Schröter, and Nestle; (3) letters treating of questions relative to Holy Writ, and mostly yet unpublished. As a liturgical author, James of Edessa drew up an anaphora, or liturgy, revised the Liturgy of St. James, wrote the celebrated "Book of Treasures", composed orders of baptism, of the blessing of water on the eve of the Epiphany, and of the celebration of matrimony, to which may be added his translation of Severus's order of Baptism, etc. He is also the author of numerous canons; of important homilies, a few of which survive in MS; of a valuable "Chronicle" which he composed in 692, and of which a few leaves only are extant; of an "Enchiridion", or tract on technical philosophical terms; of a translation of the "Homiliae Cathedrales", written in Greek by Severus of Antioch; and of the "Octoechus" by the same author; of a biography of James of Sarugh, of a translation from the Greek of the apocryphal "History of the Rechabites", of a Syriac grammar, a few fragments of which are extant in Oxford and London, and in which he advocated and illustrated a novel system of indicating the vocalic element not found in the Syrian alphabet; and, finally, of an extensive correspondence with a large number of persons throughout Syria.

FRANCIS E. GIGOT

James of Sarugh

James of Sarugh

A writer of the Syrian Church "the flute of the Holy Spirit and the harp of the believing church"; b. at Kurtam, 451, probably in the district of Sarugh; his father was a priest; d. at Batnan 29 Nov., 521. Three biographies of him are extant in Syriac: first by James of Edessa (seventh century), the second anonymous, and the third by a certain George, probably George, Bishop of Sarugh, contemporary of James of Edessa. We do not know where he was educated, nor when and how he was ordained to the priesthood. He became "periodeutes" or "chorepiscopus" of Haura in the district of Sarugh, whence in 502 he wrote to the city of Edessa, threatened by the Persians, and in 519 to the Christians of Najran: in 519 he became Bishop of Batnan, the chief city of Sarugh. Assemani (*Bibliotheca Orientalis*, I, 290 sq.) has endeavoured indeed to prove against Renaudot the orthodoxy of James of Sarugh, but from this writer's letters to the monks of the convent of Mar-Bassus (published by Martin in the *"Zeitschrift der deutschen morgenl. Gesellschaft"*, XXX, 217 sqq.) it is evident that he was always a Monophysite and continued such to his death. However, he took practically no share in the Christological polemics of his time and devoted his activity to study and literature. He is especially famous for his metrical homilies in the dodecasyllabic verse of which, says Bar-Hebraeus, he composed seven hundred and sixty. Of these barely one-half has come down to us, and a few only have been published, e.g. on Simeon Stylites (in Assemani, *"Acta Martyrum"*, II, 230 sqq.), on virginity, fornication, etc. (in Overbeck, *"S. Ephraemi Syri . . . opera selecta"*, pp. 385 sq.), two on the Blessed Virgin Mary (in Abbeloos, *"De vita et scriptis S. Jacobi Sarugensis"*, Louvain, 1867), on the chariot of Ezechiel (in Moesinger, *"Monum. Syr."*, II). He wrote the first one (on Ezechiel's chariot) when only twenty-two years of age. His prose writings were comparatively few. The most important besides the letters already mentioned are a letter to Paul of Edessa of 519, a letter to the pantheist Bar-Sudaili published by Frothingham (*"Stephen Bar-Sudaili. etc."*, Leyden, 1886, p. 10 sqq.), a liturgy (tr. Renaudot, *"Liturg. Orient. Collectio"*, II, 356), an order of baptism (ed. and tr. Assemani, *"Cod. Liturg. Eccl. Univ."*, II, 309, III, 184), festal homilies (Ger. tr. Zingerle, *"Sechs Hom. d. heil. Jacob v. Sarug"*, 1867).

H. HYVERNAT

St. James of the Marches

St. James of the Marches

Franciscan, b. of a poor family named Gangala, at Monteprandone, March of Ancona, Italy, 1391; d. at Naples, 28 Nov., 1476. He is generally represented holding in his right hand a chalice, out of which a snake is escaping --an allusion to some endeavours of heretics to poison him or, less likely, to the controversy about the Precious Blood. He began his studies at Offida under the guidance of his uncle, a priest, who soon afterwards put him to school at Ascoli. At the University of Perugia he took the degree of Doctor in Civil Law. After a short stay at Florence as tutor in a noble family, and as judge of sorcerers, James was received into the Order of the Friars Minor, in the chapel of the Portiuncula, Assisi, 26 July, 1416. Having finished his novitiate at the hermitage of the Carceri, near Assisi, he studied theology at Fiesole, near Florence, under St. Bernardine of Siena. On 13 June, 1420, he was ordained priest, and soon began to preach in Tuscany, in the Marches, and Umbria; for half a century he carried on his spiritual labours, remarkable for the miracles he performed and the numerous conversions he wrought. From 1427 James preached penance, combated heretic, and was on legations in Germany, Austria, Sweden, Denmark, Bohemia, Poland, Hungary, and Bosnia. In the last-mentioned country he was also commissary of the Friars Minor. At the time of the Council of Basle he promoted the union of the moderate Hussites with the Church, and that of the Greeks at the Council of Ferrara-Florence. Against the Turk, he preached several crusades, and at the death of St. John Capistran, in 1456, James was sent to Hungary as his successor. In Italy he fought the Fraticelli instituted several *montes pietatis*, and preached in all the greater cities; Milan offered him the bishopric in 1460, which he declined. St. James belonged to the Observant branch of the Friars Minor, then rapidly spreading and exciting much envy. How much he suffered on this account is shown in a letter written by him to St. John Capistran, published by Nic. Dal-Gal, O.F.M., in "Archivum Franciscanum Historicum", I (1908), 94-97. Under Callistus III, in 1455, he was appointed an arbiter on the questions at issue between Conventuals and Observants. His decision was published 2 Feb., 1456, in a papal Bull, which pleased neither part. A few years later, on Easter Monday, 1462, St. James, preaching at Brescia, uttered the opinion of some theologians, that the Precious Blood shed during the Passion was not united with the Divinity of Christ during the three days of His burial. The Dominican James of Brescia, inquisitor, immediately cited him to his tribunal. James refused to appear, and after some troubles appealed to the Holy See. The question was discussed at Rome, Christmas, 1462 (not 1463, as some have it), before Pius II and the cardinals, but no decision was given. James spent

the last three years of his life at Naples, and was buried there in the Franciscan church of S. Maria la Nuova, where his body is still to be seen. Beatified by Urban VIII, 1624, he was canonized by Benedict XIII, 1726. Naples venerates him as one of its patron saints (feast, 28 Nov.).

The works of St. James of the Marches have not as yet been collected. His library and autographs are preserved in part at the Municipio of Montepandone (see Crivellucci, "I codici della libreria raccolta da S. Giacomo della Marca nel convento di S. Maria delle Grazie presso Montepandone", Leghorn, 1889). He wrote "Dialogus contra Fraticellos" printed in Baluze-Mansi, "Miscellanea", II, Lucca, 1761, 595-610 (cf. Ehrle in "Archiv für Litt. u. Kirchengeschichte", IV, Freiburg im Br., 1888, 107-10). His numerous sermons are not edited. For some of them, and for his treatise on the "Miracles of the Name of Jesus", see Candido Mariotti, O.F.M., "Nome di Gesù ed i Francescani", Fano, 1909, 125-34. On his notebook, or "Itinerarium", See Luigi Tasso, O.F.M., in "Miscellanea Franciscana", I (1886), 125-26: "Regula confitendi peccata" was several times edited in Latin and Italian during the fifteenth century. "De Sanguine Christi effuse" and some other treatises remained in manuscript.

LIVARIUS OLIGER

James Primadicci

James Primadicci

(Or Primadizzi.)

Born at Bologna; died in the same city in 1460. As early as the year 1426 he was known to his brethren of the Franciscan Order as an ardent promoter of the strict observance of the rule. When in 1431 Eugene IV had given orders that from among the Observantine friars then assembled in chapter at Bologna, the six ablest men be set apart to be engaged exclusively by the Holy See on grave and difficult missions, James was deemed worthy of this distinction. Accordingly, in 1437, the same pontiff placed him at the head of a legation consisting of Friars Minor, commissioned to prepare the way for the union of the Armenia Church with the Holy See. The undertaking proved successful owing chiefly to the efforts of James, as may be gathered from a letter of the Imperial Council at Caffia to Eugene IV. Hence in 1439 James was privileged to present to legates of the Armenian Patriarch to the Fathers of the Council at Florence. Again, in 1444, his name appears on the long list of Friars Minor whom the pope had sent out as his nuncios to solicit the aid of the princes and people of Europe in the matter of a projected crusade. To James was assigned the Exarchate of Ravenna. Later on, his power and jurisdiction were extended over the whole of Italy. At the end of the following year he journeyed to the East in the capacity of papal commissary. From 1446 to 1449 James held the office of vicar general of the Cismontane branches of the Observance. In 1447 he convened a chapter at St. Mary of the Angels (Assisi), on which occasion new statutes were drawn up. God has been pleased to glorify the zealous Franciscan since his death by numerous miracles.

THOMAS PLASSMANN

St. James the Greater

St. James the Greater

(Heb. *Yakob*; Sept. *Iakob*; N.T. Greek *Iakobos*; a favourite name among the later Jews).

The son of Zebedee (q.v.) and Salome (Cf. [Matthew 27:56](#); [Mark 15:40](#); 16:1). Zahn asserts that Salome was the daughter of a priest. James is styled "the Greater" to distinguish him from the Apostle James "the Less," who was probably shorter of stature. We know nothing of St. James's early life. He was the brother of John, the beloved disciple, and probably the elder of the two.

His parents seem to have been people of means as appears from the following facts.

- Zebedee was a fisherman of the Lake of Galilee, who probably lived in or near Bethsaida (John, i, 44), perhaps in Capharnaum; and had some boatmen or hired men as his usual attendants (Mark, i, 20).
- Salome was one of the pious women who afterwards followed Christ and "ministered unto him of their substance" (cf. Matt., xxvii, 55, sq.; Mark, xv, 40; xvi, 1; Luke, viii, 2 sq.; xxiii, 55-xxiv, 1).
- St. John was personally known to the high-priest (John, xviii, 16); and must have had wherewithal to provide for the Mother of Jesus (John, xix, 27).

It is probable, according to [Acts 4:13](#), that John (and consequently his brother James) had not received the technical training of the rabbinical schools; in this sense they were unlearned and without any official position among the Jews. But, according to the social rank of their parents, they must have been men of ordinary education, in the common walks of Jewish life. They had frequent opportunity of coming in contact with Greek life and language, which were already widely spread along the shores of the Galilean Sea.

Relation of St. John to Jesus

Some authors, comparing [John 19:25](#) with [Matthew 28:56](#) and [Mark 15:40](#), identify, and probably rightly so, Mary the Mother of James the Less and of Joseph in Mark and Matthew with "Mary of Cleophas" in John. As the name of Mary Magdalen occurs in the three lists, they identify further Salome in Mark with "the mother of the sons of Zebedee" in Matthew; finally they identify Salome with "his mother's sister" in John. They suppose, for this last identification, that four women are designated by John, xix, 25; the Syriac "Peshito" gives the reading: "His mother and his mother's sister, and Mary of Cleophas and Mary Magdalen." If this last supposition is right, Salome was a sister of the Blessed Virgin Mary, and James the Greater and John were first cousins of the Lord; this may explain the discipleship of the two brothers, Salome's request and their own claim to the first position in His kingdom, and His commendation of the Blessed Virgin to her own nephew. But it is doubtful whether the Greek admits of this construction without the addition or the omission of *kai* (and). Thus the relationship of St. James to Jesus remains doubtful.

His life and apostolate

The Galilean origin of St. James in some degree explains the energy of temper and the vehemence of character which earned for him and St. John the name of *Boanerges*,

"sons of thunder" ([Mark 3:17](#)); the Galilean race was religious, hardy, industrious, brave, and the strongest defender of the Jewish nation. When John the Baptist proclaimed the kingdom of the Messiah, St. John became a disciple ([John 1:35](#)); he was directed to "the Lamb of God" and afterwards brought his brother James to the Messiah; the obvious meaning of John, i, 41, is that St. Andrew finds his brother (St. Peter) first and that afterwards St. John (who does not name himself, according to his habitual and characteristic reserve and silence about himself) finds his brother (St. James). The call of St. James to the discipleship of the Messiah is reported in a parallel or identical narration by [Matthew 4:18-22](#); [Mark 1:19](#) sq.; and [Luke 5:1-11](#). The two sons of Zebedee, as well as Simon (Peter) and his brother Andrew with whom they were in partnership ([Luke 5:10](#)), were called by the Lord upon the Sea of Galilee, where all four with Zebedee and his hired servants were engaged in their ordinary occupation of fishing. The sons of Zebedee "forthwith left their nets and father, and followed him" ([Matthew 4:22](#)), and became "fishers of men". St. James was afterwards with the other eleven called to the Apostleship (Matt., x, 1-4; Mark, iii, 13-19; Luke, vi, 12-16; Acts, i, 13). In all four lists the names of Peter and Andrew, James and John form the first group, a prominent and chosen group (cf. Mark, xiii, 3); especially Peter, James, and John. These three Apostles alone were admitted to be present at the miracle of the raising of Jairus's daughter (Mark, v, 37; Luke, viii, 51), at the Transfiguration (Mark, ix, 1; Matt., xvii, 1; Luke, ix, 28), and the Agony in Gethsemani (Matt., xxvi, 37; Mark, xiv, 33). The fact that the name of James occurs always (except in Luke, viii, 51; ix, 28; Acts, i, 13--Gr. Text) before that of his brother seems to imply that James was the elder of the two. It is worthy of notice that James is never mentioned in the Gospel of St. John; this author observes a humble reserve not only with regard to himself, but also about the members of his family.

Several incidents scattered through the Synoptics suggest that James and John had that particular character indicated by the name "Boanerges," sons of thunder, given to them by the Lord (Mark, iii, 17); they were burning and impetuous in their evangelical zeal and severe in temper. The two brothers showed their fiery temperament against "a certain man casting out devils" in the name of the Christ; John, answering, said: "We [James is probably meant] forbade him, because he followeth not with us" (Luke, ix, 49). When the Samaritans refused to receive Christ, James and John said: "Lord, wilt thou that we command fire to come down from heaven, and consume them?" (Luke, ix, 54; cf. v. 49).

His martyrdom

On the last journey to Jerusalem, their mother Salome came to the Lord and said to Him: "Say that these my two sons may sit, the one on thy right hand, and the other on thy left, in thy kingdom" (Matt., xx, 21). And the two brothers, still ignorant of the

spiritual nature of the Messianic Kingdom, joined with their mother in this eager ambition ([Mark 10:37](#)). And on their assertion that they are willing to drink the chalice that He drinks of, and to be baptized with the baptism of His sufferings, Jesus assured them that they will share His sufferings ([Mark 5:38-39](#)).

James won the crown of martyrdom fourteen years after this prophecy, A.D. 44. Herod Agrippa I, son of Aristobulus and grandson of Herod the Great, reigned at that time as "king" over a wider dominion than that of his grandfather. His great object was to please the Jews in every way, and he showed great regard for the Mosaic Law and Jewish customs. In pursuance of this policy, on the occasion of the Passover of A.D. 44, he perpetrated cruelties upon the Church, whose rapid growth incensed the Jews. The zealous temper of James and his leading part in the Jewish Christian communities probably led Agrippa to choose him as the first victim. "He killed James, the brother of John, with the sword." ([Acts 12:1-2](#)). According to a tradition, which, as we learn from Eusebius (*Hist. Eccl.*, II, ix, 2, 3), was received from Clement of Alexandria (in the seventh book of his lost "Hypotyposes"), the accuser who led the Apostle to judgment, moved by his confession, became himself a Christian, and they were beheaded together. As Clement testifies expressly that the account was given him "by those who were before him," this tradition has a better foundation than many other traditions and legends respecting the Apostolic labours and death of St. James, which are related in the Latin "Passio Jacobi Majoris", the Ethiopic "Acts of James", and so on.

St. James in Spain

The tradition asserting that James the Greater preached the Gospel in Spain, and that his body was translated to Compostela, claims more serious consideration.

According to this tradition St. James the Greater, having preached Christianity in Spain, returned to Judea and was put to death by order of Herod; his body was miraculously translated to Iria Flavia in the northwest of Spain, and later to Compostela, which town, especially during the Middle Ages, became one of the most famous places of pilgrimage in the world. The vow of making a pilgrimage to Compostela to honour the sepulchre of St. James is still reserved to the pope, who alone of his own or ordinary right can dispense from it. In the twelfth century was founded the Order of Knights of St. James of Compostela (see SAINT JAMES OF COMPOSTELA, ORDER OF).

With regard to the preaching of the Gospel in Spain by St. James the greater, several difficulties have been raised:

- St. James suffered martyrdom A.D. 44 ([Acts 12:2](#)), and, according to the tradition of the early Church, he had not yet left Jerusalem at this time (cf. Clement of Alexandria, "Strom.", VI, Apollonius, quoted by Euseb., "Hist. Eccl." VI, xviii).

- St. Paul in his Epistle to the Romans (A.D. 58) expressed the intention to visit Spain ([Romans 15:24](#)) just after he had mentioned (15:20) that he did not "build upon another man's foundation."
- The argument *ex silentio*: although the tradition that James founded an Apostolic see in Spain was current in the year 700, no certain mention of such tradition is to be found in the genuine writings of early writers nor in the early councils; the first certain mention we find in the ninth century, in Notker, a monk of St. Gall (Martyrol., 25 July), Walafrid Strabo (Poema de XII Apost.), and others.
- The tradition was not unanimously admitted afterwards, while numerous scholars reject it. The Bollandists however defended it (see Acta Sanctorum, July, VI and VII, where other sources are given).

The authenticity of the sacred relic of Compostela has been questioned and is still doubted. Even if St. James the Greater did not preach the Christian religion in Spain, his body may have been brought to Compostela, and this was already the opinion of Notker. According to another tradition, the relics of the Apostle are kept in the church of St-Saturnin at Toulouse (France), but it is not improbable that such sacred relics should have been divided between two churches. A strong argument in favour of the authenticity of the sacred relics of Compostela is the Bull of Leo XIII, "Omnipotens Deus," of 1 November, 1884.

A. CAMERLYNCK

St. James the Less

St. James the Less

THE IDENTITY OF JAMES

The name "James" in the New Testament is borne by several:

- 1 *James, the son of Zebedee* -- Apostle, brother of John, Apostle; also called "James the Greater".
- 2 *James, the son of Alphaeus, Apostle* -- [Matthew 10:3](#); [Mark 3:18](#); [Luke 6:15](#); [Acts 1:13](#).
- 3 *James, the brother of the Lord* -- [Matthew 13:55](#); [Mark 6:3](#); [Galatians 1:19](#). Without a shadow of doubt, he must be identified with the James of [Galatians 2:2](#) and [2:9](#); [Acts 12:17](#), [15:13](#) sqq. and [21:18](#); and [I Corinthians 15:7](#).

- 4 *James, the son of Mary, brother of Joseph (or Joses)* -- [Mark 15:40](#) (where he is called *ὁ μικρός* "the little", not the "less", as in the D.V., nor the "lesser"); [Matthew 27:56](#). Probably the son of Cleophas or Clopas ([John 19:25](#)) where "Maria Cleophæ" is generally translated "Mary the *wife* of Cleophas", as married women are commonly distinguished by the addition of their husband's name.
- 5 *James, the brother of Jude* -- [Jude 1:1](#). Most Catholic commentators identify Jude with the "Judas Jacobi", the "brother of James" ([Luke 6:16](#); [Acts 1:13](#)), called thus because his brother James was better known than himself in the primitive Church.

The identity of the Apostle James (2), the son of Alpheus and James (3), the brother of the Lord and Bishop of the Church of Jerusalem ([Acts 15, 21](#)), although contested by many critics and, perhaps, not quite beyond doubt, is at least most highly probable, and by far the greater number of Catholic interpreters is considered as certain (see BRETHREN OF THE LORD, where the chief argument, taken from [Galatians 1:19](#), in favour of the Apostleship of St. James, the brother of the Lord, is to be found). The objection moved by Mader (*Biblische Zeitschrift*, 1908, p. 393 sqq.) against the common statement that "Apostles" in [Galatians 1:19](#) is to be taken strictly in the sense of the "Twelve" has been strongly impugned by Steinmann (*Der Katholik*, 1909, p. 207 sqq.). The James (5) of [Jude 1:1](#) must certainly be identified with James (3), the brother of the Lord and the Bishop of Jerusalem. The identification of James (3), the brother of the Lord and James (4), the son of Mary, and probably of Cleophas or Clopas offers some difficulty. This identification requires the identity of Mary, the mother of James ([Matthew 27:56](#); [Mark 15:40](#)), with Mary the wife of Cleophas ([John 19:25](#)), and, consequently, the identity of Alpheus (2) and Clopas (4). As Clopas and Alpheus are probably not two different transcriptions of the same Aramaic name *Halpai* (see CLEOPHAS), it must be admitted that two different names have been borne by one man. Indeed, there are several examples of the use of two names (a Hebrew and a Greek or Latin name) to designate the same person (Simon-Petrus; Saulus-Paulus), so that the identity of Alpheus and Cleophas is by no means improbable.

On the whole, although there is no full evidence for the identity of James (2), the son of Alpheus, and James (3), the brother of the Lord, and James (4), the son of Mary of Clopas, the view that one and the same person is described in the New Testament in these three different ways, is by far the most probable. There is, at any rate, very good ground ([Galatians 1:19](#), [2:9](#), [2:12](#)) for believing that the Apostle James, the son of Alpheus is the same person as James, the brother of the Lord, the well-known Bishop of Jerusalem of the Acts. As to the nature of the relationship which the name "brother of the Lord" is intended to express, see BRETHREN OF THE LORD.

JAMES IN THE SCRIPTURES

Had we not identified James, the son of Alpheus with the brother of the Lord, we should only know his name and his Apostleship. But the identity once admitted, we must consequently apply to him all the particulars supplied by the books of the New Testament. We may venture to assert that the training of James (and his brother Jude), had been that which prevailed in all pious Jewish homes and that it was therefore based on the knowledge of the Holy Scripture and the rigorous observance of the Law. Many facts point to the diffusion of the Greek language and culture throughout Judea and Galilee, as early as the first century b.c.; we may suppose that the Apostles, at least most of them, read and spoke Greek as well as Aramaic, from their childhood. James was called to the Apostolate with his brother Jude; in all the four lists of the Apostles, he stands at the head of the third group ([Matthew 10:3](#); [Mark 3:18](#); [Luke 6:16](#); [Acts 1:13](#)). Of James individually we hear no more until after the Resurrection. St. Paul ([I Corinthians 15:5-7](#)) mentions that the Lord appeared to him before the Ascension.

Then we lose sight of James till St. Paul, three years after his conversion (a.d. 37), went up to Jerusalem. Of the Twelve Apostles he saw only Peter and James the brother of the Lord ([Galatians 1:19](#); [Acts 9:27](#)). When in the year 44 Peter escaped from prison, he desired that news of his release might be carried to James who held already a marked preeminence in the Church of Jerusalem ([Acts 12:17](#)). In the Council of Jerusalem (a.d. 51) he gives his sentence after St. Peter, declaring as Peter had done, that the Gentile Christians are not bound to circumcision, nor to the observance of the ceremonial Mosaic Law, but at the same time, he urged the advisability of conforming to certain ceremonies and of respecting certain of the scruples of their Jewish fellow-Christians ([Acts 15:13](#) sqq.). On the same occasion, the "pillars" of the Church, James, Peter, and John "gave to me (Paul) and Barnabas the right hands of fellowship; that we should go unto the Gentiles, and they unto the circumcision" ([Galatians 2:9](#)). He publicly commended the great charter of Gentile freedom from the Law, although he still continued the observance in his own life, no longer as a strict duty, but as an ancient, most venerable and national custom, trusting to "be saved by the grace of the Lord Jesus Christ" ([Acts 15:11](#)). When afterwards some came from James to Antioch and led Peter into dissimulation ([Galatians 2:12](#)), his name was used by them, though he had given them no such commandment to enforce their interpretation of the concordat which, on his proposal, had been adopted at the Council of Jerusalem. When St. Paul after his third missionary journey paid a visit to St. James (a.d. 58), the Bishop of Jerusalem and "the elders" "glorified the Lord" and advised the Apostle to take part in the ceremonies of a Nazarite vow, in order to show how false the charge was that he had spoken of the Law as no longer to be regarded. Paul consented to the advice of James and the elders ([Acts 21:1](#) sqq.). The Epistle of St. James reveals a grave, meek,

and calm mind, nourished with the Scriptures of the Old Testament, given to prayer, devoted to the poor, resigned in persecution, the type of a just and apostolic man.

JAMES OUTSIDE OF THE SCRIPTURES

Traditions respecting James the Less are to be found in many extra-canonical documents, especially Josephus (Antiq., XX, ix, 1), the "Gospel according to the Hebrews" (St. Jerome, De vir. ill., II), Hegesippus (Eusebius, "Hist. eccl.", II, xxiii), the pseudo-Clementine Homilies (Ep. of Peter) and Recognitions (I, 72, 73), Clement of Alexandria (Hypot., vi, quoted by Eusebius, "Hist. eccl.", II, i). The universal testimony of Christian antiquity is entirely in accordance with the information derived from the canonical books as to the fact that James was Bishop of the Church of Jerusalem. Hegesippus, a Jewish Christian, who lived about the middle of the second century, relates (and his narrative is highly probable) that James was called the "Just", that he drank no wine nor strong drink, nor ate animal food, that no razor touched his head, that he did not anoint himself or make use of the bath, and lastly that he was put to death by the Jews. The account of his death given by Josephus is somewhat different. Later traditions deserve less attention.

For bibliography see EPISTLE OF SAINT JAMES; *Protoevangelium Jacobi* and *Liturgy of St. James*.

A. CAMERLYNCK

Bl. James Thompson

Blessed James Thompson

(Also known as James Hudson).

Martyr, born in or near York; having nearly all his life in that city, died there, 28 November, 1582.

He arrived at Dr. Allen's college at Reims 19 September, 1580, and in May of the next year, by virtue of a dispensation, was admitted at Soissons, with one Nicholas Fox, to all Sacred orders within twelve days, although at the time he was so ill that he could hardly stand. He was sent on the mission the following 10 August, and was arrested at York on 11 August, 1582. On being taken before the Council of the North he frankly confessed his priesthood, to the astonishment of his fellow citizens who knew that he had not been away more than a year. He was then loaded with double irons and was imprisoned, first in a private prison, till his money was exhausted, and then in the castle. On 25 November he was brought to the bar and condemned to the penalties of high treason. Three days later he suffered with great joy and tranquillity at the Knavesmire, protesting that he had never plotted against the queen, and that he

died in and for Catholic Faith. While he was hanging, he first raised his hands to heaven, then beat his breast with his right hand, and finally made a great sign of cross. In spite of his sentence, he was neither disembowelled nor quartered, but was buried under the gallows.

JOHN B. WAINEWRIGHT

Leopold Janauschek

Leopold Janauschek

Cistercian, born at Brünn, Moravia, 13 October, 1827; died 23 July, 1898, at Baden, near Vienna. In 1846 he received the religious habit at the Cistercian Abbey of Zwettl, Lower Austria, where he was professed in 1848. His superiors then sent him to their house of studies of Heiligenkreuz near Vienna, where he studied philosophy and theology, and after his ordination to the priesthood was made professor of history and canon. His learned works on these sciences soon attracted attention and won for him in 1858 the chair of ecclesiastical history in the University of Vienna. But in 1859 he was recalled by his superiors to Heiligenkreuz, where he continued as professor until 1877. During this time he composed his first great work, "Originum Cisterciensium Liber Primus" (Vienna, 1877), in which he describes the foundation of the Order of Citeaux, its organization and extension, and mentions many of those who, under various titles, had honoured it. He gives a lengthy account of 742 ancient abbeys of monks, founded between the end of the eleventh and the end of the seventeenth centuries. Each of the genealogical and chronological tables, as well as the entire work itself, supposes colossal labour of research and compilation. He was unable to publish the second volume, which was to have been devoted to the monasteries of Cistercian nuns, and for which he had collected a great deal of material; but it will be utilized by the continuator of his work. He also published, at this period, a work of less importance on the history of the Cistercian Order.

His second great work is entitled "Bibliographia Bernardina". In 1891, on the occasion of the eighth centenary of the birth of St. Bernard, the Cistercian Congregation of Austria prepared four volumes for the glory of this illustrious doctor, under the title of "Xenia Bernardina". Janauschek gave his assistance in the preparation of the first three volumes, but the fourth, "Bibliographia Bernardina" (Vienna, 1891), was entirely his own work. He there treats successively of the different editions of the works of St. Bernard and their translations, the essays on the life of the saint, various panegyrics, his biographers, the inscriptions in his honour, the opinions of ecclesiastical historians, etc. These great works of Janauschek exhibit profound research, unconquerable perseverance, and great skill in classification. For these works the author was obligated

to search many libraries and consult numerous archives; the books noticed in "Xenia Bernardina" amount to 2761 printed, and 119 manuscript volumes. The author was also obliged to communicate with many learned men. Despite weak health, which for many years permitted him to leave his room only at rare intervals, he persevered at his great task until interrupted by death.

EDMOND M. OBRECHT

Alexandre Vincent Jandel

Alexandre Vincent Jandel

General of the Dominican order, born at Gerbevilliers (Lorraine), 18 July, 1810; died at Rome, 11 December, 1872. He was remarkable from his earliest years for intelligence and resolution, qualities derived chiefly from his mother, a person of rare endowments, who did not fear to succour priests during the Revolution. After a brilliant collegiate course at Nancy, he entered the diocesan seminary in that city, where his success was equally great. Jandel was ordained priest 20 September, 1834, then appointed professor of Scripture, and soon afterwards rector of the seminary at Pont-à-Mousson. The young superior was regarded as a model of sanctity and learning. At this time he became acquainted with Bautain, Gerbet, Ratisbonne, and many other distinguished men, among them Lacordaire. Such was the impression made on him by Lacordaire, that he began to think of entering the Dominican Order, which the great preacher proposed to restore in France, where it had been destroyed by the Revolution. In 1839 he therefore went to Rome, consulted Gregory XVI on the matter, and finally received the habit on 15 May, 1841. Two years afterwards Jandel and Lacordaire commenced the great work of re-establishing their order in France. Lacordaire was an orator; Jandel was a ruler of men, calm, grave, sagacious, tenacious of traditions and customs, and pre-eminently practical. Though he had not the genius of his associate, he preached with great results. A sermon at Lyons on the power of the Cross led to his being challenged by a Freemason to prove the truth of his words in the lodge; he entered it, produced his crucifix, and made the sign of the cross; instantly the lights were extinguished, the furniture was thrown about, and all but he fled in terror from the scene of confusion.

Many holy persons in France placed themselves under his guidance. Pius IX, however, called him to Rome, and made him in 1850 vicar-general of the order *ad beneplacitum*, and in 1855 general for six years. He was soon recognized as the greatest religious superior and one of the most enlightened spiritual directors in the city. Of those whom he instructed at this time, two may be mentioned: Cardinal Manning and Father Burke. A born administrator, he infused new life into the order. Several provinces

were re-established, and houses opened everywhere. The Dominican nuns (second order) and tertiaries were also greatly indebted to his zeal. He also did much to promote devotion to the rosary and to propagate the doctrine of St. Thomas. Such were the services he rendered to the Holy See especially as regarded the Zouaves, that Pius IX, who was warmly attached to him, intended to make him a cardinal; but Providence disposed otherwise, for he was elected general of the order, 7 June, 1862. He visited Ireland twice, and only weak health prevented him from visiting America. New editions of liturgical books and of the "constitutions" or legislation formed part of his characteristic work. He also paid great attention to foreign missions. During his term of office sixteen Dominicans were beatified or canonized. He presided at two chapters of the order (Ghent, 1971), and he is justly considered as one of the greatest generals that the order has had during the seven centuries of its existence.

The standard authority is Cormier, *Vie du Révérendissime Père Jandel, soixante-troisième Maître Général des Frères Prêcheurs* (Paris, 1890).

REGINALD WALSH

St. Janes Frances de Chantal

St. Jane Frances de Chantal

Born at Dijon, France, 28 January, 1572; died at the Visitation Convent Moulins, 13 December, 1641.

Her father was president of the Parliament of Burgundy, and leader of the royalist party during the League that brought about the triumph of the cause of Henry IV. In 1592 she married Baron de Chantal, and lived in the feudal castle of Bourbilly. She restored order in the household, which was on the brink of ruin, and brought back prosperity. During her husband's absence at the court, or with the army, when reproached for her extremely sober manner of dressing, her reply was: "The eyes which I must please are a hundred miles from here". She found more than once that God blessed with miracles the care she gave the suffering members of Christ. St. Francis de Sales's eulogy of her characterizes her life at Bourbilly and everywhere else: "In Madame de Chantal I have found the perfect woman, whom Solomon had difficulty in finding in Jerusalem". Baron de Chantal was accidentally killed by a harquebus while out shooting in 1601. Left a widow at twenty-eight, with four children, the broken-hearted baroness took a vow of chastity. In all her prayers she besought God to send her a guide and God, in a vision, showed her the spiritual director He held in reserve for her. In order to safeguard her children's property, she was obliged to go and live at Monthelon in the home of her father-in-law, who was ruled over by an arrogant and

wicked servant. This was real servitude, which she bore patiently and gently for seven years. At last her virtue triumphed over the ill will of the old man and house keeper.

During Lent, 1604, she visited her father at Dijon, where St. Francis de Sales was preaching at the Sainte Chapelle. She recognized in him the mysterious director who had been shown her, and placed herself under his guidance. Then began an admirable correspondence between the two saints. Unfortunately, the greater number of letters are no longer in existence, as she destroyed them after the death of the holy bishop. When she had assured the future security of children, and when she had provided the education of Celse-Bénigne, her fourteen year old son, whom she left to her father and her brother, the Archbishop of Bourges, she started for Annecy, where God was calling her to found the Congregation of the Visitation. She took her two remaining daughters with her, the elder having recently married the Baron of Thorens, a brother of St. Francis de Sales. Celse-Bénigne, impetuous like those of her race, barred his mother's way by lying across the threshold. Mme de Chandal stopped, overcome: "Can the tears of a child shake her resolution?" said a holy and learned priest, the tutor of Celse-Bénigne. "Oh! no", replied the saint, "but after all I am a mother!" And she stepped over child's body.

The Congregation of the Visitation was canonically established at Annecy on Trinity Sunday, 6 June, 1610. Its aim was to receive, with a view to their spiritual advancement, young girls and even widows who had not the desire or strength to subject themselves to the austere ascetical practices in force in all the religious orders at that time. St. Francis de Sales was especially desirous of seeing the realization of his cherished method of attaining perfection, which consisted in always keeping one's will united to the Divine will, in taking so to speak one's soul, heart, and longings into one's hands and giving them into God's keeping, and in seeking always to do what is pleasing to Him. "I do always the things that please him" (John, viii, 29). The two holy founders saw their undertaking prosper. At the time of the death of St. Francis de Sales in 1622, the order already counted thirteen houses; there were eight-six when St. Jane Frances died; and 164 when she was canonized.

The remainder of the saint's life was spent under the protection of the cloister in the practice of the most admirable virtues. If a gentle kindness, vivified and strengthened by a complete spirit of renunciation, predominates in St. Francis de Sales, it is firmness and great vigour which prevails in St. Jane Frances; she did not like to see her daughters giving way to human weakness. Her trials were continuous and borne bravely, and yet she was exceedingly sensitive. Celse-Bénigne was an incorrigible duellist. She prayed so fervently that he was given the grace to die a Christian death on the battle-field, during the campaign against the Isle of Ré (1627). He left a daughter who became the famous Marquise de Sévigné. To family troubles God added interior crosses which,

particularly during the last nine years of her life, kept her in agony of soul from which she was not freed until three months before her death.

Her reputation for sanctity was widespread. Queens, princes, and princesses flocked to the reception-room of the Visitation. Wherever she went to establish foundations, the people gave her ovations. "These people", she would say confused, "do not know me; they are mistaken". Her body is venerated with that of St. Francis de Sales in the church of the Visitation at Annecy. She was beatified in 1751, canonized in 1767, and 21 August was appointed as her feast day.

The life of the saint was written in the seventeenth century, with inimitable charm, by her secretary, Mother de Chaugy. Monsignor Bougaud, who died Bishop of Laval, published in 1863 a "Histoire de Sainte Chantal" which had a great and well-deserved success.

The words of the saint comprise instructions on the religious life, various minor works, among which is the admirable "Deposition for the Process of Beatification of St. Francis de Sales", and a great many letters. The Saint's qualities are seen in her precise and vigorous style, void of imagery but betraying a repressed emotion, and bursting forth spontaneously from the heart, anticipating in its method the beautiful French of the seventeenth century. The book which may be called her masterpiece, "Réponses sur les Régles, Constitutions et Coutumes", a truly practical and complete code of the religious life, is not in circulation.

RAPHAL PERNIN

Ferdinand Janner

Ferdinand Janner

Theologian, born at Hirschau, in the Upper Palatinate (Bavaria), 4 Feb., 1836; died 1 November, 1895. He completed his studies at the Latin school of Amberg, taking his philosophical course at that lyceum, studied theology at Wurzburg and Ratisbon, and was ordained priest 13 August, 1858. After devoting himself to parish work for a time, he again took up his studies at Wurzburg, where he obtained the degree of Doctor of Theology, after which he was successively, chaplain at Weiden, in 1863 prefect of the Ratisbon seminary, 1865 professor of religion and history at the gymnasium of Speyer, 1867 professor of ecclesiastical history, Christian archaeology, and history of art at the Ratisbon lyceum, 1883 diocesan consultor. He retired from active life in the year 1888.

Janner's principal work is "Geschichte der Bischöfe von Regensburg", the three published volumes of which bring the history to the sixteenth century (Ratisbon, 1883-86). He also wrote: "De factis dogmaticis" (Wurzburg, 1861); "Infallibilem ecclesiam Catholicam esse in diiudicandis factis dogmaticis" (Speyer, 1866); "Das officium unius

martyris de communi in seinem Zusammenhang erklärt" (Speyer, 1867); "Das Heilige Land, und die heiligen Statten, ein Pilgerbuch" (Ratisbon, 1869); "Missale parvum sive Missale Romanum in breviorum et commodiorum formam redactum: (Ratisbon, 1870); "Die Bauhütten des deutschen Mittelalters" (2nd ed., Leipzig, 1876); "Nicolas von Weis, Bischof zu Speyer" (Wurzburg, 1876); "Die Schotten in Regensburg, die Kirsche zu St. Jacob und deren Nordportal" (Ratisbon, 1885); a translation of the Breviary "Das römische Brevier in deutscher Sprache" (4 vols., Ratisbon, 1890). He also wrote "Personen- und Sachregister zu Rass, Die Con vertiten seit der Reformation", I-X (Freiburg im Br., 1872).

FRIEDRICH LAUCHERT

Matthew of Janow

Matthew of Janow

A medieval ecclesiastical author, born in the fourteenth century in Bohemia; died at Prague, 30 Nov., 1394. Son of Wenzel of Janow, a Bohemian knight, he began his studies at Prague and continued them at the University of Paris where he graduated after a residence of nine years. Hence his title of *Parisian Master* (*Magister Parisiensis*). In 1381 he was appointed canon and confessor in the cathedral of Prague, offices which he held until his death. He was never a preacher of the first rank, but was conspicuous for his great zeal in the confessional. Between the years 1388 and 1392 he composed several treatises which he later collected under the title "Regulae Veteris et Novi Testamenti" The work has never been published in its entirety, nor is it to be found complete in any one manuscript. Parts of it were wrongly ascribed to John Hus and published with his writings (Nuremberg, 1588, I, 376-471).

Janow attributed the evils in the Church to the contemporary Papal Schism, the large number of papal exemptions and reservations, and the excessive importance attached by some Christians to accidental external practices. Owing to the abuses which at times attended the veneration of saints and relics, he ultimately advocated the removal of such special objects of piety from the churches. He was misled into this extreme view by his desire of promoting an intense interior devotion to the Blessed Eucharist. The frequent and even daily reception of Holy Communion by the laity was, according to him, not only desirable but almost necessary. At the Synod of Prague in 1389 such encouragement of daily Communion was prohibited, and the veneration of images defended. Janow's retraction of his erroneous views and his repeated protestations of never-failing loyalty to the Catholic Church are sufficient evidence that he cannot be styled, as is frequently done, a forerunner of Hus.

N.A. WEBER

Cornelius Jansen, the Elder

Cornelius Jansen, the Elder

(*Also Jansens, Janssen, Janssenius or Jansenius Gandaviensis*).

Exegete, born at Hulst, Flanders, 1510; died at Ghent, 11 April, 1576. He received his early education at Ghent from the Brethren of the Common Life (called at Ghent the Hieronymites), and later studied theology and Oriental languages at Louvain. After he had become a licentiate of theology in 1534, he lectured, at the request of the abbot of the Premonstratensian Abbey of Tongerlo, to the young monks on the Holy Scriptures until 1542, from which date until 1562 he discharged the duties of pastor of the parish of St. Martin at Courtrai (Kortryk) with great success. Having finally attained the degree of Doctor of Theology in 1562, he was immediately appointed professor of theology at the University of Louvain, became in the following year dean of the collegiate seminary of St. James, and attended the last sessions of the Council of Trent as delegate of the university. On his return, King Philip II appointed him first bishop of the newly founded See of Ghent, which dated only from 1559. For a long time he refused to assume the dignity, on account of the difficult conditions in the diocese, and was not preconized until 1568, by Pius V. As bishop he devoted himself especially to checking the advance of Protestantism, and to carrying out with the greatest exactness the decrees of the Council of Trent. With this object in view, he founded a seminary for priests at Ghent in 1569, held diocesan synods in 1571 and 1574, and published a ritual for his diocese. He was entrusted with the compilation of a ritual to be used in the ecclesiastical province of Mechlin, but did not finish it. While at Tongerlo he wrote a great deal, and, as pastor at Courtrai, had already become widely known for his exegetical work.

Among Jansen's writings is the "Concordia evangelica." (Louvain, 1529), to which he later added the "Commentarius in Concordiam et totem historiam evangelicam" (Louvain, 1572), undoubtedly his best work. He published also: "Commentarius in Proverbia Salomonis" (Louvain, 1567), and "Commentarius in Ecclesiasticum" (Louvain, 1569), both of which were republished in one work at Antwerp in 1589; "Commentarius in omnes Psalmos Davidicos" (Louvain, 1569), with an introduction to each psalm, an excellent paraphrase of the text, and explanations of the difficult passages; "Paraphrases in ea Veteris Testamenti Cantica, quae per ferias singulas totius anni usus ecclesiasticus observat" (Louvain, 1569). After his death appeared "Annotationes in Librum Sapientiae" (Louvain, 1577).

Cornelius Jansen was one of the most distinguished among the exegetes of the sixteenth century, and his masterpiece, the aforesaid "Concordia, Evangelica" was

epoch-making in the history of Catholic exegesis, for he insisted on the literal interpretation, as against the mystical interpretation of his predecessors, emphasized also the importance of the original text, and of a profound study of Oriental languages as aids to a full comprehension of the Vulgate.

PATRICIUS SCHLAGER

Johann Janssen

Johann Janssen

Historian, born 10 April, 1829, at Kanten, Germany; died 24 December, 1891, at Frankfort-on-the-Main. He received his early education in a school of his native town. His course was interrupted, however, from the early part of 1842 to the spring of 1844, during which time he worked as an apprentice to a coppersmith. It soon became apparent, however that he had no aptitude for this trade, and he was allowed to return to school. In 1846 he went to the gymnasium of Recklinghausen, from which he graduated in the autumn of 1849. During the years 1849-54 he frequented the Universities of Munster, Louvain, Bonn, and Berlin, where he devoted himself to the study of theology and history; in August, 1853, he obtained the degree of Doctor of Philosophy from the University of Bonn, in virtue of a Latin dissertation on the life of Wibald, Abbot of Stablo and Corvey (1098-1158); in August, 1854, he opened a course of history as *Privatdozent* at the Academy of Munster, but shortly afterwards, in September of the same year, he was asked to take the chair of history for the Catholic students of the gymnasium at Frankfort-on-the-Main. He retained this position up to the time of his death in 1891.

Not satisfied with attending to the ordinary duties of the classroom, Janssen devoted his spare time to historical research, the results of which were embodied in many learned volumes. At the same time he took every opportunity to visit centres of learning; thus in 1865-64 he spent several months in Italy and Rome, where he consulted the archives of the Vatican on matters relating to the Thirty Years War and to the first partition of Poland. In 1875-76 he was a deputy to the Prussian Diet, joined the Centre party, and spent much time in Berlin. This sojourn in the German capital was used not only to defend the interests of his constituency in Parliament, but also to widen the range of his knowledge by personal intercourse with learned and public men. From the days of his childhood he conceived the desire of serving God in the priesthood. The delicate state of his health prevented the execution of this cherished plan for some time; but finally he was ordained priest at Limburg, 26 March, 1860. In 1866 he was appointed spiritual counsellor by Archbishop Hermann von Vicari of Freiburg, and

in 1880 Pope Leo XIII made him a prelate and a prothonotary Apostolic *ad instar participantium*.

Janssen is the author of many valuable works on historical subjects. It was while he was at the University of Louvain that he resolved to make the study of history his principal work for the remainder of his life. His first work was a Latin biography of Abbot Wibald, which appeared in a revised form in German (1854). In 1856 he published a volume of historical documents relating to the Diocese of Munster (*Die Geschichtsquellen des Bisthums Munster*, 3 vols.). In 1881 appeared the essay "Frankreichs Rheingelüste und deutschfeindliche Politik in fruheren Jahrhunderten", in which he laid bare the traditional diplomacy of France, hostile to Germany and intent upon extending the boundary line as far as the Rhine. In 1863 he published an essay upon Schiller as an historian (*Schiller als Historiker*), in which he made it plain that the great German poet, in his historical writings, indulged too much in his imagination. For many years he was engaged in sifting part of the manuscript material found in the archives of Frankfort; and the result of these labours was the publication of "Frankfurts Reichsrespondenz, 1376-1519" (2 vols., 1863-73). In the essay "Zur Genesis der ersten Theilung Polens" (1865) he explained the circumstances under which the former Kingdom of Poland was robbed of part of its dominions by neighbouring countries. A biography of the man whom he considered as his teacher and guide appeared in three volumes in 1868 under the title "Johnnn Friedrich Boehmers Leben, Briefe und kleinere Schriften". In 1876-77 appeared in two volumes another biography of a renowned scholar and convert to the Catholic Faith, Count Friedrich Leopold zu Stolberg. In the work "Zeit- und Lebensbilder" (1875) he published in book form a number of essays on the men and events of his time.

The most important work is his "History of the German people" (*Geschichte des deutschen Volkes seit dem Ausgang des Mittelalters*). The first suggestion of such an undertaking was made by his master and friend, Johann Friedrich Boehmer, in 1853. At first he planned to write a complete history of Germany from the remotest times to his own day but soon this plan had to be abandoned, and he confined himself to the period beginning with the end of the Middle Ages. Eight volumes have appeared; six were given to the public by Janssen himself (1876-88), and two by his pupil and friend Ludwig Pastor (1893-94) from materials collected by Janssen and they reach as far as the time of the Thirty Years War, which commenced in 1618. The great merit of this work is that Janssen treated not only of the political but also of the religious, social, and economic conditions of Germany, that he was very faithful to the sources of information and very impartial, that he made the authorities speak for themselves, and that he destroyed the common conception, according to which the Middle Ages presented nothing but corruption and moral decay. Valuable additions to this work

are found in two small volumes written in reply to adverse criticism ("An meine Kritiker", 1882; "Ein zweites Wort an meine Kritiker", 1884). Most of the works of Janssen had a large sale, and appeared in several editions; this is particularly the case of the "History of the German People", which has been translated, partly, at least, into French and English. Janssen was a very prolific writer: to the works which have just been mentioned he added a number of articles written for reviews and other publications.

Owing to the literary and critical merits of his works Janssen must be placed among the foremost Catholic historians of the last century. In his great work he deals much with the origin and the great leaders of the Protestant Reformation, yet he is always most moderate in tone, and never uses expressions which might give offence. The same attitude of deference and respect was shown in his personal relations towards those who differed from him in faith; and in this manner he won the esteem and confidence of Protestants, among whom he found many friends.

Despite Janssen's great learning he remained humble; worldly honours and ecclesiastical dignities had no attraction for him.

In 1864 efforts were made to win him for the diplomatic service of the Vatican; some time later he was mentioned for a vacant bishopric; in 1883 Pope Leo XIII contemplated summoning him to Rome for the direction of the Vatican Archives; in 1890 the cardinalate was to be conferred on him; but Janssen succeeded in escaping all these honours. We gave often and abundantly to the poor, to the sick, to churches, and to institutions of mercy. An asylum for the poor and abandoned children of Frankfort, erected in 1894 in the town of Oberursel, owes its existence largely to his efforts. Janssen was a great scholar and an exemplary priest, though he never exercised the ecclesiastical ministry.

FRANCIS J. SCHAFFER

Jansenius and Jansenism

Jansenius and Jansenism

Cornelius Jansen, Bishop of Ypres (*Cornelius Jansenius Ypresensis*), from whom Jansenism derives its origin and name, must not be confounded with another writer and bishop of the same name Cornelius Jansenius Gandavensis (1510-1576), of whom we possess several books on Scripture and a valuable "Concordia Evangelica."

I. LIFE AND WRITINGS

The subject of this article lived three-quarters of a century later than his namesake. He was born 28 October, 1585, of a Catholic family, in the village of Accoi, near Leer-

dam, Holland; died at Ypres, 6 May, 1638. His parents, although in moderate circumstances, secured for him an excellent education. They sent him first to Utrecht. In 1602 we find him at the University of Louvain, where he entered the College du Faucon to take up the study of philosophy. Here he passed two years, and at the solemn promotion of 1604 was proclaimed first of 118 competitors. To begin his theological studies he entered the College du Pape Adrien VI, whose president, Jacques Jansen, imbued with the errors of Baius and eager to spread them, was to exert an influence on the subsequent course of his ideas and works. Having hitherto been on amicable terms with the Jesuits, he had even sought admission into their order. The refusal he experienced, the motives of which are unknown to us, seems not to be altogether unrelated to the aversion he subsequently manifested for the celebrated society, and for the theories and practices it championed. He was also associated with a young and wealthy Frenchman, Jean du Verger de Hauranne, who was completing his course of theology with the Jesuits, and who possessed a mind subtle and cultured, but restless and prone to innovations, and an ardent and intriguing character. Shortly after his return to Paris towards the end of 1604, du Verger was joined there by Jansenius, for whom he had secured a position as tutor. About two years later he attracted him to Bayonne, his native town, where he succeeded in having him appointed director of an episcopal college. There, during eleven or twelve years of studies ardently pursued in common, on the Fathers and principally on St. Augustine, the two friends had time to exchange thoughts and to conceive daring Projects. In 1617, while du Verger, who had returned to Paris, went to receive from the Bishop of Poitiers the dignity of Abbot of St-Cyran, Jansenius returned to Louvain, where the presidency of the new College de Sainte Pulcherie was confided to him. In 1619 he received the degree of Doctor of Theology, and afterwards obtained a chair of exegesis. The commentaries which he dictated to his pupils, as well as several writings of a polemical nature, brought him in a short time a deserved renown.

These writings of Jansenius were not at first intended for publication, in fact they did not see the light until after his death. They are concise, clear and perfectly orthodox in doctrine. The principal ones are "Pentateuchus, sive commentarius in quinque libros Mosis" (Louvain, 1639), "Analecta in Proverbia Salomonis, Ecclesiasten, Sapientiam, Habacuc et Sophoniam" (Louvain, 1644); "Tetrateuchus, seu commentarius in quatuor Evangelia" (Louvain, 1639). Some of these exegetical works have been printed more than once. Among his polemical works are "Alexipharmacum civibus Syvaeducensibus propinatum adversus ministrorum fascinum" (Louvain 1630); then, in reply to the criticism of the Calvinist Gisbert Voet, "Spongia notarum quibus Alexipharmacum aspersit Gisbertus Voetius" (Louvain, 1631). Jansenius published in 1635, under the pseudonym of Armacanus, a volume entitled "Alexandri Patricii Armacani Theologi

Mars Gallicus seu de justitia armorum regis Galliae libri duo". This was a bitter and well-merited satire against the foreign policy of Richelieu, which was summed up in the odd fact of the "Most Christian" nation and monarchy constantly allying themselves with the Protestants, in Holland, Germany, and elsewhere, for the sole purpose of compassing the downfall of the House of Austria.

The same author has left us a series of letters addressed to the Abbot of St-Cyran, which were found among the papers of the person to whom they were sent and printed under the title: "Naissance du jansenisme decouverte, ou Lettres de Jansénius à l'abbé de St-Cyran depuis l'an 1617 jusqu'en 1635" (Louvain, 1654). It was also during the course of his professorate that Jansenius, who was a man of action as well as of study, journeyed twice to Spain, whither he went as the deputy of his colleagues to plead at the Court of Madrid the cause of the university against the Jesuits; and in fact, through his efforts their authorization to teach humanities and philosophy at Louvain was withdrawn. All this, however, did not prevent him from occupying himself actively and chiefly with a work of which the general aim, born of his intercourse with St-Cyran, was to restore to its place of honour the true doctrine of St. Augustine on grace, a doctrine supposedly obscured or abandoned in the Church for several centuries. He was still working on it when, on the recommendation of King Philip IV and Boonen, Archbishop of Mechlin, he was raised to the See of Ypres. His consecration took place in 1636, and, though at the same time putting the finishing touches to his theological work, he devoted himself with great zeal to the government of his diocese. Historians have remarked that the Jesuits had no more cause to complain of his administration than the other religious orders.

He succumbed to an epidemic which ravaged Ypres and died, according to eyewitnesses, in dispositions of great piety. When on the point of death he confided the manuscript which he cherished to his chaplain, Reginald Lamaeus, with the command to publish it after taking counsel with Libert Fromondus, a professor at Louvain, and Henri Calenus, a canon of the metropolitan church. He requested that this publication be made with the utmost fidelity, as, in his opinion, only with difficulty could anything be changed. "If, however," he added, "the Holy See wishes any change, I am an obedient son, and I submit to that Church in which I have lived to my dying hour. This is my last wish."

The editors of the "Augustinus" have been wrongly accused of having intentionally and disloyally suppressed this declaration, it appears plainly enough on the second page in the original edition. On the other hand its authenticity has been contested by means of external and internal arguments, founded notably on the discovery of another will, dated the previous day (5 May), which says nothing regarding the work to be published. But it is quite conceivable that the dying prelate was mindful of the oppor-

tunity to complete his first act by dictating to his chaplain and confirming with his seal this codicil which, according to the testamentary executors, was written only half an hour before his death. It has been vainly sought, a priori, to make the fact appear improbable by alleging that the author was in perfect good faith as to the orthodoxy of his views. Already, in 1619, 1620, and 1621, his correspondence with St-Cyran bore unmistakable traces of a quite opposite state of mind; in it he spoke of coming disputes for which there was need to prepare; of a doctrine of St. Augustine discovered by him, but little known among the learned, and which in time would astonish everybody, of opinions on grace and predestination which he dared not then reveal "lest like so many others I be tripped up by Rome before everything is ripe and seasonable". Later, in the "Augustinus" itself (IV, xxv-xxvii), it is seen that he scarcely disguises the close connection of several of his assertions with certain propositions of Baius, though he ascribes the condemnation of the latter to the contingent circumstances of time and place, and he believes them tenable in their obvious and natural sense.

Nothing, therefore, authorized the rejection of the famous declaration, or testament, of Jansenius as unauthentic. But neither is there any authorization for suspecting the sincerity of the explicit affirmation of submission to the Holy See which is therein contained. The author, at the time of his promotion to the doctorate in 1619, had defended the infallibility of the pope in a most categorical thesis, conceived as follows: "The Roman Pontiff is the supreme judge of all religious controversies, when he defines a thing and imposes it on the whole Church, under penalty of anathema, his decision is just, true, and infallible." At the end of his work (III, x, Epilogus omnium) we find this protestation perfectly parallel with that of his testament: "All whatsoever I have affirmed on these various and difficult points, not according to my own sentiment, but according to that of the holy Doctor, I submit to the judgment and sentence of the Apostolic See and the Roman Church, my mother, to be henceforth adhered to if she judges that it must be adhered to, to retract if she so wishes, to condemn and anathematize it if she decrees that it should be condemned and anathematized. For since my tenderest childhood I have been reared in the beliefs of this Church; I imbibed them with my mother's milk; I have grown up and grown old while remaining attached to them; never to my knowledge have I swerved therefrom a hair's-breadth in thought, action or word, and I am still firmly decided to keep this faith until my last breath and to appear with it before the judgment-seat of God." Thus Jansenius, although he gave his name to a heresy, was not himself a heretic, but lived and died in the bosom of the Church. In view of the fact that he consciously and deliberately aimed at innovation or reforming, it would certainly be difficult to exculpate him entirely or declare that his attitude was in no wise presumptuous and rash; but impartial history may and should take into account the peculiar atmosphere created about him by the still

smouldering controversies on Baianism and the widespread prejudices against the Roman Curia. To determine the extent to which these and similar circumstances, by deluding him necessarily diminished his responsibility, is impossible, that is the secret of God.

II. THE "AUGUSTINUS" AND ITS CONDEMNATION

After the death of Jansenius, the internuncio Richard Aravius vainly endeavoured to prevent the printing of his manuscript; this undertaking, actively furthered by the friends of the dead man, was completed in 1640. The folio volume bore the title: "Cornelii Jansenii, Episcopi Yprensis, Augustinus, seu doctrina S. Augustini de humanae naturae sanitate, aegritudine, medicina, adversus Pelagianos et Massilienses". It was divided into three volumes, of which the first, chiefly historical, is an exposition in eight books of Pelagianism; the second, after an introductory study on the limitations of human reason, devotes one book to the state of innocence or the grace of Adam and the angels, four books to the state of fallen nature, three to the state of pure nature; the third volume treats in ten books of "the grace of Christ the Saviour", and concludes with "a parallel between the error of the Semipelagians and that of certain moderns", who are no other than the Molinists. The author, if we are to accept his own statement, laboured for twenty years on this work, and to gather his materials he had ten times read the whole of St. Augustine and thirty times his treatise against the Pelagians. From these readings emerged a vast system, whose identity with Baianism neither skilful arrangement nor subtile dialectic could disguise.

His fundamental error consists in disregarding the supernatural order, for Jansenius as for Baius, the vision of God is the necessary end of human nature; hence it follows that all the primal endowments designated in theology as supernatural or preternatural, including exemption from concupiscence, were simply man's due. This first assertion is fraught with grave consequences regarding the original fall, grace, and justification. As a result of Adam's sin, our nature stripped of elements essential to its integrity, is radically corrupt and depraved. Mastered by concupiscence, which in each of us properly constitutes original sin, the will is powerless to resist; it has become purely passive. It cannot escape the attraction of evil except it be aided by a movement of grace superior to and triumphant over the force of concupiscence. Our soul, henceforth obedient to no motive save that of pleasure, is at the mercy of the delectation, earthly or heavenly, which for the time being attracts it with the greatest strength. At once inevitable and irresistible, this delectation, if it come from heaven or from grace, leads man to virtue; if it come from nature or concupiscence, it determines him to sin. In the one case as in the other, the will is fatally swept on by the preponderant impulse. The two delectations says Jansenius, are like the two arms of a balance, of which the one cannot rise unless the other be lowered and vice versa. Thus

man irresistibly, although voluntarily, does either good or evil, according as he is dominated by grace or by concupiscence; he never resists either the one or the other. In this system there is evidently no place for purely sufficient grace; on the other hand it is easy to discern the principles of the five condemned propositions (see below).

In order to present this doctrine under the patronage of St. Augustine, Jansenius based his argument chiefly on two Augustinian conceptions: on the distinction between the *auxilium sine quo non* granted to Adam, and the *auxilium quo*, active in his descendants; and on the theory of the "victorious delectation" of grace. A few brief remarks will suffice to make clear the double mistake. In the first place the *auxilium sine quo non* is not, in the idea of Augustine, "a grace purely sufficient", since through it the angels persevered; it is on the contrary a grace which confers complete power *in actu primo* (i.e. the ability to act), in such a way that, this being granted, nothing further is needed for action. The *auxilium quo*, on the other hand, is a supernatural help which bears immediately on the *actus secundus* (i.e. the performance of the action) and in this grace, in so far as it is distinguished from the grace of Adam, must be included the whole series of efficacious graces by which man works out his salvation, or the gift of actual perseverance, which gift conducts man infallibly and invincibly to beatitude, not because it suppresses liberty, but because its very concept implies the consent of man. The delectation of grace is a deliberate pleasure which the Bishop of Hippo explicitly opposes to necessity (*voluptas, non necessitas*); but what we will and embrace with consenting pleasure, we cannot at the same time not will, and in this sense we will it necessarily. In this sense also, it is correct to say, "Quod amplius nos delectat, secundum id operemur necesse est" (i.e. in acting we necessarily follow what gives us most pleasure). Finally, this delight is called victorious, not because it fatally subjugates the will, but because it triumphs over concupiscence, fortifying free will to the point of rendering it invincible to natural desire. It is thus clear that we can say of men sustained by and faithful to grace, "Invictissime quod bonum est velint, et hoc deserere invictissime nolint".

The success of the "Augustinus" was great, and it spread rapidly throughout Belgium, Holland, and France. A new edition, bearing the approbation of ten doctors of the Sorbonne, soon appeared at Paris. On the other hand, on 1 August, 1641, a decree of the Holy Office condemned the work and prohibited its reading; and the following year Urban VIII renewed the condemnation and interdiction in his Bull "In eminenti". The pope justified his sentence with two principal reasons: first, the violation of the decree forbidding Catholics to publish anything on the subject of grace without the authorization of the Holy See; second, the reproduction of several of the errors of Baius. At the same time, and in the interests of peace, the sovereign pontiff interdicted several other works directed against the "Augustinus". Despite these wise precautions

the Bull, which some pretended was forged or interpolated, was not received everywhere without difficulty. In Belgium, where the Archbishop of Mechlin and the university were rather favourable to the new ideas, the controversy lasted for ten years. But it was France which thenceforth became the chief centre of the agitation. At Paris, St-Cyran, who was powerful through his relations besides being very active, succeeded in spreading simultaneously the doctrines of the "Augustinus" and the principles of an exaggerated moral and disciplinary rigorism, all under the pretence of a return to the primitive Church. He had succeeded especially in winning over to his ideas the influential and numerous family of Arnauld of Andilly, notably Mère Angélique Arnauld, Abbess of Port-Royal, and through her the religious of that important convent. When he died, in 1643, Doctor Antoine Arnauld quite naturally succeeded him in the direction of the movement which he had created. The new leader lost no time in asserting himself in startling fashion by the publication of his book "On Frequent Communion", which would have been more correctly entitled "Against Frequent Communion" but which, as it was written with skill and a great display of erudition, did not a little towards strengthening the party.

Although the Sorbonne had accepted the Bull "In eminenti", and the Archbishop of Paris had, in 1644 proscribed the work of Jansenius, it continued to be spread and recommended, on the pretext that authority had not rejected a single well-determined thesis. It was then (1649) that Cornet, syndic of the Sorbonne, took the initiative in a more radical measure; he extracted five propositions from the much-discussed work, two from the book "On Frequent Communion", and submitted them to the judgment of the faculty. This body, prevented by the Parlement from pursuing the examination it had begun, referred the affair to the general assembly of the clergy in 1650. The greater number considered it more fitting that Rome should pronounce, and eighty-five bishops wrote in this sense to Innocent X, transmitting to him the first five propositions. Eleven other bishops addressed to the sovereign pontiff a protest against the idea of bringing the matter to trial elsewhere than in France. They demanded in any case the institution of a special tribunal, as in the "De auxiliis" affair, and the opening of a debate in which the theologians of both sides should be allowed to submit their arguments. The decision of Innocent X was what might have been expected: he acceded to the request of the majority, keeping in view as far as possible the wishes of the minority. A commission was appointed, consisting of five cardinals and thirteen consultors, some of whom were known to favour acquittal. Its laborious examination lasted two years: it held thirty-six long sessions, of which the last ten were presided over by the pope in person. The "Augustinus" which, as has been said, had friends on the bench, was defended with skill and tenacity. Finally its advocates presented a table of three columns, in which they distinguished as many interpretations of the five

propositions: a Calvinistic interpretation, rejected as heretical, a Pelagian or Semipelagian interpretation, identified by them with the traditional doctrine, also to be cast aside, and lastly, their interpretation, the idea of St. Augustine himself, which could not but be approved. This plea, skilful as it was could not avert the solemn condemnation, by the Bull "Cum occasione" (31 May, 1653), of the five propositions, which were as follows:

- Some of God's commandments are impossible to just men who wish and strive (to keep them) considering the powers they actually have, the grace by which these precepts may become possible is also wanting;
- In the state of fallen nature no one ever resists interior grace;
- To merit, or demerit, in the state of fallen nature we must be free from all external constraint, but not from interior necessity,
- The Semipelagians admitted the necessity of interior preventing grace for all acts, even for the beginning of faith; but they fell into heresy in pretending that this grace is such that man may either follow or resist it;
- To say that Christ died or shed His blood for all men, is Semipelagianism.

These five propositions were rejected as heretical, the first four absolutely the fifth if understood in the sense that Christ died only for the predestined. All are implicitly contained in the second, and through it, all are connected with the above-mentioned erroneous conception of the state of innocence and the original fall. If it be true that fallen man never resists interior grace (second proposition), it follows that a just man who violates a commandment of God did not have the grace to observe it. That he therefore transgresses it through inability to fulfil it (first proposition). If, however, he has sinned and thus demerited, it is clear that, to demerit, the liberty of indifference is not requisite, and what is said of demerit must also be said of its correlative, merit (third proposition). On the other hand, if grace is often wanting to the just, since they fall, it is wanting still more to sinners; it is therefore impossible to maintain that the death of Jesus Christ assured to every man the graces necessary for salvation (fifth proposition). If this be so, the Semipelagians were in error in admitting the universal distribution of a grace which may be resisted (fourth proposition).

III. RESISTANCE OF THE JANSENISTS

Well received by the Sorbonne and the General Assembly of the Clergy, the Bull "Cum occasione" was promulgated with the royal sanction. This should have opened the eyes of the partisans of Jansenius. They were given the alternative of finally renoun-

cing their errors, or of openly resisting the supreme authority. They were thrown for the moment into embarrassment and hesitation, from which Arnauld extricated them by a subtlety: they must, he said, accept the condemnation of the five propositions, and reject them, as did the pope, only, these propositions were not contained in the book of the Bishop of Ypres, or if they were found therein, it was in another sense than in the pontifical document; the idea of Jansenius was the same as that of St. Augustine, which the Church neither could, nor wished to, censure. This interpretation was not tenable; it was contrary to the text of the Bull, no less than to the minutes of the discussions which had preceded it, and throughout which these propositions were considered and Presented as expressing the sense of the "Augustinus". In March, 1564, thirty-eight bishops rejected the interpretation, and communicated their decision to the sovereign pontiff, who thanked and congratulated them. The Jansenists persisted none the less in an attitude opposed alike to frankness and to logic. The occasion soon arrived for them to support this with a complete theory. The Duc de Liancourt, one of the protectors of the party, was refused absolution until he should change his sentiments and accept purely and simply the condemnation of the "Augustinus". Arnauld took up his pen and in two successive letters protested against any such exaction. Ecclesiastical judgments, he said, are not all of equal value, and do not entail the same obligations; where there is question of the truth or falsity of a doctrine, of its revealed origin or its heterodoxy, the Church in virtue of its Divine mission is qualified to decide; it is a matter of right. But if the doubt bears upon the presence of this doctrine in a book, it is a question of purely human fact, which as such does not fall under the jurisdiction of the supernatural teaching authority instituted in the Church by Jesus Christ. In the former case, the Church having pronounced sentence, we have no choice but to conform our belief to its decision; in the latter, its word should not be openly contradicted it claims from us the homage of a respectful silence but not that of an interior assent. Such is the famous distinction between right and fact, which was henceforth to be the basis of their resistance, and through which the recalcitrants pretended to remain Catholics, united to the visible body of Christ despite all their obstinacy. This distinction is both logically and historically the denial of the doctrinal power of the Church. For how is it possible to teach and defend revealed doctrine if its affirmation or denial cannot be discerned in a book or a writing, whatever its form or its extent? In fact, from the beginning, councils and popes have approved and imposed as orthodox certain formulas and certain works, and from the beginning have proscribed others as being tainted with heresy or error.

The expedient contrived by Arnauld was so opposed to both fact and reason that a number of Jansenists who were more consistent in their contumacy, such as Pascal, refused to adopt it or to subscribe to the condemnation of the five propositions in any

sense. The greater number, however, took advantage of it to mislead others or deceive themselves. All of them, moreover, through personal intercourse, preaching, or writing, displayed extraordinary activity in behalf of their ideas. They aimed especially, following the tactics inaugurated by St-Cyran, at introducing them into religious orders, and in this way they were in a measure successful, e.g. with the Oratory of Berulle. Against the Jesuits, in whom from the first they had encountered capable and determined adversaries, they had vowed a profound antipathy and waged a war to the death. This inspired the "Provinciales" which appeared in 1656. These were letters supposedly addressed to a provincial correspondent. Their author Blaise Pascal, abusing his admirable genius, therein lavished the resources of a captivating style and an inexhaustible sarcastic humour to taunt and decry the Society of Jesus, as favouring and propagating a relaxed and corrupt moral code. To this end the errors or imprudences of some members, emphasized with malicious exaggeration, were made to appear as the official doctrine of the whole order. The "Provinciales" were translated into elegant Latin by Nicole disguised for the occasion under the pseudonym of Wilhelmus Wendrochius. They did a great deal of harm.

However, the Sorbonne, again declaring itself against the faction, had, by 138 votes against 68, condemned the latest writings of Arnauld, and, on his refusal to submit, it dismissed him, together with sixty other doctors who made common cause with him. The assembly of bishops in 1656 branded as heretical the unfortunate theory of right and of fact, and reported its decision to Alexander VII, who had just succeeded Innocent X. On 16 October the pope replied to this communication by the Bull "Ad sanctam Beati Petri sedem". He praised the clear-sighted firmness of the episcopate and confirmed in the following terms the condemnation pronounced by his predecessor: "We declare and define that the five propositions have been drawn from the book of Jansenius entitled 'Augustinus', and that they have been condemned in the sense of the same Jansenius and we once more condemn them as such." Relying on these words, the Assembly of the Clergy of the following year (1657) drew up a formula of faith conformable thereto and made subscription to it obligatory. The Jansenists would not give in. They claimed that no one could exact a lying signature from those who were not convinced of the truth of the matter. The religious of Port-Royal were especially conspicuous for their obstinacy, and the Archbishop of Paris, after several fruitless admonitions, was forced to debar them from receiving the sacraments. Four bishops openly allied themselves with the rebellious party: they were Henri Arnauld of Angers Buzenval of Beauvais, Caulet of Pamiers, and Pavillon of Aleth. Some claimed besides that the Roman pontiff alone had the right to exact such subscription. In order to silence them, Alexander VII, at the instance of several members of the episcopate, issued (15 February 1664) a new Constitution, beginning with the words, "Regiminis Apostolici".

In this he enjoined, with threat of canonical penalties for disobedience, that all ecclesiastics, as well as all religious, men and women, should subscribe to the following very definite formulary:

I, (Name), submitting to the Apostolic constitutions of the sovereign pontiffs, Innocent X and Alexander VII, published 31 May, 1653 and 16 October, 1656, sincerely repudiate the five propositions extracted from the book of Jansenius entitled 'Augustinus', and I condemn them upon oath in the very sense expressed by that author, as the Apostolic See has condemned them by the two above mentioned Constitutions (Enchiridion, 1099).

It would be a mistake to believe that this direct intervention of the pope sustained as it was by Louis XIV, completely ended the stubborn opposition. The real Jansenists underwent no change of sentiment. Some of them, such as Antoine Arnauld and the greater number of the religious of Port-Royal, defying both the ecclesiastical and the civil authority, refused their signature, on the pretext that it was not in the power of any person to command them to perform an act of hypocrisy, others subscribed, but at the same time protesting more or less openly that it applied only to the question of right, that the question of fact was reserved and should be so, since in this respect the Church had no jurisdiction, and above all no infallibility. Among those who stood for explicit restriction and hence for refusal to sign the formulary as it was, must be numbered the four bishops mentioned above. In the mandates through which they communicated to their flocks the Bull "Apostolici" they did not hesitate expressly to maintain the distinction between fact and right. The pope being informed of this, condemned these mandates, 18 January, 1667. He did not stop there, but, in order to safeguard both his authority and the unity of belief, he decided, with the full approbation of Louis XIV to subject the conduct of the culprits to a canonical judgment, and for this purpose he appointed as judges nine other members of the French episcopate.

IV. THE PEACE OF CLEMENT IX

In the midst of all this, Alexander VII died, 22 May, 1667. His successor Clement IX wished at first to continue the process, and he confirmed the appointed judges in all their powers. However, the king, who had at first displayed great zeal in seconding the Holy See in the affair, seemed to have let his ardour cool. Rome had not judged it expedient to yield to all his wishes regarding the formation of the ecclesiastical tribunal. Together with his court he began to be apprehensive lest a blow should be struck at the "liberties" of the Gallican Church. The Jansenists skilfully turned these apprehensions to their profit. They had already won over several ministers of state, notably Ly-

onne, and they succeeded in gaining for their cause nineteen members of the episcopate, who in consequence wrote to the sovereign pontiff and to the king. In their petition to the pope these bishops, while protesting their profound respect and entire obedience, observed that the infallibility of the Church did not extend to facts outside of revelation. They further confounded purely human or purely personal facts with dogmatic facts, i.e. such as were implied by a dogma or were in necessary connection with it, and under cover of this confusion, they ended by affirming that their doctrine, the doctrine of the four accused bishops, was the common doctrine of the theologians most devoted to the Holy See, of Baronius, Bellarmine, Pallavicini, etc. The same assertions were repeated in a more audacious form in the address to the king, in which they spoke also of the necessity of guarding against theories which were new and "harmful to the interests and safety of the State". These circumstances brought about a very delicate situation, and there was reason to fear that too great severity would lead to disastrous results. On this account the new nuncio, Bargellini, inclined towards a peaceful arrangement, for which he obtained the pope's consent. D'Estrées, the Bishop of Laon, was chosen as mediator, and at his request there were associated with him de Gondren, Archbishop of Sens. and Vialar, Bishop of Chalons, both of whom had signed the two petitions just spoken of, and were, therefore, friends of the four accused prelates. It was agreed that these last should subscribe without restriction to the formulary and cause it to be subscribed to in like manner by their clergy in diocesan synods, and that these subscriptions should take the place of an express retraction of the mandates sent out by the bishops. Pursuant to this arrangement they convened their synods, but, as later became known all four gave oral explanations authorizing respectful silence on the question of fact, and it would seem that they acted thus with some connivance on the part of the mediators, unknown, however, to the nuncio and perhaps to d'Estrées. But this did not prevent them from affirming, in a common address to the sovereign pontiff, that they themselves and their priests had signed the formulary, as had been done in the other dioceses of France.

D'Estrées for his part wrote at the same time: "The four bishops have just conformed, by a new and sincere subscription, with the other bishops". Both letters were transmitted by the nuncio to Rome, where Lyonne, also alleging that the signatures were absolutely regular, insisted that the affair should be brought to an end. For this reason the pope, who had received these documents 24 September, informed Louis XIV of the fact about 28 September, expressing his joy for the "subscription pure and simple" which had been obtained, announcing his intention to restore the bishops in question to favour and requesting the king to do the same. However, before the Briefs of reconciliation thus announced had been sent to each of the four prelates concerned, rumours which had at first been current with regard to their lack of frankness grew

more definite, and took the shape of formal and repeated denunciations. Hence, by order of Clement IX, Bargellini had to make a new investigation at Paris. As the final result he sent to Rome a report drawn up by Vialar. This report stated with regard to the four bishops: "They have condemned and caused to be condemned the five propositions *with all manner of sincerity, without any exception or restriction whatever*, in every sense in which the Church has condemned them"; but he then added explanations concerning the question of fact which were not altogether free from ambiguity. The pope, no less perplexed than before, appointed a commission of twelve cardinals to obtain information. These secured, it seems, the proof of the language made use of by the bishops in their synods. Nevertheless, in consideration of the very grave difficulties which would result from opening up the whole case again, the majority of the commission held that they might and should abide practically by the testimony of the official documents and especially by that of the minister Lyonne regarding the reality of the "subscription pure and simple", at the same time emphasizing anew this point as the essential basis and the condition *sine qua non* of peace.

The four Briefs of reconciliation were then drawn up and dispatched; they bear the date, 19 January, 1669. In them Clement IX recalls the testimony he had received "concerning the real and complete obedience with which they had sincerely subscribed to the formulary, condemning the five propositions without any exception or restriction, according to all the senses in which they had been condemned by the Holy See". He remarks further that being "most firmly resolved to uphold the constitutions of his predecessors, he would never have admitted a single restriction or exception". These preambles were as explicit and formal as possible. They prove, especially when compared with the terms and object of the formulary of Alexander VII, how far wrong the Jansenists were in celebrating this termination of the affair as the triumph of their theory, as the acceptance by the pope himself of the distinction between right and fact. On the other hand it is clear from the whole course of the negotiations that the loyalty of these champions of a stainless and unfaltering moral code was more than doubtful. At all events, the sect profited by the muddle these manoeuvres had created to extend its conquest still further and to get a stronger hold on several religious congregations. It was favoured by various circumstances. Among them must be included the growing infatuation in France for the so-called Gallican Liberties, and in consequence a certain attitude of defiance, or at least indocility, towards the supreme authority; then the Declaration of 1682, and finally the unfortunate affair of the *Régale*. It is worthy of remark that in this last conflict it was two Jansenist bishops of the deepest dye who most energetically upheld the rights of the Church and the Holy See, while the greater number of the others too readily bowed before the arrogant pretensions of the civil power.

V. JANSENISM AT THE BEGINNING OF THE EIGHTEENTH CENTURY

Despite the reticence and equivocation which it allowed to continue, the "Peace of Clement IX" found a certain justification for its name in the period of relative calm which followed it, and which lasted until the end of the seventeenth century. Many minds were tired of the incessant strife, and this very weariness favoured the cessation of polemics. Moreover the Catholic world and the Holy See were at that time preoccupied with a multitude of grave questions, and through force of circumstances Jansenism was relegated to second place. Mention has already been made of the signs of a recrudescence of Gallicanism betrayed in the Four Articles of 1682, and in the quarrels of which the *Régale* was the subject. To this period also belongs the sharp conflict regarding the franchises, or *droit d'asile* (right of asylum), the odious privilege concerning which Louis XIV showed an obstinacy and arrogance which passed all bounds (1687). Moreover, the Quietist doctrines spread by de Molinos, and which seduced for a brief period even the pious and learned Fénelon as well as the relaxed opinions of certain moralists, furnished matter for many condemnations on the part of Innocent XI, Alexander VIII, and Innocent XII. Finally, another impassioned debate had arisen which drew into the arena several groups of the most distinguished and best intentioned theologians, and which was only definitively closed by Benedict XIV, namely the controversy concerning the Chinese and Malabar Rites. All these combined causes had for a time distracted public attention from the contents and the partisans of the "Augustinus". Besides, "Jansenism" was beginning to serve as a label for rather divergent tendencies, not all of which deserved equal reprobation. The out-and-out Jansenists, those who persisted in spite of everything in upholding the principle of necessitating grace and the consequent errors of the five propositions, had almost disappeared with Pascal. The remainder of the really Jansenist party without committing itself to a submission pure and simple, assumed a far more cautious demeanour. The members rejected the expression "necessitating grace", substituting for it that of a grace efficacious "in itself", seeking thus to identify themselves with the Thomists and the Augustinians.

Abandoning the plainly heretical sense of the five propositions, and repudiating any intention to resist legitimate authority, they confined themselves to denying the infallibility of the Church with regard to dogmatic facts. Then, too, they were still the fanatical preachers of a discouraging rigorism, which they adorned with the names of virtue and austerity, and, under pretext of combating abuses, openly antagonized the incontestable characteristics of Catholicism especially its unity of government, the traditional continuity of its customs, and the legitimate part which heart and feeling play in its worship. With all their skilful extenuations they bore the mark of the levelling, innovating, and arid spirit of Calvinism. These were the *fins Jansénistes*. They formed thenceforth the bulk of the sect, or rather in them the sect properly so called was

summed up. But apart from them, though side by side with them, and bordering on their tendencies and beliefs, history points out two rather well-defined groups known as the "duped Jansenists" and the "quasi-Jansenists". The first were in good faith pretty much what the *fins Jansénistes* were by system and tactics: they appear to us as convinced adversaries of necessitating grace, but no less sincere defenders of efficacious grace; rigorists in moral and sacramental questions, often opposed, like the Parliamentarians, to the rights of the Holy See; generally favourable to the innovations of the sect in matters of worship and discipline. The second category is that of men of Jansenist tinge. While remaining within bounds in theological opinions, they declared themselves against really relaxed morality against exaggerated popular devotions and other similar abuses. The greater number were at bottom zealous Catholics, but their zeal, agreeing with that of the Jansenists on so many points, took on, so to speak, an outer colouring of Jansenism, and they were drawn into closer sympathy with the party in proportion to the confidence with which it inspired them. Even more than the "duped" Jansenists they were extremely useful in screening the sectarians and in securing for them, on the part of the pastors and the multitude of the faithful, the benefit either of silence or of a certain leniency.

But the error remained too active in the hearts of the real Jansenists to endure this situation very long. At the beginning of the eighteenth century it manifested itself by a double occurrence which revived all the strife and trouble. The discussion began afresh with regard to the "case of conscience" of 1701. A provincial conference was supposed to inquire whether absolution might be given to a cleric who declared that he held on certain points the sentiments "of those called Jansenists", especially that of respectful silence on the question of fact. Forty doctors of the Sorbonnet -- among them some of great renown, such as Natalis Alexander -- decided affirmatively. The publication of this decision aroused all enlightened Catholics, and the "case of conscience" was condemned by Clement XI (1703), by Cardinal de Noailles, Archbishop of Paris, by a large number of bishops, and finally by the faculties of theology of Louvain, Douai, and Paris. The last-named, however as its slowness would indicate, did not arrive at this decision without difficulty. As for the doctors who signed, they were terrified by the storm they had let loose, and either retracted or explained their action as best they might, with the exception of the author of the whole movement, Dr. Petitpied, whose name was erased from the list of the faculty. But the Jansenists, though pressed hard by some and abandoned by others, did not yield. For this reason Clement XI, at the request of the Kings of France and Spain, issued 16 July 1705, the Bull "Vineam Domini Sabaoth" (Enchiridion, 1350) in which he formally declared that respectful silence was not sufficient for the obedience due to the constitutions of his predecessors. This Bull, received with submission by the assembly of the clergy of 1705,

in which only the Bishop of Saint-Pons obstinately refused to agree with the opinion of his colleagues, was afterwards promulgated as a law of the State. It may be said to have officially terminated that period of half a century of agitation occasioned by the signing of the formulary. It also terminated the existence of Port-Royal des Champs, which up to that time had remained a notorious centre and hotbed of rebellion.

When it was proposed to the religious that they should accept the new Bull, they would consent only with this clause: "that it was without derogating from what had taken place in regard to them at the time of the peace of the Church under Clement XI". This restriction brought up again their entire past, as was clearly shown by their explanation of it, and therefore made their submission a hollow pretence. Cardinal de Noailles urged them in vain; he forbade them the sacraments, and two of the religious died without receiving them, unless it were secretly from a disguised priest. As all measures had failed, it was high time to put an end to this scandalous resistance. A Bull suppressed the title of the Abbey of Port-Royal des Champs, and reunited that house and its holdings to the Paris house. The Court gave peremptory orders for a prompt execution, and, despite all the means of delay contrived and carried out by those interested, the pontifical sentence had its full effect. The surviving choir religious were scattered among the convents of the neighbouring destroyed dioceses (29 October 1709). This separation had the desired good results. All the rebellious nuns ended by submitting, save one, the mother prioress, who died at Blois without the sacraments, in 1716. The Government wishing to eradicate even the trace of this nest of errors, as Clement XI called it, destroyed all the buildings and removed elsewhere the bodies buried in the cemetery.

During the disputes concerning the "case of conscience", a new book came cautiously on the scene another "Augustinus", pregnant with storms and tempests, as violent as the first. The author was Paschase Quesnel, at first a member of the French Oratory, but expelled from that congregation for his Jansenistic opinions (1684), and since 1689 a refugee at Brussels with the aged Antoine Arnauld whom he succeeded in 1696 as leader of the party. The work had been published in part as early as 1671 in a 12mo volume entitled "Abrégé de la morale de l'Évangile, ou pensées chrétiennes sur le texte des quatre évangélistes". It appeared with the hearty approbation of Vialar, Bishop of Châlons, and, thanks to a style at once attractive and full of unction which seemed in general to reflect a solid and sincere piety, it soon met with great success. But in the later development of his first work, Quesnel had extended it to the whole of the New Testament. He issued it in 1693, in an edition which comprised four large volumes entitled, "Nouveau testament en français avec des réflexions morales sur chaque verset". This edition, besides the earlier approbation of Vialar which it inopportunely bore, was formally approved and heartily recommended by his successor,

de Noailles, who, as subsequent events showed, acted imprudently in the matter and without being well-informed as to the contents of the book. The "Réflexions morales" of Quesnel reproduced, in fact, the theories of the irresistible efficaciousness of grace and the limitations of God's will with regard to the salvation of men. Hence they soon called forth the sharpest criticism, and at the same time attracted the attention of the guardians of the Faith. The Bishops of Apt (1703) Gap (1704), Nevers, and Besancon (1707) condemned them, and, after a report from the Inquisition, Clement XI proscribed them by the Brief "Universi dominici" (1708) as containing the propositions already condemned and as manifestly savouring of the Jansenist heresy". Two years later (1710) the Bishops of Lucon and La Rochelle forbade the reading of the book.

Their ordinance, posted in the capital, gave rise to a conflict with Noailles, who, having become cardinal and Archbishop of Paris, found himself under the necessity of withdrawing the approbation he had formerly given at Chalons. However, as he hesitated, less through attachment to error than through self love, to take this step, Louis XIV asked the pope to issue a solemn constitution and put an end to the trouble. Clement XI then subjected the book to a new and very minute examination, and in the Bull "Unigenitus" (8 September, 1713) he condemned 101 propositions which had been taken from the book (Enchiridion, 1351 sq.). Among these were some propositions which, in themselves and apart from the context, seemed to have an orthodox sense. Noailles and with him eight other bishops, though they did not refuse to proscribe the book, seized this Pretext to ask explanations from Rome before accepting the Bull. This was the beginning of lengthy discussions the gravity of which increased with the death of Louis XIV (1715), who was succeeded in power by Philippe d'Orléans. The regent took a much less decided stand than his predecessor, and the change soon had its effect on various centres, especially on the Sorbonne, where the sectaries had succeeded in winning over the majority. The faculties of Paris, Reims, and Nantes, who had received the Bull, revoked their previous acceptance. Four bishops went even farther, having recourse to an expedient of which only heretics or declared schismatics had hitherto bethought themselves, and which was essentially at variance with the hierarchical concept of the Church; they appealed from the Bull "Unigenitus" to a general council (1717). Their example was followed by some of their colleagues, by hundreds of clerics and religious, by the Parlements and the magistracy Noailles, for a long time undecided and always inconsistent, ended by appealing also, but "from the pope obviously mistaken to the pope better informed and to a general council".

Clement XI, however, in the Bull "Pastoralis officii" (1718), condemned the appeal and excommunicated the appellants. But this did not disarm the opposition, which appealed from the second Bull as from the first Noailles himself published a new appeal, no longer chiefly to the pope "better informed", but to a council, and the Parlement

of Paris, suppressed the Bull "Pastoralis". The multiplicity of these defections and the arrogant clamour of the appellants might give the impression that they constituted, if not a majority, at least a very imposing minority. Such, however, was not the case, and the chief evidence of this lies in the well-established fact that enormous sums were devoted to paying for these appeals. After allowing for these shameful and suggestive purchases, we find among the number of the appellants, one cardinal, about eighteen bishops, and three thousand clerics. But without leaving France, we find opposed to them four cardinals, a hundred bishops, and a hundred thousand clerics, that is, the moral unanimity of the French clergy. What is to be said, then, when this handful of protesters is compared to the whole of the Churches of England, the Low Countries, Germany, Hungary, Italy, Naples, Savoy, Portugal, Spain, etc., which, on being requested to pronounce, did so by proscribing the appeal as an act of schism and foolish revolt? The polemics, however, continued for several years. The return to unity of Cardinal de Noailles, who submitted without restriction in 1728 six months before his death, was a telling blow to the party of Quesnel. Henceforth it steadily grew less, so that not even the scenes that took place at the cemetery of Saint-Médard, of which mention is made below. restored it. But the Parlements. eager to declare themselves and to apply their Gallican and royalist principles, continued for a long time to refuse to receive the Bull "Unigenitus". They even made it the occasion to meddle in scandalous fashion in the administration of the sacraments, and to persecute bishops and priests accused of refusing absolution to those who would not submit to the Holy See.

VI. THE CONVULSIONARIES

We have reviewed the long series of defensive measures contrived by the Jansenists rejection of the five propositions without rejection of the "Augustinus", explicit distinction between the question of right and the question of fact; restriction of ecclesiastical infallibility to the question of right; the tactics of respectful silence, and appeal to a general council. They had exhausted all the expedients of a theological and canonical discussion more obstinate than sincere. Not a single one of these had availed them anything at the bar of right reason or of legitimate authority. They then thought to invoke in their behalf the direct testimony of God Himself, namely, miracles. One of their number, an appellant, a rigorist to the point of having once passed two years without communicating, for the rest given to a retired and penitent life, the deacon Francois de Paris had died in 1727. They pretended that at his tomb in the little cemetery of Saint-Médard marvellous cures took place. A case alleged as such was examined by de Vintimille, Archbishop of Paris, who with proofs in hand declared it false and supposititious (1731). But other cures were claimed by the party, and so noised abroad that soon the sick and the curious flocked to the cemetery. The sick experienced strange agitations, nervous commotions, either real or simulated. They

fell into violent transports and inveighed against the pope and the bishops, as the convulsionaries of Cévennes had denounced the papacy and the Mass. In the excited crowd women were especially noticeable, screaming, yelling, throwing themselves about, sometimes assuming the most astounding and unseemly postures. To justify these extravagances, complacent admirers had recourse to the theory of "figurism". As in their eyes the fact of the general acceptance of the Bull "Unigenitus" was the apostasy predicted by the Apocalypse, so the ridiculous and revolting scenes enacted by their friends symbolized the state of upheaval which, according to them, involved everything in the Church. They reverted thus to a fundamental thesis such as has been met with in Jansenius and St-Cyran, and which these latter had borrowed from the Protestants. A journal the "Nouvelles Ecclesiastiques", had been founded in 1729 to defend and propagate these ideas and practices, and the "Nouvelles" was profusely spread, thanks to the pecuniary resources furnished by the *Boîte à Perrette*, the name given later to the capital or common fund of the sect begun by Nicole, and which grew so rapidly that it exceeded a million of money. It had hitherto served chiefly to defray the cost of appeals and to support, in France as well as in Holland, the religious, men and women, who deserted their convents or congregations for the sake of Jansenism.

The cemetery of Saint-Médard, having become the scene of exhibitions as tumultuous as they were indecent, was closed by order of the court in 1732. The *oeuvre des convulsions*, as its partisans called it, was not, however, abandoned. The convulsions reappeared in private houses with the same characteristics, but more glaring. Henceforth with few exceptions they seized only upon young girls, who, it was said, possessed a divine gift of healing. But what was more astonishing was that their bodies, subjected during the crisis to all sorts of painful tests, seemed at once insensible and invulnerable; they were not wounded by the sharpest instruments, or bruised by enormous weights or blows of incredible violence. A convulsionary, nicknamed "la Salamandre", remained suspended for more than nine minutes above a fiery brazier, enveloped only in a sheet, which also remained intact in the midst of the flames. Tests of this sort had received in the language of the sect the denomination of *secours*, and the *secouristes*, or partisans of the *secours*, distinguished between the *petits-secours* and the *grands-secours*, only the latter being supposed to require supernatural force. At this point, a wave of defiance and opposition arose among the Jansenists themselves. Thirty appellant doctors openly declared by common consent against the convulsions and the *secours*. A lively discussion arose between the *secouristes* and the *anti-secouristes*. The *secouristes* in turn were soon divided into *discernantes* and *melangistes*, the former distinguishing between the work itself and its grotesque or objectionable features, which they ascribed to the Devil or to human weakness, while the latter regarded the convulsions and the *secours*

as a single work coming from God, in which even the shocking elements had purpose and significance.

Without entering further into the details of these distinctions and divisions, we may ask how we are to judge what took place at the cemetery of Saint-Médard and the matters connected therewith. Whatever may have been said on the subject, there was absolutely no trace of the Divine seal in these happenings. It is needless to recall St. Augustine's principle that all prodigies accomplished outside the Church, especially those against the Church, are by the very fact more than suspicious: "Praeter unitatem, et qui facit miracula nihil est". Two things only call for remark. Several of the so-called miraculous cures were made the subject of a judicial investigation, and it was proved that they were based only on testimonies which were either false, interested, preconcerted, and more than once retracted, or at least valueless, the echoes of diseased and fanatic imaginations. Moreover, the convulsions and the *secours* certainly took place under circumstances which mere good taste would reject as unworthy of Divine wisdom and holiness. Not only were the cures, both acknowledged and claimed, supplementary of one another, but cures, convulsions, and *secours* belonged to the same order of facts and tended to the same concrete end. We are therefore justified in concluding that the finger of God did not appear in the whole or in any of its parts. On the other hand, although fraud was discovered in several cases, it is impossible to ascribe them all indiscriminately to trickery or ignorant simplicity. Critically speaking, the authenticity of some extraordinary phenomena is beyond question, as they took place publicly and in the presence of reliable witnesses, particularly anti-secourist Jansenists. The question remains whether all these prodigies are explicable by natural causes, or whether the direct action of the Devil is to be recognized in some of them. Each of these opinions has its adherents, but the former seems difficult to uphold despite, and in part perhaps because of, the light which recent experiments in suggestion, hypnotism, and spiritism have thrown on the problem. However this may be, one thing is certain; the things here related served only to discredit the cause of the party which exploited them. Jansenists themselves came at length to feel ashamed of such practices. The excesses connected with them more than once forced the civil authorities to intervene at least in a mild way; but this creation of fanaticism succumbed to ridicule and died by its own hand.

VII. JANSENISM IN HOLLAND AND THE SCHISM OF UTRECHT

Injurious as Jansenism was to religion and the Church in France, it did not there lead to schism properly so called. The same does not hold good of the Dutch Low Countries, which the most important or most deeply implicated of the sectaries had long made their meeting place, finding there welcome and safety. Since the United Provinces had for the most part gone over to Protestantism, Catholics had lived there

under the direction of vicars Apostolic. Unhappily these representatives of the pope were soon won over to the doctrines and intrigues of which the "Augustinus" was the origin and centre. De Neercassel, titular Archbishop of Castoria, who governed the whole church in the Netherlands from 1663 to 1686, made no secret of his intimacy with the party. Under him the country began to become the refuge of all whose obstinacy forced them to leave France and Belgium. Thither came such men as Antoine Arnauld, du Vaucel, Gerberon, Quesnel, Nicole, Petitpied, as well as a number of priests, monks, and nuns who preferred exile to the acceptance of the pontifical Bulls. A large number of these deserters belonged to the Congregation of the Oratory, but other orders shared with it this unfortunate distinction. When the fever of the appeals was at its height, twenty-six Carthusians of the Paris house escaped from their cloister during the night and fled to Holland. Fifteen Benedictines of the Abbey of Orval, in the Diocese of Trier, gave the same scandal. Peter Codde, who succeeded Neercassel in 1686, and who bore the title of Archbishop of Sebaste, went further than his predecessor. He refused to sign the formulary and, when summoned to Rome, defended himself so poorly that he was first forbidden to exercise his functions, and then deposed by a decree of 1704. He died still obstinate in 1710. He had been replaced by Gerard Potkamp, but this appointment and those that followed were rejected by a section of the clergy, to whom the States-General lent their support. The conflict lasted a long time, during which the episcopal functions were not fulfilled. In 1723 the Chapter of Utrecht i.e. a group of seven or eight priests who assumed this name and quality in order to put an end to a precarious and Painful situation, elected, on its own authority, as archbishop of the same city, one of its members, Cornelius Steenhoven, who then held the office of vicar-general. This election was not canonical, and was not approved by the pope. Steenhoven nevertheless had the audacity to get himself consecrated by Varlet, a former missionary bishop and coadjutor Bishop of Babylon, who was at that time suspended, interdicted, and excommunicated. He thus consummated the schism, interdicted likewise and excommunicated, he died in 1725. Those who had elected him transferred their support to Barchman Wuitiers, who had recourse to the same consecrator. The unhappy Varlet lived long enough to administer the episcopal unction to two successors of Barchman, van der Croon and Meindarts. The sole survivor of this sorry line, Meindarts, ran the risk of seeing his dignity become extinct with himself. To prevent this, the Dioceses of Haarlem (1742) and Deventer (1757) were created, and became suffragans of Utrecht. But Rome always refused to ratify these outrageously irregular acts, invariably replying to the notification of each election with a declaration of nullification and a sentence of excommunication against those elected and their adherents. Yet, in spite of everything, the schismatical community of Utrecht has prolonged its existence until modern times. At present it numbers about 6000 members

in the three united dioceses. It would scarcely be noticed if it had not, in the last century, made itself heard by protesting against Pius IX's re-establishment of the Catholic hierarchy in Holland (1853), by declaring itself against the dogmas of the Immaculate Conception (1854) and Papal Infallibility (1870), and lastly, after the Vatican Council, in allying itself with the "Old Catholics", whose first so-called bishop it consecrated.

VIII. DECLINE AND END OF JANSENISM

During the second half of the eighteenth century the influence of Jansenism was prolonged by taking on various forms and ramifications, and extending to countries other than those in which we have hitherto followed it. In France the Parlements continued to pronounce judgments, to inflict fines and confiscations, to suppress episcopal ordinances, and even to address remonstrances to the king in defence of the pretended right of the appellants to absolution and the reception of the last sacraments. In 1756 they rejected a very moderate decree of Benedict XIV regulating the matter. A royal declaration confirming the Roman decision did not find favour in their eyes, and it required all the remaining strength of the monarchy to compel them to register it. The sectaries seemed by degrees to detach themselves from the primitive heresy, but they retained unabated the spirit of insubordination and schism, the spirit of opposition to Rome, and above all a mortal hatred of the Jesuits. They had vowed the ruin of that order, which they always found blocking their way, and in order to attain their end they successively induced Catholic princes and ministers in Portugal, France, Spain, Naples, the Kingdom of the Two Sicilies the Duchy of Parma, and elsewhere to join hands with the worst leaders of impiety and philosophism. The same tendency was displayed in the work of Febronius, condemned (1764) by Clement XIII; and, instilled into Joseph II by his councillor Godefried van Swieten, a disciple of the revolted church of Utrecht, it became the principle of the innovations and ecclesiastical upheavals decreed by the sacristan-emperor (*see* FEBRONIANISM). It raged in similar fashion in Tuscany under the government of the Grand Duke Leopold, brother of Joseph II; and found another manifestation in the famous Synod of Pistoia (1786), the decrees of which, at once the quintessence of Gallicanism and of the heresy of Jansenism, were reprovved by the Bull of Pius VI, "Auctorem fidei" (1794). On French soil the remains of Jansenism were not completely extinguished by the French Revolution, but survived in some remarkable personalities, such as the constitutional Bishop Grégoire, and in some religious congregations, as the Sisters of St. Martha, who did not return in a body to Catholic truth and unity until 1847. But its spirit lived on, especially in the rigorism which for a long time dominated the practice of the administration of the sacraments and the teaching of moral theology. In a great number of French seminaries, Bailly's "Théologie", which was impregnated with this rigorism, remained the standard textbook until Rome in 1852 put it on the Index "donec cor-

rigatur". Among those who even prior to that had worked energetically against it, chiefly by offering in opposition the doctrines of St. Alphonsus, two names are deserving Of special mention: Gousset, whose "Théologie morale" (1844) had been preceded by his "Justification de la theologie morale du bienheureux Alphonse-Marie Liguori" (2nd ed., 1832); Jean-Pierre Berman, professor at the seminary of Nancy for twenty-five years (1828-1853), and author of a "Theologia moralis ex S. Liguori" (7 vols., 1855).

Such is, in outline, the historical account of Jansenism, its origin, its phases, and its decline. It is evident that, besides its attachment to the "Augustinus" and its rigorism in morals, it is distinguished among heresies for crafty proceedings, chicane and lack of frankness on the part of its adherents, especially their pretence of remaining Catholics without renouncing their errors, of staying in the Church despite the Church itself, by skilfully eluding or braving with impunity the decisions of the supreme authority. Such conduct is beyond doubt without a parallel in the annals of Christianity previous to the outbreak of Jansenism in fact, it would be incredible if we did not in our own day find in certain groups of Modernists examples of this astonishing and absurd duplicity. The deplorable consequences, both theoretical and practical, of the Jansenist system, and of the polemics to which it gave rise, may readily be gathered from what has been said, and from the history of the last few centuries.

J. FORGET

Abraham Janssens

Abraham Janssens

Flemish painter, b. at Antwerp about 1573; d. probably in the same place about 1631. He is also known as Janssens Van Nuyssen, and several of his pictures are signed with this name, which it is believed he adopted from his mother's family with the object of distinguishing himself from other members of the Janssens family, contemporary artists. He was a pupil of Jan Snellinck in 1585, according to some writers, but it is believed that this date is a little too early, as, according to the accepted tradition, Janssens would then have been only twelve years old. The first date that we know for certain respecting him is that of his admission as a teaching master into the Guild of St. Luke, which was in 1601, and in the following year he married, and eventually had a family. One of his daughters, Anna, married Jan Breughel the younger, the son of "Velvet" Breughel, and the second of his sons, named Abraham like his father, became a painter, and was admitted a member of the Guild of Painters in 1636.

A story was started by Houbraken to the effect that Janssens was a bitter opponent of Rubens, but Houbraken's work is the only authority for this legend, and the author appears to have had a spite against Janssens, and to have said everything that was

possible to injure his character. Janssens was a contemporary of Rubens, and a man who appears to have been very much respected in Antwerp, spoken of in terms of friendship and affection by other artists, and recognized as a man of great genius, taking a high position in the very first rank. It seems to be most unlikely that Houbraeken's story is a truthful one, especially as there is no evidence whatever in other works to support it. The best of Janssens' pictures are to be seen at Antwerp, especially in the churches of the Carmelites and St. Charles, and in the cathedral, the painting of "The Entombment" in the Carmelite church being one of his very finest productions. There are three important paintings by him in the Antwerp Museum, two in the cathedral at Ghent, one in the cathedral at Bruges, a remarkable mythological scene representing Venus and Jupiter in Brunswick, and a fine picture of St. Cecilia at Cologne. Other galleries containing works by this important artist are those of Berlin, Brussels, Cassel, and Vienna. In at least two of his pictures he worked in collaboration with Snyders, the flowers and fruit in his picture of Pomona at Berlin, and the animals in his representation of Atalanta in the same gallery, having been painted by his friend. In splendour of colouring and in vigour of composition he was surpassed in his day only by Rubens, and was recognized in Antwerp as a man of profound talent and great skill. Many of his pictures were engraved.

HOUBRAKEN, *De Groote Schouburgh der Nederlantsche* (Amsterdam, 1718);
KRAMM, *De Lerens en Werken der Hollandsche* (Amsterdam, 1857); ROMBOUTS,
Le Liggeren et autres Archives, etc. (Paris, 1864).

GEORGE CHARLES WILLIAMSON

Johann Hermann

Johann Hermann Janssens

Catholic theologian, b. at Maeseyck, Belgium, 7 Dec., 1783; d. at Engis, 23 May, 1853. After completing his theological studies in Rome he was appointed professor in the College of Fribourg, Switzerland, in 1809. While in this position, which he held until 1816, he composed his "Hermeneutica," which, however, was not published until 1818, after he had been appointed professor of Scripture and dogmatic theology in the ecclesiastical seminary of Liège. His teaching in this institution was taxed with heterodoxy, and in 1823 he was removed and made pastor of Engis. Shortly afterward, and against the will of his ecclesiastical superiors, he accepted the chair of anthropology and metaphysics in the philosophical college of Louvain. He retained this position until the Revolution of 1830, when the college was suppressed. He then retired to Engis, where he composed a history of the Netherlands (3 vols., Liège, 1840), written from the Protestant standpoint. Outside of Belgium he is chiefly known through his first

publication, "Hermeneutica Sacra seu Introductio in omnes et singulos libros sacros Veteris et Novi Foederis." A French translation of this work, the original of which had reached its nineteenth edition in 1897, was published by Pacaud as early as 1828. A fifth edition of this translation, edited by Glaire and Sionnet, was published in Paris in 1855.

VIGOUROUX, Dictionnaire de la Bible, s.v.; Biographie Nationale, X (Brussels, 1888-1889), p. 145.

JAMES F. DRISCOLL

St. Januarius

St. Januarius

Martyr, Bishop of Beneventum.

St. Januarius is believed to have suffered in the persecution of Diocletian, c. 305. With regard to the history of his life and martyrdom, we know next to nothing. The various collections of "Acts", though numerous (cf. Bibliotheca Hagiographica Latina, n. 4115-4140), are all extremely late and untrustworthy. Bede (c. 733) in his "Martyrologium" has epitomized the so-called "Acta Bononiensia" (see Quentin, "Les Martyrologes historiques", 76). To this source we may trace the following entry in the present Roman Martyrology, though the reference to the miracle of the liquefaction is an addition of much later date. "At Pozzuoli in Campania [the memory] of the holy martyrs Januarius, Bishop of **Desiderius of Cahors, Saint**

Beneventum, Festus his deacon, and Desiderius lector, together with Socius deacon of the church of Misenas, Proculus deacon of Pozzuoli, Eutyches and Acutius, who after chains and imprisonment were beheaded under the Emperor Diocletian. The body of St. Januarius was brought to Naples, and there honourably interred in the church, where his holy blood is kept unto this day in a phial of glass, which being set near his head becomes liquid and bubbles up as though it were fresh."

In the Breviary a longer account is given. There we are told that "Timotheus, President of Campania," was the official who condemned the martyrs, that Januarius was thrown into a fiery furnace, but that the flames would not touch him, and that the saint and his companions were afterwards exposed in the amphitheatre to wild beasts without any effect. Timotheus declaring that this was due to magic, and ordering the martyrs to be beheaded, the persecutor was smitten with blindness, but Januarius cured him, and five thousand persons were converted to Christ before the martyrs were decapitated. Then, as the Breviary lesson continues, "the cities of these coasts strove to obtain their bodies for honourable burial, so as to make sure of having them advocates with God. By God's will, the relics of Januarius were taken to Naples at last,

after having been carried from Pozzuoli to Beneventum and from Beneventum to Monte Vergine. When they were brought thence to Naples they were laid in the chief church there and have been there famous on account of many miracles. Among these is remarkable the stopping of eruptions of Mount Vesuvius, whereby both that neighbourhood and places afar off have been like to be destroyed. It is also well known and is the plain fact, seen even unto this day, that when the blood of St. Januarius, kept dried up in a small glass phial, is put in sight of the head of the same martyr, it is wont to melt and bubble in a very strange way, as though it had but freshly been shed."

It is especially this miracle of the liquefaction which has given celebrity to the name of Januarius, and to this we turn our attention. Let it at once be said that the supposition of any trick or deliberate imposture is out of the question, as candid opponents are now willing to admit. For more than four hundred years this liquefaction has taken place at frequent intervals. If it were a trick it would be necessary to admit that all the archbishops of Naples, and that countless ecclesiastics eminent for their learning and often for their great sanctity, were accomplices in the fraud, as also a number of secular officials; for the relic is so guarded that its exposition requires the concurrence of both civil and ecclesiastical authority. Further, in all these four hundred years, no one of the many who, upon the supposition of such a trick, must necessarily have been in the secret, has made any revelation or disclosed how the apparent miracle is worked. Strong indirect testimony to this truth is borne by the fact that even at the present time the rationalistic opponents of a supernatural explanation are entirely disagreed as to how the phenomenon is to be accounted for.

What actually takes place may be thus briefly described: in a silver reliquary, which in form and size somewhat suggests a small carriage lamp, two phials are enclosed. The lesser of these contains only traces of blood and need not concern us here. The larger, which is a little flagon-shaped flask four inches in height and about two and a quarter inches in diameter, is normally rather more than half full of a dark and solid mass, absolutely opaque when held up to the light, and showing no displacement when the reliquary is turned upside down. Both flasks seem to be so fixed in the lantern cavity of the reliquary by means of some hard gummy substance that they are hermetically sealed. Moreover, owing to the fact that the dark mass in the flask is protected by two thicknesses of glass it is presumably but little affected by the temperature of the surrounding air. Eighteen times in each year, i.e. (1) on the Saturday before the first Sunday in May and the eight following days, (2) on the feast of St. Januarius (19 Sept.) and during the octave, and (3) on 16 December, a silver bust believed to contain the head of St. Januarius is exposed upon the altar, and the reliquary just described is brought out and held by the officiant in view of the assembly. Prayers are said by the people, begging that the miracle may take place, while a group of poor women, known

as the "zie di San Gennaro" (aunts of St. Januarius), make themselves specially conspicuous by the fervour, and sometimes, when the miracle is delayed, by the extravagance, of their supplications.

The officiant usually holds the reliquary by its extremities, without touching the glass, and from time to time turns it upside down to note whether any movement is perceptible in the dark mass enclosed in the phial. After an interval of varying duration, usually not less than two minutes or more than an hour, the mass is gradually seen to detach itself from the sides of the phial, to become liquid and of a more or less ruby tint, and in some instances to froth and bubble up, increasing in volume. The officiant then announces, "Il miracolo é fatto", a Te Deum is sung, and the reliquary containing the liquefied blood is brought to the altar rail that the faithful may venerate it by kissing the containing vessel. Rarely has the liquefaction failed to take place in the expositions of May or September, but in that of 16 December the mass remains solid more frequently than not.

It is of course natural that those who are reluctant to admit the supernatural character of the phenomenon should regard the liquefaction as simply due to the effects of heat. There are, they urge, certain substances (e.g. a mixture of spermaceti and ether) which have a very low boiling point. The heat produced by the hands of the officiant, the pressing throng of spectators, the lights on the altar, and in particular the candle formerly held close to the reliquary to enable the people to see that the mass is opaque, combine to raise the temperature of the air sufficiently to melt the substance in the phial--a substance which is assumed to be blood, but which no one has ever analysed. Further, ever since the early years of the eighteenth century, sceptical scientists, by using certain chemical preparations, have reconstructed the miracle with more or less of success; that is to say, they have been able to exhibit some red substance which, though at first apparently solid, melted after an interval without any direct application of heat. None the less, it may be said with absolute confidence that the theory of heat affords no adequate explanation of the phenomena observed.

For more than a century careful observations of the temperature of the air in the neighbourhood of the relic have been made on these occasions and the records have been kept. It is certain from the scientific memoirs of Professors Fergola, Punzo, and Sperindeo that there is no direct relation between the temperature, and the time and manner of the liquefaction. Often when the thermometer has stood at 77° Fahrenheit or even higher, liquefaction has been delayed for as much as twenty or even forty minutes, while on the other hand the contents of the phial have sometimes liquefied in considerably less time than this when the thermometer remained as low as 60 or 65 degrees. Moreover, the heat theory by no means accounts for another more remarkable fact observed for quite two hundred years past. The mass in melting commonly in-

creased in volume, but when it solidifies again it does not necessarily return to its original bulk. Sometimes the whole phial is seen to be occupied, at other times hardly more than half. This has led a Neapolitan scientist of modern times, Professor Albini, to suggest a new physical theory derived from observing the behaviour of a viscous fluid such as partly congealed honey. He conjectures that the unknown substance in the phial consists of some highly divided solid matter which is partly held in suspension by a disproportionately small quantity of liquid. When at rest, the liquid sinks to the bottom of the phial, while the solid particles form a sort of crust not easily displaced when the vessel is turned upside down. This cohesion is however overcome by repeated movements, such as those that the reliquary experiences when the moment of liquefaction is impatiently waited for. Further, such a viscous fluid easily cakes upon the walls of the containing vessel, and admits large air bubbles which cause the deceptive appearance of a change of volume.

Professor Albini claims to have reproduced all the phenomena with a compound made of powdered chocolate and the serum of milk. On the other hand, those who have studied closely the process of liquefaction of the contents of the phial declare that such an explanation is absolutely impossible. Moreover, there seem to be well-attested instances of liquefaction taking place both in the case of this and other similar relics of blood, when the reliquary has been standing by itself without any movement whatsoever.

Accordingly, the suggestion has also been made (see Di Pace, "Ipotesi scientifica sulla Liquefazione", etc., Naples, 1905) that the phenomenon is due to some form of psychic force. The concentration of thought and will of the expectant crowd and specially of the "aunts of St. Januarius" are held to be capable of producing a physical effect. Against this, however, must be set the fact that the liquefaction has sometimes taken place quite unexpectedly and in the presence of very few spectators.

Probably the most serious difficulty against the miraculous character of the phenomenon is derived from the circumstance that the same liquefaction takes place in the case of other relics, nearly all preserved in the neighbourhood of Naples, or of Neapolitan origin. These include relics which are affirmed to be the blood of St. John the Baptist, of St. Stephen the first martyr, of St. Pantaleone, of St. Patricia, of St. Nicholas of Tolentino, of St. Aloysius Gonzaga, and others. In the case of the alleged liquefaction of the so-called "Milk of Our Lady" (see Putignani, S.J., "De Redivivi Sanguine S. Januarii", Naples, 1723, I, 90) or of the fat of St. Thomas Aquinas (see Magnoni Valenti, "Discorso istorico" 1772, 47) we have probably a pure fiction, but the phials traditionally associated with the names of St. John the Baptist, St. Stephen, and St. Pantaleone undoubtedly still exhibit on the respective feast days of these saints phenomena exactly analogous to those shown in the case of the more famous relic of St.

Januarius. Further, it is asserted by eyewitnesses of scientific credit and high respectability that a block of basalt at Pozzuoli, reputed to bear traces of the blood of St. Januarius, grows vividly red for a short time in May and September at the hour when the miracle of the liquefaction takes place in Naples (see Cavène, "Célèbre Miracle de S. Janvier", 1909, 277-300).

Three other points attested by recent investigators seem worthy of special note.

- It now appears that the first certain record of the liquefaction of the blood of St. Januarius dates from 1389 (see de Blasiis, "Chronicon Siculum incerti auctoris", Naples, 1887, 85), and not from 1456, as formerly supposed.
- In 1902 Professor Sperindeo was allowed to pass a ray of light through the upper part of the phial during liquefaction and examine this beam spectroscopically. The experiment yielded the distinctive lines of the spectrum of blood. This, however, only proves that there are at any rate traces of blood in the contents of the phial (see Cavène, "Le Célèbre Miracle", 262-275).
- Most remarkable of all, the apparent variation in the volume of the relic led in 1902 and 1904 to a series of experiments in the course of which the whole reliquary was weighed in a very accurate balance. It was found that the weight was not constant any more than the volume, and that the weight of the reliquary when the blood filled the whole cavity of the phial exceeded, by 26 grammes, the weight when the phial seemed but half full. This very large difference renders it impossible to believe that such a substantial variation in weight can be merely due to an error of observation.

We are forced to accept the fact that, contrary to all known laws, a change goes on in the contents of this hermetically sealed vessel which makes them heavier and lighter in a ratio roughly, but not exactly, proportional to their apparent bulk (Cavène, 333-39). The reality of the miracle of St. Januarius has repeatedly been made the subject of controversy. It has had much to do with many conversions to Catholicism, notably with that of the elder Herder. Unfortunately, however, allegations have often been made as to the favourable verdict expressed by scientific men of note, which are not always verifiable. The supposed testimony of the great chemist, Sir Humphry Davy, who is declared to have expressed his belief in the genuineness of the miracle, seems to be a case in point.

Though in many respects uncritical, the best account of the miracle of St. Januarius is that given by CAVENE, *Le Célèbre Miracle de S. Janvier* (Paris, 1909). From the historical side fuller details may be found in TAGLIALATELA, *Memorie Storicocritiche del Culto e del Sangue di S. Gennaro* (Naples, 1896). Among recent works may be

mentioned: JANUARIO, *Il Sangue di S. Gennaro* (Naples, 1902); two articles by SILVA and SPERINDEO in the *Ommagio della Rivista di Scienze e Lettere*, published for the centenary of 1905; also SPERINDEO, *Il Miracolo di S. Gennaro* (3rd ed., Naples, 1908); THURSTON in the *Tablet*, 22 and 29 May, 1909, followed by a correspondence in the same journal.

Of earlier date are PUNZO, *La Teca di S. Gennaro* (Naples, 1880); IDEM, *Indagini ed osservazioni sulla Teca* (Naples, 1890); ALBINI in *Rendiconti dell' Accademia delle Scienze fisiche e matematiche* (Società Reale di Napoli), series II, vol. IV (1890), 24-27; *Acta SS.*, 19 Sept. There is also an excellent article by LECANU in *MIGNE, Dictionnaire des Prophéties et des Miracles* (1852), 1010-1016. The older books, such as those of PUTIGNANI, TUTINI, FALCONE, etc., are too numerous to mention, and they are for the most part very uncritical. The various "Acts" of St. Januarius have been edited by SCHERILLO in *Atti Accad. Archeol. Napoli*, VIII (1876), pt. I, 147-330. For further bibliography, see CHEVALIER, *Bio-Bibl.*

HERBERT THURSTON

Japan

Japan

AREA AND POPULATION

Japan, called in the language of the country *Nihon* or *Nippon* (Land of the Rising Sun), and *Dai Nihon* or *Dai Nippon* (Great Japan), is situated north-west of the Pacific Ocean and east of the Asiatic Continent. It lies between 199°20' and 156°32' E. long. (meridian of Greenwich) and between 21°62' and 50°56' N. lat. It consists of six large islands, Honshiu or Hondo, Kinsui, Shikoku, Hokkaido (Yezo), Taiwan or Formosa, and the southern part of Karafu (Sakhalin). There are besides about six hundred small islands, among which Sado, Oki, Tsushima, Iki, Awaji, and the four archipelagos of the Pescadores, Chishima (Kuriles), Ogasawara, Shima (Bonin), and Okinawa (Riukin) deserve mention. The word *Japan* is the collective name of the whole territory, exclusive of Formosa and Karafuto. The total area amounts to 162,655 sq. miles.

On 31 March, 1908, the total population of Japan was 49,092,000 inhabitants; that of Formosa 3,155,005; and that of the Ainus (aborigines) 17,632. The population is divided according to castes into the *Kwazoku* (nobles), heads of families, 902; members of families, about 4600; *Shizoku* (former knights or Samurai), heads of families 439,194; members of families 1,728,650; *Heimin* (private citizens), heads of families, 8,285,448; members of families 47,358,760. The number of the population increases rapidly. In 1876 it was 34,338,000; in 1886, 38,507,000; in 1896, 42,708,000; in 1907, 49,092,000, of which 24,839,000 were men, and 24,252,000 were women. The density is 415 to the

sq. mile, exclusive of Hokkaido, where it is twenty-three to the square mile. Number of married persons, 16,458,308; births in the year 1907, 1,599,231; children born living, 1,457,039; children born dead, 142,092; illegitimate births: boys, 60,445, girls, 60,702. Number of marriages, 361,260; divorces, 60,179; deaths, 1,012,855. Recipients of passports to foreign countries, 43,627; Japanese resident abroad, the civil condition of whom is registered at the consulate, 234,134; in China, 34,006; in Corea, 81,754; in the United States, 20,080; in Hawaii and the Philippines, 73,974; in Europe, 694; the remainder in various countries. Number of foreigners resident in Japan, 18,908; Chinese, 12,273; Coreans, 459; Englishmen, 2293; Americans from the United States, 1624; Germans 664; French, 498; Russians, 194; Portuguese, 197; the remainder belong to various nationalities.

PHYSICAL GEOGRAPHY

Seas and Straits

The seas which surround Japan are the Pacific Ocean on the east, the Sea of Okhotsk on the North, the Sea of Japan on the west, and the China Sea on the south. The straits separating the principal islands are the Strait of Soya, or La Pérouse between Hokkaido and the Sakhalin, the strait of Tsugaru between the Great Island Honshiu and Hokkaido, and the Strait of Shimonoseki between Honshiu and Kiusiu.

Coasts, Gulfs, and Bays

The coasts are very irregular, the gulfs and bays are very numerous. On the Pacific Ocean are the gulfs of Sagami and Tosa, the bays of Tokio, Suruga, Ise, Omi, Tsuchiura, Seto, etc; on the Sea of Japan, the Bay of Fukuoaka, Wakasa, Kagoshima. Yatsushiro, Amagusa, Shimabara, etc.

Lakes

The largest lake is Biwa, which is about 180 miles in circumference, 36 1/2 miles long, and 12 1/2 miles wide. According to tradition Lake Biwa was formed by an earthquake in 286 B.C. Renowned for the beauty of its scenery, its praises have often been sung by poets. After Lake Biwa, the best known are Lake Suwa in Shinano, Lake Hakone, on the summit of the mountain of the same name, Lake Chiusenji in Shimotsuke, west of Nikko, 15 1/2 miles in circumference, 4375 feet above sea-level. The cascade of Kegon, one of the most beautiful and renowned of Japan, is on this lake.

Rivers

The slopes of the mountains being so close to the sea, the watercourse are not very long. They are for the most part only torrents, few of them capable of carrying boats, but they are utilized for rafting and thus supplement the roads. Only 15 are 40 ri or more long, the longest being 110 ri in length. (The ri is almost equal to 2 1/2 miles).

Mountains

In Japan the mountains cover two-thirds of the surface of the soil. The country is traversed by two chains of mountains, one a part of Sakhalin Island, the other south-east of China crossing Formosa. These two chains meet in the middle of the Great Island (Honshiu), dividing it into two parts which present striking contrasts as much from the political as from the geographical point of view. The highest peaks are situated at the intersection of these two chains, about the thirty-fifth parallel, which has caused tourists to give them the name of the Japanese Alps. The highest are Niitake in Formosa (12,850 feet), and Fuji (12,395 feet) in Honshiu. This last mountain must have been formed by the same earthquake which hollowed out Lake Biwa (286 B.C.). It is a volcano subject at times to terrible eruptions. On account of its regular outline and its majestic beauty it has furnished an inexhaustible source of inspiration to Japanese artists, poets, painters, etc.

Valleys

Although very mountainous the country is not devoid of valleys, the principal ones being those of Etchigo, Sendai, and Quanto, with Tokio and Yokohama, and a population of 6,000,000 souls, of Mino and Awari (1,150,000 souls), of Kinai, with Kyoto, Osaka, and Kobe (2,600,000 souls), of Tsukusi in Kiusiu. The oil mines of this valley furnish 67% of the total production of the mines of Japan.

Volcanoes

Three chains of volcanoes exist in Japan. The Kuriles, Fuji, and Kirishima contain 200 volcanoes, of which 100 are still active. The principal ones are Tarumi, Noboribetsu, Komagatake, Agatsuma, Bandai, Kausatsu, Kaimon, Sakaurajima, Fuji, Kirishima, Asama, and Aso. This last, situated north-east of Higo, numbers five peaks, the highest of which reaches an altitude of nearly one mile. It is perhaps the largest volcano in the world, its craters having an extent of 15 miles from north to south, 10 miles from east to west. It was in eruption in 1884, 1889, and 1896.

Earthquakes

Their number is proportionate to that of volcanoes. From 1883 to 1897 there were 17,750, that is 1365 per year, nearly 3 1/2 per day. From 1596 to 1877 Japan was visited by 100 more or less disastrous earthquakes. According to minute researchers made by a commission of scholars, the number of earthquakes and volcanic eruptions which have caused more or less damage from the beginning of historic times to the present day must equal 2006. One of the most terrible was that of 1855 at Tokio, in which more than 100,000 persons perished and the greater part of the city was destroyed.

Mineral Springs

As compensation for the damage caused by the volcanoes Japan has a large number of mineral springs. There are at least 100 which, because of ease of access and their medicinal qualities, are much frequented.

Climate, Typhoons

During the cold season, which begins in October and ends in April, Japan is visited by the north and the west wind, the atmospheric pressure being lower on the Pacific Ocean than on the continent. The contrary is true from May to October, because the wind then comes from the south and east. This difference in atmospheric pressure gives rise to numerous typhoons, which often cause great disasters. To mention only that of 1902, the number of persons killed equalled 3639, vessels lost 3244, houses destroyed or damaged, 695,062. Total loss, 29,742,081 yen.

Rain, Snow

Japan is one of the most rainy countries in the world. The average yearly rainfall is about 61 inches. The average number of rainy or snowy days per year is 150. There are 89 meteorological stations, where six observations are made daily, at two, six, and ten o'clock, morning and evening (135° E. of Greenwich time).

IMPERIAL HOUSE

Dynasty (Teishitshu)

The form of the Japanese Government is an hereditary and constitutional monarchy. A single dynasty has reigned in Japan since the foundation of the empire. The present emperor is the one hundred and twenty-second descendant of Jimmu Tenno, first emperor of Japan. His own name is Mitsuhiro; he has no family name since he is supposed to be descended directly from the race of gods. Born 3 November, 1852, he succeeded his father, Komei Tenno, 13 Feb., 1867, and was crowned 12 Oct., 1868. On 28 December the same year he married the Princess Haruko, third daughter of Kuge Ichijo Tadaka, a noble of the first rank, b. 28 May, 1850. Yoshihito Hiyo no miya, son of the emperor, b. 31 August, 1879, was proclaimed heir apparent on 31 August, 1887. On 10 May, 1900, he married Sadako, fourth daughter of Duke Kujo, by whom he has three sons.

Branches of the Imperial Family (Kozuko)

There are fourteen branches of the imperial family: Fushimi, Arisugawa, Jan-in, Higashi-Fushimi, Kwacho, Yamashina, Kaya, Kuni, Nashimoto, Kita-Shirakawa, Komatsu, Takeda, Asaka, Higashi-Kuni. The first four families have the title of *Shinno* (princes of the blood), and constitute the four branches from whom must be chosen the heir to the throne, if the emperor die without issue. The others have the title *O* (princes). The first, when they are of age, have by right a seat in the house of Peers. The others may only sit there by order of the emperor. These last may also succeed a nobleman or be adopted by him. All are by right a portion of the imperial household. They may be neither arrested nor summoned before a court without the command of the emperor, nor marry without his permission, nor ally themselves with any save the family designated by him. If they commit an act unworthy of their rank the emperor

has the right to punish them, and even deprive them of their title of prince. If they are wasteful of their property, they may be interdicted and forced to submit to the appointment of an administrator of their property.

Estates of the Crown

According to the present data the crown possesses 12,135 acres of built land, representing a value of 62,090,830 yen; 5, 272,745 acres of forest valued at 123,809,642 yen; 300,770 acres of diverse territory estimated at 2,319,808 yen. Its bonds and stocks represent a gross sum of 30,000,000 yen, while the amount of its treasure is unknown.

Crown Laws

In the Constitution is inserted a collection of laws known as the Code of the Imperial House (*Koshitsu Tempan*), in twelve chapters, which govern the Crown. This code regulates the succession to the throne, and the coronation ceremonies, fixes the majority of the emperor, the prince imperial, and the various members of the imperial family. It contains laws concerning the regency, the family council, the governor to be assigned to an emperor in his minority, the expenses of the court, possible disputes between members of the emperor's family, the disciplinary measures to be taken against delinquents.

Ministry of the Imperial Household

The reform of Kaikwa has created a *Kunaikwan* (government of the palace), which in 1702 was changed into the *Kunaisho* (ministry of the palace). The minister had the title of *Kunaikyo* and was charged with the collection of imposts (in the provinces), with the possession of the Crown, etc. He had eight ministers under his jurisdiction. After the Restoration, the *Kunaisho* was retained, but underwent two modifications, one in 1870, the other in 1889. To-day the *Kunaisho* is charged with the affairs of the emperor's household. A minister is at the head charged with the general administration and all the employés of the ministry are under his immediate jurisdiction. He has control of the nobility, regulates the civil and religious ceremonies, distributes the favours, presents, or rewards of the emperor, notifies those interested of the decrees raising them to a dignity or an office, and is the executor of all the regulations of the imperial household. He is assisted by a vice-minister and fifteen councillors, all chosen by the emperor. The chief of these are the chamberlain, the keeper of the seal, the empress's steward, the master of ceremonies, the director of the bureau of domains, and the director of the bureau of nobility. The number of employés of the imperial household is 2534; salaries, 1,003,805 yen.

Decorations

In Japan there are six orders of decoration conferred as award of merit: (1) Order of the Chrysanthemum (*Kikuwasho*), created in 1876, reserved to sovereigns and members of princely families; (2) Order of Paulownia (*Tokwasho*), created in 1876,

granted to princes and very exalted personages; (3) Order of the Rising Sun (*Kyokujitsusho*), created in 1875, created for civil and military services; (4) Order of the Sacred Treasure (*Zuihosho*), created in 1888 to reward civil and military services; 8 classes; (5) Order of the Crown (*Hokwonsho*), created in 1888, reserved to women; 8 classes; (6) Order of the Golden Kite (*Kinshisho*), created in 1890, rewards extraordinary military feats, and entitles to a pension. In recognition of meritorious deeds which, however, do not deserve a decoration, the Government awards certificates, medals, and cups of gold, silver, or wood. The number of Japanese thus decorated or rewarded reaches into the millions. On 31 March, 1908, the number of persons decorated and entitled to a pension was 70,822. Pensions furnished by the government, 9,0630,000 yen. Number of decorations distributed in 1903, 3914; in 1905, 36,357; in 1907, 37,602, not counting the decoration of the Golden Kite. Decorations of the Golden Kite in 1904, 2316; in 1905, 27,649; in 1906, 73,810; in 1907, 1,305,018. This shower of decorations was caused by the war with Russia. The number of foreigners decorated by the Japanese was, on 31 March, 1907, 417, and that of Japanese decorated by foreign governments, 542.

Titles of Nobility

The class of nobles (*Kwasoku*) comprises the ancient nobles of the court (*Kuge*), the ancient lords of the provinces (*Daimio*), and those who have been ennobled since the Restoration, or the new nobility (*Shin-Kwasoku*). Graduated titles were created in 1884 for these nobles of various degrees, in Japanese, *Ko*, *Ko*, *Haku*, *Shi*, and *Dan*, corresponding to duke, marquess, count, viscount, and baron. Nobility is hereditary, and on 31 March, 1908, this class consisted of 15 dukes (*Ko*), 36 marquesses (*Ko*), 100 counts (*Haku*), 375 viscounts (*Shi*), and 376 barons (*Dan*), that is, 902 families comprising 4600 members, which form the Japanese aristocracy.

Rank at Court

Besides the titles of nobility there are purely honorary dignities, forming a sort of court hierarchy. This hierarchy was established in Japan in the reign of the Empress Suiko (A.D. 603). In 682 the number of degrees was raised to forty-eight; in 702 it was fixed at thirty. At the Restoration this hierarchy was retained but very much simplified. At present there are eight degrees each, except for the first, being divided into two, which gives a total of fifteen. These titles or dignities (*I-Kai* or *Kurai*) are awarded to nobles, to functionaries of high rank, or to citizens who, while not belonging to these classes, have rendered signal service to the nation. These dignities carry with them certain rights, e.g., that of assisting at the emperor's reception on a certain day of the year. They are conferred only on Japanese. The number of persons honoured with these titles was, in 1907, 50,906, among them 113 women.

Grades of Civil Functionaries and Military Officials

The former are called *Bunkwan* and the latter *Bukwan*. Both are divided into four classes, *Shinnin*, *Chokunin*, *Sonin*, and *Hannin*. The Shinnin, who form the highest class, receive their investiture from the hand of the emperor himself. The decree of promotion bears the seal of the empire and is countersigned by the president of the council. The Chokunin are appointed by a decree of the emperor, bearing the seal of the empire. The Sonin are appointed by the cabinet upon presentation by the ministers. The Hannin are appointed by their respective ministers. Civil and military officials of the rank of Shinnin, 46; civil officials of the rank of Chokunin, 307; Sonin, 7015; Hannin, 51,952. Army and navy: all the generals and admirals have the rank of Chokunin, all the other officers have that of Sonin, and all non-commissioned officers that of Hannin. For the number see subtitles *Army*; *Navy*. The Shinnin number 46 civil or military officials. The statistics for the Shinnin make no distinction between civil and military officials for this exalted degree only.

CONSTITUTION OF THE EMPIRE

On his succession to the throne the emperor promised to establish a national Assembly for the purpose of discussing the affairs of the country. Although proceeding from the free will of the sovereign, the project of a Constitution, before being put into execution, encountered many obstacles and provoked violent conflicts between the Government and the democratic party. The various phases of these conflicts may be summarized as follows: In 1873 Itagaki and his followers addressed a petition to the Government in which they called upon it to carry out the sovereign's wishes, and in 1880 a campaign was organized throughout the country for the promotion of the rights of the people. In 1881 Itagaki and his followers organized the Liberal Party and vigorously urged forward the movement in favour of the establishment of a parliament. In the same year the emperor promised to promulgate the Constitution within ten years. Finally on 11 February, 1889, the constitution was promulgated and the Diet was convoked in November of the next year.

Prerogatives of the Emperor

The chief rights accorded to the emperor in the Constitution are: to convoke, open, close, and suspend the Parliament; to dissolve the Chamber of Deputies; to issue ordinances which have the force of law, in urgent circumstances when the diet is not sitting and on condition that they be submitted to it in the next session, to give orders for the execution of the laws, to maintain peace and promote the welfare of the people, to assume command of the forces of sea and land and to regulate the organization of both these services, to declare war, make peace, conclude treaties, proclaim a state of siege, to grant titles of nobility, rank at court, decorations, and other honorary titles, to declare amnesty, to commute penalties, and to rehabilitate.

Rights of the People

The rights granted to the people are as follows: Every Japanese subject without distinction of class may be promoted to any civil or military rank or public office. No Japanese subject may be arrested, held, or punished except according to law. Except in cases provided for by law, every Japanese dwelling is inviolable and is not subject to any domiciliary visit. Secrecy of mailed letters and rights of property are inviolable. The Constitution further grants liberty of religious belief in all that is not prejudicial to peace and order and the duties of a subject, freedom of speech, of the press, of public assembly, of association, and the right to present petitions in a respectful manner.

Government

For the management of state affairs the emperor employs several ministers, at the present time nine in number, viz., ministers of foreign affairs, of the interior, of justice, of finance, of war, of the navy, of public instruction, of agriculture and commerce, and of communications.

Privy Council (Sumitsu-in)

The emperor is also assisted by a privy council created in 1888 and composed of a president, vice-president, and fifteen members chosen from among the highest functionaries of at least forty years of age. The president of the cabinet and all the members are councillors *ex officio*. The privy council gives its opinions concerning questions submitted by the emperor, but is not entitled to make proposals, to decide as last resort, nor to exercise executive power. It gives advice with regard to treaties to be concluded with other powers, in urgent cases, in quarrels which may arise between the Government and the Chambers, in fine in all circumstances in which the supreme power is expected to intervene.

Parliament

The emperor shares legislative power with two large political bodies, the Chamber of Peers and the Chamber of Deputies. The chamber of Peers enjoys certain privileges. The emperor may suspend but not dissolve it. The duration of the commission of peers is seven years, that of deputies four years. The peers, being appointed by the emperor or by right of birth, are such for life. All the deputies must be re-elected every four years. The chambers discuss and vote on selected laws, the budget, taxes, etc., but their decisions do not go into effect until they have received the sanction of the emperor.

The Chamber of Peers is composed of the members of the imperial family, of all dukes and marquesses over twenty-five, of a certain number of counts, viscounts, and barons who have attained their twenty-fifth year and who are elected by their peers, of members aged at least thirty appointed for life by the emperor because of their services or learning, and lastly of forty-five members aged at least thirty, elected from among the fifteen most influential citizens of each district which returns them. Their election must be confirmed by the emperor. The number of these two categories must

not exceed that of the members of the nobility. In 1908 the Chamber of Peers was composed as follows: members of the imperial family, 13; dukes, 10; marquesses 28; counts 17; viscounts, 69; barons, 55; appointed for life by the emperor, 124; chosen from amongst the citizens paying the largest taxes, 45. Total, 361. In the upper chamber there is no political party properly so called; the peers are merely divided into groups, generally composed of members of the same class.

The Chamber of Deputies is composed of two kinds of members, the first returned by the cities having at least 30,000 inhabitants, the others by the districts. Each city and department forms an independent district. To be an elector it is necessary to have attained the age of twenty-five and to pay a minimum of ten yen in direct contribution. One may be a deputy without paying the contribution but it is necessary to have attained at least thirty. Those who are neither eligible or electors are outlaws, bankrupts, those whose property has been confiscated, those who have lost civil rights or who have been sentenced to prison, soldiers in active service, pupils in the public or private schools, professors in the primary schools, ministers of any religion whatever, contractors of government work, officials charged with intervening in the elections, the employés of the ministry of the imperial household, judges, attorneys, collectors, police employés, and general councillors. At present the deputies are divided into four parties: (1) the Government Party (*Seiyukwai*), which in 1900 replaced the old Liberal Party of Itagaki (1881); (2) the Progressive Party (*Shimpoto*), or opposition (1882), more or less divided in sentiment; (3), the United Party, formed of old imperialists, opportunists, and deserters from the Progressive Party; (4) the New Association (*Yushinkwai*) or Advanced Party, among whom there are a number of Socialists. The number of deputies (end of March, 1908), 379; number of electors, 1,583,676; number who cast their votes, 1,353,301; unable to write the candidate's name 3338. Number of deputies in Governmental Party, 167; Progressives, 94; United Party, 68; New Association, 36; nobles (former Samurai), commoners, 273.

Diplomatic Corps in Foreign Lands

Embassies, 7, viz. to England, the United States, France, Germany, Italy, Austria, and Russia. Legations, 8; to Spain, Belgium, Holland, Sweden, China, Siam, Mexico, Brazil. Staff, 90.

Consulates

Consuls general, 11; consuls and vice-consuls, 31; staff, 365. Civil officials and employees of the Government, 152,159; annual salaries, 44,787,112 yen; government engineers, 9492; employés under their supervision, 17,941, total 27,458; salaries, 9,638,546 yen. Tax bureaus, 18; staff, 8443; annual salaries 2,122,561 yen.

Pensions and Grants

Pensions and grants to retired officials, widows, or orphans; persons assisted or pensioned, 206,860. Total amount: 15,847,280 yen.

POLITICAL GEOGRAPHY AND LOCAL ADMINISTRATION

Japan is divided into ten large regions comprising eighty-eight provinces. There are: (1) Kinai (or Go Kinai) 5 provinces; (2) Tokaido, 15 provinces; (3) Tosando, 13 provinces; (4) San-indo, 8 provinces; (5) Hokurokudo, 7 provinces; (6) Sanyodo, 8 provinces; (7) Nankaido, 6 provinces; (8) Saikaido, 8 provinces; (9) Hokkaido, 10 provinces; (10) Taiwan, 3 provinces.

Before the Restoration Japan was divided into fiefs (*han*) administered by daimios. The *han* established by degrees in the course of the twelfth century were regularly organized by Yoritomo (1192-99). Under the Ashikaga it was no longer the will of the emperor or the shogun but the force of arms which designated the rulers. Tokugawa Ieyasu estimated the number of *han* at more than 300. They were divided into three classes, according to the importance of their revenues, the *Dai-han* (large fiefs) being worth upwards of 400,000 koku of rice, the *Chu-han* (medium fiefs), from 100,000 to 400,000 koku, and the *Sho-han* (small fiefs), upwards of 100,000 koku.

After the Restoration Japan was divided into departments (*ken*) and prefectures (*fu*). The number of these varied several times. To-day for the convenience of the administration the country is divided into three *fu*, 43 *ken*, and two special governments (*cho*), those of Hokkaido and Formosa, comprising altogether 660 districts (*gun* or *kori*), 63 municipalities (*shi*), 1138 towns (*cho* or *machi*), and 11,801 villages (*son* or *mura*). The three *fu* (prefectures) are Tokio, Osaka, and Kyoto. Among the municipalities sixteen have more than 50,000 inhabitants and less than 100,000, three more than 100,000 and less than 200,000, and six a population exceeding 200,000. These six cities are Tokio, 1,811,655 inhabitants, Osaka, 995,945, Kyoto, 380,568, Yokohama, 326,065, Nagoya, 288,369, and Kobe, 285,002.

At the head of each department is a prefect assisted by a council of prefecture, which represents the central government, while the general council represents the rights and interests of the people. The general council exercises over the finances of the department a control similar to that which the parliament exercises over the finances of the State. They regulate the distribution of taxes and vote on the needs of the departments. All the citizens residing in a department and who pay a direct yearly tax of three yen have the right to vote for the election of councillors. Payment of a tax of ten yen is necessary for eligibility. The term of office is four years. At the head of each district is a sub-prefect, at the head of each village or town is a mayor assisted by a council. The departments, districts, towns, and villages have a special budget administered by the general council, the district council, the municipal council, and increased by local revenues independent of the taxes raised by the Government. These depart-

ments, districts, towns, villages may contract loans with the authorization of the minister of finance. For loans payable in less than three years they are not obliged to secure this authorization. For the financial year 1907-08 the total of the budgets for the department and municipalities were as follows: receipts, 173,004,523 yen; expenditures, 166,614,817 yen; fund for public relief, 34,884,370; total amount of debt, 89,266, 115 yen. Ten years earlier (1897) the receipts amounted to 100,588,000 yen; expenses, 88,817,000 yen; debt, 16,350,000 yen.

LEGISLATION

For many years Japan had no legal code, the moral law and local custom taking its place. In 604, in the reign of the Empress Suiko, Shotoku Taishi promulgated a code of law in seventeen chapters borrowed from China. This is the earliest code of which mention is made in history. Later the Emperor Mamu (696-707) appointed a commission of scholars to draw up a new code, and the work was completed and promulgated in 701. It is called the code of the era of Taiho (Taiho-ryo), and save for some modifications was in force until the Restoration. At this time intercourse with foreigners and the study of laws used in European countries brought home to the Japanese the necessity of a new code, more in harmony with their new situation. With the aid of foreign legists, they undertook this work of codification, which they brought to a successful issue at the end of twenty years. The collection of laws thus drawn up form six codes: the Constitution, the civil code, the criminal code, the commercial code, and the codes of civil and criminal procedure.

For the application of this new legislation a judiciary organization was created very similar to that which exists in France. It comprises tribunals of justices of the peace (*Ku-Saibasho*), lower courts (*Chiho-Saibasho*), courts of appeals (*Koso-in*), and a court of cassation (*Taishin-in*). The Constitution published February, 1889, established the irremovability of the magistrates, who can only be suspended by special law. The tribunals number 358; courts of cassation, 1; courts of appeal, 7 (Tokio, Osaka, Nagoya, Hiroshima, Nagasaki, Miyaga, and Hakodate); lower courts (district courts), 49 (at least one to a department); courts of justices of the peace (sub-district courts), 301. Staff of the tribunals, 11,826; judges, 1278; attorneys, 426; registrars, 4140; wardens, 1727; lower employés and agents, 4257; bailiffs, 520; barristers, 2037. The courts of justices of the peace alone have had to judge 133,186 cases; the lower courts, 24,465; the courts of appeal, 3684; and the supreme court, 659.

Marriage

The law exacts the completion of seventeen years for a man and fifteen for a woman. The consent of the parents is required for males under thirty, and for females under twenty-five. Minors must secure the consent of a guardian and of a family. No person who already had a spouse may remarry, and the penalty for so doing is two years in

prison. An adulterer is forbidden to marry the partner in the sin. Marriage between blood relations is forbidden within all degrees of the direct line, and in the collateral line within the third degree inclusive. Marriage between relations (affinities) is forbidden, within all degrees in the direct line, even after divorce, but in collateral line there is no impediment. All marriages contracted through mistaken identity, fraud, or violence can be annulled with three months following their celebration. The woman may not marry till six months after the dissolution or annulment of the first marriage. Husband and wife must live together, the law not admitting separation of body. The fact of the marriage should be inscribed on the register of the civil Government, and in default of this formality the marriage does not exist before the law, and is without effect. Formerly women could not possess property but now they are accorded this right. The law regulates the conjugal partnership of goods, but husband and wife are at liberty to make a contract. The husband is obliged to provide for the support of the family and to defray the expenses of the children's education. He has the right to administer the property of his wife and to collect the profits, but he is not entitled either to sell it or to give it as security, or to lend it without consent. In Japan, marriage is always arranged by an intermediary. The law stipulates nothing with regard to the ceremony, which is left to the choice of those concerned. The peasants follow the customs of the country, the chief of which involves the exchange of cups of wine by the betrothed pair. The Buddhist or Shintoist priests (*bonzes* or *Kamushi*) have no share in the celebration of marriage. The Christians marry according to the rites of their religion. Politeness demands that the newly wedded pair pay a visit in the course of a month to all who assisted at the ceremony.

Divorce

The Japanese law allows divorce, and this divorce annuls all the effects of marriage except the impediment of affinity. Divorce may be granted in two ways, privately, or by court sentence. The chief causes for divorce are: (1) bigamy; (2) adultery (for a woman); (3) notorious adultery for a man; (4) crimes of forgery, petty larceny, robbery with violence, fraudulent possession, receiving a bribe, obscene acts, and all crimes involving a prison sentence of three years; (5) ill-treatment or grievous injury of the other party or of his father or mother; (6) ill-treatment or grievous injury received from the relations of the other party; (7) abandonment of one of the parties by the other with evil intent; (8) ignorance for three years of whether the other party is living or dead.

Wills

Every one may dispose of his possessions by will, provide the will is submitted to certain conditions. Those only are incapacitated of making a will who are of unsound mind or who have not attained the age of fifteen. Japanese law recognizes natural heirs and every clause injurious to their rights is null. As to form, Japanese law recognizes

three kinds of wills, olographic, authentic, and secret. An olographic will (*Jihitsu-shosho*) is one which the testator writes, dates, and signs with his own hand, and to which he affixes his seal. An authentic will (*Kosei-shosho*) is dictated by the testator with formalities prescribed by law in the presence of at least two witnesses, written by a notary (*Kosho-nin*), who reads the will to the testator and the witnesses. If it is approved the testator and the witnesses should then sign it and affix their seal. The secret will (*Himitsu-shosho*) is signed and sealed by a testator and presented by him to a notary in the presence of at least two witnesses. The testator declares that it is his will and gives the name and address of him who drew it up. The notary records on the envelope the report of this presentation, whereupon the testator, the witnesses, and the notary sign and affix their seals. Besides these wills Japanese law recognizes other which have only a temporary existence and cease with the circumstances that gave rise to them, e.g., military wills, naval wills, wills made in a time of contagious disease or at the point of death, if the sick person recovers. To make an act legal every Japanese must affix his seal (*jitsun-in*) to that act. A copy (*in-kan*) should be deposited at the surrogate's office. For foreigners the signature is sufficient. The will goes into effect immediately on the death of the testator; if it is conditional, as soon as the conditions are realized. But to put it into execution, the executor must have it signed by the court. The testator may always revoke his will in whole or in part. When the same person has made two wills the second prevails. Anyone is free to reject a will made in his favour. The share reserved to the natural heirs in the direct line is one-half of the property, that of the other heirs, one-third.

Prisons (Kangoku)

In the present penal system, prisons are divided into two chief classes, civil and military. Civil prisons comprise six categories: (1) criminal or convict prisons for those sentenced to deportation or banishment (three); (2) temporary prisons in which are confined those sentenced to deportation or banishment until such a time as they shall be transferred to their final destination (three); (3) departmental prisons for those sentenced to simple detention and compulsory labour (at least one for each department); (4) detentive prisons, destined to receive prisoners who have been indicted and accused persons until the law has decided their case; (5) houses of correction reserved for minors under twenty and for deaf-mutes; (6) jails, for those sentenced to thirty days' imprisonment by police magistrates. These jails are annexed to the police station. The prisons are under the jurisdiction of the minister of justice, who appoints the general inspectors and all the employés. Number of civil prisons in the year 1908, 56; bridewells, 92; general inspectors, 56; wardens, 620; engineers and interpreters, 29; physicians, 198; chaplains and instructors, 232; pharmacists, 42; keepers of the first class 7907; of the second class, 300; women servants, 383; employés of various kinds,

230. Total, 9997. Inmates of the penitentiary establishments at the end of 1907: detentive prisons, men, 4008; women, 203; houses of detention, men, 46,175; women, 2550; houses of correction, men, 738. women, 69. Total, 53,743. the total number of persons sentenced in 1907, men, 114,236; women, 16,748.

Police (Kaisatsu)

The police service as it exists to-day was organized at the beginning of the present reign according to the English system. It is divided into two main sections, the administrative police (*Gyosie Kaisatsu*), and the judiciary police (*Shiho Kaisatsu*). In the department it is subject to the prefect, at Tokio to the prefecture of police (*Keishicho*). It has its courts, which have the power to judge offenses for which the penalty does not exceed thirty days' imprisonment. On 31 March, 1908, the police department numbered: chief police stations or bureaus, 713; branch stations, 618; city station houses, 1841; rural station houses, 12,648; inspectors or superintendents (*Keibu*), 1861; police agents (*Junsa*) 33,885. Crimes, offenses, and cases in which the police have had to intervene in 1907: robberies accompanied by violence, 1239; without violence 267,030; swindlings, 28,876; total number of robberies, 297, 145. Violent deaths: suicides, 8906; murders, 1236; sudden deaths, 1387; victims of accidents and others, 14,015. Total, 25,544. Fires, involuntary, 12,462; incendiary, 858; caused by lightning or by unknown causes, 2174. Total, 15,494. Number of houses burned, 36,669. Public reunions, indoors, 587; numbers of orators, 1863; in the open air, 87; orators, 55. Total numbers of arrests made by police for crimes, offenses, or infractions of the law, 707,261.

Hygiene

The organization of the hygienic service dates from 1872. It began with the organization of a medical bureau, which was suspended in 1875 and replaced by a bureau of health. In 1879 a central board and local boards of public health were established and the service was extended to all the departments. In 1899 it was extended to all towns and villages and private committees were formed. The chief regulations relative to hygiene are: the cleaning of houses and drains, which should be done twice yearly under police supervision; the building and improvement of hospitals, prisons, schools, and all public institutions; the locations of cemeteries; burial; vaccination, etc. The hygiene service is within the jurisdiction of the police who are charged with enforcing its regulations.

Hospitals and Medical Bodies

Before the Restoration Japan had five hospitals located at Nagasaki, Saga, Fukui, Kanazawa, and Osaka. The first in point of time was Nagasaki, founded in 1861. On 31 March, 1908, the number of hospitals was 870, 5 founded by the government, 205 by the departments, and 660 by private citizens. To all these hospitals, private as well

as public, is attached a force of women-nurses, who must be at least eighteen years of age and provided with a diploma. Throughout the empire there are: doctors, 38,776; midwives, 26,387; druggists, 29,318; chemists, 2370. In 1907 the number of persons inflicted with contagious disease was 71,532; typhus, 27,988; dysentery, 24,942; deaths from contagious diseases, 19,536.

PUBLIC INSTRUCTION

Until the Shogunate of the Tokugawa education was left entirely to the Buddhist priests. Under the Tokugawa (1603-1868) it was confided to lay teachers and during this period of 265 years the Chinese classics were the basis of instruction. But in this aristocratic country knowledge was a privilege together with nobility, and there were no public schools save for the sons of the Samurai. However, the lower classes were no wholly abandoned to ignorance. Farmers, mechanics, and merchants received an education befitting their condition in the schools connected with the temples, known as *Teragoya*, and in private schools. To-day freedom to learn is granted in Japan to all degrees of the social scale. Instruction is compulsory for six to twelve years, and non-religious. At the head of public instruction is a minister assisted by a board and corps of inspectors. Schools are divided into primary schools in which classes are included the infant schools and the schools for deaf-mutes and the blind, secondary schools, high schools, universities, ordinary normal schools, higher normal schools, special schools, technical schools, and various.

Primary Schools

Primary schools are divided into two classes, common and high schools. The duration of the first is six years, and as the instruction is compulsory, attendance at this school is required from six to twelve years. The certificate of completion of this term secures admittance into the secondary schools. The higher course lasts two years and is optional. Number of primary schools, 27,269; teachers, 116,070; pupils, 6,601,620; average number of children receiving instruction, 96.5%. Private schools, only 249. Infant schools, 361. Women attendants, 984; children, 32,885. Deaf-mute and blind institutions, 31; teachers, 168; pupils, 1532. The secondary schools for boys were founded as a preparation for the high schools. Graduates of these schools are qualified to obtain position under the Government, according to their abilities, without passing a preliminary examination. The duration of the course is six years. Number of schools, 281; founded by the Government and the municipalities, 228; private, 58; teachers 5336; pupils, 108,531.

Secondary Schools for Girls

The duration of the course is from four to five years at choice. To the regular courses may be added special courses for the study of foreign languages or some womanly art, and supplementary courses for pupils desiring to perfect themselves in a

particular branch. These courses should not exceed two or three years. Number of schools, 114; public, 98; private, 16; teachers, 1770; pupils, 35,876.

The higher schools are a preparation for the university. The course lasts three years and is divided into three classes which differ among themselves. the instruction in each class corresponds to the career to which the pupil is destined. Number of schools, 7, all founded by the government and under its supervision. They are located at Tokio, Sendai, Kyoto, Kanazawa, Okayama, Kumamoto, and Kagoshima; teachers, 272; pupils 4888.

Imperial Universities

There are two of these, one at Tokio, and one at Kyoto. The University of Tokio comprises besides the University Hall the faculties of law, medicine, literature, science, agriculture and engineering. Japanese professors, 166; foreigners, 15; Japanese students, 5050; foreigners, 39. The University of Kyoto comprises besides the University Hall, the faculties of law, medicine, literature, science and engineering. Japanese professors, 166; foreign professors, 4; students, 1507. Besides these universities there are about forty public or private schools which assume the name of universities, but for entrance to which it is not necessary to have a diploma from the higher schools. The two most important are the university of Waseda, from 5000 to 6000 students, and that of Keio-gijiku, 1100 students. The former was founded by Okuma in 1882, and the second by Fukuzawa in 1865.

Normal Schools

Each department is obliged to have at least one normal school. The course is four years for boys, and three for girls. Preparatory courses and courses of pedagogy may be added according to circumstances to the regular courses. The expenses of education are defrayed by the departments, but graduates are obliged to teach for eight years. Number of normal schools, 67; teaching staff, 1112 (men, 980, women, 132); students 18,928 (boys, 14,176, girls 4752). higher normal schools: for boys, 2; teachers 212; students 2456; for girls 1; teachers, 95; students, 858.

Special Schools

Medicine and pharmacy, 10; statistics, law, political economy, 12; literature and religion, 26; other schools, 2. Total: schools, 50; professors 1537; students, 27,573.

Technical Schools, and Schools Preparatory thereto

Schools of agriculture, 142; professors, 1151; students, 17,390; preparatory schools, 3785; professors, 1162; students, 149,225. Fishery schools, 11; professors, 64; students, 811; preparatory schools, 103; professors, 48; students, 3344. Schools of arts and crafts, 35; professors 599; students, 6398; supplementary schools, 155; professors, 240; students, 8365. Schools of commerce, 70; professors, 1087; students, 20,685; supplementaries, 167; professors, 225; students, 10,541. Merchant marine, 9; professors, 127; students,

2008; supplementaries, 1; professor, 1; students, 27. Schools of apprenticeship or of foremen, 326; professors, 3402; students, 51,929. Total: schools, 4804; professors, 8106; students 270,723. In 1899 the number of technical schools was 227; professors, 1245; students, 23,095. miscellaneous schools, 2092; professors, 7619; students 142,695.

Establishments Founded and Maintained by the Government

Under the jurisdiction of the minister of public instruction are: the two universities of Tokio and Kyoto, the seven high schools, the two higher normal schools for boys, and that for girls. There are besides one high school of agriculture and aboriculture (professors, 32; students, 244); five high schools of arts and crafts (professors, 139; students, 1502); four high schools of commerce (professors, 109; students, 2477); five high schools of medicine (professors 116, students, 2693); one school of foreign languages in which are taught English, French, German, Russian, Italian, Spanish, Chinese, Korean, Hindustani, Malayan, and Mongolian (Japanese professors, 32; foreign, 12; students, 648); 1 school of fine arts (professors, 52; students 440); 1 school of music (Japanese professors, 49; foreign, 9; pupils, 540); 1 school for deaf mutes and the blind (professors, 20; students, 320); 4 schools of pedagogy (professors, 15; students, 87).

Under the Jurisdiction of the Imperial Household

Schools for the nobility, 1 for boys (professors, 86, students, 531); 1 for girls (professors, 60; students, 618). Dependent on the minister of communications, 1 naval school of commerce (professors, 48; students, 495). Dependent on the ministry of war: 1 high school of war; one school of practical artillery and engineering; one military school; one central military public school at Tokio; five other public schools outside of Tokio; school for scouts; cavalry school; school of sharpshooting; commissariat school; school of military music (professors, 624; students, 4111). Dependent on the ministry of marine: high school of marine; naval school; school of mechanics; medical school; school of accountants; school of naval construction, etc. (professors, 213; students, 902). Total number of professors in schools under Government supervision, 2748; students, 32,879. In 1907 the expenditure for schools under the supervision of the departments and districts reached 44,855,568 yen. The receipts equalled 9,888, 543 yen. Deficit, 35,080,543 yen. The property of the public schools (grounds, buildings, books, instruments, etc) represent a sum of 122,563,491 yen; special funds a sum of 21,516,652 yen. The number of libraries (1907) equalled 127, containing 1,464,717 volumes. Number of visitors, 949,798. Books issued within the year, 28,319; journals and reviews, 1988. An academy (*Gakushi-kwai-in*) was founded at Tokio by imperial decree in 1890. Placed under the jurisdiction of the minister of public instruction, it is composed of forty members, chosen from among the most learned of the country. Fifteen are appointed by the emperor, the remaining twenty-five by the minister at the nomination of the former. They discuss the questions proposed by the minister of

public instruction and give their advice. They meet once a month and treat scientific questions. The hall is open to the public.

ARMY

From the beginning of the feudal system until its abolition (1192-1868), that is, for a period of nearly 700 years, military service was the exclusive privilege of the Samurai. This privilege was abolished after the Restoration. To-day every Japanese without distinction of caste is liable to be called upon to bear arms. Japan has adopted the European system for its armies. Conscription was inaugurated in 1872. The drawing of lots takes place at the age of twenty. The average annual number of recruits is 120,000 men; infantry, 68,000; cavalry 3900; artillery, 7500; siege artillery, 3000; field artillery, 600 (divisions and imperial guard). Sappers and miners, 2600; commissariat, 2000; railroad and telegraph corps, 700; train, 20,000. Adding to this those who are assigned to special services, we reach the figure of 120,000 men.

Exemptions

A son whose father is sixty years of age is exempt from service, if the latter has no means of support. A reprieve is granted to students who have a diploma from the secondary schools and to students who reside in a foreign country (except those who are in the Asiatic countries near Japan). The term of service may be shortened by a year of voluntary service, and for this it is necessary to be provided with a diploma from the secondary schools. After their year of service the volunteers are passed into the reserves with the grade of non-commissioned officer. They are obliged to defray all the expenses of the barracks. Professors in the primary schools are bound only to six month's service, at the expiration of which they are passed into the territorial forces.

Organization

The army is divided into active army, army of reserve, and territorial army. The duration of service in the active army is two years; in the reserve, four and a half years; in the territorial army, ten years. The two years' service, inaugurated in 1908, necessitated a supplementary expenditure of 170,000,000 yen, to be assessed in ten years. The number of divisions during the Russo-Japanese war was raised from twelve to sixteen. At present there are eighteen, not counting the division of the imperial guard. In time of war Japan can put in the field an army of 1,000,000 men. Officers and officials affiliated with the active army: generals, 16; general of divisions, 33; brigadier-generals, 96; colonels, 233; lieutenant-colonels, 353; commandants, 1008; captains, 3426; lieutenants, 3976; sub-lieutenants, 3208; affiliated officers, 1710; total, 14,085; salaries, 9,402,576 yen. Councils of war are established in the army to judge the soldiers. Where a state of siege has been proclaimed their jurisdiction extends to all citizens without exception. There are eighteen of these, one to a division. Cases judged in 1907, 1993. To each division are attached a prison and a hospital. Soldiers committed to prison

(1907), 2311; released, 2269. Sick persons cared for in the hospitals, 78,599; deaths, 357. In 1877 the constabulary (*gendarmarie*) was created according to the French system. It constitutes the police force of the armies of land and sea, and shares the duties of the administrative and judicial police. The constables wear a military uniform and carry a sword and a pistol. The constabulary forms eighteen companies, attached to the eighteen divisions of the army, and commanded by a brigadier-general. It numbers only 2500 men. In 1907 it intervened in 2082 cases, and assisted 66 sick or wounded persons.

NAVY

Under the government of the Tokugawa the lack of stimulation and the complete rupture of relations with the outside world caused the navy to be completely neglected. In 1871 a vessel presented by the King of Holland and some ships purchased abroad by the Government of the shogun and the daimios of Tosa and Satsuma constituted the imperial fleet. Of all the services organized under the present reign none has undergone such rapid development as that of the navy, as is shown by the following table:

- 1871 — 17 ships, 6,000 tons
- 1894 — 33 ships, 61,000 tons
- 1904 — 76 ships, 258,251 tons, 518,040 horsepower
- 1907 — 126 ships, 506,093 tons, 1,045,383 horsepower

This list does not include the 77 torpedoes weighing 7258 tons. This prodigious development of the Japanese navy in recent years is due to three projects of expansion voted successively by the Chambers, the first (1903) requiring an extraordinary expenditure of 115,000,000 yen; the second (1905) 175,000,000 yen; the third (1907), 76,000,000 yen. There are five maritime prefectures: Yoko-Suka, Kure, Sassebo, Maizuru, and Port Arthur; three naval stations, Takeshiki, the Pescadores, and Aminato. The fleet is divided into three squadrons. On 31 March, 1908, it was composed as follows: armoured battleships, 15, tonnage varying from 10,960 to 19,900 tons; armoured cruisers of the first class, 13, from 7700 to 14,600 tons; armoured cruisers of the second class, 10, from 3700 to 6630 tons; armoured cruisers of the third class, 8, from 2439 to 3420 tons; armoured coast-defense boats, 12; armoured gunboats, 6; torpedo gunboats, 2; dispatch boats, 5; destroyers, 55, from 350 to 381 tons; torpedoes, 77; total tonnage 7258 tons. The navy is recruited by conscription and volunteer services, more than half the naval forces being volunteers. The number of recruits varies greatly each year. In 1902 there were 4130; 1905, 9583; 1906, 5839; 1907, 8682.

There were more than 780 students; in all, 63,733 men. But in 1895 the force was 17,140; in 1899, 28,710; in 1904, 45,999. In 1907 the courts-martial judged 756 cases. Seamen committed to prison, 730; released, 562. Marine hospitals, 5; sick persons cared for during the year, 191.

JAPANESE RELIGIONS

Shintoism

Shintoism [literally, "way of the gods" (*Kami*)] is properly the religion of Japan, born on the very soil and without foreign admixture. It has neither dogmas, nor moral codes, nor sacred books, and is summed up in a rather confused mixture of nature-worship and veneration of ancestors. Philosophical analysis discovers a basis of pantheism. Shintoist mythology first speaks of five gods called Koto-Amatsu-Kami. The first three are the creators of heaven and earth, and they are Ame-no-minaka-nushi, who existed immobile at the time of the creation; Takami-misubi, and Kami-busubi, agents in the Creation. The other two, Umashi-ashrabi-Hikoji and Ami-no-Tokotachi, have no clearly determined rôle. After them come seven generations of heavenly spirits (*Tenjin shichi-dai*), namely, Kuni-Tokotachi, Kuni-Satsuchi, Toyokunnu; then the four couples, Uijini and Suijini, Otonoji and Otomabe, Omotaru and Kashikone; finally Izanagi and Izanami, the special creators of Japan and of a number of gods, the gods of water, wind, trees, mountains, rivers, roads, thunder, rain, etc. Of Izanagi and Izanami were born Amaterasu, Tsukiyomi, and Susano-o. Amaterasu became the god of the sun, Tsukiyomi that of the moon, and Susano-o, the god of the earth. Amaterasu sent her grandson, Ninigi-no-mikoto, to reign over Japan, and he was the great-grandfather of Jimmu Tenno, the first emperor. From Amaterasu to Jimmu Tenno there are five generations called terrestrial spirits (*Chijui-go-dai*), who succeeded the seven generations of heavenly spirits.

Hence, according to Shintoist mythology, the emperor is not only the high priest, he is the representative and direct descendant of divinity, and as such the duty devolves upon him of celebrating the worship of the gods who are his ancestors and of offering to heaven as supreme mediator the prayers and sacrifices of the subjects whom he governs. At first the only temple was the palace of the emperor, and the ceremonies consisted chiefly of ablutions and purifications. The temple of Ise was the first erected outside the palace, and an imperial princess was charged with the sacred treasures there contained. The treasures, which were transmitted by Amaterasu to her descendants, were the Mirror, the Sword, and the precious Stone.

Shintoism remained in this state of simplicity until the introduction of Buddhism in 552. It was soon supplanted by the new religion, which brought with it more profound metaphysics, a more exalted moral code, and more solemn ceremonies. A few conservatives attempted to resist, but the bonzes won the day by what they called Rio-

bu-Shinto, a system according to which Shintoism and Buddhism should form one and the same religion. Thenceforth, save for a few private ceremonies at the palace and the grand temples of Ise and Izumo, the two religions were but one. This state of things lasted until the eighteenth century, when the works of Kamo Mabuchi and several others brought about a reaction in favour of the national religion against Buddhism and Confucianism, both foreign importations. The Restoration completed what had begun, and since 1868 Shintoism and Buddhism have been entirely separate from each other.

Together with the gods of its mythology Shintoism adores several of the emperor and famous men of Japan. It also pays honour to the spirits of soldiers who died for the imperial cause. In several towns temples called *Shokon-sha* (temples where souls are invoked) are erected in their honour. Shintoism is divided into ten branches which differ only in their ceremonial details, the moral code of all being reduced to the single principle: follow the inspiration of your own heart and obey the emperor. Number of temples (*miya* or *jinja*) 190,436; staff: administrative heads of sects, 12; heads or rectors of temples, 16,365; priests (preachers) 74,347; priestesses, 4428; seminary students (March, 1908) 259; boys, 250, girls, 9. Japanese especially professing Shintoism, about 19,000,000.

National Feasts

(1) *Shihohai*, a ceremony celebrated in the palace on the first day of the year, from 3 to 5 A. M. The emperor turns successively to each of the cardinal points, venerates the tomb of his ancestors and prays for the prosperity of his reign and preservation from every calamity during the year. (2) *Genshi-sai*. — On 3 January the emperor himself makes offerings to heaven and his ancestors, and adores in the three sanctuaries of the palace: Kashi-kodoko, in which is venerated the sacred mirror, one of the three emblems of the imperial dignity; Koreiden, in which are honoured the names of the emperor's ancestors; Shinden, in which the gods are adored. (3) *Komei-tenno-sai*, a feast celebrated in the palace on 31 January in honour of the names of the father of the reigning emperor. (4) *Kigensetsu*, 11 Feb., in memory of the enthronization of Jimmu Tenno, founder of the empire (660 B.C.). (5) *Jimmu-tenno-sai* (13 April), anniversary of the death of Jimmu Tenno. (6 and 7) *Shunki-korei-si* and *Shuki-korei-si*, equinoctial feasts, celebrated in the palace in honour of the names of the emperors, the first on 22 March, the second on 24 September. (8) *Kanname-sai* (17 Oct.) offering of the new rice to the ancestors of the imperial family (feast of the palace). (9) *Niiname-sai* (23 Nov.), on which the emperor offers new rice to the gods, and afterwards eats it himself. (10) *Tencho-setsu*, the emperor's birthday. These ten feasts are observed throughout the country, and the Japanese subjects are commanded to display the national flag.

Buddhism

Buddhism was introduced into Japan in A.D. 552. The King of Kudara (Corea) sent Buddhist statutes and books as a present to the Emperor Kimmei. Two years later Tinei and Doshin, the two first bonzes Japan had seen, came from the same country. They found a powerful protector in Soga-no-Iname, who built in his own residence the first temple (*Mukuhara* or *Kogen-ji*), but they also encountered determined adversaries who claimed that the introduction of a new religion would be an injury to the gods of Shinto, who were the fathers and protectors of the country. Thenceforth there were two parties, the strife between whom lasted thirty-five years to end in 587 with the triumph of Buddhism. Upheld by Prince Shotoku Taishi (572-621), the new doctrine made rapid progress. Shortly after his death various sects arose in succession, viz: Jojitsu and Sauron (625), Hosso (653), Gusha (660), Kegon (739), and Ritsu (754). These are the six sects of the era of Nara. They were followed by the three sects of the era of Hei-ankyo (Kyoto): Tendai (806), Singon (806), and Yuzei-nembutsu (1124). Finally the period of Kamakura witnessed the rise of five others: Jodo (1174), Zen (1192), Shin or Montoshu (1224), Nichiren or Hokkeishu (1253), and Ji (1275). Three of these sects, Jojitsu, Sauron, and Gusha, no longer exist. The others are divided into several branches. There are at present twelve principle sects and thirty-nine branches. Owing to the cleverness of the bonzes and the spread of the doctrines of Rio-bu-Shinto, the Buddhist and Shintoist religions existed in harmony for centuries and the ministers of both religions officiated alternately in the same temples. But at the restoration, Buddhism, having ceased to be recognized as the national religion, was obliged to restore the Shintoist temples in its possession. Thenceforth the two religion, although more or less confused in practice, became officially strangers to each other, and Buddhism, despite efforts that have been made to restore its philosophical and theological teachings, is decadent in Japan. In 1908 there were in the whole empire 109,740 temples (*tera*); administrative heads of temples, 52; superiors of temples, 53,120; bonzes (preachers) 70,755; bonzesses, 1199. Various employés: men, 45,554; women, 3404; seminary students, boys, 9269; girls, 449. Japanese especially professing Buddhism, about 29,000,000.

Rio-bu-Shinto or Sinbutsu-kongo (fusion of Shintoism and Buddhism) practically ceasing to exist in 1868, this theory has also ceased to be believed. It consisted as follows; about the beginning of the ninth century, Buddhism had made great progress in Japan; nevertheless the people resigned themselves with difficulty to the worship of other gods than those of Shintoism, the gods of the country. Then the bonzes evolved the theory that the tutelary deities of Japan were but temporary manifestations (*gongen*), of the Buddhist divinities, whose fatherland (*honchi*) was India, but who had appeared

in Japan, leaving there traces (*suijaku*) of their passage. The result of this theory was the fusion of the two religions.

Buddhist Feasts and Customs

Among all the sects are observed 8 April, the birthday of Shaka, the founder of Buddhism; 8 February, the day of his death; and the feasts of the two equinoxes. Among the Motoshu: in November, Ho-on Ko, the feast of thanksgiving, and the death of Shinran Shonin, founder of the sect. Among the Hokkeishu, E-shi-ki, the death of Nichiren, founder of the sect. In every Japanese house is a domestic altar, called by the Buddhists *Butsudan*, by the Shintoist, *Kamidana*. Many wealthy houses have a special room or a small temple built apart within the enclosure. In the *Butsudan* is placed by the Montoshu the statue of Amida, by the Jodoshu that of Shaka, by the Hokkeishu, that of Nichiren, by the Shingonshu, that of Fudo (the Immovable). In the *Kamidana*, the Shintoists place the statue of Amiterasu, to which they offer sacred wine (*Miki*) on the first, fifteenth, and eighteenth of each month. As flowers, the Buddhists use the water-lily, the Shintoists the branches of a pale-leaved tree called *Sasaki*. There are also in every house the *I-hai*, wooden tablets or shelves on which are written the posthumous names of the parents and ancestors of the family. A lamp is lit every day before this domestic altar, at least in the evening, frequently also in the morning. At Buddhist funerals is burned a sacred word (*shikimi*), a foreign tree brought from India with this custom, and whose flower is a violent poison. On returning from the cemetery, salt is sprinkled on the garments of those who took part in the ceremony, in order to purify them.

Confucianism

Introduced into Japan in 285, Confucianism was received without opposition owing to its resemblance to Shintoism, then the only religion practiced. But after the introduction of Buddhism it fell into disfavour and did not recover until the seventeenth century when Ieyasu caused the Chinese classics to be printed for the first time. Henceforth, being taught by learned masters such as Fujiwara Seikwa, Hayashi Doshun, etc., it became the code of the Samurai and exercised a profound influence in Japan during the shogunate of the Tokugawa. After the Restoration the European system of public instruction was adopted, Confucianism was again abandoned, as well as the Chinese classics which had been the basis of teaching for 250 years. But it cannot be denied that the origin of a number of ideas still in favour among the upper classes may be traced to Confucianism.

Bushido (Way of the Samurai, Knighthood)

The principles of loyalty and honour which the Samurai are obliged to obey are called *Bushido*. This code has borrowed from Buddhism stoical endurance, scorn of danger and death, from Shintoism the religious veneration of fatherland and sovereign,

from Confucianism a certain literary and artistic culture and the social culture called "the five relations of men among themselves" (*go rin*). From this compound results the code of the perfect knight, which may be summed up in three sayings: the Samurai has not two words, he serves not two masters; he gives his blood for duty. The Bushido was born with the nation, it developed by degrees as the warrior class grew in influence, and it reached the most complete expansion at the beginning of the Shogunate of the Tokugawa. Then a change took place: hitherto illiterate and even glorifying in his ignorance, the Samurai turned to literary culture and neglected the military calling; decadence followed, and at the Restoration he had lost his ancient prestige. To-day the Samurai no longer form a class apart, but the spirit and influence of the Bushido are more or less preserved among the people.

CEMETERIES

There are two kinds of cemeteries, those connected with the temples and the public cemeteries, those which belong to the municipalities. In the first, the "parishioners" of the temples have the right to be interred, in the second, all persons without distinction of class or religion. The local administration grants permission to establish new cemeteries, to abolish or to change the old, etc., but their inspection and control belong to the police. Every cemetery must have a superintendent (*Kanrisha*), without whose permission no burial may take place. It is forbidden to bury the dead anywhere save in the cemeteries. Formerly it was necessary to enlist the services of a Shintoist or Buddhist priest (*bonze* or *kannushi*) for every burial, but this law was abolished in 1884, and the presence of a priest is no longer necessary. If he is summoned he should perform the ceremony according to the right of his religion. The formalities to be fulfilled are: the obtaining of a physician's certificate proving the death, the presentation of this certificate to the civil official, and the securing from the police authorization for burial. Internment may only take place twenty-four hours after the death; the grave must be six feet deep. Those who neglect to bury a dead person or who profane a tomb are liable to fine and imprisonment. Cemeteries are exempt from taxation.

Cremation is permitted in Japan, It takes place in a special oven called a *Kwasoba*. Persons dying of a contagious disease must be cremated, others being left free. As regards cemeteries and burials, the Christian communities are subject to the same laws and enjoy the same advantages as the pagan sects. They are allowed to have a separate cemetery, which most of them have. As to foreigners, according to Article ii of the treaty concluded with the different powers, "European persons dying in Japan enjoy the right to be buried according to their religious customs in conveniently located cemeteries, which should be established in case they do not exist, and carefully maintained".

PUBLIC ASSISTANCE

Regulations concerning public relief were promulgated in 1899. They stipulated that each department should organize a minimum fund of 560,000 yen for relief in case of accidents (floods, typhoons, earthquakes, etc.). The Government in turn pledged itself to give yearly for ten years a sum proportionate to that collected in the departments. Besides this a sum is reserved each year to assist the poor and foundlings. At the end of March, 1908, the accident fund equalled a sum of 34,844,370 yen. Numbers of persons assisted in 1907, 13,894; number of children helped, 2086; cost, 47,016 yen.

BENEVOLENT ORGANIZATIONS

The chief of these are: (1) the Tokio *yoiku-in* (asylum for the infirm and orphans) an establishment founded in 1872; number of infirm and orphans sheltered in 1907, 3376; receipts 121,875 yen; expenses, 122,227 yen; funds remaining at end of year, 378,908 yen; (2) the Tokio *Sugamo byo-in* (insane asylum), founded in 1879; physicians, 9; keepers, 145; inmates, 634; receipts, 30,700 yen; expenses, 78,830 yen; (3) the Tokio *jikei byo-in* (charity hospital) founded in 1182 [sic]; sick persons received at the hospital in 1907, 768; sick persons treated outside by the hospital; (4) Fukuden-kai *Ikuji-in* (orphanage), a private establishment; orphans assisted, 150; (5) Tokio *Kankwai-in* (house of correction) private establishment, founded in 1885; children received, 69. To these establishments, the only ones mentioned in the official statistics, must be added about 100 other charitable organizations (orphanages, asylums, leper hospitals, infant asylums, houses of refuge for those discharged from prison, etc.), founded by private citizens, the Buddhist sects, Catholic and Protestant missions. The Catholic and Protestant missionaries have been the promoters of these benevolent works in Japan, the Buddhist having merely followed their example. The last-named have founded in all 15 orphanages, 3 schools, and 8 asylums or hospitals. The Shintoists have not a single benevolent work to their credit.

RED CROSS SOCIETY

In 1877 during the civil war of Satsuma, a society was founded in Japan on the model of the Red Cross under the name of Hakuaisha (philanthropic society). In 1886, Japan having given its adhesion to the convention of Geneva, the philanthropic society changed its name to that of the Red Cross of Japan (Nihon sekijujisha). The Red Cross Society is under the patronage of the royal household which gives to the work an annual contribution of 20,000 yen. Besides this the empress gives 5000 yen to the Red Cross hospital. The Society built two hospital ships for use in time of war. Every Japanese or foreigner who gives yearly from three to twelve yen, or twenty-five yen at a time, is an ordinary member of the Red Cross; anyone who gives 200 yen is a special member, and anyone who gives 1000 yen is an honorary member. Number of ordinary members,

1257; special members, 10,139; honorary members, 42; correspondents, 8090. At the beginning of 1908 the Red Cross was composed as follows: staff managers 5; physicians, 291; dispensers, 16; employés, 90; head nurses 262; nurses, 2071; pupil-nurses, 691; litter-bearers, 132; funds, 9,755,417 yen.

CHRISTIANITY IN JAPAN

Catholicism

On 15 August, 1549, St. Francis Xavier arrived in Japan, at the port of Kagoshima in Kiusiu, with two companions and three neophytes. By the boldness of his preaching, his sanctity, and his miracles, he renewed the marvels of the Apostolic age. He preached at Hirado, Yamaguchi, Bungo, and Funai, but he was unable to see the emperor or enter Miako (Kyoto). He set out for China on 20 November, 1551. In Japan there were then 3000 faithful, the feudal regime being favourable to evangelization. Ordinarily, when a prince was converted a portion of his subjects followed him. The celebrated Nobunaga (1565), the terrible enemy of the bonzes, was kindly disposed towards the Christians and a friend of the missionaries. When he died (1582) there were 200,000 faithful and 250 churches. The three Christian princes of Bunga, Arima, and Omura sent an embassy to Europe, which was sent out, on 20 Feb., 1582, reached Lisbon on 10 May, 1584, and Rome 23 March, 1585. The ambassadors witnessed the coronation of Sixtus V and were created knights and patricians. Hideyoshi, the successor of Nobunaga, at first favoured the Christians, but being prejudiced by the bonzes, he later believed that the missionaries were spies and proscribed the Christian religion, but refrained from slaying the Christians (1587). The missionaries hid themselves and remained, and within ten years they baptized 65,000 persons (1587-97), making a total of 300,000 faithful, and 134 religious. In 1593 three Spanish Franciscans having been sent as ambassadors by the king of Spain, they were well-received by Hideyoshi. A Spanish vessel, the "San Felipe", having run aground within the province of Tosa, the captain was foolish enough to say that the missionaries had been sent to prepare for the conquest of the country. Thereupon Hideyoshi became afraid and angry, and on 9 December, 1596, nine religious were arrested and orders were given to draw up a list of Japanese Christians. All gladly made ready for death. On 5 February, 1597, twenty-six were crucified at Nagasaki, and died preaching and singing to the end. After the death of Hideyoshi in 1598 peace reigned for fifteen years. Christians multiplied and the Faith manifested itself in all manner of good works; 130 Jesuits, some secular priests, and about 30 religious of the orders of St. Francis, St. Dominic, and St. Augustine worked side by side. In 1609 and 1613 Dutch and English Protestants arrived who were envious of the Spanish and Portuguese Catholics. In 1613 persecution recommenced. In that year the prince of Sendai, Date Masamune, sent Asahura Rokuyemon on an embassy to Pope Paul V and the King of Spain, the Franciscan Sotelo

accompanying him. In the following year (1614) the edict of destruction was published by the new master of the empire Ieyasu Tokugawa, the first shogun of that name. It was decreed that Catholicism be abolished, and this edict was renewed by Hidetada in 1616, the successor of Ieyasu. The result was horrible. In 1622 took place what was called the "great martyrdom", fifty-two chosen Christians being martyred on the same day (2 Sept.) at Nagasaki, twenty-seven being decapitated, and the remainder being burned alive. In the following year, under Iemitsu, the persecution waxed still more furious and extended throughout the empire. The cruelty and refinement of the tortures are unparalleled even in the early history of the Church. The exact number of the victims is unknown. In 1637 the province of Azima, 37,000 Christians, driven to extremities, revolted, shut themselves up within the fortress of Shimbara, and were slain to the last one. In 1640 four Portuguese ambassadors who had gone from Macao to Nagasaki were called upon to apostatize, and when they refused they were put to death without further trial. Thirteen of their followers were sent back to Macao with this warning: "While the sun warms the earth let no Christian be so bold as to enter into Japan. Let this be known to all men. Though it were the King of Spain in person or the God of the Christians or Shaka himself [Buddha], whosoever will disobey this prohibition will pay for it with his head." Thus Japan was closed, and remained so for two centuries, during which time the persecution did not cease. A price was set on the head of foreign and native Christians. Each year every Japanese was called upon to trample the cross under foot. Some Dutch merchants consented to separate themselves from the Christian population and allow themselves to be confined as prisoners in Nagasaki on the Island of Deshima, in order to carry on business with the Japanese. In 1642 five Jesuits embarked by stealth for Japan where they died after frightful tortures. They were followed in 1643 by five others who met the same fate, and an attempt on the part of the Dominicans of the Philippines (1647) was not more fortunate. If other attempts were made to enter this tomb it is not known. The last known is the Abbé Sidotti, an Italian missionary who in 1708, at the age of forty, landed unaccompanied on the Japanese coast. Delivered to the governor of Nagasaki by the Prince of Natsuma, he was first examined in that town, and then, at the command of the Shogun, conducted to Yedo and condemned to perpetual imprisonment in a place which is still called "Chirishitan Zaka" (Hill of the Christians). While there he baptized his two jailers and died after five years of captivity (1715). The learned Arai Hakuseki, government interpreter in the examination of Sidotti, wrote his history ("Sei yo Kibun", European history), which was reprinted in the "Missions Catholiques", 1884.

However, in spite of persecution some vague and infrequent signs seemed to indicate that all the Christians of Japan had not perished. The Korean missionaries several times attempted to assure themselves of this, but without success, for since 1838

it had been impossible to enter "the mysterious empire" from any side. Interest in the Japanese mission, however continued to increase, and in April, 1844, Père Forcade was sent to Japan as a missionary. He stayed at Okinawa in the Riu-kiu islands with the Chinese catechist Ko as a companion. He was followed by Pères Leturdu, Adnet, Furet, Murmet, Gerard and Mounicou of the Société des Missions Etrangères of Paris. They waited for fourteen years, on the Riu-kiu or at Hong-Kong, seeking by every means to gain entry into Japan. During fourteen years of labour and sufferings they baptized two Japanese. Finally a treaty was signed between France and Japan, 8 October, 1858, and ratified 22 September, 1859. The missionaries were free to reside in open ports, and have there a church for the service of foreigners. Père Girard was provisionally named superior of the mission, and for the ratification of the treaty he went as interpreter to Yedo with the Consul-general, de Bellecourt. The three ports of Hakodate, Kanagawa-Yokohama, and Nagasaki were soon occupied. The labour in these places was difficult and the sojourn there dangerous, for prejudice against foreigners and Christians had not disappeared. Père Mermet built a house and a church at Hakodate and Père Furet did the same at Nagasaki. At first they taught French in order to make friends and prepare for the future. In the new church at Nagasaki on 17 March, 1865, occurred an ever-memorable event, when fifteen Christians made themselves known to Père Petitjean, assuring him that there were a great many others, about 50,000 in all being known. It is easy to imagine the joy which greeted this discovery after more than two centuries of waiting and patience. There were three marks by which these descendants of martyrs recognized these new missionaries as the successors of their ancient fathers: the authority of the Pope of Rome, the veneration of the Blessed Virgin, and the celibacy of the clergy. In the following year (1866) Père Petitjean was named Vicar Apostolic of Japan.

The extreme ardour of the Christians attracted attention and aroused the old hatred. In July, 1867, persecution recommenced; 40,000 faithful of Urakami near Nagasaki were exiled to various provinces. The same proscription was extended to other towns; everywhere the choice was apostasy or exile, and the greater number courageously expressed their faith. There was no bloodshed, but the trials were severe. About a third of the exiles died or did not return. During this time they continued to labour in the seaports. In March, 1873, while the Japanese embassy was travelling through Europe, the exiles were restored to their homes, prosecution ceased in Japan, and the regime of tolerance began. Henceforth the Government was silent regarding religion and disturbed no one provided public order was not troubled. In May, 1876, Japan was divided into two vicariates Apostolic, South and North; Mgr. Petitjean was made Vicar Apostolic of the South, Mgr. Osouf, of the North. About 1878 the missionaries were permitted by means of an official passport to travel more than ten leagues

from the port into the interior of the country. Then a certain number of them became itinerant, and by their means the Gospel was preached with admirable success in nearly all the towns and villages in the space of fifteen years. Prejudices diminished, conversions multiplied, and opinions inclined toward liberty. On 11 August, 1884, an official decree proclaimed that there was no longer a state religion. On 12 Sept., 1885, a letter written from Leo XIII to the Emperor of Japan was received with great honour, and on 18 December of the same year, a representative of the emperor assisted respectfully at the ceremony of the funeral service for Alphonso XII, King of Spain. In March, 1888, the Vicariate Apostolic of central Japan was created, with Mgr. Midon as Vicar Apostolic. Finally on 11 Feb., 1889, came the promulgation of the new Constitution of the empire and authentic recognition of religious liberty. In the following year (1890), on the twenty-fifth anniversary of the discovery of the Christians, the first synod of the bishops of Japan was held at Nagasaki. During six weeks occurred the incomparable festivals by which the Church of Japan celebrated in transports of joy and gratitude the miracle of her resurrection. In April, 1891, the vicariate Apostolic of Hakodate was created with Mgr. Berlioz as vicar Apostolic. On 15 June the same year the ecclesiastical hierarchy was established with an Archbishop of Tokio and three suffragans, namely, the bishops of Nagasaki, Osaka, and Hakodate.

With liberty the zeal of the Japanese for religion decreased and conversions became less frequent. However, Catholic education, benevolent, and journalistic works developed and grew unmolested, and moreover, the numerical progress has never been interrupted. In 1860 there were two missionaries in Japan; in 1870, one vicar Apostolic, 40 missionaries, 27 religious (nuns), and 23,000 Christians; in 1890, 79 missionaries, 15 native priests, 27 Marianists, 59 nuns, and 42,387 Christians; in 1900, 1 archbishop and 3 bishops, 115 missionaries, 32 native priests, 62,694 Christians, 93 religious men, and 389 religious women (foreigners and natives).

Writing has joined to preaching by word of mouth. A Catholic review, "Kyoto Bambo", founded in 1881, continued under various names until the present time, explains religion, solves current objections, and gives news of interest to the Christians. Nearly everything relevant to Christian life, education, philosophy and theology has been treated in more than a hundred works. Several lesser works and two large dictionaries for the study of the Japanese language have also been issued by the missionaries (a French-Japanese dictionary by M. Raguet; a Japanese-French by Lemaréchal; a Japanese grammar by M. Balet. The "Mélanges", another review founded in 1904 and written in French, studies Japanese matters and gives a quarterly summary of the press. Two noteworthy benevolent works have also been established by the missionaries, the leper hospital of Gotemba, founded by M. Testewaide and that of Kumamoto by M. Corre. The missionaries were soon joined by numerous and valuable assistants. In

1873 came the Dames de St-Maur. They first founded an orphanage at Yokohama, and another at Tokyo in 1875; as many as 700 persons were assisted here at one time. At present they have an orphanage and three schools, one of them at Shizuoka, for the middle classes, and a course in foreign languages and arts for the higher classes, with 180 pupils. In 1877 came the Sisters of the Infant Jesus of Chauffailles. They have orphanages and private schools at Osaka, Kobe, Kyoto, Nagasaki, and Okayama. The Sisters of St. Paul of Chartres came in 1878; they have primary or boarding schools at Hakodate, Tokio, Sendai, Morioka, and Yatsushiro, with more than 800 pupils.

In 1888 the Marianist Fathers established themselves at Tokio. Their progress was slow and laborious, but uninterrupted. They have at present primary and secondary school with 802 pupils, of whom 71 are Catholic and 29 catechumens; and a foreign language course for adults with 100 pupils. Of these 802 pupils, 140 are sons of generals, admirals, superior officers, ambassadors, ministers, consuls, deputies, senators. There are 19 European teachers and 26 Japanese. Five Marianist fathers conducted courses at the university, the school for nobles, the school for man=CFvres, the school of cadets, and that of the military intendance. They have besides at Nagasaki a commercial school (1892) with 380 pupils; at Osaka (1898) a commercial school with 498 pupils; at Yokohama (1902) a higher primary school with commercial courses for foreigners or Eurasians of all nationalities, with 120 pupils. In all these schools student and graduate societies for piety, zeal, friendship, sport, etc. are flourishing. The native religious are recruited chiefly from among the ancient Christians of Kiusiu; a house for this purpose was opened in April, 1910, at Urakami.

In 1896 Trappists of four different nationalities came to Hokkaido. Within twelve years, despite difficulties of all sorts, of a total of about 1000 acres, comprising mountains and ravines, they had cleared and made valuable about 620 acres and formed a Christian colony of more than a hundred persons.

The Trappistines came from France in 1898. Their start was painful. But they now have no difficulty in securing recruits from among the ancient Christians of Nagasaki. They are engaged in the cheese industry, and development, at first despaired of, has been rapid.

In 1905 the whole of the Island of Shikoku was given to the Spanish Dominicans. This is the fifth ecclesiastical division of Japan, with 300 Christians.

The Franciscans returned in 1906. They are at Sapporo and Hakodate, and are 9 in number, 5 Germans, 2 Canadians, an Englishman, and a Frenchmen, engaged in teaching languages and in the ministry.

The Fathers of the Divine Word of Steyl came in 1907. They consisted of seven Germans and one Austrian. They teach German, English, French, and Chinese, and preach the Gospel.

On 1 January, 1908, the religious of the Sacred Heart, 12 in number, English, Belgian, and French, opened a house for higher education at Tokio; on 1 July the servants of the Holy Ghost, five in number, from Germany and Austria came to Akita, where they have a kindergarten, boarding school, school of dress-making, and one of French and German languages. On 1 September 7 Franciscan sisters from France, Mexico, and Italy came to Sapporo, where they established sewing and embroidery classes, a school of housekeeping, and a dispensary. Sisters of the same congregation care for the lepers at Kumamoto. Finally on 17 October three Jesuit Fathers, English, German, and French, established themselves at Tokio for higher education and journalism. Thus the Catholic Church, one in faith, with its religious bodies of every country and name, has in Japan a truly universal character.

Protestantism

Protestantism appeared in Japan in 1859 at the opening of the country. The first arrivals were the American Episcopalians, the best known of whom was Channing Moore Williams. Shortly afterwards came the Presbyterians: James Curtis Hepburn followed by Mr. Werbeck (1861) and Mr. Thompson (1863). They halted first at Yokohama. Their religious reunions were called "prayer-meetings" (*Kito-kwai*). The first Japanese baptism took place in 1864. Protestant missionaries were also at Nagasaki prior to discovery of the old Christians (1865) and to them the Christians of Urakami addressed themselves before going to the Catholic Church. The first Japanese Protestant church was organized in 1872, after the last persecution, and inaugurated in 1875. Until that time only ten baptisms had been administered. During these early years the work of evangelization was almost impossible, and the time of the missionaries was chiefly employed in the translation of the Holy Scriptures. That of the New Testament was completed in 1880, and that of the Old Testament in 1887. A number of them were also employed in teaching either in schools founded by themselves or as professors in the Japanese schools. Their aim was to attack the pagan error at its very root by means of instruction, and also to have a right to live in the interior of the country, which was hitherto forbidden to foreigners. In 1876 a kind of university called Dashisha was founded at Kyoto, the ceded funds being founded by several American missions. The intention was to form Christians who would be solidly instructed in their religion and men capable of embracing any career. This celebrated school was very prosperous under the rector, Nijima Jo; it had as many as 1500 students, but having been declared independent several years since, has lost much of its importance.

An event of considerable importance in 1877 was the union of the hitherto divided forces of the American and Scotch Presbyterians; the Dutch Reformed Mission, the Presbyterian Mission, and the Scotch Presbyterian Mission. Their association formed the United Church of Christ in Japan (*Nippon Cristo Ichi Kyokwai*). They were after-

wards joined by the German Reformed Mission (1886), the South Presbyterian Mission (1887), and the Cumberland Presbyterian Mission (1890). In a General Assembly held at Tokio in 1891 the Articles of Faith and the constitution of a new church were drawn up. Its new name was the *Nihon Cristo Kyokwai* (Church of Christ in Japan). The chief Protestant College in Tokio belongs to this United Church, and instruction is here given according to the spirit of Protestant Christian religion and morality.

During the period of religious tolerance the missionaries flocked to Japan and baptisms multiplied rapidly. The desire to learn English attracted to them many young Japanese. In December, 1889, the total number of Japanese converted to Protestantism was 31,181; foreign missionaries, 527; native ordained ministers, 135. There were 274 churches, more than half of which were self-supporting. The contributions for Japanese Christians for 1889 amounted to 53,503 yen. Several religious organizations, especially that of Christian Youth, were flourishing.

In the above number are included the Episcopalian church of America, governed for more than thirty years by Bishop Williams, and the Established Church of England, whose first bishop in Japan was Dr. Poole (1883). These two churches have agreed to work in concert and the constitution uniting them was drawn up in February, 1888. This was the foundation of a new church under the name *Nihon-Sei-Ko-Kwai* (The Holy Catholic Church of Japan). Hierarchically constituted, it has divided all of Japan, including Formosa, into six districts; it number 13,384 baptized Christians; 228 foreign missionaries, clerics, or laymen or women; and 295 Japanese assistants.

These are the chief denominations. The total number of missionaries given by Protestant statistics for 1908 is 789 foreigners, including women, and 1303 Japanese, ordained or not, men or women. The number of practical church members is 57,830; not practical, 10,554; churches, 408; young men in the schools, 3604; young women, 5226; Sunday schools, 1066, with 84,160 children; publishing houses, 7; volumes issued during the year, 1,974,881. The property of the different mission, schools, churches etc. is valued at 3,536,315 yen. Contributions of Christians for 1907 equalled 274,608 yen, and expenditures for the Japanese churches and the work of evangelization amounted to 448,878 yen, not including the salaries of the missionaries and their expenses. In the above are not included the Unitarians, who mingle with all denominations; the Independent Christians who are not attached to any church; the Methodist Episcopalians, who have a Japanese bishop, the Rev. Honda; several Japanese neo-Christian sects who are wholly independent either in government or in doctrine. They are eclectics who aim to adopt Christianity to the ideas and spirit of Japan, and thus to found a new and special Japanese religion. Up to the present time Protestantism in Japan has been chiefly American, but now it seems about to become Japanese. According as the Japanese churches become self-supporting, their tendency is to free them-

selves from the authority of foreigners. There is an evolution of religious ideas; many Christian works have been imitated by them, but faith in even the fundamental dogmas seems to disappear.

Russian Missions

The Russian Mission, or Orthodox Church of Russia in Japan, dates from 1861. A hospital had been previously built at Hakodate for Russians and Japanese. A Basilian monk, the Rev. Nicolai, was attached to it as chaplain with a church near the hospital. The hospital having been destroyed by fire, the church remained, and the Rev. Nicolai stayed as a missionary, at Hakodate, where he baptized a number of Japanese; this was the beginning. In 1870 the Russian minister to Japan obtained from the Japanese the grant of a special territory as a branch of the Russian legation, which territory was at Surugadai at the very centre of Tokio and one of the most advantageous sites in the capital. Here Fr. Nicolai established his residence and the centre of the Orthodox Church. He began by training well-instructed men and native assistants, for which purpose he had an ordinary college and a school of philosophy and theology; later on he also had a special school for young women. He preached his religion by means of carefully trained catechists and priests. Since 1881 he has also had a religious review, published twice monthly, and a publication committee installed at his house has published all the most necessary books. In 1886 Fr. Nicolai was consecrated bishop in Russia, and in 1890 he completed the erection of his cathedral, a truly magnificent monument, one of the sights of the capital.

Bishop Nicolai enjoys a great personal esteem; for the most part alone, he has founded and governed by himself everything pertaining to his mission. During the Russo-Japanese war the situation was very delicate, but the Christians, at least the greater number of them, did not abandon him. Even during this time he continued all his undertakings unmolested, his house being guarded without by Japanese soldiers. Previously he received from the Holy Synod 95,000 yen yearly, but since the Russo-Japanese War, these and other resources from Russia have greatly diminished, while on the other hand the price of everything in Japan has increased. The bishop was compelled to diminish also his expenses, to dismiss a part of his staff, and to exhort the Christians to contribute more generously to support their church.

But after the victories of the Japanese over the Russian armies it is not easy to conceive of even the Japanese, though Christians, as members of a church hitherto supported by the Russian Government. That is why the leaders among these Christians, after having agreed among themselves, declared to "Archbishop" Nicolai their intention of being supported entirely by themselves and being independent of Russia. And as Russia has its national church they wished to have also their Japanese National Church (June, 1909). Little has been written concerning the work of the Russians in Japan;

even in Russia almost nothing has been published. According to one Protestant reckoning, the Orthodox church numbers 30,166 baptized Christians; according to another only 13,000 (the last figure denotes perhaps those who are practical). There are 37 native priests and 139 catechists. Expenses for church and evangelization in 1907 amounted to 55,279 yen; contributions of Christians, 10,711 yen; Churches or places of preaching, 265. Among the Russians, as among Protestants, and in fact everywhere throughout Japan, the tendency of mind is toward independence.

Laws Concerning Religion and Schools

(1) According to the constitution of the empire, every Japanese is free to believe and to profess the religion he prefers, provided he does not disturb the public order, and that he observes the other laws of the country. Religious manifestations and assemblies, ordinary and extraordinary are permitted, provided the police are informed and all disorder be avoided. In national ceremonies where Christians and pagans mingle, practical difficulties sometimes arise which are inevitable because of the mixture of religions. Local differences also occur, though somewhat rarely, owing to popular prejudice or the dispositions of a few, but in principle and before the law all religions are equal.

(2) Any Japanese or foreigner is free to found a school, provided he observes the laws and regulations laid down by the Japanese Board of Education concerning hygiene, qualifications of teachers, matters to be taught, etc. There are official schools for popular education, such as the primary and middle or high schools for boys and girls (*shogakko*, *chugakko*, and *Koto-jogakko*), and non-official or private schools, which may also be primary or others at choice. But the diplomas issued at private schools have no official value, at least no value equal to that of the schools which are formally recognized by the ministers of public instruction. A school for which this recognition is desired must conform to the same regulations and control as the government schools and be in no way inferior to them. Public inspection regularly takes place only in official or recognized schools.

(3) In the so-called schools of "popular education" which are official or recognized, no religion is taught during hours of class. All religions are free, none is imposed. In private unrecognized schools religious instruction is permitted during hours of class. Each school may profess its own. However, popular instruction in Japan is not atheistic; it gives as the basis for private or social morality primitive history or Japanese mythology, which assigns the origin of all things to the gods or ancestors of the country. But higher education in general inclines strongly towards materialism.

(4) For the possession and administration of their goods, churches and schools may, if they so desire, cause themselves to be recognized as juridical persons, and as such possess movable and immovable property. On this point Christian communities

or establishments are subject to the same laws as the others. Each juridical person is represented by a responsible council who sends the Government an inventory of the goods, the annual accounts of administration, the amount of purchases or sales, the condition of the staff, if it be a mission, the number of priests and faithful, if a school, that of masters and students, the precise location of churches and residences, the names of the titulars and their charges if any. Churches, benevolent foundations, etc are dependent on the ministry of the interior; schools, on the ministry of public instruction. The aim of this legislation with these regulations is to place the juridical persons under the protection of the law.

Taxes

Schools pay no taxes. churches and all houses serving as residents for those attached to these churches (priest's house, that of the catechists, that of the servants, etc.) are also exempt from taxation. These enjoy all the privileges granted to the pagan temples; houses of revenue, if there are any, are subject to the common law and pay the tax.

Days of Rest

Schools, government employés, and bank employés are free from Saturday (noon) until Monday. This custom has been introduced since the coming of the foreigners, but has not yet been adopted among the people. Labourers work on Sunday, their days of rest being the first and fifteenth of the month.

HISTORY

Ethnology

Much obscurity surrounds the origin of the Japanese people. The primitive population, besides being very sparse, appears to have belonged wholly to the people called Ainos. Beyond a doubt these came from the Asiatic continent by way of the North. They were conquered by other immigrants more powerful than themselves who came from the South. The best of these Ainos seemed to have accepted the civilization of their masters and became united with them, and from the fusion of these two races are descended the Japanese of to-day. The most refractory tribes were driven farther and farther north, and in the end abandoned the Great Island, confining themselves in Yezo (Hokkaido) and Sakhalin, where they show a tendency to decrease and disappear. They are small and strong, with long hair and beards. Their language is quite different from that of the Japanese. Their garments, which are shorter than that of the Japanese, are made of the bark of trees. In general they are mild-natured and simple-manners. They live by the chase and fishing, making use of the harpoon to catch seals, and slaying bears with stakes and poison arrows. They adore the god of the mountain and the bear, whom they believe to be his son. Each year they sacrifice a bear with great solemnity. They believe also in good and evil geniuses and worship several of the divinities and personages of Japan.

General Division

The history of Japan is divided naturally into three chief periods. The first (autocratic period) which extends from the beginning to the shogunate of Kamakura, embraces eighteen centuries (660 B.C. - A.D. 1192), during which time the authority was in the hands of the emperors. The second begins with the shogunate of Minamoto (1192), and ends with that of the Tokugawa (1668). Lastly, the third, beginning with the imperial Restoration, witnessed Japan's complete modification of her secular institutions, the Europeanization of her administration, and saw the country take her place among the great nations of the world.

Autocratic Period (600 B.C.-A.D. 1192)

According to Japanese tradition, in the seventh century B.C., a tribe, probably of Malayan origin, which had landed and established itself at Kiusiu, advanced towards the north and after some years of warfare chose the region of Yamato as a place to settle. Hasamu-no-mikoto, the chief of these adventurers, became the first Emperor of Japan (Jimmu Tenno). His enthronization, assigned to 660 B.C., is considered as the foundation of the empire, and the beginning of a dynasty which was to reign for twenty-five centuries.

After a gap of 500 years in the national annals we find a rough sort of civilization during the reign of Sujin (97-30 B.C.) and Suinin (29 B.C. - 70 A.D.). Then comes the famous legend of the hero Yamatokakeru (131-190). His son merely ascended the throne (192-200). His widow, the Empress Jingo, ruled after him. The Japanese chronicles attribute to her the conquest of three small kingdoms which lay south of Korea. She was succeeded by her fourth son, Ojin (201-310). During his reign, two Korean scholars, Ajiki and Wani, came to Japan, bringing with them Chinese literature and Confucianism (285). Ojin's son, Nintoku, governed for eighty-seven years (313-399). During the whole of his reign the country was at peace, but after him bloody scenes were multiplied in the imperial family until direct descendants were wiped out. A branch laterally descended for Ojin ascended the throne. Under the fourth sovereign of this branch (Kimmei, 552) Buddhism was brought to Japan by bonzes from Korea. The introduction of Buddhism brought about radical changes in ideas and customs. Prince Shotoku (573-621) favoured its progress, but it was the Emperor Kotoku (645-54), who by his famous reform of the Taikwa era, accomplished the great political and religious revolution which transformed Japan. Everything was then modelled on the Chinese form of government, and save for a few modifications this system remained in force until the restoration (1868). In the following century the Empress Gemmei (708-14) transferred the capital to Nara, where it remained for seventy-five years (708-785). The fiftieth emperor, Kwammu (782-805), built the city of Kyoto (794), which was the residence of the court until the imperial Restoration. The Fujiwara then became

powerful. They exercised the regency (*sessho*) during the minority of the sovereign, then, under the title Kwampaku, continued to govern even after he had attained his majority. However, the effeminate nobles of the palace neglected the career of arms and gave themselves up to frivolous pastimes. Because of this decadence of the imperial authority, frequent revolts took place which the court was powerless to repress, and for this purpose, called on military clans. Their power became more and more formidable, two families especially, the Taira and the Minamoto, acquiring great influence. Both wished to secure the preponderance of power, and for thirty-five years their rivalry filled the country with bloodshed. Finally the Minamoto overcame and completely annihilated their adversaries (1185). The victorious Minamoto, Yoritomo, then raised to the throne a four-year-old child and assumes the title of Sei-i Taishogun. A new era had begun in the history of Japan; feudalism was inaugurated.

Age of Feudalism

It is subdivided into three parts: the Kamakura period (1192-1338); the Ashikaga period (1338-1573); and the Tokugawa period (1603-1868).

Kamakura Period (1192-1338)

Having been named Shogun, Yoritomo installed himself at Kamakura, which he made his capital. After this he undertook the administrative reorganization, which was to concentrate all authority in his hands. Unfortunately for his plans, he died before this was accomplished (1199). His two sons, Yorii and Sanetomo, allowed the power to pass to their mother's clan, that of Hojo. These last, who were descended from the Taira, dared not assume the shogunal dignity, but they succeeded under the title of *Shukken* (regents) in retaining the power for a century which was the most prosperous in the history of Japan. About this time, the only invasion with which Japan had been threatened, that of the Mongols, was frustrated through the energy of Hojo Tokimune, and by a providential storm which destroyed the enemy's fleet (1281). However, decadence manifested itself among the Hojo, family dissensions increased, weakening the usurped authority and preparing the way for a restoration of the imperial power. The Emperor Go Daigo (1319-1339) was the instrument of this work of restoration. Assisted by faithful followers he began the struggle, and in less than two years the supremacy of Kamakura was at an end (1333). But rivalries arose among the generals. The clan of Ashihaga, descended from Minamoto, rose in revolt, its head, Takauji, assumed the title of shogun, raised to the throne an emperor of his own choosing, and thus founded a new dynasty of shoguns which retained its power for more than two centuries.

Ashikaga Period (1338-1573)

The dethroned emperor defended himself courageously. His son and grandsons continued the struggle, and for more than fifty-six years was seen the singular phenomenon of two emperors at one time. In 1392 a compromise was effected between

the rival powers which put an end to the schism. The first Ashikaga shoguns knew how to restrain within reasonable limits their warlike spirit, developed by many years of war, but their weaker successors passed all bounds. From the civil war of the era of Onin (1467) the troubles never ceased, and for a century the empire was a prey to the horrors of intestinal strife. The shoguns were henceforth no more than toys in the hands of their chief feudatories. When the shogunate of the Ashikagas was on the verge of ruin, a petty daimio of the province of Owari profited by the anarchy to increase his dominion. At his death (1549) his fifteen-year-old son, Oda Nobunaga, came into possession of his inheritance. It was about this time, during the reign of Go-Narantennō (1527-1557), that Europeans appeared for the first time in Japan. The honour of being the first to penetrate into the country was reserved for a Portuguese named Fernão Mendes Pinto (1542). Seven years later, 15 August, 1549, St. Francis Xavier landed at the port of Kagoshima.

Man of genius that he was, Nobunaga conceived his project of concentrating into the hands of a single master the power which the daimio disputed to the injury of the nation. Having defeated the most turbulent and subjugated the others to his will, he deposed the last Ashikaga shogun and seized the reins of government, but he was treacherously slain by a vassal who owed everything to him, and died leaving his work uncompleted. The succession fell to a soldier of fortune named Hideyoshi, who succeeded in removing the sons of his former master. Being incapable of aspiring to the dignity of a shogun, he assumed the highest of the titles of the civil hierarchy, that of Kwampaku. Later, in 1592, he took the title of Taiko (Sovereign Lord) under which name he is known in history. Blinded by ambition, he conceived the project of taking possession of Corea, but despite some successes, this campaign ended in disaster. Hideyoshi did not long survive his failure; he died in 1598. Before his death he had charged five chief daimios with the guardianship of his son, Hideyori, who was still a child. Among the five was one who could not be content with second rank. This was Tokugawa Ieyasu (1543-1616), a descendant of the Minamoto. After the death of Hideyoshi he withdrew from his colleagues and made war against them. The famous victory which he won in the plain of Sekigahara assured him a supremacy which his family retained for two centuries and a half. Three years after his triumph, Ieyasu received the title of shogun (1603).

Tokugawa Period (1603-1868)

Two years after this Ieyasu transmitted the shogunate to his son, withdrew to Sumpu (Shizuoka), and before his death, witnessed the annihilation at Osaka (1615) of the descendants of Hideyoshi. After a period of great troubles, Ieyasu inaugurated a powerful feudal regime, and gave to Japan a political and social constitution which was upheld almost till 1868. According to this constitution, the emperor was nominally

master of all the territory, even the shogun asking investiture of him. But this investiture was a mere fiction. The office of the shogun being hereditary, the titular possessed effective power, and disposed at will of land and even of the posts of the emperor's court. Socially Japan was divided into eight hereditary and closed classes: *kuge* (court nobles), *daimio*, *hatamoto*, *samurai*, labourers, artisans, merchants, *eta* (a kind of pariah). Only the first four, the so-called privileged classes, had the right to bear arms. Before dying Ieyasu had assured the power of his family. His immediate successors, Hidetada (1605-22), and Iemitsu (1623-51), continued his work and made still heavier the iron yoke which he had imposed on his country. Hidetada forbade every Japanese under most severe penalties to leave his native land, and it was he who discontinued all intercourse with foreigners, except the Dutch, the Chinese, and the Korean. Iemitsu completely closed the country to foreign commerce, forbade the construction of boats which would allow of long trips (1636), caused to be put to death ambassadors who came to Macao to request liberty of travel (1640), restricted to the Island of Deshima (Nagasaki) the Dutch who were authorized to maintain relations with Japanese, and passed the law which required the daimio to reside part of the time at Yedo, and part on their estates, when they were to leave their wives and children at the capital as hostages. Ietsugu, Tsunayoshi, Ienobu, Ietsugu, Yoshimune, Ieshige, Iehara (1651-1786) merely continued the policies of their predecessors, namely the breaking off of all intercourse with the outside world, ferocious prosecution of Christians, strict watch of the slightest proceedings of the daimio and Samurai, skillful spying of the Court of Kyoto, Draconian laws concerning the press, teaching, Confucianism, etc., such were the principles of the shogun government. Nevertheless under the administration of Ienara (1786-1837) the foreign powers began to endeavour to enter into communication with Japan; but all their advances were repulsed, and the country remained more strictly closed than ever. At the age of forty-five Ieyoshi succeeded his father (1837-1858). Each year foreign vessels appeared in greater number in sight of Japan, but order was given to fire on those which approached the shore. Ii Noasuke, who was then minister, confided the defense of the country to Tokugawa Nari-aki, Prince of Meto (1852), and the emperor ordered public prayers in the Buddhist and Shintoist temples. Finally on 8 July, 1853, a fleet from the United States cast anchor in the Bay of Uruga. Commodore Perry, who commanded it, delivered to the shogun (14 July) a message from President Fillmore, proposing friendly relations and a treaty of commerce with Japan. He returned 12 February, 1854, and after long conferences the Bakufu (government of the shogun) signed a provision treaty which opened the ports of Shimoda and Hakodate to United States vessels (31 March, 1854). Mr. Townsend Harris, who was sent as minister plenipotentiary arrived at Shimoda in August, 1856, and concluded a definitive treaty (28 July, 1858) with the shogun Iesada (1853-58), who died shortly afterwards. His

successor, Iemoshi (1958-66), signed similar treaties with Holland (Donker Curtius, 19 August, 1858), Russia (Poutiatiine, 20 August), England (Lord Elgin, 27 August), and France (Baron Gros, 9 October). These treaties opened to foreign commerce the ports of Hakodate, Yokohama, Nagasaki, Niigata, and Kobe, and the cities of Yedo and Osaka. However, the news that the shogun had concluded these treaties with the Powers caused a profound sensation at the court of Kyoto. Public opinion also showed itself much opposed to the opening up of the country. The prime minister of the shogun, Ii Noasuke Kamon no Kami, was assassinated (21 March, 1860) and plots against the foreigners multiplied. The Bakufu determined to send an embassy to the Powers to beg them to suspend their treaties (2 January, 1862). Meanwhile the emperor had confided the protection of Kyoto to the daimio of Tosa at Satsuma and had forbidden the shogun to come to the capital. The shogun pledged himself to take the field against the foreigners within a month. On a day fixed by the emperor, Mori Motonori, daimio of Chosa, opened fire on an American vessel which passed through the strait of Shimonoseki, and within a few days some French and Dutch ships met with the same treatment. The French squadron, under the command of Admiral Jaurès, bombarded the forts of Shimonoseki (15 July, 1863), and England sent Admiral Kuper to bombard the town of Kagoshima (15 August 1863). The following year (7 September, 1864), the combined fleets of France, England, and Holland took and destroyed all the forts and military magazines of Shimonoseki. The power of the shogun was on the decline. Nagato and Satsuma joined forces against him. In July, 1866, he commenced hostilities, but his forces were defeated. Shortly afterwards he died suddenly at Osaka. His death was followed almost immediately by that of Emperor Komei (13 Feb., 1867). Hitotsubashi succeeded Iemochi, and took the name of Keiki. He was the fifteenth and last Tokugawa shogun. Dismayed by the task which confronted him, Keiki gave in his resignation, 15 October, 1867, and the shogunate was suppressed, 5 January, 1868. The partisans of the shogun revolted and wished to restore his authority, but their troops were constantly defeated by those of the imperial army. After a brilliant defence Enomoto capitulated at Hakodate, 27 July, 1869. This was the end of the civil war. The imperial restoration was an accomplished fact.

Imperial Restoration

On his ascension to the throne, the emperor transferred the seat of his government to Yedo, which received the name Tokio (capital of the East) and became the capital of the empire. The whole government system was completely changed. Even as formerly the Japanese had copied china, so now they set themselves to imitate Europe. Foreign specialists, engineers, soldiers, seamen, professors, priests, business men, bankers, etc. were summoned, and thanks to their co-operation all branches of services received an organization similar to that established among the European nations. The chief events

of this period may be summarized as follows: In 1868, abolition of the shogunate and restoration of the imperial authority; 1869, Yedo became the capital of the Empire under the name Tokio; end of the resistance of the partisans of the shogun; 1871, abolition of the fiefs of the daimio and division of Japan into departments; 1872, law establishing conscription; first national exposition at Tokio; 1873, adoption of the Gregorian calendar; abolition of the edicts of persecution against Christianity; creation of primary schools; 1874, insurrection of Saga; Formosa expedition; 1875, Japan cedes to Russia its rights over the Island of Sakhalin (Karafuto) in exchange for the Kurile or Kourile Islands (Chishima); 1876, treaty with Korea; Samurai forbidden to carry two swords; riots of Kumamoto (Higo) and at Hagi (Nagato); 1877, insurrection of Satsuma; Japan's entrance into the Universal Postal Union; 1879, annexation of Riu-kiu Islands; adhesion of Japan to International Telegraphic Union; 1880, creation of provisional assemblies; 1881, promise of a constitution for 1890; organization of political parties; 1883, first tramways; creation of an official journal (*Kwampo*); 1884, creation of the five titles of nobility. viz., *Ko, Ko, Haku, Shi, Dan* (duke, marquess, count, viscount, baron); 1885, establishment of the council of ministers (*Naikaku*); foundation of the navigation company, Yusen Kwaisha; Treaty of Tien-tsin with China; 1888, creation of privy council (*sumit-suin*); 1889, promulgation of the Constitution; prohibition of dueling; 1890, first session of Parliament; foundation of an academy (*Tokio Gakushikwai-in*); 1891, plot of Tsuda Sanzo against the Csarevitch Nicholas III; 1894, war with China; 1895, treaty of Shimonoseki, 18 April, ratified at Che-fu, 8 May; intervention of Russia, France, Germany; withdraw from Liao-tung peninsula; China cedes Formosa and the Pescadores, pays an indemnity of 200,000,000 taels, and opens several ports to Japanese commerce; 1896, civil and commercial codes put into operation; 1897, adoption of the gold standard; 1899, treaties concluded with the Powers carried into effect; suppression of the consular jurisdiction; liberty granted for foreigners to traverse and settle in the country, but the right of possessing private estates was denied to them; 1900, promulgation of the law concerning co-operative societies; co-operation of Japan in the suppression of the Boxers; 1902, treaty of alliance with England (12 August); 1904, war with Russia (8 Feb.); 1905, new treaty of alliance with England (12 August); Peace of Portsmouth, trouble in Tokio on this occasion, burning of police stations and of ten Christian churches; by Treaty of Portsmouth, Russia ceded to Japan the southern part of the Sakhalin and the adjacent islands; the lease of Port Arthur, Talien Wan, and the adjacent territory, and the railroad between Chang-chun and Port Arthur, with all its branches. It is recognized at the same time by anticipation the protection of Japan over Korea; treaty with China; 1907, treaty with France (June); deposition of the King of Korea (8 July); Korea placed under the protection of Japan; a president general sent by the Japanese government administers the affairs of the

country; agreement with Russia (30 July); trouble with the United States; 1908, United States squadron visits Japan.

LITERATURE AND ARTS

Literature

Archaic Period, previous to A.D. 700

The only work composed during this period is the "Kyuji" (Annals of Antiquity), which has been lost.

Nara Period (710-784)

The chief works which appeared during this period are: the "Kojiki" (712), record of ancient matters; "Nihonki" (Chronicles of Japan) stories and legends of the early times; "Manyoshu" (collection of a myriad leaves), a collection of ancient poems, composed about 750; it contains more than 4000 pieces, the greater number being *tanka* (poems of 31 syllables); held in great esteem by connoisseurs, it constitutes at present a valuable source of philological, historical, and archeological information.

Classic Period (Hei-an, 800-1186)

This period is the golden age of Japanese literature. A remarkable fact is that the two greatest works were written by women; they were "Genji monogatari", composed in the tenth century by Murasaki Shikibu, maid of honour at the court, and "Makura No Soshi" (Tales of a Vigil), a classical work in twelve volumes, composed by Sei Shonagon, a lady of the imperial court. After these two works the most celebrated are "Kokinshu" (a collection of ancient and modern poems); "Tosa nikki", an account of a journey; "Taketori monogatari", tales of a bamboo-gatherer; "Ise monogatari", Story of Ise. The period of Hei-an witnessed important progress in the art of writing, the invention of phonetic writing called *kana*, and the alphabet as it is at present, in forty-eight syllables.

Kamakura Period (1192-1338)

Principal works: "Gempei seisui ki" (history of the grandeur and decline of the Minamoto and the Taira); "Heiki monogatari" (account of the Taira family); "Hogen monogatari" (history relating the war of Hogen), a classic work, and many other less important books. This epoch produced an anthology entitled "Hyakunin isshu" (the hundred-bodied head); this is a collection of a hundred *tanka* (poems of 31 syllables) by a hundred different men, and was very popular. The time between 1332 and 1603 was singularly barren of literary productions. Three principal works belong to this period: "Jinkoshoto-ki" (history of the true succession of the divine emperors) "Taiheiki" (tale of peace); "Tsurezure kusa", a collection of sketches and anecdotes, a classic work composed in the fourteenth century, which occupies a very high place in Japanese literature. To this period belong the No, lyrical dramas, and the *Kyogen*, comedies. In ancient times the only public representations were the sacred dances called the *kagura*,

at the gate of the temples, in honour of the gods. To these in the fourteenth century was added a spoken dialogue which was the origin of the *No*. The *Kyogen* was a sort of comic piece performed between the *No*.

Yedo or Tokugawa Period

This period embraces a greater number of subjects than the others. One of the earliest works of the time is the "Taiko-ki" (History of Taiko Hideyoshi), 1625. The study of Chinese books was then given the place of honour. The chief promoter of this movement was Fujiwara Seikwa, who founded a school of Confucianism, and left a number of disciples, the most famous of whom is Hayashi Razan, also called Doshun (1583-1657). Arai Hakuseki (1656-1725) is also numbered among the most learned in Chinese (*Kangakusha*). Then came Ibara Seikwaku, founder of a school of popular literature; Chikamatsu Monzaemon, Japan's most famous dramatic writer, who composed ninety-seven *yoruri* (dramas); Basho (1644-94); and Keichu (1640-1701); Kado Azumamaro (1669-1736) opened at Kyoto a school in which he combatted the Chinese ideas then in favour; the most distinguished of his disciples was Mabuchi, who left numerous works which are now indispensable to those who study the ancient Japanese language; Motoori Norinaga (1730-1801), the greatest of the *Wagakusha* (scholars of Japanese literature) and one of the most remarkable men Japan has produced; he published fifty-five works in more than 180 volumes; Hirata Atsutane, one of the most learned writers of Japan (1776-1843). Kyokutei, Bakin, Tanehiko, Jippensha, Ikku, and Tmenaga Shusui are renowned as romance writers. Rai Sanyo (1780-1832) is distinguished as a historian, his two chief works being the "Nihongwai-shi" and the "Nihon seiki" which are of great value for the study of Japanese history. Another important work of the Yedo period is the "Dainihonshi", a great history in 243 volumes, written by a commission of scholars.

Restoration Period (1868-1909)

During this period a veritable passion for European learning took possession of the nation. Many young men went to Europe and America to study. Soon a group of writers gave translations and original works in response to a general demand for ideas concerning European learning, customs, law, and institutions. The most distinguished of these authors was Fukuzawa Yukichi, founder of the School of Keio-gijiku. The most noteworthy works are: "Kaikoku shimatsu" (1888) by Shimada Saburo, a collection of documents treating of the opening of the country; "Shorai no Nihon" (Japan of the Future) by Tokutomi Ichiro; commentary on the constitution by the Marquis Ito; the "Kyoikkugaku" (The Science of Education), by Nose Ei. The best known novelists are: Tsubuchi Yuzo, Sudo Nansui, Osaka Tokutaro, and, the most celebrated of all, Koda Nariyuki. Among poetic works is the "Shintaishiho", or reform of Japanese versification,

in imitation of European poetry, published by Toyama Masakatsu, in collaboration with Yatabe Ryokichi and Inoue Tetsujiro.

Painting

Among the arts painting has always held the first place in Japan. In the beginning, when relations with Corea and China were not yet established, the fine arts were wholly in a state of infancy. During the reign of Kimmei Tenno (A.D. 540) the Chinese arts were introduced. Painting and sculpture entered Japan with Buddhism and Confucianism, and the cultivation of the fine arts began. The oldest extant picture was made during the reign of the Empress Suiko (593-628) and is preserved in the temple of Horyuji, near Nara. Several pictures of the Nara period (710-784) are in the temples of Yakushiji and at Nara. The most celebrated painters of the Hei-an period (800-1186) are: Kudara no Kwanari (853) of Corean descent; the bonze Kukai of Kobo daishi a religious painter; Kose Kanoaka (885-897), founder of the most ancient Japanese school. Koseryu (Kose genre), also called the primitive or Buddhist school; Fujiwara Motomitsu (1097) founder of the Yamatoru School (Japanese genre); Toba Sojo (1053-1114), a bonze, author of the humorous genre which is called after him *Toba-e*.

During the Kamakura Period (1192-1338), in the thirteenth century, appeared a celebrated painter, a descendant of the powerful family of Fujiwara, Fujiwara Tsunetaka, who founded the Tosa School, derived from the Japanese Yamatoryu School, of which it became the principal branch. This school avoided Chinese influence, and applied itself to representing the scenes of the legends and history of Japan. In the beginning of the fifteenth century (Ashakaga Period, 1332-1603) Josetsu founded a school of painting according to the Chinese principles. Among his pupils were Sesshu, Shubun, and Kano Masanobu. Sesshu (1420-1503) is regarded as one of the greatest painters of the Chinese school. Kano Masanobu (1453-1490) gave his name to the school of Kanoryu, which proceeded from the Chinese school of Josetsu, and is subdivided into several branches. Kano Masanobu is the most famous representative of this school. At the end of the fifteenth century all Japanese painting belonged more or less to these two artistic sources, Tosa and Kano. The Tosu school represents Japanese art almost without foreign admixture; that of Kano belongs to Chinese influence.

Yedo Period (1603-1868)

Ogata Korin (1661-1716) created a manner a painting which was, so to speak, intermediary between the two schools of Kano and Tosa, uniting the decorative principles of both. The school which he founded is called by his name, Korin-ha. It was the first to employ gold and silver powder in painting. Sakai Hoitsu is the best known representative of the Korin School. Maruyama Okyo, founder of the school of this name, rejected the hitherto received principles and undertook a reform based on the observation of nature. With him idealism tended to disappear, and realism began. His

principal disciples were Sosen, Rasetsu, Genki and Sojun. About the middle of the seventeenth century, Iwasa Matabei inaugurated a new style of painting. He aimed above all at reproducing the scenes of ordinary life. It is called the popular and realistic school (Ukiyo-e). The most celebrated painter of this school was Hokusai (1760-1849), who marks the end of the evolution of Japanese independence of every school, system, and convention. Except for Kikuchi Yosai (1788-1878), who completes the list of great stylists, everything centres around Hokusai, everything is inspired by his manner and his genius. At his death an irreparable decadence began. Japan imitated, it no longer created. To-day it is in a period of transition in art as in all other things. The classic school is disappearing by degrees, and popular art is without character or brilliancy. The struggle continues between Japanese and European art. In the interest of the arts and with a view to promoting them there are three societies and five special reviews.

Ceramics

Japanese pottery dates from the remotest antiquity, but the progress of ceramics compared with the other arts was very slow. The primitive pottery of Japan had for many centuries an embryonic and barbaric character. In the thirteenth century, Karo Shirozaemon, known by the name of Toshiro, introduced the processes used in China, and introduced the first Seto workshops. The productions of Seto dominated the industry until the seventeenth century. Then appeared Ninsei, an artist of genius who was the real creator of national ceramics, and who even to-day is regarded as the greatest ceramist Japan ever produced. Through him the Chinese, Corean, and Japanese elements were blended, and from their mixture emerged a national art. In recent years the making of porcelain has undergone considerable development owing to the demand from abroad. The chief species of porcelain are: Seto (Owari), 4300 workmen, annual output 1,300,000 yen; Mino, 3800 workmen, annual output 1,000,000 yen; Arita (Saga), workmen 2000; Kutani (Kaga), 1200 workmen, output 220,000 yen; Kyomizu (Kyoto) one of the most important manufactories of Japan; Tokonami (Owari), output 320,000 yen; Tobi (Iyo), output 150,000 yen; Fujina or Izumo, output 120,000 yen; Hasami (Nagasaki), output 100,000 yen; Satsuma, output 40,000 yen, much esteemed by foreigners.

The history of the arts of Japan would fill a large volume. Sculpture, engraving, carving, bronze, lacquer-work, enamels, metal-work, alloy, are the principle branches in which the Japanese have excelled and produced truly remarkable work.

FINANCES

From the earliest times large storehouses (*okura*) were built to receive the objects sent as presents or taxes to the court. At the reform of Taikwa (645) a ministry was constituted having at its head an *Okura-kyo* (minister of finance). He was charged with the collection of duties, the distribution of pensions, the verification of measure-

ments, etc. In 1885 the name *Okura-sho* was given to the ministry of finance. The minister of finance is charged with the resources of the State. He has under his jurisdiction three bureaus, that of accounts (*Shukeikyoku*), that of taxes (*Shuzeikyoku*), and that of administration of finances (*Rizaiktoku*). The budget of receipts and expenses is drawn up yearly. Each minister prepares his own according to the needs of his department. These private budgets are arranged by the minister of finance, while at the same time means are devised to meet the expenses. This project is discussed at a council of the ministers, afterwards submitted to the Chamber of Deputies, who discuss it and give a decision, then to the Chamber of Peers who reject or approve it. If the new budget is rejected, that of the previous year is adhered to. Lastly, the budget must always be submitted to the sanction of the emperor.

The annual average of the ordinary and extraordinary expenses of the Japanese army and navy in 1894-95, and during the years which followed the Treaty of Shimonoseki, was 104,524,000 yen; in 1908-09 they rose to 188,537,365 yen.

Public Debt

The amount of the public debt on 31 December, 1907, was 2,276,346,452 yen; interior debt, 1,110,645,228 yen; foreign debt 1,165,701,224 yen. The annual interest of the interior debt is 5%, that of the foreign debt 4%, 4 1/2%, and 5%.

Money and Bank Bills

The ingots of gold, silver, and brass received at the treasury since the foundation in 1870 equal the sum of 1,058,550,262 yen. Money put in circulation since that time, 707,810,261 yen. Amount of money in country, 31 December, 1907, 167,551,001 yen; amount of paper money, 369,984,111 yen.

Banks

Before the Restoration in 1868 there did not exist a single Japanese bank properly so called. The new Government soon grasped the importance of this institution for the development of commerce and industry. Commissions were sent abroad to study the various banking systems in use and to adopt that best suited to the country. Consequently a law of November, 1872, inaugurated in Japan the system of the plurality of banks of issue. But the results obtained having been purely negative, the system was modified in a more liberal sense (August, 1897 [sic; 1879?]). A large number of new banks were then founded, but this time there resulted such a fever of speculation, such a decline in paper money and government revenues, that the banks of issue had to be radically changed. In 1882 it was decided that in the future there should be no more banks of issue and that a central bank, the Bank of Japan, should alone have the privilege. The Bank of Japan was then charged with withdrawing from circulation by degrees the notes issued by the State and the 143 national banks in existence in 1882. The latter were transformed by degrees into ordinary banks, and in 1889 only one national bank

remained, that of Japan, which to-day centralizes all Japanese fiduciary circulation. Founded in 1882 with a capital of 10,000,000 yen, it has increased this to 30,000,000 and has a reserve fund of 21,500,000 yen. It is authorized to issue notes whose value it holds in reserve in gold and silver money and in ingots; moreover, it has the privilege of putting into circulation as much as 120,000,000 yen.

Japanese fiduciary circulation by decennial periods: 1879, 55,500,000; 1880, 159,366,000; 1890, 162,015,000; 1900, 228,570,000; 1907, 369,884,000 yen. The number of special banks, ordinary banks, and savings banks at present equals 2194, with 2367 branches. Together they have paid-up capital of 444,204,000 yen; reserve funds, 139,630,000 yen; net benefits, 86,712,000; dividends, 34,893 yen. The most important ordinary banks are Mitsui, Mitsubishi, the Third, the Fifteenth, and the One Hundredth bank. In 1893 there were in Japan only 732 establishments of credit, possessing a paid-up capital of 84,512,848 yen. In the space of fourteen years the number of these establishments has increased by 1432, and their paid-up capital equals 2,601,392,000 yen. In 1907 deposits alone reached 80,484,648,000 yen, and sums withdrawn, 80,555,844,000 yen. In fourteen years business has increased 39 times. Finally, in the course of 1907, the amount of sums deposited in banks, by the State and private individuals, equalled 27,237,717,000 yen.

Bank Interest

In 1900 the interest on fixed deposits varied from 5% to 6%. For ten years it has oscillated between 5% and 7%. Banks lend only at 12%. The discount is 3%.

BUSINESS CORPORATIONS

Until 1892 there was no law regulating the establishment and workings of companies collective in action and name. In 1893 the chapter of the new business code concerning companies was rendered obligatory. In consequence every business association had to secure from the Government the necessary authorization to form and commence operations. The code having been modified in 1899, necessary authorization was suppressed and companies might be freely formed under condition of conformity with the revised code. At the end of 1894 the nominal capital of all the companies formed since 1875 did not exceed 245,251,624 yen. Immediately after the war with China, and in the single year of 1896, 1178 new companies were formed representing a capital of 334,421,463 yen.

On 31 Dec., 1907, the reserve funds of all these companies equalled 254,992,738 yen. In fourteen years the number of companies has doubled, and their capital has been trebled.

Insurance Companies

In 1881 there was not a single insurance company in Japan constituted after the European model. An attempt at maritime insurance in 1881 was without success, as

there was no law regulating this sort of enterprise. But the publication of a new code definitively fixed the legislation in this respect. Since that time (1893) the insurance companies have greatly developed.

Electric Light Companies (31 Dec., 1907)

Number of Companies, 84; stockholders, 14,105; length of lines, 1016 ri (2468 miles); length of wires, 3750 ri; private houses lighted with electricity, 207,587; electric lamps, 836,640; public lamps in cities, 18,650; receipts, 8,308,061 yen; expenses, 4,928,383 yen; net profit, 3,894,200 yen. In 1897 there were 41 companies; 29,701 private houses lighted; public lamps, 2335; net profit, 614,999 yen.

Clearing-houses

In 1896 there were two clearing-houses organized according to the principles operating in the United States, one at Tokio, the other at Osaka. During that year (1896) the two establishments liquidated 647,239 notes, representing a value of 538,834,000 yen. In 1907, four new clearing-houses were in operation at Kyoto, Yokohama, Kobe, and Nagasaki. The liquidation operations dealt with 6,948,485 notes, representing a value of 7,124,059,761 yen. On 31 March, 1908, the number of exchanges, 50; stockholders, 8448; brokers, 971; authorized capital, 12,851,456 yen; paid-up capital, 10,291,000 yen. Receipts 7,015,388 yen; expenses, 4,448,531 yen. Net profit, 2,566,857 yen.

COMMERCE

Foreign

In 1907 the foreign commerce of Japan was twenty times greater than in 1875, and since the Russo-Japanese war, three years ago, it has increased one-third. Average per person: 1875, 1.43 yen; in 1907, 18 yen.

Japan also maintains commercial relations with the following countries: the French colonies of India, the Russian colonies of Asia, Siam, Switzerland, Russia, Austria-Hungary, Dutch Indies, Sweden, Norway, Spain, Turkey, Denmark, Portugal, Mexico, Peru, Egypt, the Philippines, Hawaii, etc.

The greatest amount of Japanese merchandise has been exported to China and the United States, while British India, England, and Germany have profited most by the new order of things in Japan. Within thirty-four years, that is since 1873, Japan's export trade has increased 23 times.

Chief Exports and Imports with Their Value in Yen

Exports: raw silk, silk waste, handkerchiefs, pongees, 158,876,000 yen; cottons, cloths, napkins, 48,986,000 yen; chemical matches, 9,446,000 yen; fancy floor mattings, 5,743,000 yen; porcelains and crockery, 7,216,000 yen; lacquered articles, 1,643,000 yen; plaited work, 5,001,000 yen; umbrellas (European shape), 1,613,000 yen; cigarettes, 2,055,000 yen; tea, 12,618,000 yen; rice, 3,664,000 yen; dried cuttle fish, 2,401,000 yen;

sea-weed, 709,000 yen; fish oil, 2,975,000 yen; camphor, 5,026,000 yen; crude and refined copper, 29,262,000 yen; oil, 19,052,000 yen; vegetable wax, 1,070,000 yen. Imports: raw and spun cotton, prints, velvets, 131,718,000 yen; woolens, muslin, cloth, 24,878,000 yen; hemp, 3,569,000 yen; machines, 27,699,000 yen; locomotives and wagons, 29,933,000 yen; iron bars, 26,445,000 yen; rails, 3,828,000 yen; iron nails, iron, and steel, 11,172,000 yen; dry indigo, 5,876,000 yen; paper, 7,436,000 yen; sole leather, 3,933,000 yen; brown and white sugar, 19,864,000 yen; rice, 30,931,000 yen; beans, lentils, 10,405,000 yen; meal, 6,212,000 yen; petroleum, 14,324,000 yen; tortoise shell, 21,042,000 yen.

The chief markets for silk are the United States, France, and Italy; for cotton and copper, China. In 1907 there entered the Japanese ports 10,932 steam ships, tonnage, 19,801,425 tons; Japanese steamships, 6734 (8,770,491 tons); Chinese steamers, 52 (57,659 tons); English steamers, 2269 (6,267,638 tons); German steamers, 673 (1,840,000 tons); United States steamers, 377 (1,618,462 tons); Norwegian steamers, 348 (386,311 tons); Russian steamers, 172 (324,050 tons); Austrian steamers, 140 (154,425 tons); Danish steamers, 24 (64,753 tons); other nationalities, 143 (317,636 tons).

Domestic Commerce

Museums. Japan possesses eleven commercial museums, two of which (those of the Government and the industrial association) are at Tokio; the others are at Sapporo, Osaka, Kobe, Nagasaki, Miye, Nagoya, Gifu, Kanazawa, and Toyama. At the end of March, 1906, the Government Museum at Tokio contained 61,670 specimens, 31,674 of which were of foreign origin. Visitors in 1907, 57,111, of whom 1625 were foreigners.

Chambers of Commerce

On 31 March, 1908, there were 386 chambers of commerce. Ordinary councillors, 1589; special councillors, 250; number of matters regulated during the year, 11,651; expenses 231,200 yen. Two commercial agencies have been founded, one at Tokio in 1896, the other at Osaka in 1901. The number of adherents (banks, firms, etc.) is 1395 for the first; 1308 for the second. There are also four large merchandise warehouses, two at Tokio, one at Osaka, and one at Yokohama. Number of invention patents issued in 1907, 3155; number of designs patented, 614; competitions, 262; objects exhibited, 310,362; contestants, 261,396; awards 55,741; expenses 149,924 yen.

COMMUNICATIONS

Roads

Under the Tokugawa there were four chief roads (*go-kaido*); they went from Nihon-bashi (Bridge of Japan) to Yedo, and linked all the provinces with the capital of the shogun. These ancient roads are still in existence, but since the Restoration, the roads have been divided into national, departmental, and parochial. The State defrays the expense of the construction and maintenance of a national road, the departments that

of the departmental roads, and the departments and towns that of the parochial roads. All the chief towns of the prefectures, the cities, and the villages are connected by roads, generally in good condition, and suitable for carriages.

Rivers, Canals

The rivers are numerous, but for the most part are only torrents, little suited for navigation; they are used chiefly for rafting. Numerous irrigation canals have been dug, some of which are reserved for the transportation of merchandise. The amount of the expenses for means of communication, roads, rivers, canals, highways of all kinds, construction or repair of bridges, harbours, bays, piers, dams, ponds, viaducts, in 1907 was 28,872,333 yen; 3,231,791 yen being borne by the state, the rest, 25,640,542 yen, by the local bodies. Damage caused by floods, 21,473,359; by typhoons, 303,622; by tidal waves, 80,867 yen.

Railroads

In 1872, the first railroad line was begun by the government, between Tokio and Yokohama, a distance of eighteen miles; in 1882, the length of the lines established was 114 miles. As early as 1883, companies were founded to exploit this industry; in 1906 the government lines had been extended by 1531 miles, those of the companies, 3253 miles. In the same year (1906) the Government decreed national ownership of the railways, since which time the lines of eighteen large private companies have been purchased, while twenty smaller companies have gone out of existence. On 31 March, 1909, the total length of the Government lines was 4712 miles; that of independent companies, 446 miles. Lines at present in course of construction, 1037 miles. The railways have cost the State: old lines, 168,250,000 yen; purchased lines, 476,318,800 yen; lines building, 18,500,000 yen; in all, 663,068,800 yen. Receipts, 81,995,171 yen; expenses 45,262,927 yen; net profit, 36,732,244 yen. Locomotives, 2074; passenger carriages, 5780; number of travellers, 143,260,792; tons of merchandise, 24,092,066. railway accidents, dead, 1664; injured 2321. In 1883 the net railway profit equalled 943,846; in 1893, 5,073,929 yen.

Electric Car Companies

Electric tramways appeared in Japan in 1895. On 31 March, 1908, there were eighteen companies. Two of these have not made public their accounts. The statements of the sixteen others are as follows: authorized capital, 77,824,673; net profit, 4,130,593 yen. Vehicles drawn by men, for passengers (*jinricksha*), 161,858; for merchandise, 1,488,494. Total of all vehicles in the country, 1,951,892. The chief transportation company (*Naikaku Tsuun Kwaisha*) in the interior of the country has transported 208,447,901 kwan; receipts, 6,181,277 yen.

Postal Service, Telegraph, and Telephone

Postal Service

There was a postal service under the shogun, but it was defective, costly, and slow. In 1872 the government adopted the system in use in the United States. At first established between Tokio, Osaka, Kyoto, and Yokohama, the next year it was extended throughout the country. The tax varied according to the distance, but later it was made uniform. However, England maintained its three stations at Yokohama, Nagasaki, and Kobe until 1879. Since then both foreign and domestic postal service is carried on by Japanese. In 1908 there were 670 post-office stations; 55,197 post-boxes; postal employés, 35,409; postal articles received and distributed within the country, 1,377,635,468; sent abroad, 25,792,382; received from abroad, 24,552,407. International money orders sent, 15,517; value, 563,215 yen. International money orders received, 148,742; value, 11,615,851 yen.

Telegraph

As early as 1869 the government planned to adopt the telegraph. It did so in 1872. In 1879 Japan joined the International Telegraphic Union. At present a telegraphic network extends throughout the country and submarine cables connect Japan with all the great centres of the world. As early as 1900 experiments were made with a view to installing wireless telegraphy on all warships, and at present all the ships are so provided. Communications have been established between Nagasaki and Kelun (Formosa). On 31 March, 1908 the length of telegraph lines was 8692 ri; length of wires, 38,249 ri; public stations, 2815; telegraphs sent with the country, 26,113,174; abroad, 707,598; received from abroad, 873,639.

Telephone

The telephone was brought to Japan in 1887, and in the same year all the government offices were thus connected. The telephone went into general use in 1896. At present 66 towns are provided with telephone connexions; 26 have an interurban connection. Public stations, 421; length of telephone lines, 2100 ri; length of wires, 27,270 ri; subscribers, 75,229. The Government has the monopoly of telephones, and bears the expense of constructing and extending all the lines.

Merchant Marine and Navigation

While the country was closed to foreigners, no Japanese could build or own a vessel capable of sailing the high seas. There was then no navigation except along the coast, and on the waters in the interior of the country. In 1868 liberty was granted to the Japanese to have vessels and navigate as they pleased. The formation of the three companies: the Mitsubishi Kisen Kwaisha (steam navigation) in 1877; the Kyodo Unyu Kwaisha (united transports) and the Osaka Shosen Kwaisha (commercial navigation) in 1882, marks the beginning of the Japanese merchant service of Japan. In 1885, after a distressing occurrence, the Mitsubishi and the Kyodo Kaisha united to form one company, Nipon Yusen Kwaisha (Japanese Mail Packet Company), and started a

new era in the merchant service. In the beginning of 1896 the Government decided to grant privileges for the construction and navigation of vessels. Twenty yen per ton capacity and five yen per horsepower unit are allowed to each ship of 700 tons and upward, built in Japanese yards and constructed of native materials. The navigation premiums vary according to the life and capacity of the vessels. The total value of grants and subsidies paid annually by the treasury to the companies and native ship owners is not less than 12,000,000 yen. At the end of 1903 there were 205 ship-yards and 32 docks. On 31 March, 1908, there were 216 ship-yards docks, building small war vessels and large merchant ships. During the war with Russia the com[anies furnished the Government 71 ships weighing 250,000 tons. Japan being a maritime country, it is natural that its merchant service and international trade should develop simultaneously and in proportion; nevertheless, the rapidity and importance of the progress made in the last fifteen years are truly extraordinary.

Japan has a great many important navigation companies. The Nippon Yusen Kwaisha has had regular service since 1896 for Europe, America, Australia, and the chief ports on the Sea of Japan. The Osaka Shosen serves the ports of China and Korea. The Toyo Kisen has a rapid service between Japan and San Francisco, the Oya Shosen between Tsuruga and Vladivostok. The chief docks and coaling stations are those of Hakodate, Uruga, Yokohama, Osaka, Kobe, and Nagasaki. Not including Formosa, there are twenty-eight ports of commerce, of which the most important are Yokohama, Osaka, Kobe, Moji, Nagasaki, Yokkaichi, Shimonoseki, Otura, Kuchinotsu, Wakamatsu, and Hakodate. For Yokohama and Kobe, the two chief ports of Japan, the maritime trade for 1895 equalled 242,293,844 yen; in 1907, 652,713,183 yen. Lighthouses, 140; signal lights, 19; buoys, 406; post indicators, 77; bell buoys, 4; boats, 624,728. Lawsuits, 433; ships lost, 196; salvages, 728; persons shipwrecked, 461; died at sea, 277; disappeared, 154.

ECONOMICS

Agriculture

The total area of Japan (not including Formosa and Sakhalin) is 38,555,229 cho, divided as follows: (1) land belonging to the Crown, the State, the commons, etc., 21,394,805 cho; (2) to private owners, 14,272,339 cho; (3) main roads, parks, swamps, etc, 2,888,085 cho. The total area of arable land is only 6,120,519 cho, classified as follows: rice fields, 2,748,575; drained lands, 2,296,698 cho; various crops, 1,075,246 cho; in all 15.7% of the total area of the country. The area of taxed land is 13,981,687 cho, estimated on survey as worth 1,406,267,827 yen. But at present their real value is far in excess of this estimate. According to the most recent census the total number of families is 8,725,544. Of these 3,776,416 are occupied solely with agriculture; 1,638,216 families join agriculture with other work. The nature of the soil is unfavourable for

tillage, but the Japanese have improved it by careful cultivation. In the valleys there is not a grain of earth which has not been made use of, and even the mountain sides have, by the exercise of patience, been cleared, often to a great height.

Rice, which is the basis of Japanese diet, naturally holds the first place, but that produced by the country does not supply the demand, and even when the crop has been good it is necessary to import it. The wheat crop is also far from being sufficient. Tea is an important article of commerce; however, from 1897 to 1907 the area devoted to its cultivation decreased from 58,892 cho to 50,548, and the yield from 8,471,956 kwan to 7,047,193. Sugar cane has not found favourable soil in Japan, and each year this commodity has also to be purchased abroad for large sums. By a law of March, 1904, the Government reserves to itself the monopoly of tobacco. According to this law the peasant continues to cultivate the plant as formerly. The Government buys the leaves from the cultivator, and distributes them for preparation among the state manufacturers. The products of the soil are numerous and varied; nonetheless the processes of cultivation are still primitive. That is why the Government endeavours to popularize throughout the country the scientific principles in force in the agricultural countries in Europe and America, and with this object also it has founded a school of agriculture and institutions which award premiums for success in agriculture.

Live Stock

While labouring for the development of agriculture, the Government also encourages cattle breeding. With a view to improving the breeds of cows and horses it has established state pastures in which cows and bulls are raised and placed at the disposal of breeders. Number of bullocks and cows (31 March, 1908) 1,190,373; horses and mares, 1,465,466; goats, 78,251; swine, 284,708; sheep, 2769. Number of slaughter-houses, 1111; animals slaughtered: cows, 167,458; horses, 69,268; pigs, 138,858. Number of veterinary surgeons, 4500. Value of slaughtered animals: cows, 9,901,613 yen; horses, 1,531,000 yen; pigs, 1,875,000 yen. Quantity of milk, 173,540 koku; value, 5,080,471 yen.

Forests

Japan is rich in forests. They cover an area of 22,000,000 cho, that is six-tenths of the territory of the empire. Hitherto cultivation of the forests did not make great progress, ideas on this subject being very backward, but the Government carefully elaborated a plan of reform in the forest administration. According to a law passed in 1907 the Government may use its authority to prevent the destruction and to secure the re-wooding of forests belonging to the State, to private individuals, to the Shintoist and Buddhist temples. The law also supervises and regulates the periodic felling of trees. Forests are divided into four classes: forests belonging to the State, 7,222,518 cho; to the Crown, 2,109,098. cho; to the temples, 7,991,796 cho; to private owners 4,676,688

cho. Forest products in 1907: building wood 32,236,114 yen; firewood, 24,392,836 yen. The average annual of forest products varied for the past ten years between 50,000,000 and 60,000,000 yen.

INDUSTRIES

Fishing

From the earliest times the fishing industry has been in a flourishing condition in Japan. Formerly fish was the sole gift made. Together with rice it forms the basis of Japanese diet, for which reason the Japanese Government has not ceased to encourage the industry of deep-sea fishing. Fishery schools have been founded, and prizes granted for fishing on the high seas; laws for the protection of fish have been for some time in force.

In 1907, 3,200,000 persons (15% of the population) were engaged in fishing or some trade connected therewith. Number of fishing boats 420,000, of which a number did not exceed 30 feet in length. It is only recently that Japan had sought a market for its fish, salt, smoked, or preserved in oil. The Japanese prepare, chiefly from herrings and sardines, a fish oil, from which the exportation in 1907 had reached a figure of 2,975,235 yen. 20,727 fish ponds in which fish are fed produced the sum of 2,805,590 yen.

Salt Pits

The area occupied by salt-works equals 8,295 cho; 16,184 boilers are used in the manufacture of salt. Product in 1907, 5,578,142 koku, valued at about 10,000,000 yen for the jobbers. A law reserves to the Government the monopoly of the sale of salt. Salt is manufactured by private citizens, the Government purchases it, and sells it again to the merchants, all at a fixed rate. 122,132 persons labour at the manufacture of salt.

Mines

Before 1868 the working of the mines was in a most rudimentary condition and their output was very mediocre. In order to improve and develop this branch of industry the Government sent for foreign engineers and utilized the mineral resources. Later on most of these miners were sold to private owners. In 1890 a law was published regarding the regimen of mines, which was replaced by another law in July, 1905. According to this new legislation those who desire to work mines are obliged to have a permit either of investigation or of exploitation to be issued by the minister of agriculture and commerce. For the administration of mines the country is divided into five large districts, each having a bureau for the inspection of mines. Japanese subjects and every civilian may acquire mining privileges. Foreigners may be admitted as members or stockholders in mining companies.

From this it will be seen that within eleven years the extent of mines with a view to exploitation has more than trebled.

The total product of the mines has more than trebled within eleven years. From 1805 to 1907 the copper output increased from 5,000,000 to 29,000,000 yen, and that of oil from 5,000,000 to 19,000,000 yen. Number of mine workers, 1898, was 132,731; in 1906, 187,922; accidents (1907): fatal, 765; serious, 426; slight, 6092.

Manufactures

Very early Japan had its industries and the traditions on this point have not been lost. Artistic bronzes, lacquers, porcelains, and paper are still among the riches and glories of this country. Nevertheless, subsequent to 1868 a transformation took place, and a new era began for Japanese industry. Formerly the work had been done by hand in the family, but now began the reign of the factory and the machine. In order to encourage private workers to use machinery, the Government itself built model workshop and manufactories. Besides, to hasten the development of the industry, the Government has often organized national expositions in the important cities of the empire, it has always taken part in foreign expositions, has instituted a bureau of industrial experiments, founded technical schools, encouraged the formation of industrial associations and sent students abroad to learn the operation of factories. It has also made special laws for the efficacious protection of industrial property.

Workshops, Factories, and Arsenals Founded by the State

Royal printing establishments, with typographical workshops and paper-mill; a mint with a branch; 5 tobacco factories; military arsenals at Tokio and Osaka; naval arsenals at Yokosuka, Kure, Sasebo, and Maizuru; marine arsenal at Tokio; powder factory at Shimose; marine preparatory schools at Takshiki, Ominato, and Mako; 1 steel foundry; two factories for the manufacture of material for telegraphs and light-houses; 13 railroad workshops, etc. Number of machines for all Government manufactories, 1075; horse and steam power, 118,353; workers, men and women, 130,545 (men, 107,776; women, 22,769). Besides these, 62,324 day labourers are also employed; average daily wages: men, 55 sen. Japanese industry began to soar at the time of the war with China. The Japanese decided to add to their characteristic of being a warlike people that of being an industrial people.

The most prosperous industries are those of silk and cotton. In 1907 the number of silk mills was 4758; besides, 392,581 families occupied with this industry. The quantity of silk thus obtained (including waste) equals 2,299,688 kwan. In 1895 it amounted to 2,299,688 kwan. Silk is the chief article of export from Japan. The following is the progress within five years. In 1901, silk tissues manufactured in Japan represented a value of 68,988,381 yen; in 1906 they rose to 88,994,617. And within eleven years the export figures have risen from 48,000,000 to 158,000,000 yen.

Cotton Industry

This also has made notable progress. From 1894 to 1906, the number of spinning mills rose from 45 to 83, with an increase of capital of 27,304,500 yen (the capital rose from 13,001,000 yen to 40,000,000 yen). The average number of spindles rose from 476,123 to 1,441,934 yen. At the same time the output of spun cotton rose from 14,000,000 yen to 53,000,000 yen; and that of woven cotton from 49,000,000 yen to 84,000,000 yen. In 1907 all the materials manufactured in Japan. silk cotton, hemp, and woollens represented a value of 222,549,995 yen.

The manufacture of *sake* (rice wine) equalled 4,405,860 koku; beer, 201,144 koku; shoyu (fish sauce), 2,074,008 koku.

Metallurgy

In this branch, despite all the efforts of the Government, the results have not fulfilled expectations. However the increase in iron and steel imports which have risen from 7,695,000 yen (1895) to 32,269,000 yen (1906) is a proof of development.

Handiwork

In 1906 the daily salary of handworkers was, for men, maximum, 96 sen; minimum sen; average 68 sen; for women, the average is 25 sen.

On the history of Japan and the situation of the country:--GRIFFIS, *The Mikado's Empire* (New York, 1890); IMPERIAL JAPANESE COMMISSION, *History of the Empire of Japan* (Chicago, 1893); Japan Year Book (Tokio, 1907); BOSQUET, *Le Japon de nos jours* (Paris, 1877); DE LA MAZELIÈRE, *Essai sur l'histoire du Japon*; PAPINOT, *Dict. d'Histoire et de Géographie du Japon* (Yokohama, 1906); ASTON, *Littérature Japonaise* (Paris, 1902); GONSE, *L'Art Japonaise* (Paris, 1885); TEISAN, *Notes sur L'Art Japonaise* (Paris, 1906); Japanese Code (Tokio, 1908); THÂRY, *La situation économique et financière du Japon* (Paris, 1907); SHIMODA, *Nihon Katei hyakkwa* (Japanese Encyclopedia) (Tokio, 1906); HANABUSA, *Nihon Teikoku nenkan* (General Statistics of the Empire of Japan) (Tokio, 31 Dec., 1908); MINISTRY OF FINANCES. *Financial and economic yearbook of Japan* (Tokio, 1908).

JUSTIN BALETTE/FRANÇOIS LIGNEUL

Karl Ernst Jarcke

Karl Ernst Jarcke

Born 10 November, 1801, at Danzig, Prussia; died 27 December, 1852, at Vienna. He belonged to a Protestant merchant family. He took up the study of jurisprudence, and became at an early age professor of criminal law at Bonn and later in Berlin. His scholarly attachments were especially revealed in his "Handbuch des gemeinen deutschen Strafrechts" (3 vols., 1827-30). Longing for faith and overcome by the conclusively and immensity of Catholic dogma, as he found it disclosed in the decrees of the Council of Trent, he embraced the Catholic Faith at Cologne in 1824. After the outbreak of the Revolution of July in Paris, he wrote an anonymous political brochure, "Die französische Revolution von 1830". It met the emphatic approval of the circle of friends of the then Crown Prince (later King Frederick William IV), which was composed of men of anti-revolutionary views, influenced by Romanticism and by Haller. Jarcke assumed the editorship of the periodical "Politische Wochenblatt", founded by these men in 1831 to promote their ideas. In 1832 Metternich called him to the State Chancery in Vienna to succeed the late Friedrich Gentz. He accepted the call, but continued an active collaborator of the weekly journal. The residence in Vienna did not satisfy him. In 1837 he broke with his Berlin friends on the subject of the "Cologne Occurrence" -- the imprisonment of the Archbishop of Cologne -- of which they approved but which he condemned. In 1838 he founded with Phillips the "Historisch-politische Blätter" to support Catholic interests in Germany. When Metternich was overthrown in 1848 Jarcke left Vienna, but returned there when order was restored, and died shortly after. His ideal was the "Germanic State" of the Middle Ages; at its head an hereditary monarch, all claims of the princes on their subjects to be regulated by treaties, the state to be occupied only with the defence in war and the administration of justice; in domestic affairs entirely unrestricted opportunities for development within the confederacy. Of "political necessities", "measures for the welfare of the state", and of a "constitution" Jarcke wished to know nothing, except perhaps of a restriction of the royal prerogative by an advisory popular assembly, which however must be representative of the professions and the interests at stake, not merely founded on a general or property qualification franchise. In his articles on the relations between Church and State he combated especially the Protestant and Liberal views. In seeming contradiction to his anti-revolutionary year of 1848, and he took a willing part in the Catholic movement which began at that time.

MARTIN SPAHN

Pauline-Marie Jaricot

Pauline-Marie Jaricot

Foundress of the Society of the Propagation of the Faith and the Association of the Living Rosary, born at Lyons, 22 July, 1799; died there, 9 January, 1862.

At the age of seventeen she began to lead a life of unusual abnegation and self-sacrifice, and on Christmas Day, 1816, took a vow perpetual virginity. In order to repair the sins of neglect and ingratitude committed against the Sacred Heart of Jesus, she established a union of prayer among pious servant girls, the members of which were known as the "Réparatrices du Sacré-Coeur de Jésus-Christ". During an extended visit to her married sister at Saint-Vallier (Drôme), she succeeded in effecting a complete transformation in the licentious lives of the numerous girls employed by her brother-in-law. It was among them and the "Réparatrices" that she first solicited offerings for the foreign missions. Her systematic organization of such collections dates back to 1819 when she asked each of her intimate friends to act as a promoter by finding ten associates willing to contribute one cent of a week to the propagation of the Faith. One out of every ten promoters gathered the collections of their fellow-promoters; through a logical extension of this system, all the offerings were ultimately remitted to one central treasurer. The Society for the Propagation of Faith at its official foundation (3 May, 1822) adopted this method, and easily triumphed over the opposition which had sought from the very start to thwart the realization of Pauline Jaricot's plans. In 1826 she founded the Association of the Living Rosary. The fifteen decades of the Rosary were divided among fifteen associates, each of whom had to recite daily only one determined decade. A second object of the new foundation was the spread of good books and articles of piety. An undertaking of Pauline's in the interest of social reform, though begun with prudence, involved her in considerable financial difficulties and ended in failure. The cause of her beatification and canonization has been introduced at Rome.

N. A. WEBER

St. Jarlath

St. Jarlath

Patron of the Archdiocese of Tuam, born in Connaught about 445; died 26 December, (*al.*, 11 Feb.), about 540. Having studied under St. Benen (Benignus), he founded a college at Cloonfush, near Tuam, which soon attracted scholars from all parts of Ireland. The fame of Cloonfush is sufficiently attested by two of its pupils, St.

Brendan of Ardfert, and St. Colman of Cloyne. But, great teacher as he was, he went, through humility, to avail himself of the instruction of St. Enda at Arran about 495. He removed to Tuam about the second decade of sixth century. St. Jarlath is included in the second order of Irish saints, and on that account he must have lived to the year 540. The "Felire" of Aengus tells us that he was noted for his fasting, watching, and mortification. Three hundred times by day and three hundred times by night did this saint bend the knee in prayer, and he was also endowed with the gift of prophecy. His feast is kept on 6 June, being the date of the translation of his relics to a church specially built in his honour, adjoining the cathedral of Tuam. His remains were encased in a silver shrine, whence the church--built in the thirteenth century--was called *Teampul na scrín*, that is the church of the shrine, a perpetual vicarage united to the prebend of Kilmainemore in 1415.

W. H. GRATTAN-FLOOD

Jaro

Jaro

Diocese in the Philippine Islands, formerly a part of the Diocese of Cebú, was made a separate diocese on 27 May, 1865. It comprises the islands of Panay and Negros; the Romblon, Palawan, and Jolo groups, and in the island of Mindanao the Provinces of Zamboanga, Cottabato, and Davao. The Catholic population is over a million. Here and there throughout the diocese are some Aglipayan schismatics, and in Mindanao and the Jolo group a large number of Mohammedans and some pagans. In 1909 there were forty-five native priests, about forty friars (Augustinians and Recollects), twenty Mill Hill missionaries, and about ten Jesuits. In Jaro itself there is a diocesan seminary in charge of the Lazarists. Eighty of its students are preparing for the priesthood and the rest for secular careers. In the city of Iloilo the Augustinians conduct a college for lay students. In the towns of Jaro, Iloilo, Zamboanga, and Dumaguete are academies for young ladies, conducted respectively by Spanish and native Sisters of Charity, native Sisters of the Holy House of Mary, and French Sisters of St. Paul of Chartres. The leper settlement of Culion, under government control, is attended by Jesuit priests and brothers, and by the Sisters of St. Paul of Chartres. The churches and parochial residences are generally large, solidly constructed stone buildings, Spanish in architecture. Many of them are very beautiful. Owing to the withdrawal of the Spanish friars at the outbreak of the revolution against Spain (1898), and the present scarcity of priests, some parishes are still vacant. The native language, spoken throughout the greater part of the diocese, is Visayan. But in the island of Mindanao the language spoken is a mixture of Spanish and several native dialects. The educated classes, besides

speaking their native dialect, also speak Spanish. Since the American occupation the school children are being taught English. The diocese is the centre of the sugar-growing industry, and the planters have always had a predilection for education and culture. Many of the most prominent Filipinos in professional, commercial, and political life are from these parts. Formerly the bishops were Spaniards.

Since 1898 an American bishop presides over the diocese. The first was the Rt. Rev. Frederick Zadok Rooker, consecrated on 14 July, 1903, at Rome; d. in 1907. Bishop Rooker was born in New York, 19 Sept., 1861, and made his first studies at Albany and at Union College; later he entered the American College at Rome, and obtained in the College of Propaganda the degrees of Doctor of Philosophy and Doctor of Theology. He was ordained to the priesthood in 1888, and acted as vice-rector of the American College from 1889 to 1894. In 1895 he became secretary of the Apostolic Delegation then recently established at Washington, and held that office until his consecration as Bishop of Jaro.

JAMES P. MCCLOSKEY

Pierre de Jarric

Pierre de Jarric

Missionary writer, born at Toulouse in 1566; d. at Saintes, 2 March, 1617. He entered the Society of Jesus, 8 December, 1582. For many years he was professor of philosophy and moral theology at Bordeaux. As his desire to belong to the missionaries of the order was not fulfilled, he wished at least to use his pen for the good of the missions. The result was a very important production for that time, "*Histoire des choses plus memorables advenues tant ez Indes orientales, que autres païs de la decouverte des Portugois*", etc. The second part appeared about 1610, the third in 1614. The work is still a useful one, gives a comprehensive picture of the missionary enterprises of the Jesuits up to 1610, chiefly within the sphere of Portuguese interests, and contains numerous valuable data on colonial history, geography, and ethnography, gathering from Spanish and Portuguese reports, and from the works of Father Luis de Guzman ("*Hist. de las Misiones que han hecho los religiosos de la Compañia de Jesús*", Alcalá, 1601, reprinted at Bilboa, 1892), and of Father Ferdinand Guerreiro ("*Relação Annal das cousas que fizeram os Padres da companhia de Jesus na India e Japão, Brazil, Angola, Cabo Verde, Guiné*", Evora, 1603, and Lisbon, 1605-07). By the dedication of the second part to Louis XIII Jarric wished to call royal attention to the colonizing and Apostolic achievements of Spain and Portugal, and thus incite the French king to similar efforts. This work was frequently reprinted and widely circulated, particularly in a Latin translation by Martino Martinez III (Cologne, 1615-16).

Sommervogel, Biblioth. de la C. de J.; Hurter, Nomenclator.

A. HUONDER

Jason

Jason

A Greek name adopted by many Jews whose Hebrew designation was Joshua (Jesus). In the Old Testament, it is applied to three or four persons connected with the period of the Machabees.

I. JASON, THE SON OF ELEAZAR

In 161 B.C., he was sent to Rome by Judas Machabeus to secure an alliance offensive and defensive (I Mach., viii, 177 sqq.).

II. JASON

The father of the Antipater who was one of the ambassadors sent by Jonathan, in 144 B.C. to renew the former treaty with the Roman (I Mach., xiv, 22). This Jason is perhaps to be identified with Jason, the son of Eleazar.

III. JASON OF CYRENE

A Jewish historian who lived in the second century B.C., and whose work is made known to us by the Second Book of Machabees, which professes to be its direct "Epitome" (II Mach., ii, 24, 27, 32). Jason's work, divided into five books, dealt, apparently in great detail, with the history of the Machabees and the wars of the Jews against Antiochus Epiphanes, and his son Eupator (II Mach., ii, 20 sqq.). In the "Epitome" five parts may still be distinguished, corresponding probably to the five books of Jason, and ending respectively with iii, 40; vii, 42; x, 9; xiii, 26; xv, 37. Jason composed his work in Greek, not long after 160 B.C., at which date the Second Book of the Machabees closes its narrative. He was thus contemporary with the events which he chronicled.

IV. JASON, THE HIGH-PRIEST

This unworthy son of Simon the Just purchased at great price from Antiochus Epiphanes the deposition of his brother Onias III from the high-priesthood. During the three years of his own pontificate, he did all in his power to corrupt the faith and morals of the youth of Jerusalem (II Mach., iv, 7-17). On the occasion of the games celebrated at Tyre, in honour of Hercules, he sent a Jewish deputation with a large sum of money which he intended to be spent on pagan sacrifices; at the request of his envoys, however, it was devoted to building galleys. He was finally supplanted by Menelaus, his own envoy to Antiochus, took refuge among the Ammonites (II Mach.,

iv, 23-26), captured Jerusalem next year, but had to soon flee again among the Ammonites, wandered in different places, and ultimately died miserably at Sparta.

FRANCIS E. GIGOT

Jassus

Jassus

A titular see of Caria, and suffragan of Aphrodisias. The city was founded by colonists from Argos at an unknown date, and was re-established after a war with the natives of Caria by the people of Miletus. It is situated at the inner end of a gulf, on an islet now connected with the continent by a narrow strip of land; according to Polybius its walls were ten stadia in circumference. Its fisheries (Strabo, XIX, ii, 21) are yet famous. During the Peloponnesian War Jassus was taken by the Lacedaemonians, and later it was captured by Philip of Macedon, who was compelled by the Romans to return it to King Ptolemy of Egypt. Numerous Greek inscriptions found among its ruins aid in the reconstruction of its domestic history. Four of its bishops are known: Themistius in 421, Flacillus in 451, David in 787, and Gregory in 878 (Lequien, "Oriens Christianus", I, 913). The see is mentioned in the "Nova Tactica", tenth century (Gelzer, "Georgii Cyprii descriptio orbis romani", nos. 340, 1464), and more recently in the "Notitiae Episcopatum". It is now called Asin-Kaleh, and is a small town in the sanjak of Mentéché and the Turkish province of Smyrna. In 1835 Texier visited it and found it completely ruined and deserted, its walls of white marble, also theatres, several burial sites, and mausolea still standing; since then the Turks have carried away most of the material for building purposes.

S. VAILHÉ

Jassy

Jassy

(Jassiensis).

Diocese in Rumania. The town of Jassy stands in a very fertile plain on the River Bahluiu, a tributary of the Pruth, and has 80,000 inhabitants. Among its most remark-

able monuments are the church of the Three Saints and the monastery of the Three Hierarchs. Although the more or less independent principality of Moldavia was established about 1348, Jassy did not become its capital until the sixteenth century, but subsequently remained such until 1859, when Wallachia was united with Moldavia to constitute the Kingdom of Rumania. Its name Jassy (Ruman, *Iasi*, pronounced *Yash*) seems to be derived from the Slavonic Askytorg, found for the first time in a Russian geography of the fourteenth century (Xénopol, "Histoire des Roumains de la Dacie trajane", I, 236, note). Often occupied by the Russians, Poles, and Austrians, it is principally celebrated for the religious conferences held there in 1642 between the Greek and the Russian Church, and for the treaty of 1792 concluded between Porte and Russia.

The Latin Diocese of Jassy dates from 27 June, 1884. Thanks to the labours of the Franciscan and Dominican friars, Urban V was able to establish in 1370 at Sereth the seat of the diocese, transferred to Bacau at the beginning of the fifteenth century. Abandoned in 1497 on account of the Moslem persecutions, the See of Bacau was re-established in 1611, and had a succession of twenty prelates until 1789, when it was suppressed. The Catholics of Moldavia were then placed under the spiritual direction of Apostolic prefects, generally chosen from the Conventuals in charge of the mission. In 1884 Leo XIII raised to a diocese the Apostolic Vicariate of Moldavia, with Jassy as residence. This see has about 90,000 Catholics, of which a few hundred are Uniats (Rumanians, Ruthenians, and even Armenians). There are 50 priests, 11 of which number are secular, and 39 regular (Conventuals and Jesuits); 28 parishes with as many churches, and 94 chapels without resident priests; 11 chapels for male or female religious; a theological seminary at Jassy and two preparatory seminaries at Jassy and at Halaucesti; several day-schools for boys and girls; two boarding-schools for girls directed at Jassy and Galatz by Sisters of Notre Dame of Sion, 143 in number. The Orthodox metropolitan see, whose bishop sometimes recognized the jurisdiction of the Bulgarian patriarchs of Achrída and sometimes that of the Greek patriarchs of Constantinople, was established about 1392. Since the proclamation of Rumanian ecclesiastical autonomy the Orthodox Bishop of Jassy depends on the metropolitan primate at Bucharest.

Jorga, *Hist. de l'Eglise roumaine*, II (Bucharest, 1909), 324, 335-7, in Romanic; Xenopol, *Hist. des Roumains de la Dacie trajane* (Paris, 1896); *Echos d'Orient* (Paris). VI. 46-50; VII, 321-8; VIII, 5-12, 72-7, 129-37; *Missiones Catholicoe* (Rome, 1907), 121-3.

S. VAILHÉ

Juan de Jauregui

Juan de Jáuregui

A Spanish painter and poet, born at Seville c. 1570, or, according to some, as late as 1583; died at Madrid c. 1640-1. His family, a northern one, was apparently of noble rank, and he was early enrolled as a knight in the Order of Calatrava. He made a sojourn in Rome, and there, judging by what he says in his "Discourse on Painting", he studied the old masters and formed his own pictorial methods. At all events, report has it that he became distinguished as a portrait painter. A current interpretation of a passage in the prologue to the "Novelas ejemplares" of Cervantes makes him out to have painted a likeness of the famous novelist. As a poet, Jáuregui began as a disciple of the Sevillian bard, Herrera. In point of fact, he adheres in many of his compositions too closely to the manner of his model, and hence a lack of originality in them. Notable among his poetic endeavors in his versions in blank verse of Tasso's "Aminta". It is deemed one of the best foreign renderings of that eminent pastoral play. First published in Italy, in 1607, it was included in the collected "Rimas" of Jáuregui put forth at Seville in 1618. In the same volume appeared various poetical pieces, among them a specimen of a translation of Lucas, and certain religious lyrics. In the earlier stages of his career, Jáuregui was a stern opponent of Gongorism and its stylistic excesses, as he clearly shows in his "Discurso poético contra el hablar culto y estilo obscuro", but he later succumbed to the influence of this noxious manner, amply illustrating its peculiarities in his poem "Orfeo" (Madrid, 1624) and even defending it in a special dissertation. Of the "Pharsalia" of Lucas, already attempted by him in his youth, he made, late in life, a complete version, which, however, was not published until 1684, and is over free in its rendering of the original.

J.D.M. FORD

Ven. Anne-Marie Javouhey

Venerable Anne-Marie Javouhey

Foundress of the Sisters of St. Joseph of Cluny, born at Chamblanc, Diocese of Dijon, 11 November, 1779; died 15 July, 1851.

In 1819 the scope of the new congregation, which had been founded for the alleviation of the miseries consequent on the Revolution, was extended to embrace foreign mission work, and in 1822 Mother Javouhey herself established a house of the sisters at Goree, in West Africa. After two years in Senegal and vicinity, she passed to the

British colony of St. Mary's, Gambia, devoting herself without stint to the victims of a pestilence then raging. On her return to Senegal she received the co-operation of the French Government in her first project for evangelizing negroes, by which a certain number were to be educated in Europe and sent back as missionaries to their people. The meagre results, due chiefly to the number of deaths caused by the difficulty of acclimatization, showed the plan to be impracticable, and it was abandoned. French Guiana, however, was to be the scene of Mother Javouhey's most important missionary work. The French Government, after unsuccessful attempts at colonizing the rich interior of this country, appealed to the foundress of the Sisters of the St. Joseph, who were already established there. Having submitted her plans for approval and received full authority, Mother Javouhey set out for Guiana in 1828, with 36 sisters and 50 emigrants, and soon had organized a self-supporting colony, in which all the useful arts were practised. In 1835, two years after her return to France, again at the request of the Government, she once more went to Guiana to take charge of 520 African negroes, formerly in government service at Cayenne, whom the authorities wished reclaimed for civilization and Christianity before being granted their freedom. Harassed as she was by opposition, and even calumny, her success with the negro colony, due largely to her personal influence with the colonists, was so great that when emancipation was granted there were no such scenes of disorder as marked similar occasions in other colonies. The majority of the blacks had become Christians and had learned the ways of civilization and the value of manual labour.

Long before this Mother Javouhey had established a leper colony on the banks of the Accarouary. Even the Indians came within the sphere of her influence; whole tribes were instructed in the Faith and asked for baptism. On her return to France, in 1843, Mother Javouhey found fresh trials awaiting her, including, ecclesiastical opposition. Nevertheless she continued to direct the establishment of new mission houses of her order in all parts of the world, in addition to over thirty foundations in the various dioceses of France. When the news of the death of "the mother of the blacks" reached French Guiana, there was general grief, and most of the inhabitants of her colonies went into mourning as for a personal bereavement. The cause of Mother Javouhey's beatification was introduced 11 February, 1908.

F. M. RUDGE

Jealousy

Jealousy

Jealousy is here taken to be synonymous with envy. It is defined to be a sorrow which one entertains at another's well-being because of a view that one's own excellence

is in consequence lessened. Its distinctive malice comes from the opposition it implies to the supreme virtue of charity. The law of love constrains us to rejoice rather than to be distressed at the good fortune of our neighbour. Besides, such an attitude is a direct contradiction of the spirit of solidarity which ought to characterize the human race and, especially, the members of the Christian community. The envious man tortures himself without cause, morbidly holding as he does, the success of another to constitute an evil for himself. The sin, in so far as it defies the great precept of charity, is in general grievous, although on account of the trifling matter involved, as well as because of the lack of deliberation, it is often reputed to be venial. Jealousy is most evil when one repines at another's spiritual good. It is then said to be a sin against the Holy Ghost. It is likewise called a capital sin because of the other vices it begets. Among its progeny St. Thomas (II-II:36) enumerates hatred, detraction, rejoicing over the misfortunes of one's fellow, and whispering. Regret at another's success is not always jealousy. The motive has to be scrutinized. If, for instance, I feel sorrow at the news of another's promotion or rise to wealth, either because I know that he does not deserve his accession of good fortune, or because I have founded reason to fear he will use it to injure me or others, my attitude, provided that there is no excess in my sentiment, is entirely rational. Then, too, it may happen that I do not, properly speaking, begrudge my neighbour his happier condition, but simply am grieved that I have not imitated him. Thus if the subject-matter be praiseworthy, I shall be not jealous but rather laudably emulous.

JOSEPH F. DELANY

St. John Vianney

St. Jean-Baptiste-Marie Vianney

Curé of Ars, born at Dardilly, near Lyons, France, on 8 May, 1786; died at Ars, 4 August, 1859; son of Matthieu Vianney and Marie Beluze.

In 1806, the curé at Ecully, M. Balley, opened a school for ecclesiastical students, and Jean-Marie was sent to him. Though he was of average intelligence and his masters never seem to have doubted his vocation, his knowledge was extremely limited, being confined to a little arithmetic, history, and geography, and he found learning, especially the study of Latin, excessively difficult. One of his fellow-students, Matthias Loras, afterwards first Bishop of Dubuque, assisted him with his Latin lessons.

But now another obstacle presented itself. Young Vianney was drawn in the conscription, the war with Spain and the urgent need of recruits having caused Napoleon to withdraw the exemption enjoyed by the ecclesiastical students in the diocese of his uncle, Cardinal Fesch. Matthieu Vianney tried unsuccessfully to procure a substitute,

so his son was obliged to go. His regiment soon received marching orders. The morning of departure, Jean-Baptiste went to church to pray, and on his return to the barracks found that his comrades had already left. He was threatened with arrest, but the recruiting captain believed his story and sent him after the troops. At nightfall he met a young man who volunteered to guide him to his fellow-soldiers, but led him to Noes, where some deserters had gathered. The mayor persuaded him to remain there, under an assumed name, as schoolmaster. After fourteen months, he was able to communicate with his family. His father was vexed to know that he was a deserter and ordered him to surrender but the matter was settled by his younger brother offering to serve in his stead and being accepted.

Jean-Baptiste now resumed his studies at Ecully. In 1812, he was sent to the seminary at Verrieres; he was so deficient in Latin as to be obliged to follow the philosophy course in French. He failed to pass the examinations for entrance to the seminary proper, but on re-examination three months later succeeded. On 13 August, 1815, he was ordained priest by Mgr. Simon, Bishop of Grenoble. His difficulties in making the preparatory studies seem to have been due to a lack of mental suppleness in dealing with theory as distinct from practice -- a lack accounted for by the meagreness of his early schooling, the advanced age at which he began to study, the fact that he was not of more than average intelligence, and that he was far advanced in spiritual science and in the practice of virtue long before he came to study it in the abstract. He was sent to Ecully as assistant to M. Balley, who had first recognized and encouraged his vocation, who urged him to persevere when the obstacles in his way seemed insurmountable, who interceded with the examiners when he failed to pass for the higher seminary, and who was his model as well as his preceptor and patron. In 1818, after the death of M. Balley, M. Vianney was made parish priest of Ars, a village not very far from Lyons. It was in the exercise of the functions of the parish priest in this remote French hamlet that as the "curé d'Ars" he became known throughout France and the Christian world. A few years after he went to Ars, he founded a sort of orphanage for destitute girls. It was called "The Providence" and was the model of similar institutions established later all over France. M. Vianney himself instructed the children of "The Providence" in the catechism, and these catechetical instructions came to be so popular that at last they were given every day in the church to large crowds. "The Providence" was the favourite work of the "curé d'Ars", but, although it was successful, it was closed in 1847, because the holy curé thought that he was not justified in maintaining it in the face of the opposition of many good people. Its closing was a very heavy trial to him.

But the chief labour of the Curé d'Ars was the direction of souls. He had not been long at Ars when people began coming to him from other parishes, then from distant

places, then from all parts of France, and finally from other countries. As early as 1835, his bishop forbade him to attend the annual retreats of the diocesan clergy because of "the souls awaiting him yonder". During the last ten years of his life, he spent from sixteen to eighteen hours a day in the confessional. His advice was sought by bishops, priests, religious, young men and women in doubt as to their vocation, sinners, persons in all sorts of difficulties and the sick. In 1855, the number of pilgrims had reached twenty thousand a year. The most distinguished persons visited Ars for the purpose of seeing the holy curé and hearing his daily instruction. The Venerable Father Colin was ordained deacon at the same time, and was his life-long friend, while Mother Marie de la Providence founded the Helpers of the Holy Souls on his advice and with his constant encouragement. His direction was characterized by common sense, remarkable insight, and supernatural knowledge. He would sometimes divine sins withheld in an imperfect confession. His instructions were simple in language, full of imagery drawn from daily life and country scenes, but breathing faith and that love of God which was his life principle and which he infused into his audience as much by his manner and appearance as by his words, for, at the last, his voice was almost inaudible.

The miracles recorded by his biographers are of three classes:

- first, the obtaining of money for his charities and food for his orphans;
- secondly, supernatural knowledge of the past and future;
- thirdly, healing the sick, especially children.

The greatest miracle of all was his life. He practised mortification from his early youth. and for forty years his food and sleep were insufficient, humanly speaking, to sustain life. And yet he laboured incessantly, with unfailing humility, gentleness, patience, and cheerfulness, until he was more than seventy-three years old.

On 3 October, 1874 Jean-Baptiste-Marie Vianney was proclaimed Venerable by Pius IX and on 8 January, 1905, he was enrolled among the Blessed. Pope Pius X proposed him as a model to the parochial clergy.

[*Note:* In 1925, Pope Pius XI canonized him. His feast is kept on 4 August.]

SUSAN T. OTTEN

St. Jean-Gabriel Perboyre

St. Jean-Gabriel Perboyre

Missionary and martyr, born at Puech, Diocese of Cahors, France, 6 January, 1802; martyred at Ou-Tchang-Fou, China, 11 September, 1840.

Jean-Gabriel was one of eight children born to Pierre Perboyre and Marie Rigal. By reason of his piety, he was the model of his companions during his childhood. While acting as companion to his younger brother, in the preparatory seminary of Moutauban, he felt the Divine call to the priesthood, and after obtaining the consent of his father to take the step, he entered the noviciate of the Congregation of the Mission, in the seminary of Montauban, December, 1818. On the feast of the Holy Innocents, 1820, he made the four vows of the Vincentians. He was raised to the priesthood, 23 September, 1825, in the chapel of the Sisters of Charity, by Bishop Dubourg, of New Orleans, and on the following day he said his first Mass. Shortly after, he was sent to the seminary of Saint-Flour to teach dogmatic theology, and two years later, he was appointed superior of the preparatory seminary of Saint-Flour. His great sanctity and marvellous success induced his superiors, in 1832, to appoint him subdirector of the novitiate in Paris. He continued in this office until 1835, when he had sought and begged and prayed for, permission to go to China, there to preach, to suffer, and to die. He left Havre on 21 March, and on 29 August, 1835, arrived at Macao, where he spent some time studying the Chinese language. On 21 December, 1835, he began his journey to Ho-Nan, the mission assigned him. In January, 1838, he was transferred to the mission of Hou-Pé, in which, as in that of Ho-Nan, he laboured zealously and with great success. In September, 1839, the persecutions against Christians broke out in Hou-Pé, and Jean-Gabriel was one of the first victims. The events leading to his death bear a striking resemblance to the Passion and Death of Christ. A neophyte, like another Judas, betrayed Jean-Gabriel for thirty ounces of silver. He was stripped of his garments and clothed with rags, bound, and dragged from tribunal to tribunal. At each trial, he was treated inhumanly, tortured both in body and in soul. Finally, he was taken to Ou-Tchang-Fou, and after unparalleled tortures, was condemned to death. The sentence was ratified by an imperial edict, and on 11 September, 1840, Jean-Gabriel was led to death with seven criminals. The holy priest was strangled to death on a cross.

[Jean-Gabriel was declared Venerable by Gregory XVI in July, 1843, beatified by Leo XIII on 9 November, 1889, and canonized by John Paul II on 2 June, 1996. His feast is celebrated on 11 September. -- *Ed.*]

JOSEPH S. GLASS

St. Jeanne de Valois

St. Jeanne de Valois

Queen and foundress of the Order of the Annonciades, b. 1464; d. at Bourges, 4 Feb., 1505. Daughter of one king and wife of another, there are perhaps few saints in the calendar who suffered greater or more bitter humiliations than did Madame Jehanne de France, the heroic woman usually known in English as St. Jane of Valois. A daughter of Louis XI by his second wife, Charlotte of Savoy, she was hated from birth by her father, partly because of her sex and partly on account of her being sickly and deformed. Sent away to be brought up by guardians in a lonely country château, and deprived not only of every advantage due to her rank, but even of common comforts and almost of necessities, it was the intense solitude and abjectness of her life that first made Jeanne turn to God for consolation, and that gave her very early a tender and practical devotion to the Blessed Virgin. She is said to have had a supernatural promise that some day she would be allowed to found a religious family in honour of Our Lady. The mysteries of the Annunciation and Incarnation, as set forth in the Angelus, were her great delight.

For political purposes of his own, Louis XI compelled Jeanne to marry Louis, Duke of Orleans, his second cousin, and heir presumptive to the throne. After her marriage, the princess suffered even more than before, for the duke hated the wife imposed upon him, and even publicly insulted her in every possible way. She, imagining virtues in her husband that did not exist, loved him tenderly, and when he got into disgrace and was imprisoned exerted herself to mitigate his sufferings and to get him freed. No sooner, however, was the duke, on the death of Charles VIII, raised to the throne of France as Louis XII, than he got his marriage with Jeanne annulled at Rome, on the ground that it was invalid, from lack of consent, and from the fact that it had never been consummated (see ALEXANDER VI); and the saint's humiliations reached their climax when she found herself, in the face of all France, an unjustly repudiated wife and queen.

But the two special virtues in which Jeanne had resolved to imitate the Blessed Virgin were silence and humility; hence, though she bravely contested the matter while it was of any use, she accepted the verdict, when it came, without a complaint, merely thanking God that it left her free to serve His Mother as she had always hoped to do, by founding an order for her service. She was made Duchess of Berry, and given that province to govern. Going to live at Bourges, its capital, she fulfilled all her duties as ruler with strict conscientiousness and tender care for her subjects' welfare. In 1500, in conjunction with her Franciscan director, Gilbert Nicolas, Jeanne founded the Order

of the Annonciades, an order for prayer and penance, whose chief rule was to imitate the virtues of Mary, as shown in the Gospels. The rejected queen found happiness at last in devoting herself to this work; and towards the end of her life, she took the vows herself, gave up her wedding ring, which she had hitherto worn, and wore the habit under her clothes. In spite of bad health and constant suffering, she had done much bodily penance all her life, besides giving many hours to prayer. Up to her death she prayed incessantly for her heartless husband, and left as a legacy to her order the duty of constant prayer for his soul as well as her father's and brother's.

Jeanne died as she had lived, and was lamented by her spiritual daughters and all her people. Many miracles, especially of healing, followed her death. In 1514, Leo X allowed the Annonciades to honour her by a special office. Benedict XIV pronounced her Blessed, and extended her cult throughout France; but, though the process of canonization had been introduced in 1614, owing to various delays and hindrances, she has never been actually canonized, though universally known as a saint.

F.M. CAPES

Edmond Jeurat

Edmond Jeurat

(EDME JEAURAT)

French engraver, b. at Vermenton, near Auxerre, 1688; d. at Paris, 1738. He was the elder brother of Etienne Jeurat, the painter, and the son of an engraver or worker in metal, who on a visit to Paris took his eldest boy with him, and apprenticed him to Bernard Picart. Here Edmond spent many years, and when he left his master's studio he wandered away to Holland, and for a few years studied the art of the Dutch painters, earning his living by engraving a few plates after the chief paintings in Amsterdam and The Hague. On returning to Paris he came into contact with his younger brother whom he had not seen for many years, and employed himself in engraving Etienne's paintings, quickly acquiring celerity in execution and a considerable notoriety for accurate and delightful work. He was employed by Monsieur de Crozat to engrave the pictures for his famous collection. In Paris he married the sister of the artist Le Clerc, and many of his engravings represented the religious pictures painted by his brother-in-law, La Clerc the younger. He had two sons, one Nicholas Henry, a painter, usually known as Jeurat de Bertry or Berty, the other S ebastien, who devoted himself to science. There is a fine collection of his engravings in the British Museum, London, and they can also be studied in the Biblioth eque Nationale in Paris. His finest work is

probably "Achilles discovered among the Daughters of Lycomedes", dated 1713, and there are also engravings by him from works by Poussin, Veronese, and Watteau.

Descamps, *La Vie des Peintres* (Paris, 1753); Le Carpentier, *Galerie des Peintres CÉlèbres* (Rouen, 1815); De Crozat, *Receuil d'Etampes* (Paris, 1736); Mariette, *Abece-dario* (Paris, 1746); Dussieux, *Les Artistes français à l'Etranger* (Paris, 1856).

GEORGE CHARLES WILLIAMSON

Jedburgh

Jedburgh

(Eighty-two different spellings of the name are given in the "Origines Parochiales Scotiæ").

Augustinian abbey, in the town of the same name (capital of Roxburghshire, Scotland), established as a priory by David I, King of Scots, in 1118, and colonized by Canons Regular of St. Augustine from the Abbey of St-Quentin, at Beauvais, France. Fordun gives 1147 as the year of foundation, but this seems to have been the date of the erection of the priory into an abbey, when prior Osbert (styled in the Melrose chronicle "primus abbas de Geddeworth") was raised to the abbatial dignity. Jedburgh soon became one of the greatest Scottish monasteries, deriving importance from its proximity to the castle (now entirely destroyed), which was the favourite residence of many of the Scottish kings. Lands, churches, houses, and valuable fisheries, on both sides of the border, were bestowed on the abbey by David I, Malcolm IV, William the Lion, and other royal and noble benefactors; and Alexander III chose to be married in the abbey church to Yolande de Dreux in 1285, by which year the monastic buildings, including the great church, were probably complete.

An opulent abbey so near the English border as Jedburgh was sure to suffer much in the constant wars between England and Scotland. About 1300 the monastery became uninhabitable, owing to repeated attacks made on it, and the community was dispersed. Later on it recovered its prosperity for a time, but in the century and a half preceding the Reformation it was devastated, plundered, and occasionally set on fire, at least four times by the invading English. In 1559 (John Horne being abbot) the abbey was suppressed, and its possessions confiscated by the Crown. A Protestant church was afterwards constructed within the nave and used until 1875, when a new church was built by the Marquess of Lothian, whose family has possessed the lordship of Jedburgh continuously since 1622. Practically the whole of the domestic buildings of Jedburgh Abbey have disappeared; but the magnificent church is still wonderfully entire. The oldest part is the early Norman choir, of which the two western bays remain; and the nave, 129 feet long, is a very stately and impressive example of Early English work.

The decorated north transept (fourteenth century) is the burial-place of the Kers of Fernihurst, now represented by the Marquess of Lothian. The massive central tower is still quite perfect. The total length of the church (inside) is 218 feet.

Shairp (1874); Gordon, *Monasticon*, I (Glasgow, 1868), 249-258; Morton, *Monastic Annals of Teviotdale* (Edinburgh, 1832); Jeffrey, *History and Antiquities of Roxburghshire* (4 vols., 1857-64); Wyntoun, *Orygynale Cronykil of Scotland* (Edinburgh, 1872-79).

D.O. HUNTER-BLAIR

Jehovah (Yahweh)

Jehovah (Yahweh)

The proper name of God in the Old Testament; hence the Jews called it *the name* by excellence, the great name, the only name, the glorious and terrible name, the hidden and mysterious name, the name of the substance, the proper name, and most frequently *shem hammephorash*, i.e. the explicit or the separated name, though the precise meaning of this last expression is a matter of discussion (cf. Buxtorf, "Lexicon", Basle, 1639, col. 2432 sqq.).

Jehovah occurs more frequently than any other Divine name. The Concordances of Furst ("Vet. Test. Concordantiae", Leipzig, 1840) and Mandelkern ("Vet. Test. Concordantiae", Leipzig, 1896) do not exactly agree as to the number of its occurrences; but in round numbers it is found in the Old Testament 6000 times, either alone or in conjunction with another Divine name. The Septuagint and the Vulgate render the name generally by "Lord" (*Kyrios, Dominus*), a translation of Adonai—usually substituted for Jehovah in reading.

I. PRONUNCIATION OF JEHOVAH

The Fathers and the Rabbinic writers agree in representing Jehovah as an ineffable name. As to the Fathers, we only need draw attention to the following expressions: *onoma arreton, aphraston, alekton, apthegkton, anekphoneton, aporreton kai hrethenai me dynamenon, mystikon*. Leusden could not induce a certain Jew, in spite of his poverty, to pronounce the real name of God, though he held out the most alluring promises. The Jew's compliance with Leusden's wishes would not indeed have been of any real advantage to the latter; for the modern Jews are as uncertain of the real pronunciation of the Sacred name as their Christian contemporaries. According to a Rabbinic tradition the real pronunciation of Jehovah ceased to be used at the time of

Simeon the Just, who was, according to Maimonides, a contemporary of Alexander the Great. At any rate, it appears that the name was no longer pronounced after the destruction of the Temple. The Mishna refers to our question more than once: Berachoth, ix, 5, allows the use of the Divine name by way of salutation; in Sanhedrin, x, 1, Abba Shaul refuses any share in the future world to those who pronounce it as it is written; according to Themid, vii, 2, the priests in the Temple (or perhaps in Jerusalem) might employ the true Divine name, while the priests in the country (outside Jerusalem) had to be contented with the name Adonai; according to Maimonides ("More Neb.", i, 61, and "Yad chasaka", xiv, 10) the true Divine name was used only by the priests in the sanctuary who imparted the blessing, and by the high-priest on the Day of Atonement. Phil ["De mut. nom.", n. 2 (ed. Marg., i, 580); "Vita Mos.", iii, 25 (ii, 166)] seems to maintain that even on these occasions the priests had to speak in a low voice. Thus far we have followed the post-Christian Jewish tradition concerning the attitude of the Jews before Simeon the Just.

As to the earlier tradition, Josephus (Antiq., II, xii, 4) declares that he is not allowed to treat of the Divine name; in another place (Antiq., XII, v, 5) he says that the Samaritans erected on Mt. Garizim an *anonymon ieron*. This extreme veneration for the Divine name must have generally prevailed at the time when the Septuagint version was made, for the translators always substitute *Kyrios* (Lord) for Jehovah. Ecclus., xxiii, 10, appears to prohibit only a wanton use of the Divine name, though it cannot be denied that Jehovah is not employed as frequently in the more recent canonical books of the Old Testament as in the older books. It would be hard to determine at what time this reverence for the Divine name originated among the Hebrews. Rabbinic writers derive the prohibition of pronouncing the *Tetragrammaton*, as the name of Jehovah is called, from Lev., xxiv, 16: "And he that blasphemeth the name of the Lord, dying let him die". The Hebrew participle *noqedh*, here rendered "blasphemeth", is translated *honomazon* in the Septuagint, and appears to have the meaning "to determine", "to denote" (by means of its proper vowels) in Gen., xxx, 28; Num., i, 17; Is., lxii, 2. Still, the context of Lev., xxiv, 16 (cf. verses 11 and 15), favours the meaning "to blaspheme". Rabbinic exegetes derive the prohibition also from Ex., iii, 15; but this argument cannot stand the test of the laws of sober hermeneutics (cf. Drusius, "Tetragrammaton", 8-10, in "Critici Sacri", Amsterdam, 1698, I, p. ii, col. 339-42; "De nomine divino", *ibid.*, 512-16; Drach, "Harmonie entre l'Eglise et la Synagogue", I, Paris, 1844, pp. 350-53, and Note 30, pp. 512-16). What has been said explains the so-called *qeri perpetuum*, according to which the consonants of Jehovah are always accompanied in the Hebrew text by the vowels of Adonai except in the cases in which Adonai stands in apposition to Jehovah: in these cases the vowels of Elohim are substituted. The use of a simple shewa in the first syllable of Jehovah, instead of the compound shewa in the corresponding

syllable of Adonai and Elohim, is required by the rules of Hebrew grammar governing the use of shewa. Hence the question: What are the true vowels of the word Jehovah?

It has been maintained by some recent scholars that the word Jehovah dates only from the year 1520 (cf. Hastings, "Dictionary of the Bible", II, 1899, p. 199; Gesenius-Buhl, "Handwörterbuch", 13th ed., 1899, p. 311). Drusius (loc. cit., 344) represents Peter Galatinus as the inventor of the word Jehovah, and Fagius as its propagator in the world of scholars and commentators. But the writers of the sixteenth century, Catholic and Protestant (e.g. Cajetan and Théodore de Bèze), are perfectly familiar with the word. Galatinus himself ("Areana cathol. veritatis", I, Bari, 1516, a, p. 77) represents the form as known and received in his time. Besides, Drusius (loc. cit., 351) discovered it in Porchetus, a theologian of the fourteenth century. Finally, the word is found even in the "Pugio fidei" of Raymund Martin, a work written about 1270 (ed. Paris, 1651, pt. III, dist. ii, cap. iii, p. 448, and Note, p. 745). Probably the introduction of the name Jehovah antedates even R. Martin.

No wonder then that this form has been regarded as the true pronunciation of the Divine name by such scholars as Michaelis ("Supplementa ad lexica hebraica", I, 1792, p. 524), Drach (loc. cit., I, 469-98), Stier (Lehrgebäude der hebr. Sprache, 327), and others.

- Jehovah is composed of the abbreviated forms of the imperfect, the participle, and the perfect of the Hebrew verb "to be" (*ye=yehi; ho=howeh; wa=hawah*). According to this explanation, the meaning of Jehovah would be "he who will be, is, and has been". But such a word-formation has no analogy in the Hebrew language.
- The abbreviated form *Jeho* supposes the full form Jehovah. But the form Jehovah cannot account for the abbreviations *Jahu* and *Jah*, while the abbreviation *Jeho* may be derived from another word.
- The Divine name is said to be paraphrased in Apoc., i, 4, and iv, 8, by the expression *ho on kai ho en kai ho erchomenos*, in which *ho erchomenos* is regarded as equivalent to *ho eromenos*, "the one that will be"; but it really means "the coming one", so that after the coming of the Lord, Apoc., xi, 17, retains only *ho on kai ho en*.
- the comparison of Jehovah with the Latin *Jupiter, Jovis*. But it wholly neglects the fuller forms of the Latin names *Diespiter, Diovis*. Any connection of Jehovah with the Egyptian Divine name consisting of the seven Greek vowels has been rejected by Hengstenberg (Beiträge zur Einleitung ins Alte Testament, II, 204 sqq.) and Tholuck (Vermischte Schriften, I, 349 sqq.).

To take up the ancient writers:

- Diodorus Siculus writes Jao (I, 94);
- Irenaeus ("Adv. Haer.", II, xxxv, 3, in P. G., VII, col. 840), Jaoth;
- the Valentinian heretics (Ir., "Adv. Haer.", I, iv, 1, in P.G., VII, col. 481), Jao;
- Clement of Alexandria ("Strom.", V, 6, in P.G., IX, col. 60), Jaou;
- Origin ("in Joh.", II, 1, in P.G., XIV, col. 105), Jao;
- Porphyry (Eus., "Praep. evang", I, ix, in P.G., XXI, col. 72), Jeuo;
- Epiphanius ("Adv. Haer.", I, iii, 40, in P.G., XLI, col. 685), Ja or Jabe;
- Pseudo-Jerome ("Breviarium in Pss.", in P.L., XXVI, 828), Jaho;
- the Samaritans (Theodoret, in "Ex. quaest.", xv, in P. G., LXXX, col. 244), Jabe;
- James of Edessa (cf. Lamy, "La science catholique", 1891, p. 196), Jehjeh;
- Jerome ("Ep. xxv ad Marcell.", in P. L., XXII, col. 429) speaks of certain ignorant Greek writers who transcribed the Hebrew Divine name II I II I.

The judicious reader will perceive that the Samaritan pronunciation *Jabe* probably approaches the real sound of the Divine name closest; the other early writers transmit only abbreviations or corruptions of the sacred name. Inserting the vowels of Jabe into the original Hebrew consonant text, we obtain the form Jahveh (Yahweh), which has been generally accepted by modern scholars as the true pronunciation of the Divine name. It is not merely closely connected with the pronunciation of the ancient synagogue by means of the Samaritan tradition, but it also allows the legitimate derivation of all the abbreviations of the sacred name in the Old Testament.

II. MEANING OF THE DIVINE NAME

Jahveh (Yahweh) is one of the archaic Hebrew nouns, such as Jacob, Joseph, Israel, etc. (cf. Ewald, "Lehrbuch der hebr. Sprache", 7th ed., 1863, p. 664), derived from the third person imperfect in such a way as to attribute to a person or a thing the action of the quality expressed by the verb after the manner of a verbal adjective or a participle. Furst has collected most of these nouns, and calls the form *forma participialis imperfectiva*. As the Divine name is an imperfect form of the archaic Hebrew verb "to be", Jahveh means "He Who is", Whose characteristic note consists in being, or *The Being* simply.

Here we are confronted with the question, whether Jahveh is the imperfect *hiphil* or the imperfect *qal*. Calmet and Le Clere believe that the Divine name is a *hiphil* form; hence it signifies, according to Schrader (*Die Keilinschriften und das Alte Testament*, 2nd ed., p. 25), He Who brings into existence, the Creator; and according to Lagarde (*Psalterium Hieronymi*, 153), He Who causes to arrive, Who realizes His promises, the God of Providence. But this opinion is not in keeping with Ex., iii, 14, nor is there any trace in Hebrew of a *hiphil* form of the verb meaning "to be"; moreover, this *hiphil* form is supplied in the cognate languages by the *pi'el* form, except in Syriac where the *hiphil* is rare and of late occurrence.

On the other hand, Jehveh may be an imperfect *qal* from a grammatical point of view, and the traditional exegesis of Ex., iii, 6-16, seems to necessitate the form Jahveh. Moses asks God: "If they should say to me: What is his [God's] name? What shall I say to them?" In reply, God returns three several times to the determination of His name. First, He uses the first person imperfect of the Hebrew verb "to be"; here the Vulgate, the Septuagint, Aquila, Theodotion, and the Arabic version suppose that God uses the imperfect *qal*; only the Targums of Jonathan and of Jerusalem imply the imperfect *hiphil*. Hence we have the renderings: "I am who am" (Vulg.), "I am who is" (Sept.), "I shall be {who} shall be" (Aquila, Theodotion), "the Eternal who does not cease" (Ar.); only the above-mentioned Targums see any reference to the creation of the world. The second time, God uses again the first person imperfect of the Hebrew verb "to be"; here the Syriac, the Samaritan, the Persian versions, and the Targums of Onkelos and Jerusalem retain the Hebrew word, so that one cannot tell whether they regard the imperfect as a *qal* or a *hiphil* form; the Arabic version omits the whole clause; but the Septuagint, the Vulgate, and the Targum of Jonathan suppose here the imperfect *qal*: "He Who Is, hath sent me to you" instead of "I Am, hath sent me to you: (Vulg.); " *ho on* sent me to you" (Sept.); "I am who am, and who shall be, hath sent me to you" (Targ. Jon.). Finally, the third time, God uses the third person of the imperfect, or the form of the sacred name itself; here the Samaritan version and the Targum of Onkelos retain the Hebrew form; the Septuagint, the Vulgate, and the Syriac version render "Lord", though, according to the analogy of the former two passages, they should have translated, "He Is, the God of your fathers, . . . hath sent me to you"; the Arabic version substitutes "God". Classical exegesis, therefore, regards Jahveh as the imperfect *qal* of the Hebrew verb "to be".

Here another question presents itself: Is the being predicated of God in His name, the metaphysical being denoting nothing but existence itself, or is it an historical being, a passing manifestation of God in time? Most Protestant writers regard the being implied in the name Jahveh as an historical one, though some do not wholly exclude such metaphysical ideas as God's independence, absolute constancy, and fidelity to His

promises, and immutability in His plans (cf. Driver, "Hebrew Tenses", 1892, p. 17). The following are the reasons alleged for the historical meaning of the "being" implied in the Divine name:

- The metaphysical sense of being was too abstruse a concept for the primitive times. Still, some of the Egyptian speculations of the early times are almost as abstruse; besides, it was not necessary that the Jews of the time of Moses should fully understand the meaning implied in God's name. The scientific development of its sense might be left to the future Christian theologians.
- The Hebrew verb *hayah* means rather "to become" than "to be" permanently. But good authorities deny that the Hebrew verb denotes being in motion rather than being in a permanent condition. It is true that the participle would have expressed a permanent state more clearly; but then, the participle of the verb *hayah* is found only in Ex., ix, 3, and few proper names in Hebrew are derived from the participle.
- The imperfect mainly expresses the action of one who enters anew on the scene. But this is not always the case; the Hebrew imperfect is a true aorist, prescinding from time and, therefore, best adapted for general principles (Driver, p. 38).
- "I am who am" appears to refer to "I will be with thee" of v. 12; both texts seems to be alluded to in Os., i, 9, "I will not be yours". But if this be true, "I am who am" must be considered as an ellipse: "I am who am with you", or "I am who am faithful to my promises". This is harsh enough; but it becomes quite inadmissible in the clause, "I am who am, hath sent me".

Since then the Hebrew imperfect is admittedly not to be considered as a future, and since the nature of the language does not force us to see in it the expression of transition or of becoming, and since, moreover, early tradition is quite fixed and the absolute character of the verb *hayah* has induced even the most ardent patrons of its historical sense to admit in the texts a description of God's nature, the rules of hermeneutics urge us to take the expressions in Ex., iii, 13-15, for what they are worth. Jahveh is He Who Is, i.e., His nature is best characterized by Being, if indeed it must be designated by a personal proper name distinct from the term God (Revue biblique, 1893, p. 338). The scholastic theories as to the depth of meaning latent in Yahveh (Yahweh) rest, therefore, on a solid foundation. Finite beings are defined by their essence: God can be defined only by being, pure and simple, nothing less and nothing more; not by abstract being common to everything, and characteristic of nothing in particular, but by concrete being, absolute being, the ocean of all substantial being, independent of any cause, incapable of change, exceeding all duration, because He is infinite: "Alpha and

Omega, the beginning and the end, . . . who is, and who was, and who is to come, the Almighty" (Apoc., i, 8). Cf. St. Thomas, I, qu. xiii, a. 14; Franzelin, "De Deo Uno" (3rd ed., 1883, thesis XXIII, pp. 279-86.

III. ORIGIN OF THE NAME JAHVEH (YAHWEH)

The opinion that the name Jahveh was adopted by the Jews from the Chanaanites, has been defended by von Bohlen (Genesis, 1835, p. civ), Von der Alm (Theol. Briefe, I, 1862, pp. 524-27), Colenso (The Pentateuch, V, 1865, pp. 269-84), Goldziher (Der Mythos bei den Hebräern, 1867, p. 327), but has been rejected by Kuenen ("De Godsdiens van Israel", I, Haarlem, 1869, pp. 379-401) and Baudissin (Studien, I, pp. 213-18). It is antecedently improbable that Jahveh, the irreconcilable enemy of the Chanaanites, should be originally a Chanaanite god.

It has been said by Vatke (Die Religion des Alten Test., 1835, p. 672) and J.G. Müller (Die Semiten in ihrem Verhältniss zu Chamiten und Japhetiten, 1872, p. 163) that the name Jahveh is of Indo-European origin. But the transition of the Sanscrit root, *div*—the Latin *Jupiter-Jovis (Diovis)*, the Greek *Zeus-Dios*, the Indo-European *Dyauis* into the Hebrew form Jahveh has never been satisfactorily explained. Hitzig's contention (Vorlesungen über bibl. Theol., p. 38) that the Indo-Europeans furnished at least the idea contained in the name Jahveh, even if they did not originate the name itself, is without any value.

The theory that Jahveh is of Egyptian origin may have a certain amount of a priori probability, as Moses was educated in Egypt. Still, the proofs are not convincing:

- Röth (Die Aegypt. und die Zoroastr. Glaubenslehre, 1846, p. 175) derives the Hebrew name from the ancient moon-god *Ih* or *Ioh*. But there is no connection between the Hebrew Jahveh and the moon (cf. Pierret, "Vocabul. Hiérog.", 1875, p. 44).
- Plutarch (De Iside, 9) tells us that a statue of Athene (Neith) in Sais bore the inscription: "I am all that has been, is, and will be". But Tholuck (op. cit., 1867, pp. 189-205) shows that the meaning of this inscription is wholly different from that of the name Jahveh.
- The patrons of the Egyptian origin of the sacred name appeal to the common Egyptian formula, *Nuk pu nuk* but though its literal signification is "I am I", its real meaning is "It is I who" (cf. Le Page Renouf, "Hibbert Lectures for 1879", p. 244).

As to the theory that Jahveh has a Chaldean or an Accadian origin, its foundation is not very solid:

- Jahveh is said to be a merely artificial form introduced to put meaning into the name of the national god (Delitzsch, "Wo lag das Paradies", 1881, pp. 158-64); the common and popular name of God is said to have been *Yahu* or *Yah*, the letter *I* being the essential Divine element in the name. The contention, if true, does not prove the Chaldean or Accadian origin of the Hebrew Divine name; besides the form *Yah* is rare and exclusively poetic; *Yahu* never appears in the Bible, while the ordinary full form of the Divine name is found even in the inscription of Mesa (line 18) dating from the ninth century B.C.
- *Yahu* and *Yah* were known outside Israel; the forms enter into the composition of foreign proper names; besides, the variation of the name of a certain King of Ham-math shows that *Ilu* is equivalent to *Yau*, and that *Yau* is the name of a god (Schrader, "Bibl. Bl.", II, p. 42, 56; Sargon, "Cylinder", xxv; Keil, "Fastes", I. 33). But foreign proper names containing *Yah* or *Yahu* are extremely rare and doubtful, and may be explained without admitting gods in foreign nations, bearing the sacred name. Again, the Babylonian pantheon is fairly well known at present, but the god *Yau* does not appear in it.
- Among the pre-Semitic Babylonians, *I* is a synonym of *Ilu*, the supreme god; now *I* with the Assyrian nominative ending added becomes *Yau* (cf. Delitzsch, "Lesestücke", 3rd ed., 1885, p. 42, Syllab. A, col. I, 13-16). Hommel (Altisrael. Ueberlieferung, 1897, pp. 144, 225) feels sure that he has discovered this Chaldean god *Yau*. It is the god who is represented ideographically (*ilu*) *A-a*, but ordinarily pronounced *Malik*, though the expression should be read *Ai* or *Ia* (*Ya*). The patriarchal family employed this name, and Moses borrowed and transformed it. But Lagrange points out that the Jews did not believe that they offered their children to Jahveh, when they sacrificed them to *Malik* (Religion semitique, 1905, pp. 100 sqq.). Jer., xxxii, 35, and Soph., i, 5, distinguish between *Malik* and the Hebrew God.

Cheyne (Traditions and Beliefs of Ancient Israel, 1907, pp. 63 sqq.) connects the origin of Jahveh with his *Yerahme'el* theory; but even the most advanced critics regard Cheyne's theory as a discredit to modern criticism. Other singular opinions as to the origin of the sacred name may be safely omitted. The view that Jahveh is of Hebrew origin is the most satisfactory. Arguing from Ex., vi, 2-8, such commentators as Nicholas of Lyra, Tostatus, Cajetan, Bonfrère, etc., maintain that the name was revealed for the first time to Moses on Mount Horeb. God declares in this vision that he "ap-

peared to Abraham . . . by the name of God Almighty; and my name *Adonai* [Jahveh] I did not shew them". But the phrase "to appear by a name" does not necessarily imply the first revelation of that name; it rather signifies the explanation of the name, or a manner of acting conformable to the meaning of the name (cf. Robion in "la Science cathol.", 1888, pp. 618-24; Delattre, *ibid.*, 1892, pp. 673-87; van Kasteren, *ibid.*, 1894, pp. 296-315; Robert in "Revue biblique", 1894, pp. 161-81). On Mt. Horeb God told Moses that He had not acted with the Patriarchs as the God of the Covenant, Jahveh, but as God Almighty.

Perhaps it is preferable to say that the sacred name, though perhaps in a somewhat modified form, had been in use in the patriarchal family before the time of Moses. On Mt. Horeb God revealed and explained the accurate form of His name, Jahveh.

- The sacred name occurs in Genesis about 156 times; this frequent occurrence can hardly be a mere prolepsis.
- Gen., iv, 26, states that Enos "began to call upon the name of the Lord [Jahveh]", or as the Hebrew text suggests, "began to call himself after the name of Jahveh".
- Jochabed, the mother of Moses, has in her name an abbreviated form Jo (Yo) of Jahveh. The pre-Mosaic existence of the Divine name among the Hebrews accounts for this fact more easily than the supposition that the Divine element was introduced after the revelation of the name.
- Among the 163 proper names which bear an element of the sacred name in their composition, 48 have *yeho* or *yo* at the beginning, and 115 have *yahu* or *yah* and the end, while the form Jahveh never occurs in any such composition. Perhaps it might be assumed that these shortened forms *yeho*, *yo*, *yahu*, *yah*, represent the Divine name as it existed among the Israelites before the full name Jahveh was revealed on Mt. Horeb. On the other hand, Driver (*Studia biblica*, I, 5) has shown that these short forms are the regular abbreviations of the full name. At any rate, while it is not certain that God revealed His sacred name to Moses for the first time, He surely revealed on Mt. Horeb that Jahveh is His incommunicable name, and explained its meaning.

Besides the works referred to in the text, the reader may consult: RELAND, *Deeds Excreitationum* (Utrecht, 1707); SCHRADER in SCHENKEL'S *Bibel Lexicon*, s. v. Jahve; PHAT, *Dict. de la Bible*, s.v. Jehovah; ROBERTSON SMITH in *Brit. and Foreign Evan. Review* (January, 1876), gives a summary of recent discussion of the subject; OEHLER, *Real-Encyclopadie*, S.V. Jehova.

A.J. MAAS

Jehu

Jehu

The derivation of the name is uncertain. By some it is translated "Yahweh is he".

I. Jehu (Sept. 'Ioú), a prophet, described in III Kings, xvi, 1, as the son of Hanani, and as prophesying against Baasa, the then reigning King of Israel. Hanani is probably to be identified with the prophet of that name mentioned in II Par., xvi, 7. It is uncertain whether Jehu belonged to the Southern or Northern Kingdom, but, at all events, his ministry seems to have been exercised chiefly in the latter. He appears later in the reign of Josaphat, King of Juda, whom he reproaches for his alliance with Achab (cf. II Par., xix, 2-3). He outlived Josaphat, and wrote the history of his reign (II Par., xx, 34).

II. Jehu, the tenth King of Israel, 884 to 856, or 865 to 828, son of Josaphat, son of Namsi; his tribe is not mentioned. According to Josephus (Antiq., IX, vi, 1) he was chief commandant of the army of Joram, his predecessor. For his sudden elevation to the royal power and his bloody reign see IV Kings, ix, x. The Prophet Elias had previously received a command from the Lord to anoint Jehu king over Israel (III Kings, xix, 16), but the order was only carried out by Eliseus, his successor. While Joram, King of Israel, was still convalescing in Jezrahel from a wound, Eliseus sent "one of the sons of the prophets" to Jehu's headquarters in Ramoth Galaad with orders to anoint him king and announce to him his mission of Divine vengeance against the wicked house of Achab. Jehu was immediately acclaimed king by his brother officers, and he forthwith set out in his chariot with his followers for Jezrahel, where Ozochias, King of Juda, was visiting his ally Joram. They fled, but Joram was killed by an arrow from the bow of Jehu, and Ozochias, being mortally wounded, died shortly after in Mageddo. Entering the town of Jezrahel, Jehu perceived the Queen Jezabel at a window of her palace, and he bade her attendants to cast her down headlong and she was trampled under the hoofs of the horses (III Kings, xxi, 23). Consistently with his programme of vengeance, Jehu caused the seventy sons of Achab who resided in Samaria to be put to death, and likewise all of the chief men and friends and priests of the house of Achab, as well as forty-two men of the brethren of Ozochias. He abolished the worship of Baal and slew its priests and followers, but he maintained the worship of the golden calves erected by Jeroboam. He was commended by Yahweh for his conduct towards the house of Achab, but nevertheless he is counted among the unfaithful rulers. Brief allusion is made to his defence of Israel against the incursions of the Syrians. On the occasion of Salmanasar's invasion in 842, Jehu sent a delegation to meet the Assyrian conqueror, with rich presents. This fact is recorded in one of the cuneiform inscriptions of Salmanasar, where Jehu is called the son of Amri (*Humrii*), doubtless through a

mistake on the part of the Assyrian annalist, who naturally considered Jehu as a lineal descendant of Amri, the founder of Samaria, since he occupied the throne of that dynasty. The same event is pictorially set forth on the Nimrod obelisk.

III. Jehu (Sept. *'Teoú*), son of Obed, of the tribe of Juda (I Par., ii, 38).

IV. Jehu, son of Josabia, of the tribe of Simeon (I Par., iv, 35).

V. Jehu, (Sept. *'Teoúl*), one of David's heroes, of the tribe of Benjamin, native of Anathoth (I Par., xii, 3).

JAMES F. DRISCOLL

Jemez Pueblo

Jemez Pueblo

An Indian *pueblo* situated upon the north bank of the river of the same name about twenty miles north-west of Bernalillo, New Mexico. Its inhabitants, of Tanoan Shoshonean stock, are all that remain of an important tribe occupying some ten villages in the same region when first known to the Spaniards in 1541. The name comes from their Keran neighbours. They themselves call their town Walatoa, "Bear Village". The Jemez country was first entered by Coronado in 1541, and was visited later by Espejo (1583) and Oñate (1598). Through the efforts of the Franciscan Father Martín de Arvide the tribe was induced, about 1618, to concentrate in two villages, in each of which a mission was established. Somewhat later one of these was abandoned for a new station, San Juan (de los Jemez). Twice the Jemez, in connection with some other Indians, conspired against the Spaniards, but the risings were speedily suppressed, until the outbreak of the general Pueblo rebellion in 1680, when the Jemez rose in both villages, killing one of the missionaries. At last, in 1694, General Vargas stormed their *pueblo*, killing nearly 100 of the inhabitants and carrying off nearly 400 prisoners. The village was also destroyed, reducing the tribe to the single *pueblo* of San Diego. In 1696 they again revolted, killing the resident Franciscan missionary, and fled west to the Navaho. After some years of exile they returned and built the *pueblo* in which they now reside. In 1728 and 1780-1 they suffered heavily from smallpox. They number now about 500, including the remnant of the kindred Pecos tribe. Both a government and a Franciscan day-school are kept among them. In culture and general characteristics the Jemez resemble the other Pueblos.

JAMES MOONEY

Ven. Philipp Jeningen

Ven. Philipp Jeningen

Born at Eichstätt, Bavaria, 5 January, 1642;d, at Ellwangen, 8 February, 1704. Entering the Society of Jesus, 19 January, 1663, he became a most successful popular missionary at the shrine of Our Lady of Schönenberg, near Ellwangen in Swabia, made famous by the Jesuits, and to which Jeningen, through the renown of his holiness, drew pilgrims from near and far. For many years he went forth on missions in the entire neighbouring country, his burning zeal achieving wonderful results. He is yet remembered as the "Apostle of the Ries".

ANTHONY HUONDER

Silvester Jenks

Silvester Jenks

Theologian, born in Shropshire, c. 1656; died in December, 1714. He was educated at Douai College, where he was professor of philosophy from 1680 to 1686. He was later a preacher in ordinary to James II. At the Revolution of 1688 he fled to Flanders. On his return to England he laboured as a missionary in or near London and was appointed by the chapter Archdeacon of Surrey and Kent. In 1711 he was elected by Propaganda Vicar Apostolic of the Northern District (13 August, 1713), but died of paralysis before his consecration. Among his works are: "A Contrite and Humble Heart" (Paris, 1692); "Practical Discourses on the Morality of the Gospel" (1699); "The Blind Obedience of a Humble Penitent the Best Cure for Scruples" (1699, republished, London, 1872); "The Whole Duty of a Christian" (1707); "A Short Review of the Book of Jansenius" (1710). A portrait engraved by le Pouter in 1694 is prefixed to a Paris edition of "A Contrite and Humble Heart".

EDWIN BURTON

Sir Patrick Alfred Jennings

Sir Patrick Alfred Jennings

An Australian statesman, b. at Newry, Ireland, 1831; d. July, 1897. He received his education, which included a training in engineering and surveying, in his native town, went to Victoria in 1852, and settled in the St. Arnaud district, where he filled various public offices. In 1863 he went to New South Wales, and engaged in pastoral pursuits in the Riverina district. Four years later he was appointed to the Legislative Council of New South Wales from which he resigned in 1869 and stood as a candidate for the Legislative Assembly, to which he was elected. In 1874 he was honoured by Pius IX with the Order of St. Gregory the Great, and in 1876 was made a Knight Commander of the Order of Pius IX and St. Gregory the Great. In 1876 he represented New South Wales and other states at the Philadelphia Exhibition. He was created C.M.G. in 1879, and in the following year K.C.M.G. For a few months in 1883 he was Vice-President of the Executive Council and colonial treasurer for a short period in 1885. In the following February Sir Patrick became premier and colonial treasurer, but resigned these offices in 1887. On revisiting Ireland in 1887 he was made an honorary LL.D. of Dublin University. In the same year he went to Rome, and received the Grand Cross of Pius IX from Leo XIII. He was called to the Legislative Council in 1890, was a member of the Senate of Sydney University a Fellow of St. John's (Catholic) College, and trustee of the Sydney Art Gallery. From 1891 until his death he led a somewhat retired life, but took a keen interest in benevolent and social movements.

JOHN W. KENNEDY

Jephte

Jephte

One of the judges of Israel. The story of Jephte is narrated in chapters xi and xii of the Book of Judges. He was a warrior of Galaad and the son of a harlot. His father's name was Galaad, who having a wife and other children, these latter thrust out Jephte

from the family and he fled to the land of Tob in Eastern Syria. Here he became the leader of a band of "needy men" and robbers who followed him as their prince. At this juncture the Israelitish territory east of the Jordan was invaded by the Ammonites, and the elders of Galaad, being in sore need of a leader to conduct the defence, saw themselves forced to go to Tob and ask Jephthe to return and be their prince. After expressing surprise that they should make him such an offer, considering the treatment he had received in his native city, he yielded to their entreaties, but insisted on the condition that, should he be victorious over the Ammonites, his own countrymen would remain faithful to their word and recognize him as their prince. The elders made a solemn promise, and Jephthe returned with them to the land of Galaad, where he was made chief by popular acclamation. Before beginning his campaign, Jephthe made a vow to the Lord, saying: "If thou wilt deliver the children of Ammon into my hands, whosoever shall first come forth out of the doors of my house, and shall meet me when I return in peace from the children of Ammon, the same will I offer a holocaust to the Lord." After a rather long negotiation with the King of the Ammonites as to Israel's right of possession of the land of Galaad, Jephthe led his forces against the invaders and "smote *them* from Aroer till you come to Mennith, twenty cities, and as far as Abel, which is set with vineyards, with a very great slaughter: and the children of Ammon were humbled by the children of Israel" (Judges, xi, 33).

On his triumphant return to his home in Maspha, the first person to come forth to meet him is his only daughter, accompanied by a chorus of women. On beholding her he is stricken with alarm and dismay, remembering his rash vow, but he declares that he has opened his mouth to the Lord and cannot do otherwise than fulfil it. The daughter expresses a noble and generous resignation to her fate, but asks a respite of two months that she may "bewail her virginity" in the mountains with her companions. At the expiration of the two months "she returned to her father and he did to her as he had vowed." Whence arose a custom that from year to year the daughters of Israel used to assemble together and lament during four days the daughter of Jephthe the Galaadite.

The obvious import of the narrative is that the daughter of Jephthe was offered up as a human sacrifice, and in fact, such has been the unanimous interpretation of it in Jewish, as well as in early Christian, tradition. Some modern apologists, however, shocked by the idea that a judge upon whom came "the spirit of the Lord" (xi, 29) could commit so barbarous an act, have endeavoured to prove that the words of Jephthe's vow should not be taken literally, but as referring to perpetual celibacy to which his daughter was to be condemned. The arguments to this effect, which are far from convincing, may be found in Vigouroux, "Dictionnaire de la Bible", s.v. They ignore the barbarous ethical condition of the Israelites at that relatively remote epoch—a condition

which is evident from other narratives in the same Book of Judges (v.g. that of ch. xix). That human sacrifice was expressly forbidden by the Mosaic Law does not help the argument, for, even granting that the Law then existed at all otherwise than in embryo, which is at least very doubtful, it is plain from the historical books referring to this and subsequent periods that its prescriptions were constantly ignored by the Jewish people. That such rash vows with their dire consequences, and even human sacrifices, were not things unheard of in that stage of Israel's history, may be gathered from such passages as I Kings, xiv, 24 sqq.; II Kings, xxi, 6-9; IV Kings, xvi, 3; etc.

After the conquest of the Ammonites Jephthe became involved in a severe conflict with the neighbouring tribesmen of Ephraim who arrogantly complained that they had not been invited to take part in the expedition. Jephthe retorted that they had been called upon to assist him but had declined, and the result was a fierce struggle between Ephraim and the men of Galaad in which the latter were victorious. They obtained strategic control of the fords of the Jordan by which the fleeing Ephraimites were obliged to return homeward, and when the fugitives appeared, each one was asked to pronounce the word "shibboleth" (an ear of corn), and if according to the Ephraimitic dialect it was pronounced "sibboleth" the man was immediately put to death. That forty-two thousand Ephraimites were slain on that occasion may be an exaggeration or possibly a change of the text. After a judgeship of six years Jephthe died and was buried in his city of Galaad.

JAMES F. DRISCOLL

Jeremias

Jeremias

[Hebrew *Irmeyah*; often in the paragogic form *Irmeyahu*, especially in the Book of Jeremias—meaning, possibly, "whom Jehovah appoints" (see Gesenius, "Lexicon", s.v.); Sept. *Ieremias*], the name of seven or eight men, besides the prophet, mentioned in the Old Testament:—

(1) Jeremias of lobna (A.V. Libnah, II Kings, xxiii, 31), of the tribe of Juda. he was the father of Amital, or Hamutal, one of the wives of Josias and mother of Kings Joachaz (IV Kings, xxiii, 31) and Sedecias (IV Kings, xxiv, 18). Cf. Jer., lii, 1—Gr. text.

(2) Jeremias, Jeremia [D.V., I Par., v, 24 (A.V. Jeremiah, Chron.); Sept. *Ieremia*], a chief of the half tribe of Manasses east of the Jordan, about the time of the Assyrian deportation under Thelgathphalnasar (A.V. Tiglath-pileser).

(3) Jeremias, one of the Benjamite bowmen and slingers who repaired to David's assistance at Siceleg (A.V. Ziklag) during the persecution by Saul (I Par., xii, 4).

(4) Jeremias (A.V. and R.V. Jeremiah), a valiant warrior of the tribe of Gad, fifth in rank of those who went over to David when he had withdrawn into the desert of Juda to escape capture at the hands of Saul (I Par., xii, 10).

(5) Jeremias, the tenth in reputation of the Gadite braves who threw in their lot with David's small army when he lay hid in the wilderness (I Par., xii, 13).

(6) Jeremias, son of Habsanias (R.V. Habazziniah), and father of Jezonias (A.V. and R.V. Jaazaniah). The last-mentioned seems to have been the head of the Rechabites (Jer., xxxv, 3) in the time of th prophet.

(7) Jeremias, a priest who returned with Zorobabel and Josue to Jerusalem [II Esd. (A.V. Nehem.), xii, 1] after the Babylonian Captivity—about 536 b.c.. His name was given to one of the twenty-two courses [II Esd., xii, 1-7—Vig., op. cit. below, here reckons only twenty-one; cf. Gr. text (*Neemias*), where the name is written *Ieremia*. Hattus is omitted in v. 2, and a lacuna occurs after the *Sechenias* of v. 3 as far as v. 7], into which were divided the four families of priests (I Esd., ii, 36-9).

(8) Jeremias, head of one of the priestly families, who, together with the other leaders of the people, subscribed to the sacred covenant renewed in the time of Nehemias (about 444 b.c.). A comparison of the priestly list given in II Esd., x, 2-8, with the enumeration of xii, 1 sq., will show the name of Jeremias (*Ieremia*) placed in close juxtaposition to that of Saraias (Saraia), and both are mentioned, in either case, amongst the first three. For these and similar reasons some have been led, despite the seeming difficulties, chiefly chronological, to identify that Jeremias who "went up with Zorobabel" and the homonymous priest who swore on behalf of his brethren that "they would walk in the law of God".

P.J. MACAULEY

Jeremias

Jeremias

(the Prophet.)

Jeremias lived at the close of the seventh and in the first part of the sixth century before Christ; a contemporary of Draco and Solon of Athens. In the year 627, during the reign of Josias, he was called at a youthful age to be a prophet, and for nearly half a century, at least from 627 to 585, he bore the burden of the prophetic office. He belonged to a priestly (not a high-priestly) family of Anathoth, a small country town

northeast of Jerusalem now called Anath; but he seems never to have performed priestly duties at the temple. The scenes of his prophetic activity were, for a short time, his native town, for the greater part of his life, the metropolis Jerusalem, and, for a time after the fall of Jerusalem, Masphath (Jer., xl, 6) and the Jewish colonies of the Dispersion in Egypt (Jer., xliii, 6 sqq.). His name has received varying etymological interpretations ("Lofty is Jahwah" or "Jahweh founds"); it appears also as the name of other persons in the Old Testament. Sources for the history of his life and times are, first, the book of prophecies bearing his name, and, second, the Books of Kings and of Paralipomenon (Chronicles). It is only when taken in connection with the history of his times that the external course of his life, the individuality of his nature, and the ruling theme of his discourses can be understood.

I. PERIOD OF JEREMIAS

The last years of the seventh century and the first decades of the sixth brought with them a series of political catastrophes which completely changed national conditions in Western Asia. The overthrow of the Assyrian Empire, which was completed in 606 by the conquest of Ninive, induced Nechao II of Egypt to attempt, with the aid of a large army, to strike a crushing blow at the ancient enemy on the Euphrates. Palestine was in the direct route between the great powers of the world of that era on the Euphrates and the Nile, and the Jewish nation was roused to action by the march of the Egyptian army through its territory. Josias, the last descendent of David, had begun in Jerusalem a moral and religious reformation "in the ways of David", the carrying out of which, however, was frustrated by the lethargy of the people and the foreign policy of the king. The attempt of Josias to check the advance of the Egyptians cost him his life at the battle of Mageddo, 608. Four years later, Nechao, the conqueror at Mageddo, was slain by Nabuchodonosor at Carchemish on the Euphrates. From that time Nabuchodonosor's eyes were fixed on Jerusalem. The last, shadowy kings upon the throne of David, the three sons of Josias—Joachaz, Joakim, and Sedecias—hastened the destruction of the kingdom by their unsuccessful foreign policy and their anti-religious or, at least, weak internal policy. Both Joakim and Sedecias, in spite of the warnings of the prophet Jeremias, allowed themselves to be misled by the war party in the nation into refusing to pay the tribute to the King of Babylon. The king's revenge followed quickly upon the rebellion. In the second great expedition Jerusalem was conquered (586) and destroyed after a siege of eighteen months, which was only interrupted by the battle with the Egyptian army of relief. The Lord cast aside his footstool in the day of his wrath and sent Juda into the Babylonian Captivity.

This is the historical background to the lifework of the Prophet Jeremias: in foreign policy an era of lost battles and other events preparatory to the great catastrophe; in the inner life of the people an era of unsuccessful attempts at reformation, and the

appearance of fanatical parties such as generally accompany the last days of a declining kingdom. While the kings from the Nile and the Euphrates alternately laid the sword on the neck of the Daughter of Sion, the leaders of the nation, the kings and priests, became more and more involved in party schemes; a Sion party, led by false prophets, deluded itself by the superstitious belief that the temple of Jahweh was the unfailling talisman of the capital; a fanatically foolhardy war party wanted to organize a resistance to the utmost against the great powers of the world; a Nile party looked to the Egyptians for the salvation of the country, and incited opposition to the Babylonian lordship. Carried away by human politics, the people of Sion forgot its religion, the national trust in God, and wished to fix the day and hour of its redemption according to its own will. Over all these factions the cup of the wine of wrath gradually grew full, to be finally poured from seven vessels during the Babylonian Exile laid upon the nation of the Prophets.

II. MISSION OF JEREMIAS

In the midst of the confusion of a godless policy of despair at the approach of destruction, the prophet of Anathoth stood as "a pillar of iron, and a wall of brass". The prophet of the eleventh hour, he had the hard mission, on the eve of the great catastrophe of Sion, of proclaiming the decree of God that in the near future the city and temple should be overthrown. From the time of his first calling in vision to the prophetic office, he saw the rod of correction in the hand of God, he heard the word that the Lord would watch over the execution of His decree (i, 11 sq.). That Jerusalem would be destroyed was the constant assertion, the *ceterum censeo* of the Cato of Anathoth. He appeared before the people with chains about his neck (cf. xxvii, xxviii) in order to give a drastic illustration of the captivity and chains which he foretold. The false prophets preached only of freedom and victory, but the Lord said: "A liberty for you to the sword, to the pestilence, and to the famine" (xxxiv, 17). It was so clear to him that the next generation would be involved in the overthrow of the kingdom that he renounced marriage and the founding of a family for himself (xvi, 104), because he did not wish to have children who would surely be the victims of the sword or become the slaves of the Babylonians. His celibacy was consequently a declaration of his faith in the revelation granted him of the destruction of the city. Jeremias is thus the Biblical and historical counterpart of Cassandra in the Homeric poems, who foresaw the fall of Troy, but found no credence in her own house, yet was so strong in her conviction that she renounced marriage and all the joys of life.

Along with this first task, to prove the certainty of the catastrophe of 586, Jeremias had the second commission to declare that this catastrophe was a moral necessity, to proclaim it in the ears of the people as the inevitable result of the moral guilt since the days of Manasses (IV Kings, xxi, 10-15); in a word, to set forth the Babylonian Captivity

as a moral, not merely a historical, fact. It was only because the stubborn nation had thrown off the yoke of the Lord (Jer., ii, 20) that it must bow its neck under the yoke of the Babylonians. In order to arouse the nation from its moral lethargy, and to make moral preparation for the day of the Lord, the sermons of the preacher of repentance of Anathoth emphasized this causal connection between punishment and guilt, until it became monotonous. Although he failed to convert the people, and thus to turn aside entirely the calamity from Jerusalem, nevertheless the word of the Lord in his mouth became, for some, a hammer that broke their stony hearts to repentance (xxiii, 29). Thus, Jeremias had not only "to root up, and to pull down", he had also in the positive work of salvation "to build, and to plant" (i, 10). These latter aims of the penitential discourses of Jeremias make plain why the religious and moral conditions of the time are all painted in the same dark tone: the priests do not inquire after Jahweh; the leaders of the people themselves wander in strange paths; the prophets prophesy in the name of Baal; Juda has become the meeting-place of strange gods; the people have forsaken the fountain of living water and have provoked the Lord to anger by idolatry and the worship of high places, by the sacrifice of children, desecration of the Sabbath, and by false weights. This severity in the discourses of Jeremias makes them the most striking type of prophetic declamation against sin. One well-known hypothesis ascribes to Jeremias also the authorship of the Books of Kings. In reality the thought forming the philosophical basis of the Books of Kings and the conception underlying the speeches of Jeremias complement each other, inasmuch as the fall of the kingdom is traced back in the one to the guilt of the kings, and in the other to the people's participation in this guilt.

III. LIFE OF JEREMIAS

A far more exact picture of the life of Jeremias has been preserved than of the life of any other seer of Sion. It was an unbroken chain of steadily growing outward and inward difficulties, a genuine "Jeremiad". On account of the prophecies, his life was no longer safe among his fellow-citizens of Anathoth (xi, 21 sqq.), and of no teacher did the saying prove truer that "a prophet hath no honour in his own country". When he transferred his residence from Anathoth to Jerusalem his troubles increased, and in the capital of the kingdom he was doomed to learn by corporal suffering that *veritas parit odium* (truth draws hatred upon itself). King Joakim could never forgive the prophet for threatening him with punishment on account of his unscrupulous mania for building and for his judicial murders: "He shall be buried with the burial of an ass" (xxii, 13-19). When the prophecies of Jeremias were read before the king, he fell into such a rage that he threw the roll into the fire and commanded the arrest of the prophet (xxxvi, 21-26). Then the word of the Lord came to Jeremias to let Baruch the scribe write again his words (xxxvi, 27-32). More than once the prophet was in prison

and in chains without the word of the Lord being silenced (xxxvi, 5 sqq.); more than once he seemed, in human judgment, doomed to death, but, like a wall of brass, the word of the Almighty was the protection of his life: "Be not afraid . . . they shall not prevail: for I am with thee, saith the Lord, to deliver thee" (i, 17-19). The religious opinion he maintained, that only by a moral change could a catastrophe in outward conditions prepare the way for improvement, brought him into bitter conflict with the political parties of the nation. The Sion party, with its superstitious confidence in the temple (vii, 4), incited the people to open revolt against Jeremias, because, at the gate and in the outer court of the temple, he prophesied the fate of the holy place in Silo for the house of the Lord; and the prophet was in great danger of violent death at the hands of the Sionists (xxvi; cf. vii). The party friendly to Egypt cursed him because he condemned the coalition with Egypt, and presented to the King of Egypt also the cup of the wine of wrath (xxv, 17-19); they also hated him because, during the siege of Jerusalem, he declared, before the event, that the hopes placed on an Egyptian army of relief were delusive (xxxvi, 5-9). The party of noisy patriots calumniated Jeremias as a morose pessimist (cf. xxvii, xxviii), because they had allowed themselves to be deceived as to the seriousness of the crisis by the flattering words of Hananias of Gabaon and his companions, and dreamed of freedom and peace while exile and war were already approaching the gates of the city. The exhortation of the prophet to accept the inevitable, and to choose voluntary submission as a lesser evil than a hopeless struggle, was interpreted by the war party as a lack of patriotism. Even at the present day, some commentators wish to regard Jeremias as a traitor to his country—Jeremias, who was the best friend of his brethren and of the people of Israel (II Mach. xv, 14), so deeply did he feel the weal and woe of his native land. Thus was Jeremias loaded with the curses of all parties as the scapegoat of the blinded nation. During the siege of Jerusalem he was once more condemned to death and thrown into a miry dungeon; this time a foreigner rescued him from certain death (xxxvii-xxxix).

Still more violent than these outward battles were the conflicts in the soul of the prophet. Being in full sympathy with the national sentiment, he felt that his own fate was bound up with that of the nation; hence the hard mission of announcing to the people the sentence of death affected him deeply; hence his opposition to accepting this commission (i, 6). With all the resources of prophetic rhetoric he sought to bring back the people to "the old paths" (vi, 16), but in this endeavour he felt as though he were trying to effect that "the Ethiopian change his skin, or the leopard his spots" (xiii, 23). He heard the sins of his people crying to heaven for vengeance, and forcibly expresses his approval of the judgment pronounced upon the blood-stained city (cf. vi). The next moment, however, he prays the Lord to let the cup pass from Jerusalem, and wrestles like Jacob with God for a blessing upon Sion. The grandeur of soul of the great

sufferer appears most plainly in the fervid prayers for his people (cf. especially xiv, 7-9, 19-22), which were often offered directly after a fiery declaration of coming punishment. He knows that with the fall of Jerusalem the place that was the scene of revelation and salvation will be destroyed. Nevertheless, at the grave of the religious hopes of Israel, he still has the expectation that the Lord, notwithstanding all that has happened, will bring His promises to pass for the sake of His name. The Lord thinks "thoughts of peace, and not of affliction", and will let Himself be found of those who seek (xxix, 10-14). As He watched to destroy, so will He likewise watch to build up (xxxix, 28). The prophetic gift does not appear with equal clearness in the life of any other prophet as alike a psychological problem and a personal task. His bitter outward and inward experiences give the speeches of Jeremias a strongly personal tone. More than once this man of iron seems in danger of losing his spiritual balance. He calls down punishment from heaven upon his enemies (cf. xii, 3; xviii, 23). Like a Job among the prophets, he curses the day of his birth (xv, 10; xx, 14-18); he would like to arise, go hence, and preach instead to the stones in the wilderness: "Who will give me in the wilderness a lodging place . . . and I will leave my people, and depart from them?" (ix, 2; Heb. text, ix, 1). It is not improbable that the mourning prophet of Anathoth was the author of many of the Psalms that are full of bitter reproach.

After the destruction of Jerusalem, Jeremias was not carried away into the Babylonian exile. He remained behind in Chanaan, in the wasted vineyard of Jahweh, that he might continue his prophetic office. It was indeed a life of martyrdom among the dregs of the nation that had been left in the land. At a later date, he was dragged to Egypt by emigrating Jews (xi-xliv). According to a tradition first mentioned by Tertullian (*Scorp.*, viii), Jeremias was stoned to death in Egypt by his own countrymen on account of his discourses threatening the coming punishment of God (cf. Heb., xi, 37), thus crowning with martyrdom a life of steadily increasing trials and sorrows. Jeremias would not have died as Jeremias had he not died a martyr. The Roman Martyrology assigns his name to 1 May. Posterity sought to atone for the sins his contemporaries had committed against him. Even during the Babylonian Captivity his prophecies seem to have been the favourite reading of the exiles (II Par., xxxvi, 21; I Esd., i, 1; Dan., ix, 2). In the later books compare *Ecclus.*, xlix, 8 sq.; II Mach., ii, 1-8; xv. 12-16; *Matt.*, xvi, 14.

IV. CHARACTERISTIC QUALITIES OF JEREMIAS

The delineation in II and III of the life and task of Jeremias has already made plain the peculiarity of his character. Jeremias is the prophet of mourning and of symbolical suffering. This distinguishes his personality from that of Isaias, the prophet of ecstasy and the Messianic future, of Ezechiel, the prophet of mystical (not typical) suffering, and of Daniel, the cosmopolitan revealer of apocalyptic visions of the Old Covenant.

No prophet belonged so entirely to his age and his immediate surroundings, and no prophet was so seldom transported by the Spirit of God from a dreary present into a brighter future than the mourning prophet of Anathoth. Consequently, the life of no other prophet reflects the history of his times so vividly as the life of Jeremias reflects the time immediately preceeding the Babylonian Captivity. A sombre, depressed spirit overshadows his life, just as a gloomy light overhangs the grotto of Jeremias in the northern part of Jerusalem. In Michelangelo's frescoes on the ceilings of the Sistine chapel there is a masterly delineation of Jeremias as the prophet of myrrh, perhaps the most expressive and eloquent figure among the prophets depicted by the great master. He is represented bent over like a tottering pillar of the temple, the head supported by the right hand, the disordered beard expressive of a time of intense sorrow, and the forehead scored with wrinkles, the entire exterior a contrast to the pure soul within. His eyes seem to see blood and ruins, and his lips appear to murmur a lament. The whole picture strikingly portrays a man who never in his life laughed, and who turned aside from scenes of joy, because the Spirit told him that soon the voice of mirth should be silenced (xvi, 8 sq.).

Equally characteristic and idiosyncratic is the literary style of Jeremias. He does not use the classically elegant language of a Deutero-Isaias or an Amos, nor does he possess the imagination shown in the symbolism and elaborate detail of Ezechiel, neither does he follow the lofty thought of a Daniel in his apocalyptic vision of the history of the world. The style of Jeremias is simple, without ornament and but little polished. Jerome speaks of him as "in verbis simplex et facilis, in majestate sensuum profundissimus" (simple and easy in words, most profound in majesty of thought). Jeremias often speaks in jerky, disjointed sentences, as if grief and excitement of spirit had stifled his voice. Nor did he follow strictly the laws of poetic rhythm in the use of the *Kînah*, or elegiac, verse, which had, moreover, an anacoluthic measure of its own. Like these anacoluthæ so are also the many, at times even monotonous, repetitions for which he has been blamed, the only individual expressions of the mournful feeling of his soul that are correct in style. Sorrow inclines to repetition, in the manner of the prayers on the Mount of Olives. Just as grief in the East is expressed in the neglect of the outward appearance, so the great representative of elegiac verse of the Bible had neither time nor desire to adorn his thoughts with a carefully chosen diction.

Jeremias also stands by himself among the prophets by his manner of carrying on and developing the Messianic idea. He was far from attaining the fullness and clearness of the Messianic gospel of the Book of Isaias; he does not contribute as much as the Book of Daniel to the terminology of the gospel. Above all the other great prophets, Jeremias was sent to his age, and only in very isolated instances does he throw a prophetic light in verbal prophecy on the fullness of time, as in his celebrated discourse

of the Good Shepherd of the House of David (xxiii, 1-5), or when he most beautifully, in chapters xxx-xxxiii, proclaims the deliverance from the Babylonian Captivity as the type and pledge of the Messianic deliverance. This lack of actual Messianic prophecies by Jeremias has its compensation; for his entire life became a living personal prophecy of the suffering Messiah, a living illustration of the predictions of suffering made by the other prophets. The suffering Lamb of God in the Book of Isaias (liii, 7) becomes in Jeremias a human being: "I was as a meek lamb, that is carried to be a victim" (Jer., xi, 19). The other seers were Messianic prophets; Jeremias was a Messianic prophecy embodied in flesh and blood. It is, therefore, fortunate that the story of his life has been more exactly preserved than that of the other prophets, because his life had a prophetic significance. The various parallels between the life of Jeremias and of the Messiah are known: both one and the other had at the eleventh hour to proclaim the overthrow of Jerusalem and its temple by the Babylonians or Romans; both wept over the city which stoned the prophets and did not recognize what was for its peace; the love of both was repaid with hatred and ingratitude. Jeremias deepened the conception of the Messiah in another regard. From the time the prophet of Anathoth, a man beloved of God, was obliged to live a life of suffering in spite of his guiltlessness and holiness from birth, Israel was no longer justified in judging its Messiah by a mechanical theory of retribution and doubting his sinlessness and acceptableness to God because of his outward sorrows. Thus the life of Jeremias, a life as bitter as myrrh, was gradually to accustom the eye of the people to the suffering figure of Christ, and to make clear in advance the bitterness of the Cross. Therefore it is with a profound right that the Offices of the Passion in the Liturgy of the Church often use the language of Jeremias in an applied sense.

V. THE BOOK OF THE PROPHECIES OF JEREMIAS

A. Analysis of Contents

The book in its present form has two main divisions: chapters i-xiv, discourses threatening punishment which are aimed directly against Juda and are intermingled with narratives of personal and national events, and chapters xlvi-li, discourses containing threats against nine heathen nations and intended to warn Juda indirectly against the polytheism and policy of these peoples.

In chapter i is related the calling of the prophet, in order to prove to his suspicious countrymen that he was the ambassador of God. Not he himself had assumed the office of prophet, but Jahweh had conferred it upon him notwithstanding his reluctance. Chapters ii-vi contain rhetorical and weighty complaints and threats of judgment on account of the nation's idolatry and foreign policy. The very first speech in ii-iii may be said to present the scheme of the Jeremianic discourse. Here also appears at once the conception of Osee which is typical as well of Jeremias: Israel, the bride of the Lord,

has degraded herself into becoming the paramour of strange nations. Even the temple and sacrifice (vii-x), without inward conversion on the part of the people, cannot bring salvation; while other warnings are united like mosaics with the main ones. The "words of the covenant" in the Thorah recently found under Josias contain threatenings of judgment; the enmity of the citizens of Anathoth against the herald of this Thorah reveals the infatuation of the nation (xi-xii). Jeremias is commanded to hide a linen girdle, a symbol of the priestly nation of Sion, by the Euphrates and to let it rot there, to typify the downfall of the nation in exile on the Euphrates (xiii). The same stern symbolism is expressed later by the earthen bottle which is broken on the rocks before the Earthen Gate (xix, 1-11). According to the custom of the prophets (III Kings, xi, 29-31; Is., viii, 1-4; Ezech. v, 1-12), his warnings are accompanied by forcible pantomimic action. Prayers at the time of a great drought, statements which are of much value for the understanding of the psychological condition of the prophet in his spiritual struggles, follow (xiv-xv). The troubles of the times demand from the prophet an unmarried and joyless life (xvi-xvii). The creator can treat those he has created with the same supreme authority that the potter has over clay and earthen vessels. Jeremias is ill-treated (xviii-xx). A condemnation of the political and ecclesiastical leaders of the people and, in connection with this, the promise of a better shepherd are uttered (xxi-xxiii). The vision of the two baskets of figs is narrated in chapter xxiv. The repeated declaration (*ceterum censeo*) that the land will become a desolation follows (xxv). Struggles with the false prophets, who take wooden chains off the people and lead them instead with iron ones, are detailed. Both in a letter to the exiles in Babylon, and by word of mouth, Jeremias exhorts the captives to conform to the decrees of Jahweh (xxvi-xxix). Compare with this letter the "epistle of Jeremias" in Baruch, vi. A prophecy of consolation and salvation in the style of a Deutero-Isaias, concerning the return of God's favour to Israel and of the new, eternal covenant, is then given (xxx-xxxiii). The chapters following are taken up largely with narratives of the last days of the siege of Jerusalem and of the period after the conquest with numerous biographical details concerning Jeremias (xxxiv-xlv).

B. Literary Criticism of the Book

Much light is thrown on the production and genuineness of the book by the testimony of chapter xxxvi; Jeremias is directed to write down, either personally or by his scribe Baruch, the discourses he had given up to the fourth year of Joakim (604 b.c.). In order to strengthen the impression made by the prophecies as a whole, the individual predictions are to be united into a book, thereby preserving documentary proof of these discourses until the time in which the disasters threatened in them should actually come to pass. This first authentic recension of the prophecies forms the basis of the present Book of Jeremias. According to a law of literary transmission

to which the Biblical books are also subject— *habent sua fata libelli* (books have their vicissitudes)—the first transcript was enlarged by various insertions and additions from the pen of Baruch or of a later prophet. The attempts of commentators to separate these secondary and tertiary additions in different cases from the original Jeremianic subject-matter have not always led to as convincing proof as in chapter lii. This chapter should be regarded as an addition of the post-Jeremianic period based on IV Kings, xxiv, 18-xxv, 30, on account of the concluding statement of li: "Thus far are the words of Jeremias." Cautious literary criticism is obliged to observe the principle of chronological arrangement which is perceptible in the present composition of the book, notwithstanding the additions: chapters i-vi belong apparently to the reign of King Josias (cf. the date in iii, 6); vii-xx belong, at least largely, to the reign of Joakim; xxi-xxxiii partly to the reign of Sedecias (cf. xxi, 1; xxvii, 1; xxviii, 1; xxxii, 1), although other portions are expressly assigned to the reigns of other kings: xxxiv-xxxix to the period of the siege of Jerusalem; xl-xlv to the period after the destruction of that city. Consequently, the chronology must have been considered in the arrangement of the material. Modern critical analysis of the book distinguishes between the portions narrated in the first person, regarded as directly attributable to Jeremias, and those portions which speak of Jeremias in the third person. According to Scholz, the book is arranged in "decades", and each larger train of thought or series of speeches is closed with a song or prayer. It is true that in the book parts classically perfect and highly poetic in character are often suddenly followed by the most commonplace prose, and matters given in the barest outline are not seldom succeeded by prolix and monotonous details. After what has been said above concerning elegiac verse, this difference in style can only be used with the greatest caution as a criterion for literary criticism. In the same way, investigation, of late very popular, as to whether a passage exhibits a Jeremianic spirit or not, leads to vague subjective results. Since the discovery (1904) of the Assuan texts, which strikingly confirm Jer., xliv, 1, has proved that Aramaic, as the *koine* (common dialect) of the Jewish colony in Egypt, was spoken as early as the fifth and sixth centuries b.c., the Aramaic expressions in the Book of Jeremias can no longer be quoted as proof of a later origin of such passages. Also, the agreement, verbal or conceptual, of texts in Jeremias with earlier books, perhaps with Deuteronomy, is not in itself a conclusive argument against the genuineness of these passages, for the prophet does not claim absolute originality.

Notwithstanding the repetition of earlier passages in Jeremias, chapters l-li are fundamentally genuine, although their genuineness has been strongly doubted, because, in the series of discourses threatening punishment to the heathen nations, it is impossible that there should not be a prophecy against Babylon, then the most powerful representative of paganism. These chapters are, indeed, filled with the Deutero-Isaian

spirit of consolation, somewhat after the manner of Is., xlvii, but they do not therefore, as a matter of course, lack genuineness, as the same spirit of consolation also inspires xxx-xxxiii.

C. Textual Conditions of the Book

The arrangement of the text in the Septuagint varies from that of the Hebrew text and the Vulgate; the discourses against the heathen nations, in the Hebrew text, xlvii, are, in the Septuagint, inserted after xxv, 13, and partly in different order. Great differences exist also as to the extent of the text of the Book of Jeremias. The text of the Hebrew and Latin Bibles is about one-eighth larger than that of the Septuagint. The question as to which text has preserved the original form cannot be answered according to the theory of Streane and Scholz, who declare at the outset that every addition of the Hebrew version is a later enlargement of the original text in the Septuagint. Just as little can the difficulty be settled by avowing, with Kaulen, an a priori preference for the Masoretic text. In most cases the Alexandrian translation has retained the better and original reading; consequently, in most cases the Hebrew text is glossed. In a book as much read as Jeremias the large number of glosses cannot appear strange. But in other cases the shorter recension of the Septuagint, amounting to about 100 words, which can be opposed to its large lacunæ, as compared with the Masorah, are sufficient proof that considerable liberty was taken in its preparation. Consequently, it was not made by an Aquila, and it received textual changes in the literary transmission. The dogmatic content of the discourses of Jeremias is not affected by these variations in the text.

VI. LAMENTATIONS

In the Greek and Latin Bibles there are five songs of lament bearing the name of Jeremias, which follow the Book of the Prophecy of Jeremias. In the Hebrew these are entitled *Kinôth*. from their elegaic character, or the *'Ekhah* songs after the first word of the first, second, and fourth elegies; in Greek they are called *Threnoi*, in Latin they are known as *Lamentationes*.

A. Position and Genuineness of Lamentations

The superscription to Lamentations in the Septuagint and other versions throws light on the historical occasion of their production and on the author: "And it came to pass, after Israel was carried into captivity, and Jerusalem was desolate, that Jeremias the prophet sat weeping, and mourned with this lamentation over Jerusalem, and with a sorrowful mind, sighing and moaning, he said". The inscription was not written by the author of Lamentations, one proof of this being that it does not belong to the alphabetical form of the elegies. It expresses, however, briefly, the tradition of ancient times which is also confirmed both by the Targum and the Talmud. To a man like Jeremias, the day on which Jerusalem became a heap of ruins was not only a day

of national misfortune, as was the day of the fall of Troy to the Trojan, or that of the destruction of Carthage to the Carthaginian, it was also a day of religious inanition. For, in a religious sense, Jerusalem had a peculiar importance in the history of salvation, as the footstool of Jahweh and as the scene of the revelation of God and of the Messias. Consequently, the grief of Jeremias was personal, not merely a sympathetic emotion over the sorrow of others, for he had sought to prevent the disaster by his labours as a prophet in the streets of the city. All the fibres of his heart were bound up with Jerusalem; he was now himself crushed and desolate. Thus Jeremias more than any other man was plainly called—it may be said, driven by an inner force—to lament the ruined city as threnodist of the great penitential period of the Old Covenant. He was already prepared by his lament upon the death of King Josias (II Par., xxxv, 25) and by the elegiac songs in the book of his prophecies (cf. xiii, 20-27, a lament over Jerusalem). The lack of variety in the word-forms and in the construction of the sentences, which, it is claimed, does not accord with the character of the style of Jeremias, may be explained as a poetic peculiarity of this poetic book. Descriptions such as those in i, 13-15, or iv, 10, seem to point to an eye witness of the catastrophe, and the literary impression made by the whole continually recalls Jeremias. To this conduce the elegiac tone of the Lamentations, which is only occasionally interrupted by intermediate tones of hope; the complaints against false prophets and against the striving after the favour of foreign nations; the verbal agreements with the Book of Prophecy of Jeremias; finally the predilection for closing a series of thoughts with a prayer warm from the heart—cf. iii, 19-21, 64-66, and chapter v, which, like a Miserere Psalm of Jeremias, forms a close to the five lamentations. The fact that in the Hebrew Bible the *Kinôth* was removed, as a poetic work, from the collection of prophetic books and placed among the *Keth-ûhim*, or Hagiographa, cannot be quoted as a decisive argument against its Jeremic origin, as the testimony of the Septuagint, the most important witness in the forum of Biblical criticism, must in a hundred other cases correct the decision of the Masorah. Moreover, the superscription of the Septuagint seems to presuppose a Hebrew original.

B. Technical Form of the Poetry of Lamentations

(1) In the first four laments the *Kinah* measure is used in the construction of the lines. In this measure each line is divided into two unequal members having respectively three and two stresses, as for example in the introductory first three lines of the book.

(2) In all five elegies the construction of the verses follows an alphabetical arrangement. The first, second, fourth, and fifth laments are each composed of twenty-two verses, to correspond with the number of letters in the Hebrew alphabet; the third lament is made up of three times twenty-two verses. In the first, second, and fourth elegies each verse begins with a letter of the Hebrew alphabet, the letters following in order, as the first verse begins with *Aleph*, the second with *Beth*, etc.; in the third elegy

every fourth verse begins with a letter of the alphabet in due order. Thus, with a few exceptions and changes (*Pê*, the seventeenth, precedes *Ayin* the sixteenth letter), the Hebrew alphabet is formed from the initial letters of the separate verses. How easily this alphabetical method can curb the spirit and logic of a poem is most clearly shown in the third lament, which, besides, had probably in the beginning the same structure as the others, a different initial letter to each of the original verses; it was not until later that a less careful writer developed each verse into three by means of ideas taken from Job and other writers.

(3) As to the structure of the strophe, it is certain that the principle followed in some cases is the change of the person of the subject as speaker or one addressed. The first elegy is divided into a lament over Sion in the third person (verses 1-11), and a lament of Sion over itself (verses 12-22). In the first strophe Sion is the object, in the second, a strophe of equal length, the subject of the elegy. In 11^c, according to the Septuagint, the third person should be used. In the second elegy, also, the intention seems to be, with the change of strophe, to change from the third person to the second, and from the second to the first person. In verses 1-8 there are twenty-four members in the third person; in 13-19 twenty-one in the second person, while in 20-22, a strophe in the first person, the lament closes in a monologue. In the third lament, as well, the speech of a single subject in the first person alternates with the speech of several persons represented by "we" and with colloquy; verses 40-47 are clearly distinguished by their subject "we" from the preceding strophe, in which the subject is one individual, and from the following strophe in the first person singular in verses 48-54, while the verses 55-66 represent a colloquy with Jahweh. The theory of the writer, that in the structure of Hebrew poetry the alternation of persons and subjects is a fixed principle in forming strophes, finds in Lamentations its strongest confirmation.

(4) In the structure of the five elegies regarded as a whole, Zenner has shown that they rise in a steady and exactly measured progression to a climax. In the first elegy there are two monologues from two different speakers. In the second elegy the monologue develops into an animated dialogue. In the third and fourth elegies the cry of lamentation is louder still, as more have joined in the lament, and the solitary voice has been replaced by a choir of voices. In the fifth lament a third choir is added. Literary criticism finds in the dramatic construction of the book a strong argument for the literary unity of Lamentations.

C. Liturgical Use of Lamentations

The Lamentations have received a peculiar distinction in the Liturgy of the Church in the Office of Passion Week. If Christ Himself designated His death as the destruction of a temple, "he spoke of the temple of his body" (John, ii, 19-21), then the Church

surely has a right to pour out her grief over His death in those Lamentations which were sung over the ruins of the temple destroyed by the sins of the nation.

For a general introduction to Jeremias and Lamentations see the Biblical *Introduction* of Cornely, Vigouroux, Girot, Driver, Cornill, Strack. For special questions of introduction: Cheyne, *Jeremiah* (1888); Martz, *Der Prophet Jeremias von Anatot* (1889); Erbt, *Jeremia und seine Zeit* (Göttingen, 1902); Gillies, *Jeremiah, the Man and His Message* (London, 1907); Ramsay, *Studies in Jeremiah* (London, 1907); Workman, *The Text of Jeremiah* (Edinburgh, 1889); Streane, *The Double Text of Jeremiah* (Cambridge, 1896); Scholz, *Der masoretische Text und die Septuagintaübersetzung des B. Jeremias* (Ratisbon, 1875); Frankl, *Studien über die LXX und Peschito zu Jeremia* (1873); Neteler, *Gliederung der B. Jeremias* (Münster, 1870). Commentaries on Jeremias issued in the last decades.—Catholic: Scholz (Würzburg, 1880); Trochon (Paris, 1883); Knabenbauer (Paris, 1889); Schneedorfer (Vienna, 1903). Protestant: Payne Smith in the *Speaker's Commentary* (London, 1875); Cheyne in Spence, *Commentary* (London, 1883-85); Ball (New York, 1890); Giesebrecht in Nowack, *Handkommentar* (Göttingen, 1894); Duhm in Marti, *Kurzer Hand-Commentar* (Tübingen and Leipzig, 1901); Douglas (London, 1903); Orelli (Munich, 1905). Commentaries on Lamentations:—Catholic: Seissenberger (Ratisbon, 1872); Trochon (Paris, 1878); SchÖnfelder (Munich, 1887); Knabenbauer (Paris, 1891); Minocchi (Rome, 1897); Schneedorfer (Vienna, 1903); Zenner, *Beiträge zur Erklärung der Klagelieder* (Freiburg im Br., 1905). Protestant: Raabe (Leipzig, 1880); Oettli (Nördlingen, 1889); LÖhr (Göttingen, 1891); Idem in Nowack, *Handkommentar* (Göttingen, 1893); Budde in Marti *Kurzer Hand-Commentar* (Freiburg im Br., 1898). For monographs see the latest commentaries and the bibliographies in the Biblical periodicals.

M. FAULHABER

Jericho

Jericho

Three cities of this name have successively occupied sites in the same neighbourhood.

I. A city of Canaan taken and destroyed by Josue after the passage of the Jordan (Jos., vi). The establishment of the Israelites in the industries of the "City of Palm Trees" gave birth to the Jericho of Benjamin (Jos., xviii, 21), which was for some time dominated by Eglon, King of Moab (Judges, iii, 12), and in which David's emissaries hid themselves when they had been outraged by Hanon, King of the Ammonites (II Kings, X, 5). But when, under Achab, the Canaanite Jericho had been restored by Hiel the Bethelite (III Kings, xvi, 34), the Israelites installed themselves there. They were visited

by Eliseus, who purified the waters of the spring (IV Kings, ii, 18-22). Three hundred and forty-five men of Jericho, returning from captivity, repopulated their native city (I Esd., ii, 34; 11 Esd., vii, 36). Having fallen into the hands of the Syrians, it was fortified by Bacchides, to protect Judea on the eastern side (I Mach., ix, 50). This Jericho was situated at Tell-es-Sulthàn, near the Fountain of Eliseus ('Ain-es-Sultàn), which flows at a distance of about two miles north-west of ez-Ribà, the modern Jericho. Excavations made in this tell in 1907-08 brought to light a rampart measuring some 840 yards in circuit, a citadel with double wall of the Canaanite period, Israelitish dwellings of the time of the Kings, and some post-exilic Jewish pottery (Mitteil. der deutschen Orient. Gesellschaft zu Berlin, December, 1908, no. 39; "Revue Biblique", 1909, 270-79).

II. The ancient Jericho, near the spring, had entirely disappeared when Herod founded a new Jericho towards the point where the brook of the Kelt and the Jerusalem road emerge from the mountains. Protected by the fort of Cypros, it possessed royal palaces, vast reservoirs, a hippodrome, and an amphitheatre (Josephus, "Bell. Jud.", I, xxi, 14; xxxiii, 6, 8; "Antiq. Jud.", XVI, v, 2). Herod died there: his son Archelaus further embellished the palaces and caused new aqueducts to be built to bring water to the palm gardens (Antiq. Jud., XVII, xiii, 1). It was at the gates of this Jericho that Christ cured two blind men (Matt., xx, 29-34), only one--Bartimeus--according to Mark (x, 46) and Luke (xviii, 35), and saw the publican Zacheus (Luke, xix, 1-5). The Khirbet Qaqûn, the Birket Mûsâ, a few artificial mounds, are the visible remains of the second Jericho, which, before being entirely destroyed, served for some days as a Roman camp (Bell. Jud., viii, 2; ix, 13).

III. A third Jericho then came into existence in the gardens which the Fountain of Eliseus watered, and where, besides the palm, grew the henna, balm, myrrh (Bell. Jud., IV, viii, 3), the sycamore, banana, etc. According to the map of the Mâdabâ, it was an important city and a see suffragan to Cæsarea Maritima. Its known bishops are Januarius (325), Macer (381), Eleutherius (415), Joannes (518), Gregorius (536), Basilius (800) (Lequien, "Oriens Christianus", III, 646-50). Justinian set up here a great caravanserai (Procopius, "De Ædif.", v, 9). During the Crusades Jericho was a benefice attached to the Holy Sepulchre. The Byzantine city was succeeded by the present Ribà, which consists of a few hostelries for pilgrims and tourists, and some fifteen wattle huts inhabited by Ghawarneh Arabs. There is also a Greek church (called "the Sanctuary of Zacheus") served by two Orthodox monks, a Latin chapel, and a mosque.

F.M. ABEL

Jeroboam

Jeroboam

(Sept. *Jeroboám*), name of two Israelitish kings.

(1) Jeroboam I was the first ruler of the Northern Kingdom after the schism of the Ten Tribes. He was a son of Nathan an Ephraimite, and his mother's name was Sarua. While still a young man he was placed by King Solomon over the tributes of Ephraim and Manasses (III Kings, xi, 28). In that capacity he superintended the labours of his tribesmen in the building of the fortress Mello in Jerusalem and of other public works, and he naturally became conversant with the widespread discontent caused by the extravagances which marked the reign of Solomon. Before the end of the latter's reign, Jeroboam received from the Prophet Abias an intimation that he was destined to be king over ten of the tribes which in punishment of the idolatry of Solomon were about to sever their allegiance to him and his house. At the same time it was promised that if Jeroboam were faithful to the Lord his house would be confirmed in authority over Israel (III Kings, xi, 38). Not satisfied to await the death of the king, the time set by the prophet for the fulfillment of the promise, Jeroboam instigated a revolt which was unsuccessful, and he was obliged to flee, taking refuge with King Sesac in Egypt, where he remained until the death of Solomon in 975 b.c. (or 938 according to the Assyrian chronology). After this event he returned to Palestine, and he was made leader of the delegation sent by dissatisfied element of the population to ask the new king Roboam to lighten the burdens which his father had placed upon them. No sooner had Roboam imprudently and harshly rejected their petition than ten of the tribes withdrew their allegiance to the house of David and proclaimed Jeroboam their king, only the tribes of Juda and Benjamin remaining faithful to Roboam. Jeroboam established his headquarters at Sichern, and soon added to the political also a religious schism. Fearing lest the pilgrimages to the temple in Jerusalem prescribed by the Law might be an occasion for the people of the Northern Kingdom to go back to their old allegiance, he determined to provide for them places of worship within their own boundaries, and for this purpose he set up two golden calves to be worshipped, one in Bethel and the other in Dan. He also built temples in the high places and had them served by priests drawn from the lowest of the people (III Kings, xii). The prophet Abias announced the Divine vengeance that was to come upon the house of Jeroboam because of these evil deeds (III Kings, xiv), and in the sequel of Israelitish history the worst doings of the kings are always referred to as like unto the wickedness of Jeroboam, the son of Nabat, who caused Israel to sin. He died in 954 (or in 917) after a reign of twenty-two years.

(2) Jeroboam II was the twelfth successor of the preceeding and the fourth king of the dynasty of Jehu. He succeeded his father Joas in 824 (or 783) and reigned forty-one years. In 802 Rammanirar III, King of Assyria, undertook a campaign into the "West lands", and the Kingdom of Israel (Land of Amri), together with Syria and Phoenicia, was placed under a heavy tribute. Jeroboam, however, taking advantage of the weakened condition of Syria, reestablished toward the north and in other directions the ancient boundaries of Israel (IV Kings, xiv, 25). The military and patriotic successes of Jeroboam had been foretold by Jonas, son of Amathi (*ibid.*), and the Sacred Writer adds that the Lord saved the Israelites by the hand of Jeroboam, son of Joas. From the political standpoint, Jeroboam was an intelligent and energetic ruler, but with regard to his religious activities, his reign is resumed in these words: "He did that which was evil before the Lord. He departed not from all the sins of Jeroboam, son of Nabai who made Israel to sin" (IV Kings, xiv, 24). Evidences of the religious decay during his otherwise prosperous reign are found in the writings of the prophets Amos and Osee, his contemporaries, who frequently inveigh against idolatry and its many concomitant evils and moral degradation. Jeroboam II died in 783 (or 743).

See LesÉtre in Vigouroux *Dict. de la Bible*, s. v.; Cooke in Hastings, *Dict. Of the Bible*, s.v.

JAMES F. DRISCOLL

St. Jerome

St. Jerome

Born at Stridon, a town on the confines of Dalmatia and Pannonia, about the year 340-2; died at Bethlehem, 30 September, 420.

He went to Rome, probably about 360, where he was baptized, and became interested in ecclesiastical matters. From Rome he went to Trier, famous for its schools, and there began his theological studies. Later he went to Aquileia, and towards 373 he set out on a journey to the East. He settled first in Antioch, where he heard Apollinaris of Laodicea, one of the first exegetes of that time and not yet separated from the Church. From 374-9 Jerome led an ascetical life in the desert of Chalcis, south-west of Antioch. Ordained priest at Antioch, he went to Constantinople (380-81), where a friendship sprang up between him and St. Gregory of Nazianzus. From 382 to August 385 he made another sojourn in Rome, not far from Pope Damasus. When the latter died (11 December, 384) his position became a very difficult one. His harsh criticisms had made him bitter enemies, who tried to ruin him. After a few months he was compelled to leave Rome. By way of Antioch and Alexandria he reached Bethlehem, in 386. He settled there in a monastery near a convent founded by two Roman ladies, Paula and

Eustochium, who followed him to Palestine. Henceforth he led a life of asceticism and study; but even then he was troubled by controversies which will be mentioned later, one with Rufinus and the other with the Pelagians.

CHRONOLOGY

The literary activity of St. Jerome, although very prolific, may be summed up under a few principal heads: works on the Bible; theological controversies; historical works; various letters; translations. But perhaps the chronology of his more important writings will enable us to follow more easily the development of his studies.

A first period extends to his sojourn in Rome (382), a period of preparation. From this period we have the translation of the homilies of Origen on Jeremias, Ezechiel, and Isaias (379-81), and about the same time the translation of the Chronicle of Eusebius; then the "Vita S. Pauli, prima eremitae" (374-379).

A second period extends from his sojourn in Rome to the beginning of the translation of the Old Testament from the Hebrew (382-390). During this period the exegetical vocation of St. Jerome asserted itself under the influence of Pope Damasus, and took definite shape when the opposition of the ecclesiastics of Rome compelled the caustic Dalmatian to renounce ecclesiastical advancement and retire to Bethlehem. In 384 we have the correction of the Latin version of the Four Gospels; in 385, the Epistles of St. Paul; in 384, a first revision of the Latin Psalms according to the accepted text of the Septuagint (Roman Psalter); in 384, the revision of the Latin version of the Book of Job, after the accepted version of the Septuagint; between 386 and 391 a second revision of the Latin Psalter, this time according to the text of the "Hexapla" of Origen (Gallican Psalter, embodied in the Vulgate). It is doubtful whether he revised the entire version of the Old Testament according to the Greek of the Septuagint. In 382-383 "Altercatio Luciferiani et Orthodoxi" and "De perpetua Virginitate B. Mariae; adversus Helvidium". In 387-388, commentaries on the Epistles to Philemon, to the Galatians, to the Ephesians, to Titus; and in 389-390, on Ecclesiastes.

Between 390 and 405, St. Jerome gave all his attention to the translation of the Old Testament according to the Hebrew, but this work alternated with many others. Between 390-394 he translated the Books of Samuel and of Kings, Job, Proverbs, Ecclesiastes, the Canticle of Canticles, Esdras, and Paralipomena. In 390 he translated the treatise "De Spiritu Sancto" of Didymus of Alexandria; in 389-90, he drew up his "Quaestiones hebraicae in Genesim" and "De interpretatione nominum hebraicorum." In 391-92 he wrote the "Vita S. Hilarionis", the "Vita Malchi, monachi captivi", and commentaries on Nahum, Micheas, Sophonias, Aggeus, Habacuc. In 392-93, "De viris illustribus", and "Adversus Jovinianum"; in 395, commentaries on Jonas and Abdias; in 398, revision of the remainder of the Latin version of the New Testament, and about that time commentaries on chapters xiii-xxiii of Isaias; in 398, an unfinished work

"Contra Joannem Hierosolymitanum"; in 401, "Apologeticum adversus Rufinum"; between 403-406, "Contra Vigilantium"; finally from 398 to 405, completion of the version of the Old Testament according to the Hebrew.

In the last period of his life, from 405 to 420, St. Jerome took up the series of his commentaries interrupted for seven years. In 406, he commented on Osee, Joel, Amos, Zacharias, Malachias; in 408, on Daniel; from 408 to 410, on the remainder of Isaias; from 410 to 415, on Ezechiel; from 415-420, on Jeremias. From 401 to 410 date what is left of his sermons; treatises on St. Mark, homilies on the Psalms, on various subjects, and on the Gospels; in 415, "Dialogi contra Pelagianos".

CHARACTERISTICS OF ST. JEROME'S WORK

St. Jerome owes his place in the history of exegetical studies chiefly to his revisions and translations of the Bible. Until about 391-2, he considered the Septuagint translation as inspired. But the progress of his Hebraistic studies and his intercourse with the rabbis made him give up that idea, and he recognized as inspired the original text only. It was about this period that he undertook the translation of the Old Testament from the Hebrew. But he went too far in his reaction against the ideas of his time, and is open to reproach for not having sufficiently appreciated the Septuagint. This latter version was made from a much older, and at times much purer, Hebrew text than the one in use at the end of the fourth century. Hence the necessity of taking the Septuagint into consideration in any attempt to restore the text of the Old Testament. With this exception we must admit the excellence of the translation made by St. Jerome. His commentaries represent a vast amount of work but of very unequal value. Very often he worked exceedingly rapidly; besides, he considered a commentary a work of compilation, and his chief care was to accumulate the interpretations of his predecessors, rather than to pass judgment on them. The "Quaestiones hebraicae in Genesim" is one of his best works. It is a philological inquiry concerning the original text. It is to be regretted that he was unable to continue, as had been his intention, a style of work entirely new at the time. Although he often asserted his desire to avoid excessive allegory, his efforts in that respect were far from successful, and in later years he was ashamed of some of his earlier allegorical explanations. He himself says that he had recourse to the allegorical meaning only when unable to discover the literal meaning. His treatise, "De Interpretatione nominum hebraicorum", is but a collection of mystical and symbolical meanings. Excepting the "Commentarius in ep. ad Galatas", which is one of his best, his explanations of the New Testament have no great value. Among his commentaries on the Old Testament must be mentioned those on Amos, Isaias, and Jeremias. There are some that are frankly bad, for instance those on Zacharias, Osee, and Joel. To sum up, the Biblical knowledge of St. Jerome makes him rank first among ancient exegetes. In the first place, he was very careful as to the sources of his

information. He required of the exegete a very extensive knowledge of sacred and profane history, and also of the linguistics and geography of Palestine. He never either categorically acknowledged or rejected the deuterocanonical books as part of the Canon of Scripture, and he repeatedly made use of them. On the inspiration, the existence of a spiritual meaning, and the freedom of the Bible from error, he holds the traditional doctrine. Possibly he has insisted more than others on the share which belongs to the sacred writer in his collaboration in the inspired work. His criticism is not without originality. The controversy with the Jews and with the Pagans had long since called the attention of the Christians to certain difficulties in the Bible. St. Jerome answers in various ways. Not to mention his answers to this or that difficulty, he appeals above all to the principle, that the original text of the Scriptures is the only one inspired and free from error. Therefore one must determine if the text, in which the difficulties arise, has not been altered by the copyist. Moreover, when the writers of the New Testament quoted the Old Testament, they did so not according to the letter but according to the spirit. There are many subtleties and even contradictions in the explanations Jerome offers, but we must bear in mind his evident sincerity. He does not try to cloak over his ignorance; he admits that there are many difficulties in the Bible; at times he seems quite embarrassed. Finally, he proclaims a principle, which, if recognized as legitimate, might serve to adjust the insufficiencies of his criticism. He asserts that in the Bible there is no material error due to the ignorance or the heedlessness of the sacred writer, but he adds: "It is usual for the sacred historian to conform himself to the generally accepted opinion of the masses in his time" (P.L., XXVI, 98; XXIV, 855). Among the historical works of St. Jerome must be noted the translation and the continuation of the "Chronicon Eusebii Caesariensis", as the continuation written by him, which extends from 325 to 378, served as a model for the annals of the chroniclers of the Middle Ages; hence the defects in such works: dryness, superabundance of data of every description, lack of proportion and of historical sense. The "Vita S. Pauli Eremitae" is not a very reliable document. The "Vita Malchi, monachi" is a eulogy of chastity woven through a number of legendary episodes. As to the "Vita S. Hilarionis", it has suffered from contact with the preceding ones. It has been asserted that the journeys of St. Hilarion are a plagiarism of some old tales of travel. But these objections are altogether misplaced, as it is really a reliable work. The treatise "De Viris illustribus" is a very excellent literary history. It was written as an apologetic work to prove that the Church had produced learned men. For the first three centuries Jerome depends to a great extent on Eusebius, whose statements he borrows, often distorting them, owing to the rapidity with which he worked. His accounts of the authors of the fourth century however are of great value. The oratorical consist of about one hundred homilies or short treatises, and in these the Solitary of Bethlehem appears in a new light. He is a

monk addressing monks, not without making very obvious allusions to contemporary events. The orator is lengthy and apologizes for it. He displays a wonderful knowledge of the versions and contents of the Bible. His allegory is excessive at times, and his teaching on grace is Semipelagian. A censorious spirit against authority, sympathy for the poor which reaches the point of hostility against the rich, lack of good taste, inferiority of style, and misquotation, such are the most glaring defects of these sermons. Evidently they are notes taken down by his hearers, and it is a question whether they were reviewed by the preacher. The correspondence of St. Jerome is one of the best known parts of his literary output. It comprises about one hundred and twenty letters from him, and several from his correspondents. Many of these letters were written with a view to publication, and some of them the author even edited himself; hence they show evidence of great care and skill in their composition, and in them St. Jerome reveals himself a master of style. These letters, which had already met with great success with his contemporaries, have been, with the "Confessions" of St. Augustine, one of the works most appreciated by the humanists of the Renaissance. Aside from their literary interest they have great historical value. Relating to a period covering half a century they touch upon most varied subjects; hence their division into letters dealing with theology, polemics, criticism, conduct, and biography. In spite of their turgid diction they are full of the man's personality. It is in this correspondence that the temperament of St. Jerome is most clearly seen: his waywardness, his love of extremes, his exceeding sensitiveness; how he was in turn exquisitely dainty and bitterly satirical, unsparingly outspoken concerning others and equally frank about himself. The theological writings of St. Jerome are mainly controversial works, one might almost say composed for the occasion. He missed being a theologian, by not applying himself in a consecutive and personal manner to doctrinal questions. In his controversies he was simply the interpreter of the accepted ecclesiastical doctrine. Compared with St. Augustine his inferiority in breadth and originality of view is most evident. His "Dialogue" against the Luciferians deals with a schismatic sect whose founder was Lucifer, Bishop of Cagliari in Sardinia. The Luciferians refused to approve of the measure of clemency by which the Church, since the Council of Alexandria, in 362, had allowed bishops, who had adhered to Arianism, to continue to discharge their duties on condition of professing the Nicene Creed. This rigorist sect had adherents almost everywhere, and even in Rome it was very troublesome. Against it Jerome wrote his "Dialogue", scathing in sarcasm, but not always accurate in doctrine, particularly as to the Sacrament of Confirmation. The book "Adversus Helvidium" belongs to about the same period. Helvidius held the two following tenets:

- Mary bore children to Joseph after the virginal birth of Jesus Christ;

- from a religious viewpoint, the married state is not inferior to celibacy.

Earnest entreaty decided Jerome to answer. In doing so he discusses the various texts of the Gospel which, it was claimed, contained the objections to the perpetual virginity of Mary. If he did not find positive answers on all points, his work, nevertheless, holds a very creditable place in the history of Catholic exegesis upon these questions. The relative dignity of virginity and marriage, discussed in the book against Helvidius, was taken up again in the book "Adversus Jovinianum" written about ten years later. Jerome recognizes the legitimacy of marriage, but he uses concerning it certain disparaging expressions which were criticized by contemporaries and for which he has given no satisfactory explanation. Jovinian was more dangerous than Helvidius. Although he did not exactly teach salvation by faith alone, and the uselessness of good works, he made far too easy the road to salvation and slighted a life of asceticism. Every one of these points St. Jerome took up. The "Apologetici adversus Rufinum" dealt with the Origenistic controversies. St. Jerome was involved in one of the most violent episodes of that struggle, which agitated the Church from Origen's lifetime until the Fifth Ecumenical Council (553). The question at issue was to determine if certain doctrines professed by Origen and others taught by certain pagan followers of Origen could be accepted. In the present case the doctrinal difficulties were embittered by personalities between St. Jerome and his former friend, Rufinus. To understand St. Jerome's position we must remember that the works of Origen were by far the most complete exegetical collection then in existence, and the one most accessible to students. Hence a very natural tendency to make use of them, and it is evident that St. Jerome did so, as well as many others. But we must carefully distinguish between writers who made use of Origen and those who adhered to his doctrines. This distinction is particularly necessary with St. Jerome, whose method of work was very rapid, and consisted in transcribing the interpretations of former exegetes without passing criticism on them. Nevertheless, it is certain that St. Jerome greatly praised and made use of Origen, that he even transcribed some erroneous passages without due reservation. But it is also evident that he never adhered thinkingly and systematically to the Origenistic doctrines. Under these circumstances it came about that when Rufinus, who was a genuine Origenist, called on him to justify his use of Origen, the explanations he gave were not free from embarrassment. At this distance of time it would require a very subtle and detailed study of the question to decide the real basis of the quarrel. However that may be, Jerome may be accused of imprudence of language and blamed for a too hasty method of work. With a temperament such as his, and confident of his undoubted orthodoxy in the matter of Origenism, he must naturally have been tempted to justify anything. This brought about a most bitter controversy with his wily adversary, Rufinus. But on

the whole Jerome's position is by far the stronger of the two, even in the eyes of his contemporaries. It is generally conceded that in this controversy Rufinus was to blame. It was he who brought about the conflict in which he proved himself to be narrow-minded, perplexed, ambitious, even timorous. St. Jerome, whose attitude is not always above reproach, is far superior to him. Vigilantius, the Gascon priest against whom Jerome wrote a treatise, quarrelled with ecclesiastical usages rather than matters of doctrine. What he principally rejected was the monastic life and the veneration of saints and of relics. In short, Helvidius, Jovinian, and Vigilantius were the mouthpieces of a reaction against asceticism which had developed so largely in the fourth century. Perhaps the influence of that same reaction is to be seen in the doctrine of the monk Pelagius, who gave his name to the principal heresy on grace: Pelagianism. On this subject Jerome wrote his "Dialogi contra Pelagianos". Accurate as to the doctrine of original sin, the author is much less so when he determines the part of God and of man in the act of justification. In the main his ideas are Semipelagian: man merits first grace: a formula which endangers the absolute freedom of the gift of grace. The book "De situ et nominibus locorum hebraicorum" is a translation of the "Onomasticon" of Eusebius, to which the translator has joined additions and corrections. The translations of the "Homilies" of Origen vary in character according to the time in which they were written. As time went on, Jerome became more expert in the art of translating, and he outgrew the tendency to palliate, as he came across them, certain errors of Origen. We must make special mention of the translation of the homilies "In Canticum Cantorum", the Greek original of which has been lost.

St. Jerome's complete works can be found in P.L., XXII-XXX.

LOUIS SALTET

St. Jerome Emiliani

St. Jerome Emiliani

Founder of the Order of Somascha; b. at Venice, 1481; d. at Somascha, 8 Feb., 1537; feast, 20 July; son of Angelo Emiliani (popularly called Miani) and of Eleonore Mauroceni, joined the army, and in 1508 defended Castelnuovo against the League of Cambray. Taken prisoner and miraculously liberated, he made a pilgrimage to the shrine of Our Lady of Treviso, in fulfillment of a vow. He was then appointed *podestà* of Castelnuovo, but after a short time returned to Venice to supervise the education of his nephews. All his spare time was devoted to the study of theology and to works of charity. After his ordination to the priesthood in 1518, the hospitals and the hovels of the poor were his favourite resorts. In the year of plague and famine (1528), he seemed to be everywhere, and showed his zeal especially for the orphans, whose

number had so greatly increased. He rented a house for them near the church of St. Rose and, with the assistance of some pious laymen, ministered to their wants. To his charge was also committed the hospital for incurables, founded by St. Cajetan. In 1531 he went to Verona and induced the citizens to build a hospital; at Brescia he erected an orphanage, at Bergamo one for boys and another for girls. Here also he founded the first home for fallen women who wished to do penance. Two priests, Alessandro Besuzio and Agostino Bariso, now joined him in his labours of charity, and in 1532 Jerome founded a religious society, placing the motherhouse at Somascha, a secluded hamlet between Milan and Bergamo. In the rule, Jerome puts down as the principal work of the community the care of orphans, poor, and sick, and demands that dwellings, food and clothing shall bear the mark of religious poverty. Jerome fell a martyr to his zeal; contracting a disease at Bergamo, he died at Somascha. He was beautified by Benedict XIV in 1747, and canonized by Clement XIII in 1767. The Office and Mass in his honour were approved eight years later. His biography was first written by Scipio Albani (1600); another by Andreas Stella (1605). The best was written by Aug. Tortora (Milan, 1620; in "Acta SS.", Feb., II, 217 sq.).

After the death of Jerome his community was about to disband, but was kept together by Gambarana, who had been chosen superior. He obtained the approval (1540) of Paul III. In 1547 the members vainly sought affiliation with the Society of Jesus; then in 1547-1555 they were united with the Theatines. Pius IV (1563) approved the institution, and St. Pius V raised it to the dignity of a religious order, according to the Rule of St. Augustine, with solemn vows, the privileges of the mendicants, and exemption. In 1569 the first six members made their profession, and Gambarana was made first superior general. Great favour was shown to the order by St. Charles Borromeo, and he gave it the church of St. Mayeul at Pavia, from which church the order takes its official name "Clerici regulares S. Majoli Papiæ congregationis Somaschæ". Later the education of youth was put into the programme of the order, and the colleges at Rome and Pavia became renowned. It spread into Austria and Switzerland, and before the great Revolution it had 119 houses in the four provinces of Rome, Lombardy, Venice, and France. At present the order has ten houses in Italy two of which are in Rome. The general resides in Rome at S. Girolamo della Carita.

FRANCIS MERSHMAN

Jerusalem (Before A.D. 71)

Jerusalem (Before A.D. 71)

This article treats of the "City of God", the political and religious centre of the People of Israel, with its destruction by the Romans after it had become the scene of the Redemption. This part of the subject will be divided as follows:

- Names
- Topography
- History
- Development of the City and its Chief Monuments

I. NAMES

According to Jewish tradition (Josephus, "Antiq. Jud.", I, x, 1; Targum Onkelos, Gen., xiv, 18), Jerusalem was originally called Salem (Peace), and was the capital of King Melchisedech (Gen., xiv, 18). This tradition is confirmed by the cuneiform tablets discovered in 1888 at Tell Amarna, in Egypt (see below, under III. *History*). Five of these letters, written at Jerusalem about the year 1400 B.C., inform us that the city was then called U-ru-sa-lim. It figures in Assyrian inscriptions under the name of Ur-sa-li-im-mu. According to the Assyrian syllabaries, *uru* and *ur* signify "city" (Hebrew *ir*). In several of the Tell Armana Tablets the word *salim* is used in the sense of "peace". Ursalim, therefore, means "City of Peace". The Psalmist, too, connects *Salem* with *Sion*: "He hath his tabernacle in Salem, and his abode upon the mountain of Sion" [Ps. lxxv (lxxvi), 3]. When the Israelites came into the Land of Promise, Jerusalem was in the power of the Jebusites, and bore the name of Jebus. The Hebrews, however, were not ignorant of its ancient name; they often called it Jerusalem (Jos., x, 1; Judges, xix, 10; II Kings, v, 6, etc.). In other passages of the Bible it is called Jerusalem (I Par., iii, 5; Jer., xxvi, 18; Esther, ii, 6, etc.). The Septuagint. writes its name *Ierousalem*. Under the hellenizing influences which invaded Palestine, Salem became *Solyma* (Antiq. Jud., I, x, 2), and Jerusalem *ta Ierosolyma* (The Holy Solyma) (I Mach., i, 14, 20; II Mach., i, 10; Bell. Jud., VI, x, etc.). The New Testament employs sometimes the Septuagint form and sometimes that of Machabees, which the Vulgate renders by *Jerusalem* and *Jerosolyma*. The Syriac Version gives *Uris lem*, a form more nearly approaching the Assyrian. When the Emperor Hadrian rebuilt the city, A.D. 136, he gave it the name of Aelia Capitolina. From the Mohammedan conquest of Palestine, in the seventh century,

until our own times, the Arabs have called it El Quds, "The Holy" --the *ir haq qodes*, or "Holy City", of II Esd., xi, 18 (cf. Matt., iv, 5, etc). Among all other people the name Jerusalem has continued in use until now.

II. TOPOGRAPHY

A. Geographical Position

Jerusalem is situated in latitude 31° 46' 45" N. and longitude 35° 13' 25" E. of Greenwich, about 32 English miles in a straight line from the Mediterranean on the west, and 13 from the Dead Sea on the east. It stands on the crest of a chain of mountains which traverses Palestine from north to south, and the highest point of which, at the northwest corner of the city, is 2577 feet above the level of the Mediterranean, and 3865 above that of the Dead Sea. Owing to this difference of level the western slope of these mountains, towards the Plain of Sefhela, which extends to the Mediterranean, is gentle, while that to the east is very steep. A girdle of high hills surrounds the city, forming a sort of natural rampart. On the north is Mt. Scopus (2705 feet), next to it, on the east, the Mount of Olives (2665 feet), beyond which again is the Mount of Offence (2410 feet) (III Kings, xi, 7; IV Kings, xxiii, 13). To the south is the Mount of Evil Counsel (2549 feet), which forms the eastern boundary of the Plain of Raphaim, and next, on the southwest, comes a hill (2557 feet) to which no name has been given. Towards the northwest the city is more exposed; at some distance in that direction it is dominated by the Nebi Samwil, the ancient Maspha, which has an altitude of 2935 feet. Notwithstanding the difficulty of access in its natural situation, Jerusalem is the centre of a network of ancient roads which connect it, on the east, with Jericho and the Jordan; on the south, with Hebron and Gaza; on the west, with Jaffa and Caesarea; on the north, with Samaria and Galilee. It was, however, situated beyond the great military and commercial highways between Egypt and Assyria.

B. Site; Hills and Valleys

The ancient city occupied the same position as the present, except that its southern extremity has remained outside of the walls since the reign of Hadrian (A.D. 136). Thanks, however, to systematic operations undertaken by English, American, and German engineers, much of the old southern wall has been brought to light. While, in many places, masses of ruins have changed the appearance of the ground, excavations and vertical borings, made within the last fifty years, have, nevertheless, enabled the explorers to construct sufficiently-exact maps of the primitive configuration. The ground on which Jerusalem stands, within this ring of surrounding mountains, is by no means uniform in character: on three sides--the east, south, and west--it stands upon terraced heights bordered by deep valleys which give it the appearance of a promontory jutting out to the south. The city itself is furrowed with ravines which cut it up into a number of little hills. The longest of these valleys measures scarcely two miles and a

half; they have all been formed by erosion, due to torrential rainfall, in the quaternary period. To the north of the city they take the shape of mere depressions in the soil, then, as they descend, sinking rapidly in the calcareous rock of which the mountains are formed, they soon become deep gorges, all coming together at the southeast angle of the city, at a depth of about 600 feet below their starting-point. The two principal hills rise on the southwest and the east respectively. The former of these hills is called Mount Zion because, according to Josephus (Antiq. Jud., XVI, vii, 1), Eusebius, and all the authors, Jewish and Christian, who have followed them, the city of Jebus, or Sion-the City of David-stood there. This view, however, is contested by certain modern Palestinologists, who would locate Sion upon the northern declivity of the second of these hills, Mount Moria (II Par., iii, 1), where stood the Temple of Jehovah.

(a) Mount Zion is bounded on the west by a valley which begins near the old pool called Birket Mamilla (see below, under D), about 1000 feet to the northwest of the hill itself. This valley, following a southeasterly direction as far as the Jaffa Gate, the ancient gate of the gardens (Gennath) (Bell. Jud., V, iv, 2), then turns to the south and forms a great reservoir of water called the Birket es Sultan, by means of a massive dam, which was rebuilt in the twelfth and the sixteenth centuries. This is the Fountain of the Dragon (*tannin*) which Nehemias came to when he went out of the city by the western gate (D.V., "dragon fountain", II Esd., ii, 13). Josephus calls it the Pool of the Serpent (Bell. Jud., V, iii, 2); the Hebrew word *tannin* simplifies both "dragon" and "serpent". This valley is called by the natives Wadi Rababi; in the Bible it goes by the name of Ge Hinnom, or Ge Ben Hinnom, "Valley of Ennom" (in A.V., Hinnom) or "of the son of Ennom"-an unknown personage (Jos., xv, 8; xviii, 16; II Esd., xi, 30; Jer., xix, 2). Below the Birket es Sultan, it turns to the east, passes below Halcedama (q.v.), and connects with the Valley of Cedron. At the junction of the two valleys are the rich plantation forming "the king's garden" (or, in D.V., "the king's guard") mentioned in IV Kings, xxv, 4; Jer., xxxix, 4; II Esd., iii, 15. Also at the mouth of the Valley of Hinnom is situated Topheth, the high place where Achaz and Manasses set up the worship of Baal-Moloch (II Par., xxviii, 3; xxxiii, 6). The good King Josias defiled this execrable place, scattering human bones over it (II Par., xxxiv, 3-5), in spite of which Joakim restored there the infamous worship of Moloch. From the unholy fires which were kept burning there for nearly a century and a half-those fires through which the apostate Jews caused their children to pass, in order to consecrate, or immolate, them to Moloch-Ge Hinnom (in Aramaic, Gehenanm) received the name of *Geenna tou pyros*, "Gehenna of the Fire", and became the emblem of hell (in Greek text, Matt., v, 22, 29, 30; Mark, ix, 43, 45). The Valley of Cedron, from Hinnom as far as the Dead Sea, is still called Wadi en Nar, "Valley of Fire".

On the north, Mount Sion is bounded by a valley, now largely filled in, which goes down in a straight line from the Jaffa Gate eastward to the foot of Mount Moria. On the slope of this valley is a large reservoir called in Arabic Birket Hammam el Batrak, "Pool of the Baths of the Patriarch", and in the itineraries of the pilgrims "Pool of Ezechias". Josephus calls it Amygdalon, a name which, according to Conder, may with good reason be derived from *ham migdalon*, "facing the great tower", since the pool faces the Tower of Phasael. This valley, like all those which pass through the city, has no proper name in the Bible; neither has it in Arabic; it is conventionally known as the Transverse Valley. A third valley begins outside the Damascus Gate (Bab el Amoud) and descends southward, with a slight deflection to the east, dividing the city in two; until it joins the Valley of Hinnom. After passing the opening of the Transverse Valley, it forms a gorge of some depth separating Mount Sion from Mount Moria. Its rocky bed has found by the English engineers 69 feet below the actual surface of the ground near the Wailing Place, and 85 feet from the southwest angle of the Temple. It encloses, towards its extremity, the Pool of Siloe, which receives through a subterranean channel the waters of the Virgin's Fountain that flow through the hollow of Cedron. A little farther on, the valley has been dammed with a wall 233 feet in length, which, retaining the whole rainfall of the valley, formed the reservoir called by Nehemias "the king's pool" (in D.V., "the king's aqueduct", II Esd., ii, 14). In Scripture this valley figures under the name of *Nahal*, "ravine", or "torrent of winter" (II Esd., ii, 15). Josephus in one place designates it "the wide valley" (Bell. Jud., V, iv, 1), and the Arabs call it simply El Wad, "the valley". In works on the Holy Land it also bears the designation of "the central valley".

Surrounded on all sides by these deep ravines, Mount Sion presents a quadrilateral surface measuring about 2600 feet from north to south and 2000 feet from east to west. It is the largest of the hills of Jerusalem, the highest, and the only one completely isolated. Its highest point reaches an altitude of 2558 feet, and rises 531 feet above its base at the southeastern angle. Its surface is considerably varied, being, indeed, divided by a small depression which branches off from the middle of the Transverse Valley and descends obliquely to the Pool of Siloe. Mount Sion thus consists of two lofty connected plateaux, one (the lower) stretching westward, the other (the shorter) to the northwest. The former is fairly uniform and measures 2300 feet in length from north to south, and 920 feet in breadth. After sinking about 100 feet towards the northwest, the ground rises about 20 feet and forms a rounded eminence opposite to the Temple, terminating in a precipice 195 feet above the former bed of El Wad.

(b) Mount Moria, or the Eastern Hill, is a narrow promontory connected with Mount Bezetha, the highest point of which is the Hill of Jeremias, with an altitude of 2556 feet. This tongue of land terminates on the south in a point near the Pool of Siloe;

El Wad encloses it on its western side, and the Valley of Cedron on its eastern. Upon its highest crest (2443 feet) was the domain of Ornan (Areuna), the Jebusite, where Solomon built the Temple and his palaces. This is the summit called Moria; south of the royal quarter, the hill (2300 to 2050 feet) bears the name of Ophel (II Par., xxvii. 3). Cedron, which, since the third century after Christ, has also been called the Valley of Josaphat begins near the so-called Tombs of the Judges, and descends, under the name of Wadi ed Djoz (Valley of Walnuts), southeast to the foot of Scopus, thence south, becoming a deep gorge separating Mount Moria from the Mount of Olives and the Mount of Offence. At a point 1300 feet beyond the northeast angle of the city, it is crossed by a bridge which has replaced one of the Jewish period. This older Jewish bridge gave access, on the right, to a staircase cut in the rock and leading up to the north side of the Temple, and, on the left, to a similar staircase leading up to the Mount of Olives. To the left of the bridge is the Garden of Gethsemani (see GETHSEMANE), with the Tomb of the Blessed Virgin, from which the Arabs call this part of Cedron Wadi sitti Mariam, or "Valley of the Lady Mary". Next come, on the same side, two fine monuments of the Graeco-Roman-Judaic style (second to first century B.C.) excavated in the rock. The first of these has been called, since the fourth century after Christ, the Tomb of Absalom; the second, the Tomb of the Prophet Zacharias. Between the two is a grandiose Jewish tomb of the same period, belonging to the family of Beni Hezir. A little farther on, upon the side of the Mount of Offence, is to be seen a rock-hewn tomb of Egyptian architecture. Upon the same slope is perched the village of Silwan, the houses built against long rows of sepulchres, most of them cut in a vast bank of calcareous rock, popularly known as Ez Zehwele. Opposite, at the foot of Ophel, a flight of thirty-two steps descends to a grotto, in which is a spring of slightly brackish water. This spring presents the phenomenon of a natural (subterranean) siphon producing an intermittent flow; only at intervals—from three to six times a day—does the water rush down, with a strange humming noise, from a cleft in the rock. The water of this spring is conveyed to the Pool of Siloe by a winding tunnel. The Arabs call the fountain Ain Sitti Mariam, in honour of the Blessed Virgin, and also Ain Oumm Daradj, "Fountain of the Mother of the Stairs"; its Biblical name is, according to some, En Rogel; according to others, the Upper Gihon (see below, under D). Cedron now begins to widen, and is covered with rich gardens, the "king's gardens" mentioned in the Bible. It receives the Hinnom, together with El Wad and the little valley which descends obliquely from Mount Sion. Its descent in a course of about two and a half miles is 550 feet, but in the latter half of this distance it is encumbered with fifteen to fifty feet of rubbish.

To the north of Mount Moria one more valley begins outside the Gate of Herod (Bab Zahira), passes to the south-southeast, under the northeastern angle of the plat-

form of the Temple, and ends at the bridge of Cedron. The numerous pools in this depression, near St. Anne's church, the traditional birthplace of the Blessed Virgin, have been excavated. Here should be located the Probatic Pool, or Pool of Bethsaida (A.V. Bethesda), with the five porches (John, v, 2). The locality of the Birket Israil, a reservoir 359 feet long by 126 feet wide, has also been determined, to the north, against the outer wall of the Temple.

(c) Mount Gareb (in D.V., "the hill Gareb"-Jer., xxxi, 39) stretches between the Transverse Valley, on the south, and the upper course of El Wad, on the east. It rises somewhat abruptly towards the northwest but offers no particularly prominent height except the rock of Calvary (2518 feet). In A.D. 70, Gareb was still covered, outside the walls, with gardens watered by springs (Bell. Jud., V, ii, 2).

There is still discussion as to whether Sion, the City of David, occupied the traditional Mount Sion or Ophel; but all admit that before the reign of Ezechias (727 B.C.) the city of Jerusalem extended over both hills, within the limits of "the first walls."

III. HISTORY

The history of Jerusalem is to a certain degree indistinguishable from that of Israel. It will suffice here to call attention to the most memorable occurrences in the city.

A. From its Origin to its Conquest by David

As seen above, Jerusalem is the ancient Salem, the capital of Melchisedech, king and priest of the Most High. Learning of the return of Abraham (then called Abram), who had been victorious over Chodorlahomor and his allies, Melchisedech came before the patriarch (Heb., vii, 1) "in the vale of Save, which is the king's vale" (Gen., xiv, 17). The king's vale is the Valley of Cedron, which begins to the north of the city (II Kings, xviii, 18; Antiq. Jud., I, x, 2.-Cf. IV Kings, xxv, 4; Jer., xxxix, 4). Like all the land of Chanaan, Jerusalem had been for many centuries in subjection to Chaldea; after Abraham's time it passed under the domination of Egypt. About the year 1400, while Israel was dreaming of liberation from the Egyptian yoke, certain Cossean peoples, called Khabiri, invaded Palestine, probably at the instigation of the Chaldeans or the Hethites, and took possession of the strongholds. Abd Hiba, king of U-ru-sa-lim, seeing his capital menaced, dispatched six letters in succession to his suzerain, Amenophis III, imploring succour. But in vain; Egypt herself was then undergoing a crisis. It was probably at this period that Jerusalem fell into the power of the Jebusites, who called it Jebus.

When the Hebrews came into the Land of Promise, the King of Jebus was Adonisedec (Lord of Justice)--a name which, both in form and sense, recalls Melchisedech (King of Justice). Although Adonisedec perished in the coalition of the five kings of Chanaan against Isra el (Jos., x, 26; xii, 10), Jerusalem, thanks to its strong position, long maintained its independence. In the distribution of the land among the children

of Israel, it was assigned to the descendents of Benjamin. The boundary between this tribe and that of Juda run from En Schems, on the Jericho road, to En Rogel, in the Valley of Cedron, then, following "the valley of the son of Ennom" (Jos., xv, 7, 8) or "of the children of Ennom" (Jos., xviii, 15, 16) of the Judges, Juda and Benjamin had tried to gain possession of it, but in vain, although they put its inhabitants to the sword and gave the city to the flames (Judges, i, 8); the city here spoken of is, as Josephus remarks (Antiq. Jud., v, ii, 2), only the lower city or suburbs. Jerusalem remained (Judges, xix, 12) independent of Israel until the reign of David.

B. From David to the Babylonian Captivity

Having become king over the Twelve Tribes of Israel, David contemplated making Jerusalem the political and religious centre of God's people. He assembled all the forces of the nation at Hebron, and advanced against Jebus. After long and painful efforts, "David took the castle of Sion" and "dwelt in the castle, and called it, the city of David: and built round about from Mello and inwards" (II Kings, v, 7, 9). This was about the year 1058 B.C. The king then caused cedar wood to be brought from Lebanon, and workmen from Tyre, to build him a palace. Soon after, the Ark of the Covenant was solemnly brought into the city of David and placed in a tabernacle. The king one day beheld the destroying angel soaring above Mount Moria, ready to strike the Holy City. The Lord stayed his arm, and David, in thanksgiving, bought the threshing-floor which was upon the summit of the hill, the property of Areuna (A.V. Araunah), or Ornan, the Jebusite, and there built an altar, upon which he offered holocausts (II Kings, xxiv; I Par., xxi). Thenceforward Mount Moria was destined to receive the temple of the Most High. David prepared the material and left the execution of the project to his son.

In the fourth year of his reign, Solomon began the building of the Temple, under the direction of artificers sent by Hiram, King of Tyre. Hiram also supplied cedar wood and cypress wood; 70,000 men were employed in transporting wood from Joppe (Jaffa) to Jerusalem and 80,000 more in quarrying stone in the neighbourhood and shaping it. The splendid monument was completed, as to its essential details, in seven years and a half, and with great pomp the Ark of the Covenant was brought from the City of David to the new sanctuary (II Kings, vi). The buildings were erected upon a great platform, constructed by means of immense containing walls. To the west rose the Holy of Holies, surrounded by a series of chambers in several tiers, in front of which, to the east, was a monumental facade, or pylon, formed by two lofty connected towers. Opposite to this entrance rose two great columns of bronze, like obelisks. Towards the east was the great court of the priests, square, surrounded with porches, and enclosing the altar of holocausts, the "sea of brass", and other utensils for sacrifices. This court was surrounded by others which were also enriched with galleries and superb

buildings (see TEMPLE OF JERUSALEM). Solomon next devoted thirteen years to erecting, south of the Temple, "the house of the Forest of Lebanon", his royal palace, with that of his queen, Pharaoh's daughter, as well as the buildings destined for his numerous family, for his guard, and for his slaves. He then connected the Temple and the new royal quarter with the City of David by a wall of enclosure, fortified the Millo (in D.V., Mello--III Kings, ix, 15), and "filled up the gulf of the City of David" (III Kings, xi, 27). The people began to murmur under taxation and forced labour.

Insurrection broke out when the proud Roboam, son of Solomon, began his reign (981-65). Ten tribes revolted from him to form the Kingdom of the North, or of Israel, and Jerusalem ceased to be anything more than the capital of the tribes of Benjamin and Juda. At the invitation of Jeroboam, who was elected sovereign of the new kingdom, Sesac (Seshonq, in Juda (976), took Jerusalem, and plundered the immense treasures of the Temple and the royal palace (III Kings, xiv, 25, 26). Asa (961-21) and Josaphat (920-894) enriched the Temple after their numerous victories over the neighbouring peoples. Under Joram (893-888) the Philistines, in alliance with the Arabs of the South, in their turn pillaged the Temple and slew or carried off all the sons of the king except the youngest, Ochozias, or Joachaz, the child of Athalia (II Par., xxi, 16, 17). On his murder, Athalia had her grandsons put to death, and seized the power. Joas alone, a child of one year, was saved from the massacre by the High-Priest Joiada and secretly reared in the Temple. At the age of six he was proclaimed king by the people, and Athalia was stoned to death. Joas (886-41) restored the Temple and abolished the worship of Baal; but later on, he allowed himself to be perverted, and caused the Prophet Zacharias, the son of Joiada, his preserver, to be put to death. He himself perished by the hands of his servants (IV Kings, xii; II Par., xxii). Under Amasias the Israelites of the North vanquished those of the South. attacked Jerusalem, and "broke down the wall of Jerusalem from the gate of Ephraim to the gate of the corner, four hundred cubits". The treasures of the Temple and of the royal palace were carried away to Samaria (IV Kings, xiv, 13, 14). Ozias, or Azarias (811-760), repaired the breach and fortified the wall with strong towers (II Par., xxvi, 9). His son Joatham (759-44), a wise and good king, strengthened the city by building "the high gate of the house of the Lord, and on the wall of Ophel he worked much" --south of the royal quarter (II Par., xxvii, 3; IV Kings, xv, 35).

While the Kings of Syria and Israel were marching against Jerusalem, God sent the Prophet Isaias to King Achaz (743-27), who was at "the conduit of the upper pool". There the Prophet foretold to him the repulse of the enemy and at the same time announced to him that the Messiah Emmanuel, should be born of a virgin (Is., vii, 3-14). Achaz used the wealth of the Temple to pay tribute to Theglathphalasar, King of As-

syria, whose protection he had sought against the Kings of Israel and Syria; he was impious enough to substitute the worship of Baal-Moloch for that of Jehovah.

Ezechias (727-696) hastened to abolish the worship of idols. Alarmed by the fall of the Kingdom of Israel (721), he erected a second wall to protect the suburbs which had come into existence to the north of Mount Sion and the Temple. He made an alliance with Egypt and with Merodach Baladan, King of Babylon, and refused to pay tribute to Assyria. Upon this, Sennacherib, King of Nineve, who was at war with Egypt, invaded Palestine from the south, and sent his chief officers from Lachis to Jerusalem, with a numerous army, to summon the king to surrender at discretion. But, upon the advice of Isaias, the king refused to surrender. To cut off the enemy's water, he dammed the spring of the Upper Gihon and brought the stream to the west of the City of David (II Par., xxxii, 3, 4, and 30). An Assyrian tablet (Taylor's Prism, col. 3) reports that Sennacherib, after vanquishing the Egyptians at Altaka and taking forty-six cities of Judea, shut up Ezechias in Jerusalem "like a bird in a cage" (Cuneiform Inscriptions of W. Asia, I, Pl. 39). This agrees with the Bible narrative; just as he was about to assault Jerusalem, Sennacherib was informed that Tharaca, King of Ethiopia, was advancing against him, and forthwith, leaving the Holy City, he set out for Egypt; but his army was miraculously destroyed by pestilence (IV Kings, xviii, 13; xix, 35-37; II Par., xxxii, 9-22; Is., xxxvi and xxxvii). Sennacherib organized another army at Nineve and vanquished Merodach Baladan of Babylon, Ezechias's suzerain. Thus it was that, according to the Assyrian inscriptions, Manasses, son of Ezechias (695-45) found himself a tributary of Assaradon and of Assurbanipal, Kings of Ninive (Prism of Assaradon, op. cit., III, p. 16; G. Smith, "History of Assurbanipal", p. 30). Manasses afterwards tried to shake off the Ninivite yoke. In 666 Assurbanipal's generals came to Jerusalem, put the king in chains, and carried him to Babylon, which was in vassalage to Ninive (II Par., xxxiii, (9-11). Manasses, however, soon obtained his liberty and returned to Jerusalem, where he repaired the evils he had caused. He also restored the city walls built by his father (II Par., xxxiii, 12-16).

Amon, one of the worst kings of Juda, was assassinated after a reign of two years. Josias, his son (641-08), guided by the Prophet Jeremias, destroyed the idolatrous altars and restored the Temple (621). Upon this occasion the High Priest Helcias found in a hall of the sanctuary an old copy of the Law of Jehovah given by Moses (IV Kings, xxii, 8-14; II Par., xxxiv, 14-21). In 608 the Pharaoh, Nechao II, marched against Assyria. Actuated by a scruple of conscience, the good king attempted to bar the way against his suzerain's adversary, and met his death at the battle of Mageddo (IV Kings, xxiii, 29, 30). Joachas, or Sellum, his successor, after reigning three months, was deposed by Nechao, and sent as a captive to Egypt, while Eliacim, to whom the conqueror gave the name of Jehoiakim (D.V. Joakim), was put in his place (607-600). In 601

Nabuchodonosor (Nebuchadnezzar) entered Judea to consolidate his father's power. He carried away as captives to Babylon certain notables of Jerusalem, together with the young Prophet Daniel. Joakim revolted against the Babylonian yoke, but his son Joachin (Jehoiachin), surrendered to Nabuchodonosor. The city was given over to pillage and 10,000 inhabitants, including the king, were carried off to Babylon (IV Kings, xxiiv, 1-16; cf. also II Par., xxxvi, 1-10). Sedecias, third son of Josias, succeeded his nephew (596-587). Urged by the Egyptian party, he, too, rebelled against his suzerain. Nabuchodonosor returned to Syria and sent his general, Nabuzardan, against Jerusalem with a formidable army. The city surrendered after a siege of more than eighteen months. The Temple, the royal palaces, and other principal buildings were given to the flames, and the city was dismantled. The sacred vessels, with everything else of value, were carried away to Babylon; the Ark of the Covenant alone could be hidden by the Jews. Sedecias, who, at the last moment, had fled with his army by the southern gate, was overtaken in the plain of Jordan, and his eyes were put out. The high priest, the chief military officers, and the notables of the land were massacred, and the remainder of the inhabitants were transported to Babylon with their blind king. Only husbandmen and the poor were left in the country, with a Jewish governor named Godolias (Gedaliah), who took up his residence at Maspha (IV Kings, xxiv, 18-20; xxv; II Par., xxxvi, 11-21).

C. From the Return out of Captivity to the Roman Domination

In 536 B.C. Cyrus, King of Persia, authorized the Jews to return to Palestine and rebuild the Temple of the Lord (I Esd., i, 1-4). The first convoy, consisting of 42,000 Jews, was dispatched under the leadership of Zerobabel, a prince of Juda. They hastened to restore the altar of holocausts, and in the second year the foundations were laid for another temple, which, however, owing to the difficulties raised by the Samaritans and other neighbouring peoples, was not completed until the sixth year of the reign of Darius (514). The old men could not restrain their tears when they saw the unpretentious character of the new building. In 458, under Artaxerxes I, Esdras came to Jerusalem with 1500 Jews as governor of Judea and completed the political and religious restoration of Israel. Thirteen years later Nehemias, with the authorization of Artaxerxes, completely restored the Holy City.

By the victory of Issus and the capture of Tyre, Alexander the Great, King of Macedon, became master of Western Asia. In 332 he marched against Jerusalem, which had remained faithful to Darius III. The High-Priest Jaddus, believing that resistance would be useless, went out to meet the great conqueror, and induced him to spare the Jews (Antiq. Jud., XI, viii, 3-6). After Alexander, Jerusalem suffered much from the long struggle between the Seleucids of Syria and the Ptolemies of Egypt. Palestine fell to Seleucus Nicanor; but in 305 Ptolemy Soter gained entrance into Jerusalem on a

Sabbath Day by stratagem, and carried away a number of Jews to Egypt (Antiq. Jud., XII, i, 1). A century later (203) Antiochus the Great again tore the Holy City from the grasp of Egypt. When, in 199, it fell once more into the power of Scopas, a general of Ptolemy Epiphanes, the Jews helped the troops of Antiochus, who had just defeated Scopas's army, to definitively drive the Egyptian garrison out of the citadel of Jerusalem (Antiq. Jud., XII, iii, 3). The Seleucids conceived the unfortunate idea of introducing hellenistic—that is, pagan—notions and manners among the Jewish people, especially the sacerdotal and civil aristocracy. The high-priesthood had become a venal office; Jason was supplanted by Menelaus, and Menelaus by Lysimachus. These unworthy priests at last took up arms against each other, and blood flowed freely on several occasions in the streets of Jerusalem (II Mach., iv). Under pretence of stifling these turmoils, Antiochus Epiphanes in 170 entered the Holy City, stormed the fortifications of the Temple, plundered it of its most sacred vessels, massacred 40,000 persons, and carried off as many more into bondage (I Mach., i, 17-25; II Mach., v, 11-23). Two years later he sent his general Apollonius to suppress the Jewish religion by force and replace it at Jerusalem with Greek paganism. The city was dismantled, and the Acra, the citadel which commanded the Temple and served as a garrison for the Syrians and an asylum for renegade Jews, was reinforced. The statue of the Olympian Jupiter was set up in the Temple of the Most High, while a cruel and bloody persecution everywhere broke out against those Jews who were faithful to their traditions (I Mach., i, 30-64; II Mach., v, 25, 26; vi, 1-11).

The priest Mathathias of Hasmon and his five sons known as the Machabees, organized an heroic resistance. Judas, succeeding on the death of his father (166), gained four victories over the Syrian armies, occupied Jerusalem (164), purified the Temple, strengthened the fortifications, and erected a new altar of holocausts. He also repaired the walls of the city, but could not gain possession of the citadel (Acra) which was held by a Syrian garrison. After various repulses and victories he made an alliance with the Roman Empire (I Mach., viii). Jonathas succeeded and maintained the struggle with no less heroism and success. He built a wall between the upper city and the Acra, as a barrier against the Syrians. Simon took the place of his brother when Jonathas fell by treachery (142). Three years later, he drove out the Syrian garrison of Acra, razed the fortress, and even levelled the hill on which it had stood—a gigantic undertaking which occupied the entire population for three years (Antiq. Jud., XVIII, vi, 6; Bell. Jud., V, iv, 1). Demetrius II and after him Antiochus Sidetes finally recognized the independence of the Jewish people. Simon, with two of his sons, was assassinated by his son-in-law, and his third son, John Hyrcanus I (135-06), succeeded him on the throne. Antiochus Sidetes, with a formidable army, came to besiege Jerusalem, but consented to withdraw for a ransom of 500 talents, and Hyrcanus took that sum from the treasures of the

royal sepulchre (Antiq. Jud., XIII, viii, 24; Bell. Jud., I, ii, 5). Hyrcanus I was succeeded by his son Aristobulus I, who combined the title of pontiff with that of king, reigning however only one year. His brother and successor, Alexander Jannaeus (105-78), considerably enlarged the boundaries of the kingdom by his many brilliant victories. Upon his death Alexandra, his widow, took the reins of government into her hands for nine years, after which she entrusted the high-priesthood and the kingship to her son Hyrcanus II (69), but his brother Aristobulus took up arms to dispute the possession of the throne. By virtue of the alliance with Rome which Simon had entered into, Pompey, the Roman general, came from Damascus to Jerusalem, in 65 B.C., to put an end to the civil war. The partisans of Hyrcanus opened the gates of the city to the Romans, but those of Aristobulus entrenched themselves within the fortifications of the Temple, and could not be dislodged until after a siege of three months. Their resistance was at last overcome on a Sabbath Day; as many as 12,000 Jews were massacred, and Aristobulus was driven into exile. Pompey restored Hyrcanus to the high-priesthood, with the title of ethnarch, and declared Jerusalem a tributary of Rome (Antiq. Jud., XIV, iv, 1-4; Bell. Jud., I, vii, 1).

D. Under the Roman Domination; until A.D. 70

Caesar authorized Hyrcanus to rebuild the walls that had been demolished by Pompey; but in 48 B.C. he appointed Antipater, the Idumean, governor of Palestine, and the latter, four years afterwards, obtained the appointment of his eldest son, Phasael, as prefect of Jerusalem, and of his youngest son, Herod, as governor of Galilee. When Antipater died (43), Antigonus, the son of Aristobulus II, seized the throne, sent Hyrcanus II into exile among his allies, the Parthians and imprisoned Phasael, who killed himself in despair (Antiq. Jud., XIV, xiii, 5-10; Bell. Jud., I, xiii, 1-10). Herod fled to Rome, where the Senate proclaimed him King of the Jews (40). But it was three years before he wrested Jerusalem from Antigonus, and only after bringing conflagration and bloodshed upon the city. Antigonus, the last of the Hasmonean dynasty, was condemned to death (Antiq. Jud., XIV, xiv, 4; xvi, 1; Bell. Jud., I, xiv, 4; XVIII) In 24 B.C., Herod the Great built himself a splendid castle upon the site of the Tower of Baris, or of Birah (II Esd., ii, 8), named it Antonia, in honour of Mark Antony, and took up his residence there (Bell. Jud., V, v, 8; Antiq. Jud., XV, xi, 5). He also built a theatre and an amphitheatre for gladiatorial combats. In 19 B.C. the king, whose origin as well as his cruelty rendered him odious to the Jews, thought to win their goodwill by reconstructing the Temple of Zorobabel, little by little, until it should be as splendid as that of Solomon. He also enlarged the sanctuary by extending the galleries to the fortress of Antonia, on the north, and connecting it, on the south, with the site of Solomon's palace, so as to erect there a superb stoa, or basilica. The opening of the new Temple took place in the year 10 B.C. (Antiq. Jud., XV, xi, 3-6), but thousands of

workmen laboured at it until A.D. 64 (Antiq. Jud., XX, ix, 7). He built a second strong castle at the northwest angle of Mount Sion, and flanked it with three superb towers--Hippicus, Phasael, and Mariamne. He also opened the tomb of the kings of Juda, in quest of treasure, after which, to allay the popular indignation aroused by his sacrilege, he erected a monument of white marble at the entrance of the tomb (Anti. Jud., VII., xv, 3; XVI, vii, 1) Herod was nearing the end of his reign of nearly forty-one years when Jesus, the Divine Saviour, was born at Bethlehem. A few months after the visit of the three Wise Men of the East, and the massacre of the Innocents he died of a hideous malady, hated by all his people (4 B.C.).

Archelaus, his son, took the title of king, but in the course of the same year Rome left him with only the title of Ethnarch of Judea, Samaria, and Idumea. Ten years later, he was deposed, and Judea was reduced to the status of a Roman province. Coponius, Marcus Ambivius, Annius Rufus, Valerius Gratus (A.D. 14) and Pontius Pilate (26) were successively appointed procurators of the country. Pilate occasioned several seditions, which he stifled with extreme brutality. Under the administration of Pontius Pilate, Jesus Christ was arrested and put to death. The Passion, Resurrection, and Ascension of the Divine Saviour have rendered Jerusalem -- which was already glorious -- the most celebrated city in all the world. The enthusiasm with which, after the Day of Pentecost, thousands of Jews declared themselves disciples of Jesus Christ provoked a violent persecution of Christians, in which the deacon Stephen was the first martyr (Acts, vi, 8-15). Pontius Pilate having one day seized the funds of the Corban to pay for the construction of an aqueduct, a violent uprising of the Jews was thus occasioned (35). Summoned to Rome to give an account of his conduct, he was banished by Caligula (Antiq. Jud., XVIII, iii, 2). Two years later, the emperor made Herod Agrippa I, grandson of Herod, tetrarch of the countries beyond Jordan; in 41 Claudius made him king of Judea. Agrippa undertook the construction of the third wall, to the north of the city (Antiq. Jud., XIX, vii, 2; Bell. Jud., V, iv, 2). To please the Jews, he caused St. James the Greater to be beheaded, and intended the same lot for St. Peter, when an angel came and delivered the Prince of the Apostles from his chains (Acts, xii, 1-19). Soon afterwards, early in 44, the king died miserably at Caesarea (Acts, xii, 23; Antiq. Jud., XIX, viii, 2).

At this epoch there came to Jerusalem Sattan, who was called among the Greeks Helen, Queen of Adiabene, a country situated on the Adiabas, which is an eastern tributary of the Tigris. Converted to Judaism, together with her numerous family, she comforted the poor with her bounty during a terrible famine (cf. Acts, xi, 28). It was she who caused to be excavated, for herself and her family, to the north of the city, the imposing sepulchre known as the Tomb of the Kings (Antiq. Jud., XX, ii, 6; iv, 3). At this time the Blessed Virgin died, and was buried at Gethsemani. St. Peter returned

from Antioch to preside at the First Ecumenical Council (Acts, xv, 1-3). (See JUDAIZERS, sub-title *Council of Jerusalem*.) The King of Judea was replaced by a procurator, and Agrippa II, son of the preceding Agrippa, was made Prince of Chalcis and Perea, and charged with the care of the Temple of Jerusalem (Antiq. Jud., XX, ix, 7). He finished the third wall, which had been commenced by his father, and brought the work upon the sanctuary to a termination in A.D. 64. Cuspius Fadus, Tiberius Alexander, and Cumanus were successively procurators, from 44 to 52. Then came Felix, Festus, and Albinus, from 52 to 66. With the last four, disorders and massacres occurred incessantly. Gessius Florus (66) surpassed the wickedness of his predecessors, and drove the people to revolt against the Roman domination; Agrippa and his party advocated patience, and appealed to Rome against the procurator; but after several days of civil war, the insurgent party triumphed over the pacific, massacred the Roman garrison, and set fire to the palaces. Cestius Gallus, President of Syria, arrived on 30 October, 66, with the Twelfth Legion, but only met with repulses, and had to retire (Antiq. Jud., XX, xxi; Bell. Jud., II, xvii, 6; xix, 1-9). The Christians, recalling Christ's prophecies (Luke, xix, 43, 44), withdrew beyond the Jordan into Agrippa's territory, led by their bishop, St. Simeon (St. Epiphanius, "De mensuris", xiv, xv). Nero commanded his general, Vespasian, to suppress the insurrection, and Vespasian, accompanied by his son Titus, invaded Galilee, in A.D. 67, with an army of 60,000 men. Most of the strong places had been captured, when the death of the emperor occasioned a suspension of hostilities. After the ephemeral reigns of three emperors, aggregating eighteen months, Vespasian was raised to the throne in November, 69.

Titus received from his father the command of the Army of the East, and in the following year, at the season when the Holy City was crowded with those who had come to the Feast of the Passover, he began to lay siege to it. On the 14th day of Kanthic (Bell. Jud., V, xiii, 7), or of the Hebrew month Abib--the day of the Passover, corresponding to 31 March--Titus took up his position on Mount Scopus with the Fifth, Seventh, and Fifteenth Legions, while the Tenth Legion occupied the Mount of Olives. On the other side, John of Giscala held the Temple, the Antonia, and the new town at Bezetha, with 11,000 men, and Simon, the son of Giora, held the upper and lower city, on the southwestern hill, with 10,000 men. Attacking the third wall, on 9 April, the legions captured that line of defences after fifteen days' fighting. Once master of the new town, Titus took up a position to the west, on the ground known as "the Camp of the Assyrians" (Bell. Jud., V, vii, 2). An attack upon the second wall immediately followed. Five days later, the Romans gained entrance by a breach, but were repulsed, and mastered it only after five days of fierce and incessant fighting. Titus could then approach the Antonia, which offered the only way of access to the Temple, and the citadel of Herod, which covered the first wall to the north of Mount Sion. After three

days given to repose, the causeways and movable towers were made ready against the Hippicus tower and the Antonia. But on 17 May the works raised against the Antonia were ruined and destroyed by the soldiers of John of Giscala, and two days later the movable towers which threatened the Hippicus were set on fire by Simon's men, while a heroic struggle was being maintained on both sides. The Roman general then employed his whole army for three days in surrounding the city with an earthwork of circumvallation, designed to cut off all communication with the city, and so to reduce the place by famine. This soon produced terrible results (Bell. Jud., XII, v, 2).

After three weeks of fresh preparations, the battering-rams effected a breach in the wall connecting the Antonia with the Temple, near the Pool of Struthius, but in vain. Two days later, the wall crumbled to pieces above a mine prepared by John of Giscala, and a handful of Roman soldiers gained entrance to the Antonia by surprise, at three o'clock in the morning of 20 June (Bell. Jud., VI, i, 1-7). Titus at once had the fortress demolished, in order to use the materials in constructing mounds against the Temple. For three weeks the Jews desperately defended first the outer porticoes and then the inner, which the Romans entered only at the cost of enormous sacrifices. At last on 23 July, a Roman soldier flung a blazing torch into one of the halls adjoining the Holy of Holies. In the midst of frightful carnage the fire spread to the neighbouring buildings, and soon the whole platform was one horrible mass of corpses and ruins (Bell. Jud., VI, ii, 1-9; iii, 1, 2; iv, 1-5). The Romans then set fire to the palace in the hollow of El Wad, and to the Ophel; next day they drove the Jews out of the Acra and burned the lower city as far as the Pool of Siloe (Bell. Jud., VI, vi, 3-4). There still remained the third rampart, the formidable stronghold of the upper city, where the defenders of the Acra, laden with booty, had joined Simon's men. Eighteen days were devoted to the preparation of the *aggeres* (mounds) to the northwest and northeast of the fortress, but scarcely had the battering-rams breached the walls when John and Simon fled secretly with their troops. On the eighth day of Elul (1 August) the city was definitively in the power of the Romans, after a siege of 143 days. To those who congratulated him Titus replied: "It is not I who have conquered. God, in His wrath against the Jews, has made use of my arm" (Bell. Jud., VIII, v, 2).

The walls of the Temple and those of the city were demolished. But Titus wished to preserve the fortress of the upper city, with the three magnificent towers of Herod's palace. Besides, the upper city was needed as a fortified station for the Tenth Legion, which was left to garrison Jerusalem. During this siege -- one of the most sanguinary recorded in history -- 600,000 Jews, according to Tacitus (Hist., V, xiii), or, according to Josephus, more than a million, perished by the sword, disease, or famine. The survivors died in gladiatorial combats or were sold into slavery.

IV. DEVELOPMENT OF THE CITY AND ITS CHIEF MONUMENTS

A. Sion, or the City of David, according to Tradition

"David took the castle of Sion" and "dwelt in the castle, and called it, the city of David: and built round about from Mello and inwards" (II Kings, v, 7, 9). When Solomon had completed the Temple and the House of the Forest of Lebanon, 100 cubits long, 50 cubits wide, and 30 cubits high, with a porch 30 cubits by 50, he erected the palaces and other buildings. Lower down, towards the south, in the locality which figures in the post-Exilic texts as the Ophel, we find the Gabaonites (Jos., ix, 22) and other Nathinites -foreign races placed at the service of the Levites to furnish wood and water for the sacrifices (I Esd., ii, 58; vii, 2f; viii, 20; II Esd., iii, 26; xi, 21).

Did Sion, the City of David, occupy the eastern hill or that situated to the southwest? Before the exile, the Jews could not have been ignorant of the location, for the boundary wall of Sion enclosed the sepulchres of the prophet-king and fourteen of his successors; the last two Books of Kings repeat this thirteen times (III Kings, ii, 10; xi, 43; xiv, 9, 24, etc.; IV Kings, viii, 24, etc.), and Paralipomenon bears similar witness. On their return from exile, the old men (I Esd., iii, 12) must have remembered in what quarter of the city the burial-places of David and his descendants were situated; in point of fact, Nehemias does not hesitate to use them as a landmark (II Esd., iii, 16). Hyrcanus I and Herod the Great even opened these tombs of the kings to find treasure in them (Antiq. Jud., VII, xv, 3; XIII, vii, 4; Bell. Jud., I, ii, 5). The white marble monument erected by the latter seems to have remained standing until A.D. 133 (Dion Cassius, "Hist. of Rome", LXIX, iv). At any rate the tomb of David was well known among the Jews and the disciples of Christ in the time of St. Peter (Acts, ii, 29). Now Josephus, an eyewitness, says that the Jebusite city, which became the City of David, occupied the high western plateau of the southwestern hill, which is now known as Mount Sion. In his time it was called "the upper city" (Antiq. Jud., XVI, vii, 1, etc.), and again the upper *agora*, or market (Bell. Jud., V, iv, 1. Cf. I Mach., xii, 36; xiv, 36). The word *Millo* (in D.V. *Mello*) is always translated *Acra* in the Septuagint and Josephus, and, according to the latter, the *Millo*, or *Mello*, occupied the high plateau on the northeast side of the same hill, and was in his time called *Acra*, "lower city" and "lower market" (Antiq. Jud., XVI, vii, 1; Bell. Jud., V, iv, 1; I Mach., i, 38). It was this hill, commanding the Temple, that was levelled by the Hasmoneans (Antiq. Jud., XIII, vi, 6; Bell. Jud., I, ii, 2). The Talmudists agree with the Jewish historian as to the position of the two markets (Neubauer, "La Geographie du Talmud", p. 138). Eusebius of Caesarea (Onomasticon, s. v. "Golgotha"), St. Jerome (Ep. cviii, "Ad Eustoch."), St. Epiphanius ("De mens.", xiv), and all later writers, Jewish and Christian, locate Sion, the City of David, upon the southwestern hill, which has never borne any other name than that of Mount Sion.

B. Sion on Ophel

During the last fifty years many writers have rejected tradition and sought information from the Bible alone, giving some twenty different topographical theories. The theory which places Sion upon Ophel is the only one which (apart from certain discrepancies as to the sites of the Mello, the Acra, the palaces of Solomon, etc.) is worth a moment's consideration. The partisans of this theory, base it upon the following passage: "This same Ezechias was he that stopped the source of waters of Gihon, and tied them away underneath toward the west of the city of David " (II Par., xxxii, 30). They maintain that Sion was at Ophel for the following reasons:

- (a) En Rogel-"the fountain Rogel"-a spring of the Valley of Cedron (Jos., xv, 7; xviii, 16) is the Bir Eyub, or "Well of Job", situated 2300 feet to the south of the Ain Sitti Mariam, or Fountain of the Virgin.
- (b) In former times, as now, the Fountain of the Virgin was the only spring which flowed in the vicinity of Jerusalem.
- (c) The Fountain of the Virgin is, therefore, the Upper Gihon of the Bible.
- (d) Now it was Ezechias who made the tunnel of Siloe.
- (e) By this passage the king brought the waters of the Fountain of the Virgin to the west of Ophel, that is, of the City of David.
- (f) The Books of Machabees explicitly state that Sion was on the mountain of the Temple or Moria.

The following objections are made:

(a) The Bir Eyub, that is to say, the Well of Job, is neither a spring nor a fountain (*en* or *ain*), but a well (*bir*), 125 feet deep, in its present condition, and is supplied only by rain-drainage and infiltration. In the sixth century, Cyril of Scythopolis (Vita S. Sabae, lxii), and then Euty chius of Alexandria (Annals), and Moudjir ed Din ("Hist. de Jerus.", ed. Sauvaire, p. 188) tell us that, after a great drought which lasted five years (509-14), in the twenty-third year of Anastasius, John, Patriarch of Jerusalem, caused a well to be dug to a depth, according to Cyril, of about 255 feet, or according to the Arab historian, of 10 cubits (about 82 feet), but without finding any water. The Bir Eyub, therefore, is no Chanaanean fountain, and the En Rogel must necessarily be the Fountain of the Virgin, the natural peculiarities of which must have made it famous in the country and fitted it to serve as a boundary mark between the tribes of Benjamin and Juda. The grotto of this spring, too, would have afforded a good place of concealment to David's two spies, who hid at En Rogel (II Kings, xvii, 17).

(b) In the time of Ezechias there were many springs of running water in the neighbourhood of Jerusalem, and the king stopped them all (II Par., xxxii, 2-5). Josephus relates that when Titus was besieging Jerusalem many springs flowed so abundantly that they sufficed, not only to give drinking water to the Romans but to

irrigate the gardens (Bell. Jud., V, iv, 2). West of the city the ground was covered with gardens (Bell. Jud., VI, ii, 2; vii, 2) and this is why the western gate bore the name of *Gennath*, "Gate of the Gardens". Here Titus pitched his camp and here the officers of Sennacherib halted (IV Kings, xviii, 17. Cf. Is., vii, 3). Among the living waters of Jerusalem the Babylonian Talmud commemorates the "Beth Mamila" (Neubauer, *op. cit.*, p. 146), that is, the Birket Mamilla. Cyril of Scythopolis (*loc. cit.*) relates that in the great five-years' drought "the waters of Siloe and of the Lucillians ceased to flow". Lastly Josephus says that a conduit under the Gate of Gennath brought water to the Tower of Hippicus (Bell. Jud., V, vii, 3). Several fragments of ancient aqueducts have been discovered under the Jaffa Gate and about the Hammana el Batrak, commonly called the Pool of Ezechias.

(c) Adonias, the first-born son of David the king, secretly assembled his numerous partisans upon "the stone of Zoheleth, which was near the fountain Rogel", where he offered rams and bulls, and was to have been proclaimed king at the end of the banquet. But David, apprised of the plot by the Prophet Nathan, sent Solomon, with the Prophet and the royal guard to Gihon, there to receive the sacred unction without Adonias's knowledge, and to be proclaimed king to the sound of trumpets (III Kings, i, 5-9, 33-45). On the Bank of the Mount of Offence opposite to the Fountain of the Virgin, is an immense rocky ledge called Ez Zahweile. This has been identified by Clermont-Ganneau with the stone of Zoheleth ("Quart. Stat." 1810, p. 251). Wilson and Warren are of the same opinion (The Recovery of Jerus., p. 305). Conder supports the identification upheld "by the common opinion of the learned" ("Quart. Stat.", 1884, p. 242, n. 1). If the City of David had been on Ophel, would Adonias have held his treasonable banquet under the windows of the royal palace? Would David have been ignorant of this large and noisy gathering until Nathan's arrival? Would he have sent Solomon into the Valley of Cedron, at the foot of Zoheleth? Would not the partisans of Adonias have heard the sound of trumpets and the shouts of the people before the royal procession had returned to Sion (III Kings, i, 41)? The fact appears to be that, while Adonias had withdrawn to a spot in the Valley of Cedron near En Rogel, Solomon was sent from the opposite side, where was the source of Gihon.

(d) There is no document which in any way attributes the construction of the tunnel of Siloe to Ezechias. On the other hand, Isaias, in the reign of Achaz, the father of Ezechias, speaks (viii, 6) of "the waters of Siloe" (a word which means "sent." - John, ix, 7) "that go with silence". The Hebrew inscription found in 1881 on the wall of the tunnel is, according to Sayce ("Fresh Light", London, 1883, p. 116), earlier than Ezechias, and may even date from the time of Solomon. Conder, Maspero, Stade, Renan, and others hold that it antedates the time of Ezechias.

(e) There is now no question of the fact that the pool of Siloe was always without the walls of the city (Bell. Jud., V, iv, 2; ix, 4). Now Ezechias brought the waters of Gihon to a cistern within the city (IV Kings, xx, 20; Ecclus., xlvi, 19, fragment of the Hebrew text). Isaias (xxii, 11) says, "You made a ditch between the two walls" -i.e., between the old wall and that of Ezechias, northwest of Mount Zion. The Hebrews never divided the cardinal points of the compass.

(f) In the historical books Zion is applied to the city of Jebus, which, with the Mello, became the City of David. But in the poetic books Zion becomes, by metaphor, a synonym for the Temple (Ps. lxxvii, 68), or for Jerusalem (Ps. cxxxii, 3; lxxxvi, 5). Zion sometimes designates the people of Israel (Is., x, 32; Soph., iii, 14), or Judea (Lam., iv, 22), and even the Jewish community in the dispersion (Jer., xxxi, 12; Zach., ii, 7). In the days of the Machabees the City of David, to the west of the Temple, has become the resort of infidels (I Mach., i, 35 sqq.). Symbolically, the name of Zion was transferred to the Temple and its fortress, which had become the only remaining stronghold of Israel's faith. But Ophel was always excluded from this symbolical Zion (Mach., xii, 36, 37). The text of the Bible, studied and interpreted on the spot, indicates the same hill for the locality of the holy Zion, the City of David, as does tradition. Archaeology, too, positively confirms tradition.

C. Zion the Upper City

The sides of the traditional Mount Zion contain a great many dwelling-places wholly or partly excavated in the rock. These were, according to the common opinion, the houses of the aboriginal inhabitants. While constructing the Gobat School and the Protestant cemetery, in 1874-75, to the south of the western plateau of Zion, Maudslay discovered the line of an ancient fortress. Its base is a scarp cut vertically in the rock, about 600 feet in length, and 40-50 feet in height. To the west and east of this colossal scarp are salients hewn out of the rock, their sides measuring 40-50 feet. These are the rock bases of flanking towers. The first is 20 feet in height, and rests upon a plateau of rock rudely shaped into a talus. Along the scarp runs a ditch, which is also dug out of the living rock, having a depth of from 5 to 10 feet and an average width of 18 feet (Conder, "The Rock Scarp of Zion" in "Quart. Stat." 1875, pp. 81 sq.) In 1894 Bliss took up and continued the work of exploration. From the eastern tower the scarp turns toward the northeast, following the outlines of the high plateau, and the ditch follows uninterruptedly in the same direction. On account of some houses which are grouped about the Holy Cenacle, the exploration has only been carried on to a length of 185 feet. The scarp was once crowned by a wall (some of the stones of which, cut and bevelled, were found *in situ*), rises to a height of 240 feet above the bed of the Ennom (Hinnom) (see Bliss). This fortress, which was originally isolated, and was constructed with marvellous art, and which was so solid as to defy every attack, occupied the high

city indicated by Josephus, "upon much the highest hill, straight along its length, which, by reason of its strong position, had been named by David the citadel" (Bell. Jud., V, iv, 1). It was about 2300 feet in length and 800 in breadth. To the north, where it was protected by valley of no great depth, Herod caused a strong castle to be built, which made the position almost impregnable, even against the Roman legions. Thanks to the dimensions and other indications supplied by Josephus, it is thought that the Tower of Phasaël may be recognized in the first courses of masonry of the actual Tower of David, and that of Hippicus in the tower to the northwest of the city citadel; that of Mariamne ought to flank the western wall. On the same side the Gate of the Valley formerly opened (II Par., xxvi, 9; II Esd., ii, 13, 15; iii, 13), and at the northwest angle rose the Tower of the Furnaces (II Esd., iii, 11; xii, 37), which defended the Gate of the Corner before the Herodian structure existed (IV Kings, xiv, 13; II Par., xxv, 23). The high city, which, according to Josephus, was the aristocratic quarter, contained the Cenacle, according to tradition, on the south, next, the palace of Caiaphas, farther on, that of Annas, and, at the southeast angle of Herod's palace, the prison where St. James the Greater was beheaded.

From the Tower of Phasaël the wall descended, from west to east, upon the southern slope of Mount Sion, and ended at the enclosure of the Temple. An important fragment of this rampart has been discovered to the east of the Tower of David, and, farther on, another piece, 290 feet long, flanked by two towers, the stone facing of which, on the side towards the valley, remains intact to a height of 39 feet (Warren, "Quart. Stat.", 1884, pl. III). This wall was pierced by the ancient Gate of Ephraim (IV Kings, xv, 13; II Par., xxv, 23). According to tradition, St. Peter was cast into prison in the suburb of Ezechias; after being delivered by the Angel, he made his way to the city proper, where he found the iron gate open (Acts, xii; 3-11). As early as the sixth century a church marked the site of the house of Mary, the mother of John Mark, fifty paces south of this wall (Acts, xii, 12-17). The southern wall of Mount Sion probably formed part of the wall by which David joined the City of Jebus and the Mello (the Acra of the Septuagint). This hill, according to Josephus, is the lower city, the Akron of the Syrians, which was levelled by the Hasmoneans (Antiq. Jud., XIII, vi, 6). It contained the palace of the Hasmoneans and that of Helen of Adiabene (Bell. Jud., VI, vi, 3).

To return to the south of the primitive fortress, a wall of later construction descends from the outer angle, southeast of the eastern tower, towards the pool of Siloe. It is a work of the kings of Juda, if not of Solomon, but, as Bliss has remarked, it has been restored again and again--on the last occasion, by the Empress Eudocia (A.D. 450-60). At a point 130 feet from the beginning of the wall, exploration has brought to light the remains of a gate with three superimposed floorings of successive periods. It opens upon a street under which passes a drain leading to Ennom. This is the Dung Gate (II

Esd., ii, 13), which Jeremias (xix, 2) calls the Earthen Gate; Josephus calls it the Gate of Essenians, and indicates its position in the quarter of Bethso (from the Hebrew Bethsoa, "a dunghill") (Bell. Jud., V, iv, 2). Here Mount Sion is crossed by two ancient aqueducts of different heights, which bring water from south of Bethlehem (Bliss, op. cit., pp. 17-82). About 2000 feet from this gate, Guthe, in 1881, and, later, Bliss, have proved the existence of another gate, also containing three floors and protected by a tower. This is the Gate of the Fountain (II Esd., ii, 14; iii, 15; "water gate", xii, 36) and, probably, also "the gate that is between two walls, and leadeth to the king's garden" by which Sedecias escaped (Jer., lii, 7; IV Kings, xxv, 4). Starting from the tower, the wall takes a northwesterly direction and then turns abruptly to the north, leaving the Pool of Siloe outside the city, in accordance with what we are told by Josephus (Bell. Jud., V, iv, 2; ix, 4). To the south of the Pool of Siloe the valley is crossed by a great dam, 233 feet long, a vast rain-water reservoir. The dam is 20 feet thick and is finished off, at about half its height, by a wall 10 feet thick, flanked by seven buttresses of equal strength. In spite, however, of successive reinforcements, it was unequal to resisting the pressure of the water. The Empress Eudocia had a second dam built, fifty feet to the north of the former one. This is "the king's aqueduct" (or pool) of II Esd. ii, 14.

Bliss followed the eastern wall of Mount Sion for only 650 feet, that is, as far as 150 feet north of the Pool of Siloe. According to Nehemias (II Esd., iii, 16-19), the wall passed in front of the street of stairs which went down to the sepulchre of David, then by the reservoir which Josephus calls the Pool of Solomon (Bell. Jud., V, iv, 2), and, lastly, by the House of the Heroes--all places as yet unidentified. The wall then formed an angle and then a re-entrant angle (II Esd., iii, 24) but we are ignorant as to the point where it crossed the valley to ascend Ophel. On the eastern flank of Ophel it has ascertained that a small fragment of a wall exists, running from southwest to northeast and, 100 feet farther on, a remarkable hydraulic structure anterior in date to the tunnel of Siloe. The latter is a gallery, hewn in the rock, leading to a wall which goes down to the surface level of the Fountain of the Virgin, whence water could be drawn by means of buckets and ropes (Wilson and Warren, op. cit., pp. 248 sq.). Beyond doubt, "the water gate" and "the tower that stood out" (II Esd., iii, 26; xii, 36) must be located hereabouts. The wall has been found again at a distance of 700 feet in the same direction; it then turns to the north for a length of 70 feet and runs into the southeast angle of the Temple enclosure. At the elbow formed by this wall, there rose a tower, the "great tower that standeth out" (II Esd., iii, 27), intended as a defence for the royal palace. In course of time the kings of Juda prolonged the wall of Ophel so as to protect the eastern enclosure of the Temple. This line was pierced by numerous gates: "the horse gate" (II Par., xxiii, 15; IV Kings, xi, 16; II Esd., iii, 28), discovered in 1902, by the English engineers, facing the southeast angle of the Haram, which is called "Solomon's Stables"; the

eastern gate (of the Temple), corresponding to "the Golden Gate"; the Mephkad, or "judgment gate" (II Esd., iii, 30) opposite to the Golden Gate; the Prison Gate (D.V. "watch gate") (II Esd., xii, 38); the Gate of Sur (IV Kings, xi, 6); "the gate of the shield-bearers" (D.V.), or "of the guard" (A.V.) (IV Kings xi, 19); the Gate of Benjamin (Jer., xxxvii, 12; xxxviii, 7) are names of different gates which existed previously or protected suburbs that stretched north of the Temple from the time of Ezechias to Herod. Lastly, there is the Sheep Gate (D. V. "flock gate") (II Esd., iii, 1; xii, 38) near the Probatic Pool.

Of the ancient Temple nothing is now to be seen but the holy rock and a number of cisterns. The Harami esh Sherif is four-sided, and has right angles on the southwest and northeast. The southern wall measures 922 feet and is pierced by three entrances: the Double Gate, the Triple Gate, and the Single Gate--remarkable works of the type of the Golden Gate and, like it restored in the sixth century of our era. The eastern and the northern walls are each 1042 feet in length; the western 1601. The stones are carefully shaped and bevelled, 3 and a half feet in height, the longest of them 20 to 39 feet long, while on the south there is one course, 600 feet long, in which the stones are 7 feet high. At the southwest angle this colossal wall goes down to a depth of 85 feet below the present surface of the soil. Forty feet to the north of this angle may be seen three rows of stones, forming a vault 51 feet in width, called "Robinson's Arch", after the explorer who first recognized in these remains the fragments of a viaduct. The English engineers have as a matter of fact discovered, 54 feet to the west of this fragment of vaulting, and 55 feet below the actual level of the soil, three courses of the corresponding upright supporting wall. At the foot of Mount Sion, 246 feet from Robinson's Arch, more remains have been found of the same viaduct, of which, indeed, Josephus clearly makes mention (Antiq. Jud. XIV, iv, 2; Bell. Jud., I, vii, 2; VI, vi, 2). The supporting wall rests upon a paved foundation, which in its turn is supported by a bed of earth 23 feet in thickness. In this mass of earth, in which no traces of masonry are found, there lie vaulting-stones of from 3 to 3 1/2 feet in height and width, and 7 feet in length--the remains of a much older bridge. Authorities have attributed the first viaduct to Herod and the second to the Kings of Juda, or even to Solomon. At the very bottom of the valley there is a channel cut into the rock and vaulted in the Phoenician manner; this is an aqueduct which was later used as a drain (Wilson and Warren, *op. cit.*, pp. 76-111; Perrot and Chipiez, "Hist. de l'art", II, 168. Cf. III Kings, xi, 27).

The second entrance to the Temple, called "Barclay's Gate", opens 180 feet farther north; then, beyond the Wailing Place, comes a third gate called "Wilson's Arch". This is a viaduct arch 42 feet along the axis and 39 feet in span, built of blocks from 6 to 12 feet in length. In the bottom of the valley, round about the viaduct. Wilson has discovered some very ancient habitations and pieces of handiwork which seem to be of

Phoenician origin. The viaduct, which is supposed to date from the time of Herod, was reconstructed in the Byzantine period. It both connected the Temple with Mount Sion and served as an aqueduct for the canal that runs from Bethlehem. Near Wilson's Arch there is an ancient vaulted pool, Birket el Bouraq, to which an aqueduct leads down from the citadel. Josephus places the Xystus, the gymnasium constructed by the High Priest Jason, between the two viaducts. Beyond Wilson's Arch the first city wall joined the Temple enclosure (Wilson and Warren, op. cit., pp. 76 sq.).

D. The Second Wall

"The second wall", says Josephus, "began at the gate that is called Gennath, which belongs to the first city wall. Enclosing only the southern district, it continued as far as the Antonia" (Bell. Jud., V, iv, 2). It is the work of Ezechias and of Manasses. In 1881, in the course of excavations for the foundations of a house, 20 feet to the north of the ditch of the citadel, a wall was brought to light, constructed of large stones, extending east and west to a distance of about 100 feet. At its western extremity it forms a somewhat obtuse angle with a stronger and still better constructed wall which runs north (Selah Merrill, "Quart. Stat.", 1886, pp. 21 sq.; 1887, p. 217; 1888, p. 21). In 1900 a Greek high school was built 180 feet farther on, and it was found that the rock is almost on a level with the ground to the west, while it forms a counterscarp to the east. In the accumulated fillings of the hollow remains of medieval structures were discovered; but the explorations on this spot were not followed up. Many Palestinologists, however, see here marked indications of a ditch. At the northeast angle of the Greek school, C. Schick ("Quart. Stat.", 1897, p. 219; 1883, p. 19) had already ascertained that the wall turns once more at an angle eastwards. Up to this point the city wall skirts the Pool of Ezechias at a distance of 180 feet to the west and 65 feet to the north. In building the great Greek bazaars south of the Basilica of the Holy Sepulchre, the workmen came upon a scarp which had once been crowned with a thick wall, some fine blocks of which were found still *in situ*; the wall sloped back from the face of the rock (Schick, "Quart. Stat.", 1888, p. 571; 1894, p. 146). Next, in 1893, while building the German Protestant church which took the place of the church of St. Mary the Latin, the engineers found that the latter edifice had stood upon filled ground. Digging down 30 feet below the actual level of the ground, they came to the rock, and then, under the great nave of the old church, they found a strong wall to the east and the west, though in bad preservation. It keeps, however, some of its facing in the shape of carefully dressed slabs. Guthe (in "Zeitschrift des Deutschen Palaestinavereins", XVII, p. 128) and Schick (in "Quart. Stat.", 1894, p. 146), with many others, regard this as a part of the second wall.

In the time of Christ, Calvary was thus shut out from the perimeter of the second city enclosure. Indeed, the existence of the Jewish hypogea-the Holy Sepulchre, another

one 30 feet to the west, and a third to the northeast-leaves no room for doubt on this point; for only the kings enjoyed the privilege of sepulture within the city. Some thirty years ago English engineers asserted that the wall of Ezechias must necessarily enclose Golgotha, because this zigzag city wall would, otherwise, have been built contrary to all the rules of military art. But since then the exploration of ancient Jewish and Chanaanitish cities has revealed irregularities of the same kind. While, upon the line indicated, the haphazard diggings made on various structures have all brought to light fragments of braces of a homogeneous wall, the religious communities in the Christian quarter to the northwest of Golgotha have in recent times executed important building operations without finding any traces of ditch or of rampart.

At the angle where the wall turned northwards should be found the new Gate of Ephraim (II Esd., xii, 38). But the course of the wall from this point is less easy to follow. It was, very probably, replaced in the time of Hadrian by the colonnaded street which led, almost in a straight line, from Mount Sion to the Gate of Damascus, and which was founded upon rock throughout. Following this street, we pass, on the left, the first courses of the facade of Constantine's Basilica, which was completely discovered in 1907 and, on the right, 230 feet from this structure, the Khan ez Zeit, which is built in a Jewish cistern partly hewn out of the rock. To the east of this cistern, on the slope of El Wad, the rock appears, cut obliquely. Farther on, the Old Gate (II Esd., iii, 6; xii, 38) may be placed. Where the Street of the Columns was crossed by another, coming from the west a tetrapylon marked the intersection; one superb marble column of it still remains *in situ*, 23 feet high, leaning against a fine wall of Roman construction. Investigation has demonstrated the existence, at a point 200 feet west of this column, of a counterscarp and a deep ditch, running from south to north (Schick, "Quart. Stat.", 1887, p. 154). It was by this gate that, according to tradition, Jesus went out from the city to the place of His crucifixion. North of the column and slightly to the east, at a distance of 100 feet, is to be seen a rocky scarp which extends about 250 feet towards the north. Near here the wall descended toward into El Wad, where it came to the Fish Gate (II Par., xxxiii, 14; II Esd., iii, 3; xii, 38). This gate opened on the road by which the Tyrian fishermen came from Jaffa (cf. II Esd., xiii, 16). The wall then crossed Mount Bezetha, and the Tower of Hananeel (Jer., xxxi, 38; II Esd., iii, 1; xii, 38) must be located on the ridge which descended from the Hill of Jeremias to Mount Moria, and which was the vulnerable point of the Holy City. On this same ridge there was another tower, or stronghold, as early as the period of the kings of Juda; Nehemias, who restored it, named it Birah, an Aramaic word derived from the Assyrian *biratu*, "palace", or "fortress of the temple" (in D.V., "tower of the house"; II Esd., ii, 8). This tower (see I Mach., xiii, 53; etc.) bore, in the time of Josephus, the hellenized name of Baris. Under the Hasmonean dynasty, the whole rock on which this tower stood was removed on all

sides, to a depth of 30 feet on the south, and of 15 feet on the north, the length of the excavation being 350 feet from east to west. On the north, where there is a deep cistern, the mountain was levelled away to a distance of 160 feet (cf. I Mach., xiii, 53). Herod caused the reservoir to be vaulted over, and built the fortress of Antonia on the rock of Baris and on the southern esplanade (Bell. Jud.. V, v, 8). It was in this building that Pontius Pilate had his praetorium, where Jesus was condemned to death. In saying that the second wall "went up to the Antonia", Josephus does not indicate where it ended, but only its direction. He himself does not place the Antonia at the end of the wall of Ezechias; on the contrary, he says that the Romans could approach it only after they had become masters of the city as far as the first wall (Bell. Jud., V, ix). From the Tower of Hananeel the wall was prolonged to the Sheep (or Flock) Gate (II Esd., iii, 1, 31; xii, 38), near the Probatic Pool, with the five porches, and the other great reservoirs, necessarily, within the walls.

E. The Third Wall

From A.D. 41 to 44 Herod Agrippa I undertook to build the third wall, which also began at the Tower of Hippicus and crossed the Camp of the Assyrians to the north, as far as the octagonal Tower of Psephinus (Antiq. Jud., XIX, vii, 2; Bell. Jud., V, iv, 3). Traces of this tower were found at the northwest corner of the city, at the place where the Qasr Djaloud, or Tower of Goliath, was erected in the twelfth century. Thence Agrippa's wall took an easterly direction, towards the Towers of the Women, opposite the sepulchre of Helen of Adiabene, which is situated 2000 feet to the north. The Towers of the Women, some traces of which have been found, protected the gate which corresponded to the Fish Gate. It still stands, as to a considerable part of its height, though sunken into the ground, below the actual Gate of Damascus, or Bab el Amoud. Thence the wall passed over the royal grottoes (Bell. Jud., V, iv, 3) to cross the ridge of Bezetha. The stone of this lofty hill is of excellent quality, and could be transported in immense blocks as far as the Temple by means of inclined planes. This is why, as early as the time of Solomon, the hill was used as a quarry, as is shown by the figure of a Phoenician cherub cut in the wall of one of the royal grottoes. Already perforated with numerous caverns, the hill was cut in two under Agrippa I and the cut served as a ditch for the new city wall. Thus it was that the summit became a separate hill, called, since the sixteenth century, the Hill of Jeremias. It again served as a quarry in the period of the Crusades and its present aspect has been taken on since the time of Christ. From the royal grottoes, the wall continued eastwards as far as the height above Cedron, and then turned south to rejoin the second city wall. The line of the third wall has with slight modifications been kept in that of the actual city.

BARNABAS MEISTERMANN

Jerusalem (A.D. 71-1099)

Jerusalem (A.D. 71-1099)

I. TO THE TIME OF CONSTANTINE (71-312)

When Titus took Jerusalem (April-September, A.D. 70) he ordered his soldiers to destroy the city (Josephus, "De bello Jud.", VI, ix). They spared only the three great towers at the north of Herod's palace (Hippicus, Phasael, Mariamne) and the western wall. Few Jews remained. The Roman Tenth Legion held the upper town and Herod's castle as a fortress; Josephus says that Titus handed the fields around to his soldiers ("Vita", 76). The presence of these heathens would naturally repel Jews, though in this period there was no law against their presence in Jerusalem. The Jewish Rabbis gathered together at Jabne (or Jamnia, now Jebna) in the plain, northwest of the city, two hours from Ramleh.

Meanwhile the Christian community had fled to Pella in Paraea, east of the Jordan (southeast of Jenin), before the beginning of the siege. The Christians were still almost entirely converts from Judaism (Eusebius, "Hist. Eccl.", IV, v). After the destruction they came back and congregated in the house of John Mark and his mother Mary, where they had met before (Acts, xii, 12 sq.). It was apparently in this house that was the Upper Room, the scene of the Last Supper and of the assembly on Pentecost. Epiphanius (d. 403) says that when the Emperor Hadrian came to Jerusalem in 130 he found the Temple and the whole city destroyed save for a few houses, among them the one where the Apostles had received the Holy Ghost. This house, says Epiphanius, is "in that part of Sion which was spared when the city was destroyed" -- therefore in the "upper part" ("De mens. et pond.", cap. xiv). From the time of Cyril of Jerusalem, who speaks of "the upper Church of the Apostles, where the Holy Ghost came down upon them" (Catech., ii, 6; P. G., XXXIII), there are abundant witnesses of the place. A great basilica was built over the spot in the fourth century; the crusaders built another church when the older one had been destroyed by Hakim in 1010. It is the famous Coenaculum or Cenacle -- now a Moslem shrine -- near the Gate of David, and supposed to be David's tomb (Nebi Daud).

During the first Christian centuries the church at this place was the centre of Christianity in Jerusalem, "Holy and glorious Sion, mother of all churches" (Intercession in "St. James' Liturgy", ed. Brightman, p. 54). Certainly no spot in Christendom can be more venerable than the place of the Last Supper, which became the first Christian church. The constant use of the name Sion for the Coenaculum has led to considerable discussion as to the topography of Jerusalem. Many writers conclude that it is on Mount Sion, which would therefore be the southwest hill of the city (Meistermann,

"Nouveau Guide de Terre Sainte", Paris, 1907, p. 121, plan). Others (Baedeker, "Palaestina u. Syrien", 6th ed., 1904, p. 27) oppose this tradition on the strength of the passages in the Old Testament that clearly distinguish Sion from Jerusalem and state that the Lord dwells in Sion and that the king's palace is there (Is., x, 12; viii, 18; Joel, iii, 21; etc.). So Sion would be the hill on the west, the place of the Temple and David's palace. It was that later the name Sion began to be used for all Jerusalem. Josephus never uses it at all; already in the Old Testament the way was prepared for this extended use. Jerusalem is the "daughter of Sion" (Jer., vi, 2, etc.). All its inhabitants without distinction are "Sion" (Zach, ii, 7, etc.). In early Christian times Sion seems to have lost its spell, meaning as one definite hill, and to have become merely another name for Jerusalem. Naturally then they called their centre there by the name of the city, although it did not stand on the original Mount Sion. The pilgrim Etheria (Silvia) at the turn of the fourth century, always speaks of the Coenaculum as Sion, just as the Holy Sepulchre is always Anastasis.

From this Coenaculum the first Christian bishops ruled the Church of Jerusalem. They were all converts from Judaism, as were their flocks. Eusebius (Hist. Eccl., IV, v) gives the list of these bishops. According to a universal tradition the first was the Apostle St. James the Less, the "brother of the Lord". His predominant place and residence in the city are implied by Gal., i, 19. Eusebius says he was appointed bishop by Peter, James (the Greater), and John (II, i). Naturally the other Apostles when they were at Jerusalem shared the government with him (Acts, xv, 6, etc.; Eus., "Hist. Eccl.," II, xxiii). He was thrown from a rock, then stoned to death by the Jews about the year 63 (Eus., ib.; Josephus, "Antiq. Jud.," XX, ix, 1; ed. cit., p. 786). After his death the surviving Apostles and other disciples who were at Jerusalem chose Simeon, son of Cleophas (also called Our Lord's brother, Matt., xiii, 55), to succeed him. He was bishop at the time of the destruction (70) and probably then went to Pella with the others. About the year 106 or 107 he was crucified under Trajan (Eus., "Hist. Eccl.," III, xxxii). The line of bishops of Jerusalem was then continued as follows:

- Judas (Justus), 107-113;
- Zachaeus or Zacharias;
- Tobias;
- Benjamin;
- John;
- Matthias (d. 120);

- Philip (died c. 124);
- Seneca;
- Justus;
- Levi;
- Ephraim;
- Joseph;
- Judas Quiriacus (d. between 134-148).

All these were Jews (Eus., "Hist., Eccl.", IV, v). It was during the episcopate of Judas Quiriacus that the second great calamity, the revolt of Bar-Kochba and final destruction of the city, took place. Goaded by the tyranny of the Romans, by the re-erection of Jerusalem as a Roman colony and the establishment of an altar to Jupiter on the site of the Temple, the Jews broke out into a hopeless rebellion under the famous false Messias Bar-Kochba about the year 132. During his rebellion he persecuted the Jewish Christians, who naturally refused to acknowledge him (Eus., "Chron.", for the seventeenth year of Hadrian). The Emperor Hadrian put down this rebellion, after a siege that lasted a year, in 135. As a result of this last war the whole neighbourhood of the city became a desert. On the ruins of Jerusalem a new Roman city was built, called *Ælia Capitolina* (*Ælia* was Hadrian's family *nomen*), and a temple to Jupiter Capitolinus was built on Mount Moria. No Jew (therefore no Jewish Christian) was allowed under pain of death inside the town. This brought about a complete change in the circumstances of the Church of Jerusalem. The old Jewish Christian community came to an end. In its place a Church of Gentile Christians, with Gentile bishops, was formed, who depended much less on the sacred memories of the city. Hence the Church of Jerusalem did not for some centuries take the place in the hierarchy of sees that we should expect. *Ælia* was a town of no importance in the empire; the governor of the province resided at Caesarea in Palestine. The use of the name *Ælia* among Christians of this time marks the insignificance of the little Gentile church, as the restoration of the old name Jerusalem later marks the revival of its dignity.

Even as late as 325 (Nicaea I, can. vii) the city is still called only *Ælia*. The name lasted on among the Arabs in the form *Iliya* till late in the Middle Ages. As the rank of the various sees among themselves was gradually arranged according to the divisions of the empire, Caesarea became the metropolitan see; the Bishop of *Ælia* was merely one of its suffragans.

The bishops from the siege under Hadrian (135) to Constantine (312) were:

- Mark (the first Gentile bishop, d. 156);
- Cassian;
- Publius;
- Maximus;
- Julian;
- Caius;
- Symmachus;
- Caius II;
- Julian II (ordained 168);
- Capito (d. 185);
- Maximus II;
- Antonius;
- Valens;
- Dolichianus (d. 185);
- Narcissus (Eus., "Hist. Eccl.", V, xii). Narcissus was a man famous for his virtues and miracles, but hated by certain vicious people in the city who feared his severity. They accused him of various crimes and he, for the sake of peace, retired to an unknown solitude (Eus., "Hist. Eccl.", VI, ix). The neighbouring bishops, hearing nothing more of him, proceeded to elect and consecrate Dios as his successor. Dios was succeeded by Germanion and Gordios. Then suddenly Narcissus reappeared, an old man of 110 years. The other bishops persuaded him to resume his place as bishop. Too old to do anything but pray for his flock, he made a Cappadocian bishop, Alexander, who came on a pilgrimage to Jerusalem, his coadjutor.
- Alexander thus became a practically diocesan bishop even before the death of Narcissus in 212. Alexander was a friend of Origen and founded a library that Eusebius used for his "History" (VI, x). He died in prison in the Decian persecution (250). Then followed
- Mazabanes or Megabezes (d. 266);

- Hymenaeus (d. 298);
- Zabdas;
- Hermon (d. 311);
- Macarius (d. 333).

II. CONSTANTINE AND THE HOLY PLACES (312-337)

During the episcopate of Macarius a great change came to the whole empire that incidentally affected the See of Jerusalem profoundly. The Christian Faith was acknowledged as a *religio licita* and the Church became a recognized society (Edict of Milan, Jan., 313). At Constantine's death (337) Christianity had become the religion of the Court and Government. As a natural result the Faith spread very rapidly everywhere. The same generation that had seen Diocletian's persecution now saw Christianity the dominant religion and the old paganism gradually reduced to country villages and out-of-the-way towns. There was then a great movement of organization among Christians; churches were built everywhere. A further result of the freedom and the dominance of Christianity was a revival of enthusiasm for the holy places where the new religion had been born, where the events that everyone now read about or heard of in sermons had taken place. Already in the fourth century, there began those great waves of pilgrimage to the Holy Land that have gone on ever since. It was in the fourth century that the Bordeaux pilgrim and Etheria made their famous journey thither (*Peregrinatio Silviae*). St. Jerome (d. 420) says that in his time pilgrims came there from every part of the world, even from distant Britain (Ep. xlv ad Paulam; lxxxiv, ad Oceanum). A great number of monks from Egypt and Libya also came and established themselves in the desert by the Jordan. This led to an increased respect for the bishop who ruled over the very places where Christ had lived and died. These pilgrims on their arrival found themselves under his jurisdiction; they took part in the sacrifices of his church and eagerly watched the rites that were carried out at the Mount of Olives, the Coenaculum, and the Holy Sepulchre. Etheria's careful account of all she saw in the churches of Jerusalem at Eastertide is typical of this interest. When the pilgrims returned home they remembered and told their friends about the services they had seen in the most sacred places of Christendom; and they began to imitate them in their own churches. Thus a great number of our well-known ceremonies (the Palm Sunday procession, later the Stations of the Cross, etc.) were originally imitations of local rites of Jerusalem. All this could not fail to bring about an advancement of rank for the local bishop. From the freedom of the Church the development was inevitable that

changed the Bishop of Ælia, mere suffragan of Caesarea, into the great "Patriarch of the Holy City Jerusalem and of the whole Land of Promise".

Meanwhile another result of these pilgrimages was the discovery of the Holy Places. Naturally the pilgrims when they arrived wanted to see the actual spots where the events they had read of in the Gospels had happened. Naturally too, each such place when it was known or conjectured became a shrine with a church built over it. Of these shrines the most famous are those built by Constantine and his mother St. Helena. St. Helena in her eightieth year (326-327) came on a pilgrimage and caused churches to be built at Bethlehem, and on the Mount of Olives. Constantine built the famous church of the Holy Sepulchre (Anastasis). Eusebius (*Vita Constantine*, III, xxvi) says that the place of Calvary in about 326 was covered with dirt and rubbish; over it was a temple of Venus. Emperor Hadrian had built a great terrace round the place enclosed in a wall, on this he had planted a grove to Jupiter and Venus (St. Jerome. Ep. 58). When St. Helena came and was shown the place she determined to restore it as a Christian shrine. By order of the emperor all the soldiers of the garrison were employed to clear away the temple, grove, and terrace. Underneath they found Golgotha and the tomb of our Lord. Constantine wrote to Bishop Macarius saying: "I have nothing more at heart than to adorn with due splendour that sacred place", etc. (*Vita Const.*, III, xxx). Two great buildings were erected near each other on this spot. To the west the rock containing the tomb was carved away, leaving it as a little shrine or chapel standing above ground. Over it was built a round church covered by a dome. This is the Anastasis, which still has the form of a rotunda with a dome, containing the Holy Sepulchre in the middle. Quite near, to the east, was a great basilica with an apse towards the Anastasis, a long nave, and four aisles separated by rows of columns. Above the aisles were galleries; the whole was covered by a gable roof. Around the apse were twelve columns crowned with silver, at the east were a narthex, three doors, and a colonnade in front of the entrance. This basilica was the Martyrium; it covered the ground now occupied by part of the Katholikon and St. Helena's chapel. Etheria speaks of it as "the great church which is called the Martyrium" (*Per. Silv.*, ed. cit., p. 38). Underneath it was the crypt of the Invention of the Cross. The Mount of Calvary was not enclosed in the basilica. It stood just at the southeast side of the apse. Etheria always distinguishes three shrines, Anastasis, Crux, Martyrium. The place of the Cross (Calvary) was in her time open to the sky and surrounded by a silver balustrade (*op. cit.*, p. 43). People went up to it by steps (*Eus.*, "*Vita Const.*", III, xxi-xl). Later in the fifth century St. Melania the younger (439), a Roman lady who came with her husband Pinianus to Jerusalem where they both entered religious houses, built a small chapel over the place of the Crucifixion. These buildings were destroyed by the Persians in 614.

It is not possible to enter here upon the endless discussion that still takes place as to the authenticity of this shrine. The first question that occurs is as to the place of the wall of Jerusalem in Christ's time. It is certain that He was crucified outside the city wall. No executions took place within the city (Matt., xxvii, 33; John xix, 17; Hebr. xiii, 12, etc.). If then it could be shown that the traditional site was within the wall (the second wall built by Nehemias) it would be proved to be false. It is, however, quite certain that all attempts to prove this have failed. On the contrary, Conder found other contemporary tombs near the traditional Holy Sepulchre, which show that it was without the city, since Jews never buried within their towns. Supposing then its possibility, we have this chain of evidence: if Hadrian really built his temple of Venus purposely on the site, the authenticity is proved. Constantine's basilica stood where that temple was; that the present church stands on the place of Constantine's basilica is not doubted by any one. A number of writers (as Eusebius, *op. cit.*) of the fourth century describe the temple as built on the site of Calvary in order to put a stop to its veneration by Christians, just as the temple of Jupiter was built purposely where the Jewish Temple had been. We have seen that an unchanging Christian community lived at Jerusalem down to Hadrian's time (Bar-Kochba's revolt). It would be strange if they had not remembered the site of the Crucifixion and had not revered it. The analogy of Hadrian's profanation of the Temple leaves no difficulty as to a similar deliberate profanation of the Christian sanctuary. The theory of Fergusson who thought that the cave under the Qubbet-es-Sachra, on the site of the Temple, was the Holy Sepulchre of Constantine's time, and Conder and Gordon's site outside the Damascus gate (Conder, "The City of Jerusalem", London, 1909, pp. 151-158) hardly deserve mention. With the finding of the Holy Sepulchre and the building of the Anastasis and Martyrion is connected the story of the Invention of the Holy Cross. It is told by Rufinus (*Hist. Eccl.* X, viii, P. L. XXI, 477--about the year 402), Paulinus of Nola (*Ep.* xxi, v; P. L. LXI, 329; A.D. 403) and others. When the soldiers were removing the old balustrade and digging out the Holy Sepulchre they found to the east of the tomb three crosses with the inscription separated from them. Bishop Macarius discovered which was our Lord's Cross by applying each in turn to a sick woman. The third Cross healed her miraculously (see the lessons of the second nocturn for the feast, 3 May). Paulinus (*op. cit.*) adds that a dead man was raised to life by the Cross of Christ.

The fame of the great shrines, Anastasis and Martyrion, then began to eclipse that of the Coenaculum. From this time the Bishop of Jerusalem celebrated the more solemn functions in the Martyrion. But Constantine had a new "Church of the Apostles" built over the Coenaculum. Other shrines that go back at least to his time are the place of the Ascension on the top of the Mount of Olives, where he built a church, and the still extant magnificent basilica at Bethlehem.

III. THE PATRIARCHATE (325-451)

From the time of Constantine then begins the advancement of the See of Jerusalem. The first General Council (Nicaea I, 325) meant to recognize the unique dignity of the Holy City without disturbing its canonical dependence on the metropolis, Caesarea. So the seventh canon declares: "Since custom and ancient tradition have obtained that the bishop in Ælia be honored, let him have the succession of honour (*echeto ten akolouthian tes times*) saving however the domestic right of the metropolis (*te metropolei sozomenou tou oikeiou axiomatos*)." The canon is in the "Decretum" of Gratian, dist. 65, vii. The "succession of honour" means a special place of honour, an honorary precedence immediately after the Patriarchs (of Rome, Alexandria, Antioch); but this is not to interfere with the metropolitan rights of Caesarea in Palestine. The situation of a suffragan bishop who had Precedence over his metropolitan was an anomalous one that obviously could not last. The successors of Macarius were: Maximus II (333-349); St. Cyril of Jerusalem (350-386); Eutychius intruded 357-359; Irenaeus intruded 360-361; Hilarion intruded 367-378); John II (386-417); Praylios (417-421); Juvenal (421-458). Already in the time of St. Cyril difficulties arose about his relation to his metropolitan. While he was defending the Faith against the Arians, Acacius of Caesarea, an extreme Arian, summoned a Synod (358) to try Cyril for various offences, of which the first was that he had disobeyed or behaved with insubordination towards Acacius, his superior. It is difficult to be sure exactly what the accusation was. Sozomen (IV, xxv) says it was that he had disobeyed and had refused to acknowledge Caesarea as his metropolis; Theodoret says it was only about his quite lawful claim to precedence. The case shows how difficult the position was. Cyril refused to attend the synod and was deposed in his absence. His refusal again opens a question as to his position. Did he refuse merely because he knew what Acacius was a determined Arian and would certainly condemn him, or was it because he thought that his exceptional "succession of honour" exempted him from the jurisdiction of any but a patriarchal synod? The three usurpers, Eutychius, Irenaeus, Hilarion, were Arians intruded into his see by their party during his three exiles.

It was Juvenal of Jerusalem (420-458) who at last succeeded in changing the anomalous position of his see into a real patriarchate. From the beginning of his reign he assumed an attitude that was quite incompatible with his canonical position as suffragan of Caesarea. About the year 425 a certain tribe of Arabs was converted to Christianity. These people set up their camp in the neighbourhood of Jerusalem. Juvenal then proceeded to found a bishopric for them. He ordained one Peter as "Bishop of the Camp" (*episkopos parembolon*). This Peter (apparently the sheikh of the tribe) signed at Ephesus in 425 with that title. Juvenal's action may perhaps be explained as merely the ordination of an Arabic-speaking coadjutor for these people whose language he himself did not

know; but Peter's title and presence at Ephesus certainly suggest that he considered himself a diocesan bishop. Juvenal had no sort of right to set up a new diocese nor to ordain a suffragan to his own see. The "See of the Parembolai" disappeared again in the sixth century. From the Acts of Ephesus it appears that Juvenal had ordained other bishops in Palestine and Arabia. A number of bishops of the Antiochene patriarchate wrote a letter to the Emperor Theodosius II in which they appear to have some doubts as to the regularity of their position since, as they say, they have "been ordained formerly by the most pious Juvenal" (Mansi, IV, 1402). Now the right of ordaining a bishop always meant in the East jurisdiction over him. We see an instance of this in the Acts of the Council. Sidas, Bishop of Phaino in Palestine, describes Juvenal as "our bishop" (*ho episkopos meon* = "our metropolitan", apparently). Clearly then even before the council Juvenal had been making tentative efforts to assume at least metropolitanical rights. At the council he made a stroke whose boldness is amazing. He tried to get his see recognized not merely as independent of and equal to Caesarea, but superior to the great Patriarchate of Antioch. Antioch, he pretended, must submit to the see that canonically (in spite of its honorary position) was the suffragan of Antioch. His attempt failed altogether. He might perhaps have shaken off the authority of Caesarea; but this was too startling. Nevertheless the opportunity was a splendid one for him. We see Juvenal's cleverness in seizing it. At Ephesus he was the second bishop present. Celestine of Rome was represented by his legates; Cyril of Alexandria was resident, but was already having trouble with Candidian the Imperial Commissioner; John of Antioch arrived late and then set up a rival council in favour of the heretics, Nestorius of Constantinople was the accused. Juvenal's own metropolitan (of Caesarea) was not present. The schismatical attitude of John of Antioch especially gave Juvenal his chance. Surely Cyril's council would not support John. Juvenal then, under colour of supporting Cyril and the pope, tried to get the council to acknowledge no less than his own jurisdiction over Antioch. In a speech he explained to the Fathers that John of Antioch ought to have appeared at the council to give the oecumenical synod an explanation of what had happened (his late arrival and the anti-council he was setting up) and to show obedience and reverence to the Apostolic See of Rome and the Holy Church of God at Jerusalem. "For it was especially the custom according to Apostolic order and tradition that the See of Antioch be corrected and judged by that of Jerusalem. Instead of that John with his usual insolence had despised the council" (Mansi, IV, 1312). To mix up his own impudent claim with the just grievance of the other Fathers was a master-stroke. But Cyril would have none of him. The pretence was too wildly absurd. Leo the Great, writing afterwards to Maximus of Antioch, says that Juvenal had tried to confirm his insolent attempt by forged documents; but Cyril had warned him not to urge such law-less claims (Ep. 119, ad Max.). So this first attempt did not succeed.

For the next twenty years matters remained as they had been. Juvenal still went on acting on his claim and behaving as the chief authority of Palestine. After the Council he ordained a Bishop of Jamnia ("Vita S. Euthymii", P. G., CXIV, c. 57).

When the Monophysite heresy began Juvenal was at first on the side of the heretics. He was present at the Robber synod of 449, on the side of Dioscurus, and joined in the deposition of Flavian of Constantinople. That fact should have ruined his chance of getting any advantage from Chalcedon (451). Yet he was clever enough to turn even this position to his advantage. Chalcedon at last gave him a great part of what he wanted. At first he appeared at the council with the other Monophysites as an accused. But he saw at once which way the tide had turned, threw off his former friends, turned completely round and signed Pope Leo's dogmatic letter to Flavian. The orthodox fathers were delighted. In a general council the titular rank given to Jerusalem by Nicaea would naturally make itself felt. The adherence of so venerable a see was received with delight, the illustrious convert deserved some reward. Juvenal then explained that he had at first come to a friendly understanding with Maximus of Antioch, by which the long dispute between their sees should be ended. Antioch was of course to keep her precedence over Jerusalem and the greater part of her patriarchate. But she would sacrifice a small territory, Palestine in the strict sense (the three Roman provinces so called), and apparently Arabia, to make up a little patriarchate for Jerusalem. The emperor (Theodosius II) had already interfered in the quarrel and had pretended to cut a much larger territory away from Antioch for the benefit of Jerusalem. So this arrangement appeared as a sort of compromise. The council in the seventh and eighth sessions accepted Juvenal's proposal (Maximus's correspondence with Leo the Great shows that he was still not quite satisfied) and made Jerusalem a patriarchate with this small territory. From this time then Jerusalem becomes a patriarchal see, the last (fifth) in order and the smallest. So was the number, afterwards so sacred, of five patriarchates established. The Quinisext Council (692) admits this order. It enumerates the patriarchs of Rome, Constantinople, Alexandria, Antioch and adds: "After these he of the city of Jerusalem" (can. xxxvi). Such too is the order proclaimed by the Fourth Council of Constantinople (869) in Canon xxi and incorporated in our canon law (C.I.C., dist. 22, c. 7). Since Chalcedon no one has disputed the place of Jerusalem in the hierarchy of patriarchates. But it will be noticed how late its rank was given, how unedifying the conduct of the bishop who obtained it. Like the other comparatively modern Patriarchate of Constantinople (made finally by the same council, can. xxviii) it represents a later concession that upset the much older, more venerable ideal of three patriarchates only -- Rome, Alexandria, Antioch. Jerusalem owes its place not to St. James, the brother of the Lord, but to the astute and unscrupulous Juvenal. Nothing, then, could show a greater ignorance of the whole situation than the naive proposal of Anglicans

at various times (e.g. the Non-Jurors in their letter to the patriarchs, 1720) that everyone should admit Jerusalem "mother of all Churches" as the first see of all.

The frontiers of this new patriarchate, as established by Chalcedon, are to the north the Lebanon, to the west the Mediterranean, to the south Sinai (Mount Sinai was certainly originally included in its boundaries), to the east Arabia and the desert. Under the patriarch were these metropolitans:

- Caesarea in Palestine (who now had to obey her former subject), Metropolis of Palaestina I, with twenty-nine suffragans;
- Scythopolis (in the Vulgate Bethsan, Jos. xvii, 11; Judges i, 27; now Besan, seven hours south of Tiberias), Metropolis of Palaestina II (Samaria), with fourteen suffragans;
- Petra (Sela' in the Hebrew, II Kings, xvi, 7, Is. xvi, 1 in the Wadi Musa, half-way between the Dead Sea and the Red Sea), Metropolis of Palaestina III with thirteen suffragans.

IV. FROM JUVENAL TO THE SARACEN CONQUEST (458-636)

The patriarchs of this time were: Theodosius (Monophysite usurper, 452); Anastasius (458-478); Martyrius (479-486); Salustius (486-494); Elias (494-513): see ELIAS OF JERUSALEM); John III (513-524); Peter (524-544); Macarius (544-574); (Eustachius, Origenist, intruded -563); John IV (574-593); Neamus (593-601); Isaac (601-609); Zacharius (609-631); Moderatus (631-634); Sophronius (634-638 or 644). An important event for the city was the residence there of the Empress Eudocia, wife of Theodosius II. She arrived first in 438 and then settled at Jerusalem from 444 to her death about the year 460 (see EUDOCIA). She spent this last part of her life in ardent devotion at the Holy Places, in beautifying the city and building churches. She rebuilt the walls along the south so as to include the Coenaculum within the city. On the north she built the church of St. Stephen at the traditional place of his martyrdom (now the famous Dominican convent and Ecole biblique). Justinian I (527-565) also added to the beauty of the city by many splendid buildings. Of these the most famous was a great basilica dedicated to the Blessed Virgin with a house for pilgrims attached. It stood in the middle of the city, but has now completely disappeared. He also built another great church of the Blessed Virgin at the southern end of the old Temple area (now the Al-aqsa Mosque). The famous mosaic map of Jerusalem discovered at Madaba (Guthe and Palmer, "Die Mosaikkarte von Madaba", 1906) gives an idea of the state of the city in Justinian's time. During this period the See of Jerusalem, like those of Alexandria and Antioch, was troubled continually by the Monophysite schism. Under

Juvenal the great crowd of monks who had settled in Palestine broke out into a regular revolution against the government and against the patriarch, whose change of front at Chalcedon they bitterly resented. They set up one of their own number, Theodosius as anti-patriarch. For a short time (in 452) Juvenal had to give way to this person. So also in the other sees of the patriarchate orthodox bishops were expelled and Monophysites (such as Peter the Iberian at Majuma-Gaza) were set up in their place. The Empress Eudocia was at first an avowed Monophysite and helped that party nearly all the time she was in the city. Juvenal fled to Constantinople and implored the help of the emperor (Marcian, 450-457). He returned with a body of soldiers who reinstated him, killed a great number of the monks, and finally took Theodosius, who had fled, prisoner. Theodosius was then kept in prison at Constantinople almost till his death. The disturbance was not finally put down till 453. Eventually the orthodox Abbot Euthymius converted Eudocia, who died in the communion of the Church (c. 460).

The further Monophysite disturbances affected Jerusalem, of course, too. Martyrius accepted the Henoticon (see his letter to Peter Monogus of Alexandria in Zacharias Scholasticus: "Syriac Chronicle", ed. Ahrens and Krueger, Leipzig, 1899, VI, i, pp. 86, 18-20) with the bishops of his patriarchate. Elias of Jerusalem supported Flavian of Antioch in resisting the Emperor Anastasius' (491-518) condemnation of Chalcedon. He was then banished and John, Bishop of Sebaste, intruded in his place (513) (see ELIAS OF JERUSALEM). But John became orthodox, too, and broke his engagement with the Monophysite emperor as soon as he had possession of the see (Theophanes Confessor, "Chronographia", ed. de Boors, Leipzig, 1883-1885, I, 156). Meanwhile St. Sabas (d. 531) from his monastery by the Dead Sea was a mighty support to the orthodox. John III of Jerusalem accepted the decrees of the orthodox Synod of Constantinople in 518 and the formula of Pope Hormisdas (514-523). John III's successor, Peter, held a synod in September, 536, in which he proclaimed his adherence to Chalcedon and Orthodoxy by agreeing to the deposition of the Monophysite Anthimus of Constantinople (deposed in that year; the Acts of this synod are in Mansi, VIII, 1163-1176). From this time the patriarchs seem to have been all orthodox; though the Monophysites had a strong party in Palestine and eventually set up Monophysite bishops in communion with the (Jacobite) patriarchs of Antioch of the line of Sergius of Tella (since 539) even at Jerusalem itself. The first of these Jacobite bishops (they did not take the title patriarch) of Jerusalem was Severus in 597. From him descends the present Jacobite line. In the year 614 a great calamity befell the city; it was taken by the Persians. In 602 the Roman Emperor Maurice had been barbarously murdered by order of Phocas (602-610), who usurped his place. Chosroes (Khusru) II, King of Persia, had found protection from his enemies at home with Maurice, who had even sent an army to restore him (591). The Persian king, furious at the murder of his friend and benefactor,

then declared war against Phocas and invaded Syria (604). The war with Persia continued under Phocas's successor, Heraclius (610-642). In 611 the Persians took Antioch, then Caesarea in Cappadocia and Damascus. In 614 they stormed Jerusalem. Chosroes's son-in-law Shaharbarz besieged the city; in his camp were 26,000 Jews eager to destroy Christian sovereignty in their holy city. It is said that no less than 90,000 Christians perished when Jerusalem fell. The Patriarch Zacharius was taken captive to Persia. The Anastasis, Martyrion and other Christian sanctuaries were burned or razed to the ground. St. Helena's great relic of the Holy Cross was taken off to Persia in triumph. The Jews as a reward for their help were allowed to do as they liked in the city. But their triumph did not last long. In 622 Heraclius marched across Asia Minor, driving back the Persians. In 627 he invaded Persia; Chosroes fled, was deposed, and murdered in 628 by his son Siroes. In the same year the Persians had to submit to a peace which deprived them of all their conquests. The Persian soldiers evacuated the cities of Syria and Egypt which they had conquered, the relic of the True Cross was given back. In 629 Heraclius himself came to Jerusalem to venerate the Cross. This is the origin of the feast of the Exaltation of the Holy Cross (14 September: see the lessons of the second nocturn on that day). The emperor as a punishment for the treason of the Jews renewed the old law of Hadrian forbidding them to enter the city.

After the Persian assault on the town, even before the Romans reconquered it, Modestus, Abbot of the monastery of St. Theodosius in the desert to the south, acting apparently as vicar for the captured patriarch, had already begun to restore the shrines. It was impossible under Persian rule to restore the splendour of Constantine's great Martyrion. Modestus therefore had to be content with a more modest group of buildings at the Holy Sepulchre. He restored the round Anastasis, much as it had been before, except that a conical roof replaced the old cupola. The custom of orientating churches had now become universal; so a new apse was made at the east (where the entrance had been) for the altar. Doors were pierced in the round wall north and south of this apse. The Anastasis, formerly a shrine subsidiary to the great basilica, now became the chief building. Modestus restored the little chapel of the Crucifixion, originally built by Melania, but did not attempt to rebuild any part of the basilica (Martyrion) except the crypt of the Invention of the Holy Cross. The whole esplanade around these buildings was enclosed by a wall and so made into a great atrium. During the next centuries a great number of chapels were built here to contain various relics of the Passion. Heraclius when he reconquered the city rebuilt the walls and restored many more of the ruined shrines. From his time to the Arab conquest Christian Jerusalem enjoyed a short period of peace and prosperity. St. Sophronius (634-638) or (644), who saw that conquest, was one of the more famous patriarchs of Jerusalem. In his time Monothelism had arisen as one more of the many hopeless attempts to conciliate

the Monophysites. Sophronius distinguished himself as an opponent of this new heresy. He was born in Damascus and had been a monk of the monastery of St. Theodosius. In defence of the Faith against the Monothelites he had travelled through Syria and Egypt and had visited Constantinople. As patriarch in 634 he wrote a synodal letter in defence of the two wills in Christ that is one of the most important documents of this controversy (Mansi XI, 461 sq.). In 636 he had to give up his city to the Moslems.

V. FROM THE ARAB CONQUEST TO THE FIRST CRUSADE (636-1099)

The Moslems in the first zeal of their new faith proceeded to invade Syria. Caliph Abu-bakr (632-634) gave the command of the army to Abu-'Ubaidah, one of the original *Ashab* (companions of Mohammed in his flight, 622). They first took Bosra. In July, 633, they defeated Heraclius's army at Ajnadain near Emesa; in 634 they stormed Damascus and again defeated the Romans at Yarmuk. Emesa fell in 636. The Moslems then consulted Caliph Omar (634-644) as to whether they should march on Jerusalem or Caesarea. By 'Ali's advice they received orders to take the Holy City. First they sent to Mo'awiya Ibn-Abu-Sufyan with 5000 Arabs to surprise the city; soon afterwards it was invested by the whole army of Abu-'Ubaidah. It was defended by a large force composed of refugees from all parts of Syria, soldiers who had escaped from Yarmuk and a strong garrison. For four months the siege continued, every day there was a fierce assault. At last, when all further resistance was hopeless, the Patriarch Sophronius (who acted throughout as the head of the Christian defenders) appeared on the walls and demanded a conference with Abu-'Ubaidah. He then proposed to capitulate on fair and honourable terms; the Christians were to keep their churches and sanctuaries, no one was to be forced to accept Islam. Sophronius further insisted that these terms should be ratified by the caliph in person. Omar, then at Medina, agreed to these terms and came with a single camel to the walls of Jerusalem. He signed the capitulation, then entered the city with Sophronius "and courteously discoursed with the patriarch concerning its religious antiquities" (Gibbon, ci, ed. Bury, London, 1898, V, 436). It is said that when the hour for his prayer came he was in the Anastasis, but refused to say it there, lest in future times the Moslems should make that an excuse for breaking the treaty and confiscating the church. The Mosque of Omar (Jami 'Saidna 'Omar), opposite the doors of the Anastasis, with the tall minaret, is shown as the place to which he retired for his prayer. Under the Moslems the Christian population of Jerusalem in the first period enjoyed the usual toleration given to non-Moslem theists. The pilgrimages went on as before. The new government did not make Jerusalem the political centre of Palestine. This was fixed at Lydda till the year 716, then at Ar-Ramla (Ramleh). But in the Moslem view, too, Jerusalem, the city of David and Christ, to which Mohammed was taken miraculously in one night (Koran, Sura. XVII), which

had been the first *Qibla* of their religion, was a very holy place, third only after Mecca and Medina. They call it Beit al-mukaddas, Beit al-makdis (now generally Al-Kuds).

In the reign of Caliph 'Abd-al-malik (684-705, the fifth Ommaid caliph, at Damascus) the people of Iraq revolted and got possession of the Hijaz. In order to give his followers a substitute for the *haraman* (Mecca and Medina), which they were prevented from visiting, he resolved to make Jerusalem a centre of pilgrimage. He, therefore, set about to adorn the place of the Temple with a splendid mosque. It appears that the Christians had left the place where the Temple had once stood untouched. Omar visited it and found it filled up with refuse. In his time a large square building with no architectural pretension was put up to shelter the True Believers who went there to pray. In 691 'Abd-al-malik replaced this by the exquisite "Dome of the Rock" (*Qubbet-es-Sachra*), built by Byzantine architects, that still stands in the middle of the Temple area. This is the building long known as the Mosque of Omar, falsely attributed to him. It is an eight-sided building crowned with a dome, covered outside with marble and most beautiful many-coloured tiles, certainly one of the most splendid monuments of architecture in the world. It stands over a great flat rock, probably the place of the old altar of holocausts. 'Abd-allah al-Iman al-Mamun (Caliph, 813-833) restored it. The dome fell in an earthquake and was rebuilt in 1022. The Crusaders (who turned it into a church) thought this was the original Jewish Temple; hence the many round temple-churches built in imitation of it. Raphael in his "Espousal of the Blessed Virgin" has painted it, as well as he could from descriptions, in the background as the Temple. The whole of the Temple area became to Moslems the "illustrious Sanctuary" (Haram-ash-sherif) and was gradually covered with colonnades, minbars (pulpits), and smaller domes. At the south end Justinian's basilica became the "most remote Mosque" (Al-Masjid-al-aqsa, Sura XVII, 1). The description of Arculf, a Frankish bishop who went on a pilgrimage to the Holy Land in the seventh century, written down from his account by Adamnan, monk of Iona (d. 704): "De locis terrae sanctae", lib. III (P. L., LXXXVIII, 725 sq.), gives us a not unpleasant picture of the conditions of Christians in Palestine in the first period of Moslem rule. The caliphs of Damascus (661-750) were enlightened and tolerant princes, on quite good terms with their Christian subjects. Many Christians (e.g. St. John Damascene, d. c. 754) held important offices at their court. The Abbaside caliphs at Bagdad (753-1242), as long as they ruled Syria, were also just and tolerant to the Christians. The famous Harun Abu-Ja-'afar (Haroun al-Raschid, 786-809) sent the keys of the Holy Sepulchre to Charlemagne who built a hospice for Latin pilgrims near the shrine. Revolutions and

rival dynasties that tore the union of Islam to pieces then made Syria the battleground of the Moslem world; the Christians under new masters began to suffer the oppression that eventually led to the Crusades.

In 891 the sect of the Karamita (Carmathians) under Abu-Said al-jannabi arose in the neighbourhood of Kufa. They defeated the troops of the Caliph Al-Mutazid (Ahmed Abu'l Abbas), entered Syria (903-904) and devastated the province. They seized Mecca and prevented the pilgrims from going there from 929 to 950, when they were finally destroyed. During this time Moslems again began to go in pilgrimage to Jerusalem instead of to the Hijaz. The religious importance that the city thus gained for them was the beginning of intolerance towards the Christians there. It is the invariable result in Islam; the more sacred a place is to Moslems the less they are disposed to tolerate unbelievers in it. The Fatimide dynasty now arose in Africa (908). About the year 967 they got possession of Egypt. Meanwhile a frontier war with the empire went on always. The Romans took advantage of the dismemberment of the Moslem world to invade their former provinces. Already in 901, in the reign of Leo VI (886-911), the Roman armies had advanced into Syria as far as Aleppo and had carried off a great number of prisoners. In 962 Nicephorus Phocas with 100,000 men again came as far as Aleppo and devastated the country. In 968 and 969 the Romans reconquered Antioch. It was inevitable that the Christians of Jerusalem should try to help their fellow-countrymen to reconquer the land that had been Roman and Christian; inevitable, too, that the Moslems should punish such attempts as high treason. In 969 the patriarch, John VII, was put to death for treasonable correspondence with the Romans; many other Christians suffered the same fate, and a number of churches were destroyed. Meanwhile the first wave of the great Turkish race (the Seljuks) was pouring over the caliph's empire. In 934 a Turk, Ikshid, revolted and his successors held Palestine for a few years. In 969 Mu-'ezz-li-Din-Allah, the fourth Fatimide Caliph in Egypt, conquered Jerusalem. A Moslem pilgrim, Al-Muqaddasi, wrote a description of the city, especially of the Haram ash-sharif, at this time (quoted by Le Strange, "Palestine under the Moslems," 1890). The infamous Hakim (Al-Hakim bi-amr-Allah, the sixth Egyptian Caliph, 996-1021, who became the god of the Druses) determined to destroy the Holy Sepulchre. This was really only one incident in his persecution of Christians: his excuse was that the miracle of the holy fire (already practised in his time) was a scandalous imposture. In 1010 the buildings erected by Modestus were burned to the ground. The news of their destruction, brought back by pilgrims, caused a wave of indignation throughout Europe. It was one of the causes of the feeling that eventually brought about the First Crusade. Meanwhile funds were collected to rebuild the sanctuary. The Emperor Constantine IX (1042-1054) persuaded the Caliph Al-Mustansir-bi-Allah (1036-1094) to allow the rebuilding on condition of releasing 5000

Moslem prisoners and of allowing prayer for Al-Mustansir in the mosques in the empire. Byzantine architects were sent to Jerusalem. The rebuilding was finished in 1048. The work of Modestus was restored with a few additions hurriedly and not well. The Holy Sepulchre remained in this state till the crusaders replaced it by the present group of buildings (1140-1149).

In 1030 merchants of Amalfi were able to establish themselves permanently in Jerusalem. They had leave to trade fully with the people of Palestine, built a church (S. Maria Latina), a Benedictine monastery, and a hospice for pilgrims. In 1077 the Seljuk Turks became masters of Palestine. From this time the condition of the Christians became unbearable. The Turks forbade Christian services, devastated churches, murdered pilgrims. It was the news of these outrages that provoked the Council of Clermont (1095) and brought the crusaders in 1099. The patriarchal succession after Sophronius was: (The see vacant from Sophronius's death to 705. Meanwhile Stephen of Dora acted as papal vicar for Palestine); John V (705-735); John VI (735-760), possibly the same person as John V); Theodore (760-c. 770); Eusebius (772); Elias II (driven out in 784, died c. 800); (meanwhile for a time Theodore occupied the see); George of Sergius (800-807); Thomas (807-821); Basil (821-842); Sergius (842- c. 859); Solomon (c. 859-c. 864); Theodosius (c. 864- c. 879); Elias III (c. 879-907); Sergius II (907-911); Leo or Leontius (911-928; Anastasius or Athanasius; Nicholas; Christopher of Christodorus (died 937); Agatho; John VII (murdered 969); Christopher II; Thomas II; Joseph II; Alexander; Agapius (986-?): Jeremias or Orestes (banished and murdered c. 1012; Theophilus; Arsenius (c. 1024); Jordanus; Nicephorus; Sophronius II; Mark II; Euthymius II (died 1099).

ADRIAN FORTESCUE

Latin Kingdom of Jerusalem

Latin Kingdom of Jerusalem (1099-1291)

The Latin Kingdom of Jerusalem was founded as a result of the First Crusade, in 1099. Destroyed a first time by Saladin in 1187, it was re-estab-

lished around Saint-Jean d'Acre and maintained until the capture of that city in 1291. During these two centuries it was for Western Europe a genuine centre of colonization. As the common property of Christendom it retained its international character to the end, although the French element predominated among the feudal lords and the government officials, and the Italians acquired the economic preponderance in the cities.

(1) Kings and Succession to the Throne

The succession of kings is as follows:

- *Godfrey of Bouillon*, elected Lord of Jerusalem, 22 July, 1099, did not assume the royal crown and died 18 July, 1100, having strengthened the new conquest by his victory over the Egyptians at Ascalon (12 August, 1099).
- After his death the barons invited his brother Baldwin, Count of Edessa, to assume the lordship of Jerusalem. Baldwin accepted and had himself crowned King of Jerusalem by the Patriarch Daimbert in the basilica of Bethlehem (25 December, 1100). *Baldwin I* (1100-1118) was the real founder of the kingdom. With the aid of new crusaders, and more especially the help afforded by the Genoese, Pisan, and Venetian fleets he took possession of the principal cities on the coast of Syria. Besides, the Countship of Tripoli and the Principality of Edessa became fiefs of the new kingdom, but the Principality of Antioch preserved its independence. Baldwin I attacked even the Caliphate of Egypt but died at El-Arish (1118) in the course of this expedition.
- His cousin, Baldwin du Bourg, Count of Edessa, was chosen by the barons to succeed him. *Baldwin II* (1118-1131), who had followed Godfrey of Bouillon to the crusade, was a valiant knight and, in 1124, took possession of Tyre. In 1129 he married his daughter Mélisende to Fulc, Count of Anjou, who was the father of Geoffrey Plantagenet and already sixty years of age.
- *Fulc* (1131-1141) succeeded his father-in-law.
- Under his son, *Baldwin III* (1144-1162), who married Theodora Comnena, the kingdom attained its greatest dimensions after the capture of Ascalon (1153), but the principality of Edessa was wrested from it in 1144.
- *Amaury I* (1162-1174), brother of Baldwin III, succeeded to the throne on the latter's death, being only twenty-seven years of age. He was one of Jerusalem's most brilliant sovereigns, and thought to profit by the anarchy that prevailed in Egypt in order to acquire possession of that country, reaching Cairo twice (1167 and 1168); and, for the moment, having Egypt under his protectorate. But the formation of Saladin's power soon placed the kingdom in peril.

- Amaury died prematurely in 1174, leaving as his successor his son *Baldwin IV* (1174-1185), a very gifted young man, who had been the pupil of William of Tyre, but who was attacked with leprosy and rendered incapable of taking charge of affairs. He at first reigned under the guardianship of Milon de Planci and, assisted by Renaud de Châtillon, inflicted a defeat upon Saladin at Ramleh (1177).
- By 1182 the dreadful disease had gained such headway that the unfortunate Baldwin "the Leprous" ("le Mesel") had the son of his sister Sibylla by the Count of Montferrat crowned under the name of *Baldwin V*. He also had Sibylla take as her second husband Guy of Lusignan, who had put himself at Baldwin's service and had been appointed by him regent of the kingdom. However, as Guy seemed incompetent, the barons took the regency away from him and confided it to Raymond, Count of Tripoli. Baldwin IV died in 1185, at the age of twenty-five, without having married, and left the kingdom a prey to discord and exposed to the attacks of Saladin.
- The young *Baldwin V*, his nephew, died in 1186, supposedly of poisoning.
- It was largely due to the instrumentality of Renaud de Châtillon that the barons elected *Guy of Lusignan*, (1186-1192) and Sibylla sovereigns of Jerusalem. Incapable of defending his kingdom against Saladin, Guy was made prisoner at the battle of Tiberias (4 July, 1187), which was followed by the capture of Jerusalem (2 October), and purchased his liberty by yielding Ascalon to Saladin. The Kingdom of Jerusalem was destroyed. Then took place the Crusade of Saint-Jean d'Acre, of which Guy commenced the siege in 1188. However, Queen Sibylla died in 1190 and Conrad of Montferrat, who had married Isabella, Sibylla's sister, disputed the title of king with Guy of Lusignan, and this rivalry lasted throughout the siege of Saint-Jean d'Acre, which city capitulated 11 July, 1191. On 28 July, Richard Coeur de Lion, King of England, imposed his arbitration upon the two rivals and decided that Guy should be king during his lifetime and have Conrad for his successor, the latter to receive Beirut, Tyre, and Sidon as guarantees; but on 29 April, 1192, Conrad was assassinated by emissaries of the "Old Man of the Mountain". Guy, on his side, renounced the title of king (May, 1192) and purchased the Island of Cyprus from the Templars.
- He died in 1194 and his widow named *Henry I*, Count of Champagne (1194-1197), who was elected king, but in 1197 Henry died from an accident.
- Isabella married a fourth husband, *Amaury of Lusignan* (1197-1205), brother of Guy and already King of Cyprus. The turning of the course of the crusade to Constantinople obliged him to conclude a truce with the Moslems. Amaury died in 1205.

- He left an only daughter Mélisende who married Bohemond IV, Prince of Antioch. However, it was to Mary, daughter of Isabella and Conrad of Montferrat, that the barons gave the preference, and they requested the King of France to provide her with a husband.
- Philip Augustus accordingly selected *John of Brienne* (1210-1225), who hesitated for a long time before accepting and did not arrive in Palestine until 1210, having first obtained from the pope a considerable loan of money. He directed the Crusade of Egypt in 1218 and, after his defeat, came to the West to solicit help. Hermann von Salza, the Grand Master of the Teutonic Knights, advised him to give his only daughter Isabella (Yolande) in marriage to the Emperor Frederick II.
- In 1225, Henry of Malta, Admiral of Sicily, came to seek the young princess at Saint-Jean d'Acre, and on 9 November she married *Frederick II* at Brindisi. Immediately after the ceremony the emperor declared that his father-in-law must renounce the title of King of Jerusalem, and he himself adopted it in all his acts. After the death of Isabella, by whom he had a son Conrad, Frederick II attempted to take possession of his kingdom and to fulfill his crusader's vow, the execution of which he had so long deferred, and landed at Saint-Jean d'Acre (September, 1228), excommunicated by the pope and in disfavour with his new subjects. By a treaty concluded with the Sultan of Egypt, Frederick regained Jerusalem, and on 18 March, 1229, without any religious ceremony whatever, assumed the royal crown in the church of the Holy Sepulchre. Having confided the regency to Balian d'Ibelin, Lord of Sidon, he returned to Europe. To strengthen his power in the East he sent to Saint-Jean d'Acre Richard Filangieri, Marshal of the Empire, whom he named *baile* (guardian) of the kingdom. The new regent combated the influence of the Ibelins and tried to secure possession of the Island of Cyprus, but was conquered and had to content himself with placing an imperial garrison at Tyre (1232).
- In 1243 Conrad, son of Frederick II, having attained his majority, the court of barons declared that the regency of the emperor must cease, and invited the legitimate king to come in person and exercise his rights. Alix of Champagne, Queen of Cyprus and daughter of King Henry I, claimed the regency on the ground of being Isabella of Brienne's nearest relative; and it was conferred upon her and her second husband Ralph, Count of Soissons, the imperial garrison, besieged in Tyre, being forced to capitulate.
- On the death of Alix (1244) her son *Henry of Lusignan*, King of Cyprus, assumed the regency but, in the month of September, 1244, a troop of Kharizmians seized Jerusalem, whilst the Mongols threatened Antioch. After his Crusade of Egypt, St.

Louis landed at Saint-Jean d'Acre (1250) and remained four years in Palestine, putting the fortresses of the kingdom in a state of defence and endeavouring to reconcile the factious barons. However, just at the time that the Christian states were menaced by the Mongols and the Mamelukes of Egypt, interior strife was at its height.

- In 1257, Henry of Lusignan having died, some of the barons acknowledged Queen Plaisance regent in the name of her son Hugh II, whereas others would give their allegiance to none other than Conradin, grandson of Frederick II. Moreover, civil war broke out at Acre between the Genoese and the Venetians, between the Hospitallers and the Templars, and on 31 July, 1258, the Venetians destroyed the Genoese fleet before Acre. The Mameluke Sultan Bibars, "the Cross-bowman" (*El-Bunduk-dáree*), recommenced the conquest of Syria without meeting any resistance and, in 1268, the last Christian cities, Tripoli, Sidon, and Acre, were cut off from one another.
- King Hugh II of Lusignan had died in 1267, and his succession was disputed by his nephew, Hugh III, already King of Cyprus, and Mary of Antioch whose maternal grandfather was Amaury of Lusignan. In 1269 the barons acknowledged Hugh III, but the new king, unable to cope with the lack of discipline among his subjects, retired to Cyprus after naming Balian d'Ibelin regent of the kingdom (1276). But, in 1277, Mary of Antioch sold her rights to Charles of Anjou, King of Naples, who, thinking to subdue the East, sent a garrison under command of Roger of San Severino to occupy Acre.
- After the Sicilian Vespers (1282), which ruined the projects of Charles of Anjou, the inhabitants of Acre expelled his seneschal and proclaimed *Henry II of Cyprus* (15 August, 1286) their king. But at this time the remnants of the Christian possessions were hard pressed by the Mamelukes. On 5 April, 1291, the Sultan Malek-Aschraf appeared before Saint-Jean d'Acre and, despite the courage of its defenders, the city was taken by storm on 28 May. The Kingdom of Jerusalem no longer existed, and none of the expeditions of the fourteenth century succeeded in re-establishing it.

The title of King of Jerusalem continued to be borne in a spirit of rivalry: by the Kings of Cyprus belonging to the House of Lusignan; and by the two Houses of Anjou which claimed to hold their rights from Mary of Antioch. In 1459 Charlotte, daughter of John III, King of Cyprus, married Louis of Savoy, Count of Geneva, and in 1485 ceded her rights to Jerusalem to her nephew Charles of Savoy; hence, from that time

up to 1870, the title of King of Jerusalem was borne by the princes of the House of Savoy.

(2) Institutions and Civilization

Towards the middle of the twelfth century, when the Kingdom of Jerusalem had attained its greatest dimensions, it comprised the entire coast of Syria from Beirut on the north to Raphia on the south. On the northeast its territory, bounded by the Lebanon district, which separated it from the Moslem principality of Damascus, was hardly more than a few leagues in breadth; on the southeast it extended beyond the Dead Sea and the Jordan as far as the Arabian Desert and even included the port of Aïla on the Red Sea. In the north the Countship of Tripoli was under the suzerainty of the King of Jerusalem. But in the very interior of the kingdom the power of the king was checked by numerous obstacles, and the sovereignty belonged less to the king than to the body of feudatories whose power was centered in the *High Court*, composed of vassals and rear-vassals. Its authority governed even the succession to the throne, in event of dispute between two members of the royal family; it alone was empowered to make laws or "assizes", and to its initiative was due the compilation of the "Assizes of Jerusalem", erroneously ascribed to Godfrey of Bouillon. The king took an oath in presence of this court and had no right to confiscate a fief unless in accordance with the regular judgment of that assembly. Moreover, if the king were to violate his oaths, the assizes formally proclaimed the right of the lieges to resist. The High Court, presided over by the constable or marshal, assembled only when convoked by the king; in judicial matters it constituted the supreme tribunal and its judgments were without appeal: "Nulle chose faite par court n'en doit estre desfaiete" (Assizes, I, clxxvii). A "Court of the Burgesses", organized in the twelfth century, had analogous jurisdiction over the burgesses and could sentence to exile or even condemn to death. In the great fiefs mixed courts of knights and burgesses had similar control independently of the liege. Even within these limits the king was incapable of compelling vassals to fulfill their feudal obligations. Domiciled in impregnable castles, the architecture of which had been perfected after Moslem models, the nobles led an almost independent life. A fief like that of Montréal with its four castles of Crac, Crac de Montréal, Ahamant, and Vau de Moïse, situated between the Dead and Red Seas, formed a really independent state. Renaud de Châtillon, who became Lord of Montréal in 1174, himself waged war against the Moslems, whom he terrified by his cruise in the Red Sea, and his individual policy was counter to that of King Baldwin VI, who was powerless to prevent him from waging war against Saladin.

The Church, at this period, was also a power independent of the kings, and, with the exception of the king, the Patriarch of Jerusalem was the most important personage in the realm. After the First Crusade a very powerful Latin Church was established in

Palestine; numerous monasteries were founded and received large donations of landed property in Palestine as well as in Europe. Some patriarchs, especially Daimbert, who was at enmity with Baldwin I, even endeavoured to found a power thoroughly independent of royalty; nevertheless, both of these powers generally lived in harmony. The Patriarch of Jerusalem, who was elected by the clergy and acclaimed by the people, had his powers confirmed by the pope, who continued to exercise great authority in Palestine. Moreover, the orders of religious knighthood, the Hospitallers of St. John, organized in 1313, the Templars founded by Hugh of Payens in 1128, and the Teutonic Knights created in 1143, formed regular powers, equally independent of Church and State. Most lavishly endowed, they soon owned an incalculable number of fiefs and castles in Palestine and in Europe. In spiritual matters they were directly subject to the pope; but the king could not interfere in their temporal affairs, and each of the three orders had its own army and exercised the right of concluding treaties with the Moslems.

Although royal authority was restricted to rather narrow limits by these various powers, it nevertheless succeeded in having at its disposal resources adequate to the defence of the Christian states. Its financial revenues were more considerable than those of the majority of the European princes of the twelfth century, amongst the most profitable sources of income being the customs duties enforced at all the ports and of which the register was kept by natives who wrote in Arabic. The king also levied toll upon caravans, had the monopoly of certain industries, and the exclusive right to coin money. At times he obtained from the court of barons authority to levy extraordinary taxes; and in 1182, in order to meet the invasion of Saladin all revenues, even those of the Church were subjected to a tax of 2 per cent. Although the kings of the twelfth century were surrounded by high officials, and kept a sufficiently grand court, at which Byzantine etiquette ruled, they devoted most of their income to the defence of their kingdom. Their vassals owed military service, unlimited as to time, unlike the prevailing Western customs, but in exchange they received pay. Moreover, the king enlisted natives or foreigners, settling on them a life-annuity- or *fief de soudée*; a light cavalry of Turcoples mounted and equipped in Saracenic style, Maronite archers from the Lebanon, and Armenian and Syrian foot-soldiers completed the list of this cosmopolitan army of which the effective force was hardly over 20,000 men, some few hundreds of them being knights. To these regular resources already mentioned we must add the bands of crusaders constantly arriving from Europe, but whose turbulence and lack of discipline often rendered them more of an encumbrance than a help; besides, many considered that, having once engaged in combat with the Moslems, they had accomplished their vows and therefore returned to Europe, thus making continuous warfare well nigh impossible. This explains why with the well-organized Moslem states arrayed

against it, the Kingdom of Jerusalem could only dispute the ground foot by foot for two centuries.

Nevertheless, despite its imperfect organization, the economic prosperity of the Latin kingdom attained an extraordinary height of development in the twelfth century. In order to repopulate the country, Baldwin I held out inducements to the Christian communities dwelling beyond the Jordan; in 1182 the Maronites of the Lebanon abjured their Monothelite heresy. Most of the natives did likewise, and constituted the influential middle class or burgesses of the various cities, having the right to own land and an autonomous administration under magistrates called *reis*. In the ports, the Italian cities of Genoa, Venice, and Pisa, and the French cities of Marseilles, Narbonne, etc., received grants of houses and even of districts independently administered by their own consuls. Each of these colonies had lands or *casaux* on the outskirts of the city, where cotton and sugar-cane were cultivated; the colonial merchants had the monopoly of commerce between Europe and the East, and freighted their out-going ships with costly merchandise, spices, China silk, precious stones, etc., which the caravans brought from the interior of Asia. Industries peculiar to Syria, the manufacture of silk and cotton materials, the dye-works and glass factories of Tyre, etc., all helped to feed this commerce, as did also the agricultural products of the land. In exchange, the Western ships brought to Palestine such European products as were necessary to the colonists; two flotillas sailed yearly from Western ports, at Easter and about the feast of St. John, thus ensuring communication between Palestine and Europe. Thanks to this commerce, during the twelfth century the Kingdom of Jerusalem became one of the most prosperous states in Christendom. In the castles, as in the cities, the Western knights loved to surround themselves with gorgeous equipments and choice furniture, the latter often of Arabian workmanship. In Palestine there was a marked development along artistic lines, and churches were erected in the towns according to the rules of Roman architecture. Even now, the cathedral of St. John at Beirut, built about 1130-1140 and transformed into a mosque, shows us the style of edifice reared by Western architects, its structure recalling that of the monuments of Limousin and Languedoc. The specimen of ivory used as a binding for the Psalter of Mélisende, daughter of Baldwin II, and preserved in the British Museum, displays a curious decoration in which are combined designs of Byzantine and Arabian art. But it was military architecture that reached the greatest development and probably furnished models to the West; even today the ruins of the Crac of the Knights, built by the Hospitallers, astonish the beholder by their double gallery, their massive towers, and elegant halls. The Kingdom of Jerusalem, established as a result of the First Crusade, was thus one of the first attempts made by Europeans at colonization.

LOUIS BRÉHIER

Jerusalem (After 1291)

Jerusalem (After 1291)

(1) Political History

 The Latin dominion over Jerusalem really came to an end on 2 October, 1187, when the city opened its gates to Saladin (Yusuf ibn Ayyub, Salah-ed-din, Emir of Egypt, 1169-93); although fragments of the Latin kingdom in Palestine lasted into another century. Frederick II acquired a short possession of Jerusalem itself by treaty later, and the title "King of Jerusalem" added an empty splendour to the styles of various European sovereigns almost to our own time. Nevertheless after 1187 the episode of Christian and Latin rule over the Holy City is closed. From that time it falls back again into its former state of a city under Moslem government, in which Christian pilgrims are at best only tolerated.

As soon as Saladin's army entered the city they set and to destroy all traces of the Christian rule. They tore the great gilt cross from the Dome of the Rock, broke up the bells, plundered churches and convents, restored all the buildings that had been mosques (notably the Dome of the Rock and the El-Aqsa mosque), turned other churches into stables or granaries, founded Moslem schools, hospitals, and all the pious institutions that go by the general name of *waqf*. While Europe was thunderstruck at the loss of the Holy City, and was preparing a new crusade to recapture it, letters were sent to all parts of the Moslem world announcing the glad tidings that *El-Quds* was now purified and restored to the true believers. But -- true to the promise made by Omar (see above) -- Saladin left the Holy Sepulchre, as well as a few other churches, to the Christians (the Orthodox). For the use of these they had to pay a heavy tribute. The church of the Knights of St. John was turned into a hospital (at the place still called *Muristan*, where the German Protestant church now stands). Saladin further strengthened the walls of the city when the Third Crusade (with King Richard of England) approached and threatened it (1191). In 1219 the Sultan Malik-el-Mu'azzam (d. 1227, viceroy at Damascus for El-Mansur) ordered these walls to be destroyed, lest they should become a protection for the Franks. In 1229 another short interlude began. Emperor Frederick II (1212-50) came on his (the Fifth) Crusade. He obtained by treaty with the Sultan of Egypt, El-Kamil (1219-38), possession of Jerusalem, Bethlehem, Nazareth, and the pilgrim roads from Jaffa and 'Akka for ten years and a half. The city was not to be fortified, and the *Haram esh-sherif* (the Temple area) was to remain in exclusive possession of the Moslems. In 1239 the Emir of Kerak, En-nasir Daud, conquered Jerusalem again and destroyed the Tower of David. But in 1243 he made

over the city to the Latins without any stipulations. This led to the final loss of the city. For Essalih Ayyub, Caliph of Egypt (1238-49), then called on the savage Khwarizmian tribes from Mesopotamia to recapture it. They poured over Syria plundering and murdering, and in September, 1244, stormed Jerusalem. In the massacre that followed 7000 Christians perished; Jerusalem was restored once more, and finally, to the Empire of the Caliph. From this time the remaining Latin possessions in Palestine were lost one by one in quick succession. The last town, 'Akka (Saint-Jean d'Acre), fell in 1291.

The title "King of Jerusalem" went from Guy of Lusignan (King of Jerusalem and Cyprus, 1186-92) to Henry of Champagne (1192-7), to whom it was already only a title of pretence since the Moslems ruled in the city. Amaury (Amalric) of Lusignan (brother of Guy), King of Cyprus (1194-1205), was elected king by the crusading army at Tyre, and married Isabel, daughter of Amaury I of Jerusalem (1162-73). He then added the title of Jerusalem to that of Cyprus (Amaury II). From his time the Lusignan kings of Cyprus used the title of Jerusalem and quartered its arms (argent, a cross potent between four crosslets or) with their paternal coat (barry of ten azure and argent, a lion rampant or, crowned gules. See the arms of "die conine von cipers" in Gelre's *Wapen-boeck*, 1334-72). The Lusignan "Kingdom of Jerusalem and Cyprus" came to an end in 1474, when Catherine Cornaro, widow of the last king (James III) abdicated in favour of the Republic of Venice. Whatever rights they may be supposed to have had to the title of Jerusalem passed to the House of Savoy. Meanwhile, at the death of Amaury II (1205), John of Brienne who married Mary, daughter of the same Isabel and Conrad of Montferrat, began a rival line of titular Kings of Jerusalem. His daughter Isabel (Iolanthe), married Emperor Frederick II, who then assumed the title, and (as we have seen) for a short time actually reigned in Jerusalem. He crowned himself in the Church of the Holy Sepulchre on 17 March, 1229. After him the title was borne by his descendants to Conradin (d. 1268). Then Hugh III, prince of Antioch (1267-80) and regent of the scattered Latin possessions in Palestine for the absent kings of this line, began another series of titular Kings of Jerusalem. He was crowned at Tyre in 1269. His claim was maintained by his son Henry at 'Akka. But Mary of Antioch, also descended from Isabel, set up a claim to this visionary crown, and then sold it to her grand-nephew, Charles of Anjou, King of Sicily (1285-1309), who had already obtained another claim by marrying Margaret, grand-daughter of John of Brienne. While the Moslems were gaining ground and driving back the thin remnant of the Latin kingdom every year, the Sicilians and the party of Hugh of Antioch were fighting for the empty title. Eventually the kings of Sicily added it to their style, and "Jerusalem and the two Sicilies" existed as a "royal title down to the Italian revolution (1860). Lastly, the House of Habsburg also added this shadowy royalty to its long list of titles. Iolanthe-daughter of Rene the Good (d. 1480), titular King of Jerusalem and Naples-married Duke Fred-

erick of Lorraine; from her the title came to the Dukes of Lorraine, and so, through Maria Theresa's marriage with Francis of Lorraine (1736), to the House of Austria. The arms of Jerusalem formed one of the fifty-eight quarterings of the Imperial Arms of Austria; and "Koenig von Jerusalem" was one of the emperor's long string of titles, till Ferdinand I (1835-48) had the good sense to reduce both quarterings and titles to those that had a real meaning. The story of this title of Jerusalem forms a curious bypath in history, and is a typical example of the pretence that medieval heralds loved. Meanwhile, the Moslem ruled again over the Holy City. The crusading idea lingered on in the West for centuries. Pope Pius II (1458-64) still hoped to renew the work of Urban II; but nothing ever came of these attempts. Jerusalem was lost to Christendom in 1187; it is lost still.

Till the sixteenth century Syria belonged to the caliphs in Egypt; but it was constantly overrun for short periods by their various enemies. In the thirteenth century the Mongols, who had destroyed the line of caliphs at Baghdad, poured over Syria plundering and destroying under their chief Hulagu (capture of Aleppo, 1260). Kutuz (1259-60) sent his famous general, Beibars el-bundukdari, by whom the Mongols were driven out. Beibars then had Kutuz murdered and reigned as caliph in his stead (1260-77). He succeeded in driving the Crusaders nearly back to their last stronghold, 'Akka, crushed the "Assassins" (*Hashishiye*)-fanatical Isma'ilis who had been the terror of Syria for nearly two centuries-and conquered a great part of Asia Minor. The name of Beibars (Es sultan el-malik ez-zahir, rukn-ed-dunga wa-din, "The sultan, the manifest king, prop of the world and the faith") may be seen on many monuments in Jerusalem. Kala'un (1279-90) deposed Beibars' son, made himself caliph, further harassed the Crusaders, and built splendid monuments all over Syria. In 1400 the Mongols under Timur again devastated the land.

Meanwhile the Osmanli Turks were becoming the dominant race in Islam. In 1516 under Sultan Selim I (1512-20), after they had crushed the Persians (1514), they turned southward towards Syria. On 14 August, 1516, Selim routed the Egyptian army and killed the Caliph Kansuh el-Ghuri. On 22 January, 1517, Selim entered Cairo in triumph. Mutawekkil, the last Egyptian caliph, died a captive of the Turks in 1538, bequeathing his title to the conquering House of Osman. It is on the strength of this (quite illegal) legacy that the Turkish sultan still calls himself Caliph of Islam. From this time the Turk has been master of Jerusalem. In 1799 Napoleon I invaded Syria and reached Nazareth. In 1831 the Egyptian army under Ibrahim Pasha defeated the Turks near Homs (Emessa), and kept possession of Syria and Jerusalem till England and Austria conquered them back for the Turks in 1840. During the nineteenth century Syria has had her share of various Turkish reforms. Jerusalem and the holy places especially, as being the most interesting parts of the empire to Christians and the scene

of continual Christian pilgrimages, were the places where the Turkish government was most anxious to show that its reforms were really meant. The great number of Christian institutions of various sects and the large Christian population of Jerusalem have almost taken from it the appearance of an Eastern town. The latest development is the enormous increase of Jews who, in spite of repeated attempts on the part of the government to keep them out, form large colonies in and around the city. They and the European Christians are now the predominant element. There are no cities of the Turkish Empire where (in 1913) Moslems were so little in evidence as in Jerusalem, Bethlehem and Nazareth.

(2) The Holy Sepulchre

The Crusaders found the group of buildings as they had been left by Constantine IX's restoration (1048; see above). From 1140 to 1149 they made a complete restoration of the whole under their architect Master Jordan. The effect of this was a great French-Romanesque cathedral. At the east of the round building over the Anastasis a transept, and beyond it a choir and an apse were built; an aisle surrounded the choir and apse. At the junction with the round building they put a triumphal arch. All the various chapels opened into the central church. From the apse steps led down to the chapel of St. Helena. The entrance was at the south. In this way the Holy Sepulchre became one great building. From the choir one could see into the Anastasis and into all the chapels. This Crusaders' Church is the one that still stands: the beautiful Romanesque doors, at the south especially, still give it a Western appearance. Slight restorations were made in 1244, 1310, 1400 and 1719. In 1808 the round building was burnt down. The Orthodox persuaded the Turkish government to allow them alone to restore it. Their architect closed up the triumphal arch, thus again destroying the unity of the whole, and replaced the old columns of the rotunda by clumsy pillars. He also enclosed the tomb in the present marble covering. The choir of the Crusaders' Church became the present Orthodox *Katholikon*. The arches between it and its aisles were walled up; the aisles became dark passages. The cupola they built over the rotunda threatened to fall in 1869. France and Russia together had it restored by the iron dome that still exists. It was the dispute between Catholics and Orthodox as to the keys of the Holy Sepulchre that immediately caused the Crimean War (1853). All the parts of the church now needed repairs which were not executed, because no religion would allow the other to undertake them for fear of disturbing their various rights. The inside of the cupola over the Anastasis especially was rotting daily. But the reparation of the roof was the most dangerous of all, since by Turkish law the right to repair implied possession and the possession of a roof meant possession of all it covers. In the present building, walled up and divided into a complex mass of dark passages and chapels laden with tawdry

ornament, it is still possible to trace the plan of the great Crusaders' Church. For the rights of the various religions see below.

(3) The Orthodox Patriarchate

Through all the political changes, under Saracens, Egyptians, and Turks, the old line of the Patriarchs of Jerusalem (who followed the Church of Constantinople into schism in the eleventh century) goes on. But there is little to tell of their history. The line was often broken, and there have been many disputed successions. For the list of these patriarchs since Sophronius see Le Quien, "Oriens Christianus", III, 498-516. When the Crusaders took Jerusalem (1099), the Orthodox patriarch (Simon II) fled to Cyprus. As long as the former held the city, it was impossible for the schismatical rival of their Latin patriarchs to live in it. In 1142 the Orthodox continued their line by electing Arsenius II: he resided at Constantinople. After the Moslems had recaptured the city, the Orthodox patriarchs came back and lived in or near it. The only event of any importance in the later history of the Orthodox Patriarchate of Jerusalem is the Synod of Jerusalem (often wrongly called the Synod of Bethlehem) in 1672. This synod represents the climax of the Orthodox reaction against the heresies of Cyril Lucaris (d. 1638). Cyril was Patriarch of Constantinople (Cyril I) at five separate intervals (1620-3, 1623-30, 1630-4, 1634-5, 1637-8); he had imbibed Protestant ideas from his friends in Germany and England. As patriarch he organized -- or tried to organize -- a reforming party, and he wrote in 1629 a famous "Confession" (Eastern Confession of the Christian Faith), which was full of pure Calvinism. Eventually Lucaris was accused of treason against the sultan, and strangled by the janizaries in 1638. He left a certain number of Protestantizing disciples, but the enormous majority of the Orthodox abhorred his new doctrines. In the years following his death four synods were held -- at Constantinople (1639), Yassy in Moldavia (1643), Jerusalem (1672), and Constantinople again (1672) in which the Orthodox faith was asserted against Protestantism in the most uncompromising terms. Of these synods that of Jerusalem was by far the most important. It is indeed one of the most important, as it is the last, of the official pronouncements of the Orthodox Church, and may be compared to our Council of Trent. Dositheus, Patriarch of Jerusalem (1669-1707), who summoned the synod, was certainly the most distinguished bishop of that line during this later period. He was one of the most important and learned of all modern Orthodox theologians. As patriarch he persuaded the Turkish Government to expel Latins and Armenians from the holy places, and reorganized the monasteries of his patriarchate on a stricter basis. As a theologian he wrote works against Catholics, and collected evidences from former writers about the various questions that were being discussed in his time -- the eternal questions of the papacy and the procession of the Holy Ghost, the Hesychast controversy, etc., and then, most of all, the new questions raised by Lucaris and his friends. His chief works

are *Tomos katallages* (1692), *Tomos agapes* (1699), *Tomos charas* (1705). In the first of these he publishes the acts of a pretended Synod of Constantinople against the Latins in 1540. No such synod was held; the acts are a palpable forgery. Dositheus also wrote a "History of the Patriarchs of Jerusalem", published after his death (Bukarest, 1715). This work contains more than is promised by its title. It almost amounts to a general history of the Church from the Orthodox side with vehement polemics against other Churches.

But Dositheus's chief work was the Synod of Jerusalem. He summoned it on the occasion of consecrating a church at Bethlehem in 1672 (hence the common name "Synod of Bethlehem"). It met in the same year at Jerusalem. The acts are signed by Dositheus, his predecessor the ex-patriarch Nectarius, six metropolitans and bishops, the Archimandrite of the Holy Sepulchre, Josaphat, and a great number of other archimandrites, priests, monks, and theologians. There are sixty-eight signatures in all. The Church of Russia was represented by a monk, Timothy. The acts are dated 20 March, 1672; they bear the title: "Christ guides. A shield of the Orthodox Faith, or the Apology composed by the Synod of Jerusalem under the Patriarch of Jerusalem Dositheus against the Calvinist heretics, who falsely say that the Eastern Church thinks heretically about God and Divine things as they do." The first part begins by quoting the text: "There is a time to speak and a time to be silent," which text is explained and enlarged upon at length. It tells the story of the summoning of the synod, and vehemently denies that the Orthodox Eastern Church ever held the opinions attributed to Lucaris. To show this the relations between the Lutherans and Jeremias II of Constantinople are quoted as well as the acts of former synods (Constantinople and Yassy). An elaborate attempt is then made to prove that Lucaris did not really write the famous "Confession". To do this the "Confession" is compared clause by clause with other statements made by him in sermons and in other works. This denial, it should be noted, is a palpable piece of bad faith on the part of the synod. There is no doubt at all as to the authenticity of Lucaris's "Confession". That he used other language on other occasions, especially in preaching, is well-known and very natural. In chapter ii the synod declares that in any case Lucaris showed the "Confession" to no one (this is also quite false), and tries to find further reasons for doubting his authorship. Chapter iii maintains that, even if he had written it, it would not thereby become a confession of the Faith of the Orthodox Church, but would remain merely the private opinion of a heretic: here the Fathers are on safe ground. Chapter iv defends -- no longer Cyril but -- the Orthodox Church by quoting her formularies, and contains a list of anathemas against the heresies of the "Confessions". Chapter v again tries to defend Cyril by quoting various deeds and sayings of his and transcribes the whole decree of the synod of Constantinople in 1639, and then that of Yassy (*Giasion*) in 1641. Chapter vi gives

the decrees of this synod in the form of a "Confession of Dositheus". It has eighteen decrees (*horoi*), then four "questions" (*eroteseis*) with long answers. In these all the points denied by Lucaris's "Confession" (Church and Bible, predestination, cult. of saints, sacraments, the Real Presence, the liturgy, a real sacrifice, etc.) are maintained at great length and in the most uncompromising way. A short epilogue closes the acts. Then follow the date, signatures, and seals.

Because of its determined anti-Protestantism (Protestants are described as being patently heretics and *airetikon koryphaiotatoi*), Protestant writers have described this synod as a work of the Jesuits, of the French ambassador at that time, Olivier de Nointel, and of other Catholics who were undermining the Eastern Church. It is true that the Synod of Jerusalem represents a strongly Catholic reaction after Lucaris's troubles (it accepts and defends the word transubstantiation -- *metousiosis* -- for instance). It is all the more remarkable that its decrees have been accepted unreservedly by the whole Orthodox Church. They were at once approved by the other patriarchs, the Church of Russia, etc.; they are always printed in full among the symbolic books of the Orthodox Church, and form an official creed or declaration in the strictest sense, which every Orthodox Christian is bound to accept.

An affair that concerned the Orthodox Patriarchate of Jerusalem was that of the independence of the great monastery of Mount Sinai. This monastery, one of the richest and most famous of Eastern Christendom, was undoubtedly at one time subject to the jurisdiction of the Patriarch of Jerusalem. In 1782, after a great struggle, the Abbot of Mount Sinai succeeded in asserting his independence of any patriarch. As Archbishop of Sinai the abbot now reigns over the smallest autocephalous Church of their communion. But he is still ordained in Jerusalem, and the patriarchs have constantly tried to assert some kind of authority over their independent daughter-church. The last great quarrel was in 1866, when the archbishop (Cyril Byzantius) had a dispute with his monks. Instead of applying to Jerusalem he wrote to Constantinople for help. Sophronius III of Constantinople (1863-67) at once took up his cause against the monks. The Patriarch of Jerusalem then summoned a synod (1867), in which he protested hotly against the interference of Constantinople. Less for the sake of Jerusalem's shadowy rights over Sinai than because of the ever-welcome chance of opposing the arrogant interference of Constantinople, the other Orthodox Churches all supported Jerusalem, so that Byzantius was deposed and the Patriarch of Constantinople had to resign. But that is the last attempt made by Jerusalem to interfere in the affairs of what is now universally recognized as the autocephalous Church of Sinai.

During these centuries the patriarchate, never very rich, suffered from steadily increasing poverty. Dositheus complained bitterly of this. He says that pilgrimages are rarer, and that the pilgrims who do come bring little money; he himself is obliged to

travel constantly for the sake of collecting alms to Constantinople, Russia, Moldavia, etc. A result of the Turkish conquest was that since 1517 the Patriarchs of Jerusalem have been subject to their brothers of Constantinople in civil matters, as far as the government is concerned. The Turks made the ecumenical Patriarch civil head of all the "Roman nation" (*rum millet*), that is the Orthodox Church. The other patriarchs can approach the *Porte* only through him. This civil authority must not be confused with ecclesiastical jurisdiction. In Orthodox canon law the Church of Jerusalem is autocephalous, having no superior authority but that of Christ and the Seven Councils. Jerusalem, like the other free branches of their communion, has always indignantly withstood the many attempts of Constantinople to assert a kind of papal authority, and has always upheld the axiom that that ecumenical bishop has no ecclesiastical jurisdiction outside his patriarchate. Nevertheless, during these centuries till quite modern times, the independence of Jerusalem was only theoretical. The patriarchs were all Greeks. Originally, under the Egyptian rule, they had been Arabs, taken naturally from the native clergy of Palestine. But in 1534 Germanus, a Greek of the Peloponnesus, succeeded in being elected and from that time to this his successors have all been Greeks. Germanus further succeeded in hellenizing all the administration of his patriarchate: the monks of the Holy Sepulchre, the bishops, archimandrites, and officials of the patriarchal court are all Greeks. It became a recognized principle that no native Arab should ever be appointed to any office in the patriarchate. The result of this is that for over three centuries the patriarchal curia of Jerusalem has been and remains a foreign colony in the land, utterly separate from the native Arab lower clergy and the people. But this state of things will soon come to an end. Following the triumphant example of Antioch there is at this moment a great agitation among the Orthodox Arabs to assert their place in their own patriarchate. And as they are supported by Russia they will succeed. The reigning patriarch, Damianus, though of course a Greek, is not unfriendly to the Arab agitators. On the other hand the monks, the "Fraternity of the Holy Sepulchre", stand out as a bulwark of Orthodoxy for the present state of things, and treat the Arabs as schismatical revolutionaries. Everyone has heard of the scandalous riots that took place in 1908, and culminated in the pretended deposition of the patriarch. Till quite lately, moreover, most of these Greek patriarchs did not even take the trouble to reside in their titular city. Mere servants of the ecumenical bishop, having no interest in their Arab flock, they were content to fritter away their lives in Constantinople, useless ornaments of the Phanar. Since the accession of Cyril II (1845-72), this abuse has been removed and the patriarchs live near the Monastery of the Holy Sepulchre.

Meanwhile the sees of the patriarchate have almost entirely disappeared. In Juvenal's time (420-58) fifty-nine bishops in the three Palestines obeyed the new patriarch.

The Moslem conquest, the Crusades, and the other troubles of the Orthodox Church in Syria gradually reduced this number, till there are now only a handful of titular bishops who reside at Jerusalem instead of in their dioceses, and a few sees whose titles are registered but are always vacant. In 1913 only one bishop (the Metropolitan of 'Akka) lived in his diocese (see the list below). The full list of patriarchs of Jerusalem during this period will be found in Le Quien, "Oriens Christianus", III; for the later ones see Williams, "Holy City", I, pp. 487-8. The patriarchs in the nineteenth century are: Anthimus, 1787-1808; Polycarp, 1808-27; Athanasius V, 1827-45; Cyril II, 1845-72. The last-mentioned refused to sign the excommunication of the Bulgars in 1872, and was deposed the same year. Procopius was intruded while Cyril still claimed to be patriarch. Russia and the native Arabs acknowledged Cyril, the Phanar and nearly all the rest of the Orthodox world Procopius. Russia deposed Procopius in 1875, and Cyril died. Russia then appointed Hierotheus, who, however, to everyone's surprise took the side of the Phanar in the Bulgarian quarrel. So Russia fell foul of him, and took the opportunity of confiscating the property of the Holy Sepulchre in Bessarabia. Hierotheus died in 1882. There were then three candidates for the vacant see, Nicodemus, Gerasimus and Photius. Photius (always a determined enemy of Russia) was elected canonically. But the Russians made the sultan refuse him the *berat*, and give it to Nicodemus instead. Gerasimus became Patriarch of Antioch in 1885. Photius went back to his monastery at Sinai. Nicodemus reigned from 1883 to 1890. In 1890 the Phanar persuaded the sultan to depose Nicodemus, and give the *berat* to Photius. Nicodemus retired to Halki. But the Russians absolutely refused to allow Photius to become patriarch. So the third original candidate, Gerasimus, was persuaded to leave Antioch and come to Jerusalem. He reigned from 1891 to 1897. Photius became Metropolitan of Nazareth, and in 1899 Patriarch of Alexandria. Gerasimus died in 1897 and the Russians tried to have their candidate Euthymius, Archimandrite of the Holy Sepulchre, appointed. But the candidate of the Phanar, Damianus, Metropolitan of Philadelphia, was appointed in 1897. For further information about the Orthodox patriarchate see below.

(4) The Catholic Church in Jerusalem

The organization of the Catholics in Palestine dates from the time of the Crusades. As soon as Godfrey of Bouillon became King of Jerusalem in 1099, a Latin patriarchate was set up. Arnulf, chaplain of the Normans, was made administrator of this patriarchate by the synod held in Jerusalem at Christmas, 1099. But he was soon set aside because of his immoral life, and Dagobert, Archbishop of Pisa, elected patriarch. The line of Latin patriarchs is: Dagobert of Pisa, 1099-1107 (Ehremar, anti-patriarch set up by Baldwin I while Dagobert was travelling to Rome to answer the king's complaints); Ghibellin of Arles, 1107-11; Arnulf (the original administrator), 1111-8; Guarimund,

1118-28; Stephen, 1128-30; William, 1130-45; Fulcher, 1146-57; Amalric, 1157-80; Heraclius, 1180-91. -- During the episcopate of Heraclius the Saracens took Jerusalem (1187), and the Orthodox patriarch returned. From this time the Latin patriarchs resided at the court of the Latin kings; when that court was at 'Akka (during the last period of the kingdom) the patriarchate was united to the bishopric of that town (Ptolemais in Latin). -- Michael; Bl. Albert of Parma (d. 1214); Gerald or Girold, 1214-27; Robert, 1227-54; James Pantaleon (afterwards Pope Urban IV), 1254-61; William, 1261-; Thomas; John, 1270-8; Nicholas, 1278-94.

Since 'Akka fell in 1291, the Latin line was continued by merely titular patriarchs, living at Rome and using the basilica of St. Laurence without the Walls as their patriarchal church, till Pius III restored the real patriarchate at Jerusalem in 1847. The patriarchs of the crusading time were in most cases not very edifying persons. Much of the history of the Latin Kingdom is taken up with their quarrels with the kings, intrigues, and generally scandalous adventures. An amusing, if hostile account of these intrigues will be found in Besant and Palmer's "Jerusalem" (throughout the book). The patriarchate extended to the limits of the Crusaders' territory; as they conquered new cities, so were new Latin sees established. There were four provinces: *Palaestina I* (metropolis, Caesarea; two suffragan sees, Sebaste and Saba), *Palaestina II* (Nazareth with one suffragan, Tiberias), *Palaestina III* (metropolis Petra, suffragan Sinai), *Phoenicia* (metropolis Tyre; suffragans, St. Jean d'Acre, Sidon, Beirut, Paneas). Bethlehem and Ascalon (joined), Hebron and Lydda (Diospolis) were immediately subject to the patriarch. But the number of sees fluctuated with the fortunes of the crusaders; there are various lists given by contemporary authors representing different circumstances. There were many abbeys besides the priory of the Holy Sepulchre (following the Augustinian rule); for these see Le Quien, III, 1279 sqq., and the "Gesta Dei per Francos" (Hanover, 1611), 1077.

From the thirteenth century, when this hierarchy disappeared, down to our own time, the Catholic cause was upheld almost solely by the Franciscan Order. The friars were first sent to Palestine by St. Francis himself in 1219. The order has a special province, the "Custodia Terræ Sanctæ", which includes Lower Egypt, Cyprus, and Armenia. The head of this province, and till 1847 the supreme authority for Catholics in Palestine, is the Franciscan provincial who bears the title "Custos Terræ Sanctæ". He had episcopal jurisdiction (but not orders), and the Turkish government granted him many privileges as civil head of the "Latin nation" in Palestine. This province (commonly called by the Italian form "Terra Santa", which has passed into Arabic and Turkish) is recruited from all the other Franciscan provinces. Its official language is Italian. During the long centuries since the fall of the Latin kingdom the heroic friars have guarded the interests of the Catholic Church around the Holy Places. Always

exposed to the jealousy of the Orthodox and other sects, continually persecuted by the Turks, they have kept their place till today, and with it our rights in the Holy Land, constantly at the price of their blood. It was in their hospices (the *case nuove*, which they have built all over Palestine) that the Catholic pilgrim found shelter. They have kept the Latin altars in repair, and have never ceased offering the Latin Mass on them for six centuries when no one else cared for them. The "Reverendissimus Custos Terrae Sanctae" now fills a much less important place in the Catholic Church of Palestine; but no changes can ever make one forget what we owe to the friars for defending our cause during those dark years.

In the nineteenth century it was felt that a state of things of which the result was practically Franciscan monopoly in Palestine had become an anomaly. The Turkish government had become tolerant, the number of Catholic pilgrims increased enormously, many other religious orders had built houses at Jerusalem and other cities, there were Arab Catholics who wished to become priests and to serve their own people, but who had not necessarily a vocation for the Franciscan Order. So the old conditions that reserved practically all cure of souls to Franciscans and submitted every one to the jurisdiction of the *custos* -- natural enough when there had been no one else to undertake the work -- were no longer reasonable now. There was no reason why the Catholics of Palestine should not be governed by an episcopal hierarchy in the normal way. Moved by these considerations Pius IX decided to change the titular Latin patriarchate at Rome into a real see again at Jerusalem. The titular patriarch, Augustus Foscolo (1830-47), was requested to resign. In his place Joseph Valerga was made patriarch in 1847, and ordered to take up his residence in the Holy City (Brief of 23 July 1847). He was consecrated by the pope himself on 10 October, 1847, and arrived in his patriarchate in January, 1848. He found 4200 Latin Catholics there; at his death in 1872 he had doubled the number. The succession of these restored Latin patriarchs is: Joseph Valerga, 1847-72; Vincent Bracco, 1873-89; Louis Piavi, 1889-1905. Mgr. Piavi died on 24 January, 1905. After some delay, the present patriarch, Mgr. Philip Camassei, formerly Latin Bishop of Syra, was promoted in November, 1906, and entered Jerusalem just before Easter, 1907.

(5) Present Condition of the City

Jerusalem (*El Quds*) is the capital of a sanjak and the seat of a mutasarrif directly dependent on the *Sublime Porte*. In the administration of the sanjak the mutasarrif is assisted by a council called *majlis ida ra*; the city has a municipal government (*majlis baladiye*) presided over by a mayor. The total population is estimated at 66,000. The Turkish census of 1905, which counts only Ottoman subjects, gives these figures: Jews, 45,000; Moslems, 8,000; Orthodox Christians, 6000; Latins, 2500; Armenians, 950; Protestants, 800; Melkites, 250; Copts, 150; Abyssinians, 100; Jacobites, 100; Catholic

Syrians, 50. During the nineteenth century large suburbs to the north and east have grown up, chiefly for the use of the Jewish colony. These suburbs contain nearly half the present population.

The Latin Patriarch of Jerusalem has jurisdiction over all Latins of Palestine, extending to Egypt on the south, the Latin Delegacy of Syria (seat at Beirut) on the north, and including Cyprus. He is appointed by the Roman Curia (*libera collatio S. Pont.*), and is personally exempt from Turkish authority (still nominally under the protectorate of France). He is represented in the *majlis*. The patriarchate has no suffragan sees. The *Custos Terræ Sanctæ* retains the use of episcopal insignia and certain rights of admission to the holy places; otherwise, he must now be counted only as the Provincial of the Franciscans. Appointments to the "Order of the Holy Sepulchre" (a military order of knighthood which began with the crusades and continues as a small dignity given to deserving Catholics), formerly made by the *custos*, are now in the hands of the patriarch. The patriarchal church in theory is the Holy Sepulchre. But since Catholics have only alternative rights there with the Orthodox and Armenians, Foscolo built a pro-cathedral near the Jaffa Gate (to the north): the patriarch's house and a seminary adjoin this church. But the patriarch celebrates the functions of Holy Week and others at the Holy Sepulchre according to the rights conceded to Catholics, which are carefully drawn up and enforced by the Government. The Franciscan *custos* lives at the Convent of St. Saviour to the north of the Muristan. This convent is the Franciscan head-quarters at Jerusalem. It was originally a Georgian monastery, and was acquired by the friars in 1551. Next to it is the large parish church of St. Saviour, finished in 1885 at the expense of the Austrian Emperor Francis Joseph I; the *Casa Nuova* (hospice for pilgrims) is close at hand. Then there are an orphanage, a school, a library, printing press, etc., all in charge of the friars, clustered around the convent. The Franciscans have also the little convent of the Holy Sepulchre with the "Chapel of the Apparition," that forms the northern part of the group of buildings at the Anastasis. This has been Franciscan property since the thirteenth century (P. Barnabe Meistermann's "Nouveau Guide" contains an excellent plan of the Anastasis, coloured according to the possessions of the various religions). Six or seven priests and as many lay-brothers are sent from the convent of St. Saviour to reside here for periods of three months in turn. These are the "Fathers of the Holy Sepulchre" who are always on guard to celebrate the Latin Offices, receive pilgrims, and maintain our traditional rights. They have a hard time while they are on duty. There is no way out of the convent except by the door to the whole complex on the south. This door is locked by the Turkish guardians at night, so the friars are locked in. Their food is brought to them from St. Saviour, and passed through a wicket in the great door every day. Formerly the residence in the narrow damp convent shut in among the other buildings, which they do not leave during their

time of office, was very injurious to their health. But in 1869 Emperor Francis Joseph of Austria, when he made his pilgrimage to Jerusalem, obtained from the Turkish government some improvement in the ventilation of the convent and leave to build a terrace and a belfry behind it. In 1875 the friars rang their bells to summon Catholics to their services for the first time at this place since centuries (the Orthodox do not use bells but clappers -- *symantra*; bells are an abomination to Moslems). The third Franciscan convent in Jerusalem is by the Chapel of the Scourging in the *Tariq Bab Sitti Miriam*, opposite the Antonia castle. This property belonged to them from the time of the Crusades till 1618. It was then taken away by the Pasha and turned into a stable. It was given back in 1838, and restored at the expense of King Maximilian of Bavaria.

Other Latin properties in Jerusalem are the College of St. Ann for Melkite clergy governed (since 1878) by Cardinal Lavigerie's *Pres blancs* near the *Bab Sitti Miriam* (Gate of the Lady Mary), the Dominican convent and *Ecole biblique* at St. Stephen outside the Damascus Gate (1884), the great French Hospice "Notre Dame de France", directed by the Augustinians of the Assumption outside the walls to the northwest near the Bab 'Abdu-I'hamid (1887), the Benedictine monastery with a seminary for Syrian Catholics on the Mount of Olives (1899), the new German Benedictine monastery at the "Dormitio B.M.V." on Mount Sion, given by the German Emperor in 1906, the German and Austrian hospices, the French Passionists and Lazarists, the Italian Salesians, and French Peres de Sion and Christian Brothers. There are convents of the French Carmelite nuns (on the Mount of Olives, since 1873), Poor Clares, Franciscan nuns, "Dames de Sion", Sisters of St. Vincent de Paul, Benedictine nuns, Sisters of the Rosary of St. Joseph and of Marie-Reparatrice". Of all these Latin institutions the older colonies (e.g. the Franciscans) have on the whole an Italian character, by far the greatest number are French, but the Germans (especially since the troubles about the protectorate) are now getting considerable influence. As throughout the Turkish Empire early in the twentieth century, French was the European language most spoken at Jerusalem.

Most of the Eastern Catholic Churches have establishments in the Holy City. The Melkite Patriarch of Antioch also bears the titles of Alexandria and Jerusalem. He has a church (St. Veronica) in the Khan-ez-zeit just behind St. Saviour where the Melkite patriarchal vicar (who generally resides at Jaffa) and the patriarch himself (when present) officiate; near it is a hospice for Melkites. There is also a Melkite monastery near the New Bazaar (Es-suk el-jedid). The Maronites have a parish church served by their patriarchal vicar; that of the Catholic Armenians (Notre Dame du Spasme) is in the Via Dolorosa opposite the Austrian hospice. The Armenians had an Archbishop of Jerusalem (Michael Alessandrius) from 1855 to 1867. No successor has been appointed to him. The Syrian Catholics have also a small church where their patriarchal vicar

officiates. The Syrian Catholic Patriarch of Antioch is considered as administrator of an Archdiocese of Jerusalem; but he does not use the title. A hardship felt by all these Eastern Catholics is that they cannot celebrate their Offices at the Holy Sepulchre. Among Catholics the Turk recognizes only the rights of Latins there.

The Orthodox Church naturally also fills a large place among the Christian communities of Jerusalem. The patriarch bears the title "the most blessed and holy Patriarch of the holy city Jerusalem and all Palestine, of Syria, Arabia beyond the Jordan, Cana of Galilee and Holy Sion". It should be noticed that of all the persons who bear the title "Patriarch of Jerusalem", this one alone represents historic continuity from the original line. His patriarchate extends to the Lebanon on the north and the Red Sea on the south (except the autocephalous convent on Sinai). East and west it is bounded by the Syrian desert and the sea. The patriarch resides by the "Great Laura" in the Haret deir-er-rum not far from the Anastasis; he has also properties in the country at Katamon near Jerusalem (where they say St. Simeon lived) and near Deir Aban (between Jerusalem and Jaffa). The sees of the Patriarchate are Cæsarea, Scythopolis (Beisan), Petra, Ptolemais ('Akka), Nazareth, Bethlehem, Lydda, Gaza, Nablus, Sebaste, Tabor, the Jordan, Tiberias, Philadelphia, Pella, Kerak, Diocaesarea (Sepphoris), Madaba. The only resident bishop is the Metropolitan of 'Akka; those of Lydda, Gaza, Nablus, Sebaste, the Jordan, Philadelphia, Kerak and Madaba live at Jerusalem and form the Patriarch's Court. The other sees are left vacant. In the administration of his Church the patriarch is assisted by a synod consisting of ten bishops and ten archimandrites. Near the patriarchate is the large Orthodox monastery (St. Constantine) with a printing press and hospice for pilgrims. In the Holy Sepulchre the Orthodox possess the central part (the "Katholikon") and various chapels. They have a monastery built against it (to the west). The actual Anastasis under its cupola is too precious to be given to any one religion; so it is common property, used in turn by all. There are sixteen other Orthodox monasteries in and around the city and various hospices, hospitals and schools. For the education of their clergy they have the "Monastery of the Holy Cross" (*Deir el-musallebe*) about one and a half miles west of the city. This monastery (said to be at the place where the tree grew from which the cross was made) was originally Georgian. Inscriptions in that language may be seen in the church. It was sold to the Greeks, opened as a theological college in 1855, since then several times closed and re-opened. Many students do not belong to the patriarchate, but come from Asia Minor, Cyprus, Greece, etc., to study here. There are hardly any Arabs. The only language used in the college is Greek. The Greek element has hitherto had exclusive possession of the older Orthodox establishments in Jerusalem.

We have alluded to the troubles now raging through the attempt of the Arabs to break this monopoly. It is considerably broken, though not in favour of the Arabs, by

the Russian establishments. The autocephalous Russian Church is represented in Palestine by a great number of large colonies and institutions altogether separate from those of the Patriarchate. The first Russian archimandrite arrived in 1844; the consulate dates from 1858. The Russian Palestine Society builds churches, in which the liturgy is celebrated in Slavonic, and hospices for Russian pilgrims all over the country to the great annoyance of the Greek patriarchal element. It is because Russia has taken up the cause of the native Arabs that they can no longer be ignored as obscure revolutionaries of the lower classes. On the contrary, the Greek influence is already doomed; when Lord Damianus dies or is successfully deposed, we may expect to hear of an Arab patriarch as his successor. It remains to be it made at Antioch by excommunicating him. The chief Russian establishments at Jerusalem are the enormous group of buildings outside the city on the Jaffa road. These contain a large and very handsome church where the Russian archimandrite officiates, huge hospices for pilgrims, a hospital and other buildings, all close to the Russian consulate. Then they have a gorgeous church in Gethsemane, and another one with a high tower, a convent of nuns, and other buildings on the top of the Mount of Olives (the place of the Ascension in their tradition). There are also another Russian hospice in the Muristan, a lunatic asylum, and schools. But the Russians have no rights at the Holy Sepulchre. Each time they want to have a service there they must ask leave of the patriarch. About 8000 Russian pilgrims visit the Holy Places every year.

The Gregorian Armenians have a Patriarchate of Jerusalem as one of their two minor patriarchates. In the seventeenth century the Katholikos of Echmiadzin gave the Armenian Bishop of Jerusalem the right to consecrate chrism; thereupon the bishop assumed the title patriarch and began ordaining bishops. The title is now acknowledged by the Armenian Church. The jurisdiction of the Armenian Patriarch of Jerusalem extends throughout the Pashaliks of Damascus, 'Akka, Tarabulus (Tripoli), and Cyprus. Under him are seven archbishops and bishops who live with him and form his synod, and fourteen suffragans. The patriarchate is at the great Armenian monastery of St. James to the southwest of the city, near the Bab Nebi Daud. This was formerly a Georgian monastery; the Armenians possess it since the thirteenth century. Besides the patriarch and bishops about a hundred vartabeds live here. There are also a seminary and schools and a hospice for pilgrims adjoining the great church. They also have a monastery just outside the same gate (the reputed house of Caiphas), a convent of nuns (Deir-ez-zeituni) near the patriarchate, and land outside the city opposite the great Russian colony. The whole southwest of Jerusalem around their patriarchate is the "Armenian quarter". At the Holy Sepulchre they possess the Chapels of St. Helena, of St. John, of the "Division of Garments", of St. James (behind the Anastasis), and the "Stone of the Holy Women" (cf. Meistermann's plan). The Armenians have

further rights of walking in procession about the Anastasis, and take their turn to celebrate their offices at it.

The Jacobite Syrians have a little church (claimed as the house of John Mark) in the *Haret-en-nebi Daud*, with a monastery where the vicar of their maphrian (who now unites with this dignity that of Metropolitan of Jerusalem) resides, and the central chapel behind the Anastasis. The Copts have a large monastery (*Deir-es-sultan*) close to the Holy Sepulchre to the north, at the ninth Station of the Cross, with a hospice. Another Coptic church is at their Khan north of the *Birket Hammam-el-batrak* (Pool of Hezekiah), and they have several chapels in the Holy Sepulchre itself. The Copts have had a Bishop of Jerusalem since the eleventh century. He now resides at Cairo with the title Bishop of the East (*Sharkiye*), or of the Anastasis (*Kayame*), or Jerusalem (*El Quds*), and ranks immediately after the Abuna of Abyssinia. The Abyssinians possess a large round church outside the city to the northwest (beyond the Russian buildings) and a monastery touching the Holy Sepulchre and the Coptic monastery. They have no special place in the great church itself; but share with the Copts (with whom, of course, they are in communion). The Nestorians had a Metropolitan of Jerusalem from the ninth to the thirteenth century. Since 1282 the title seems to have disappeared (Le Quien, II, 1299).

Lastly, English, German and American Protestants of all sects have a great number of establishments, churches, hospitals, and hospices in Jerusalem. The most important of these are the German Evangelical Erl serkirche in the Muristan (built in 1898 on land given by the German Emperor) with a school, the Johanniterhospiz, Hospital of the Kaiserwerth Deaconesses, the Leper-house kept by the Moravians, and the Syrian Protestant orphanage. In 1841, by arrangement between the Prussian and English governments, an Anglo-Lutheran "Bishopric of St. James" at Jerusalem was founded. The bishops were to be appointed alternately by the two governments and to have jurisdiction over all Anglicans and Lutherans in Syria, Chaldea, Egypt and Abyssinia. This is the famous "Jerusalem bishopric" that gave so great scandal to the leaders of the Oxford Movement. The bishops were: Michael Samuel Alexander (appointed by England), 1842-5; Samuel Gobat von Cremines (by Prussia), 1845-79; Joseph Barclay (by England), 1879-81. Already during Gobat's time the two elements had drifted apart; when Barclay died, the arrangement fell through.

The Anglicans have now a bishopric "in" Jerusalem of quite a different type (since 1887). Bishop Blyth and his archdeacons are conciliatory to all the Eastern Churches and on excellent terms with the Orthodox patriarch. The Anglican Collegiate Church of St. George (with a college) is the seat of the bishop in Jerusalem. It is situated outside the city to the north, beyond the Dominican convent. St. Paul's Church belongs to the Church Missionary Society (outside, northwest); there is a large Anglican school

(founded by Bishop Gobat) at the southwest corner of the walls. The London Jews' Society has a church, two hospitals and several schools.

The following persons use the title of Jerusalem in some form:

- *Catholics*: the Latin Patriarch, residing in the city; the Melkite Patriarch of Antioch, Alexandria, Jerusalem and all the East, residing at Alexandria or Damascus; the Melkite Patriarchal Vicar of Jerusalem residing at Jaffa; the Maronite Patriarchal Vicar of Jerusalem residing in the city;
- *Non-Catholics*: the Orthodox Patriarch residing in the city; the Armenian Patriarch residing in the city; the Jacobite Maphrian (Metropolitan of Jerusalem) residing with his Patriarch (of Antioch) in the Zapharan monastery near Mardin; the Jacobite Vicar of Jerusalem (for the Maphrian) residing in the city; the Coptic Bishop of Jerusalem (or the East or the Anastasis) residing at Cairo; the Anglican Bishop of Jerusalem.

Liturgy of Jerusalem

Liturgy of Jerusalem

The Rite of Jerusalem is that of Antioch. That is to say, the Liturgy that became famous as the use of the patriarchal church of Antioch, that through the influence of that Church spread throughout Syria and Asia Minor, and was the starting point of the development of the Byzantine rite, is itself originally the local liturgy, not of Antioch, but of Jerusalem. It is no other than the famous liturgy of St. James. That it was actually composed by St. James the Less, as first Bishop of Jerusalem, is not now believed by any one; but two forms in it show that it was originally used as local rite of the city of Jerusalem. There is a reference to the Cross among the prayers for catechumens--"Lift up the horn of the Christians by the power of the venerable and life-giving cross"--that is always supposed to be a reference to St. Helena's invention of the True Cross at Jerusalem in the early fourth century. If so, this would also give an approximate date, at any rate for that prayer. A much clearer local allusion is in the Intercession, after the Epiklesis: "We offer to thee, O Lord, for thy holy places which thou hast glorified by the divine appearance of thy Christ and by the coming of thy Holy Spirit" (these are the various sanctuaries of Palestine) "especially for holy and glorious Sion, mother of all Churches" (Sion, in Christian language, is always the local Church of Jerusalem. See JERUSALEM II) "and for thy holy Catholic and Apostolic Church throughout the whole world" (*kata pasan ten oikoumenen*, which always may mean,

"throughout the whole Empire"). This reference, then, the only one to any local Church in the whole liturgy -- the fact that the Intercession, in which they pray for every kind of person and cause, begins with a prayer for the Church of Jerusalem, is a sure index of the place of origin.

We have further evidence in the catechetical discourses of St. Cyril of Jerusalem. These were held about the year 347 or 348 in the Church of the Holy Sepulchre; it is obvious that they describe the liturgy known to his hearers there. Probst has examined the discourses from this point of view ("*Liturgie des IV Jahrhunderts*", Muster, 1893, 82-106) and describes the liturgy that can be deduced from them. Allowing for certain reticences, especially in the earlier instructions given to catechumens (the *disciplina arcani*), and for certain slight differences, such as time always brings about in a living rite, it is evident that Cyril's liturgy is the one we know as that of St. James. As an obvious example one may quote Cyril's description of the beginning of the Anaphora (corresponding to our Preface). He mentions the celebrant's versicle, "Let us give thanks to the Lord", and the answer of the people, "Meet and just". He then continues: "After this we remember the sky, the earth and the sea, the sun and the moon, the stars and all creation both rational and irrational, the angels, archangels, powers, might, dominations, principalities, thrones, the many-eyed Cherubim who also say those words of David: Praise the Lord with me. We remember also the Seraphim, whom Isaias saw in spirit standing around the throne of God, who with two wings cover their faces, with two their feet and with two fly; who say: Holy, holy, holy Lord of Sabaoth. We also say these divine words of the Seraphim, so as to take part in the hymns of the heavenly host" ("*Catech. Myst.*", V, 6). This is an exact description of the beginning of the Anaphora in the Liturgy of St. James.

We have, then, certain evidence that our St. James's Liturgy is the original local rite of Jerusalem. A further question as to its origin leads to that of its relation to the famous liturgy in the eighth book of the Apostolic Constitutions. That the two are related is obvious. (The question is discussed in ANTIOCHENE LITURGY.) It seems also obvious that the Apostolic Constitution rite is the older; St. James must be considered a later, enlarged, and expanded form of it. But the liturgy of the Apostolic Constitutions is not Palestinian, but Antiochene. The compiler was an Antiochene Syrian; he describes the rite he knew in the north, at Antioch. (This, too, is shown in the same article.) The St. James's Rite, then, is an adaptation of the other (not necessarily of the very one we have in the Apostolic Constitutions, but of the old Syrian rite, of which the Apostolic Constitutions give us one version) made for local use at Jerusalem. Then it spread throughout the patriarchate. It must always be remembered that, till the Council of Ephesus (431), Jerusalem belonged to the Patriarchate of Antioch. So this liturgy came to Antioch and there displaced the older rite of the Apostolic

Constitutions. Adopted unchanged at Antioch (the local allusion to "holy and glorious Sion" was left unaltered), it imposed itself with new authority as the use of the patriarchal Church. The earliest notices of an Antiochene Rite that we possess show that it is this one of St. James. There is no external evidence that the Apostolic Constitution rite was ever used anywhere; it is only from the work itself that we deduce that it is Syrian and Antiochene. Under its new name of Liturgy of Antioch, St. James's Rite was used throughout Syria, Palestine, and Asia Minor. When Jerusalem became a patriarchate it kept the same use.

The Liturgy of St. James exists in Greek and Syriac. It was probably at first used indifferently in either language, in Greek in the Hellenized cities, in Syriac in the country. Of the relation of these two versions we can say with certainty that the present Greek form is the older. The existing Syriac liturgy is a translation from the Greek. There is good reason to suppose that at Jerusalem, as everywhere else, the primitive liturgical language was Greek. The schismatical Monophysite Churches formed in the fifth and sixth centuries in Syria kept St. James's Rite in Syriac. The Orthodox used it in Greek till it was supplanted by the daughter-rite of Constantinople about the twelfth century. At present the old Rite of Jerusalem is used, in Syriac, by the Jacobites and Uniat Syrians, also in a modified form in Syriac by the Maronites. The Greek version has been restored among the Orthodox at Jerusalem for one day in the year -- 31 December.

ADRIAN FORTESCUE

Jesi

Jesi

(ÆSINA)

Diocese in the Province of Ancona, Italy, immediately subject to the Holy See. The city is situated on a pleasant eminence, and was anciently known as Æsis, the name likewise of the River Esino, which flows near the city and forms the boundary between Umbria and Piceno. Little or nothing remains of the ancient buildings, temples, baths, etc., still preserved in the fourteenth century. After the Lombard invasion Jesi formed part of the Pentapolis, afterwards called the March of Ancona. In the conflicts between pope and emperor for the possession of the Marches, Jesi was Ghibelline. Frederick II, who was born there, used the city as the base of his operations. Saint Septimius, martyred in 307, is venerated as the first Bishop of Jesi. Saint Florianus, who was cast into the Esino in the Diocletian persecution, is also venerated (perhaps he is confounded with Saint Florianus who was cast into the Enus or Anisus). Other holy bishops of antiquity were Saints Martianus (c. 500), Calumniosus (c. 647), Hon-

estus. The relics of these three were discovered in 1623. In 1245 Innocent IV deposed the intruder Armannus and placed in his stead the Franciscan Gualtiero, an Englishman and a friend of John of Parma, general of the order and patron of the "Spirituals", spoken of by Salimbene as "bonus cantor, bonus prædicator, bonus dictator". Bishop Severinus in 1237 laid the foundations of the new cathedral, a magnificent structure; the old one, now San Nicola, was outside the city, and in the eighteenth century had fallen into ruin. Gabriele del Monte (1554) introduced the reforms of the Council of Trent, which he had attended; he founded the seminary, and distinguished himself by his charity, especially during the plague of 1583. His successors were Cardinal Camillo Borghese (1597), afterwards Pope Paul V; Cardinals Tiberio Cenci (1621) and Alderano Cibò (1656), noted for their benefactions to churches, monasteries, and the seminary; Antonio Fonseca (1724), who restored the cathedral and founded a hospital. Cardinal Caprara (afterwards Archbishop of Milan), who concluded the Concordat with Napoleon, was Bishop of Jesi (1800-02). He was succeeded by Antonio M. Odescalchi, deported to Milan by the French in 1809. The diocese has twenty-six parishes with 54,000 souls; six religious houses of men and thirteen of women; two schools for boys and six for girls.

Cappelletti, *Le Chiese d'Italia*, VII (Venice, 1857); Baldassini, *Notizie storiche della regia città di Jesi* (1703).

U. BENIGNI

Jesuit's Bark

Jesuit's Bark

(China Bark; Cinchona; Cortex ChinÆ; Peruvian Bark).

Jesuit's Bark, on account of its alkaloids, is the most celebrated specific remedy for all forms of malaria. It is obtained from several species of the genus cinchona, of the order Rubiaceæ, that have been discovered at different times and are indigenous in the Western Andes of South America. Formerly the bark itself, prepared in different forms, was used as a drug, while today immense quantities form the base of the production of cinchona alkaloids. This industry is carried on principally in Germany, and the Dutch and English cinchona plantations in Java, Ceylon, and Farther India are the chief sources whence the raw material is supplied. The history of cinchona bark, which dates back two hundred and eighty years, has greatly influenced that of pharmacy, botany, medicine, trade, theoretical and practical chemistry, and tropical agriculture. Two hundred and fifty years ago the physician Bado declared that this bark had proved more precious to mankind than all the gold and silver which the Spaniards obtained from South America, and the world confirms his opinion today. Two hundred years

ago the Italian professor of medicine Ramazzini said that the introduction of Peruvian bark would be of the same importance to medicine that the discovery of gunpowder was to the art of war, an opinion endorsed by contemporary writers on the history of medicine. Whoever has searched the annals of cinchona will recognize the truth of the following observations of Weddel (d. 1877): "Few subjects in natural history have excited general interest in a higher degree than cinchona; none perhaps have hitherto merited the attention of a greater number of distinguished men."

This explains the fact that the above-named branches of science all possess an extensive literature on cinchona, which is accessible for purposes of comparison to those who care to study the subject in detail. Limited space here permits merely a sketch of the relation between the Jesuits and cinchona bark, with an elucidation of the terms "Jesuit's bark", "Jesuit's Tree", "Jesuit's Powder", "Pulvis Patrum", etc., necessitating a glance into the earliest literature on cinchona, where, however, many difficulties arise. For a just appreciation of these difficulties, the following quotation from Alexander von Humboldt, which sufficiently accounts for them, should be borne in mind: "It almost goes without saying that among Protestant physicians hatred of the Jesuits and religious intolerance lie at the bottom of the long conflict over the good or harm effected by Peruvian Bark." Many tales which were formerly widespread have proved fabulous; others are to be modified in detail; to which must be added modern discoveries of unquestioned genuineness. Scientific proof is found partly in the work of the present writer.

The Spanish Jesuit missionaries in Peru were taught the healing power of the bark by natives, between 1620 and 1630, when a Jesuit at Loxa was indebted to its use for his cure from an attack of malaria (Loxa Bark). It was used at the recommendation of the Jesuits in 1630, when Countess Chinchon (Cinchon; the derivative is Cinchona, the appellation selected by Linnæus in 1742 -- Markham prefers Chinchona), wife of the new viceroy, who had just arrived from Europe, was taken ill with malaria at Lima. The countess was saved from death, and in thanksgiving caused large quantities of the bark to be collected, which she distributed to malaria sufferers, partly in person and partly through the Jesuits of St. Paul's College at Lima (*pulvis comitissæ*). She did not return to Europe and was not the first to bring the bark there or to spread its use through Spain and the rest of the Continent, as stated by Markham. For the earliest transportation of the bark we must thank the Jesuit Barnabé de Cobo (1582-1657; the Cobæa plant), who rendered important services in the exploration of Mexico and Peru. In his capacity of procurator of the Peruvian province of his order, he brought the bark from Lima to Spain, and afterwards to Rome and other parts of Italy, in 1632. In the meanwhile its merits must have been ascertained both in Lima and in various parts

of Europe, as Count Chinchon and his physician de Vega brought it back with them in 1640.

Count Chinchon, however, troubled himself little about the use or sale of the bark. A greater distribution resulted from the large quantity brought over by the Jesuit Bartolomé Tafur, who, like Cobo, came to Spain in 1643 while procurator of the Peruvian province of his order, proceeded through France (there is an alleged cure of the young Louis XIV, when still dauphin, effected by Father Tafur by means of Peruvian bark), and thence to Italy as far as Rome. Tafur had frequent intercourse with the celebrated Jesuit theologian de Lugo, who became a cardinal in 1643. From him de Lugo heard of the cinchona, and remained from 1643 until his death in 1660 its faithful advocate, zealous defender, and generous, disinterested dispenser in Italy and the rest of Europe, for which he was honoured in the appellation of *pulvis cardinalis*, *pulvis Lugonis*, and by having several portraits painted of him. De Lugo had the bark analysed by the pope's physician in ordinary, Gabriele Fonseca, who reported on it very favourably. Its distribution among the sick in Rome took place only on the advice and with the consent of the Roman doctors. The cardinal had more bark brought from America over the trade routes through Spain. Almost all the other patrons of the drug in those times appear to have been directly influenced by de Lugo; as, for instance, the lay brother Pietro Paolo Pucciarini, S. J. (1600-1661), apothecary in the Jesuit college at Rome, who undoubtedly deserves the greatest credit after de Lugo for distributing the genuine unadulterated article, and to whom are attributed the Roman directions for its use (*schedula Romana*), the earliest dating at least from 1651. In his friend Honoré Fabri, a French Jesuit, who stayed for a time in Rome, de Lugo won a determined defender of the bark against the first anticinchona pamphlet written by the Brussels doctor JeanJacques Chifflet. Under the pseudonym of Antimus Conygius, Fabri wrote in 1655 the first paper on cinchona published in Italy, as well as the first of the long list of brochures defending its use and the only independent article on this bark which has been issued by a Jesuit. The two Genoese, Girolamo Bardi, a priest, and Sebastiano Ba(l)do, a physician, who were among the pioneer advocates of the plant, were intimate with the cardinal, and Ba(l)do prefixed to his principal work a letter from de Lugo, dated 1659, on cinchona, which shows that the cardinal even when seventy-seven years old was still active in its behalf.

Circumstances created a suitable opportunity for disseminating the bark from Rome throughout Europe by means of the Jesuits. In 1646, 1650, and 1652 the delegates to the eighth, ninth, and tenth general councils of the order (three from each province) returned to their homes, taking it with them, and at the same time there is evidence of its use in the Jesuit colleges at Genoa, Lyons, Louvain, Ratisbon, etc. The remedy - - connected with the name of Jesuit -- very soon reached England. The English weekly

"Mercurius Politicus" in 1658 contains in four numbers the announcement that: "The excellent powder known by the name of "Jesuit's powder" may be obtained from several London chemists." It remains to recall the fact that even in the seventeenth and eighteenth centuries the bark kept in the Jesuit pharmacies or in their colleges was considered particularly efficacious because they were better able to provide a genuine unadulterated supply. Further, that in those two centuries Jesuit missionaries took the remedy to the malaria regions of foreign countries, even reaching the court of Peking, where they cured the emperor by its means; that in Peru during the eighteenth century they urged American collectors to lay out new plantations; and in the nineteenth century they were the first to plant cinchona outside of South America.

Daughters of Jesus

Daughters of Jesus

Founded at Kermaria, in the Diocese of Vannes, France, in 1834, for the care of the sick poor, and the education of girls. The congregation received government authorization 31 October, 1842. In 1893 a provincial house for Canada was founded at Three Rivers. The sisters in Canada number (1910) 267, choir and lay, in charge of 25 schools, chiefly model and elementary, in addition to 9 boarding schools, a hospital, and an orphanage; they also have the domestic care of 2 religious houses. In the United States they conduct an academy and hospital at Lewiston, Montana, and the school connected with the French parish at Waltham, Massachusetts. The congregation has over 200 convents throughout the world.

Sisters of the Holy Childhood of Jesus and Mary

Sisters of the Holy Childhood of Jesus and Mary

(1) A congregation founded in 1835 in the Diocese of Fréjus, for the education of girls and the care of the sick, with mother-house at Draguignan; government authorization was granted in 1853.

(2) A congregation established at Sens, in 1838, for the work of teaching and the care of the sick in their own homes, the direction of asylums, boarding-schools, etc.; it received state authorization in 1853. Under the mother-house at St-Colombe-les-Sens are over 36 filial establishments.

(3) *Sisters of the Holy Childhood of Jesus and Mary of Ste-Chrétienne*, known also as *Sisters of Ste-Chrétienne*, founded in 1807 by Mme Anne-Victoire Méjanès, *née* Tailleux, for the education of girls and the care of the sick poor. At the invitation of Bishop Jauffret of Metz, Mme Méjanès and her community went from Argancy to Metz and took up their abode in the Abbey of St. Glossinde, where, on 20 April, 1807, they bound themselves by vow to follow the statutes drawn up for them by the bishop. Their numbers soon increased until now (1910) there are about 1400 sisters in over 809 houses. The religious are divided into choir and lay sisters, the latter occupied with the domestic care of their various institutions, the former engaged in the works peculiar to higher schools, industrial schools, and orphanages. The vows are made annually for ten years, after which final vows are taken. The congregation received the approval of the Holy See in 1888, and in 1899 its statutes were granted papal approbation. The sisters have houses in Lorraine, France, Austria, Belgium, England, and the United States. In the United States about 90 sisters have charge of 5 schools in the Archdiocese of Boston, with a total attendance of 2400. There is a novitiate of the congregation in Salem, Massachusetts.

F.M. RUDGE

Jesus Christ

Jesus Christ

Origin of the Name of Jesus

In this article, we shall consider the two words -- "Jesus" and "Christ" -- which compose the Sacred Name.

The Holy Name of Jesus

We give honour to the Name of Jesus, because it reminds us of all the blessings we receive through our Holy Redeemer.

Early Historical Documents Concerning Jesus Christ

In this article, we discuss the ancient historical documents -- pagan, Jewish, and Christian -- referring to Christ's life and work.

Chronology of the Life of Christ

In this article, we shall endeavour to establish the absolute and relative chronology of our Lord's life.

The Character of Jesus Christ

Here we consider the character of Jesus as manifested first in His relation to men, then in His relation to God.

The Mystery of the Incarnation

The Incarnation is the mystery and dogma of the Word made Flesh.

The Resurrection of Jesus Christ

Resurrection is the rising again from the dead, the resumption of life. In this article, we shall treat of the Resurrection of Jesus Christ, including its characteristics and importance.

Devotion to the Sacred Heart of Jesus

Devotion to the Sacred Heart is but a special form of devotion to Jesus.

Christology Christology is that part of theology which deals with Our Lord Jesus Christ. In its full extent it comprises the doctrines concerning both the person of Christ and His works; but in the present article we shall limit ourselves to a consideration of the person of Christ.

The Name of Jesus Christ

Origin of the Name of Jesus Christ

In this article, we shall consider the two words which compose the Sacred Name.

JESUS

The word *Jesus* is the Latin form of the Greek *Iesous*, which in turn is the transliteration of the Hebrew *Jeshua*, or *Joshua*, or again *Jehoshua*, meaning "Jehovah is salvation." Though the name in one form or another occurs frequently in the Old Testament, it was not borne by a person of prominence between the time of Josue, the son of Nun and Josue, the high priest in the days of Zorobabel. It was also the name of the author of Ecclesiasticus of one of Christ's ancestors mentioned in the genealogy, found in the Third Gospel ([Luke 3:29](#)), and one of the St. Paul's companions ([Colossians 4:11](#)).

During the Hellenizing period, Jason, a purely Greek analogon of Jesus, appears to have been adopted by many (I Machabees 8:17; 12:16; 14:22; II Machabees 1:7; 2:24; 4:7-26; 5:5-10; [Acts 17:5-9](#); [Romans 16:21](#)). The Greek name is connected with verb *iasthai*, to heal; it is therefore, not surprising that some of the Greek Fathers allied the word *Jesus* with same root (Eusebius, "Dem. Ev.", IV; cf. [Acts 9:34](#); 10:38). Though about the time of Christ the name *Jesus* appears to have been fairly common (Josephus, "Ant.", XV, ix, 2; XVII, xiii, 1; XX, ix, 1; "Bel. Jud.", III, ix, 7; IV, iii, 9; VI, v, 5; "Vit.", 22) it was imposed on our Lord by God's express order ([Luke 1:31](#); [Matthew 1:21](#)), to foreshow that the Child was destined to "save his people from their sins." Philo ("De Mutt. Nom.", 21) is therefore, right when he explains *Iesous* as meaning *soteria kyrion*; Eusebius (Dem., Ev., IV, ad fin.; P.G., XXII, 333) gives the meaning *Theou soterion*; while St. Cyril of Jerusalem interprets the word as equivalent to *soter* (Cat., x, 13; P.G., XXXIII, 677). This last writer, however, appears to agree with Clement of Alexandria in considering the word *Iesous* as of Greek origin (Paedag., III, xii; P.G., VIII, 677); St. Chrysostom emphasizes again the Hebrew derivation of the word and its meaning *soter* (Hom., ii, 2), thus agreeing with the exegesis of the angel speaking to St. Joseph ([Matthew 1:21](#)).

CHRIST

The word *Christ*, *Christos*, the Greek equivalent of the Hebrew word *Messias*, means "anointed." According to the Old Law, priests ([Exodus 29:29](#); [Leviticus 4:3](#)), kings ([I Kings 10:1](#); 24:7), and prophets (Isaias 61:1) were supposed to be anointed for their respective offices; now, the Christ, or the Messias, combined this threefold dignity in His Person. It is not surprising, therefore, that for centuries the Jews had referred to their expected Deliverer as "the Anointed"; perhaps this designation alludes to Isaias 61:1, and [Daniel 9:24-26](#), or even to [Psalms 2:2](#); 19:7; 44:8. Thus the term *Christ* or *Messias* was a title rather than a proper name: "Non proprium nomen est, sed nuncupatio potestatis et regni", says Lactantius (Inst. Div., IV, vii). The Evangelists recognize the same truth; excepting [Matthew 1:1, 18](#); [Mark 1:1](#); [John 1:17](#); 17:3; 9:22; [Mark 9:40](#); [Luke 2:11](#); 22:2, the word *Christ* is always preceded by the article. Only after the Resurrection did the title gradually pass into a proper name, and the expression *Jesus Christ* or *Christ Jesus* became only one designation. But at this stage the Greeks and Romans understood little or nothing about the import of the word *anointed*; to them it did not convey any sacred conception. Hence they substituted *Chrestus*, or "excellent", for Christians or "anointed", and *Chrestians* instead of "Christians." There may be an allusion to this practice in [I Peter 2:3](#); *hoti chrestos ho kyrios*, which is rendered "that the Lord is sweet." Justin Martyr (Apol., I, 4), Clement of Alexandria (Strom., II, iv, 18), Tertullian (Adv. Gentes, II), and Lactantius (Int. Div., IV, vii, 5), as well as St. Jerome (In Gal., V, 22), are acquainted with the pagan substitution of Chrestes for Christus,

and are careful to explain the new term in a favourable sense. The pagans made little or no effort to learn anything accurate about Christ and the Christians; Suetonius, for instance, ascribes the expulsion of the Jews from Rome under Claudius to the constant instigation of sedition by Chrestus, whom he conceives as acting in Rome the part of a leader of insurgents.

The use of the definite article before the word *Christ* and its gradual development into a proper name show the Christians identified the bearer with the promised Messiah of the Jews. He combined in His person the offices of prophet ([John 6:14](#); [Matthew 13:57](#); [Luke 13:33](#); 24:19) of king ([Luke 23:2](#); [Acts 17:7](#); [I Corinthians 15:24](#); [Apocalypse 15:3](#)), and of priest (Hebrew 2:17; etc.); he fulfilled all the Messianic predictions in a fuller and a higher sense than had been given them by the teachers of the Synagogue.

A. J. MAAS

Early Historical Documents On Jesus Christ

Early Historical Documents on Jesus Christ

The historical documents referring to Christ's life and work may be divided into three classes: pagan sources, Jewish sources, and Christian sources. We shall study the three in succession.

I. PAGAN SOURCES

The non-Christian sources for the historical truth of the Gospels are both few and polluted by hatred and prejudice. A number of reasons have been advanced for this condition of the pagan sources:

- The field of the Gospel history was remote Galilee;
- the Jews were noted as a superstitious race, if we believe Horace (*Credat Judaeus Apella*, I, Sat., v, 100);
- the God of the Jews was unknown and unintelligible to most pagans of that period;
- the Jews in whose midst Christianity had taken its origin were dispersed among, and hated by, all the pagan nations;
- the Christian religion itself was often confounded with one of the many sects that had sprung up in Judaism, and which could not excite the interest of the pagan spectator.

It is at least certain that neither Jews nor Gentiles suspected in the least the paramount importance of the religion, the rise of which they witnessed among them. These considerations will account for the rarity and the asperity with which Christian events are mentioned by pagan authors. But though Gentile writers do not give us any information about Christ and the early stages of Christianity which we do not possess in the Gospels, and though their statements are made with unconcealed hatred and contempt, still they unwittingly prove the historical value of the facts related by the Evangelists.

We need not delay over a writing entitled the "Acts of Pilate", which must have existed in the second century (Justin, "Apol"., I, 35), and must have been used in the pagan schools to warn boys against the belief of Christians (Euseb., "Hist. Eccl.", I, ix; IX, v); nor need we inquire into the question whether there existed any authentic census tables of Quirinius.

A. Tacitus

We possess at least the testimony of Tacitus (A.D. 54-119) for the statements that the Founder of the Christian religion, a deadly superstition in the eyes of the Romans, had been put to death by the procurator Pontius Pilate under the reign of Tiberius; that His religion, though suppressed for a time, broke forth again not only throughout Judea where it had originated, but even in Rome, the conflux of all the streams of wickness and shamelessness; furthermore, that Nero had diverted from himself the suspicion of the burning of Rome by charging the Christians with the crime; that these latter were not guilty of arson, though they deserved their fate on account of their universal misanthropy. Tacitus, moreover, describes some of the horrible torments to which Nero subjected the Christians (Ann., XV, xlv). The Roman writer confounds the Christians with the Jews, considering them as a especially abject Jewish sect; how little he investigated the historical truth of even the Jewish records may be inferred from the credulity with which he accepted the absurd legends and calumnies about the origin of the Hebrew people (Hist., V, iii, iv).

B. Suetonius

Another Roman writer who shows his acquaintance with Christ and the Christians is Suetonius (A.D. 75-160). It has been noted that Suetonius considered Christ (Chrestus) as a Roman insurgent who stirred up seditions under the reign of Claudius (A.D. 41-54): "Judaeos, impulsore Chresto, assidue tumultuantes (Claudius) Roma expulit" (Clau., xxv). In his life of Nero he regards that emperor as a public benefactor on account of his severe treatment of the Christians: "Multa sub eo et animadversa severe, et coercita, nec minus instituta . . . afflicti Christiani, genus hominum superstitious novae et maleficae" (Nero, xvi). The Roman writer does not understand that the Jewish troubles arose from the Jewish antagonism to the Messianic character of Jesus Christ and to the rights of the Christian Church.

C. Pliny the Younger

Of greater importance is the letter of Pliny the Younger to the Emperor Trajan (about A.D. 61-115), in which the Governor of Bithynia consults his imperial majesty as to how to deal with the Christians living within his jurisdiction. On the one hand, their lives were confessedly innocent; no crime could be proved against them excepting their Christian belief, which appeared to the Roman as an extravagant and perverse superstition. On the other hand, the Christians could not be shaken in their allegiance to Christ, Whom they celebrated as their God in their early morning meetings (Ep., X, 97, 98). Christianity here appears no longer as a religion of criminals, as it does in the texts of Tacitus and Suetonius; Pliny acknowledges the high moral principles of the Christians, admires their constancy in the Faith (*pervicacia et inflexibilis obstinatio*), which he appears to trace back to their worship of Christ (*carmenque Christo, quasi Deo, dicere*).

D. Other pagan writers

The remaining pagan witnesses are of less importance: In the second century Lucian sneered at Christ and the Christians, as he scoffed at the pagan gods. He alludes to Christ's death on the Cross, to His miracles, to the mutual love prevailing among the Christians ("Philopseudes", nn. 13, 16; "De Morte Peregr"). There are also alleged allusions to Christ in Numenius (Origen, "Contra Cels", IV, 51), to His parables in Galerius, to the earthquake at the Crucifixion in Phlegon (Origen, "Contra Cels.", II, 14). Before the end of the second century, the *logos alethes* of Celsus, as quoted by Origen (Contra Cels., *passim*), testifies that at that time the facts related in the Gospels were generally accepted as historically true. However scanty the pagan sources of the life of Christ may be, they bear at least testimony to His existence, to His miracles, His parables, His claim to Divine worship, His death on the Cross, and to the more striking characteristics of His religion.

II. JEWISH SOURCES

A. Philo

Philo, who dies after A.D. 40, is mainly important for the light he throws on certain modes of thought and phraseology found again in some of the Apostles. Eusebius (Hist. Eccl., II, iv) indeed preserves a legend that Philo had met St. Peter in Rome during his mission to the Emperor Caius; moreover, that in his work on the contemplative life he describes the life of the Christian Church in Alexandria founded by St. Mark, rather than that of the Essenes and Therapeutae. But it is hardly probable that Philo had heard enough of Christ and His followers to give an historical foundation to the foregoing legends.

B. Josephus

The earliest non-Christian writer who refers Christ is the Jewish historian Flavius Josephus; born A.D. 37, he was a contemporary of the Apostles, and died in Rome A.D. 94. Two passages in his "Antiquities" which confirm two facts of the inspired Christian records are not disputed. In the one he reports the murder of "John called Baptist" by Herod (Ant., XVIII, v, 2), describing also John's character and work; in the other (Ant., XX, ix, 1) he disapproves of the sentence pronounced by the high priest Ananus against "James, brother of Jesus Who was called Christ." It is antecedently probable that a writer so well informed as Josephus, must have been well acquainted too with the doctrine and the history of Jesus Christ. Seeing, also, that he records events of minor importance in the history of the Jews, it would be surprising if he were to keep silence about Jesus Christ. Consideration for the priests and Pharisees did not prevent him from mentioning the judicial murders of John the Baptist and the Apostle James; his endeavour to find the fulfilment of the Messianic prophecies in Vespasian did not induce him to pass in silence over several Jewish sects, though their tenets appear to be inconsistent with the Vespasian claims. One naturally expects, therefore, a notice about Jesus Christ in Josephus. *Antiquities* XVIII, iii, 3, seems to satisfy this expectation:

About this time appeared Jesus, a wise man (if indeed it is right to call Him man; for He was a worker of astonishing deeds, a teacher of such men as receive the truth with joy), and He drew to Himself many Jews (many also of Greeks. This was the Christ.) And when Pilate, at the denunciation of those that are foremost among us, had condemned Him to the cross, those who had first loved Him did not abandon Him (for He appeared to them alive again on the third day, the holy prophets having foretold this and countless other marvels about Him.) The tribe of Christians named after Him did not cease to this day.

A testimony so important as the foregoing could not escape the work of the critics. Their conclusions may be reduced to three headings: those who consider the passage wholly spurious; those who consider it to be wholly authentic; and those who consider it to be a little of each.

Those who regard the passage as spurious

First, there are those who consider the whole passage as spurious. The principal reasons for this view appear to be the following:

- Josephus could not represent Jesus Christ as a simple moralist, and on the other hand he could not emphasize the Messianic prophecies and expectations without offending the Roman susceptibilities;

- the above cited passage from Josephus is said to be unknown to Origen and the earlier patristic writers;
- its very place in the Josephan text is uncertain, since Eusebius (Hist. Eccl., II, vi) must have found it before the notices concerning Pilate, while it now stands after them.

But the spuriousness of the disputed Josephan passage does not imply the historian's ignorance of the facts connected with Jesus Christ. Josephus's report of his own juvenile precocity before the Jewish teachers (Vit., 2) reminds one of the story of Christ's stay in the Temple at the age of twelve; the description of his shipwreck on his journey to Rome (Vit., 3) recalls St. Paul's shipwreck as told in the Acts; finally his arbitrary introduction of a deceit practised by the priests of Isis on a Roman lady, after the chapter containing his supposed allusion to Jesus, shows a disposition to explain away the virgin birth of Jesus and to prepare the falsehoods embodied in the later Jewish writings.

Those who regard the passage as authentic, with some spurious additions

A second class of critics do not regard the whole of Josephus's testimony concerning Christ as spurious but they maintain the interpolation of parts included above in parenthesis. The reasons assigned for this opinion may be reduced to the following two:

- Josephus must have mentioned Jesus, but he cannot have recognized Him as the Christ; hence part of our present Josephan text must be genuine, part must be interpolated.
- Again, the same conclusion follows from the fact that Origen knew a Josephan text about Jesus, but was not acquainted with our present reading; for, according to the great Alexandrian doctor, Josephus did not believe that Jesus was the Messiah ("In Matth.", xiii, 55; "Contra Cels.", I, 47).

Whatever force these two arguments have is lost by the fact that Josephus did not write for the Jews but for the Romans; consequently, when he says, "This was the Christ", he does not necessarily imply that Jesus was the Christ considered by the Romans as the founder of the Christian religion.

Those who consider it to be completely genuine

The third class of scholars believe that the whole passage concerning Jesus, as it is found today in Josephus, is genuine. The main arguments for the genuineness of the Josephan passage are the following:

- First, all codices or manuscripts of Josephus's work contain the text in question; to maintain the spuriousness of the text, we must suppose that all the copies of Josephus were in the hands of Christians, and were changed in the same way.
- Second, it is true that neither Tertullian nor St. Justin makes use of Josephus's passage concerning Jesus; but this silence is probably due to the contempt with which the contemporary Jews regarded Josephus, and to the relatively little authority he had among the Roman readers. Writers of the age of Tertullian and Justin could appeal to living witnesses of the Apostolic tradition.
- Third, Eusebius ("Hist. Eccl.", I, xi; cf. "Dem. Ev.", III, v) Sozomen (Hist. Eccl., I, i), Niceph. (Hist. Eccl., I, 39), Isidore of Pelusium (Ep. IV, 225), St. Jerome (catal. script. eccles. xiii), Ambrose, Cassiodorus, etc., appeal to the testimony of Josephus; there must have been no doubt as to its authenticity at the time of these illustrious writers.
- Fourth, the complete silence of Josephus as to Jesus would have been a more eloquent testimony than we possess in his present text; this latter contains no statement incompatible with its Josephan authorship: the Roman reader needed the information that Jesus was the Christ, or the founder of the Christian religion; the wonderful works of Jesus and His Resurrection from the dead were so incessantly urged by the Christians that without these attributes the Josephan Jesus would hardly have been acknowledged as the founder of Christianity.

All this does not necessarily imply that Josephus regarded Jesus as the Jewish Messiah; but, even if he had been convinced of His Messiahship, it does not follow that he would have become a Christian. A number of possible subterfuges might have supplied the Jewish historian with apparently sufficient reasons for not embracing Christianity.

C. Other Jewish Sources

The historical character of Jesus Christ is also attested by the hostile Jewish literature of the subsequent centuries. His birth is ascribed to an illicit ("Acta Pilati" in Thilo, "Codex apocryph. N.T.", I, 526; cf. Justin, "Apol.", I, 35), or even an adulterous, union of His parents (Origen, "Contra Cels.," I, 28, 32). The father's name is Panthera, a common soldier (Gemara "Sanhedrin", viii; "Schabbath", xii, cf. Eisenmenger, "Entdecktes Judenthum", I, 109; Schottgen, "Horae Hebraicae", II, 696; Buxtorf, "Lex. Chald.", Basle, 1639, 1459, Huldreich, "Sepher toledhoth yeshua hannaceri", Leyden, 1705). The last work in its final edition did not appear before the thirteenth century,

so that it could give the Panthera myth in its most advanced form. Rosch is of opinion that the myth did not begin before the end of the first century.

The later Jewish writings show traces of acquaintance with the murder of the Holy Innocents (Wagenseil, "Confut. Libr.Toldoth", 15; Eisenmenger op. cit., I, 116; Schottgen, op. cit., II, 667), with the flight into Egypt (cf. Josephus, "Ant." XIII, xiii), with the stay of Jesus in the Temple at the age of twelve (Schottgen, op. cit., II, 696), with the call of the disciples ("Sanhedrin", 43a; Wagenseil, op. cit., 17; Schottgen, loc. cit., 713), with His miracles (Origen, "Contra Cels", II, 48; Wagenseil, op. cit., 150; Gemara "Sanhedrin" fol. 17); "Schabbath", fol. 104b; Wagenseil, op.cit., 6, 7, 17), with His claim to be God (Origen, "Contra Cels.", I, 28; cf. Eisenmenger, op. cit., I, 152; Schottgen, loc. cit., 699) with His betrayal by Judas and His death (Origen, "Contra cels.", II, 9, 45, 68, 70; Buxtorf, op. cit., 1458; Lightfoot, "Hor. Heb.", 458, 490, 498; Eisenmenger, loc. cit., 185; Schottgen, loc. cit., 699 700; cf. "Sanhedrin", vi, vii). Celsus (Origen, "Contra Cels.", II, 55) tries to throw doubt on the Resurrection, while Toldoth (cf. Wagenseil, 19) repeats the Jewish fiction that the body of Jesus had been stolen from the sepulchre.

III. CHRISTIAN SOURCES

Among the Christian sources of the life of Jesus we need hardly mention the so called Agrapha and Apocrypha. For whether the Agrapha contain Logia of Jesus, or refer to incidents in His life, they are either highly uncertain or present only variations of the Gospel story. The chief value of the Apocrypha consists in their showing the infinite superiority of the Inspired Writings by contrasting the coarse and erroneous productions of the human mind with the simple and sublime truths written under the inspiration of the Holy Ghost.

Among the Sacred Books of the New Testament, it is especially the four Gospels and the four great Epistles of St. Paul that are of the highest importance for the construction of the life of Jesus.

The four great Pauline Epistles (Romans, Galatians, and First and Second Corinthians) can hardly be overestimated by the student of Christ's life; they have at times been called the "fifth gospel"; their authenticity has never been assailed by serious critics; their testimony is also earlier than that of the Gospels, at least most of the Gospels; it is the more valuable because it is incidental and undesigned; it is the testimony of a highly intellectual and cultured writer, who had been the greatest enemy of Jesus, who writes within twenty-five years of the events which he relates. At the same time, these four great Epistles bear witness to all the most important facts in the life of Christ: His Davidic descent, His poverty, His Messiahship, His moral teaching, His preaching of the kingdom of God, His calling of the apostles, His miraculous power, His claims to be God, His betrayal, His institution of the Holy Eucharist, His passion, crucifixion,

burial, resurrection, His repeated appearances ([Romans 1:3-4](#); 5:11; 8:2-3; 8:32; 9:5; 15:8; [Galatians 2:17](#); 3:13; 4:4; 5:21; First Corinthians 6:9; 13:4; etc.). However important the four great Epistles may be, the gospels are still more so. Not that any one of them offers a complete biography of Jesus, but they account for the origin of Christianity by the life of its Founder. Questions like the authenticity of the Gospels, the relation between the Synoptic Gospels, and the Fourth, the Synoptic problem, must be studied in the articles referring to these respective subjects.

A.J. MAAS

Chronology of the Life of Jesus Christ

Chronology of the Life of Jesus Christ

In the following paragraphs we shall endeavour to establish the absolute and relative chronology of our Lord's life, i.e. we shall show first how certain facts connected with the history of Jesus Christ fit in with the course of universal history, and secondly how the rest of the life of Jesus must be arranged according to the inter-relation of its single elements.

I. ABSOLUTE CHRONOLOGY

The incidents whose absolute chronology may be determined with more or less probability are the year of Christ's nativity, of the beginning of His public life, and of His death. As we cannot fully examine the data entering into these several problems, the reader ought to compare what has been said on these points in the article Biblical Chronology.

A. The Nativity

St. Matthew (2:1) tells us that Jesus was born "in the days of King Herod". Josephus (*Ant.*, XVII, viii, 1) informs us that Herod died after ruling thirty four years *de facto*, thirty seven years *de jure*. Now Herod was made rightful king of Judea a.d. 714, while he began his actual rule after taking Jerusalem a.d. 717. As the Jews reckoned their years from Nisan to Nisan, and counted fractional parts as an entire year, the above data will place the death of Herod in a.d. 749, 750, 751. Again, Josephus tells us from that an eclipse of the moon occurred not long before Herod's death; such an eclipse occurred from 12 to 13 March, a.d. 750, so that Herod must have died before the Passover of that year which fell on 12 April (Josephus, "*Ant.*", iv, 4; viii, 4). As Herod killed the children up to two years old, in order to destroy the new born King of the Jews, we are led to believe that Jesus may have been born a.d. 747, 748, 749. The enrollment under Cyrenus mentioned by St. Luke in connection with the nativity of Jesus Christ,

and the remarkable astronomical conjunction of Mars, Jupiter, and Saturn in Pisces, in the spring of a.d. 748, will not lead us to any more definite result.

B. Beginning of the Public Ministry

The date of the beginning of Christ's ministry may be calculated from three different data found respectively in [Luke 3:23](#); Josephus, "Bel. Jud." I, xxi, 1; or "Ant.", XV, ii, 1; and [Luke 3:1](#).

The first of these passages reads: "And Jesus himself was beginning about the age of thirty years". The phrase "was beginning" does not qualify the following expression "about the age of thirty years", but rather indicates the commencement of the public life. As we have found that the birth of Jesus falls within the period 747-749 a.d., His public life must begin about 777-779 a.d.

Second, when, shortly before the first Pasch of His public life, Jesus had cast the buyers and sellers out of the Temple, the Jews said: "Six and forty years was this temple in building" ([John 2:20](#)). Now, according to the testimony of Josephus (loc. cit.), the building of the Temple began in the fifteenth year of Herod's actual reign or in the eighteenth of his reign *de jure*, i.e. 732 a.d.; hence, adding the forty six years of actual building, the Pasch of Christ's first year of public life must have fallen in 778 a.d.

Third, the Gospel of St. Luke (3:1) assigns the beginning of St. John the Baptist's mission to the "fifteenth year of the Tiberius Caesar". Augustus, the predecessor of Tiberius, died 19 August, 767 a.d., so that the fifteenth year of Tiberius's independent reign is 782 a.d.; but then Tiberius began to be associate of Augustus in a.d. 764, so that the fifteenth year reckoned from this date falls in a.d. 778. Jesus Christ's public life began a few months later, i.e. about a.d. 779.

C. The Year of the Death of Christ

According to the Evangelists, Jesus suffered under the high priest Caiphas (a.d. 772-90, or A.D. 18-36), during the governorship of Pontius Pilate a.d. 780-90). But this leaves the time rather indefinite. Tradition, the patristic testimonies for which have been collected by Patrizi (*De Evangeliiis*), places the death of Jesus in the fifteenth (or sixteenth) year of Tiberius, in the consulship of the Gemini, forty-two years before the destruction of Jerusalem, and twelve years before the preaching of the Gospel to the Gentiles. We have already seen that the fifteenth year of Tiberius is either 778 or 782, according to its computation from the beginning of Tiberius's associate or sole reign; the consulship of the Gemini (Fufius and Rubellius) fell in a.d. 782; the forty second year before the destruction of Jerusalem is A.D. 29, or a.d. 782, twelve years before the preaching of the Gospel to the Gentiles brings us to the same year, A.D. 29 or a.d. 782, since the conversion of Cornelius, which marks the opening of the Gentile missions, fell probably in A.D. 40 or 41.

D. The Day of the Death of Christ

Jesus died on Friday, the fifteenth day of Nisan. That He died on Friday is clearly stated by Mark (xv, 42), Luke (xxiii, 54), and John (xix, 31). The few writers who assign another day for Christ's death are practically lost in the multitude of authorities who place it on Friday. What is more, they do not even agree among themselves: Epiphanius, e.g., places the Crucifixion on Tuesday; Lactantius, on Saturday; Westcott, on Thursday; Cassiodorus and Gregory of Tours, not on Friday. The first three Evangelists are equally clear about the date of the Crucifixion. They place the Last Supper on the fourteenth day of Nisan, as may be seen from Matt., xxvi, 17, 20; Mark, xiv, 12 17; Luke, xxii, 7 14. Nor can there be any doubt about St. John's agreement with the Synoptic Evangelists on the question of the Last Supper and the Crucifixion. The supper was held "before the festival day of the Pasch" (John, xiii, 1), i. e. on 14 Nisan, as may be seen from Matt., xxii, 7-14. Nor can there be any doubt about St. John's agreement with the Synoptic Evangelists on the question of the Last Supper and the Crucifixion. The Supper was held "before the festival day of the pasch" (John, xiii, 1), i.e. on 14 Nisan, since the sacrificial day was computed according to the Roman method (Jovino, 123 sqq., 139 sqq.). Again, some disciples thought that Judas left the supper table because Jesus had said to him: "Buy those things which we have need of for the festival day: or that he should give something to the poor" (John, xiii, 29). If the Supper had been held on 13 Nisan this belief of the disciples can hardly be understood, since Judas might have made his purchases and distributed his alms on 14 Nisan; there would have been no need for his rushing into the city in the middle of the night. On the day of Christ's Crucifixion the Jews "went not into the hall, that they might not be defiled, but that they might eat the pasch" (John, xviii, 28). The pasch which the Jews wished to eat could not have been the paschal lamb, which was eaten on 14 Nisan, for the pollution contracted by entering the hall would have ceased at sundown, so that it would not have prevented them from sharing in the paschal supper. The pasch which the Jews had in view must have been the sacrificial offerings (*Chagighah*), which were called also *pasch* and were eaten on 15 Nisan. Hence this passage places the death of Jesus Christ on the fifteenth day of Nisan. Again, Jesus is said to have suffered and died on the "parasceve of the pasch", or simply on the "parasceve" (John, xix, 14, 31); as "parasceve" meant Friday, the expression "parasceve" denotes Friday on which the pasch happened to fall, not the before the pasch. Finally, the day following the parasceve on which Jesus died is called "a great sabbath day" (John, xix, 31), either to denote its occurrence in the paschal week or to distinguish it from the preceding pasch, or day of minor rest.

II. RELATIVE CHRONOLOGY

No student of the life of Jesus will question the chronological order of its principal divisions: infancy, hidden life, public life, passion, glory. But the order of events in the single divisions is not always clear beyond dispute.

A. The Infancy of Jesus

The history of the infancy, for instance, is recorded only in the First Gospel and in the Third. Each Evangelist contents himself with five pictures:

- St. Matthew describes the birth of Jesus, the adoration of the Magi, the flight into Egypt, the slaughter of the Holy Innocents, and the return to Nazareth.
- St. Luke gives a sketch of the birth, of the adoration of the shepherds, of the circumcision, of the purification of the Virgin, and of the return to Nazareth.

The two Evangelists agree in the first and the last of these two series of incidents (moreover, all scholars place the birth, adoration of the shepherds, and the circumcision before the Magi), but how are we to arrange the intervening three events related by St. Matthew with the order of St. Luke? We indicate a few of the many ways in which the chronological sequence of these facts has been arranged.

1. *The birth, the adoration of the shepherds, the circumcision, the adoration of the Magi, the flight into Egypt, the slaughter of the Innocents, the purification, the return to Nazareth.* This order implies that either the purification was delayed beyond the fortieth day, which seems to contradict Luke, ii, 22 sqq., or that Jesus was born shortly before Herod's death, so that the Holy Family could return from Egypt within forty days after the birth of Jesus. Tradition does not seem to favour this speedy return.

2. *The birth, the adoration of the shepherds, the circumcision, the adoration of the Magi, the purification, the flight into Egypt, the slaughter of the Innocents, the return to Nazareth.* According to this order the Magi either arrived a few days before the purification or they came on 6 January; but in neither case can we understand why the Holy Family should have offered the sacrifice of the poor, after receiving the offerings of the Magi. Moreover, the first Evangelist intimates that the angel appeared to St. Joseph soon after the departure of the Magi, and it is not at all probable that Herod should have waited long before inquiring concerning the whereabouts of the new born king. The difficulties are not overcome by placing the adoration of the Magi on the day before the purification; it would be more unlikely in that case that the Holy Family should offer the sacrifice of the poor.

3. As [Luke 2:39](#) appears to exclude the possibility of placing the adoration of the Magi between the presentation and return to Nazareth, there are interpreters who have located the advent of the wise men, the flight to Egypt, the slaughter of the Inno-

cents, and the return from Egypt after the events as told in St. Luke. They agree in the opinion that the Holy Family returned to Nazareth after the purification, and then left Nazareth in order to make their home in Bethlehem. Eusebius, Epiphanius, and some other ancient writers are willing to place the adoration of the Magi about two years after Christ's birth; Paperbroch and his followers allow about a year and thirteen days between the birth and the advent of the Magi; while Patrizi agrees with those who fix the advent of the Magi at about two weeks after the purification. The text of Matt., ii, 1, 2, hardly permits an interval of more than a year between the purification and the coming of the wise men; Patrizi's opinion appears to satisfy all the data furnished by the gospels, while it does not contradict the particulars added by tradition.

B. The Hidden Life of Jesus

It was in the seclusion of Nazareth that Jesus spent the greatest part of His earthly life. The inspired records are very reticent about this period: Luke, 2:40-52; [Mark 6:3](#); [John 6:42](#); 7:15, are about the only passages which refer to the hidden life. Some of them give us a general view of Christ's life: "The child grew, and grew in strength and wisdom; and the grace of God was in him" is the brief summary of the years following the return of the Holy Family after the ceremonial purification in the Temple. "Jesus advanced in wisdom, and age, and grace with God and men", and He "was subject to them" form the inspired outline of Christ's life in Nazareth after He had attained the age of twelve. "When he was twelve years old" Jesus accompanied His parents to Jerusalem, 'according to the custom of the feast'; When they returned, the child Jesus remained in Jerusalem; and his parents knew it not." After three days, they found him in the Temple, sitting in the midst of the doctors, hearing them, and asking them questions." It was on this occasion that Jesus spoke the only words that have come down from the period of His hidden life: "How is it that you sought me? Did you not know, that I must be about my Father's business [or, "in my father's house"]?" The Jews tell us that Jesus had not passed through the training of the Rabbinic schools: "How doth this man know letters, having never learned?". The same question is asked by the people of Nazareth, who add, "Is not this the carpenter?" St. Justin is authority for the statement that Jesus specially made "ploughs and yokes" (*Contra Tryph.*, 88). Though it is not certain that at the time of Jesus elementary schools existed in the Jewish villages, it may be inferred from the Gospels that Jesus knew how to read ([Luke 4:16](#)) and write ([John 8:6](#)). At an early age He must have learned the so called *Shema* ([Deut. 6:4](#)), and the *Hallel*, or [Psalms 113-118](#) (Hebr.); He must have been familiar with the other parts of the Scriptures too, especially the Psalms and the Prophetic Books, as He constantly refers to them in His public life. It is also asserted that Palestine at the time of Jesus Christ was practically bilingual, so that Christ must have spoken Aramaic and Greek; the indications that He was acquainted with Hebrew and Latin are rather slight.

The public teaching of Jesus shows that He was a close observer of the sights and sounds of nature, and of the habits of all classes of men. For these are the usual sources of His illustrations. To conclude the hidden life of Jesus extending through thirty years is far different from what one should have expected in the case of a Person Who is adored by His followers as their God and revered as their Saviour; this is an indirect proof for the credibility of the Gospel story.

C. The Public Life of Jesus: Its Duration

The chronology of the public life offers a number of problems to the interpreter; we shall touch upon only two, the duration of the public life, and the successive journeys it contains.

There are two extreme views as to the length of the ministry of Jesus: St. Irenaeus (*Contra Haer.*, II, xxii, 3-6) appears to suggest a period of fifteen years; the prophetic phrases, "the year of recompenses", "the year of my redemption" (Is., xxxiv, 8; lxiii, 4), appear to have induced Clement of Alexandria, Julius Africanus, Philastrius, Hilarion, and two or three other patristic writers to allow only one year for the public life. This latter opinion has found advocates among certain recent students: von Soden, for instance, defends it in Cheyne's "Encyclopaedia Biblica". But the text of the Gospels demands a more extensive duration. St. John's Gospel distinctly mentions three distinct paschs in the history of Christ's ministry (ii, 13; vi, 4; xi, 55). The first of the three occurs shortly after the baptism of Jesus, the last coincides with His Passion, so that at least two years must have intervened between the two events to give us the necessary room for the passover mentioned in vi, 4. Westcott and Hort omit the expression "the pasch" in vi, 4 to compress the ministry of Jesus within the space of one year; but all the manuscripts, the versions, and nearly all the Fathers testify for the reading "*En de eggysto pascha heeorteton Ioudaion*": "Now the pasch, the festival day of the Jews, was near at hand". Thus far then everything tends to favour the view of those writers and more recent commentators who extend the period of Christ's ministry a little over two years.

But a comparison of St. John's Gospel with the Synoptic Evangelists seems to introduce another pasch, indicated in the Fourth Gospel, into Christ's public life. John, iv, 45, relates the return of Jesus into Galilee after the first pasch of His public life in Jerusalem, and the same event is told by Mark, i, 14, and Luke iv, 14. Again the pasch mentioned in John, vi, 4 has its parallel in the "green grass" of Mark, vi, 39, and in the multiplication of loaves as told in Luke, ix, 12 sqq. But the plucking of ears mentioned in Mark, ii, 23, and Luke, vi, 1, implies another paschal season intervening between those expressly mentioned in John, ii, 13, and vi, 4. This shows that the public life of Jesus must have extended over four paschs, so that it must have lasted three years and a few months. Though the Fourth Gospel does not indicate this fourth pasch as clearly as the other three, it is not wholly silent on the question. The "festival day of the Jews"

mentioned in John, v, 1, has been identified with the Feast of Pentecost, the Feast of Tabernacles, the Feast of Expiation, the Feast of the New Moon, the Feast of Purim, the Feast of Dedication, by various commentators; others openly confess that they cannot determine to which of the Jewish feasts this festival day refers. Nearly all difficulties will disappear if the festival day be regarded as the pasch, as both the text (*heorte*) and John, iv, 35 seem to demand (cf. Dublin Review, XXIII, 351 sqq.).

D. The Public Life of Jesus: His Journeys

The journeys made during His public life may be grouped under nine heads: the first six were mainly performed in Galilee and had Capharnaum for their central point; the last three bring Jesus into Judea without any pronounced central point. We cannot enter into the disputed questions connected with the single incidents of the various groups.

1. *First Journey.*

December, a.d. 778 - Spring, 779. (Cf. John, i, ii; Matthew, iii, iv; Mark, i; Luke, iii, iv.) Jesus abandons His hidden life in Nazareth, and goes to Bethania across the Jordan, where He is baptized by John and receives the Baptist's first testimony to His Divine mission. He then withdraws into the desert of Judea, where He fasts for forty days and is tempted by the devil. After this He dwells in the neighbourhood of the Baptist's ministry, and receives the latter's second and third testimony; here too He wins His first disciples, with whom He journeys to the wedding feast at Cana in Galilee, where He performs His first miracle. Finally He transfers His residence, so far as there can be question of a residence in His public life, to Capharnaum, one of the principal thoroughfares of commerce and travel in Galilee.

2. *Second Journey.*

Passover, a.d. 779 - about Pentecost, 780. (Cf. John, ii-v; Mark, i-iii; Luke, iv-vii; Matt., iv-ix.)

Jesus goes from Capharnaum to Jerusalem for the Feast of the Passover; here he expels the buyers and sellers from the Temple, and is questioned by the Jewish authorities. Many believed in Jesus, and Nicodemus came to converse with Him during the night. After the festival days He remained in Judea till about the following December, during which period He received the fourth testimony from John who was baptizing at Ennon (A.V. Aenon). When the Baptist had been imprisoned in Machaerus, Jesus returned to Galilee by way of Samaria where He met the Samaritan woman at Jacob's well near Sichar; He delayed two days in this place, and many believed in Him. Soon after His return into Galilee we find Jesus again in Cana, where He heard the prayer who pleaded for the recovery of his dying son in Capharnaum. The rejection of Jesus by the people of Nazareth, whether at this time as, St. Luke intimates, or at a later period, as St. Mark seems to demand, or again both now and about eight months later, is an exegetical

problem we cannot solve here. At any rate, shortly afterwards Jesus is mostly actively engaged in Capharnaum in teaching and healing the sick, restoring among others Peter's mother-in-law and a demoniac. On this occasion He called Peter and Andrew, James and John. Then followed a missionary tour through Galilee during which Jesus cured a leper; soon he again taught in Capharnaum, and was surrounded by such a multitude that a man sick of the palsy had to be let down through the roof in order to reach the Sacred Presence. After calling Matthew to the Apostleship, He went to Jerusalem for the second pasch occurring during His public life, it was on this occasion that He healed the man who been sick for thirty-eight years near the pool at Jerusalem. The charge of violating the Sabbath and Christ's answer were the natural effects of the miracle. The same charge is repeated shortly after the pasch; Jesus had returned to Galilee, and the disciples plucked some ripe ears in the corn fields. The question became more acute in the immediate future; Jesus had returned to Capharnaum, and there healed on the Sabbath day a man who had a withered hand. The Pharisees now make common cause with the Herodians in order to "destroy him". Jesus withdraws first to the Sea of Galilee, where He teaches and performs numerous miracles; then retires to the Mountain of Beatitudes, where He prays during the night, chooses His Twelve Apostles in the morning, and preaches the Sermon on the Mount. He is brought back to Capharnaum by the prayers of the centurion who asks and obtains the of his servant.

3. Third Journey.

About Pentecost, a.d. 780- Autumn, 780. (Cf. Luke, vii, viii; Mark, iii, iv; Matt., iv, viii, ix, xii, xiii.)

Jesus makes another missionary tour through Galilee; He resuscitates the son of the widow at Naim, and shortly afterwards receives the messengers sent by John from his prison in Machaerus. Then follows the scene of the merciful reception of the sinful woman who anoints the feet of the Lord while He rests at table in Magdala or perhaps in Capharnaum; for the rest of His missionary tour Jesus is followed by a band of pious women who minister to the wants of the Apostles. After returning to Capharnaum, Jesus expels the mute devil, is charged by the Pharisees with casting out devils by the prince of devils, and encounters the remonstrances of His kinsmen. Withdrawing to the sea, He preaches what may be called the "Lake Sermon", consisting of seven parables.

4. Fourth Journey.

Autumn, a.d. 780- about Passover, 781. (Cf. Luke, viii, ix; Mark, iv-vi; Matt., viii, ix, x, xiii, xiv.)

After a laborious day of ministry in the city of Capharnaum and on the lake, Jesus with His Apostles crosses the waters. As a great storm overtakes them, the frightened Apostles awaken their sleeping Master, Who commands the winds and the waves. Towards morning they meet in the country of the Gerasens, on the east of the lake,

two demoniacs. Jesus expels the evil spirits, but allows them to enter into a herd of swine. The beasts destroy themselves in the waters of the lake, and frightened inhabitants beg Jesus not to remain among them. After returning to Capharnaum he heals the woman who had touched the hem of His garment, resuscitates the daughter of Jairus, and gives sight to two blind men. The second Gospel places here Christ's last visit to and rejection by the people of Nazareth. Then follows the ministry of the Apostles who are sent two by two, while Jesus Himself makes another missionary tour through Galilee. It seems to have been the martyrdom of John the Baptist that occasioned the return of the Apostles and their gathering around the Master in Capharnaum. But, however depressing this event may have been, it did not damp the enthusiasm of the Apostles over their success.

5. Fifth Journey.

Spring, a.d. 781. (Cf. John, vi; Luke, ix; Mark, vi; and Matt., xiv.)

Jesus invites the Apostles, tired out from their missionary labours, to rest awhile. They cross the northern part of the Sea of Galilee, but, instead of finding the desired solitude, they are met by multitudes of people who had preceded them by land or by boat, and who were eager for instruction. Jesus taught them throughout the day, and towards evening did not wish to dismiss them hungry. On the other hand, there were only five loaves and two fishes at the disposal of Jesus; after His blessing, these scanty supplies satisfied the hunger of five thousand men, besides women and children, and remnants filled twelve baskets of fragments. Jesus sent the Apostles back to their boats, and escaped from the enthusiastic multitudes, who wished to make Him king, into the mountain where He prayed till far into the night. Meanwhile the Apostles were facing a contrary wind till the fourth watch in the morning, when they saw Jesus walking upon the waters. The Apostles first fear, and then recognize Jesus; Peter walks upon the water as long as his confidence lasts; the storm ceases when Jesus has entered the boat. The next day brings Jesus and His Apostles to Capharnaum, where He speaks to the assembly about the Bread of Life and promises the Holy Eucharist, with the result that some of His followers leave Him, while the faith of His true disciples is strengthened.

6. Sixth Journey.

About May, a.d. 781- Sept., 781. (Cf. Lk., ix; Mk., vii-ix; Matt., xiv- xviii; John, vii.)

It may be owing to the enmity stirred up against Jesus by His Eucharistic discourse in Capharnaum that He began now a more extensive missionary tour than He had made in the preceding years of His life. Passing through the country of Genesar, He expressed His disapproval of the Pharisaic practices of legal purity. Within the borders of Tyre and Sidon He exorcized the daughter of the Syrophenician woman. From here Jesus travelled first towards the north, then towards the east, then south-eastward through

the northern part of Decapolis, probably along the foot of the Labanon, till He came to the eastern part of Galilee. While in Decapolis Jesus healed a deaf-mute, employing a ceremonial more elaborate than He had used at any of His previous miracles; in the eastern part of Galilee, probably not far from Dalmanutha and Magedan, He fed four thousand men, besides children and women, with seven loaves and a few little fishes, the remaining fragments filling seven baskets. The multitudes had listened for three days to the teaching of Jesus, previously to the miracle. In spite of the many cures performed by Jesus, during this journey, on the blind, the dumb, the lame, the maimed, and on many others, the Pharisees and Sadduces asked Him for a sign from heaven, tempting Him. He promised them the sign of Jonas the Prophet. After Jesus and the Apostles had crossed the lake, He warned them to beware of the leaven of the Pharisees; then they passed through Bethsaida Julias where Jesus gave sight to a blind man. Next we find Jesus in the confines of Caesarea Philippi, where Peter professes his faith in Christ, the Son of the living God, and in his turn receives from Jesus the promise of the power of the keys. Jesus here predicts His passion, and about a week later is transfigured before Peter, James, and John, probably on the top of Mt. Thabor. On descending from the mountain, Jesus exorcizes the mute devil whom His disciples had not been able to expel. Bending his way towards Capharnaum, Jesus predicts His Passion for the second time, and in the city pays the tribute-money for Himself and Peter. This occasions the discussion as to the greater in the kingdom of heaven, and the allied discourses. Finally, Jesus refuses His brethren's invitation to go publicly to the Feast of Tabernacles in Jerusalem.

7. Seventh Journey.

Sept., a.d. 781- December, 781. (Cf. Luke, ix-xiii; Mark, x; Matt., vi, vii, viii, x, xi, xii, xxiv; John, vii-x.)

Jesus now "steadfastly set His face to go Jerusalem", and as the Samaritans refused Him hospitality, He had to take the east of the Jordan. While still in Galilee, He refused the discipleship of several half-hearted candidates, and about the same time He sent other seventy-two, two by two, before His face into every city and place whither He Himself was to come. Probably in the lower part of Peraea, the seventy-two returned with joy, rejoicing in the miraculous power that had been exercised by them. It must have been in the vicinity of Jericho that Jesus answered the lawyer's question, "Who is my neighbour?" by the parable of the Good Samaritan. Next Jesus was received in the hospitable home of Mary and Martha, where He declares Mary to have chosen the better part. From Bethania went to Jerusalem for the Feast of Tabernacles, where he became involved in discussions with the Jews. The Scribes and Pharisees endeavoured to catch Him in the sentence which they asked Him to pronounce in the case of the woman taken in adultery. When Jesus had avoided this snare, He continued His discussions

with the hostile Jews. Their enmity was intensified because Jesus restored sight to a blind man on the Sabbath day. Jesus appears to have His stay in Jerusalem with the beautiful discourse on the Good Shepherd. A little later He teaches His Apostles the Our Father, probably somewhere on Mt. Olivet. On a subsequent missionary tour through Judea and Peraea He defends Himself against the charges of Pharisees, and reproves their hypocrisy. On the same journey Jesus warned against hypocrisy, covetousness, worldly care; He exhorted to watchfulness, patience under contradictions, and to penance. About this time, too, He healed the woman who had the spirit of infirmity

8. Eighth Journey.

December, a.d. 781-February, 782. (Cf. Luke, xiii-xvii; John, x, xi.)

The Feast of Dedication brought Jesus again to Jerusalem, and occasioned another discussion with the Jews. This is followed by another missionary tour through Peraea, during which Jesus explained a number of important points of doctrine: the number of the elect, the choice of one's place at table, the guests to be invited, the parable of the great supper, resoluteness in the service of God, the parables of the hundred sheep, the lost goat, and the prodigal son, of the unjust steward, of Dives and Lazarus, of the unmerciful servant, besides the duty of fraternal correction, and the efficacy of faith. During this period, too, the Pharisees attempted to frighten Jesus with the menace of Herod's persecution; on his part, Jesus healed a man who had dropsy, on a Sabbath day, while at table in the house of a certain prince of the Pharisees. Finally Mary and Martha send messengers to Jesus, asking Him to come and cure their brother Lazarus; Jesus went after two days, and resuscitated His friend who had been several days in the grave. The Jews are exasperated over this miracle, and they decree Jesus must die for the people. Hence He withdrew "into a country near the desert, unto a city that is called Ephrem".

9. Ninth Journey.

February, a.d. 782- Passover, 782. (Cf. Luke, xvii-xxii; Mark., x, xiv; Matt., xix-xxvi; John, xi, xii.)

This last journey took Jesus from Ephrem northward through Samaria, then eastward along the border of Galilee into Peraea, then southward through Peraea, westward across the Jordan, through Jericho, Bethania on Mt. Olivet, Bethphage, and finally to Jerusalem. While in the most northern part of the journey, He cured ten lepers; a little later, He answered the questions raised by the Pharisees concerning the kingdom of God. Then He urged the need of incessant prayer by proposing the parable of the unjust judge; here too belong the parable of the Pharisee and Publican, the discourse on marriage, on the attitude of the Church towards the children, on the right use of riches as illustrated by the story of the rich young ruler, and the parable of the labourers in

the vineyard. After beginning His route towards Jerusalem, He predicted His Passion for the third time; James and John betray their ambition, but they are taught the true standard of greatness in the Church. At Jericho Jesus heals two blind men, and receives the repentance of Zacheus the publican; here He proposed also the parable of the pounds entrusted to the servants by the master. Six days before the pasch we find Jesus at Bethania on Mt. Olivet, as the guest of Simon the leper; Mary anoints His feet, and the disciples at the instigation of Judas are indignant at this seeming waste of ointment. A great multitude assembles at Bethania, not to see Jesus only but also Lazarus; hence the chief priests think of killing Lazarus too. On the following day Jesus solemnly entered Jerusalem and was received by the Hosanna cries of all classes of people. In the afternoon He met a delegation of Gentiles in the court of the Temple. On Monday Jesus curses the barren fig tree, and during the morning He drives the buyers and sellers from the Temple. On Tuesday the wonder of the disciples at the sudden withering of the fig tree provokes their Master's instruction on the efficacy of faith. Jesus answers the enemies' questions as to His authority; then He proposes the parable of the two sons, of the wicked husbandmen, and of the marriage feast. Next follows a triple snare: the politicians ask whether it is lawful to pay tribute to Caesar; the scoffers inquire whose wife a woman, who has had several husbands, will be after resurrection; the Jewish theologians propose the question: Which is the first commandment, the great commandment of the law? Then Jesus proposes His last question to the Jews: "What think you of Christ? whose son is he?" This is followed by the eightfold woe against the Scribes and Pharisees, and by the denunciation of Jerusalem. The last words of Christ in the Temple were expressions of praise for the poor widow who had made an offering of two mites in spite of her poverty. Jesus ended this day by uttering the prophecies concerning the destruction of Jerusalem, His second coming, and the future judgement; these predictions are interrupted by the parable of the ten virgins and the talents. On Wednesday Jesus again predicted His Passion; probably it was on the same day that Judas made his agreement with the Jews to betray Jesus.

E. The Passion of Jesus: Its Preparation

The history of Christ's Passion comprises three parts: the preparation for the Passion, the trial of Jesus, and His death.

Jesus prepares His disciples for the Passion, He prepares Himself for the ordeal and His enemies prepare themselves for the destruction of Jesus.

1. Preparation of the Apostles. Jesus prepares His Apostles for the Passion by the eating of the paschal lamb, the institution of the Holy Eucharist, the concomitant ceremonies, and His lengthy discourses held during and after the Last Supper. Special mention should be made of the prediction of the Passion, and of the betrayal one of

the Apostles and the denial by another. Peter, James, and John are prepared in a more particular manner by witnessing the sorrow of Jesus on Mt. Olivet.

2. *Preparation of Jesus.* Jesus must have found an indirect preparation in all He did and said to strengthen His Apostles. But the preparation that was peculiarly His own consisted in His prayer in the grotto of His Agony where the angel came to strengthen Him. The sleep of His favoured Apostles during the hours of His bitter struggle must have prepared Him too for the complete abandonment He was soon to experience.

3. *Preparation of the Enemies.* Judas leaves the Master during the Last Supper. The chief priests and Pharisees hastily collect a detachment of the Roman cohort stationed in the castle of Antonia, of the Jewish temple-watch, and of the officials of the Temple. To these are added a number of the servants and dependents of the high-priest, and a miscellaneous multitude of fanatics with lanterns and torches, with swords and clubs, who were to follow the leadership of Judas. They took Christ, bound Him, and led Him to the high-priest's house.

F. The Passion of Jesus: The Trial

Jesus was tried first before an ecclesiastical and then before a civil tribunal.

1. *Before Ecclesiastical Court.* The ecclesiastical trial includes Christ's appearance before Annas, before Caiphas, and again before Caiphas, who appears to have acted in each case as head of the Sanhedrin. The Jewish court found Jesus guilty of blasphemy, and condemned Him to death, though its proceedings were illegal from more than one point of view. During the trial took place Peter's triple denial of Jesus; Jesus is insulted and mocked, especially between the second and third session; and after His final condemnation Judas despaired and met his tragic death.

2. *Before the Civil Court.* The civil trial, too, comprised three sessions, the first before Pilate, the second before Herod, the third again before Pilate. Jesus is not charged with blasphemy before the court of Pilate, but with stirring up the people, forbidding to give tribute to Caesar, and claiming to be Christ the king. Pilate ignores the first two charges; the third he finds harmless when he sees that Jesus does not claim royalty in the Roman sense of the word. But in order not to incur the odium of the Jewish leaders, the Roman governor sends his prisoner to Herod. As Jesus did not humour the curiosity of Herod, He was mocked and set at naught by the Tetrarch of Galilee and his court, and sent back to Pilate. The Roman procurator declares the prisoner innocent for the second time, but, instead of setting Him free, gives the people the alternative to choose either Jesus or Barabbas for their paschal freedman. Pilate pronounced Jesus innocent for the third time with the more solemn ceremony of washing his hands; he had recourse to a third scheme of ridding himself of the burden of pronouncing an unjust sentence against his prisoner. He had the prisoner scourged, thus

annihilating, as far as human means could do so, any hope that Jesus could ever attain to the royal dignity. But even this device miscarried, and Pilate allowed his political ambition to prevail over his sense of evident justice; he condemned Jesus to be crucified.

G. The Passion of Jesus: His Death

Jesus carried His Cross to the place of execution. Simon of Cyrene is forced to assist Him in bearing the heavy burden. On the way Jesus addresses his last words to the weeping women who sympathized with His suffering. He is nailed to the Cross, his garments are divided, and an inscription is placed over His head. While His enemies mock Him, He pronounces the well-known "Seven Words". Of the two robbers crucified with Jesus, one was converted, and the other died impenitent. The sun was darkened, and Jesus surrendered His soul into the hands of His Father. The veil of the Temple was rent into two, the earth quaked, the rocks were riven, and many bodies of the saints that had slept arose and appeared to many. The Roman centurion testified that Jesus was indeed the Son of God. The Heart of Jesus was pierced so as to make sure of His death. The Sacred Body was taken from the Cross by Joseph of Arimathea and Nicodemus, and was buried in the new sepulchre of Joseph, and the Sabbath drew near.

H. The Glory of Jesus

After the burial of Jesus, the Holy women returned and prepared spices and ointments. The next day, the chief priests and Pharisees made the sepulchre secure with guards, sealing the stone. When the Sabbath was passed, the Holy women brought sweet spices that they might anoint Jesus. But Jesus rose early the first day of the week, and there was a great earthquake, and an angel descended from heaven, and rolled back the stone. The guards were struck with terror, and became as dead men. On arriving at the sepulchre the holy women found the grave empty; Mary Magdalen ran to tell the Apostles Peter and John, while the other women were told by an angel that the Lord had arisen from the dead. Peter and John hasten to the sepulchre, and find everything as Magdalen has reported. Magdalen too returns, and, while weeping at the sepulchre, is approached by the arisen Saviour Who appears to her and speaks with her. On the same day Jesus appeared to the other Holy Women, to Peter, to the two disciples on their way to Emmaus, and to all the Apostles excepting Thomas. A week later He appeared to all the Apostles, Thomas included; later still He appeared in Galilee near the Lake of Genesareth to seven disciples, on a mountain in Galilee to a multitude of disciples, to James, and finally to His disciples on the Mount Olivet whence He ascended into heaven. But these apparitions do not exhaust the record of the Gospels, according to which Jesus showed Himself alive after His Passion by many proofs, for forty days appearing to the disciples and speaking of the kingdom of God.

A.J. MAAS

Character of Jesus Christ

The Character of Jesus Christ

The surpassing eminence of the character of Jesus has been acknowledged by men of the most varied type:

- Kant testifies to His ideal perfection;
- Hegel sees in Him the union of the human and the Divine;
- the most advanced sceptics do Him homage;
- Spinoza speaks of Him as the truest symbol of heavenly wisdom;
- the beauty and grandeur of His life overawe Voltaire;
- Napoleon I, at St. Helena, felt convinced that "Between him [Jesus] and whoever else in the world there is no possible term of comparison" (Montholon, "Récit de la Captivité de l'Empereur Napoléon").
- Rousseau testifies: "If the life and death of Socrates are those of a sage, the life and death of Jesus are those of a god."
- Strauss acknowledges: "He is the highest object we can possibly imagine with respect to religion, the being without whose presence in the mind perfect piety is impossible".
- To Renan "The Christ of the Gospels is the most beautiful incarnation of God in the most beautiful of forms. His beauty is eternal; his reign will never end."
- John Stuart Mill spoke of Jesus as "a man charged with a special, express, and unique commission from God to lead mankind to truth and virtue".

Not that the views of the foregoing witnesses are of any great importance for the theological student of the life of Jesus; but they show at least the impression made on the most different classes of men by the history of Christ. In the following paragraphs we shall consider the character of Jesus as manifested first in His relation to men, then in His relation to God.

A. JESUS IN HIS RELATION TO MEN

In His relation to men Jesus manifested certain qualities which were perceived by all, being subject to the light of reason; but other qualities were reserved for those who viewed Him in the light of faith. Both deserve a brief study.

(1) In the Light of Reason

There is no trustworthy tradition concerning the bodily appearance of Jesus, but this is not needed in order to obtain a picture of His character. It is true that at first sight the conduct of Jesus is so many-sided that His character seems to elude all description. Command and sympathy, power and charm, authority and affection, cheerfulness and gravity, are the some of the qualities that make the analysis impossible. The make-up of the Gospels does not facilitate the work. At first they appear to us a bewildering forest of dogmatic statements and moral principles; there is no system, no method, everything is occasional, everything fragmentary. The Gospels are neither a manual of dogma nor a treatise on casuistry, though they are the fountain of both. No wonder then the various investigators have arrived at entirely different conclusion at the study of Jesus. Some call Him a fanatic, others make Him a socialist, others again an anarchist, while many call Him a dreamer, a mystic, an Essene. But in this variety of views there are two main concepts under which the others may be summarized: Some consider Jesus an ascetic, others an aesthete; some emphasize His suffering, others His joyfulness; some identify Him with ecclesiasticism, others with humanism; some recognize in Him the prophetic picture of the Old Testament and the monastic of the New, others see in Him only gladness and poetry. There may be solid ground for both views; but they do not exhaust the character of Jesus. Both are only by-products which really existed in Jesus, but were not primarily intended; they are only enjoyed and suffered in passing, while Jesus strove to attain an end wholly different from either joy or sorrow.

(a) Strength

Considering the life of Jesus in the light of reason, His strength, His poise, and His grace are His most characteristic qualities. His strength shows itself in His manner of life, His decision, His authority. In His rugged, nomadic, homeless life there is no room for weakness or sentimentality. Indecision is rejected by Jesus on several occasions: "No man can serve two masters"; "He that is not with me, is against me"; "Seek first the kingdom of God", these are some of the statements expressing Christ's attitude to indecision of will. Of Himself He said: "My meat is to do the will of him that sent me"; "I seek not my own will, but the will of him that sent me." The authority of the Master does not allow its power to be questioned; He calls to men in their boats, in their tax-booths, on their homes, "Follow me", and they look up into His face and obey. St. Mathew testifies, "The multitude...glorified God that gave such power to men"; St.

Mark adds, "the kingdom of God comes to power"; St. Luke says, "Thou hast given him power over all flesh"; the Book of the Acts reads, "God anointed him...with power"; St. Paul too is impressed with "the power of our Lord Jesus". In His teaching Jesus does not argue, or prove, or threaten, like the Pharisees, but He speaks like one having authority. Nowhere is Jesus merely a long-faced ascetic or a joyous comrade, we find Him everywhere to be leader of men, whose principles are built on a rock.

(b) Poise

It may be said that the strength of Christ's character gives rise to another quality which we may call *poise*. Reason is like the sails of the boat, the will is its rudder, and the feelings are the waves thrown upon either side of the ship as it passes through the waters. The will-power of Jesus is strong enough to keep a perfect equilibrium between His feelings and His reason; His body is the perfect instrument in the performance of His duty; His emotions are wholly subservient to the Will of His Father; it is the call of complying with His higher duties that prevents His austerity from becoming excessive. There is therefore a perfect balance or equilibrium in Jesus between the life of His body, of His mind, and of His emotions. His character is so rounded off that, at first sight, there remains nothing which could make it characteristic. This poise in the character of Jesus produces a simplicity which pervades every one of His actions. As the old Roman roads led stright ahead in spite of mountains and valleys, ascents and declivities, so does the life of Jesus flow quietly onward in accordance with the call of duty, in spite of pleasure or pain, honour or ignominy. Another trait in Jesus which may be considered as flowing from the poise of His character is His unalterable peace, a peace which may be ruffled but cannot be destroyed either by His inward feelings or outward encounters. And these personal qualities in Jesus are reflected in his teaching. He establishes an equilibrium between the righteousness of the Old Testament and the justice of the New, between the love and life of the former and those of the latter. He lops off indeed the Pharisaic conventionalism and externalism, but they were merely degenerated outgrowths; He urges the law of love, but shows that it embraces the whole Law and the Prophets; He promises life, but it consists not so much in our possession as in our capacity to use our possession. Nor can it be urged that the poise of Christ's teaching is destroyed by His three paradoxes of self-reliance, of service, and of idealism. The law of self-sacrifice inculcates that we shall find life by losing it; but the law of biological organisms, of physiological tissues, of intellectual achievements, and of economic processes shows that self-sacrifice is self-realization in the end. The second paradox is that of service: "Whosoever will be the greater among you, let him be your minister: and he that will be first among you, shall be your servant." But in the industrial and artistic world, too, the greatest men are those who have done most service. Thirdly, the idealism of Jesus is expressed in such words as "The life is more than

the meat", and "Not in bread alone doth man live, but in every word that proceedeth from the mouth of God." But even our realistic age must grant that the reality of the law is its ideals, and again, that the world of the idealist is impossible only for the weak, while the strong character creates the world after which he strives. The character of Jesus therefore is the embodiment of both strength and poise. It thus verifies the definition given by such an involved writer as Emerson: "Character is centrality, the impossibility of being displaced or overset...The natural measure of this power is the resistance of circumstances."

(c) Grace

But if there were not a third essential element entering into the character of Jesus, it might not be attractive after all. Even saints are at times bad neighbours; we may like them, but sometimes we like them only at a distance. The character of Christ carries with it the trait of grace, doing away with all harshness and want of amiability. Grace is the unconstrained expression of the self-forgetting and kindly mind. It is a beautiful way of doing the right thing, in the right way, at the right time, therefore opens all hearts to its possessor. Sympathy is the widest channel through which grace flows, and the abundance of the stream testifies to the reserve of grace. Now Jesus sympathizes with all classes, with the rich and the poor, the learned and the ignorant, the happy and the sad; He moves with the same sense of familiarity among all classes of society. For the self-righteous Pharisees He has only the words, "Woe to you, hypocrites"; he disciples, "Unless you become as little children, you shall not enter into the kingdom of heaven." Plato and Aristotle are utterly unlike Jesus; they may speak of natural virtue, but we never find children in their arms. Jesus treats the publicans as His friends; He encourages the most tentative beginnings of moral growth. He chooses common fishermen for the corner-stones of His kingdom, and by His kindness trains them to become the light of the world and the salt of the earth; He bends down to St. Peter whose character was a heap of sand rather than a solid "foundation, but He graciously forms Peter into the rock upon which to build his Church. After two of the Apostles had fallen, Jesus was gracious to both, though He saved only one, while the other destroyed himself. Women in need are not excluded from the general graciousness of Jesus; He receives the homage of the sinful woman, He consoles the sorrowing sisters Martha and Mary, He cures the mother-in-law of St. Peter and restores the health of numerous other women of Galilee, He has words of sympathy for the women of Jerusalem who bewailed His sufferings, He was subject to His mother till He reached man's estate, and when dying on the Cross commanded her to the care of His beloved disciple. The grace of the Master is also evident in the form of His teaching: He lays under contribution the simple phases of nature, the hen with her chickens, the gnat in the cup, the camel in the narrow street, the fig tree and its fruit, the fishermen sorting the catch.

He meets with the lightest touch, approaching sometimes the play of humour and sometimes the thrust of irony, the simple doubts of His disciples, the selfish questions of His hearers, and the subtlest snares of his enemies. He feels no need of thrift in His benefits on the few as abundantly as the vastest multitudes. He flings out His parables into the world that those who have ears may hear. There is a prodigality in this manifestation of Christ's grace that can only be symbolized, but not equalled, by the waste of seed in the realm of nature.

(2) In the Light of Faith

In the light of faith the life of Jesus is an uninterrupted series of acts of love for man. It was love that impelled the Son of God to take on human nature, though He did so with the full consent of His Father: "For God so loved the world, as to give his only begotten Son" (John, iii, 16). For thirty years Jesus shows His love by a life of poverty, labour, and hardship in the fulfillment of the duties of a common tradesman. When His public ministry began, He simply spent Himself for the good of His neighbour, "doing good, and healing all that were oppressed by the devil" (Acts, x, 38). He shows a boundless compassion for all the infirmities of the body; He uses His miraculous power to heal the sick, to free the possessed, to resuscitate the dead. The moral weaknesses of man move His heart still more effectively; the woman at Jacob's well, Mathew the publican, Mary Magdalen the public sinner, Zacheus the unjust administrator, are only a few instances of sinners who received encouragement from the lips of Jesus. He is ready with forgiveness for all; the parable of the Prodigal Son illustrates His love for the sinner. In His work of teaching He is at the service of the poorest outcast of Galilee as well as of the theological celebrities of Jerusalem. His bitterest enemies are not excluded from the manifestations of His love; even while He is being crucified He prays for their pardon. The Scribes and Pharisees are treated severely, only because they stand in the way of His love. "Come to me, all you that labour, and are burdened, and I will refresh you" (Matt., xi, 28) is the message of His heart to poor suffering humanity. After laying down the rule, "Greater love than this no man hath, that a man lay down his life for his friends" (John, xv, 13), He surpasses as it were His own standard by dying for His enemies. Fulfilling the unconscious prophecy of the godless high-priest, "It is expedient for you that one man should die for the people" (John, xi, 50), He freely meets His sufferings which He could have easily avoided (Matt., xxvi, 53), undergoes the greatest insults and ignominies, passes through the most severe bodily pains, and sheds His blood for men "unto remission of sins" (Matt., xxvi, 28). But the love of Jesus embraced not only the spiritual welfare of men, it extended also to their temporal happiness: "Seek ye therefore first the kingdom of God, and his justice, and all these things shall be added unto you" (Matt., vi, 33).

B. JESUS IN HIS RELATION TO GOD

Prescinding from the theological discussions which are usually treated in the theses "De Verbo Incarnato", we may consider the relations of Jesus to God under the headings of His sanctity and His Divinity.

(1) Sanctity of Jesus

From a negative point of view, the sanctity of Jesus consists in His unspotted sinlessness. He can defy His enemies by asking, "Which of you shall convince me of sin?" (John, viii, 46). Even the evil spirits are forced to acknowledge Him as the Holy One of God (Mark, i, 24; Luke, iv, 34). His enemies charge Him with being a Samaritan, and having a devil (John, viii, 48), with being a sinner (John, ix, 24), a blasphemer (Matt., xxvi, 65), a violator of the Sabbath (John, ix, 16), a malefactor (John, xviii, 30), a disturber of the peace (Luke, xxiii, 5), a seducer (Matt., xxvii, 63). But pilate finds and declares Jesus innocent, and, when pressed by the enemies of Jesus to condemn Him, he washes his hands and exclaims before the assembled people, "I am innocent of the blood of this just man" (Matt., xxvii, 24). The Jewish authorities practically admit that they cannot prove any wrong against Jesus; they only insist, "We have a law; and according to the law he ought to die, because he made himself the Son of God" (John, xix, 7). The final charge urged against Christ by His bitterest enemies was His claim to be the Son of God.

The positive side of the sanctity of Jesus is well attested by His constant zeal in the service of God. At the age of twelve He asks His mother, "Did you not know, that I must be about my father's business?". He urges on His hearers the true adoration in spirit and in truth (John, iv, 23) required by His Father. Repeatedly He declares His entire dependence on His Father (John, v, 20, 30; etc.); He is faithful to the Will of His Father (John, viii, 29); He tells His disciples, "My meat is to do the will of him that sent me" (John, iv, 34). Even the hardest sacrifices do not prevent Jesus from complying with His Father's Will: "My Father, if this chalice may not pass away, but I must drink it, thy will be done" (Matt., xxvi, 42). Jesus honours His Father (John, ii, 17), and proclaims at the end of His life, "I have glorified thee on the earth" (John, xvii, 4). He prays almost incessantly to His Father (Mark, i, 35; vi, 46; etc.), and teaches His Apostles the Our Father (Matt., vi, 9). He always thanks His Father for His bounties (Matt., xi, 25; etc.), and in brief behaves throughout as only a most loving son can behave towards his beloved father. During His Passion one of His most intense sorrows is His feeling of abandonment by His Father (Mark, xv, 34), and at the point of death He joyfully surrenders His Soul into the hands of His Father (Luke, xxiii, 46).

(2) Divinity of Jesus

The Divinity of Jesus is proved by some writers by an appeal to prophecy and miracle. But, though Jesus fulfilled the prophecies of the Old Testament to the letter,

He Himself appears to appeal to them mainly in proof of His Divine mission; He shows the Jews that He fulfills in His Person and His work all that had been foretold of the Messiah. The prophecies uttered by Jesus Himself differ from the predictions of the Old Testament in that Jesus does not speak in the name of the Lord, like the seers of old, but in His own name. If it could be strictly proved that they were made in virtue of His own knowledge of the future, and of His own power to dispose of the current of events, the prophecies would prove His Divinity; as it is they prove at least that Jesus is a messenger of God, a friend of God, inspired by God. This is not the place to discuss the historical and philosophical truth of the miracles of Jesus, but we know that Jesus appeals to His works as bearing witness to the general truth of His mission (John, x, 25, 33, 38), and also for the verity of some particular claims (Matt., ix, 6; Mark, ii, 10, 11; etc.) They show, therefore, at least that Jesus is a Divine legate and that His teaching is infallibly true.

Did Jesus teach that He is God? He certainly claimed to be the Messiah (John, iv, 26), to fulfill the Messianic descriptions of the Old Testament (Matt., xi, 3-5; Luke, vii, 22-23; iv, 18-21), to be denoted by the current Messianic names, "king of Israel" (Luke, xix, 38; etc), "Son of David" (Matt., ix, 27; etc), "Son of man" (*passim*), "he that cometh in the name of the Lord" (Matt., xxi, 9.etc). Moreover, Jesus claims to be greater than Abraham (John, viii, 53, 56), than Moses (Matt., xix, 8-9), than Solomon and Jonas (Matt., xii, 41-42); He habitually claims to be sent by God (John, v, 36, 37, 43; etc), calls God His Father (Luke, ii, 49; etc), and He willingly accepts the titles "Master" and "Lord" (John, xiii, 13, 14). He forgives sin in answer to the observation that God alone can forgive sin (Mark, ii, 7, 10; Luke, v, 21, 24; etc). He acts as the Lord of the Sabbath (Matt., xii, 8; etc), and tells St. Peter that as "Son" He is free from the duty of paying temple-tribute (Matt., xvii, 24, 25). From the beginning of His ministry he allows Nathanael to call Him "Son of God" (John, i, 49); the Apostles (Matt., xiv, 33) and Martha (John, xi, 27) give Him the same title. Twice He approves of Peter who calls Him "the Christ, the Son of God" (John, vi, 70), "Christ, the Son of the living God" (Matt., xvi, 16). Four distinct times does He proclaim Himself the Son of God; to the man born blind (John, x, 30, 36); before the two assemblies of the Jewish Sanhedrin on the night before His death (Matt., xxvi, 63-64; Mark, xiv, 61-62; Luke, xxii, 70). He does not manifest His Divine Sonship before Satan (Matt., iv, 3, 6) or before the Jews who are deriding Him (Matt., xxvii, 40). Jesus does not wish to teach the evil spirit the mystery of His Divinity; to the Jews He gives a greater sign than they are asking for. Jesus, therefore, applies to Himself, and allows others to apply to Him, the title "Son of God" in its full meaning. If there had been a misunderstanding He would have corrected it, even as Paul and Barnabas corrected those who took them for gods (Acts, xiv, 12-14).

Nor can it be said that the title "Son of God" denotes a merely adoptive sonship. The foregoing texts do not admit of such an interpretation. St. Peter, for instance, places his master above John the Baptist, Elias, and the Prophets (Matt., xvi, 13-17). Again, the Angel Gabriel declares that the Child to be born will be "the Son of the most High" and "Son of God" (Luke, i, 32, 35), in such a way that He will be without an earthly father. Mere adoption presupposes the existence of the child to be adopted; but St. Joseph is warned that "That which is conceived in her [Mary], is of the Holy Ghost" (Matt., i, 20); now one's being conceived by the operation of another implies one's natural relation of sonship to him. Moreover, the Divine Sonship claimed by Jesus is such that he and the Father are one (John, x, 30, 36); a merely adopted sonship does not constitute a physical unity between the son and his adoptive father. Finally if Jesus had claimed only an adoptive sonship, He would have deceived His judges; they could not have condemned Him for claiming a prerogative common to all pious Israelites. Harnack (*Wesen des Christentums*, 81) contends that the Divine Sonship claimed by Jesus is an intellectual relation to the Father, springing from special knowledge of God. This knowledge constitutes "the sphere of the Divine Sonship", and is implied in the words of Matt., xi, 27: "No one knoweth the Son, but the Father: neither doth any one know the Father, but the Son, and he to whom it shall please the Son to reveal him". But if the Divine Sonship of Christ is a mere intellectual relation, and if Christ is God in a most figurative sense, the Paternity of the Father and the Divinity of the Son will be reduced to a figure of speech. (*See CHRISTOLOGY.*)

A.J. MAAS

Religious of Jesus Mary

Religious of Jesus Mary

The Congregation of the Religious of Jesus Mary was founded at Lyons, France, in October, 1818, by Claudine Thevenet, in religion, Mother St. Ignatius. The constitutions were approved by Pius IX, 31 December, 1847. The object of this congregation is to give to young ladies a Christian education conformable to their social position; For this purpose the religious have boarding-schools and academies, and, in large cities, residences for ladies of the literary profession. Their establishments of various kinds are numerous: in France, before the expulsion of 1901, they were at Lyons, the birthplace of the congregation, at Le Puy, Rodes, and Remiremont. Owing to the religious persecution, the mother-house was transferred to Rome in September, 1901. Besides the mother-house on the Via Flaminia, the religious have opened a college, the Stella Viae, to give to young ladies the means of culture which a residence in Rome and the study of the fine arts, modern languages, European literature, and history afford. The Stella

Viae is situated on the Via Nomentana, near the Porta Pia. In 1842 Lyons sent a colony to India, where twelve houses now exist. The most important of these are at Bombay, Poonah, Lahore, Simla, and Agra. In 1850 the first house in Spain was founded at Tarragona; then followed other foundations, Valencia, Barcelona, Orihuela, S. Gervas, Alicante, and Murcia. In 1902 Spain sent a colony to found houses in the city of Mexico and at Merida, Yucatan.

The first house of the congregation in America was founded at St. Joseph, Levis, Canada, in 1858. In 1876 Sillery (Quebec) became the provincial house of America. Canada has four other houses, at St-Gervais, St-Michel, Trois-Pistoles, and Beauceville. In 1876 several sisters left Sillery to open houses in the Unites States. The first foundation was that at Fall River, Mass., where the sisters now conduct a boarding-school and a parochial school attended by twelve hundred children. The house at Manchester, New Hampshire, was founded in 1881; then, at Woonsocket, R.I., a boarding-school and two parochial schools, attended by fourteen hundred children. At Providence, R.I., the religious have a convent and two parochial schools. In 1902 several nuns left the mother-house in Rome, to found an establishment in New York. The religious of Jesus Mary now possess a house on Fourteenth Street and an academy at Kingsbridge. They also have the supervision of a day-school for poor Italian children. The establishment on Fourteenth Street, called "Our Lady of Peace", is a residence for ladies in the literary profession.

History of the Jews

History of the Jews

(*Yehúd`m; Ioudaismos*).

Of the two terms, *Jews* and *Judaism*, the former denotes usually the Israelites or descendants of Jacob (Israel) in contrast to Gentile races; the latter, the creed and worship of the Jews in contrast to Christianity, Mohammedanism, etc. In a separate article we will treat of Judaism as a religious communion with its special system of faith, rites, customs, etc. (See JUDAISM.) Here, we shall cover the history of the Jews since the return from the Babylonian Exile, from which time the Israelites received the name of Jews (for their earlier history, see ISRAELITES).

This history may be divided into various periods in accordance with the leading phases which may be distinguished in the existence of the Jewish race since the Return in 538 B.C.

(1) Persian Suzerainty (538-333 B.C.)

In October, 538 B.C., Babylon opened its gates to the Persian army, and a few weeks later the great conqueror of Babylonia, Cyrus, made his triumphal entry into the fallen city. One of the official acts of the new ruler in Babylon was to give to the exiled Jews full liberty to return to Juda (see I Esdras, i). The substance of Cyrus's decree in their favour is in striking harmony with other known decrees of that monarch, with his general policy of clemency and toleration towards the conquered races of his empire, and with his natural desire to have on the Egyptian border a commonwealth as large as possible, bound to Persia by the strongest ties of gratitude. A comparatively large number of Jewish exiles (50,000 according to I Esdras, ii, 64, 65) availed themselves of Cyrus's permission. Their official leader was Zorobabel, a descendant of the royal family of Juda, whom the Persian monarch had invested with the governorship of the sub-province of Juda, and entrusted with the precious vessels which had belonged to Yahweh's House. There appeared also by his side the priest "Josue, the son of Josedec", probably as the religious head of the returning community. The returned exiles, who mostly belonged to the tribes of Benjamin and Juda, settled chiefly in the neighborhood of Jerusalem. They at once organized a council of twelve elders, and this council, which was naturally presided over by Zorobabel, controlled and guided the internal affairs of the community, under the suzerainty of Persia. Without delay, too, they set up a new altar, and had it ready to celebrate the Feast of Tabernacles in 537 B.C. Henceforth, the ritual system was religiously carried out. The foundation of the second Temple was laid in the second month of the second year after the Return, but no further headway was made for fifteen or sixteen years, owing to the active interference and positive misrepresentations to the Persian kings by the Samaritans to whom the Jews had denied a share in the work of rebuilding the House of the Lord. Meantime, the Jews themselves lost much of their interest in the reconstruction of the Temple; and it is only in 520 B.C. that the Prophets Aggæus and Zacharias succeeded in rousing them from their supineness. Pecuniary help came too from the Jewish community in Babylon, and also, a little later, from the Persian king. Thus encouraged, they made rapid progress and on 3 March, 515 B.C., the new Temple was solemnly dedicated. The Jewish leaders next started on the rebuilding of the walls of Jerusalem, and here again met with the hostility of the Samaritans, whose complaints at the Court of Persia were most successful under Artaxerxes I "Longimanus" (464-124 B.C.), who issued orders strictly forbidding the Jews to proceed with the work.

The special mission of Esdras and Nehemias in behalf of the struggling Palestinian community and their strenuous efforts to lift up its moral tone need not to be dwelt upon here (see ESDRAS; NEHEMIAS). Suffice it to say that, to whatever precise time their labours should be assigned (see CAPTIVITIES), the scribe Esdras and the satrap Nehemias left their permanent impress on their fellow-Jews. After Esdras's death,

which probably occurred not long before the end of the Persian rule over in Juda in 333 B.C., little is distinctly known of the history of the Palestinian Jews. It seems, however, that under the satraps of Coele-Syria, the action of the high-priest had a very considerable influence upon their religious and civil matters alike (cfr. Josephus, "Antiq. Of the Jews", XI, vii), and that their community enjoyed a steadily increasing prosperity, hardly marred by the deportation of a certain number of Jews to distant regions like Hyrcania, which probably occurred under Artaxerxes III (358-337 B.C.). During the Persian period, the Jews who had preferred to stay in Babylonia remained constantly in touch with the returned exiles, sending them, at times, material help, and formed a flourishing community deeply attached to the faith and to the traditions of their race. Within the same period falls the formation of the Jewish colony at Elaphantine (Upper Egypt), which was for a while supplied with a temple of its own, and the faithfulness of which to Persia is witness by Judeo-Aramean papyri recently discovered. Lastly, the institutions of Judaism which seem to have more particularly developed during the Persian domination are the Synagogues, with their educational and religious features, and the Scribes with their peculiar skill in the law.

(2) Greek Period (333-168 B.C.)

A new period in the history of the Jews opens with the defeat of Darius III (335-330 B.C.) by Alexander the Great at Issus, in Cilicia. This victory of the young conqueror of Persia undoubtedly brought the Palestinian Jews into direct contact with Greek civilization, whatever may be thought of the exact historical value of what Josephus relates (Antiq. of the Jews, XI, viii, 3-5) concerning Alexander's personal visit to Jerusalem. Alexander allowed them the free enjoyment of their religious and civil liberties, and rewarded those of them who went to war with him against Egypt and settled in Alexandria, a city of his foundation, by granting them equal civic rights with the Macedonians. Again, when the Samaritans rebelled against him, he added a part of Samaria to Judea (331 B.C.). After Alexander's untimely death (323 B.C.), Palestine had an ample share of the troubles which arose out of the partition of his vast empire among his captains. Placed between Syria and Egypt, it became the bone of contention between their respective rulers. At first, as a part of Coele-Syria, it passed naturally into the possession of Laomedon of Mytiline. But as early as 320 B.C., it was seized by the Egyptian Ptolemy I (323-285 B.C.) who, on a Sabbath-day took Jerusalem, and carried away many Samaritans and Jews into Egypt. A few years later (315 B.C.), it fell into the power of Syria; but after the battle of Ipsus in Phrygia (301 B.C.), it was annexed to Egypt and remained so practically a whole century (301-202 B.C.). Seleucus I, who founded Antioch about 300 B.C., attracted the Jews to his new capital by granting them equal rights with his Greek subjects; and thence they gradually extended into the principal cities of Asia Minor. The rule of the first three Ptolemies was even more

popular with the Jews than that of the Seleucids. Ptolemy I (Soter) settled many of them in Alexandria and Cyrene, whence they gradually spread over the whole country, and attained to eminence in science, art, and even literature, as is proved by the numerous Judeo-Greek fragments which have survived. Under Ptolemy II (Philadelphus), the Hebrew Pentateuch was first rendered into Greek; and this, in turn, led in the course of time to the complete translation of the Old Testament known as the Septuagint. His successor, Euergetes (247-222 B.C.), is particularly credited, after a successful campaign in Syria, with having offered rich presents at the Temple in Jerusalem. Again, the annual tribute demanded by the early Ptolemies was apparently light; and as long as it was paid regularly, the Palestinian Jews were left free to manage their own affairs under their high-priests at whose side stood the Gerusia of Jerusalem, as a council of state, including the priestly aristocracy. In this wise, things went well under the high-priesthood of Simon the Just (310-291 B.C.), and that of his two brothers, Eleazar II (291-276 B.C.) and Manasses (276-250 B.C.).

Matters proved less satisfactory under Onias II (250-226 B.C.), who withheld the tribute for several years from his Egyptian suzerain. Under Onias's son and successor, Simon II (226-208 B.C.), whose godly rule is highly praised in Ecclesiasticus (chap. iv), the condition of Palestine became precarious owing to the renewed conflicts between Egypt and Syria for the possession of Coele-Syria and Judea. In the end, however, the Syrian king, Antiochus II, remained master of Palestine and did his utmost to secure the loyalty of the Jews not only of Judea, but also of Mesopotamia and Babylon. Seleucus IV (187-175 B.C.) pursued at first the conciliatory policy of his father, and the Judean Jews prospered during the opening years of Onias III (198-175). Soon, however, intestine strife disturbed the pontiff's wise rule, and Seleucus, misled by Simon, the governor of the Temple, sent his treasurer, Heliodorus, to seize the Temple funds. The failure of Heliodorus's mission led eventually to Onias's imprisonment and deposition from the high-priesthood. This deposition purchased from the new king, Antiochus IV (Epiphanes), by Jason, an unworthy brother of Onias, was the real triumph of Hellenism in Jerusalem. The man who, in turn, supplanted Jason was Menelaus, another hellenizing leader, whom craft and gold maintained in office, despite the complaints of the Jews to the Syrian monarch. At length, a popular revolt occurred against Menelaus, which Antiochus put down with great barbarity, and which resulted in his leaving Menelaus in charge of the high-priesthood, while two foreign officers became Governors of Jerusalem and Samaria respectively (170).

(3) The Machabean Age (168-63 B.C.)

The whole period which has just been described, was marked by the steady growth and widespread influence of hellenistic culture. Towards its end, the Jewish high-priests themselves not only assumed Greek names and adopted Greek manners, but became

the ardent champions of Hellenism. In fact, Antiochus IV thought that the time had now come to unify the various races of his dominions by thoroughly hellenizing them. His general edict for that purpose met probably with unexpected opposition on the part of most Palestinian Jews. Hence, by special letters he ordered the utter destruction of Yahweh's worship in Jerusalem and in all towns of Judea: under the penalty of death everything distinctly Jewish was prohibited, and Greek idolatry prescribed (168 B.C.). The Holy City had recently been dismantled, and a part of it (Acra) transformed into a Syrian citadel. Now its Temple was dedicated to Zeus, to whom sacrifices were offered upon an idol-altar erected over Yahweh's altar. In like manner, in all the townships of Juda altars were set up and heathen sacrifices offered. In the dire persecution which ensued, all resistance seemed impossible. In the little town of Modin, however, an aged priest, Mattathias, boldly raised the standard of revolt. At his death (167 B.C.), he appointed his son Judas, surnamed Machabeus, to head the forces which had gradually gathered around him. Under Judas's able leadership, the Machabean troops won several victories, and in December, 165 B.C., Jerusalem was re-entered, the Temple cleansed, and Divine worship renewed.

The struggle was a hard one against the numerous armies of Antiochus V and Demetrius I, the next Syrian kings; yet it was heroically maintained, with varying success, by Judas until his death on the battlefield (161 B.C.). One of his brothers, Jonathan, became his successor in command for the next eighteen years (161-143 B.C.). The new leader was not only able to re-enter and fortify Jerusalem, but was also recognized as high-priest of the Jews by the Syrian Crown, and as an ally by Rome and Sparta. It was not given him, however to restore his country to complete independence: he was treacherously captured and soon afterwards put to death by the Syrian general, Tryphon. Another brother of Judas, Simon (143-135 B.C.), then assumed the leadership, and under him the Jews attained to a high degree of happiness and prosperity. He repaired the fortresses of Judea, took and destroyed the citadel of Acra (142 B.C.), and renewed the treaties with Rome and Lacedæmon. In 141 B.C., he was proclaimed by a national assembly "prince and high-priest for ever, till there should arise a faithful prophet". He exercised the right of coinage and may be considered as the founder of the Asmonean, or last Jewish, dynasty. The rule of John Hyrcanus I, Simon's successor, lasted 30 years. His career was marked by a series of conquests, notably by the reduction of Samaria and the forcible conversion of Idumea. He sided with the aristocratic Sadducees against the more rigid defenders of the Theocracy, the Pharisees, the successors of the Assideans. The oldest parts of the "Sibylline Oracles" and of the "Book of Enoch" are probably remainders of the literature of his day. He was succeeded by his eldest son, Aristobulus I (Heb. name, Judas), who was the first Machabean ruler to assume the title of king. He reigned but one year, conquered and proselytized a part of Galilee.

His brother Alexander Jannæus (Heb. name Jonathan) occupied the throne twenty-six years (104-78 B.C.). During the civil war which broke out between him and his subjects he was long unsuccessful; but he finally got the better of his opponents, and wreaked frightful vengeance upon them. He also succeeded at a later date in conquering and Judaizing the whole country east of the Jordan.

On acceding to the kingdom, his widow Alexandra (Heb. name, Salome) practically surrendered the rule to the Pharisees. But this did not secure the peace of the realm, for Alexandra's death alone prevented her being involved in a new civil war. The strife which soon arose after her death (69 B.C.), between her two sons Hyrcanus II and Aristobulus II, who were favoured by the Pharisees and the Sadducees respectively, was skilfully kept up by Antipater, the ambitious Governor of Idumea and father of Herod the Great. It gradually led both brothers to submit to the arbitration of Pompey, then commanding the Roman forces in the East. The wary imperator finally decided in favour of Hyrcanus, marched on Jerusalem, and stormed the temple, whereupon a carnage ensued. This brought to an end the short era of independence which the Machabees had secured for the country (63 B.C.). It was during the Machabean Age that occurred the building of a Jewish temple at Leontopolis in the Delta, and the transformation of the Jewish Gerusia into the Jerusalem Sanhedrin. Among the literary products of the same period are to be reckoned the deuterocanonical Books of the Machabees, Wisdom, and Ecclesiasticus; and the apocryphal "Psalms of Solomon", "Book of Jubilees", and "Assumption of Moses"; to which many scholars add the Book of Daniel and several sacred hymns embodied in our Psalter.

(4) Early Roman Supremacy (63 B.C.-A.D. 70)

The fall of Jerusalem in 63 B.C. marks the beginning of Judea's vassalage to Rome. Pompey, its conqueror, dismantled the Holy City, recognized Hyrcanus II as high-priest and ethnarch, but withdrew from his jurisdiction all territory outside of Judea proper, and strictly forbade him all further conquests. Then he proceeded homewards carrying with him numerous captives, who greatly increased, if indeed they did not begin, the Jewish community in Rome. Soon Judea became a prey to several discords, in the midst of which the weak Hyrcanus lost more and more of his authority, and his virtual master, the Idumean Antipater, grew proportionately in favour with the suzerains of the land. Upon the final defeat of Pompey at Pharsalus (48 B.C.) by Julius Cæsar, Antipater promptly sided with the victor, and rendered him signal services in Egypt. His reward was the full recognition of Hyrcanus as high-priest and ethnarch; and for himself the rights of Roman citizenship and the office of procurator over the whole of Palestine. He next proceeded to rebuild the walls of the Holy City, and to appoint two of his sons, Phasaël and Herod, Governors of Jerusalem and Galilee respectively. From this time forth Herod's fortune grew rapidly, until in the Roman capital, whither he

had fled from the wrath of the Nationalist party, he reached the goal of his ambition. The Idumean Herod ascended the Throne of David, and his long reign (37-4 B.C.) forms in several respects a glorious epoch in the history of the Jews (see HEROD THE GREAT). Upon the whole, however, it was disastrous for the Jews of Palestine. Its first part (37-25 B.C.) was chiefly spent in getting rid of the surviving Asmoneans. By their death he, indeed, made the throne more secure for himself, but also alienated the mass of his subjects who were deeply attached to the Machabean family. To this grievance he gradually added others no less hateful to the national party. The people hated him as a bloody tyrant bent on destroying the worship of God, and hated still more the Romans who maintained him on the throne, and whose suzerainty was to be thrown off at the first opportunity. It was a short time before the death of Herod that Jesus, the true King of the Jews, was born, and the Holy Innocents were massacred.

Herod's death was the signal for an insurrection which spread gradually and was finally put down by Varus, the Governor of Syria. Next followed the practical ratification of the last will of Herod by Augustus. The principal heir was Archelaus, who was appointed ethnarch of Idumean, Judea, and Samaria, with the promise of the royal title on condition that he should rule to the emperor's satisfaction. For his mis-rule, Augustus deposed him (A.D. 6), and put in his stead a Roman procurator. Henceforward, Judea continued as a part of the province of Syria, except for a brief interval (A.D. 41-44), during which Herod Agrippa I held sway over all the dominions of Herod the Great. The Roman procurators of Judea resided in Cæsaria, and went to Jerusalem only on special occasions. They were subalterns of the Syrian governors, commanded the military, maintained peace and took care of the revenue. They generally abstained from meddling with the religious affairs, especially for fear of arousing the violence of the Zealots of the time, who regarded as unlawful the payment of tribute to Cæsar. The local government was largely left in the hands of the Sadducean priestly aristocracy, and the Sanhedrin was the supreme court of justice, deprived, however (about A.D. 30), of the power of carrying a sentence of death. It was under Pontius Pilate (A.D. 26-36), one of the procurators appointed by Tiberius, that Jesus was crucified.

Up to the reign of Caligula (37-44), the Jews enjoyed, without any serious interruption, the universal toleration which Roman policy permitted to the religion of the subject states. But when that emperor ordered that Divine honours should be paid to him, they generally refused to submit. Petronius, the Roman Governor of Syria, received peremptory orders to use violence, if necessary, to set up Caligula's statue in the Temple at Jerusalem. At Alexandria a fearful massacre took place, and it looked as if all the Jews of Palestine were doomed to perish. Petronius, however, delayed the execution of the decree, and in fact, escaped punishment only through the murder of Caligula in A.D. 41. The Jews were saved, and with the accession of Claudius, who owed the

imperial dignity chiefly to the efforts of Herod Agrippa, a brighter day dawned for them. Through gratitude, Claudius conferred upon Agrippa the whole kingdom of Herod the Great, and upon the Jews at home and abroad valuable privileges. Agrippa's careful government made itself felt throughout the entire community, and the Sanhedrin, now under the presidency of Gamaliel I, St. Paul's teacher, had more authority than ever before. Yet the national party remained in an almost constant state of mutiny, while the Christians were persecuted by Agrippa. Upon Agrippa's death (A.D. 44), the country was again subjected to Roman procurators, and this was the prelude to the destruction of Jerusalem and the Jewish people. Nearly all the seven procurators who ruled Judea from A.D. 44 to 66 acted as though they sought to drive its population to despair and revolt. Gradually, the confusion became so great and so general as manifestly to presage the dissolution of the commonwealth. At length, in A.D. 66, in spite of the precautionary efforts of Agrippa II, the party of the Zealots burst into an open rebellion, which was terminated (A.D. 70) by the capture of Jerusalem by Titus, the destruction of the Temple, and the massacre and the banishment of hundreds of thousands of the unhappy people, who were scattered among their brethren in all parts of the world. According to Eusebius, the Christians of Jerusalem, forewarned by their Master, escaped the horrors of the last siege, by removing in due time to Pella, east of the Jordan. Prominent among the Jewish writers of the first century of our era are Philo, who pleaded the Jewish cause at Rome before Caligula, and Josephus, who acted as Jewish Governor of Galilee during the final revolt against Rome, and described its vicissitudes and horrors in a thrilling, and probably also in an exaggerated, manner.

(5) Last Days of Pagan Rome (A.D. 70-320)

Rome exulted over fallen Jerusalem, and struck coins commemorative of the hard won victory. The chief leaders of the defence, a long train of heavily chained captives, the vessels of the Temple, the seven-branched candlestick, the golden table, and a roll of the Law, graced Titus's triumph in the imperial city. And yet three strong fortresses in Palestine still held out against the Romans: Herodium, Machærus, and Masada. The first two fell in A.D. 71, and the third, the following year, which thus witnessed the complete conquest of Judea. For a while longer, certain fugitive Judean Zealots strove to foment a rebellion in Egypt and in Cyrenaica. But their efforts soon came to naught, and Vespasian availed himself of the Egyptian commotion to close for ever the temple of Onias in Heliopolis. At this juncture, it looked as though the distinct groups of Jewish families were henceforth destined to drift separately, finally to be absorbed by the various nations in the midst of which they chanced to live. This danger was, however, averted by the rapid concentration of the surviving Jews in two great communities, mostly independent of each other, and corresponding to the two great divisions of the world at the time. The first naturally comprised all the Jews who lived

this side of the Euphrates. Not long after the fall of Jerusalem and its subsequent misfortunes, they gradually acknowledged the authority of a new Sanhedrin, which, in whatever way it arose, was actually constituted at Jamnia (Jabne), under the presidency of Rabbi Jochanan ben Zaccai. Together with the Sanhedrin [now the supreme Court (Bêth Din) of the Western communities], there was at Jamnia a school in which Jochanan inculcated the oral Law (specifically the Halacha) handed down by the fathers, and delivered expository lectures (Hagada) on the other Hebrew Scriptures distinct from the written Law (Pentateuch). Jochanan's successor as the head of the Sanhedrin (A.D. 80) was Rabbi Gamaliel II, who took the title of Nasi ("prince": among the Romans, "patriarch"). He also lived at Jamnia, and presided over its school, on the model of which other schools were gradually formed in the neighbourhood. He finally transmitted (A.D. 118) to his successors, the "patriarchs of the West", a religious authority to which obedience and reverence were henceforth paid, even after the seat of this authority was shifted first to Sephoris, and finally to Tiberias.

The supremacy of "Rabbinism", thus firmly established among the Western Jews, prevailed likewise in the other great community which comprised all the Jewish families east of the Euphrates. The chief of this Babylonian community assumed the title of Resh-Galutha (prince of the Captivity), and was a powerful feudatory of the Parthian Empire. He was the supreme judge of the minor communities, both in civil and in criminal matters, and exercised in many other ways a wellnigh absolute authority over them. The principal districts under his jurisdiction were those of Nares, Sora, Pumbeditha, Nahardea, Nahar-Paked, and Machuzza, whose rabbinical schools were destined to enjoy the greatest fame and influence. The patriarchs of the West possessed much less temporal authority than the princes of the Captivity; and this was only natural in view of the suspicious watchfulness which Vespasian and Titus exercised over the Jews of the Empire. A garrison of 800 men occupied the ruins of Jerusalem to prevent its reconstruction by the religious zeal of its former inhabitants, and in order to do away with all possible pretenders to the Jewish Throne or to the Messianic dignity as strict search was made for all who claimed descent from the royal House of David. Under Domitian (A.D. 81-96), the Fiscus Judaicus, or tax of two drachmas established by Vespasian for the temple of Jupiter Capitolinus, was exacted from the Jews with the utmost rigour, and they were involved in the persecutions which this tyrant carried on against Christians. The reign of Nerva (A.D. 96-98) gave a brief interval of peace to the Jews; but in that of Trajan (98-117), while the Roman legions had been withdrawn from Africa to fight against Parthia, the Jewish population of Egypt and Cyrene took up arms against the Greeks of those districts, and on both sides dreadful atrocities were committed. Thence the flame spread to Cyprus where the Jews massacred, we are told, 240,000 of their fellow-citizens. Hadrian sent forces to suppress the uprising

in that island, and forbade any Jew to set his foot on its soil. Next, the revolt in Egypt and Cyrene was put down. Meanwhile the Jews of Mesopotamia, dissatisfied with the Romans who had just conquered the Parthians, endeavoured to get rid of the Fiscus Judaicus now imposed upon them. Their insurrection was soon suppressed by Lucius Quintus, who was then appointed to the government of Judea, where it is probable that disturbances were feared.

The next year (A.D. 117), Hadrian became emperor. This was a fortunate occurrence for the Jews of Babylonia, for as the new Cæsar gave up Trajan's conquests beyond the Euphrates, they came again under the milder rule of their ancient sovereigns. But it proved most unfortunate for the Jewish population of the Roman world. Hadrian issued an edict forbidding circumcision, the reading of the Law, and the observance of the Sabbath. He next made known his intention to establish a Roman colony in Jerusalem, and to erect a fane to Jupiter on the site of Yahweh's fallen Temple. At this juncture, it was announced that the Messia had just appeared. His name, Bar-Cochba, "Son of the Star", seemed to fulfil the ancient prophecy: "a star shall rise out of Jacob" (Numbers, xxiv,17). Rabbi Aqiba, the most learned and venerated of the Sanhedrists of the day, distinctly acknowledged the claims of the new Messia. Jewish warriors of all countries flocked around Bar-Cochba, and he maintained his cause against Hadrian for two years. But Roman tactics and discipline gradually prevailed. The Jewish strongholds fell one after another before Julius Severus, the Roman general; Jerusalem was taken; and at length (A.D. 135), the fortress of Bither, the last refuge of the rebels, was captured and razed to the ground. Bar-Cochba had been slain; and sometime later, Rabbi Aqiba was seized and executed, but his seven leading pupils fortunately escaped to Nisibis and Nahardea. Dreadful massacres followed the suppression of the revolt; of the fugitives who escaped death many fled to Arabia, whence that country obtained its Jewish population; and the rest were sold into slavery. To annihilate for ever all hopes of the restoration of a Jewish kingdom, a new city was founded on the site of Jerusalem and peopled by a colony of foreigners. The city received the name of Ælia Capitolina, and no Jew was allowed to reside in it or even approach its environs. The Christians, now fully distinguished from the Jews, were permitted to establish themselves within the walls, and Ælia became the seat of a flourishing bishopric.

Under Antoninus Pius (138-161), Hadrian's laws were repealed, and the active persecution against the Jews came to an end. Aqiba's disciples then returned to Palestine and reorganized the Sanhedrin at Usha, in Galilee (140), under the presidency of Simon II, the son of Gamaliel II. Simon's patriarchate was not free from the petty oppression of the Roman officials, which the Palestinian Jews particularly felt and resented. On the occasion, therefore, of the warlike preparations of the Parthians against Rome, a fresh revolt broke out in Judea during the last year of Antoninus's reign. It was speedily

suppressed under the next emperor, Marcus Aurelius (161-180), and followed by a re-enactment of Hadrian's extreme measures which, however, were soon annulled or never carried out. In 165, Rabbi Juda I succeeded Simon II as president of the Sanhedrin and patriarch of the West. The most important of his acts is the completion of the Mishna oral Law (about 189), which, concurrently with the Bible, became the principal source of rabbinical study, and a kind of constitution which even now holds together the scattered members of the Jewish race. As Rabbi Juda was in office for over thirty years, he was the last Jewish patriarch who had to complain of the vexations of the pagan rulers of Rome. Under Caracalla (211-217), the Jews received the rights of citizenship; and under his successors the various disabilities by which they had been affected were gradually removed. Even such rabid persecutors of the Christians as Decius (249-251), Valerian (253-260), and Diocletian (284-305) left the Jews unmolested. During this period of peace, the patriarchs of the West frequently sent their legates to the various synagogues to ascertain their actual condition and collect the tax from which Juda III and his successors drew their income. In Babylonia, the Jewish communities and schools were flourishing under the princes of the Captivity, and except for a short space of time immediately after the conquest of the Parthians by the neo-Persians, and during the ephemeral rule of Odenathus at Palmyra, they enjoyed quiet and independence. The condition of the Jews in Arabia and China, at this time, is not known with any degree of certainty.

(6) Christian Emperors and Barbarian Kings (320-628)

The accession of Christianity to the throne of the Cæsars by the conversion of Constantine, opens a new era in the history of the Jews. The equality of rights to which the pagan emperors had admitted them was gradually restricted by the head of the Christian State. Under Constantine (306-337), the restrictions were few in number, and due to his interest in the welfare of his Christian subjects and in the promotion of the true religion. He made the passage from Christianity to Judaism a penal offence; prohibited the Jews from circumcising their Christian slaves; protected converts from Judaism against the fiery vengeance of their former coreligionists; but never deprived them of their citizenship, and never went beyond constraining them -- with the exception of their rabbis -- to take upon themselves certain public offices which had become particularly burdensome. These laws were re-enacted and made more severe by his son Constans I (337-350), who attached the death penalty to marriages between Jews and Christians. The severity of these and other laws of Constans was but too fully justified by the dreadful excesses of the Jews in Alexandria, and by their temporary revolt in Judea. The accession of Julian the Apostate, in 361, made a new diversion in their favour. This emperor decreed the rebuilding of the Temple on Mt. Moria and the full restoration of Jewish worship, apparently with a view to secure the influence

of the Mesopotamian Jews in his expedition against the Persians. The Jews were triumphant, but their triumph was short-lived; sudden flames burst forth from Mr. Moria and rendered impossible the rebuilding of the Temple; Julian perished in his Persian War, and his successor, Jovian (363-364), reverted to Constans' policy. The next emperors, Valens and Valentinian, reinstated the Jews in their former rights, except, however, the exemption from the public services. Under Gratian, Theodosius I, and Arcadius, they likewise enjoyed the protection of the Throne; but under Theodosius II (402-450), emboldened by their long immunity from persecution, they manifested a spirit of intolerance and crime which led to violent tumults between them and the Christians in various parts of the Eastern Roman Empire, and apparently also to the prohibition of building new synagogues and from discharging any state employment. It was under Theodosius II that the patriarchate of the West, then held by Gamaliel VI, came to an end (425). Some time before (c. 375), the Jerusalem Talmud was finished, a work which, however important for Judaism, is less complete, in regard to both its Mishna and its Gemara, than the Babylonian Talmud, the compilation of which was terminated by the heads of the Babylonian schools about 499, despite the violent persecutions of the Persian kings, Jezdijird III (440-457) and Firuz (457-484). The immediate result of Firuz's persecution was the emigration of Jewish colonists in the south as far as Arabia, and in the east as far as India where they founded a little Jewish state on the coast of Malabar which lasted till 1520. Under Qubad I, Firuz's son and successor, the prince of the Captivity, Mar-Zutra II, managed to maintain for seven years an independent Jewish state in Babylonia; but in 518, the Byzantine successors of Theodosius II enforced his anti-Jewish laws with great rigour, and, as a result, the intellectual life and former jurisdiction of the Judean Jews became virtually extinct.

In the West the Jews fared decidedly better during the fifth century than in the East. They of course suffered many evils during the invasions of the northern barbarians who flooded the Western Empire after its permanent separation in 395 from the Eastern Empire of Constantinople. In the midst of the political convulsions naturally entailed by these invasions, the Jews gradually became the masters of the commerce, which the conquerors of the Western Empire, addicted to the arts of war, had neither time nor inclination to pursue. In the various states which soon arose out of that dismembered empire, the numerous Jewish colonies do not seem for a long time to have been subjected to restrictive measures, except in connection with their slave trade. The Vandals left them free to exercise their religion. They were justly treated in Italy, by the kings of the Ostrogoths, and by the Roman pontiffs; in Gaul, by the early Merovingians generally; and in Spain, by the Visigoths down to the conversion of King Recared to Catholicism (589), or rather down to the accession of Sisebut (612), who, deploring the fact that Recared's anti-Jewish laws had been little more than a dead letter, resolved

at once to enforce them, and in fact added to them first the injunction that the Jews should release the slaves in their possession, and next, that they should choose between baptism and banishment. Anti-Jewish legislation was framed at a much earlier date in the Frankish dominions. Hostility towards the Jews showed itself first in Burgundy, under King Sigismund (517), and thence it spread over the Frankish countries. In 554, Childebert I of Paris forbade them to appear on the street at Eastertide; in 581, Chilperic compelled them to receive baptism; in 613, Clotaire II sanctioned new decrees against them; and in 629, Dagobert bade them choose between baptism and expulsion. Thus the laws against the Jews both in Spain and in France reached gradually a degree of severity unknown even to such Eastern persecutors of Judaism as Justinian I (527-565) and Heraclius (610-641). Yet, the edicts of these Byzantine emperors were vexatious enough. In fact, Justinian's decrees so exasperated the Palestinian Jews that despite the persecutions of their Mesopotamian fellow-Jews by the Persian kings, Jusrau I (531-579), Hormizdas IV (579-591), and Kusrau II (590-628), they seized the first opportunity to avenge themselves by siding with Kusrau II in his war against Heraclius. During the Persian invasion and occupation of Palestine, they committed dreadful excesses against the Christians, which finally met with a merited punishment in the persecution which Heraclius, again master of Judea, started against them.

(7) The Mohammedan Ascendancy (628-1038)

The rise of Mohammedanism, with whose power the Arabian Jews came in contact when it was yet in its infancy, marks the beginning of a new period in Jewish history. Several centuries before Mohammed's birth (c. 570), the Jews had effected important settlements in Arabia, and in the course of time, they had acquired a considerable influence upon the heathen population. In fact, it is certain that at one time, there existed in Southern Arabia (Yemen), an Arab-Jewish kingdom which was brought to an end in 530 by a Christian king of Abyssinia. But although they had lost their royal estate, the Arabian Jews were still numerous and powerful, in the Hedjaz, north of Yemen. There was indeed but a small Jewish population in Mecca, Mohammed's birthplace; yet it is probable that contact with the Jews of that city was one of the means by which the founder of Islam became acquainted with Judaism, its beliefs, and its Patriarchs. This acquaintance became naturally closer after the Hegira (Flight) of Mohammed (622) to Medina, the chief centre of the Arabian Jews. To win the Israelites to his cause, the "prophet" made various concessions to their religion and adopted some of their customs. As this was useless, and as the Jews were a constant menace to his cause, he resolved to get rid of their tribes one after another. He first put an end to the Jews in the vicinity of Medina, and next (628) subjected those of the district of Khaibar and of Wadi al-Kura to an annual tribute of half the produce of the soil. After Mohammed's death (A.D. 632), Caliph Abu-Bekr tolerated the Jewish remnant in Khaibar and al-

Kura; but this toleration ceased under Omar, the prophet's second successor. During Omar's short caliphate (634-644), Syria, Ph nicia, Persia, Egypt, and Jerusalem fell under the sway of Islam. The Jews were fairly well treated by their new masters. Omar's so-called "Covenant" (640) imposed indeed restrictions upon Jews in the whole Mohammedan world, but these restrictions do not seem to have been carried out during his lifetime.

In return for the valuable assistance of the Babylonian Jews in Omar's campaigns against Persia, this caliph granted them several privileges, among which may be mentioned the recognition of their exilarch Bostanaï (642). Under Islam's fourth caliph, Ali (656-661), the Jewish community of Irak (Babylonia) became more fully organized and assumed the appearance of an independent state, in which the Talmudic schools of Sora and Pumbeditha flourished again. The exilarch and the head of the school of Sora, with his new name of Gaon (658), were of equal rank. The former's office was political, the latter's distinctly religious. The exilarch, both in bearing and in mode of life, was a prince. Thus it came to pass that the Jews scattered through the Mohammedan world persuaded themselves that in Abraham's own country there survived a prince of the Captivity who had regained the sceptre of David. For them, the heads of the Babylonian schools were the representatives of the ideal times of the Talmud. The farther the dominion of the Ommiads (661-750) was extended, the more adherents were gained for the Jewish Babylonian chiefs. The great liberty which the Jews enjoyed under Islam's rule allowed them to cultivate Paitanism or neo-Hebraic poetry and to begin their Massoretic labours (see Massora).

Meantime, their fellow-Jews were less fortunate in Spain, where most rulers of the seventh century enacted severe laws against Judaism. Towards the end of that century, Egica forbade them to own lands and houses, to repair to or trade with North Africa, and even to transact business with Christians. Having next discovered a plot of the Jews with the Moors to overthrow the Visigothic rule, he sentenced to slavery all the Jews of his states and ordered that their children of seven years and upwards be given to Christians to be educated. This condition of things came to an end under Roderic, Egica's second successor and last Visigothic King of Spain. With numerous Jews in their army, the Mohammedans crossed from Africa into Andalusia, defeated and slew Roderic (July, 711); Spain was gradually conquered; and in 720, the Saracens occupied Septimania, north of the Pyrenees, a dependency of the Gothic Kingdom. In Mohammedan Spain, the Jews, to whose help the conquerors largely owed their victories, obtained their liberty. In fact, it was now given to the Jews at large to enjoy a long period of nearly unbroken peace and security. Apart from the persecutions started in 720 by the Caliph of Damascus, Omar II, and in 723 by the Byzantine emperor, Leo III, they prospered everywhere till about the middle of the ninth century. It was during

this period that the great Kingdom of the Chazars, which was situated west of the Caspian Sea, and had caused the Persians to tremble, embraced Judaism (c. 745); its rulers remained exclusively Jewish above two centuries and a half. After the caliphs of the Omniad dynasty, one of whom had a Jew as his mint-master, those of the Abassides, till after Harun al-Rashid (d. 809), do not seem to have seriously disturbed their Jewish subjects; during that time, the Babylonian Talmudic schools were crowded with hearers, and had it not been for their internal dissension, religious (Karaites) and political (contests for the dignity of exilarch), the Jews of Babylon would have been as happy as they were renowned for their learning. In Mohammedan Spain (with its separate Caliphate of Cordova since A.D. 756), the Jews were undoubtedly prosperous during the century now under review, although details concerning their condition during that time are actually wanting. In France, the Jewish population was not submitted to any serious restrictions under either Pepin (752-768) or Charlemagne (764-814), while under Louis I (814-840) it even enjoyed special favours and privileges, the king having for his confidential adviser his Jewish physician name Zedekiah, and actively protecting Jewish interests against powerful opponents.

Thus, with the exception of a passing persecution under the two sons of Harun al-Rashid, the Jews were left unmolested for about 100 years. But with the middle of the ninth century, and nearly everywhere, this ceases to be the case. In the East, Jewish persecutions were resumed by the Byzantine emperors of the Macedonian dynasty (842-1056), and by the Abasside Caliph al-Motawakel, who, in 853, re-enacted the Covenant of Omar, and under whose successors in the Caliphate of Bagdad, the Jewish community of Irak lost more and more of its prestige and was supplanted in this respect by that of Spain: the exilarchate gradually ceased to be an office of the State and finally perished (c. 940), owing chiefly to the dissensions between the Gaons of Sora and Pumbeditha; and the Gaonate itself, for a while made famous by Saadiah, ultimately disappeared through the oppression of the weak caliphate (c. 1038). Under the Fatimite dynasty of caliphs (909-1171), whose rule extended over North Africa, Egypt, and Syria, the Jews were worse off still. About the middle of the tenth century, the Jewish Kingdom of the Chazars was destroyed by the Russians. In the West, the lot of the Jews was also that of a despised and persecuted race. Charles the Bald (840-877) protected them effectively, it is true, but his weak Carlovingian successors and the early Capetians lacked sufficient authority for doing so. In Italy, as early as 855, Louis II ordered the banishment of all Italian Jews, and his order failed to have the intended effect only because of the distracted condition of the realm at the time. In Germany, where "Jew" was synonymous with "merchant", the emperors were long satisfied with exacting a special tax from their Jewish subjects; but finally Henry II (1002-1024) ex-

pelled from Mainz the Jews who refused to be baptized, and it is probable that his decree was applied to other communities.

Spain (Navarre, Castile, and Leon) also persecuted the Jews, although towards the end of the tenth century, its rulers placed them in many respects on an equality with the rest of the population. In Mohammedan Spain, however, the Jewish race was politically and religiously free. Under such patrons of science and art as the Ommiad caliphs, Abd-er-Rhamman III (d. 961), Al-Hakem (d. 976), and the regent Al-Mansur (d. 1002), the Jews greatly increased in Moorish Spain, and became famous for learning as well as for commercial and industrial activity. The Talmudic schools of Cordova, Lucena, and Granada took the place of those of Sora and Pumbeditha, under the high patronage of the Jewish statesmen Hasdai, Jacob Ibn-Jau, and Samuel Halevi. During this period, an Arabic translation of the Mishna was made in Spain by Ibn-Abitur, and the first commentaries on the Talmud were composed at Mainz by Gershom ben Juda (d. 1028).

(8) Era of the Crusades (1023-1300)

In many respects, Mohammedan Spain owed a great deal to its Jewish population; yet, in 1066, the Jews were expelled from the Kingdom of Granada. In many ways, too, the young kingdoms of Christian Spain were indebted to their Jewish inhabitants; nevertheless, Ferdinand the Great subjected them to vexatious measures and was only prevented from drawing the sword against them by the intervention of the Spanish clergy. These, however, were but passing storms; for Alfonso VI (1071-1109) soon freely used Jews in his diplomatic and military operations, while in the Mohammedan states distinct from Granada, Jewish culture reached the zenith of its splendour. The era of Jewish persecutions really began with the First Crusade (1096-1099). The crusaders enacted in May-July, 1096, bloody scenes against the Jews of Trier, Worms, Mainz, Cologne, and other Rhenish towns, and repeated them as they went along in the cities on the Main and the Danube, even as far as Hungary, bishops and princes being mostly on the side of the victims, but proving, for various reasons, powerless to protect them effectively. On the capture of Jerusalem, 15 July, 1099, the crusaders wreaked a frightful vengeance on the Jews of the fallen city.

The interval between the First and the Second Crusade was a time of respite and recuperation for the Jewish race. In England, in Germany, and even in Palestine, they were left unmolested; while in Spain and in France, they attained to a high degree of prosperity and influence, and actively pursued literary and Talmudic studies under the guidance of Juda Halevi and the sons of Rashi. Yet, in 1146, on the eve of the Second Crusade, there began against them the violent persecution of the Almohades in Northern Africa and Southern Spain which brought about the speedy ruin of the Jewish synagogues and schools and would have resulted in the practical annihilation

of the Jews of Mohammedan Spain had not most of them found a refuge in the Christian dominions of Alfonso VIII (d. 1157). Then came the Second Crusade (1147-1149) with its atrocities against the Jews in Cologne, Mainz, Worms, Speyer, and Strasburg, despite the protestations of St. Bernard and of Eugenius III, and the efforts of the German prelates and the Emperor Conrad III in their behalf; and with its most deplorable result, namely the greater enslavement of the German Jews to the Crown. The next fifty years were, on the whole, for the Jewish race a period of peace and prosperity; in Spain, where Juda Ibn-Ezra was steward of the palace to Alfonso VIII; in Mesopotamia, where Mohammed Almuktafi revived the dignity of exilarch; in the Two Sicilies, where the Jews had equal rights with the rest of the population; in Italy, where Pope Alexander II was favourable to them, and the Third Lateran Council (1179) passed decrees protecting their religious liberty; in England and its French provinces, where the Jews were very flourishing under Henry Plantagenet (c. 1189); in France itself, where under the kind rule of Louis VI and Louis VII (1108-1180) they greatly prospered in every direction. And yet, in some of these countries there was a deep-seated hatred of the Jewish race and its religion. It manifested itself in 1171 when the Jews of Blois were burned on the charge of having used Christian blood in their Passover, and it allowed Philip Augustus in the year of his accession (1180) to decree the confiscation of all the unmovable goods of his Jewish subjects and their banishment from his domains.

This feeling showed itself particularly on the occasion of the Third Crusade (1189-1192). The Jews were massacred on the day of the coronation of Richard I (3 Sept, 1189) and soon afterwards in several English towns (1190). About the same time, crusaders murdered them at different places from the district of the Rhine to Vienna. When again in 1198 a new crusade (1202-1204) was preached, many barons of northern France got released from their debts to Jewish creditors, and then drove them out of their dominions. Philip Augustus received indeed the exiles in his own territory, but he was chiefly actuated by covetousness. The Jews appealed to Innocent III to curb the violence of the crusaders; and in answer, the pontiff issued a Constitution which rigorously forbade mob violence and forced baptism, but which apparently had little or no effect.

The year 1204, in which closed the Fourth Crusade, marked the beginning of still heavier misfortunes for the Jews. That very year witnessed the death of Maimonides, the greatest Jewish authority of the twelfth century, and the first of the many efforts of Innocent III to prevent Christian princes from showing favour to their Jewish subjects. Soon afterwards, the Jews of southern France suffered grievously during the war against the Albigenses which ended only in 1228. In 1210, those of England were ill-treated by King John Lackland and their wealth confiscated to the Exchequer. Next,

the Jews of Toledo were put to death by crusaders (1212). The conciliar legislation of the time was generally unfavourable to the Jews, and it culminated in the anti-Jewish measures of the Fourth Council of the Lateran (1215), among which may be mentioned the exclusion of Jews from all public offices, and the decree that they should wear a Jew badge. Besides being thus legislated against, the Jews were divided amongst themselves with regard to the orthodoxy of the writings of Maimonides. Gradually, the Lateran decrees against them were enforced wherever this was possible, and active persecutions from kings and crusaders were started, the rulers of England being particularly conspicuous for their extortions of money from their Jewish subjects.

In many places, the severity of the Lateran decrees was outdone, so that in 1235 Gregory IX felt called upon to confirm the Constitution of Innocent III, and in 1247 Innocent IV issued a Bull reprobating the false accusations and various excesses of the time against the Jews. Writing to the bishops of France and of Germany the latter pontiff says:

Certain of the clergy, and princes, nobles and great lords of your cities and dioceses have falsely devised certain godless plans against the Jews, unjustly depriving them by force of their property, and appropriating it themselves; . . . they falsely charge them with dividing up among themselves on the Passover the heart of a murdered boy. . . . In their malice, they ascribe every murder, wherever it chance to occur, to the Jews. And on the ground of these and other fabrications, they are filled with rage against them, rob them of their possessions without any formal accusation, without confession, and without legal trial and conviction, contrary to the privileges granted to them by the Apostolic See. . . . They oppress the Jews by starvation, imprisonment, and by tortures and sufferings; they afflict them with all kinds of punishments, and sometimes even condemn them to death, so the Jews, although living under Christian princes, are in a worse plight than were their ancestors in the land of the Pharaohs. They are driven to leave in despair the land in which their fathers have dwelt since the memory of man. . . . Since it is our pleasure that they shall not be disturbed, . . . we ordain that ye behave towards them in a friendly and kind manner. Whenever any unjust attacks upon them come under your notice, redress their injuries, and do not suffer them to be visited in the future by similar tribulations.

The protestations of the Roman pontiffs do not seem to have been much heeded in the Christian states generally. In 1254, nearly all the French Jews were banished by St.

Louis from the king's domains. Between 1257 and 1266, Alfonso X of Castile compiled a code of laws which contained several clauses against the Jews and countenanced the blood accusation which had been contradicted by Innocent IV. During the last years of Henry III (d. 1272), the Jews of England fared worse and worse. About this time, Pope Gregory X issued a Bull ordaining that no injury be inflicted upon their persons or their property (1273); but the popular hatred against them on the charge of usury, use of Christian blood at their Passover, etc., could not be restrained; and the thirteenth century which had witnessed their persecution in all parts of Christendom, except Austria, Portugal, and Italy, closed with their total expulsion from England in 1200, under Edward I, and their carnage in Germany in 1283 and 1298. During the same period, public disputations had been resorted to but with little success for the conversion of the Jews. Further light on the severity of measures enacted by popes or councils concerning the Jews, as well on the motives of popular prejudice and hatred, will be found below, under section JUDAISM: (4) Judaism and Church Legislation.

(9) Last Part of the Middle Ages (1300-1500)

At the beginning of the fourteenth century, Jewish rabbis were divided concerning the value of the Zohar, the sacred book of the Kabbalists (see KABBALA), which Moses of Leon had recently published. A still deeper division prevailed among them with regard to the cultivation of Aristotle's philosophy and the humanistic sciences and literature, and it resulted in 1305 in a public ban on the part of several Jewish leaders against the study of science. The next year (1306), Philip IV plundered and expelled all the French Jews, some of whom travelled as far as Palestine to enjoy there freedom under the rule of the mameluke sultan, Nassir Mohammed (d. 1341), while most remained on the border of France, thinking that the royal avarice which had caused their banishment would bring about their early return. Meantime, their coreligionists of Castile narrowly escaped the carrying out of stringent measures against their own rights and privileges (1313). The banished French Jews were actually recalled in 1315 by Louis X, and admitted for twelve years. But as early as 1320, there arose against them the bloody persecution of some 40,000 *pastoureaux* who pretended to be on their way to the recovery of the Holy Sepulchre. In 1321, the Jews were accused by the lepers of having poisoned the wells and rivers, whereupon a new persecution ensued. The same year, owing to intrigues against them, the Jews of Rome, then very flourishing in society and literature, would have been expelled from Roman territory by John XXII who resided in Avignon, had it not been for the timely intervention of Robert of Anjou, Vicar-General of the Papal States. In Castile, where the Jews possessed great influence with Alfonso XI (1312-1350), the various plans against them actually failed, and the king showed himself favourable to them till the day of his death. Their enemies were more successful in Navarre on the occasion of the war of independence which this

province waged against France. As the Jews were apparently in the way of the secession, they were subjected to a violent persecution during the course of the war (1328), and to oppressive measures after Navarre had become a separate kingdom.

In Germany, they fared still worse during the riots and the civil wars under Louis IV (1314-1347). For two consecutive years (1336, 1337), the Armleder, or peasants wearing a piece of leather wound around arm, inflicted untold sufferings upon the Jewish inhabitants of Alsace and the Rhineland as far as Swabia. In 1337, also, on the charge of having profaned a consecrated Host, the Jews of Bavaria were subjected to a slaughter which soon extended to those of Bohemia, Moravia, and Austria, although Benedict XII had issued a Bull promising an inquiry into the matter. Besides, Louis IV, who always treated his Jewish subjects as mere slaves, subjected them (c. 1342) to a new and most onerous poll-tax. Greater Jewish massacres occurred in 1348-1349 while the fearful scourge, known as the "Black Death", desolated Europe. The report that the Jews had caused the scourge by poisoning the wells used by Christians, spread rapidly and was believed in most towns of Central Europe, despite the Bulls issued by Clement VI in July and September, 1348, declaring their falsity. Despite the fact, too, that the same pontiff had solemnly ordered that Jews be not forced into baptism, that their sabbaths, festivals, synagogues, and cemeteries be respected, that no new exactions be imposed on them, they were plundered and murdered in many countries of Central and Northern Europe. The next years were, on the whole, a period of respite from persecution for the Jewish race. In Castile, the Jews attained to a great influence under Don Pedro (1360-1369), and the misfortunes which then befell them arose partly from the prevalent view that they availed themselves of their power to lap up the people's possessions with their tax-farming, and partly from their constant loyalty to Don Pedro's cause, during the civil war which broke out between him and Don Henry. The latter, after reaching the throne, showed himself friendly to the Jews, and agree only reluctantly to some of the restrictive measures urged by the Cortes in 1371. In Germany, they were readmitted as early as 1355 into the very towns which had sworn that for 100 or 200 years no Jew should dwell within their walls.

In France, they were granted special privileges by King John (1361), which they enjoyed to the full extent under his successor, Charles V (1364-1380). But the last twenty years of the fourteenth century were again disastrous for the European Jews. In France, scarcely was Charles V dead, when popular riots were started against them because of their extortionate usury and encouragement to baptized Jews to recant, and finally brought about the permanent exile of the Jewish population (1394). In Spain, the reign of John I (d. 1390) witnessed a great curtailing of the Jews' power and privileges; and that of Henry III (d. 1406) was marked by bloody assaults in many cities of Castile and Aragon and even in the island of Majorca, on account of which numerous

Jews embraced Christianity. In Germany (1384), and in Bohemia (1389, 1399), the Jews were likewise persecuted. Boniface IX had protested, but in vain, against such outrages and slaughters (1389); and it is only in his states, in Italy, and in Portugal, that the Jewish race had any measure of peace during these years of carnage.

At the beginning of the fifteenth century, the Jews enjoyed some manner of respite in nearly all the countries where they had been allowed to stay or whither they had fled from persecuting France and Spain. But these peaceful days did not last long. As early as 1408, there appeared in the name of the infant King of Castile, John II, an edict which revived the dormant anti-Jewish statutes of Alfonso X; and soon afterwards (1412), a severer edict was issued, intended to isolate the Jews from the Christians lest intercourse should injure the true Faith, and calculated to induce them to give up their religion. In fact, degraded in every way, parked in "Juderias", and deprived of practically every means of subsistence, many Jews surrendered to the exhortations of St. Vincent Ferrer, and received baptism, while the others persevered in Judaism and saw their misery somewhat alleviated by the royal edict of 1414. The persecution gradually extended to all the provinces of Spain, where St. Vincent also effected many conversions. At length, brighter days dawned for the Spanish Jews upon the death of Ferdinand, King of Aragon (1416) and of Catherine, Regent of Castile (1419), and upon the publication of the following solemn declaration of Martin V (1419), in their behalf: "Whereas the Jews are made to the image of God, and a remnant of them will one day be saved, and whereas they have besought our protection: following in the footsteps of our predecessors we command that they be not molested in their synagogues; that their laws, rights, and customs be not assailed; that they be not baptized by force, constrained to observe Christian festivals, nor to wear any new badges, and they be not hindered in their business relations with Christians." But then began new persecutions against the Jewish population of Central Europe. In their distress, the Austrian and the German Jews appealed to the same pontiff who, in 1420, also raised his voice in their favour, and who, in 1422, confirmed the ancient privileges of their race. Nevertheless, the Jews of Cologne were expelled in 1426, and those of several towns of southern Germany burned on the old blood accusation (1431). To add to their misfortune, the Council of Basle renewed the old and devised new restrictive measures against the Jews (1434); the unfavourable Archduke of Austria, Albert, became Emperor of Germany (1437-1439); and the new pope, Eugenius IV (1431-1447), at first well-disposed towards them, showed himself by this time less friendly to them.

Meantime, the Jewish communities of Castile prospered under John II, who promoted several Jews to public offices, and who in 1432 confirmed the statute of the Jewish Synod of Avila prescribing the establishment of separate schools. In the course of time, however, Spanish Christians complained to the pope of the arrogance of the

Castilian Jews, and, in consequence, Eugenius IV issued an unfavourable Bull (1442) which greatly reduced Jewish prosperity and influence in Spain, and which was practically repeated in 1451 by Nicholas V (1447-1455). This pontiff was distinctly opposed to mob violence against the Jews, and he enjoined upon the Inquisitors of the Faith not only to refrain from exciting the popular hatred against them, but even to see that they should not be forcibly baptized or otherwise molested. And yet, under Nicholas V, severe persecutions befell the Jews of Central Europe, and their fugitives found a friendly refuge almost exclusively in the new Turkish Empire started by Mohammed II, the conqueror of Constantinople in 1453. The German emperor, Frederick III, was weak and vacillating, so that practically down to the end of his reign (1493), the Jews remaining in Central Europe were repeatedly subjected to miseries and humiliations. The Jews of Italy fared better during the same period, owing to the fact that the flourishing republics of Venice, Florence, Genoa, and Pisa appreciated and needed them as capitalists and diplomatists; and it is worthy of notice that the Italian Jews were very prompt in availing themselves of the newly invented art of typography. In Spain, also, the Jewish population lived in comparative peace and comfort under Henry IV of Castile (1454-1474) and John II of Aragon (1458-1479), for, apart from a few popular riots directed against the Jews, the persecution then prevailing in Spain fell upon the "Maranos", or forcibly converted Jews, for whose ambition or weakness Christianity was but a mask. Even after Ferdinand II and Isabella had united Castile and Leon under one sceptre (1479), the Jews remained undisturbed -- except in Andalusia -- until the fall of Granada, protected as they were by Isaac Abrabanel, the ruler's Jewish minister of finance. But the conquest of the rich Kingdom of Granada apparently led Ferdinand and Isabella to regard the Spanish Jews as no longer indispensable, as in fact out of place in their estates, which they wished altogether Christian. Without the approval of Innocent VII, the decree appeared (1492) banishing all Jews from Spain, and it was carried out despite Abrabanel's supplication and offer of an immense sum of money.

Great indeed were the misfortunes which befell the impoverished Jewish exiles. In Navarre, they had ultimately to choose between expulsion and baptism. In the African seaports, when allowed to land, they were decimated by plague and starvation. On the Genoese ships, they were submitted to the most brutal treatment, and those who landed near Genoa reduced to starve or give up Judaism. In Rome, their fellow-Jews offered 1000 ducats to Alexander VI to prevent their admission, an offer which was indignantly refused. In Naples, they were compassionately received by Ferdinand I, but also carried off in numbers by the pestilence which broke out among them. In Portugal, John II tolerated them only eight months, after which all remaining were made slaves. It is true that John's successor, Emmanuel (1495-1521), at first freed those enslaved Jews; but he finally signed in December, 1496, the decree expelling from

Portugal all Jews who would refuse to be baptized, and in 1497 had it carried out. The country where the Spanish refugees were most hospitably received was Turkey, then ruled over by Bajazet II.

(10) Modern Period (1500-1700)

These expulsions of the Jews gave rise in the sixteenth century to the important division of the European Jews into "Sephardim" (Spanish and Portuguese Jews) and "Askenazim" (German and Polish Jews), thus called from two Biblical words connected by medieval rabbis with Spain and Germany respectively. Wherever they settled, the Sephardim preserved their peculiar ritual and also their native refinement of dictions, manners, dress, etc., which stood in striking contrast with those of the Askenazim and secured for them an influence which the latter did not exercise despite their closer acquaintance with the Talmud and greater faithfulness to ancestral virtues and traditions. Thus were formed two deep currents of Judaism requiring to be treated separately during the modern period of Jewish history. In Italy, the Sephardim found a refuge chiefly in Rome, Naples, Florence, and Ferrara, where they were soon rejoined by numerous Maranos of Spain and Portugal who again professed Judaism. In Naples, they enjoyed the high protection of Samuel Abrabanel, a wealthy Jew who apparently administered the finances of the viceroy, Don Pedro of Toledo. In Ferrara and Florence, Jews and Maranos were well treated by the respective rulers of these cities; and even in Venice, which considered the expediency of their expulsion lest their presence should injure the interest of native merchants, they were simply confined to the first Italian Ghetto (1516). The early Roman pontiffs of the sixteenth century had Jewish physicians and were favourable to the Jews and the Maranos of their states. Time soon came, however, when the Sephardic Jews of Italy fared differently. As early as 1532, the accusation of child murder nearly entailed the extermination of the Jews of Rome. In 1555, Paul IV revived the ancient canons against the Jews which forbade them the practice of medicine, the pursuit of high commerce, and the ownership of real estate. He also consigned them to a Ghetto, and compelled them to wear a Jew badge. In 1569, Pius IV expelled all the Jews from the Pontifical States, except Rome and Ancona. Sixtus V (1585-1590) recalled them; but, soon after him, Clement VIII (1592-1605) banished them again partially, at the very moment when the Maranos of Italy lost their last place of refuge in Ferrara. Similar misfortunes befell the Jewish race in other states of Italy as the Spanish domination extended there: Naples banished the Jews in 1541; Genoa, in 1550; Milan, in 1597. Henceforward, most Sephardic fugitives simply passed through Italy when on their way to the Turkish Empire.

During the whole present period, Turkey was, in fact, a haven of rest for the Sephardim. Bajazet II (d. 1512) and his immediate successors fully realized the services which the Jewish exiles could render to the new Mohammedan empire of Con-

stantinople, and hence welcomed them in their states. Under Selim II (1566-1574), the Marano Joseph Nassi, become Duke of Naxos and the virtual ruler of Turkey, used his immense power and wealth for the benefit of his coreligionists, at home and abroad. After Nassi's death, his influence passed partially to Aschkenazi, and also to the Jewess Esther Kiera who played a most important role under the Sultans Amurath III, Mohammed III, and Achmet I. During the remainder of the period, the Jews of Turkey were generally prosperous under the guidance of their rabbis. Their communities were spread throughout the Ottoman Empire, their most important centres being Constantinople and Salonica in European Turkey, and Jerusalem and Safed in Palestine. It is true that the Turkish Jews of the period were repeatedly disturbed by the appearance of such false Messiahs as David Rubeni, Solomon Molcho, Lurya Levi, and Sabbatai Zevi; but the public authorities of Turkey took no steps to punish the Jews who shared in such Messianic agitations. The country in which, next to Turkey, the Sephardim fared best, was Holland. The origin of their settlements in the Netherlands is chiefly due to the immigration of Portuguese Maranos who, under Emmanuel's successors, were repeatedly subjected to the terrors of the Inquisition despite the laudable efforts of several popes in their behalf, and who, after the conquest of Portugal by Philip II of Spain, in 1580, reached Holland, now in full revolt against the Spanish domination. Their first congregations of 1593 and 1598 in Amsterdam were acceptable to the city authorities who saw in the new-comers a means of extending Dutch commerce, and who, in 1619, allowed the public exercise of Jewish worship under liberal conditions. During the seventeenth century, the Amsterdam Jews contributed actively to the home and foreign prosperity of their adopted country. They greatly increased in numbers by new accessions of Portuguese Maranos, and established communities in Hamburg, in Guiana, and in Brazil. It was also in Amsterdam that the movement originated for a legal re-establishment of the Jews in England from which Jews had been strictly excluded since 1290. Oliver Cromwell, protector of the realm (1653-1658), was personally in favour of the movement, and he actively seconded the skilful pleadings of Manasses ben Israel, the leading rabbi of Amsterdam, for that purpose. Cromwell, however, did not dare openly to bring about a change generally hateful to the English clergy and nation. Under Charles II (d. 1685), the Jews stole insensibly into the kingdom, where they have ever since maintained their footing. The chief difficulties of the Sephardim in Holland were of an internal order: their rabbis used rather freely the power of excommunication, one of the victims of which was the celebrated Spinoza (1656); and the majority of the Jewish population of Amsterdam was more or less seriously disturbed, about this time, by the Messianic pretensions of Sabbatai Zevi.

During the sixteenth and seventeenth centuries, the Askenazim or German Jews were less fortunate than their Sephardic contemporaries. Their general condition re-

mained much the same as during the preceding period. It is often, but wrongly, asserted that the invention of printing, the revival of learning, and the Protestant Reformation were beneficial to the Jews. When, early in the sixteenth, century, the German Jews began to use the printing press for their own literature, sacred or otherwise, the Emperor Maximilian (d. 1519) was urged to order all Hebrew books to be burned, and but for the strenuous exertions of Reuchlin, the burning of the Talmud would have taken place. "That the Reformation itself had nothing to do with the subsequent ameliorations in the conditions of the Jews, is plain from the fact that in many parts of Germany, Protestant as well as Catholic, their lot became actually harder than before" ("The New Inter. Cyclop.", vol. X, New York, 1903). Luther himself, towards the end of his life, was their greatest opponent.

He poisoned the Protestant world for a long time to come, with his Jew-hating testament. Protestants became even more bitter against Jews than Catholics had been. The leaders of Catholicism demanded absolute submission to canonical law; but on that condition granted them permission to remain in Catholic countries; Luther, on the other hand, required their absolute expulsion. . . . It was reserved for him to place Jews on a level with Gypsies. . . . He was the cause of their being expelled by Protestant princes. (Grätz)

In general, the emperors of the period acted with equity towards their Jewish subjects. At times, however, they expelled them from their crown lands, or connived at their banishment from other places. During the Thirty Years' War, Ferdinand II (d. 1638) treated the Jews with great consideration, and required his generals to spare them from the hardships of the war. Under him and under his son, the Jewish community of Vienna was particularly flourishing; but this prosperity ended abruptly under Leopold I (1657-1705), and although about 1685 some Jews succeeded in stealing into Vienna, Leopold's decree of exclusion was formally repealed only much later. The chief place of refuge for the Askenazim of Germany, Austria, and Bohemia was at this time the Kingdom of Poland, where the Jewish population was remarkably free and prosperous up to the middle of the seventeenth century. In 1648, the Polish Jews began themselves to be persecuted by the Cossacks of the Ukraine who invaded Poland and were victorious in three successive campaigns. They were next subjected to the disastrous invasions of the Russians and the Swedes. It is estimated that within ten years (1648-1658), more than 200,000 Jews were slaughtered in the Polish dominions. In consequence, the surviving Jews of Poland were reduced to a condition of extreme poverty and abjection from which the Polish kings of the second part of the seventeenth century earnestly strove to extricate them. During the period just sketched, Christian scholars began to

cultivate Hebrew under the guidance of Jewish grammarians; Hebrew studies were introduced into German and French universities; and Richard Simon made the learned world acquainted with rabbinical literature.

(11) Recent Times (since 1700)

In dealing with this last period, it will be convenient to narrate briefly the events relative, first to the Jews of the Old world, and next to those of the New. The internal condition of the Jews in the Old World during the first half of the eighteenth century was that of a general demoralization which made them appear all the more disreputable because the recent works of Christian scholars, such for instance, as the history of the Jews by Basnage, had forcibly directed the attention of the learned world towards them. They were not indeed subjected to the wholesale massacres of former days, but they remained in the eyes of all a despised race liable to all kinds of disabilities. In Sweden, they were allowed (1718) to enter the kingdom under unfavourable conditions; in France, new restrictions were imposed on their settlements (1718) at Metz and Bordeaux; in Prussia, the laws of Frederick William I (1714, 1730) breathed a spirit of great intolerance against them; at Naples, the concessions made to the Jews by Charles III, in 1740, were soon revoked; in Austria, charges that they were in league with the country's enemies during the War of the Austrian Succession were readily believed, led to bloody riots against them, wellnigh entailed (1745) under Maria Theresa their perpetual expulsion from Bohemia and Moravia, and caused the Jews of Prague to be placed under the most severe restrictions; in Russia, Catherine I (1727) took active measures against the Ukraine Jews and banished the Jewish population from Russia. Anna Ivanowa (1739) decreed their expulsion from Little Russia, and Elizabeth (1741-1762) harshly enforced anti-Jewish measures; and finally, in England, the Jews were simply tolerated as aliens, and a naturalization act, which was passed by both Houses and ratified by George II (1753), was actually repealed (1754) owing to the nation's opposition to it.

Gradually, however, a number of circumstances lessened this spirit of hostility against the Jews. Among these circumstances may be particularly mentioned: (a) the vast influence exercised by Moses Mendelssohn (1729-1786), who, by his literary attainments and his strong personality, proved to the world that his race could produce men worthy of admittance into the highest society, and showed to his fellow-Jews the way to remove prejudices against them; and (b) the vigorous defence of the Jews by the Christian writer Dohm, who, in his work "Upon the Amelioration of the Condition of the Jews", suggested many practical measures which Joseph II of Austria partly accepted in 1781, when he abolished the Jewish poll-tax and granted civil liberties to the Jews. Under these, and other such circumstances, a more liberal spirit toward the Jews prevailed in Prussia and in France, where William II and Louis XVI, respectively, ab-

olished the Jewish body tax. It made itself felt also in Russia where Catherine II (1762-1796) even decreed the civil and religious liberty of the Jews, but under whose rule the Russian Senate managed to organize the "Pale of Settlement" or portion of Russia in which Jews are allowed to reside, and to enforce other anti-Jewish measure. It culminated in the decrees of the French Revolution which actually opened the era of Jewish emancipation: in 1790, the French National Assembly granted citizenship to the Sephardic Jews, and, in 1791, it extended full civil rights to all the Jews of the country. With French victories and influence, Jewish liberty naturally followed, and, in 1796, the Batavian National Assembly decreed citizenship for the Jews. Napoleon I summoned in 1806 an assembly of Jewish notables which succeeded in calming his prejudices against the Jews, and in 1807 a Great Sanhedrin, which proved to his satisfaction that the Jewish race may be faithful both to its religion and to the State. Then followed, not without difficulties, yet in rapid succession, the emancipation of the Jews of Westphalia and of Baden (1808), of Hamburg (1811), of Mecklenburg, and of Prussia (1812).

The fall of Napoleon and the consequent period of European reorganization gave a setback to Jewish liberty, especially in Germany, which was for a while the scene of bloody riots against the Jews; but gradually, and nearly everywhere in the Old World, Jewish liberty prevailed. In France, the Jewish rabbis were put, under Louis Philippe (1831), on the same footing with regard to salary as the *curés* of the Catholic Church; in 1846, the oath "More Judaico" was abolished as unconstitutional; and since the wave of anti-Semitism which culminated in the well-known case of Alfred Dreyfus, the Jewish population of the country and of Algiers has not been molested. In England, it was not before 1858 that Parliament was freely opened to the Jews by the suppression of the clause "On the true faith of a Christian" from the oath of office, and not before 1870, that all restrictions for every position (except that of sovereign) in the British Empire were abolished. In northern Germany, the various states allowed civil liberty to their Jewish population in 1848, and after 1870, all restrictions disappeared, although since that time, owing to anti-Semitism, minor disabilities have been publicly enacted or quietly enforced in some parts of the Empire. Denmark enfranchised the Jews in 1849, whereas Sweden and Norway still subject them to certain disabilities. In 1867, the Jews of Austria were emancipated, and in 1895, those of Hungary obtained, moreover, that Judaism be considered as "a legally recognized religion". In Switzerland, after a long and bitter struggle, the Federal Constitution of 1874 granted to the Jews full liberty. In Italy, the Jewish disabilities, revived on the fall of Napoleon I, and the application of which occasioned in 1858 the celebrated Mortara Case, have all been gradually abolished, and Rome, the last Italian place where the Jews were emancipated, elected a Jew, Ernesto Nathan, for its mayor, 10 October, 1908. Spain and Portugal have not yet recognized officially their small Jewish population. The Danubian

provinces of Servia, Bulgaria, and Montenegro, have, in accordance with the Treaty of Berlin of 1878, allowed civil and religious liberty to their Jewish settlers, whereas the province of Rumania, in defiance of the same treaty, has refused it and carried out persecutions which have entailed a very large emigration of Rumanian Jews. Turkish Jews were granted citizenship in 1839; yet, in various parts of the Turkish Empire, there repeatedly occur accusations of ritual and child-murder, which inflame the populace and lead to anti-Jewish riots.

In Palestine, their number is rapidly increasing (there are now 78,000) despite the sultan's restrictions (1888, 1895) concerning the accession of Jewish immigrants in numbers; and agricultural colonies are established in various parts of the land. In Fez and chiefly in Morocco, Jews have still much to fear from the fanaticism of Mohammedans. In Persia, they are at times oppressed, despite the ruler's general goodwill towards them. Their fate has been, and still is, deplorable in Russia where lives nearly one-half of the total Jewish population of the globe. The liberty of trade and commerce granted to them by Alexander I (1801-1825) was replaced, under Nicholas I (1825-1855), by a legislation calculated to diminish their number, to deprive them of their religious and national character, and to render them morally and commercially harmless to Christians. Alexander II (1855-1881) was very favourable to the Jews; but the reaction against them under Alexander III (1881-1894) was of the most intolerant kind. From the promulgation of the Ignatieff law of 1882, the most restrictive measures have been piled up against the Jews, and since 1891 they have been applied with such severity that Russian Jews have emigrated in hundreds of thousands, mostly to the United States. Under the present emperor, Nicholas II, new restrictions have been devised; riots against the Jews occurred in 1896, 1897, 1899, and culminated in the massacres of Kishineff, Homel, etc., from 1903 to 1906, helped in various ways by Russian officials and soldiers; during the year 1909, the persecution took the form of orders of expulsion, and the trials prescribed by the Duma against the organizers and perpetrators of the massacres of some years ago are apparently a farce.

Jews at an early date settled in South America, exiled from Spain and Portugal, or taking part in the Dutch and English commercial enterprises in the New World. Brazil was their main centre. Those found there in the sixteenth century were Maranos who had been sent in company with convicts. They acquired wealth and became very numerous at the beginning of the seventeenth century. They helped the Dutch in wresting Brazil from Portugal (1624), and were joined in 1642 by many Portuguese Jews from Amsterdam. At the end of the Dutch rule over Brazil (1654), most Jewish settlers returned to Holland; some emigrated to French settlements -- Guadaloupe, Martinique, and Cayenne; others took refuge in Curaçao, a Dutch possession; and finally, a small band reached New Amsterdam (New York). After a very few years, those who had

settled on the French islands were compelled to turn to friendly Dutch possessions, and to other places of refuge, notably to Surinam (then belonging to England) where they became increasingly prosperous. The other early settlements of Jews in Mexico, Peru, and the West Indies do not require more than a passing mention. Of much greater importance were those effected chiefly by Sephardim in North America. There were Jews in New Amsterdam as early as 1652; others came from Brazil in 1654. As these were not received in a friendly manner by the governor, Peter Stuyvesant, some of them betook themselves to the Colony of Rhode Island, where they were reinforced in the course of time by contingents from Curaçao (1690) and from Lisbon (1755). The condition of those who had remained at New Amsterdam was, on the whole, fair, for they were sustained by the Dutch home Government; and it remained substantially so after 1664, at which date the British captured New Amsterdam and changed its name to New York. At the end of the seventeenth century there were some Jews in Maryland. The next places of settlement were Pennsylvania (with a large percentage of Askenazim), Georgia, and the Carolinas.

During the War of the American Revolution, the Jews generally took the colonial side; some fought bravely for it; and Haydn Solomon aided the Continental Congress with his money. Following the Declaration of Independence (July, 1776) most of the states of the Union placed all citizens upon an equality, the only notable exception Maryland, in which state all disabilities were removed only in 1826. During the nineteenth century, the Jews spread over all the United States and recently into their possessions, after the Spanish American War (1898), in which some 2000 Jewish soldiers took part. Important congregations have also grown up in the larger cities of Canada, where the Jews possess full civil rights since 1831. From 1830 to 1870, the immigration into the United States came largely from the Rhine Provinces, South Germany, and Hungary. Since 1882, the riots and persecutions in Russia have led to an immense emigration, a small portion of which was directed by Baron von Hirsch to the Argentine Republic, or went to Canada, but the great bulk of which came to the United States. To these have been added numerous Jews from Galicia and Rumania. The total Jewish immigration to the United States through the three chief ports of entry (New York, Philadelphia, and Baltimore) from 1882 to 30 June 1909, was 1,397,423, out of which upwards of 54,000 reached the country between 1 July, 1908, and 30 June, 1909. In consequence, the United States have the third largest Jewish population in the world, the latest estimates being 5,215,805 for Russia, 2,084,591 for Austria-Hungary, and 1,777,185 for the United States. For the immigrants who, for the most part, have settled in large business centres, day and night schools to teach them English, together with trade schools to enable them to earn a livelihood, have been organized or enlarged. For those whom it has been possible to divert elsewhere, agricultural colonies have

been attempted in several states, but have been little successful. In nearly every other line (educational, philanthropic, literary, financial, etc.) the development of Jewish activity during the last twenty-five years has been both rapid and successful. Differently from the Jews of Jamaica and Canada those of the United States are altogether independent of the jurisdiction of any European authority.

The Jewish statistics in the table below are taken from the "American Jewish Year Book" for the year 5670 (16 September, 1909, to 3 October, 1910).

United States -- 1,777,185
Italy -- 52,115
British Empire -- 380,809
Luxemburg -- 1,200
Abyssinia -- 3,000
Mexico -- 8,972
Argentina -- 30,000
Morocco -- 109,712
Austria-Hungary 2,084,591
Norway -- 642
Belgium -- 12,000
Persia -- 49,500
Brazil -- 3,000
Peru -- 498
Bulgaria -- 36,455
Rumania -- 250,000
China and Japan 2,000
Russia -- 5,215,805
Costa Rica -- 43
Servia -- 5,729
Cuba -- 4,000
Spain -- 2,500
Denmark -- 3,476
Sweden -- 3,912
France -- 95,000
Switzerland -- 12,264
Algeria -- 63,000
Turkey -- 463,686
Tunis -- 62,540
Egypt -- 38,635
Germany -- 607,862
Tripoli -- 18,660
Greece -- 8,350
Crete -- 1,150
Holland -- 105,988
Turkestan & Afghanistan -- 14,000
Curaçao -- 1,000
Venezuela -- 411

Surinam -- 1,158

Total -- 11,530,848

HAMBURGER, Realencyclopädie des Judenthums (Leipzig, 1896); The Jewish Encyclopedia (New York, 1901-1906); the handy vols. Of the American Jewish Year Book (Philadelphia, 1899-1909); KREUTZWALD in Kirchenlex., s.v. Juden; VON HANEBERG, *ibid*, s.v. Judenthum; SCHÖLEIN in BUCHBERGER, Kirchliches Handlex., s. v. Juden and Judentum. In addition the following works may be mentioned as more important or more accessible:

General Jewish History. BASNAGE, Histoire des Juifs depuis Jésus-Christ (Rotterdam, 1706); ADAMS, History of the Jews from the Destruction of Jerusalem to the Present Time (Boston, 1812); JOST, Hist of the Jews from the Maccabees to Our Day, tr. (New York, 1848); IDEM, Geschichte d. Judenthums u. s. Secten (Leipzig, 1857-59); MILMAN, The History of the Jews (London, 1863); PALMER, A History of the Jewish Nation (London, 1874); REINACH, Hist. Des Israélites depuis l'époque de leur dispersion jusqu'à nos jours (Paris, 1884); MAGNUS, Outlines of Jewish History (Philadelphia, 1884); BECK, Gesch. D. jüdischen Volkes u. s. Literatur vom babylonischen Exile bis auf die Gegenwart (Lissa, 1894); GRÉTZ, Hist. Of the Jews, tr. (Philadelphia, 1891-98); KARPELES, Sketch of Jewish Hist. (Philadelphia, 1898); DUBNOW, Jewish Hist., tr. (Philadelphia, 1903); GEIGER, Das Judenthum u. s. Geschichte (2nd ed., Breslau, 1909).

Special Jewish History. SCHLATTER, Israels Geschichte von Alexander d. Grossen bis Hadrian (Carlovitz, 1901); CONDER, Judas Maccabæus (London, 1894); VON SCHÖRER, A Hist. Of the Jewish People in the Time of Jesus Christ. tr. (New York, 1891); MORRISON, The Jews under Roman Rule (New York, 1893); BEUGNOT, Les Juifs d'Occident (Paris, 1824); DEPPING, Les Juifs dans le Moyen-Age (Paris, 1834); BÉDARRIDE, Les Juifs en France, en Italie, et en Espagne (Paris, 1861); HARRIS, History of the Mediæval Jews (New York, 1907); MARKENS, The Hebrews in America (New York, 1888); WOLF, The American Jew as Patriot, Soldier, and Citizen (Philadelphia, 1895); DALY, The Settlement of the Jews in North America (New York, 1893); TOVEY, Anglia Judaica (Oxford, 1788); PICCIOTO, Sketches of Anglo-Jewish Hist. (London, 1875); GOLDSCHMIDT, Gesch. d. Juden in England (Berlin, 1886); HALLEZ, Les Juifs en France (Paris, 1845); KOENEN, Geschiedenis d. FRANCIS E. GIGOT

Judaism

Judaism

At the present day, the term designates the religious communion which survived the destruction of the Jewish nation by the Assyrians and the Babylonians. A brief account of Judaism thus understood may be given under the following heads:

- (1) Judaism before the Christian Era;
- (2) Judaism and Early Christianity;
- (3) Judaism since A.D. 70;
- (4) Judaism and Church Legislation.

I. JUDAISM BEFORE THE CHRISTIAN ERA

Upon the return from Babylon (538 B.C.), Juda was conscious of having inherited the religion of pre-Exile Israel. It was that religion which had prompted the exiles to

return to the land promised by Yahweh to their ancestors, and they were now determined to maintain it in its purity. From the Captivity they had learned that in His justice, God had punished their sins by delivering them into the power of pagan nations, as the Prophets of old had repeatedly announced; and that in His love for the people of His choice, the same God had brought them back, as Isaias (40-46) had particularly foretold. Thence they naturally drew the conclusion that, cost what it may, they must prove faithful to Yahweh, so as to avert a like punishment in the future. The same conclusion was also brought home to them, when some time after the completion of the Temple, Esdras solemnly read the Law in their hearing. This reading placed distinctly before their minds the unique position of their race among the nations of the world. The Creator of heaven and earth, in His mercy towards fallen man ([Genesis 1-3](#)), had made a covenant with their father Abraham, in virtue of which his seed, and in his seed all the peoples of the earth, should be blessed ([Genesis 12, 18](#); [II Esdras 9](#)). From that time forth, He had watched over them with jealous care. The other nations, once fallen into idolatry, He had allowed to grovel amid their impure rites; but He had dealt differently with the Israelites whom he wished to be unto Him "a priestly kingdom and a holy nation" ([Exodus 19:6](#)). Their repeated falls into idolatry He had not left unpunished, but He kept alive among them the revealed religion which ever represented God as the true and adequate object of their devotion, trust, gratitude, of their obedience and service.

All the past misfortunes of their race were thus distinctly seen as so many chastisements intended by God to recall His ungrateful people to the observance of the Law, whereby they would secure the holiness necessary for the blameless discharge of their priestly mission to the rest of the world. They, therefore, pledged renewed faithfulness to the Law, leaving it to God to bring about the glorious day when all the earth, with Jerusalem as its centre, would recognize and worship Yahweh; they broke every tie with the surrounding nationalities, and formed a community wholly sacred unto the Lord, chiefly concerned with the preservation of His faith and worship by a strict compliance with all the ritual prescriptions of the Law. On the one hand, this religious attitude of the Judean Jews secured the preservation of Monotheism among them. History proves that the Persians and the Macedonians respected their religious freedom and even to some extent favoured the worship of Yahweh. It remains true, however, that in the time of the Machabees, the children of Israel escaped being thoroughly hellenized only through their attachment to the Law. Owing to this attachment, the fierce persecutions which they then underwent, confirmed instead of rooting out their belief in the true God. On the other hand, the rigour with which the letter of the Law became enforced gave rise to a narrow "legalism". The mere external compliance with ritual observances gradually superseded the higher claims of conscience; the Prophet was

replaced by the "scribe", the casuistic interpreter of the Law; and Israel, in its sacred isolation, looked down upon the rest of mankind. A similarly narrow spirit animated the Babylonian Jews, for it was from Babylon that Esdras, "a ready scribe in the Law of Moses", had come to revive the Law in Jerusalem, and their existence in the midst of heathen populations made it all the more imperative for them to cling tenaciously to the creed and worship of Yahweh.

Apparently, things went on smoothly with the priestly community of Juda as long as the Persian supremacy lasted. It was the policy of ancient Asiatic empires to grant to each province its autonomy, and the Judean Jews availed themselves of this to live up to the requirements of the Mosaic Law under the headship of their high-priests and the guidance of their scribes. The sacred ordinances of the Law were no burden to them, and gladly did they even increase the weight by additional interpretations of its text. Nor was this happy condition materially interfered with under Alexander the Great and his immediate successors in Syria and in Egypt. In fact, the first contact of the Judean Jews with hellenistic civilization seemed to open to them a wider field for their theocratic influence, by giving rise to a Western Dispersion with Alexandria and Antioch as its chief local centres and Jerusalem as its metropolis. However much the Jews living among the Greeks mingled with the latter for business pursuits, learned the Greek language, or even became acquainted with hellenistic philosophy, they remained Jews to the core. The Law as read and explained in their local synagogues regulated their every act, kept them from all defilement with idolatrous worship, and maintained intact their religious traditions. With regard to creed, worship, and morality, the Jews felt themselves far superior to their pagan fellow-citizens, and the works of their leading writers of the time were in the main those of apologists bent on convincing pagans of this superiority and on attracting them to the service of the sole living God. In fact, through this intercourse between Judaism and Hellenism in the Græco-Roman world, the Jewish religion won the allegiance of a certain number of Gentile men and women, while the Jewish beliefs themselves gained in clearness and precision through the efforts then made to render them acceptable to Western minds.

Much less happy results followed on the contact of Jewish Monotheism with Greek Polytheism on Palestinian soil. There, worldly and ambitious high-priests not only accepted, but even promoted, Greek culture and heathenism in Jerusalem itself; and, as already stated, the Greek rulers of the early Machabean Age proved violent persecutors of Yahweh worship. The chief question confronting the Palestinian Jews was not, therefore, the extension of Judaism among the nations, but its very preservation among the children of Israel. No wonder then that Judaism assumed there an attitude of direct antagonism to everything hellenistic, that the Mosaic observances were gradually enforced with extreme rigour, and that the oral Law, or rulings of the Elders

relative to such observances appeared in the eyes of pious Judean Jews of no less importance than the Mosaic Law itself. No wonder, too, that in opposition to the lukewarmness for the oral Law evinced by the priestly aristocracy -- the Sadducees as they were called -- there arose in Juda a powerful party resolved to maintain at any cost the Jewish separation -- hence their name of Pharisees -- from the contamination of the Gentiles by the most scrupulous compliance, not only with the Law of Moses, but also with the "Traditions of the Elders". The former of these leading parties was pre-eminently concerned with the maintenance of the status quo in politics, and in the main sceptical with regard to such prominent beliefs or expectations of the time as the existence of angels, the resurrection of the dead, the reference of the oral Law to Moses, and the future Redemption of Israel. The latter party strenuously maintained these positions. Its extreme wing was made up of Zealots always ready to welcome any false Messiah who promised deliverance from the hated foreign yoke; while its rank and file earnestly prepared by the "works of the Law" for the Messianic Age variously described by the Prophets of old, the apocalyptic writings and the apocryphal Psalms of the time, and generally expected as an era of earthly felicity and legal righteousness in the Kingdom of God. The rise of the Essenes is also ascribed to this period.

II. JUDAISM AND EARLY CHRISTIANITY

At the beginning of our era, Judaism was in external appearance thoroughly prepared for the advent of the Kingdom of God. Its great centre was Jerusalem, the "Holy City", whither repaired in hundreds of thousands Jews of every part of the world, anxious to celebrate the yearly festivals in the "City of the Great King". The Temple was in the eyes of them all the worthy House of the Lord, both by the magnificence of its structure and by the wonderful appointment of its service. The Jewish priesthood was not only numerous, but also most exact in the offering of the daily, weekly, monthly, and other, sacrifices, which it was its privilege to perform before Yahweh. The high-priest, a person most sacred, stood at the head of the hierarchy, and acted as final arbiter of all religious controversies. The Sanhedrin of Jerusalem, or supreme tribunal of Judaism, watched zealously over the strict fulfilment of the Law and issued decrees readily obeyed by the Jews dispersed throughout the world. In the Holy Land, and far and wide beyond its boundaries, besides local Sanhedrins, there were synagogues supplying the ordinary religious and educational needs of the people, and wielding the power of excommunication against breakers of the Law, oral and written. A learned class, that of the Scribes, not only read and interpreted the text of the Law in the synagogue meetings, but sedulously proclaimed the "Traditions of the Elders", the collection of which formed a "fence to the Law", because whoever observed them was sure not to trespass in any way against the Law itself. Legal righteousness was the watchword of Judaism, and its attainment by separation from Gentiles and sinners, by purifications,

fasts, almsgiving, etc., in a word by the fulfilment of traditional enactments which applied the Law to each and every walk of life and to all imaginable circumstances, was the one concern of pious Jews wherever found. Plainly, the Pharisees and the scribes who belonged to their party had generally won the day. In Palestine, in particular, the people blindly followed their leadership, confident that the present rule of pagan Rome would speedily come to an end at the appearance of the Messiah, expected as a mighty deliverer of the faithful "children of the kingdom". Meantime, it behoved the sons of Abraham to emulate the "righteousness of the Scribes and the Pharisees" whereby they would secure admittance into the Messianic world-wide empire, of which Jerusalem would be the capital, and of which every Jewish member would be superior in things temporal as well as spiritual to the rest of the world then rallied to the worship of the one true God.

In reality, the Jews were far from prepared for the fulfilment of the promises which the almighty had repeatedly made to their race. This was first shown to them, when a voice, that of John, the son of Zachary and the herald of the Messiah, was heard in the wilderness of Juda. It summoned, but with little success, all the Jews to a genuine sorrow for sin, which was indeed foreign to their hearts, but which could alone, despite their title of "children of Abraham", fit them for the kingdom near at hand. This was next shown to them by Jesus, the Messiah Himself, Who, at the very beginning of His public life, repeated John's summons to repentance ([Mark 1:15](#)), and Who, throughout His ministry, endeavoured to correct the errors of Judaism of the day concerning the kingdom which He had come to found among men. With authority truly Divine He bade His hearers not to be satisfied with the outward righteousness of the scribes and the Pharisees if they wished to enter into that kingdom, but to aim at the inner perfection which alone could lift up men's moral nature and render them worthy worshipers of their heavenly Father. The Kingdom of God, He plainly declared, had come upon His contemporaries, since Satan, God's enemy and man's, was under their eyes cast out by Himself and by His chosen disciples ([Mark 12:20](#); [Luke 10:18](#)). The kingdom which the Jews should expect is the Kingdom of God in its modest, secret, and as it were, insignificant origin. It is subject to the laws of organic growth as all living things are, and hence its planting and early developments do not attract much attention; but it is not so with its further extension, destined as it is to pervade and transform the world.

This kingdom is indeed rejected by those who had the first claim to its possession and seemingly were the best qualified for entering into it; but all those, both Jews and Gentiles, who earnestly avail themselves of the invitation of the Gospel will be admitted. This is really a new Kingdom of God to be transferred to a new nation and governed by a new set of rulers, although it is no less truly the continuation of the Kingdom of

God under the Old Covenant. Once this kingdom is organized upon earth, its king, the true son and lord of David, goes to a far country, relying upon His representatives to be more faithful than the rulers of the old kingdom. Upon the king's return, this kingdom of grace will be transferred into a kingdom of glory. The duration of the kingdom on earth will outlive the ruin of the Holy City and of its Temple; it will be coextensive with the preaching of the Gospel to all nations, and this, when accomplished, will be the sign of the near approach of the kingdom of glory. In thus describing God's kingdom, Jesus justly treated as vain the hopes of His Jewish contemporaries that they should become masters of the world in the event of a conflict with Rome; He also set aside the fabric of legalism which their leaders regarded as to be perpetuated in the Messianic kingdom, but which in reality they should have considered as either useless or positively harmful now that the time had come to extend "salvation out of the Jews" to the nations at large; plainly, the legal sacrifices and ordinances had no longer any reason of being, since they had been instituted to prevent Israel from forsaking the true God, and since Monotheism was now firmly established in Israel; plainly, too, the "traditions of the Elders" should not be tolerated any longer, since they had gradually led the Jews to disregard some of the most essential precepts of the moral law embodied in the decalogue.

Jesus did not come to destroy the Law or the Prophets, that is those sacred writings which He, no less than His Jewish contemporaries, distinctly recognized as inspired by the Holy Spirit; His mission, on the contrary, was to secure their fulfilment. Indeed, He would have destroyed the Law, if He had sided with the Scribes and the Pharisees who had raised a *fence* to the Law, which actually encroached upon the sacred territory of the Law itself; but He fulfilled it by proclaiming the new Law of perfect love of God and man, whereby all the precepts of the Old Law were brought to completion. Again, He would have destroyed the Prophets, if like the same Scribes and Pharisees, He had pictured an image of God's kingdom and God's Messiah solely by means of the glorious features contained in the prophetic writings; but He fulfilled them by drawing a picture which took into account both glorious and inglorious delineations of the Prophets of old, setting both in their right order and perspective. The Kingdom of God as described and founded by Jesus has an historical name. It is the Christian Church, which was able silently to leaven the Roman Empire, which has outlived the ruin of the Jewish Temple and its worship, and which, in the course of centuries, has extended to the confines of the world the knowledge and the worship of the God of Abraham, while Judaism has remained the barren fig-tree which Jesus condemned during His mortal life.

The death and resurrection of Jesus fulfilled the ancient types and prophecies concerning Him (cf. Luke, xxiv, 26, 27), and the visible bestowal of the Holy Ghost

upon His assembled followers on Pentecost Day gave them the light to realize this fulfilment (Acts, iii, 15) and the courage to proclaim it even in the hearing of those Jewish authorities who thought that they had by the stigma of the Cross put an end forever to the Messianic claims of the Nazarene. From this moment the Church which Jesus had silently organized during His mortal life with Peter as its head and the other Apostles as his fellow-rulers, took the independent attitude which it has maintained ever since. Conscious of their Divine mission, its leaders boldly charged the Jewish rulers with the death of Jesus, and freely "taught and preached Christ Jesus", disregarding the threats and injunctions of men whom they considered as in mad revolt against God and His Christ (Acts, iv). They solemnly proclaimed the necessity of faith in Christ for justification and salvation, and that of baptism for membership in the religious community which grew rapidly under their guidance, and which recognized the risen Son of God as its Divinely constituted "Lord and Christ", "Prince and Saviour", in a real, although invisible, manner, during the present order of things. According to them, these are plainly Messianic times as proved by the realization of Joel's prophecy concerning the outpouring of the Holy Spirit upon all flesh, so that the Jews "first" and next the Gentiles are now called to receive the Divine blessing so long promised in Abraham's Seed for all nations. Much as in these early days the infant Church was Jewish in external appearance, it even then caused Judaism to feel threatened in its whole system of civil and religious life ([Acts 6:13-14](#)). Hence followed a severe persecution against the Christians, in which Saul (Paul) took an active part, and in the course of which he was converted miraculously.

At his conversion Paul found the Church spread far and wide by the very persecution meant to annihilate it, and officially pursuing its differentiation from Judaism by the reception into its fold of Samaritans who rejected the Temple worship in Jerusalem, of the Ethiopian eunuch, that is, of a class of men distinctly excluded from the Judaic community by the Deuteronomic Law, and especially of the uncircumcised Cornelius and his Gentile household with whom Peter himself broke bread in direct opposition to legal traditions. When, therefore, Paul, now become an ardent Apostle of Christ, openly maintained the freedom of Gentile converts from the Law as understood and enforced by the Jews and even by certain Judeo-Christians, he was in thorough agreement with the official leaders of the Church at Jerusalem, and it is well known that the same official leaders positively approved his course of action in this regard ([Acts 15](#); [Galatians 2](#)). The real difference between him and them consisted in his fearlessness in preaching Christian freedom and in vindicating by his Epistles the necessity and efficiency of faith in Christ for justification and salvation independently of the "works of the Law", that is, the great principles acknowledged and acted upon before him in this Christian Church. The result of his polemics was the sharp setting

forth of the relation existing between Judaism and Christianity; in Christ's kingdom, only believing Jews and Gentiles recline with Abraham, Isaac, and Jacob (cf. [Matthew 8:11](#)); they are coheirs of the promise made to the father of all the faithful when he was as yet uncircumcised; the Law and the Prophets are fulfilled in Christ and His body, the Church; the Gospel must be preached to all nations, and then the consummation shall come. The result of his consuming zeal for the salvation of souls redeemed by the blood of Christ was the formation of religious communities bound together by the same faith, hope, and charity as the churches of Palestine, sharing in the same sacred mysteries, governed by pastors likewise vested with Christ's authority, and forming a vast Church organism vivified by the same Holy Spirit and clearly distinct from Judaism. Thus the small mustard seed planted by Jesus in Judea had grown into a great tree fully able to near the storms of persecution and heresy (see Epistle to the Colossians; Ebionites; Gnosticism).

III. JUDAISM SINCE A.D. 70

While Christianity thus asserted itself as the new Kingdom of God, the Jewish theocracy, guided by leaders unable "to know the signs of the times", was hastening to its total destruction. The Romans came, and in A.D. 70 put an end forever to the Jewish Temple, priesthood, sacrifices, and nation, whereby it should have become clear to the Jews that their national worship was rejected of God. In point of fact, Judaism, shorn of these its essential features, soon

"assumed an entirely new aspect. All the parties and sects of a former generation vanished; Pharisees and Sadducees ceased to quarrel with each other; the Temple was supplanted by the synagogue, sacrifices by the prayer, the priest by any one who was able to read, teach, and interpret both the written and the oral law. The Sanhedrin lost its juridical qualification, and became a consistory to advise people in regard to the religious duties. Judaism became a science, a philosophy, and ceased to be a political institution" (Schindler, "Dissolving Views in the History of Judaism").

This new system, treated at first as simply provisional because of the surviving hope of restoring the Jewish commonwealth, had soon to be accepted as definitive through the crushing of Bar-Cochba's revolt by Hadrian. Then it was that Rabbinical or Talmudical Judaism fully asserted its authority over the two great groups of Jewish families east and west of the Euphrates respectively. For several centuries, under either the "Patriarchs of the West" or the "Princes of the Captivity", the Mishna "Oral Teaching" completed by Rabbi Juda I, committed ultimately to writing in the form of

the Jerusalem and Babylonian Talmuds, and expounded by generations of teachers in the schools of Palestine and Babylonia, held undisputed sway over the minds and consciences of the Jews.

In fact, this long acceptance of the Talmud by the Jewish race, before its centre was shifted from the East to the West, so impressed this Second Law (Mishna) upon the hearts of the Jews that down to the present day Judaism has remained essentially Talmudical both in its theory and in its practice. It is indeed true that as early as the eighth century of our era the authority of the Talmud was denied in favour of Biblical supremacy by the sect of the Karaites, and that it has oftentimes since been questioned by other Jewish sects such as Judghanits, Kabbalist, Sabbatians, Chassidim (old and new), Frankist, etc. Nevertheless, these sects have all but disappeared and the supremacy of the Talmud is generally recognized. The most important religious division of Judaism at the present day is that between "Orthodox" and "Reform" Jews, with many subdivisions to which these names are more or less loosely applied. Orthodox Judaism included the greater part of the Jewish race. It distinctly admits the absolutely binding force of the oral Law as finally fixed in the "Shulhan Aruk" by Joseph Caro (sixteenth century). Its beliefs are set forth in the following thirteen articles, first compiled by Maimonides in the eleventh century:

- I believe with a true and perfect faith that God is the creator (whose name be blessed), governor, and maker of all creatures; and that he has wrought all things, worketh, and shall work forever.
- I believe with perfect faith that the creator (whose name be blessed) is one; that there is no unity like unto his in any way; and that he alone was, is, and will be our God.
- I believe with a perfect faith that the creator (whose name be blessed) is incorporeal, that he has not any corporeal qualities, and that nothing can be compared unto him.
- I believe with a perfect faith that the creator (whose name be blessed) was the first, and will be the last.
- I believe with a perfect faith that the creator (whose name be blessed) is to be worshipped and none else.
- I believe with perfect faith that all the words of the prophets are true.
- I believe with perfect faith that the prophecies of Moses our master (may he rest in peace) were true; that he was the father and chief of all prophets, both of those before him and those after him.

- I believe with perfect faith that the Law, at present in our hands, is the same that was given to our master Moses (peace be with him).
- I believe with perfect faith that this Law will not be changed, and that no other Law will be revealed by the creator (blessed be his name).
- I believe with a perfect faith that God (whose name be blessed) knows all the deeds of the sons of men and all their thoughts; as it is said: "He who hath formed their hearts altogether, he knoweth all their deeds".
- I believe with a perfect faith that God (whose name be blessed) rewards those who keep his commandments, and punishes those who transgress them.
- I believe with a perfect faith that the Messiah will come; and although he tarries I wait nevertheless every day for his coming.
- I believe with a perfect faith that there will be a resurrection of the dead, at the time when it shall please the creator (blessed be his name).

With regard to the future life, Orthodox Jews believe, like the Universalists, in the ultimate salvation of all men; and like the Catholics, in the offering up of prayers for the souls of their departed friends. Their Divine worship does not admit of sacrifices; it consists in the reading of the Scriptures and in prayer. While they do not insist on attendance at the synagogue, they enjoin all to say their prayers at home or in any place they chance to be, three times a day; they repeat also blessings and particular praises to God at meals and on other occasions. In their morning devotions they use their phylacteries and a praying scarf (*talith*), except on Saturdays, when they use the *talith* only. The following are their principal festivals:

- Passover, on 14 Nisan, and lasting eight days. On the evening before the feast, the first-born of every family observes a fast in remembrance of God's kindness to the nation. During the feast unleavened bread is exclusively used; the first two and last days are observed as strict holidays. Since the paschal lamb has ceased, it is customary after the paschal meal to break and partake as Aphikommon, or after-dish, of half of an unleavened bread cake which has been broken and put aside at the beginning of the supper.
- Pentecost, or the feast of Weeks, falling seven weeks after the Passover and kept, at present, for two days only.

- Trumpets, on 1 and 2 Tishri, of which the first is called New Years's feast. On the second day they blow the horn and pray that God will bring them to Jerusalem.
- Tabernacles, on 15 Tishri, lasting nine days, the first and last two days being observed as feast days. On the first day they carry branches around the altar or pulpit singing psalms; on the seventh day, they carry copies of the Torah out of the ark to the altar, all the congregation joining in the procession seven times around the altar and singing [Ps. xxix](#). On the ninth day they repeat several prayers in honour of the Law, bless God for having given them His servant Moses, and read the section of the Scriptures which records his death.
- Purim, on 14 and 15 Adar (Feb.-March), in commemoration of the deliverance recorded in the Book of Esther; the whole Book of Esther is read several times during the celebration.
- Dedication, a feast commemorative of the victory over Antiochus Epiphanes and lasting eight days.
- Atonement Day, celebrated on 10 Tishri, although the Jews have neither Temple nor priesthood. They observe a strict fast for twenty-four hours, and strive in various ways to evince the sincerity of their repentance (see Jewish Calendar).

Reform Judaism, which traces back its origin to Mendelssohn's time, is chiefly prevalent in Germany and the United States. It has very lax views of biblical inspiration and bends Jewish beliefs and practices so as to adapt them to environment. It is a sort of Unitarianism coupled with some Jewish peculiarities. It disregards the belief of the coming of a personal Messiah, the obligatory character of circumcision, ancient Oriental customs in synagogue services, the dietary laws which but few reform Jews observe out of custom or veneration for the past, the second days of the holy days, all minor feasts and fast-days of the year (except Hanukha and Purim), while it uses sermons in the vernacular and adds in some places Sunday services to those held on the historical Sabbath Day, etc. Nominally, for all, the Sabbath is the day of rest; but only a small number even of the Orthodox Jews keep their places of business closed on that day, owing to the commercial demands of modern life and the police regulations usually enforced in Christian lands concerning the ordinary Sunday rest. Inter-marriage with non-Jews is generally discountenanced even by Reform Jewish rabbis, and as a fact, has never been frequent, except of late in Australia. Of late, the use of Hebrew has been revived particularly in Palestine Jewish colonies, and a number of Jewish journals and reviews are published in that tongue in the East and in certain countries of Europe.

Yiddish, or Judeo-German, is by far more prevalent, and is used in the large cities of Europe and North America for weekly and daily papers.

The *Yeshibas*, or high schools of Talmudic learning, where the time was exclusively devoted to the study of rabbinical jurisprudence and Talmudic law, have been partly replaced by seminaries with a more modern curriculum of studies. In 1893 Gratz College, thus named from its founder, was started in Philadelphia for training religious school-teachers. Young Men's's Hebrew Associations, begun in 1874, now exist in nearly all the large cities of the United States. Of wider import still is the development of the Sabbath schools which are generally attached to Jewish congregations in the same country. The recent Zionist movement claims a passing notice. Since 1896 the scheme for securing in Palestine a legal home for the oppressed Hebrews has rapidly taken a firm hold of the Jewish race. To many, Zionism appears as calculated to bring about the realization of the old Jewish hope of restoration to Palestine. To others, it seems to be the only means of obviating the impossibility felt by various peoples of assimilating their Jewish population and at the same time of allowing it the amount of freedom which the Jews consider necessary for the preservation of their individual character. By others again, it is regarded as the practical answer to the anti-Semitic agitation which has prevailed intensely through Western Europe since 1880, and to the lack of social equality, which Jews repeatedly find denied them, even in countries where they possess civil rights and attain to high political and professional positions. Since 1897 Zionism holds annual international congresses, counts numerous societies and clubs, and since 1898 has a Jewish Colonial Trust. There is no Jewish Church as such, and each congregation is a law to itself. Owing to this, the ancient distinction between the Sephardim and the Askenazim continues among the Jews. As of yore, the Sephardim, or descendants of Spanish and Portuguese Jews, readily organize themselves into separate congregations. Even now, they are easily distinguished from the Askenazim (German or Polish Jews) by their names, their more Oriental pronunciation of Hebrew, and their peculiarities in synagogue services.

IV. JUDAISM AND CHURCH LEGISLATION

The principal items of Church legislation relative to Judaism have been set forth in connection with the history of the Jews. There remains only to add a few remarks which will explain the apparent severity of certain measures enacted by either popes or councils concerning the Jews, or account for the fact that popular hatred of them so often defeated the beneficent efforts of the Roman pontiffs in their regard.

Church legislation against Jewish holding of Christian slaves can be easily understood: as members of Christ, the children of the Church should evidently not be subjected to the power of His enemies, and thereby incur a special danger for their faith; but more particularly, as stated by a recent Jewish writer:

"There was good reason for the solicitude of the Church and for its desire to prevent Jews from retaining Christian slaves in their houses. The Talmud and all later Jewish codes forbade a Jew from retaining in his home a slave who was uncircumcised" (Abrahams, "Jewish Life in the Middle Ages").

The obligation of wearing a distinguishing badge was of course obnoxious to the Jews. At the same time, Church authorities deemed its injunction necessary to prevent effectively moral offences between Jews and Christian women. The decrees forbidding the Jews from appearing in public at Eastertide may be justified on the ground that some of them mocked at the Christian processions at that time; those against baptized Jews retaining distinctly Jewish customs find their ready explanation in the necessity for the Church to maintain the purity of the Faith in its members, while those forbidding the Jews from molesting converts to Christianity are no less naturally explained by the desire of doing away with a manifest obstacle to future conversions.

It was for the laudable reason of protecting social morality and securing the maintenance of the Christian Faith, that canonical decrees were framed and repeatedly enforced against free and constant intercourse between Christians and Jews, against, for instance, bathing, living, etc., with Jews. To some extent, likewise, these were the reasons for the institution of the Ghetto or confinement of the Jews to a special quarter, for the prohibition of the Jews from exercising medicine, or other professions. The inhibition of intermarriage between Jews and Christians, which is yet in vigour, is clearly justified by reason of the obvious danger for the faith of the Christian party and for the spiritual welfare of the children born of such alliances. With regard to the special legislation against printing, circulating, etc., the Talmud, there was the particular grievance that the Talmud contained at the time scurrilous attacks upon Jesus and the Christians (cf. Pick, "The Personality of Jesus in the Talmud" in the "Monist", Jan., 1910), and the permanent reason that

"that extraordinary compilation, with much that is grave and noble, contains also so many puerilities, immoral precepts, and anti-social maxims, that Christian courts may well have deemed it right to resort to stringent measures to prevent Christians from being seduced into adhesion to a system so preposterous" (Catholic Dictionary, 484).

History proves indeed that Church authorities exercised at times considerable pressure upon the Jews to promote their conversion; but it also proves that the same authorities generally deprecated the use of violence for the purpose. It bears witness, in particular, to the untiring and energetic efforts of the Roman pontiffs in behalf of

the Jews especially when, threatened or actually pressed by persecution they appealed to the Holy See for protection. It chronicles the numerous protestations of the popes against mob violence against the Jewish race, and thus directs the attention of the student of history to the real cause of the Jewish persecutions, viz., the popular hatred against the children of Israel. Nay more, it discloses the principal causes of that hatred, among which the following may be mentioned:

- The deep and wide racial difference between Jews and Christians which was, moreover, emphasized by the ritual and dietary laws of Talmudic Judaism;
- the mutual religious antipathy which prompted the Jewish masses to look upon the Christians as idolaters, and the Christians to regard the Jews as the murderers of the Divine Saviour of mankind, and to believe readily the accusation of the use of Christian blood in the celebration of the Jewish Passover, the desecration of the Holy Eucharist, etc.;
- the trade rivalry which caused Christians to accuse the Jews of sharp practice, and to resent their clipping of the coinage, their usury, etc.;
- the patriotic susceptibilities of the particular nations in the midst of which the Jews have usually formed a foreign element, and to the respective interests of which their devotion has not always been beyond suspicion.

In view of these and other more or less local, more or less justified, reasons, one can readily understand how the popular hatred of the Jews has too often defeated the beneficent efforts of the Church, and notably of its supreme pontiffs, in regard to them.

Jewish Religion. FRANCIS E. GIGOT

Jezabel

Jezabel

(Sept., *'Tezabél*).

Wife of Achab, King of Israel. She was the daughter of Ethbaal I, King of the Sidonians, who was also grand pontiff of the goddess Astarte (the Ishtar of the Assyrians) worshipped by that people. It is probable that the marriage of this princess with Achab was brought about in order to strengthen the house of Amri (father of Achab) against the Syrians. She introduced into Samaria various forms of Phoenician luxury hitherto unknown in that capital of the Northern Kingdom, and also prevailed upon Achab to establish there the worship of the Phoenician gods and goddesses of which she was a fanatical devotee (III Kings, xvi, 31, 32). She maintained 450 priests for the worship of Baal and 400 for that of Astarte (III Kings, xviii, 19). Consistently she persecuted and slew the prophets (III Kings, xviii, 4), but to prevent their complete extermination Abdias, governor of the king's house, caused a hundred of them to hide themselves in caves where they were secretly sustained. After the slaying of the 450 priests of Baal by Elias on Mount Carmel (III Kings, xviii, 40), Jezabel sought the life of the prophet, and he fled to the kingdom of Juda (III Kings, xix, 1-3). How she brought about the death of Naboth in order to confiscate a vineyard which he had refused to sell to Achab is related in III Kings, xxi. Elias again appears on the scene and declares the Divine retribution which is to fall upon the perpetrators of the crime. The blood of Achab shall be licked by the dogs in the very field where they licked the blood of Naboth, and the dogs shall eat Jezabel in the field of Jezrahel. After the death of Achab, Jezabel continued to exercise a strong and baneful influence over her two sons Ochozias and Joram who reigned successively in his place, and through her daughter Athalia who married Joram, King of Juda, the same evil influence was extended even to the Southern Kingdom. At last the Divine vengeance came upon Jezabel, and the predictions of Elias and Eliseus were literally fulfilled at the beginning of the reign of Jehu, as related in IV Kings, ix, 30-37.

See LesÈtre in Vigouroux, *Dictionnaire de la Bible*, s. v.; Selbie in Hastings, *Dictionary of the Bible*, s. v. *Jezebel*.

JAMES F. DRISCOLL

Jibaro Indians

Jíbaro Indians

Jíbaro (Spanish orthography) "forest man", i.e. native.

An important tribal group of Ecuador, comprising a great number of small sub-tribes speaking a common language with dialectic variants, and together constituting a distinct linguistic stock, holding the extensive forests between the Santiago and Pastaza rivers and southward to the Amazon. Owing to similarity of name — also written Xebaro, Zibaro — they have been frequently confounded with their eastern neighbours, the Zaparo, and the confusion is increased by the fact that in earlier times the name Jíbaro was often loosely used to designate any of the wild Indians of eastern Ecuador. More than any other tribe of the upper Amazon region, the Jíbaro are notable for their determined and successful resistance to all efforts at conquest or Christianization, and notwithstanding more than three centuries of more or less intimate Spanish contact they still retain their primitive manners to a remarkable degree. They have no villages, the houses of each small community being scattered about in the forest within easy communicating distance, and always close to a stream. The houses are communal, from fifty to eighty feet in length, with a door at each end, one exclusively for the men and the other for the women. Near the women's door are the fire-places for cooking, one for each family, while outside the men's door is the *tunduli*, or great wooden drum, made from a hollow log, the sound of which can be heard for a distance of ten miles through the forest, and by means of which, according to a well-understood code, the Jíbaro can signal to his farthest acquaintance.

War is their normal condition, the favourite weapons being the lance, the javelin with throwing stick, the blow-gun with poisoned arrows, and the shield for defence. The heads of enemies are smoked by an ingenious process which in a measure preserves the features. The women are expert potters. The Jíbaro are agricultural, cultivating corn, beans, bananas, yuca, and cotton. Besides dogs, parrots, and monkeys, they have chickens and hogs, which were introduced among them by the whites. They use no salt, but like many other tribes of the Amazon and Orinoco are addicted to eating a certain saltpetrous clay. Their favourite drink is *chicha*, a mild intoxicant fermented from the yuca, banana or some other native plant. They wear a cotton dress below the waist, flowing hair, paint, feather ornaments, ear pendants, and — among women — labrets. They are robust and comparatively handsome, although not tall. They are very fond of music, visiting, and ceremonial dances. Polygamy exists, as also, according to some travellers, the curious custom of the *couvade*. The dead are usually laid away in small shelter structures in the woods or in hollow tree-trunks placed in the house

where the death occurs, the house being then abandoned. There is apparently no tribal organization or chiefly authority, the only bond among families being their habitual attendance at common festivals. In each family group one man has the duty of reciting a long historical and didactic discourse each morning while the women are preparing breakfast. Very little is known of their religious or mythologic beliefs, but witchcraft flourishes, and almost every death is attributed to this cause.

Sheltered by their forests, the Jíbaro successfully withstood the efforts of the Peruvian Incas to subjugate them. The first Spanish entrance into their country was made by Vergara in 1541, and in 1559, under order from Governor Salinas, five towns were established in the Jíbaro country, first and chief of which was Logrono. Under enforced labour in the mines, and other oppressions, at the hands of their Spanish taskmasters, the Indians rapidly withered away or saved themselves by retreating deeper into the forests. In 1599 a fresh tribute goaded the Jíbaro into rebellion, and under the leadership of Anirula a force estimated by many at 20,000 warriors stormed Logrono in a night attack, killing every inhabitant to the number of 12,000, excepting the young women, and burning the city to the ground. The governor was killed by pouring molten gold down his throat "in order that he might have his fill of gold". The inhabitants of the other towns took refuge in Sevilla del Oro, which was next attacked, but resisted so stoutly that the Indians finally retired after having killed nearly 14,000 of the besieged. The young women were carried off as wives to the savages, and it is said that the admixture of blood is still evident in the clearer skin and more abundant beard of many of the tribe. Successive expeditions failed to reduce the Jíbaro, until it was resolved to call in the help of the missionaries. In 1645 two Franciscan fathers, Laureano de la Cruz and Andrés Fernández, with a small military escort, entered the territory from the west, and in 1656 Commander Agureo with a detachment of troops and a company of mission Indians under the Jesuit Father Raimundo Santa Cruz, attempted a settlement at the mouth of the Pastaza, but the attempt was a failure through the bad conduct of the soldiers. Other unsuccessful missionary attempts were made in 1690, and in 1692 a combined force of Spanish troops and mission Indians, the latter under the superior of the Jesuit missions, Father Viva, began a series of manhunts in the Jíbaro country, but with so little result that in five months only three hundred and seventy-two Indians were captured, most of whom escaped later. In these raids the Indian mothers frequently slew their children with their own hands to prevent their falling into the hands of the Spaniards.

In 1767 the Jesuit Father Andrés Camacho made another effort, with some fair promise of success, when the decree of expulsion banished the Jesuits from their missions, which were then turned over to Franciscans and secular priests and speedily fell into decay. This may be considered the end of any systematic attempt at Christianizing

the Jíbaro. As far back as 1581 the Dominicans of Quito had undertaken a similar work at Camelos on the Pindo, but after more than two centuries the only result was three small villages containing two hundred and forty baptized Indians, and about half that number in 1814. Several Franciscans also entered the territory from time to time, notably Father Antonio Prieto in 1816, who discovered some important pre-Columbian ruins. In 1869, the restored Jesuits began work again at three stations, but were driven out a few years later by an Indian rising. In 1886 the Dominicans and in 1893 the Franciscans re-entered the field and have now mission stations at Macas (D) Canelos (D) and Zamora (F), while the Jesuits are at work on the Napo. In 1893 the Salesians were authorized to enter the territory, which had been newly erected into the Vicariate Apostolic of Mendez and Gualaquiza. Intestine feuds, smallpox visitations, alcohol, and other causes have steadily reduced the number of the Jíbaro until, for the 20,000 warriors who sacked Logrono three centuries ago, the whole nation to-day does not count more than as many souls, and experienced missionaries think they do not exceed 10,000 or 12,000 of whom only about 1400 are rated as Christians.

JAMES MOONEY

St. Joachim

St. Joachim

Joachim (whose name means *Yahweh prepares*), was the father of the Blessed Virgin Mary.

If we were to obey the warning of St. Peter Damian, we should consider it a blameable and needless curiosity to inquire about those things that the Evangelists did not deem it advisable to relate, and, in particular, about the parents of the Blessed Virgin (Serm. iii de Nativ. B.M.V.). Tradition nevertheless, grounded on very old testimonies, very early hailed Saints Joachim and Anne as the father and mother of the Mother of God. True, this tradition seems to rest ultimately on the so-called "Gospel of James", the "Gospel of the Nativity of the Blessed Mary", and the Pseudo-Matthew, or "Book of the Nativity of the Blessed Virgin Mary and of the Childhood of the Saviour"; and this origin is likely to rouse well-founded suspicions. It should be borne in mind, however, that the apocryphal character of these writings, that is to say, their rejection from the canon, and their unguineness do not imply that no heed whatever should be taken of some of their assertions; side by side, indeed, with unwar-

ranted and legendary facts, they contain some historical data borrowed from reliable traditions or documents; and difficult though it is to distinguish in them the wheat from the tares, it would be unwise and uncritical indiscriminately to reject the whole. Some commentators, who believe that the genealogy given by St. Luke is that of the Blessed Virgin, find the mention of Joachim in Heli (Luke, iii, 23; *Eliachim*, i.e. *Jehoachim*), and explain that Joseph had, in the eyes of the law, become by his marriage the son of Joachim. That such is the purpose and the meaning of the Evangelist is very doubtful, and so is the identification proposed between the two names *Heli* and *Joachim*. Neither can it be asserted with certainty, in spite of the authority of the Bollandists, that Joachim was Heli's son and Joseph's brother; nor, as is sometimes affirmed, from sources of very doubtful value, that he had large possessions in herds and flocks. Much more interesting are the beautiful lines in which the "Gospel of James" describes how, in their old age, Joachim and Anne received the reward of their prayers to obtain issue. Tradition has it that the parents of the Blessed Virgin, who, apparently, first lived in Galilee, came later on to settle in Jerusalem; there the Blessed Virgin was born and reared; there also they died and were buried. A church, known at various epochs as St. Mary, St. Mary ubi nata est, St. Mary in Probatia, Holy Probatia, St. Anne, was built during the fourth century, possibly by St. Helena, on the site of the house of St. Joachim and St. Anne, and their tombs were there honoured until the close of the ninth century, when the church was converted into a Moslem school. The crypt which formerly contained the holy tombs was rediscovered on 18 March, 1889.

St. Joachim was honoured very early by the Greeks, who celebrate his feast on the day following the Blessed Virgin's birthday; the Latins were slow to admit it to their calendar, where it found place sometimes on 16 Sept. and sometimes on 9 Dec. Assigned by Julius II to 20 March, the solemnity was suppressed some fifty years later, restored by Gregory XV (1622), fixed by Clement XII (1738) on the Sunday after the Assumption, and finally raised to the rank of double of the second class by Leo XIII (1 Aug., 1879).

CHARLES L. SOUVAY

Joachim of Flora

Joachim of Flora

Cistercian abbot and mystic; b. at Celico, near Cosenza, Italy, c. 1132; d. at San Giovanni in Fiore, in Calabria, 30 March, 1202.

His father, Maurus de Celico (whose family name is said to have been Tabellione), a notary holding high office under the Norman kings of Sicily, placed him at an early age in the royal Court. While on a pilgrimage to the Holy Land, Joachim was converted

from the world by the sight of some great calamity (perhaps an outbreak of pestilence). He passed the whole of Lent in contemplation on Mount Thabor, where he is said to have received celestial illumination for the work of his life. Returning to Italy, he retired to the Cistercian Abbey of Sambucina, probably in 1159, and for some years devoted himself to lay preaching, without taking the religious habit or receiving any orders. The ecclesiastical authorities raising objections to his mode of life, he took the Cistercian habit in the Abbey of Corazzo, and was ordained priest, apparently in 1168. He now applied himself entirely to Biblical study, with a special view to the interpretation of the hidden meaning of the Scriptures. A few years later, much against his will, he was elected abbot. Finding the duties of his office an intolerable hindrance to what he deemed his higher calling, he appealed, in 1182, to Pope Lucius III, who relieved him of the temporal care of his abbey, and warmly approved of his work, bidding him continue it in whatever monastery he thought best. He spent the following year and a half at the Abbey of Casamari, engaged upon his three great books, and there a young monk, Lucas (afterwards Archbishop of Cosenza), who acted as his secretary, tells us of his amazement at seeing so famous and eloquent a man wearing such rags, and of the wonderful devotion with which he preached and said Mass.

The papal approbation was confirmed by Urban III, in 1185, and again, more conditionally, by Clement III, in 1187, the latter exhorting him to make no delay in completing his work and submitting it to the judgment of the Holy See. Joachim now retired to the hermitage of Pietralata, and finally founded the Abbey of Fiore (or Flora) among the Calabrian mountains, which became the center of a new and stricter branch of the Cistercian Order approved by Celestine III in 1198. In 1200 Joachim publicly submitted all his writings to the examination of Innocent III, but died before any judgment was passed. It was held to be in answer to his prayers that he died on Holy Saturday, "the Saturday on which *Sitivit* is sung, attaining the true Sabbath, even as the hart panteth after the fountains of waters." The holiness of his life is unquestionable; miracles were said to have been wrought at his tomb, and, though never officially beatified, he is still venerated as a *beatus* on 29 May.

Dante voiced the general opinion of his age in declaring Joachim one "endowed with prophetic spirit." But he himself always disclaimed the title of prophet. The interpretation of Scriptural prophecy, with reference to the history and the future of the Church, is the main theme of his three chief works: "Liber Concordiae Novi ac Veteris Testamenti," "Expositio in Apocalipsim," and "Psalterium Decem Cordarum." The mystical basis of his teaching is the doctrine of the "Eternal Gospel," founded on a strained interpretation of the text in the Apocalypse (xiv, 6). There are three states of the world, corresponding to the three Persons of the Blessed Trinity. In the first age the Father ruled, representing power and inspiring fear, to which the Old Testament

dispensation corresponds; then the wisdom hidden through the ages was revealed in the Son, and we have the Catholic Church of the New Testament; a third period will come, the Kingdom of the Holy Spirit, a new dispensation of universal love, which will proceed from the Gospel of Christ, but transcend the letter of it, and in which there will be no need for disciplinary institutions. Joachim held that the second period was drawing to a close, and that the third epoch (already in part anticipated by St. Benedict) would actually begin after some great cataclysm which he tentatively calculated would befall in 1260. After this Latins and Greeks would be united in the new spiritual kingdom, freed alike from the fetters of the letter; the Jews would be converted, and the "Eternal Gospel" abide until the end of the world.

Although certain doctrines of Joachim concerning the Blessed Trinity were condemned by the Lateran Council in 1215, his main teaching does not seem to have excited suspicion until the middle of the century. Many works had meanwhile come into being which were wrongly attributed to Joachim. Among these the "De Oneribus Prophetarum," the "Expositio Sybillae et Merlini," and the commentaries on Jeremias and Isaias are the most famous. The sect of the "Joachists" or "Joachimists" arose among the "spiritual" party among the Franciscans, many of whom saw Antichrist already in the world in the person of Frederick II, nor was their faith shaken by his death in 1250. One of their number, Fra Gherardo of Borgo San Donnino, wrote a treatise entitled "Introductorium in Evangelium Aeternum", of which the contents are now known only from the extracts made by the commission of three cardinals who examined it in 1255. From these it is clear that the Joachists went far beyond what the abbot himself had taught. They held that, about the year 1200, the spirit of life had gone out of the two Testaments and that Joachim's three books themselves constituted this "Eternal Gospel," which was not simply to transcend but to supersede, the Gospel of Christ. The Catholic priesthood and the whole teaching of the New Testament was to be rendered void in a few years.

This work was solemnly condemned by Alexander IV, in 1256, and the condemnation involved the teaching of Joachim himself. His central doctrine was confuted by St. Thomas in the *Summa Theologica* (I-II, Q. cvi, a. 4), and its Franciscan exponents were sternly repressed by St. Bonaventure. Another blow was given to the movement when the fatal year 1260 came, and nothing happened. "After Frederick II died who was Emperor," writes Fra Salimbene of Parma, "and the year 1260 passed, I entirely laid aside this doctrine, and I am disposed henceforth to believe nothing save what I see." It was revived in a modified form by the later leader of the spiritual Franciscans, Pier Giovanni Olivi (d. 1297), and his follower, Ubertino da Casale, who left the order in 1317. We hear a last echo of these theories in the letters of Blessed Giovanni dalle

Celle and the prophecies of Telesphorus of Cosenza during the Great Schism, but they were no longer taken seriously.

Divini vatis Abbatis Joachim Liber Concordiae novi ac veteris Testamenti (Venice, 1519); Expositio magni prophetae Abbatis Joachim in Apocalipsim: Eiusdem Psalterium Decem Cordarum opus prope divinum (Venice, 1527); REUTER, Geschichte der religiösen Aufklärung im Mittelalter, II (Berlin, 1877); TOCCO, L'Eresia nel Medio Evo (Florence, 1884); DENIFLE, Das Evangelium aeternum und die Commission zu Anagni in Archiv fur Litteratur- und Kirchen-Geschichte, I (Berlin, 1885); HOLDER-EGGER, Cronica Fratris Salimbene de Adam Ordinis Minorum (Hanover, 1905-08); WICKSTEED, The Everlasting Gospel in The Inquirer (London, 1909); FOURNIER, Etudes sur Joachim de Flore et ses doctrines (Paris, 1909). The only contemporary account is the sketch, Virtutum B. Joachimi synopsis, by LUCAS OF COSENZA, his secretary: but the fuller Vita by JACOBUS GRAECUS SYLLANAEUS, written in 1612, is professedly drawn from an ancient manuscript then preserved at Fiore. Both are printed by the Bollandists, Acta SS., May, VII.

EDMUND G. GARDNER

Pope Joan

Popess Joan

The fable about a female pope, who afterwards bore the name of Johanna (Joan), is first noticed in the middle of the thirteenth century.

VARIATIONS OF THE FABLE

First Version: Jean de Mailly. The first who appears to have had cognizance of it was the Dominican chronicler Jean de Mailly (Archiv der Gesellschaft fur altere deutsche Geschichte, xii, 17 sq., 469 sq.) from whom another Dominican, Etienne de Bourbon (d. 1261), adopted the tale into his work on the "Seven Gifts of the Holy Ghost."

In this account the alleged popess is placed about the year 1100, and no name is yet assigned her. The story runs that a very talented woman, dressed as a man, became notary to the Curia, then cardinal and finally pope; that one day this person went out on horseback, and on this occasion gave birth to a son; that she was then bound to the tail of a horse, dragged round the city, stoned to death by the mob, and was buried at the place where she died; and that an inscription was put up there as follows: "*Petre pater patrum papissae prodito partum*". In her reign, the story adds, the Ember days were introduced, called therefore the "fasts of the popess".

Second Version: Martin of Troppau. A different version appears in the third recension of the chronicle of Martin of Troppau (Martinus Polonus) possibly inserted by the author himself and not by a subsequent transcriber. Through this very popular work the tale became best known in the following form: After Leo IV (847-55) the Englishman John of Mainz (Johannes Anglicus, natione Moguntinus) occupied the papal chair two years, seven months and four days. He was, it is alleged, a woman. When a girl, she was taken to Athens in male clothes by her lover, and there made such progress in learning that no one was her equal. She came to Rome, where she taught science, and thereby attracted the attention of learned men. She enjoyed the greatest respect on account of her conduct and erudition, and was finally chosen as pope, but, becoming pregnant by one of her trusted attendants, she gave birth to a child during a procession from St. Peter's to the Lateran, somewhere between the Colosseum and St. Clement's. There she died almost immediately, and it is said she was buried at the same place. In their processions the popes always avoid this road; many believe that they do this out of abhorrence of that calamity.

Here occurs for the first time the name of Johanna (Joan) as that of the alleged popess. Martin of Troppau had lived at the Curia as papal chaplain and penitentiary (he died 1278), for which reason his papal history was widely read, and through him the tale obtained general acceptance. One manuscript of his chronicle relates in a different way the fate of the alleged popess: i.e., after her confinement Joan was immediately deposed, and did penance for many years. Her son, it is added, became Bishop of Ostia, and had her interred there after her death.

Later Versions. Later chroniclers even give the name which she bore as a girl; some call her Agnes, some Gilberta. Still further variations are found in the works of different chroniclers, e.g. in the "Universal Chronicle of Metz", written about 1250, and in subsequent editions of the twelfth (?) century "Mirabilia Urbis Romae". According to the latter, the popess was given the choice in a vision, of temporal disgrace or eternal punishment; she chose the former, and died at her confinement in the open street.

EARLY EVALUATIONS OF THE LEGEND

Credulous Acceptance. In the fourteenth and fifteenth centuries this popess was already counted as an historical personage, whose existence no one doubted. She had her place among the carved busts which stood in Siena Cathedral. Under Clement VIII, and at his request, she was transformed into Pope Zacharias. The heretic Hus, in the defense of his false doctrine before the Council of Constance, referred to the popess, and no one offered to question the fact of her existence. She is not found in the "Liber Pontificalis" nor among the papal portraits in St. Paul's Outside the Walls, at Rome.

Critical Evaluation. This alleged popess is a pure figment of the imagination. In the fifteenth century, after the awakening of historical criticism, a few scholars like Aeneas Silvius (*Epist.*, I, 30) and Platina (*Vitae Pontificum*, No. 106) saw the untenableness of the story. Since the sixteenth century Catholic historians began to deny the existence of the popess, e.g., Onofrio Panvinio (*Vitae Pontificum*, Venice, 1557), Aventinus (*Annales Boiorum*, lib. IV), Baronius (*Annales ad a. 879*, n. 5), and others.

Protestant Evaluation. A few Protestants also, e.g., Blondel (*Joanna Papissa*, 1657) and Leibniz ("Flores sparsae in tumulum papissae" in "*Bibliotheca Historica*", Göttingen, 1758, 267 sq.), admitted that the popess never existed. Numerous Protestants, however, made use of the fable in their attacks on the papacy. Even in the nineteenth century, when the untenableness of the legend was recognized by all serious historians, a few Protestants (e.g. Kist, 1843; Suden, 1831; and Andrea, 1866) attempted, in an anti-Roman spirit, to prove the historical existence of the popess. Even Hase ("*Kirchengesch.*", II, 2nd ed., Leipzig, 1895, 81) could not refrain from a spiteful and absolutely unhistorical note on this subject.

PROOFS OF ITS MYTHICAL CHARACTER

The principal proofs of the entirely mythical character of the popess are:

1. Not one contemporaneous historical source among the papal histories knows anything about her; also, no mention is made of her until the middle of the thirteenth century. Now it is incredible that the appearance of a "popess", if it was an historical fact, would be noticed by none of the numerous historians from the tenth to the thirteenth century.

2. In the history of the popes, there is no place where this legendary figure will fit in.

Between Leo IV and Benedict III, where Martinus Polonus places her, she cannot be inserted, because Leo IV died 17 July, 855, and immediately after his death Benedict III was elected by the clergy and people of Rome; but owing to the setting up of an antipope, in the person of the deposed Cardinal Anastasius, he was not consecrated until 29 September. Coins exist which bear both the image of Benedict III and of Emperor Lothair, who died 28 September, 855; therefore Benedict must have been recognized as pope before the last-mentioned date. On 7 October, 855, Benedict III issued a charter for the Abbey of Corvey. Hinemar, Archbishop of Reims, informed Nicholas I that a messenger whom he had sent to Leo IV learned on his way of the death of this pope, and therefore handed his petition to Benedict III, who decided it (Hinemar, ep. xl in P.L., CXXXVI, 85). All these witnesses prove the correctness of the dates given in the lives of Leo IV and Benedict III, and there was no interregnum between these two popes, so that at this place there is no room for the alleged popess.

Further, it is even less probable that a popess could be inserted in the list of popes about 1100, between Victor III (1087) and Urban II (1088-99) or Paschal II (1099-1110), as is suggested by the chronicle of Jean de Mailly.

ORIGIN OF THE LEGEND

This fable of a Roman popess seems to have had an earlier counterpart at Constantinople. Indeed, in his letter to Michael Caerularius (1053), Leo IX says that he would not believe what he had heard, namely that the Church of Constantinople had already seen eunuchs, indeed even a woman, in its episcopal chair (Mansi "Concil.", XIX, 635 sq.).

Concerning the origin of the whole legend of Popess Joan, different hypotheses have been advanced.

Bellarmino (De Romano Pontifice, III, 24) believes that the tale was brought from Constantinople to Rome.

Baronius (Annales ad a., 879, n. 5) conjectures that the much censured effeminate weaknesses of Pope John VIII (872-82) in dealing with the Greeks may have given rise to the story. Mai has shown (Nova Collectio Patr., I, Proleg., xlvii) that Photius of Constantinople (De Spir. Sanct. Myst., lxxxix) refers emphatically three times to this pope as "the Manly", as though he would remove from him the stigma of effeminacy.

Other historians point to the degradation of the papacy in the tenth century, when so many popes bore the name John; it seemed therefore a fitting name for the legendary popess. Thus Aventinus sees in the story a satire on John IX; Blondel, a satire on John XI; Panvinio (notae ad Platinam, De vitis Rom. Pont.) applies it to John XII, while Leander (Kirchengesch., II, 200) understands it as applicable generally to the baneful female influence on the papacy during the tenth century.

Other investigators endeavour to find in various occurrences and reports a more definite basis for the origin of this legend. Leo Allatius (Diss. Fab. de Joanna Papissa) connects it with the false prophetess Theota, condemned at the Synod of Mainz (847); Leibniz recalls the story that an alleged bishop Johannes Anglicus came to Rome and was there recognized as a woman. The legend has also been connected with the pseudo-Isidorian Decretals, e.g. by Karl Blascus ("Diatribes de Joanna Papissa", Naples, 1779), and Gfrörer (Kirchengesch., iii, 978).

Döllinger's explanation has met with more general approval ("Papstfabeln", Munich, 1863, 7-45). He recognizes the fable of Popess Joan as a survival of some local Roman folk-tale originally connected with certain ancient monuments and peculiar customs. An ancient statue discovered in the reign of Sixtus V, in a street near the Colosseum, which showed a figure with a child, was popularly considered to represent the popess. In the same street a monument was discovered with an inscription at the end of which occurred the well-known formula P.P.P. (*proprie pecuniâ posuit*) together with a pre-

fixed name which read: *Pap. (?Papius) pater patrum*. This could easily have given origin to the inscription mentioned by Jean de Mailly (see above). It was also observed that the pope did not pass along this street in solemn procession (perhaps on account of its narrowness). Further it was noticed that, on the occasion of his formal inauguration in front of the Lateran Basilica, the newly-elected pope always seated himself on a marble chair. This seat was an ancient bath-stool, of which there were many in Rome; it was merely made use of by the pope to rest himself. But the imagination of the vulgar took this to signify that the sex of the pope was thereby tested, in order to prevent any further instance of a woman attaining to the Chair of St. Peter.

Erroneous explanations — such as were often excogitated in the Middle Ages in connection with ancient monuments — and popular imagination are originally responsible for the fable of "Popess Joan" that uncritical chroniclers, since the middle of the thirteenth century, dignified by consigning it to their pages.

J.P. KIRSCH

Bl. Joanna of Portugal

Blessed Joanna of Portugal

Born at Lisbon, 16 February, 1452; died at Aveiro, 12 May, 1490; the daughter of Alfonso V, King of Portugal, and his wife Elizabeth. She was chiefly remarkable for the courage and persistency with which she opposed all attempts on the part of her father and brother to make her marry. She had resolved from childhood to be the spouse of Christ and, when possible to enter the religious state; but being the next heir to the throne in default of male issue, her wish was particularly obnoxious to her family and to the country. Joanna was very beautiful and her hand was sought by several princes. Once, in her father's absence, she had to act as regent of the kingdom, and in that office is said to have shown great capacity.

After many struggles, she entered the Dominican house called the Convent of Jesus, at Aveiro, where the rule was severe and very strictly kept. For a time she was compelled, for political reasons, to leave it and go back to Court. Finally, however, she was professed; and her life in the convent was so penitential, holy, and heroically humble, that she died in the odour of sanctity, and miracles followed her decease.

F. M. CAPES

Joannes de Sacrobosco

Joannes de Sacrobosco

(John Holywood), a monk of English origin, lived in the first half of the thirteenth century as professor of astronomy at Paris; died in that city, 1256.

He owed his reputation as an astronomer chiefly to his astronomical textbook "De Sphaera," which was used at many universities for several centuries. There is much difference of opinion as to the place and time of his birth. As the Latinized name de Sacrobosco (de Sacrobusto or Sacroboschus) seems to be a translation of the English name Holywood or Holybush, many say that Holywood (now Halifax), in Yorkshire, was his birthplace. Others give it as Holywood near Dublin; others again claim that he came from Nithsdale in Scotland. John made his studies at Oxford, but soon came to France, where, as a contemporary of St. Thomas Aquinas, he proved himself an efficient teacher of mathematics and astronomy. As many were deterred from undertaking the study of astronomy by such ponderous and to a great extent obscure works as those of Ptolemy, Alfraganus, and Albategnius, Holywood wisely resolved to write a compendium of spherical astronomy, which professors of this branch of knowledge could use as a textbook in their course of instruction. How well-timed his book was is shown by the numerous editions (amounting to almost one hundred) published before the middle of the seventeenth century, that is to say, before the new Copernican theory was generally adopted. The first printed copy dates from 1472, when it appeared at Ferrara, Italy, under the title: "Johannis de Sacrobusto seu Bosco anglici Sphaera mundi." Brevity and precision were the chief characteristics of the compendium. The lecturer was thus compelled to expound and amplify a great deal. Commentaries by various scholars were also published-- e.g., by Ratdolt (1482), Cirvelli (1494), Cicchi, Capuani, Fabri (1495); Georgi, Boneti (1500), etc. Among the best known is the commentary of Father Christopher Clavius, S.J., which also saw many editions. In spite of the numerous revisions which Sacrobosco's book went through, indeed perhaps even owing to these corrections, it remains to this day a useful aid to the proper historical appreciation of the different questions which exercised men's minds from the thirteenth century onwards to the time of the reform of astronomy under Copernicus, Kepler, and Newton. Sacrobosco also wrote a treatise on the computation of feast days (*Computus*), a tract on arithmetic (*Algorithmus*), and a small work in the field of practical geometry (*De Compositione quadrantis simplicis et compositi et utilitatibus utriusque*). In the latter there is one of the oldest examples of the figures then found almost invariably on the reverse of the so-called astrolabe, a graduated quadrant with

the help of which one could obtain the different hours of the day from the observation of the sun's height.

ADOLF MULLER

St. Joan of Arc

St. Joan of Arc

In French *Jeanne d'Arc*; by her contemporaries commonly known as *la Pucelle* (the Maid).

Born at Domremy in Champagne, probably on 6 January, 1412; died at Rouen, 30 May, 1431. The village of Domremy lay upon the confines of territory which recognized the suzerainty of the Duke of Burgundy, but in the protracted conflict between the Armagnacs (the party of Charles VII, King of France), on the one hand, and the Burgundians in alliance with the English, on the other, Domremy had always remained loyal to Charles.

Jacques d'Arc, Joan's father, was a small peasant farmer, poor but not needy. Joan seems to have been the youngest of a family of five. She never learned to read or write but was skilled in sewing and spinning, and the popular idea that she spent the days of her childhood in the pastures, alone with the sheep and cattle, is quite unfounded. All the witnesses in the process of rehabilitation spoke of her as a singularly pious child, grave beyond her years, who often knelt in the church absorbed in prayer, and loved the poor tenderly. Great attempts were made at Joan's trial to connect her with some superstitious practices supposed to have been performed round a certain tree, popularly known as the "Fairy Tree" (*l'Arbre des Dames*), but the sincerity of her answers baffled her judges. She had sung and danced there with the other children, and had woven wreaths for Our Lady's statue, but since she was twelve years old she had held aloof from such diversions.

It was at the age of thirteen and a half, in the summer of 1425, that Joan first became conscious of that manifestation, whose supernatural character it would now be rash to question, which she afterwards came to call her "voices" or her "counsel." It was at first simply a voice, as if someone had spoken quite close to her, but it seems also clear that a blaze of light accompanied it, and that later on she clearly discerned in some way the appearance of those who spoke to her, recognizing them individually as St. Michael (who was accompanied by other angels), St. Margaret, St. Catherine, and others. Joan was always reluctant to speak of her voices. She said nothing about them to her confessor, and constantly refused, at her trial, to be inveigled into descriptions of the appearance of the saints and to explain how she recognized them. None the less, she told her judges: "I saw them with these very eyes, as well as I see you."

Great efforts have been made by rationalistic historians, such as M. Anatole France, to explain these voices as the result of a condition of religious and hysterical exaltation which had been fostered in Joan by priestly influence, combined with certain prophecies current in the countryside of a maiden from the *bois chesnu* (oak wood), near which the Fairy Tree was situated, who was to save France by a miracle. But the baselessness of this analysis of the phenomena has been fully exposed by many non-Catholic writers. There is not a shadow of evidence to support this theory of priestly advisers coaching Joan in a part, but much which contradicts it. Moreover, unless we accuse the Maid of deliberate falsehood, which no one is prepared to do, it was the voices which created the state of patriotic exaltation, and not the exaltation which preceded the voices. Her evidence on these points is clear.

Although Joan never made any statement as to the date at which the voices revealed her mission, it seems certain that the call of God was only made known to her gradually. But by May, 1428, she no longer doubted that she was bidden to go to the help of the king, and the voices became insistent, urging her to present herself to Robert Baudricourt, who commanded for Charles VII in the neighbouring town of Vaucouleurs. This journey she eventually accomplished a month later, but Baudricourt, a rude and dissolute soldier, treated her and her mission with scant respect, saying to the cousin who accompanied her: "Take her home to her father and give her a good whipping."

Meanwhile the military situation of King Charles and his supporters was growing more desperate. Orléans was invested (12 October, 1428), and by the close of the year complete defeat seemed imminent. Joan's voices became urgent, and even threatening. It was in vain that she resisted, saying to them: "I am a poor girl; I do not know how to ride or fight." The voices only reiterated: "It is God who commands it." Yielding at last, she left Domremy in January, 1429, and again visited Vaucouleurs.

Baudricourt was still skeptical, but, as she stayed on in the town, her persistence gradually made an impression on him. On 17 February she announced a great defeat which had befallen the French arms outside Orléans (the Battle of the Herrings). As this statement was officially confirmed a few days later, her cause gained ground. Finally she was suffered to seek the king at Chinon, and she made her way there with a slender escort of three men-at-arms, she being attired, at her own request, in male costume - - undoubtedly as a protection to her modesty in the rough life of the camp. She always slept fully dressed, and all those who were intimate with her declared that there was something about her which repressed every unseemly thought in her regard.

She reached Chinon on 6 March, and two days later was admitted into the presence of Charles VII. To test her, the king had disguised himself, but she at once saluted him without hesitation amidst a group of attendants. From the beginning a strong party

at the court -- La Trémoille, the royal favourite, foremost among them -- opposed her as a crazy visionary, but a secret sign, communicated to her by her voices, which she made known to Charles, led the king, somewhat half-heartedly, to believe in her mission. What this sign was, Joan never revealed, but it is now most commonly believed that this "secret of the king" was a doubt Charles had conceived of the legitimacy of his birth, and which Joan had been supernaturally authorized to set at rest.

Still, before Joan could be employed in military operations she was sent to Poitiers to be examined by a numerous committee of learned bishops and doctors. The examination was of the most searching and formal character. It is regrettable in the extreme that the minutes of the proceedings, to which Joan frequently appealed later on at her trial, have altogether perished. All that we know is that her ardent faith, simplicity, and honesty made a favourable impression. The theologians found nothing heretical in her claims to supernatural guidance, and, without pronouncing upon the reality of her mission, they thought that she might be safely employed and further tested.

Returning to Chinon, Joan made her preparations for the campaign. Instead of the sword the king offered her, she begged that search might be made for an ancient sword buried, as she averred, behind the altar in the chapel of Ste-Catherine-de-Fierbois. It was found in the very spot her voices indicated. There was made for her at the same time a standard bearing the words *Jesus, Maria*, with a picture of God the Father, and kneeling angels presenting a fleur-de-lis.

But perhaps the most interesting fact connected with this early stage of her mission is a letter of one Sire de Rotslaer written from Lyons on 22 April, 1429, which was delivered at Brussels and duly registered, as the manuscript to this day attests, before any of the events referred to received their fulfilment. The Maid, he reports, said "that she would save Orléans and would compel the English to raise the siege, that she herself in a battle before Orléans would be wounded by a shaft but would not die of it, and that the King, in the course of the coming summer, would be crowned at Reims, together with other things which the King keeps secret."

Before entering upon her campaign, Joan summoned the King of England to withdraw his troops from French soil. The English commanders were furious at the audacity of the demand, but Joan by a rapid movement entered Orléans on 30 April. Her presence there at once worked wonders. By 8 May the English forts which encircled the city had all been captured, and the siege raised, though on the 7th Joan was wounded in the breast by an arrow. So far as the Maid went she wished to follow up these successes with all speed, partly from a sound warlike instinct, partly because her voices had already told her that she had only a year to last. But the king and his advisers, especially La Trémoille and the Archbishop of Reims, were slow to move. However, at Joan's earnest entreaty a short campaign was begun upon the Loire, which, after a

series of successes, ended on 18 June with a great victory at Patay, where the English reinforcements sent from Paris under Sir John Fastolf were completely routed. The way to Reims was now practically open, but the Maid had the greatest difficulty in persuading the commanders not to retire before Troyes, which was at first closed against them. They captured the town and then, still reluctantly, followed her to Reims, where, on Sunday, 17 July, 1429, Charles VII was solemnly crowned, the Maid standing by with her standard, for -- as she explained -- "as it had shared in the toil, it was just that it should share in the victory."

The principal aim of Joan's mission was thus attained, and some authorities assert that it was now her wish to return home, but that she was detained with the army against her will. The evidence is to some extent conflicting, and it is probable that Joan herself did not always speak in the same tone. Probably she saw clearly how much might have been done to bring about the speedy expulsion of the English from French soil, but on the other hand she was constantly oppressed by the apathy of the king and his advisers, and by the suicidal policy which snatched at every diplomatic bait thrown out by the Duke of Burgundy.

An abortive attempt on Paris was made at the end of August. Though St-Denis was occupied without opposition, the assault which was made on the city on 8 September was not seriously supported, and Joan, while heroically cheering on her men to fill the moat, was shot through the thigh with a bolt from a crossbow. The Duc d'Alençon removed her almost by force, and the assault was abandoned. The reverse unquestionably impaired Joan's prestige, and shortly afterwards, when, through Charles' political counsellors, a truce was signed with the Duke of Burgundy, she sadly laid down her arms upon the altar of St-Denis.

The inactivity of the following winter, mostly spent amid the worldliness and the jealousy of the Court, must have been a miserable experience for Joan. It may have been with the idea of consoling her that Charles, on 29 December, 1429, ennobled the Maid and all her family, who henceforward, from the lilies on their coat of arms, were known by the name of Du Lis. It was April before Joan was able to take the field again at the conclusion of the truce, and at Melun her voices made known to her that she would be taken prisoner before Midsummer Day. Neither was the fulfilment of this prediction long delayed. It seems that she had thrown herself into Compiègne on 24 May at sunrise to defend the town against Burgundian attack. In the evening she resolved to attempt a sortie, but her little troop of some five hundred encountered a much superior force. Her followers were driven back and retired desperately fighting. By some mistake or panic of Guillaume de Flavy, who commanded in Compiègne, the drawbridge was raised while still many of those who had made the sortie remained outside, Joan amongst the number. She was pulled down from her horse and became

the prisoner of a follower of John of Luxemburg. Guillaume de Flavy has been accused of deliberate treachery, but there seems no adequate reason to suppose this. He continued to hold Compiègne resolutely for his king, while Joan's constant thought during the early months of her captivity was to escape and come to assist him in this task of defending the town.

No words can adequately describe the disgraceful ingratitude and apathy of Charles and his advisers in leaving the Maid to her fate. If military force had not availed, they had prisoners like the Earl of Suffolk in their hands, for whom she could have been exchanged. Joan was sold by John of Luxembourg to the English for a sum which would amount to several hundred thousand dollars in modern money. There can be no doubt that the English, partly because they feared their prisoner with a superstitious terror, partly because they were ashamed of the dread which she inspired, were determined at all costs to take her life. They could not put her to death for having beaten them, but they could get her sentenced as a witch and a heretic.

Moreover, they had a tool ready to their hand in Pierre Cauchon, the Bishop of Beauvais, an unscrupulous and ambitious man who was the creature of the Burgundian party. A pretext for invoking his authority was found in the fact that Compiègne, where Joan was captured, lay in the Diocese of Beauvais. Still, as Beauvais was in the hands of the French, the trial took place at Rouen -- the latter see being at that time vacant. This raised many points of technical legality which were summarily settled by the parties interested.

The Vicar of the Inquisition at first, upon some scruple of jurisdiction, refused to attend, but this difficulty was overcome before the trial ended. Throughout the trial Cauchon's assessors consisted almost entirely of Frenchmen, for the most part theologians and doctors of the University of Paris. Preliminary meetings of the court took place in January, but it was only on 21 February, 1431, that Joan appeared for the first time before her judges. She was not allowed an advocate, and, though accused in an ecclesiastical court, she was throughout illegally confined in the Castle of Rouen, a secular prison, where she was guarded by dissolute English soldiers. Joan bitterly complained of this. She asked to be in the church prison, where she would have had female attendants. It was undoubtedly for the better protection of her modesty under such conditions that she persisted in retaining her male attire. Before she had been handed over to the English, she had attempted to escape by desperately throwing herself from the window of the tower of Beurevoir, an act of seeming presumption for which she was much browbeaten by her judges. This also served as a pretext for the harshness shown regarding her confinement at Rouen, where she was at first kept in an iron cage, chained by the neck, hands, and feet. On the other hand she was allowed

no spiritual privileges -- e.g. attendance at Mass -- on account of the charge of heresy and the monstrous dress (*difformitate habitus*) she was wearing.

As regards the official record of the trial, which, so far as the Latin version goes, seems to be preserved entire, we may probably trust its accuracy in all that relates to the questions asked and the answers returned by the prisoner. These answers are in every way favourable to Joan. Her simplicity, piety, and good sense appear at every turn, despite the attempts of the judges to confuse her. They pressed her regarding her visions, but upon many points she refused to answer. Her attitude was always fearless, and, upon 1 March, Joan boldly announced that "within seven years' space the English would have to forfeit a bigger prize than Orléans." In point of fact Paris was lost to Henry VI on 12 November, 1437 -- six years and eight months afterwards. It was probably because the Maid's answers perceptibly won sympathizers for her in a large assembly that Cauchon decided to conduct the rest of the inquiry before a small committee of judges in the prison itself. We may remark that the only matter in which any charge of prevarication can be reasonably urged against Joan's replies occurs especially in this stage of the inquiry. Joan, pressed about the secret sign given to the king, declared that an angel brought him a golden crown, but on further questioning she seems to have grown confused and to have contradicted herself. Most authorities (like, e.g., M. Petit de Julleville and Mr. Andrew Lang) are agreed that she was trying to guard the king's secret behind an allegory, she herself being the angel; but others -- for instance P. Ayroles and Canon Dunand -- insinuate that the accuracy of the *procès-verbal* cannot be trusted. On another point she was prejudiced by her lack of education. The judges asked her to submit herself to "the Church Militant." Joan clearly did not understand the phrase and, though willing and anxious to appeal to the pope, grew puzzled and confused. It was asserted later that Joan's reluctance to pledge herself to a simple acceptance of the Church's decisions was due to some insidious advice treacherously imparted to her to work her ruin. But the accounts of this alleged perfidy are contradictory and improbable.

The examinations terminated on 17 March. Seventy propositions were then drawn up, forming a very disorderly and unfair presentment of Joan's "crimes," but, after she had been permitted to hear and reply to these, another set of twelve were drafted, better arranged and less extravagantly worded. With this summary of her misdeeds before them, a large majority of the twenty-two judges who took part in the deliberations declared Joan's visions and voices to be "false and diabolical," and they decided that if she refused to retract she was to be handed over to the secular arm -- which was the same as saying that she was to be burned. Certain formal admonitions, at first private, and then public, were administered to the poor victim (18 April and 2 May), but she refused to make any submission which the judges could have considered satis-

factory. On 9 May she was threatened with torture, but she still held firm. Meanwhile, the twelve propositions were submitted to the University of Paris, which, being extravagantly English in sympathy, denounced the Maid in violent terms. Strong in this approval, the judges, forty-seven in number, held a final deliberation, and forty-two reaffirmed that Joan ought to be declared heretical and handed over to the civil power, if she still refused to retract. Another admonition followed in the prison on 22 May, but Joan remained unshaken. The next day a stake was erected in the cemetery of St-Ouen, and in the presence of a great crowd she was solemnly admonished for the last time. After a courageous protest against the preacher's insulting reflections on her king, Charles VII, the accessories of the scene seem at last to have worked upon mind and body worn out by so many struggles. Her courage for once failed her. She consented to sign some sort of retraction, but what the precise terms of that retraction were will never be known. In the official record of the process a form of retraction is inserted which is most humiliating in every particular. It is a long document which would have taken half an hour to read. What was read aloud to Joan and was signed by her must have been something quite different, for five witnesses at the rehabilitation trial, including Jean Massieu, the official who had himself read it aloud, declared that it was only a matter of a few lines. Even so, the poor victim did not sign unconditionally, but plainly declared that she only retracted in so far as it was God's will. However, in virtue of this concession, Joan was not then burned, but conducted back to prison.

The English and Burgundians were furious, but Cauchon, it seems, placated them by saying, "We shall have her yet." Undoubtedly her position would now, in case of a relapse, be worse than before, for no second retraction could save her from the flames. Moreover, as one of the points upon which she had been condemned was the wearing of male apparel, a resumption of that attire would alone constitute a relapse into heresy, and this within a few days happened, owing, it was afterwards alleged, to a trap deliberately laid by her jailers with the connivance of Cauchon. Joan, either to defend her modesty from outrage, or because her women's garments were taken from her, or, perhaps, simply because she was weary of the struggle and was convinced that her enemies were determined to have her blood upon some pretext, once more put on the man's dress which had been purposely left in her way. The end now came soon. On 29 May a court of thirty-seven judges decided unanimously that the Maid must be treated as a relapsed heretic, and this sentence was actually carried out the next day (30 May, 1431) amid circumstances of intense pathos. She is said, when the judges visited her early in the morning, first to have charged Cauchon with the responsibility of her death, solemnly appealing from him to God, and afterwards to have declared that "her voices had deceived her." About this last speech a doubt must always be felt. We cannot be sure whether such words were ever used, and, even if they were, the

meaning is not plain. She was, however, allowed to make her confession and to receive Communion. Her demeanour at the stake was such as to move even her bitter enemies to tears. She asked for a cross, which, after she had embraced it, was held up before her while she called continuously upon the name of Jesus. "Until the last," said Manchon, the recorder at the trial, "she declared that her voices came from God and had not deceived her." After death her ashes were thrown into the Seine.

Twenty-four years later a revision of her trial, the *procès de réhabilitation*, was opened at Paris with the consent of the Holy See. The popular feeling was then very different, and, with but the rarest exceptions, all the witnesses were eager to render their tribute to the virtues and supernatural gifts of the Maid. The first trial had been conducted without reference to the pope, indeed it was carried out in defiance of St. Joan's appeal to the head of the Church. Now an appellate court constituted by the pope, after long inquiry and examination of witnesses, reversed and annulled the sentence pronounced by a local tribunal under Cauchon's presidency. The illegality of the former proceedings was made clear, and it speaks well for the sincerity of this new inquiry that it could not be made without inflicting some degree of reproach upon both the King of France and the Church at large, seeing that so great an injustice had been done and had so long been suffered to continue unredressed. Even before the rehabilitation trial, keen observers, like Eneas Sylvius Piccolomini (afterwards Pope Pius II), though still in doubt as to her mission, had discerned something of the heavenly character of the Maid. In Shakespeare's day she was still regarded in England as a witch in league with the fiends of hell, but a juster estimate had begun to prevail even in the pages of Speed's "History of Great Britaine" (1611). By the beginning of the nineteenth century the sympathy for her even in England was general. Such writers as Southey, Hallam, Sharon Turner, Carlyle, Landor, and, above all, De Quincey greeted the Maid with a tribute of respect which was not surpassed even in her own native land. Among her Catholic fellow-countrymen she had been regarded, even in her lifetime, as Divinely inspired.

At last the cause of her beatification was introduced upon occasion of an appeal addressed to the Holy See, in 1869, by Mgr Dupanloup, Bishop of Orléans, and, after passing through all its stages and being duly confirmed by the necessary miracles, the process ended in the decree being published by Pius X on 11 April, 1909. A Mass and Office of St. Joan, taken from the "Commune Virginum," with "proper" prayers, have been approved by the Holy See for use in the Diocese of Orléans.

[*Note:* St. Joan was canonized in 1920 by Pope Benedict XV.]

HERBERT THURSTON

Job

Job

One of the books of the Old Testament, and the chief personage in it. In this article it is primarily the book which is treated. As opportunity, however, occurs, and so far as is permissible, Job himself will be considered. The subject will be discussed under the following heads: I. Position of the Book in the Canon; II. Authority; III. The Characters of the Poem; IV. Contents; V. Arrangement of the Main, Poetic Portion of the Book; VI. Design of the Book; VII. Teaching as to the Future Life; VIII. Integrity of the Book; IX. Condition of the Text; X. Technical Skill of the Author and the Metre; XI. Time of its Composition.

I. POSITION OF THE BOOK IN THE CANON

In the Hebrew Bible Psalms, Proverbs, and Job are always placed together, the Psalms coming first, while Job is put between the other two or, at times, comes last. The three books form a part of the Hagiographa (Kethubim), having sometimes the first place among the Hagiographa, while again they may be preceded by Ruth, or Paralipomenon, or Paralipomen with, Ruth (cf. lists in Ginsburg, "Introduction to Heb. Bible", London, 1897, 7). In the Greek Bible and the Vulgate Job now stands before Psalms and follows directly after the historical books. The old Greek and the Latin MSS., however, assign it the most varied positions; see, for exemple, the list of Melito of Sardis, and that of Origen as given by Eusebius, "Hist. Eccle.", IV, iv, 26, and vi, 25 (in P.G., XX., 398, 582). In the Syriac Bible Job is placed directly after the Pentateuch and before Josue (cf. the lists in Hodius, "De Bibliorum textibus", Oxford, 1705, 644 sqq.; Samuel Berger, "Hist. de la Vulgate", Paris, 1893, 331-39).

II. AUTHORITY

(1) Historical Accuracy

Many look upon the entire contents of the book as a freely invented parable which is neither historical nor intended to be considered historical; no such man as Job ever lived. Catholic commentators, however, almost without exception, hold Job to have actually existed and his personality to have been preserved by popular tradition. Nothing in the text makes it necessary to doubt his historical existence. The Scriptures seem repeatedly to take this for granted (cf. Ezech., xiv, 14; James, v, I 1; Tob., ii, 12-15, according to the Vulgate — in the Greek text of Tobias there is no mention of Job). All the Fathers considered Job an historical person; some of their testimonies may be found in Knabenbauer, "Zu Job" (Paris, 1886), 12-13. The Martyrology of the Latin Church mentions Job on 10 May, that of the Greek Church on 6 May (cf. Acta SS.' II,

May, 494). The Book of Job, therefore, has a kernel of fact, with which have been united many imaginative additions that are not strictly historical. What is related by the poet in the prose prologue and epilogue is in the main historical: the persons of the hero and his friends; the region where he lived; his good fortune and virtues; the great misfortune that overwhelmed him and the patience with which he bore it; the restoration of his Prosperity. It is also to be accepted that Job and his friends discussed the origin of his sufferings, and that in so doing views were expressed similar to those the poet puts into the mouths of his characters. The details of the execution, the poetic form, and the art shown in the arrangement of the arguments in the dispute are, however, the free creation of the author. The figures expressive of the wealth of Job both before and after his trial are imaginatively rounded. Also in the narrative of the misfortunes it is impossible not to recognize a poetic conception which need not be considered as strictly historical. The scene in heaven (i, 6; ii, 1) is plainly an allegory which shows that the Providence of God guides the destiny of man (cf. St. Thomas, "In Job"). The manifestation of God (xxxviii, 1) generally receives a literal interpretation from commentators. St. Thomas, however, remarks that it may also be taken metaphorically as an inner revelation accorded to Job.

(2) Divine Authority of the Book

The Church teaches that the book was inspired by the Holy Spirit. Thus all that its author gives as historical fact or otherwise guarantees possesses unfailing Divine truth. The question, however, arises, what does the book guarantee? (a) Everything in prologue or epilogue that is the comment of the author is Divine truth; nevertheless, what is perhaps poetic ornament must not be confounded with historical verity or objective dogmatic precepts. The same authority is possessed by the utterances assigned by the poet to God. The like is true of the speeches of Eliu. Some think the speeches of Eliu are to be judged just as are those of Job and his friends. (b) The speeches of Job and his three friends have in themselves no Divine authority, but only such human importance as Job and his three friends are Personally entitled to. They have, however, Divine authority when, and in as far as, they are approved by the author expressly or tacitly. In general, such tacit approbation is to be understood for all points concerning which the disputants agree, unless the author, or God, or Eliu, shows disapproval. Thus the words of Job have in large degree Divine authority, because the view he maintains against the three friends is plainly characterized by the author as the one relatively correct. Yet much that the three friends say is of equal importance, because it is at least tacitly approved. St. Paul argues (I Cor., iii, 19) from a speech of Eliphaz (Job, v, 13) as from an inspired writing. (c) In particular places, especially where descriptions of nature are given or other secular matters are referred to, the caution prescribed by the rules of hermeneutics should be observed.

III. THE CHARACTERS OF THE POEM

Apart from the prologue and epilogue, the Book of Job consists of a succession of speeches assigned to distinct persons. There are six speakers: Yahweh, Eliu, Job, and Job's three friends, Eliphaz, Baldad, and Sophar.

(1) Job

The chief personage is Job.

(a) Name

He is called the "persecuted one", that is, the one tempted by (personified) suffering, the one hard beset, the patient sufferer. It is no longer possible to decide whether the name was originally different and was later changed into the expressive form in folklore on account of Job's fate. Many commentators do not accept this explanation of the name.

(b) Age in which Job lived

According to the usual and well-founded assumption, Job lived long before Moses. This is shown by the great age he attained. He was no longer young when overtaken by his great misfortune (xii, 12; xxx, 1); after his restoration he lived one hundred and forty years longer (xlii, 16). His wealth like that of the Patriarchs, consisted largely in flocks and herds (i, 3; xlii, 12). The kesitah or piece of money mentioned in xlii, 11, belongs to patriarchal times; the only other places in which the expression occurs are Gen., xxxiii, 19, and Jos., xxiv, 32. The musical instruments referred to (xxi, 12; xxx, 31) are only those mentioned in Genesis (Gen. iv, 21; xxxi, 27): organ, harp, and timbrel. Job himself offers sacrifice as the father of the family (i, 5), as was also the custom of the Patriarchs. An actual offering for sin in the Mosaic sense he was not acquainted with; the holocaust took its place (i, 5; xlii, 8).

(c) Religion of Job

Job evidently did not belong to the chosen people. He lived, indeed, outside of Palestine. He and the other characters betray no knowledge of the specifically Israelitic institutions. Even the name of God peculiar to the chosen people, *Yahweh*, is carefully avoided by the speakers in the poetic part of the book, and is only found, as if accidentally, in xii, 9, and according to some MSS. in xxviii, 28. The sacrifice in xlii, 8, recalls the sacrifice of Balaam (Num., xxiii, 1), consequently a custom outside of Israel. For the solution of the problem of suffering the revelations made to the Patriarchs or even Moses are never referred to. Nevertheless Job and his friends venerated the one true God. They also knew of the Flood (xxii, 16), and the first man (xv, 7, and Hebrew, xxxi, 33).

(d) Country in which Job lived

Job belonged to the "people of the East" (i, 3). Under this name were included the Arabian (Gen., xxv, 6) and Aramaean (Num., xxxiii, 7) tribes which lived east of the

Jordan basin and in the region of the Euphrates (Gen., xxix, 1). Job seems to have been an Aramaean, for he lived in the land of Hus (i, I; *Ausitis*). Hus, a man's name in Genesis, is always used there in close connection with Aram and the Aramaean (Gen., x, 23; xxii, 21; xxxvi, 28). His home was certainly not far from Edom where Eliphaz lived, and it must be sought in Eastern Palestine, not too far north, although in the region inhabited by the Aramaeans. It was located on the border of the Syro-Arabian desert, for it was exposed to the attacks of the marauding bands which wandered through this desert: the Chaldeans (i, 17) of the lower Euphrates and the Sabeans (i, 15), or Arabs. Many, following an old tradition, place the home of Job in the Hauran, in the district of Naiwa (or Neve), which is situated about 36° East of Greenwich and in almost the same latitude as the northern end of Lake Genesareth. The location is possible, but positive proof is lacking. Some seek the home of Job in Idumea, others in the land of the *Ausitai*, who, according to Ptolemy (Geogr., V, xix, par. 18, 2), lived in Northern Arabia near the Babylon. The land of Hus is also mentioned in Jer., xxv, 20, and Lam., iv, 21. In the first reference it is used in a general sense for the whole East; in the latter it is said that the Edomites live there.

(e) The Standing of Job

Job was one of the most important men of the land (i, 3; xxix, 25) and had many bondsmen (xxx, 39). The same is true of the friends who visited him; in the Book of Tobias these are called "kings" (Tob., ii, 15, in Vulgate). In the Book of Job also Job seems to be described as a king with many vassals under him (xxix). That he had brothers and relations is seen in xix and in the epilogue.

(f) Job and Jobab

An appendix to the Book of Job in the Septuagint identifies Job with King Jobab of Edom (Gen. xxxvi, 33). Nothing in the book shows that Job was ruler of Edom; in Hebrew the two names have nothing in common.

(2) Eliphaz, Baldad and Sophar

The most important of Job's three friends was Eliphaz of Theman. The name shows him to be an Edomite (Gen., xxxvi, 11, 15). The Themanites of Edom were famous for their wisdom (Jer., xlix, 7; Abd., S; Bar., iii, 22 sq.). Eliphaz was one of these sages (xv, 9). He was far advanced in years (xv, 10), and much older than the already elderly Job (xxx, 1). The second of Job's friends was Baldad the Suhite, who seems to have belonged to Northern Arabia, for Sue was a son of Abraham by Cetura (Gen., xxv, 2, 6). He may have been of the same age as Job. The third friend, Sophar, was probably also an Arabian. The Hebrew text calls him a Naamathite. Naama was a small town in the territory belonging to Juda (Jos., xv, 41), but Sophar hardly lived there. Perhaps the preferable reading is that of the Septuagint which calls Sophar always a Minaean; the Minaeans

were an Arabian tribe. Sophar was far younger than Job (cf. Job's reply to Sophar, xii, 11-12; xiii, 1-2).

(3) Eliu

Like Job, Eliu the Buzite was an Aramean; at least this is indicated by his native country, Buz, for Buz is closely connected (Gen., xxii, 21) with Hus. Eliu was much younger than Sophar (xxxii, 6).

(4) Besides the speakers a large number of listeners were present at the discussion (xxxiv, 2, 34); some maintained a neutral position, as did Eliu at first.

IV. CONTENTS

The Book of Job consists of (1) a prologue in prose (i-ii), (2) a poetic, main division (iii-xlii, 6), and (3) an epilogue also in prose (xlii, 7-17).

(1) The prologue narrates how, with the permission of God, a holy man Job is tried by Satan with severe afflictions, in order to test his virtue. In succession Job bears six great temptations with heroic patience, and without the slightest murmuring against God or wavering in loyalty to him. Then Job's three friends, Eliphaz, Baldad, and Sophar, come to console him. Their visit is to become the seventh and greatest trial.

(2) The poetical, main division of the book presents in a succession of speeches the course of this temptation. The three friends are fully convinced that trouble is always a result of wrongdoing. They consider Job, therefore, a great sinner and stigmatize his assertions of innocence as hypocrisy. Job is hurt by the suspicion of his friends. He protests that he is no evil-doer, that God punishes him against his deserts. In the course of his speech he fails in reverence towards God, Who appears to him not unrighteous, but more as a severe, hard, and somewhat inconsiderate ruler than as a kind Father. Taking into consideration that the language is poetic, it is true that his expressions cannot be pushed too far, but the sharp reproofs of Eliu (xxxiv, 1-9, 36-37; xxxv, 16) and of Yahweh (Xxxviii, 2; xl, 3-9) leave no doubt of his sin. In answering his friends Job emphasizes that God indeed is accustomed to reward virtue and to punish wickedness (xxvii, 7-23; xxxi). He even threatens his friends with the judgment of God on account of their unfriendly suspicion (vi, 14; xiii, 7-12; xvii., 4; xix, 29). He rightly proves, however violently, that in this world the rule has many exceptions. Almost universally, he says, the wicked triumph and the innocent suffer (ix, 22-24, xxi, xxiv). Yet for all this Job, like his friends, regards all suffering as a punishment for personal sins, although he does not, as his friends, consider it a punishment of gross sin. Job looks upon the sufferings of the righteous as an almost unjust severity of God, which he inflicts for the slightest mistakes, and which the most virtuous man cannot escape (vii, 21; ix 30-21; X, 6, 13-14). The expressions of depression and irreverence uttered by Job are, besides, only venial sins, which human beings can never fully avoid. Job himself says that his words are not to be taken too exactly, they are almost the invol-

untary expression of his pain (vi, 2-10, 26-27). Many of his utterances the character of temptations in thought which force themselves out almost against the will, rather than of voluntary irreverence towards God, although Job's error was greater than he was willing to acknowledge. Thus Job bore all the tests triumphantly, even those caused by his friends. No matter how terrible the persecutions of God might be, Job held fast to Him (vi, 8-10) and drew ever closer to Him (xvii, 9). In the midst of his sufferings he lauds God's power (xxvi, 5-14) and wisdom (xxviii). Satan, who had boasted that he could lead Job into sin against God (i, 11; ii, 5), is discredited. The epilogue testifies expressly to Job's faithfulness (xlii, 7-9). After much discourse (iii-xxii) Job finally succeeds in silencing the three friends, although he is not able to convince them of his innocence. In a series of monologues (xxiii-xxx), interrupted only by a short speech by Baldad (xxv), he once more renews his complaints (xxiii-xxiv), extols the greatness of God (xxvi-xxviii), and closes with a forcible appeal to the Almighty to, examine his case and to recognize his innocence (xxix-xxx). At this juncture Eliu, a youth who was one of the company of listeners, is filled by God with the spirit of prophecy (xxxii, 18-22; xxxvi, 2-4). In a long discourse he solves the problem of suffering, which Job and his friends had failed to explain. He says that suffering, whether severe or light, is not always a result of sin; it is a means by which God tries and promotes virtue (xxxvi, 1-21), and is thus a proof of God's love for his friends. The sufferings of Job are also such a testing (xxxvi, 16-21). At the same time Eliu emphasizes the fact that the dispensations of God remain inexplicable and mysterious (xxxvi, 22; xxxvii, 24). Yahweh speaks at the end (xxxviii-xlii, 6). He confirms the statements of Eliu, carrying further Eliu's last thought of the inexplicability of the Divine decrees and works by a reference to the wonder of animate and inanimate nature. Job is severely rebuked on account of his irreverence; he confesses briefly his guilt and promises amendment in the future.

(3) In the epilogue Yahweh bears witness in a striking manner to the innocence of His servant, that is to Job's freedom from gross transgression. The three friends are commanded to obtain Job's intercession, otherwise they will be severely punished for their uncharitable complaints against the pious sufferer. Yahweh forgives the three at the entreaty of Job, who is restored to double his former prosperity.

In his lectures on "Babel und Bibel" Delitzsch says that the Book of Job expresses doubt, in language that borders on blasphemy, of even the existence of a just the God. These attacks arise from an extreme view of expressions of despondency. Further, the assertions often heard of late that the book contains many mythological ideas prove to be mere imagination.

V. ARRANGEMENT OF THE MAIN, POETIC PORTION OF THE BOOK

(1) The poetic portion of the book may be divided into two sections: chs. iii-xxii and xxiii-xlii, 6. The first section consists of colloquies: the three friends in turn express

their views, while to each speech Job makes a rejoinder. In the second section the three friends are silent, for Baldad's interposition (xxv) is as little a formal discourse as Job's brief comments (xxxix, 34-35 and xlii, 2-6). Job, Eliu, and Yahweh speak successively, and each utters a series of monologues. The length of the two sections is exactly, or almost exactly, the same, namely 510 lines each (cf. Hontheim "Das Buch Job", Freiburg im Br., 1904, 44). The second division begins with the words: "Now also my words are in bitterness" (xxiii, 2; A.V.: "Even to-day is my complaint bitter"). This shows not only that with these words a new section opens, but also that the monologues were not uttered on the same day as the colloquies. The first monologue is evidently the opening of a new section, not a rejoinder to the previous speech of Eliphaz (xxii).

(2) The colloquies are divided into two series: chs. iii-xiv and xv-xxii. In each series Eliphaz, Baldad, and Sophar speak in turn in the order given (iv-v, viii, xi, and xv, xviii, xx), while Job replies to each of their discourses (vi-vii, ix-x, xii-xiv, xvi-xvii, xix, xxi). The first series, furthermore, is opened by a lament from Job (iii), and the second closes with a speech by Eliphaz in which he weakly reproaches Job (xxii — it is generally held that this chapter begins a new series), who rightly leaves this address unanswered. Each series contains seven speeches. In the first the friends try to convince Job of his guilt and of the necessity and good results of amendment. Eliphaz appeals to Revelation (iv, 12-21), Baldad to the authority of the Fathers 8-10), Sophar to understanding or philosophy (xi, 5-12). Eliphaz lays weight on the goodness of God (v, 9-27), Baldad on His justice (viii, 2-7), Sophar on His all-seeing power and wisdom, to which Job's most secret sins were plain, even those which Job himself had almost forgotten (xi, 5-12). In the second series of speeches the friends try to terrify Job: one after the other, and in much the same form of address, they point out the terrible punishment which overtakes hidden sin. During the first series of speeches Job's despondency continually increases, even the thought of the future bringing him no comfort (xiv, 7-22); in the second series the change to improvement has begun, and Job once more feels joy and hope in the thought of God and the future life (xvi, 18-22; xix, 23-28).

(3) The monologues may also be divided into two series. The first includes the monologues of Job, seven in number. First Job repeats his complaint to God (xxiii-xxiv), asserts, however, in three speeches his unchangeable devotion to God by lauding in brilliant discourse the power (xxvi), justice (xxvii), and wisdom (xxviii) of the Almighty. Finally in three further speeches he lays his case before God, imploring investigation and recognition of his innocence: How happy was I once (xxix), how unhappy am I now (xxx), and I am not to blame for this change (xxxi). The second series contains the discourses of Eliu and Yahweh, also seven in number. In three speeches Eliu explains the sufferings which befall men. Trouble is often a Divine instruction, a warning to the godless to reform (xxxii-xxxiii, 30), thus revealing the goodness of God; it is often

simply a punishment of the wicked who are perhaps in no way bettered by it (xxxiii, 31-xxxv), thus revealing the justice of God.

(4) Finally, troubles can also overtake the just as a trial which purifies and increases their virtue (xxxvi-xxxvii), thus revealing God's unfathomable wisdom. The following four utterances of Yahweh illustrate the inscrutableness, already touched upon by Eliu, of the Divine wisdom by dwelling upon the wonders of inanimate nature (xxxviii, 1-38), of the animal world (xxxviii, 39-xxxix), and especially by referring to the great monsters of the animal world, the hippopotamus and the crocodile (xl, 10-xli). He then closes with a rebuke to Job for expressing himself too despondently and irreverently concerning his sufferings, upon which Job confesses his guilt and promises amendment (xxxix, 31-xl, 9 and xlii, 1-6); it appears that xxxix, 31-xl, 9, should be inserted after xli.

VI. DESIGN OF THE BOOK

The Book of Job is intended to give instruction. What it lays special stress on is that God's wisdom and Providence guide all the events of this world (cf. xxviii, xxxviii-xii). The main subject of investigation is the problem of evil and its relation to the Providence of God; particularly considered is the suffering of the upright in its bearing on the ends intended in the government of the world. The Book of Job is further intended for edification, for Job is to us an example of patience. It is, finally, a book of consolation for all sufferers. They learn from it that misfortune is not a sign of hatred, but often a proof of special Divine love. For the mystical explanation of the book, especially of Job as a type of Christ, cf. Knabenbauer, "In Job", 28-32.

VII. TEACHING AS TO THE FUTURE LIFE

In his sufferings Job abandoned all hope for the restoration of health and good fortune in this world (xvii, 11-16; xxi). If he were to continue to hold to the hope of reward here Satan would not be defeated. In the complete failure of all his earthly hopes, Job fastens his gaze upon the future. In the argument of the first series of speeches Job in his depression regards the future world only as the end of the present existence. The soul indeed lives on, but all ties with the present world so dear to us are forever broken. Death is not only the end of all earthly suffering (ii, 13-19), but also of all earthly life (vii, 6-10), and all earthly joys (x, 21-22), with no hope of a return to this world (xiv, 7-22). It is not until the second series that Job's thoughts on the future life grow more hopeful. However, he expects as little as in the first discussion a renewal of the life here, but hopes for a higher life in the next world. As early as chapter xvi (19-22) his hope in the recognition of his virtue in the next world is strengthened. It is, however, in xix (23-28) that Job's inspired hope rises to its greatest height and he utters his famous declaration of the resurrection of the body. Notwithstanding this

joyous glimpse into the future, the difficult problem of the present life still remained: "Even for this life how can the wisdom and goodness of God be so hard towards His servants?" Of this the complete solution, so far as such was possible and was included in the plan of the book, does not appear until the discourses of Eliu and Yahweh are given. Great efforts have been made by critics to alter the interpretation of ch. xix, and to remove from it the resurrection of the body; the natural meaning of the words, the argument of the book, and the opinion of all early commentators make this attempt of no avail (cf. commentaries, as those of Knabenbauer, Hontheim, etc.; also the article "Eine neue Uebersetzung von Job xix, 25-27" in the "Zeitschrift für kath. Theologie", 1907, 376 sqq.). See the commentaries for the doctrines of the Divine wisdom (xxviii), etc.

VIII. INTEGRITY OF THE BOOK

Prologue and epilogue (i-ii; xlii, 7 sqq.) are regarded by many as not parts of the original work. The prologue, though, is absolutely essential. Without it the colloquies would be unintelligible, nor would the reader know the end whether to believe the assertion of Job as to his innocence or not. Upon hearing the rebukes of Eliu and Yahweh, he might be exposed to the danger of siding against Job. Without the epilogue the close of the work would be unsatisfactory, an evident humiliation of the righteous. For detailed treatment of this and kindred questions see Hontheim, *op. cit.*

(2) Many also regard ch. xxvii, 7-23, as a later addition; in this passage Job maintains that the wicked suffer in this world, while elsewhere he has declared the contrary. The answer is: Job teaches that God is accustomed even in this world to reward the good in some measure and to punish the wicked. In other passages he does not deny this rule, but merely says it has many exceptions. Consequently there is no contradiction. [See above, IV (2).] Besides it may be conceded that Job is not always logical. At the beginning, when his depression is extreme, he lays too much emphasis on the prosperity of the godless; gradually he becomes more composed and corrects earlier extreme statements. Not everything that Job says is the doctrine of the book. [See above, II (2).]

(3) Many regard ch. xxviii as doubtful, because it has no connection with what goes before or follows and is in no way related to the subject-matter of the book. The answer to this is that the poet has to show how the suffering of Job does not separate him from God, but, against the intent of Satan, drives him into closer dependence on God. Consequently he represents Job, after his complaints (xxiii-xxv), as glorifying God again at once, as in xxvi-xxvii, in which Job lauds God's power and righteousness. The praise of God is brought to a climax in xxviii, where Job extols God's power and righteousness. After Job has thus surrendered himself to God, he can with full confidence, in xxix-xxxi, lay his sorrowful condition before God for investigation. Con-

sequently xxviii is in its proper place, connects perfectly with what precedes and follows, and harmonizes with the subject-matter of the book.

(4) Many regard the description of hippopotamus and crocodile (xl, 10-xli) as later additions, because they lack connection with xxxix, 31-xl, 9, belonging rather to the description of animals in xxxix. In reply it may be said that this objection is not without force. Who ever agrees with the present writer in this opinion need only hold that xxxix, 31-xl, 9, originally followed xli. The difficulty is then settled, and there is no further reason for considering the splendid description of the two animals as a later insertion.

(5) There is much disagreement as to the speeches of Eliu (xxxii-xxxvii). With the exception of Budde, nearly all Protestant commentators regard them as a later insertion, while the great majority of Catholic investigators rightly defend them as belonging to the original work. The details of this discussion cannot be entered upon here, and the reader is referred to the commentaries of Budde and Hontheim. The latter sums up his long investigation in these words: "The section containing the speeches of Eliu has been carefully prepared by the poet and is closely and with artistic correctness connected with the previous and following portions. It is united with the rest of the book by countless allusions and relations. It is dominated by the same ideas as the rest of the poem. It makes use also of the same language and the same method of presentation both in general and in detail. All the peculiarities exhibited by the author of the argumentative speeches are reproduced in the addresses of Eliu. The content of this portion is the saving of the honour of Job and is essential as the solution of the subject of discussion. Consequently there is no reason whatever for assuming that it is an interpolation; everything is clearly against this" (Hontheim, *op. cit.*, 20-39. Cf. also Budde, "Beiträge zur Kritik des Buches Hiob", 1876; Knabenbauer, "In Job"). Anyone who desires to consider the speeches of Eliu as a later addition must hold, by the teaching of the Church, that they are inspired.

(6) There is in general no reason whatever for considering any important part of the book either large or small as not belonging to the original text. Equally baseless is the supposition that important portions of the original composition are lost.

IX. CONDITION OF THE TEXT

The most important means for judging the Massoretic Text are the old translations made directly from the Hebrew: the Targum, Peshito, Vulgate, Septuagint, and the other Greek translations used by Origen to supplement the Septuagint. with the exception of the Septuagint, the original of all these translations was essentially identical with the Massoretic Text; only unimportant differences can be proved. On the other hand, the Septuagint in the form it had before Origen, was about four hundred lines, that is one-fifth shorter than the Massoretic Text. Origen supplied what was lacking

in the Septuagint from the Greek translations and marked the additions by asterisks. Copyists generally omitted these critical signs, and only a remnant of them, mixed with many errors, has been reserved in a few manuscripts. Consequently knowledge of the old form of the Septuagint is very imperfect. The best means now of restoring it is the Copto-Sahidic translation which followed the Septuagint and does not contain Origen's additions. This translation was published by Ciasca, "Sacrorum Bibliorum fragments Copto-Sahidica" (2 vols., Rome, 1889), and by Amelineau in "Transactions of the Society of Biblical Archeology", IX (1893), 409-75. Hatch and Bickell claim that the shorter text of the Septuagint is in general the earlier one, consequently that the present Massoretic Text is an expansion of a shorter original. Nearly all other investigators hold the opposite, that the Septuagint was produced by cutting down an original which varied but little from the Massoretic Text. This was also Bickell's view in earlier years, and is the real state of the case. To avoid repetition and discursive statements, the translators of the Septuagint omitted much, especially where the reading seemed doubtful, translation difficult, the content anthropomorphic, unworthy of Job, or otherwise objectionable. In doing this the translation frequently disregards the fundamental principle of Hebrew poetry, the parallelism of the lines. In brief the critical value of the Septuagint is not great; in almost all instances the Massoretic Text is to be preferred. Taken altogether, the Massoretic has preserved the original form of the consonantal text fairly well, and needs but a moderate amount of critical emendation. The punctuation (vowel signs and accents), it is true, frequently requires correction, for the punctuators did not always lightly understand the often difficult text; at times also words are not properly divided.

X. TECHNICAL SKILL OF THE AUTHOR AND THE METRE

Chapters iii-xlii, 6, are poetical in form. This part of the book consists of about 1020 lines. The verses, which do not always correspond with the Massoretic verses of our editions, are generally divided into two clauses or lines which are parallel in content. There are also a number of verses, about sixty, of three clauses each, the so-called triplets. It is an unjustifiable violence to the text when a critic by removing one clause changes these triplets into couplets. The verses form the twenty-eight speeches of the book which, as already stated, make four series of seven speeches each. The speeches are divided, not directly into lines, but into strophes. It is most probable that the speeches formed from strophes often, perhaps always follow the law of "choral structure" discovered by Father Zenner. That is, the speeches often or always consist of pairs of strophes, divided by intermediate strophes not in pairs. The two strophes forming a pair are parallel in content and have each the same number of lines. For a further discussion of this subject see Hontheim, *op. cit.* Investigators are not agreed as to the construction of the line. Some count the syllables, others only the stresses, others again

the accented words. It would seem that the last view is the one to be preferred. There are about 2100 lines in the Book of Job, containing generally three, at times two or four, accented words. Besides the commentaries, cf. Gietmann, "Parzival, Faust, Job" (Freiburg im Br., 1887); Baumgartner, "Gesch. d. Weltliteratur", I (Freiburg im Br., 1901), 24 sqq. One peculiarity of the author of Job is his taste for play upon words; for example, ch. xxi contains a continuous double meaning.

XI. TIME OF COMPOSITION

The author of the book is unknown, neither can the period in which it was written be exactly determined. Many considered the book the work of Job himself or Moses. It is now universally and correctly held that the book is not earlier than the reign of Solomon. On the other hand it is earlier than Ezechiel (Ezech., xiv, 1 -20). For it is the natural supposition that the latter gained his knowledge of Job from the Book of Job, and not from other, vanished, sources. It is claimed that allusions to Job have also been found in Isaias, Amos, Lamentations, some of the Psalms, and especially Jeremias. Many Catholic investigators even at the present time assign the book to the reign of Solomon; the masterly poetic form points to this brilliant period of Hebrew poetry. The proofs, however, are not very convincing. Others, especially Protestant investigators, assign the work to the period after Solomon. They support this position largely upon religious historical considerations which do not appear to have much force.

Full bibliographies are to be found in CORNELLY, *Introductio in U. T. libros sacros*, II (2nd ed., 1897), ii, 71 sqq., and in the commentaries of DILLMANN and BUDDE, cf. also the various Introductions to the Scripture, as GIGOT (1906); TROCHON (1886); KAULEN (4th ed., 1899); CORNELLY (2nd ed., Paris, 1897); further the articles on Job in the theological and Biblical encyclopedias. Of the large number of commentaries on Job the following may be mentioned. Catholic: WELTE (1849); KNABENBAUER (Paris, 1886), HONTHEIM (1904). Non-Catholic: DELITZSCH (2nd ed., 1876); DILLMANN (4th ed., 1891); DAVIDSON in *Cambridge Bible* (1895); BUDDE (1896); DUHM (1897); WIGHT AND HIRSCH, *A Commentary on the Book of Job from a Hebrew Manuscript in the University Library, Cambridge* (1905). Among special works mention may be made of: BICKELL, *De indole ac ratione versionis Alexandrinae in interpretando libro Jobi* (1862); IDEM, *Carmina Vet. Test. metrica* (1852); GIETMANN, *De re Metrica Hebraeorum* (1880); VETTER, *Die Metrik des Buches Job* (1897); BEER, *Text des Buches Hiob untersucht* (1897); ROGER, *Eschatologie des Buches Job* (1901); POSSELT, *Der Verfasser der Eliureden* (1909).

JOSEPH HONTHEIM

Jocelin

Jocelin

Cistercian monk and Bishop of Glasgow; d. at Melrose Abbey in 1199. On 22 April, 1170, being then prior of Melrose, he was chosen abbot, on the resignation of Abbot William, and four years later (23 May, 1174) was elected Bishop of Glasgow at Perth, in succession to Ingelram. He was consecrated at Clairvaux on 1 June, 1175, by Eskilus, Archbishop of Lund papal legate to Denmark. In the following January he attended a council at Northampton, and Hoveden reports a speech made by him in opposition to the claims of York to jurisdiction over the Scottish Church. In 1182 Jocelin visited Rome, obtained from Lucius III the absolution of King William the Lion from ecclesiastical censures, and brought back to him the Golden Rose in token of the papal forgiveness. We find Jocelin engaged for several succeeding years in negotiations between Scotland and Rome as to the succession to the See of St. Andrews. He undertook also the restoration and enlargement of Glasgow cathedral, of which he built the beautiful crypt, and himself performed the dedication ceremony on 6 July, 1197. The member of prebends and canons of the cathedral was considerably augmented by him, and he bestowed large benefactions on Paisley, Kelso, and other monasteries. Bishop Jocelin died at Melrose in 1199, and has buried in the choir of the abbey church. The Melrose Chronicle describes him as a man of mild, courteous, and moderate character.

Registrum Episcop. Glasguens. (Bann. Club. Edinburgh, 1843); Chronica de Maitros (ibid. 1835), 81, 86, 87, etc.: GORDON, Scotichonicon, II (London, 1875), 473-5 (with an engraving of Jocelin's seal), Chron. Rogeri de Hovedene, II (ed. STU8BS, London, 1869), 91-2.

D.O. HUNTER-BLAIR

Jocelin de Brakelond

Jocelin de Brakelond

An English chronicler, of the late twelfth century. He was the monk of Bury St. Edmund's whose history of the abbey under the feeble Abbot Hugh and the energetic Abbot Sampson furnished Carlyle with the material for the powerful and sympathetic second book of "Past and Present". When Jocelin entered the abbey in 1173 Sampson was his novice-master and when nine years later Sampson became abbot he chose Jocelin as his chaplain and constant companion. He filled this office from 1182 to 1188. Ten years later he was guest-master and in 1212 he was almoner. There is no record

of his death. He is last mentioned on 24 April 1215 when Abbot Hugh II consulted him as to the abbey manors. His chronicle covers the history of the abbey from 1173 to 1202 and includes the story of Henry of Essex. It was first edited for the Camden Society by J. G. Rokewood in 1843, this edition was used by Carlyle. It has been re-edited by Thomas Arnold in the "Memorials of St. Edmund's Abbey", Rolls Series, 1890. His book on St. Robert, the boy alleged to have been murdered by Jews, is not extant. Jocelin's work is marked by shrewd observation and kindly humour. Carlyle wrote of him: "The man is of patient, peaceable, loving, clear-smiling nature; open for this and that. A wise simplicity is in him; much natural sense; a veracity that goes deeper than words." He is described by a brother monk as a man "eximiae religionis, potens sermone et opere."

Memorials of St. Edmund's Abbey: Introduction by ARNOLD, I, lix in Rolls Series (London, 1890); Cronica Joscelini, ed. ROKEWOOD (Camden Soc., London, 1840); The Chronicle of Jocelin of Brakelond, ed. CLARKE (London, 1903).

EDWIN BURTON

Jocelin of Wells

Jocelin of Wells

(Or JOSCELINE)

Bishop of Bath and Wells (JOCELINUS THOTEMAN), d. 19 Nov., 1242. He was probably a native of Wells in Somerset, though no details of his parentage have survived. In 1203 he was acting as one of the king's justiciars at Westminster, and in the same year he was one of the *custodes* of the vacant See of Lincoln. He was already a canon of Wells and in 1203-4 he received two benefices, Lugwardine and Urchenefeld in Herefordshire. When Savaric attempted to gain possession of Glastonbury Abbey, the monks appealed to the pope: whereupon Savaric sent Jocelin with the precentor of Wells to force them to withdraw their appeal. In the year 1205 Savaric died and on 3 February, 1205-6 Jocelin was elected bishop in his stead by the canons of Bath with the concurrence of the chapter of Wells. He was consecrated at Reading on 28 May, 1206. Two years later he left England in consequence of the interdict. The king outlawed him and seized his estates, but these were restored in 1213, when John submitted to the pope. In 1215 he aided Stephen Langton to obtain Magna Charta and his name occurs in the charter as one of the king's counsellors.

On the death of John, Jocelin and the Bishop of Winchester anointed and crowned the boy-king, Henry III, and he actively supported Hubert de Burgh in expelling the French forces which remained in England, and in regaining for the king the royal castles which had been seized by Falkes de Breauté and other unruly barons. In 1218

he acted as one of the itinerant justiciars for the south-west of England and at the same time he brought to a close the long dispute between his diocese and the Abbey of Glastonbury. He received some manors in return for the surrender of his claims and was thenceforth known as the Bishop of Bath and Wells. The proceeds of these manors he devoted to the work of rebuilding Wells cathedral, an old English building with a Norman choir. Jocelin built the existing nave and choir. The west front and the flower part of the three towers were also his work. His cathedral was consecrated on 23 Oct., 1239. He also built the cloisters, began the bishop's palace, and erected a manor house at Wookey. He drew up constitutions for the church, insisted on the residence of the prebends, increased their common fund, and endowed the cathedral school with houses and land. He founded with his brother, Bishop Hugh of Lincoln, St. John's Hospital at Wells. At his own desire he was buried in the choir of the cathedral. A calendar of his episcopal charters and deeds is given in the report of the Historical MSS. Commission on the MSS. of Wells cathedral.

EDWIN BURTON

Joel

Joel

The son of Phatuel, and second in the list of the twelve Minor Prophets. Nothing is known of his life. The scene of his labours was the Southern Israelite Kingdom of Juda, and probably its capital Jerusalem, for he repeatedly refers to temple and altar. The frequent apostrophes to the priests (1:9, 13-14; 2:17) also lead to the inference that Joel himself was of priestly descent.

CONTENTS OF JOEL

The seventy-three verses of this small book, in the Massoretic text of the Old Testament, are divided into four, and in the Septuagint and Vulgate into three, chapters, the second and third chapters of the Massoretic text forming one chapter, the second in the Septuagint and Vulgate.

The contents of the Prophecy of Joel may be regarded, taken altogether, as a typical presentation in miniature of the chief themes of prophetic discourse: sombre warnings of the judgment of Jahweh, intended to rouse the people from the existing moral

lethargy, and joyful, glowingly expressed tidings of Jahweh's work of salvation, designed to keep alive the faith in the coming of the Kingdom of God. These two fundamental thoughts seem to be united, as the misfortunes of the judgment are a process of purification to prepare the people for the reception of salvation, and are in reality only one aspect of the Divine work of redemption. In the first main division of the Book of Joel (1:2-2:17) the prophecies are threatenings of the day of judgment; the prophecies in the second division, which embraces the rest of the book (2:18-3:21), are consolatory descriptions of the day of grace. The first section is further divided into two discourses on the judgment: Chapter 1:2-20, describes a terrible scourge, a plague of locusts, with which the Prophet's land had been visited; these pests had so completely devoured the fields that not even the material for the meat- and drink-offerings existed. For this reason the priests are to utter lamentations and to ordain a fast. Chapter 2:1-17, repeats the same thought more emphatically: all these plagues are only the forerunners of still greater scourges in the day of the Lord, when the land of the Prophet shall become a wilderness. The people must, therefore, return to Jahweh, and the priests must entreat the Lord in the holy place. the prophecies in the second section are also divided into two discourses: in 2:18-32, the Lord is appeased by the repentance of the nation and gives the blessing of bounteous harvests. Just as in the earlier part the failure of the harvests was a type and foreshadowing of the calamity in the day of judgment, so now the plenty serves as an illustration of the fullness of grace in the kingdom of grace. The Lord will pour out His Spirit upon all flesh, and all who call upon His name shall be saved. In chapter 3:1-21, the redemption of Israel is, on the other hand, a judgment upon the heathen nations: the Lord will take vengeance, in the four quarters of the earth, upon those who tyrannized over His people, upon the Philistines, Phoenicians, Edomites, and Egyptians, for the nations are ripe for the harvest in the valley of Josaphat.

LITERARY AND THEOLOGICAL CHARACTER OF JOEL

Examined as to logical connexion, the four discourses of Joel show a closely united, compact scheme of thought. In regard to form they are a Biblical model of rhetorical symmetry. The law of rhetorical rhythm, which as the law of harmony regulates the form of the speeches, also shows itself, particularly, in the regular alternation of descriptions in direct or indirect speech, as in the sections given in the first or third person, and in the apostrophes in the second person singular and plural. The first two speeches are alike in construction: 2:1-11 resembles 1:2-12, and 2:12-17, is like 1:13-20. Also in the latter two speeches there is a verbal similarity along with the agreement in thought; cf. in 3:17 and 2:27, the like expression. The language of Joel is full of colour, rhetorically animated, and rhythmic. The passages from 1:13 sq., and 2:17, are still used in the Liturgy of the Church during Lent. His prophecy of the pouring out of the spirit upon

all flesh (2:28-32) was afterwards adopted as the first Biblical text of the first Apostolic sermon ([Acts 2:16-21](#)). Joel's discourses of the day of judgment, and of the abundance of grace which Jahweh in the fullness of time shall bestow from Sion form one of the most beautiful pages in the eschatology of the Prophets. Some of his fiery pictures seem even to have been borrowed by the writer of the Apocalypse of the New Testament (cf. [Joel 3:13](#), and [Apocalypse 14:15](#)).

The swarm of locusts, which has so frequently received a symbolical interpretation, is no apocalyptic picture; neither is it a description of the progress of a hostile army under the figure of the imaginary advance of locusts. The passages in 2:4-7, "They shall run like horsemen . . . like men of war they shall scale the wall", make it absolutely certain that a hypothetical swarm of locusts was not taken as a symbol of a hostile army, but that, on the contrary, a hostile army is used to typify an actual swarm of locusts. Consequently, Joel refers to a contemporary scourge, and in the rhetorical style of prophecy passes from this to the evils of the day of judgment.

DATE OF THE PROPHECY OF JOEL

The most difficult problem in the investigation of Joel is the date, and the many hypotheses have not led to any convincing result. The first verse of the book does not convey, as other prophetic books do, a definite date, nor do the discourses contain any references to the events of the period, which might form a basis for the chronology of the Prophet. General history took no notice of plagues of locusts which were of frequent occurrence, and it is an arbitrary supposition to interpret the swarm of locusts as the Scythian horde, which, according to Herodotus (I, 103 sqq.; IV, i), devastated the countries of Western Asia from Mesopotamia to Egypt between the years 630-620 b.c. The Book of Joel has been variously ascribed to nearly all the centuries of the prophetic era. Rothstein even goes so far as to assign the discourses to various dates, an attempt which must fail on account of the close connexion between the four addresses. The early commentators, in agreement with Jerome, placed the era of composition in the eighth century b.c.; they took Joel, therefore, as a contemporary of Osee and Amos. In justification of this date they pointed out that Joel is placed among the twelve Minor Prophets between Osee and Amos; further, that among the enemies of Juda the book does not mention the Assyrians, who were anathematized by each Prophet from the time they appeared as a power in Asia. However, in a book of three chapters not much weight can be attached to an argument from silence. Those also who agree in placing the book before the Exile do not agree in identifying the king in whose reign Joel lived. The assignment to the period of King Josias is supported by the fact that Joel takes for his theme the day of the Lord, as does the contemporary Prophet Sophonias; to this may be added that the anathema upon the Egyptians may be influenced by the battle of Mageddo (608 b.c.). Later commentators assign the book to the period after the

Exile, both because chapter iii assumes the dispersal of the Jews among other nations, and because the eschatology of Joel presupposes the later period of Jewish theology. It is, however, impossible for Joel to have been a contemporary of the Prophet Malachias, because of the manner in which the former looks upon the priests of his period as perfect leaders and mediators for the nation. None of the chronological hypotheses concerning Joel can claim to possess convincing proof.

MICHAEL FAULHABER

Jan Joest

Jan Joest

(Van Kalkar). Otherwise JAN JOOST VAN CALCKER.

Dutch painter, b. at Calcker, or Calcar, about 1460; d. at Haarlem in 1519. This painter was practically unknown until 1874, when Canon Wolff and Dr. Eisenmann established his identity. Joest's great work, executed between 1505 and 1508, and representing scenes from the life of Christ, painted on the wings of the high altar in the church of St. Nicholas at Calcker, had been familiar to critics, but not so the painter. Canon Wolff found many references to him in the archives of his native place, and was able to prove the date of the painting of the masterpiece, and the fact that in 1518, Joest was working at Cologne for the important family of Hackeneg. After Leaving Cologne he appears to have gone to Italy, and to have visited Genoa and Naples, returning thence to Holland, and settled down at Haarlem, where he executed a painting of St. Willibrod for the church of St. Bavon. In the last edition of Van der Willigen's work on the painters of Haarlem is the reference to the burial of the artist, there called Jan Joosten, under the date 1519. There are paintings attributed to Joest at Wesel and Rees, and the "Death of the Virgin" in Munich is believed to be his. He was an artist of very high merit, and has been compared with David and Memlinc, but he more properly belongs to the school of Scorel, and one of the special features of his work is

the exquisite transparency of his colouring and the subtle and very delicate modelling of the faces.

The chief account of him is that by Wolff, *De Nikolas Kirche zu Kalkar*, but reference should also be made to WALTMAN'S *Geischichte der Malerei* and the *Zeitschrift fur Bildende Kunst* (1876).

GEORGE CHARLES WILLIAMSON

St. Isaac Jogues

St. Isaac Jogues

French missionary, born at Orléans, France, 10 January, 1607; martyred at Ossernenon, in the present State of New York, 18 October, 1646. He was the first Catholic priest who ever came to Manhattan Island (New York). He entered the Society of Jesus in 1624 and, after having been professor of literature at Rouen, was sent as a missionary to Canada in 1636. He came out with Montmagny, the immediate successor of Champlain. From Quebec he went to the regions around the great lakes where the illustrious Father de Brébeuf and others were labouring. There he spent six years in constant danger. Though a daring missionary, his character was of the most practical nature, his purpose always being to fix his people in permanent habitations. He was with Garnier among the Petuns, and he and Raymbault penetrated as far as Sault Ste Marie, and "were the first missionaries", says Bancroft (VII, 790, London, 1853), "to preach the gospel a thousand miles in the interior, five years before John Eliot addressed the Indians six miles from Boston Harbour". There is little doubt that they were not only the first apostles but also the first white men to reach this outlet of Lake Superior. No documentary proof is adduced by the best-known historians that Nicholet, the discoverer of Lake Michigan, ever visited the Sault. Jogues proposed not only to convert the Indians of Lake Superior, but the Sioux who lived at the head waters of the Mississippi.

His plan was thwarted by his capture near Three Rivers returning from Quebec. He was taken prisoner on 3 August, 1642, and after being cruelly tortured was carried to the Indian village of Ossernenon, now Auriesville, on the Mohawk, about forty miles above the present city of Albany. There he remained for thirteen months in slavery, suffering apparently beyond the power of natural endurance. The Dutch Calvinists at Fort Orange (Albany) made constant efforts to free him, and at last, when he was about to be burnt to death, induced him to take refuge in a sailing vessel which carried him to New Amsterdam (New York). His description of the colony as it was at that time has since been incorporated in the *Documentary History of the State*. From New York he was sent; in mid-winter, across the ocean on a lugger of only fifty

tons burden and after a voyage of two months, landed Christmas morning, 1643, on the coast of Brittany, in a state of absolute destitution. Thence he found his way to the nearest college of the Society. He was received with great honour at the court of the Queen Regent, the mother of Louis XIV, and was allowed by Pope Urban VII the very exceptional privilege of celebrating Mass, which the mutilated condition of his hands had made canonically impossible; several of his fingers having been eaten or burned off. He was called a martyr of Christ by the pontiff. No similar concession, up to that, is known to have been granted.

In early spring of 1644 he returned to Canada, and in 1646 was sent to negotiate peace with the Iroquois. He followed the same route over which he had been carried as a captive. It was on this occasion that he gave the name of Lake of the Blessed Sacrament to the body of water called by the Indians Horicon, now known as Lake George. He reached Ossernenon on 5 June, after a three weeks' journey from the St. Lawrence. He was well received by his former captors and the treaty of peace was made. He started for Quebec on 16 June and arrived there 3 July. He immediately asked to be sent back to the Iroquois as a missionary, but only after much hesitation his superiors acceded to his request. On 27 September he began his third and last journey to the Mohawk. In the interim sickness had broken out in the tribe and a blight had fallen on the crops. This double calamity was ascribed to Jogues whom the Indians always regarded as a sorcerer. They were determined to wreak vengeance on him for the spell he had cast on the place, and warriors were sent out to capture him. The news of this change of sentiment spread rapidly, and though fully aware of the danger Jogues continued on his way to Ossernenon, though all the Hurons and others who were with him fled except Lalonde. The Iroquois met him near Lake George, stripped him naked, slashed him with their knives, beat him and then led him to the village. On 18 October, 1646, when entering a cabin he was struck with a tomahawk and afterwards decapitated. The head was fixed on the Palisades and the body thrown into the Mohawk.

In view of his possible canonization a preliminary court was established in Quebec by the ecclesiastical authorities to receive testimony as to his sanctity and the cause of his death.

[*Note:* Isaac Jogues was canonized by Pope Pius XI on June 29, 1930, with seven other North American martyrs. Their collective feast day is October 19.]

T.J. CAMPBELL

Pope St. John I

Pope St. John I

Died at Ravenna on 18 or 19 May (according to the most popular calculation), 526. A Tuscan by birth and the son of Constantius, he was, after an interregnum of seven days, elected on 13 August, 523, and occupied the Apostolic see for two years, nine months, and seven days.

We know nothing of the matter of his administration, for his Bullarium contains only the two letters addressed to an Archbishop Zacharias and to the bishops of Italy respectively, and it is very certain that both are apocryphal.

We possess information -- though unfortunately very vague -- only about his journey to Constantinople, a journey which appears to have had results of great importance, and which was the cause of his death. The Emperor Justin, in his zeal for orthodoxy, had issued in 523 a severe decree against the Arians, compelling them, among other things, to surrender to the Catholics the churches which they occupied. Theodoric, King of the Ostrogoths and of Italy, the ardent defender of Arianism, keenly resented these measures directed against his coreligionists in the Orient, and was moreover highly displeased at seeing the progress of a mutual understanding between the Latin and Greek Churches, such as might favour certain secret dealings between the Roman senators and the Byzantine Court, aiming at the re-establishment of the imperial authority in Italy. To bring pressure to bear upon the emperor, and force him to moderate his policy of repression in regard to the heretics, Theodoric sent to him early in 525 an embassy composed of Roman senators, of which he obliged the pope to assume the direction, and imposed on the latter the task of securing a withdrawal of the Edict of 523 and -- if we are to believe "Anonymous Valesianus" -- of even urging the emperor to facilitate the return to Arianism of the Arians who had been converted.

There has been much discussion as to the part played by John I in this affair. The sources which enable us to study the subject are far from explicit and may be reduced to four in number: "Anonymous Valesianus", already cited; the "Liber Pontificalis"; Gregory of Tours's "Liber in gloria martyrum"; and the "Liber Pontificalis Ecclesie Ravennatis". But it is beyond question that the pope could only counsel Justin to use gentleness and discretion towards the Arians; his position as head of the Church prevented his inviting the emperor to favour heresy. That this analysis of the situation is correct is evident from the reception which the pope was accorded in the East -- a re-

ception which certainly would not have been kindly, had the Roman ambassadors opposed the emperor and this Catholic subjects in their struggle waged against the Arian sect. The inhabitants of Constantinople went out in throngs to meet John. The Emperor Justin on meeting him prostrated himself, and, some time afterwards, he had himself crowned by the pope. All the patriarchs of the East made haste to manifest their communion in the Faith with the supreme pontiff; only Timothy of Alexandria, who had shown himself hostile to the Council of Chalcedon, held aloof. Finally, the pope, exercising his right of precedence over Epiphanius, Patriarch of Constantinople, solemnly officiated at St. Sophia in the Latin Rite on Easter Day, 19 April, 526. Immediately afterwards he made his way back to the West.

If this brilliant reception of John I by the emperor, the clergy, and the faithful of the Orient proves that he had not been wanting in his task as supreme pastor of the Church, the strongly contrasting behaviour of Theodoric towards him on his return is no less evident proof. This monarch, enraged at seeing the national party reviving in Italy, had just stained his hands with the murder of Boethius, the great philosopher, and of Symmachus his father-in-law. He was exasperated against the pope, whose embassy had obtained a success very different from that which he, Theodoric, desired and whom, moreover, he suspected of favouring the defenders of the ancient liberty of Rome. As soon as John, returning from the East, had landed in Italy, Theodoric caused him to be arrested and incarcerated at Ravenna. Worn out by the fatigues of the journey, and subjected to severe privations, John soon died in prison.

His body was transported to Rome and buried in the Basilica of St. Peter. In his epitaph there is no allusion to his historical role. The Latin Church has placed him among its martyrs, and commemorates him on 27 May, the ninth lesson in the Roman Breviary for that date being consecrated to him.

LÉON CLUNGNET

Pope John II

Pope John II

(533-535).

The date of the birth of this pope is not known. He was a Roman and the son of Projectus; if not born in the second region (*Coelimontium*) he had at least been a priest of St. Clement's Basilica on the slope of Mons Coelius. He seems to have been the first who changed his name on being raised to the papacy (2 Jan., 533). The basilica of St. Clement still retains several memorials of "Johannes surnamed Mercurius". *Presbyter Mercurius* is found on a fragment of an ancient ciborium, and several of the marble slabs which enclose the *schola cantorum* bear upon them, in the style of the sixth cen-

ture, the monogram of *Johannes*. At this period simony in the election of popes and bishops was rife among clergy and laity. After the death of the predecessor of John II there was a vacancy of over two months, and during that period shameless trafficking in sacred things was indulged in. Even sacred vessels were exposed for sale. The matter was brought before the Senate, and before the Arian Ostrogothic Court at Ravenna. As a result the last decree (*Senatus Consultum*) which the Senate of Rome is known to have issued, and which, passed under Boniface II, was directed against simony in papal elections, was confirmed by the Gothic King Athalaric. He ordered it to be engraved on marble, and to be placed in the atrium of St. Peter's (533). By one of Athalaric's own additions to the decree, it was decided, that if a disputed election was carried before the Gothic officials of Ravenna by the Roman clergy and people, three thousand solidi would have to be paid into court. This sum was to be given to the poor. John himself, however, always remained on good terms with Athalaric, who referred to his tribunal all actions brought against the Roman clergy. Justinian also showed his good will to the See of Rome in John's person. He sent him his profession of faith and many valuable presents. Some time before John became pope, the East was agitated by the formula, "One of the Trinity has been crucified", which had been put forward as a means of reconciling various heretical sects. Condemned by Pope Hormisdas, the formula fell out of use. Afterwards revived, it was in a modified form defended by Justinian, and opposed by the Acoemetæ, or sleepless monks. But they were condemned by the pope who informed the emperor of his action (24 March, 534). The crimes of Contumeliosus, Bishop of Riez, in Provence, caused John to order the bishops of Gaul to confine him in a monastery. Till a new bishop should be appointed he bade the clergy of Riez obey the Bishop of Arles. Two hundred and seventeen bishops assembled in council at Carthage (535) submitted to John II the question as to whether bishops who had lapsed into Arianism should, on repentance keep their rank or be admitted to lay communion. The answer to their question was given by Agapetus, as John II died 8 May, 535. He was buried in St. Peter's.

HORACE K. MANN

Pope John III

Pope John III

(561-574).

A Roman surnamed Catelinus, d. 13 July, 574. He was of a distinguished family, being the son of one Anastasius who bore the title of *illustris*. The year of his birth is not recorded, but he was consecrated pope seemingly on 17 July, 561. Owing to the necessity of waiting for imperial confirmation of his election, an interval of five months

elapsed between the death of Pelagius I and the consecration just noted. Although John reigned nearly thirteen years very little is known of his pontificate. It fell during the stormy times of the Lombard invasion, and practically all the records of his reign have perished. He would seem, however, to have been a magnanimous pontiff, zealous for the welfare of the people. An inscription still to be seen in the fifteenth century testified that "in the midst of straits he knew how to be bountiful, and feared not to be crushed amidst a crumbling world". Two most unworthy bishops, Salonius of Embrun and Sagittarius of Gap, had been condemned in a synod at Lyons (c. 567). They succeeded, however, in persuading Guntram, King of Burgundy, that they had been condemned unjustly, and appealed to the pope. Influenced by the king's letters, John decided that they must be restored to their sees. It is to be regretted that the papal mandate was put into effect. The most important of the acts of this pope were those connected with the great general, Narses. Unfortunately the "Liber Pontificalis" is enigmatic regarding them. By feminine intrigue at the court of Constantinople, a charge of treason was trumped up against the general, and, in consequence, the only man capable of resisting the barbarians was recalled. It is quite possible that Narses may then have invited the Lombards to fall upon Italy; but it is perhaps more probable that, hearing of his recall, they invaded the country. Knowing that Narses was the hope of Italy, John followed him to Naples, and implored him not to go to Constantinople. The general hearkened to the voice of the pope, and returned with him to Rome (571). But seemingly the court party in the city was too strong for Narses and the pope. John retired to the catacomb of Prætextatus, where he remained for many months. He even held ordinations there. On the death of Narses (c. 572), John returned to the Lateran Palace. His sojourn in the catacombs gave him a great interest in them. He put them in repair, and ordered that the necessaries for Mass should be sent to them from the Lateran. John died 13 July, 574, and was buried in St. Peter's.

HORACE K. MANN

Pope John IV

Pope John IV

(640-642).

A native of Dalmatia, and the son of the *scholasticus* (advocate) Venantius. The date of his birth is uncertain; d. 12 October, 642. At the time of his election he was archdeacon of the Roman Church. As John's consecration followed very soon after his election, it is supposed that the papal elections were now confirmed by the exarchs resident at Ravenna. Troubles in his native land, caused by invasions of Slavs, directed John's attention there. To alleviate the distress of the inhabitants, John sent the abbot

Martin into Dalmatia and Istria with large sums of money for the redemption of captives. As the ruined churches could not be rebuilt, the relics of some of the more important Dalmatian saints were brought to Rome. John erected an oratory in their honour which still stands. It was adorned by the pope with mosaics depicting John himself holding in his hands a model of his oratory. John apparently did not content himself with palliating the evils wrought by the Slavs. He endeavoured to convert these barbarians. Emperor Constantine Porphyrogenitus says that Porga, a prince of the Croats who had been invited into Dalmatia by Heraclius I, sent to an Emperor Heraclius for Christian teachers. It is supposed that the emperor to whom this message was sent was Heraclius I himself, and that the pope to whom he sent was John IV.

While still only pope-elect, John, with the other rulers of the Roman Church, wrote to the clergy of the North of Ireland to tell them of the mistakes they were making with regard to the time of keeping Easter, and exhorting them to be on their guard against the Pelagian heresy. About the same time he condemned Monothelism. Emperor Heraclius immediately disowned the Monothelite document known as the "Ecthesis". To his son, Constantine III, John addressed his apology for Pope Honorius, in which he deprecated the attempt to connect the name of Honorius with Monothelism. Honorius, he declared, in speaking of one will in Jesus Christ, only meant to assert that there were not two contrary wills in Him. John was buried in St. Peter's.

HORACE K. MANN

Pope John V

Pope John V

(685-686).

A Syrian whose father was one Cyriacus; when he was born is not known; d. 2 August, 686. As a deacon he was one of those who represented the Apostolic See at the Sixth Oecumenical Council. He returned to Rome in July, 682, with the official documents of the synod. He obtained such favour in the eyes of the Emperor Constantine Pogonatus that the latter lessened the taxes which had been imposed on the papal patrimonies in Sicily and Calabria, and generally reduced the fiscal burdens from which the Church suffered. John's energy, learning, and moderation are highly praised by his biographer. It was no doubt the possession of these virtues which caused him to be elected pope in the basilica of St. John Lateran. The necessity of waiting for the imperial confirmation of papal elections having been abolished by Constantine Pognatus, John was straightway conducted to the Lateran palace as pope. He was consecrated about 23 July, 685, and reigned for a little more than a year. From the days

of St. Gregory the Great, the Archbishop of Cagliari in Sardinia enjoyed certain metropolitan powers. Although the right of consecrating the bishops of the island was not one of his privileges, Cironatus of Cagliari proceeded to lay hands on the bishop-elect of Turrus Libisonis. John, however, definitively declared the See of Turrus directly subject to the Holy See. John's generosity showed itself in his liberal donations. In his short pontificate he distributed 1900 *solidi* to the clergy and to the deaconries for the poor. After a long illness, he died on 2 August, 686, and was buried in St. Peter's.

HORACE K. MANN

Pope John VI

Pope John VI

(701-705).

A Greek, the date of whose birth is unknown; d. 11 January, 705. He ascended the papal throne 30 October, 701. Some time during his reign there came to Rome from Sicily Theophylactus, "chamberlain, *patricius*, and exarch of Italy". After the treatment which some of his predecessors in the exarchate had meted out to the popes, the Italian people suspected that his visit boded no good to John VI. Accordingly, from all parts the local militias hurriedly marched to Rome, and, encamping without the walls, made manifest their dislike of the exarch. To avoid bloodshed, John sent a number of priests to them, and succeeded in pacifying them; as far at least as the exarch himself was concerned. Before the militias would disband, however, they insisted that certain informers, whose denunciations had put the wealth of some of the citizens into the hands of the grasping officials, should be handed over to them for punishment. Taking advantage of this want of harmony between the exarch and the native Italians attached to the pope, the Lombards renewed their attacks on such parts of Italy as had hitherto resisted them. Several towns belonging to the Duchy of Rome were seized, Gisulf advanced as far as "Horrea" Puteoli — or perhaps the "*fundus Horrea*" at the fifth milestone on the Via Latina. As "there was no one who had power to resist him by force of arms", the pope, distressed at the sufferings of the people, sent a number of priests furnished with money into the camp of the Lombard duke. Not only did they ransom all the captives whom Gisulf had taken, but they persuaded him to retire to his own territories. John VI was one of the popes before whom St. Wilfrid of York carried his appeals. Pointing out that the action of the Apostolic See was wont to be consistent, the saint adjured him to confirm in his behalf the decisions of his predecessors (704). This John did, and sent him back to England with letters for King Ethelred and others. It was not, however, till the following year that the papal mandates were

obeyed. John sent the pallium to Brithwald, whom "he confirmed as Archbishop of Canterbury". He was buried in St. Peter's.

Liber Pontificalis, I, 383 sq.; Eddius, *Vita S. Wilfridi*, xlvi sqq.; Bede, *Hist. eccl.*, V, 19; Montalembert, *Monks of the West*, IV (Edinburgh and London, 1879), 323 sqq.; Hodgkin, *Italy and her Invaders*, VI (Oxford, 1895), 336, 363 sq.; Mann, *Lives of the Popes*, vol. I, pt. II, p.105 sqq.

HORACE K. MANN

Pope John VII

Pope John VII

(705-707).

The year of his birth is unknown; d. 18 October, 707. Few particulars of his life remain. Like many other popes during the period of Byzantine influence in Rome, John was a Greek. Sprung from a distinguished family, he was the son of Blatta and Plato. The latter carried out various restorations in the imperial palace on the Palatine hill in Rome, and, for the sake, perhaps, of living where once his parents had lived, John after he had become pope (March 1, 705) constructed a palace (*episcopium*) near the church of Sancta Maria Antiqua. Before his elevation, John was the rector of the papal patrimony on the Appian way. It was in that capacity that he erected a memorial "with a broken heart to a most loving and incomparable mother, and to the kindest of fathers" (687). One of the churches which John beautified or restored during his pontificate was the afore-mentioned church of Sancta Maria Antiqua. "He adorned with frescoes the basilica of the Holy Mother of God which is known as *the Old*", and gave it a new ambo. When the remains of this church were brought to light in 1900, among the many figures found upon its walls, one with a square nimbus is supposed to represent John himself. There was also then discovered the base of his ambo. It bore upon it inscriptions which proclaimed him to be "the servant of Mary". John also erected a chapel to Our Lady in St. Peter's. When this oratory was destroyed, some of his mosaics were preserved, and may be seen in the Roman Church of Sancta Maria in Cosmedin and in other places. Though John was a man of learning and eloquence, and though he was remarkable for his filial affection and piety, he was of a timorous disposition. Hence, when the fierce Emperor Justinian II sent him the decrees of the Quinisext Council, "in which were many articles against the See of Rome", with a request that he would set forth what he approved in them, John simply returned them, as though there were nothing to condemn in them. He received back from the Lombard King Aripert II the papal patrimonies in the Cottian Alps, which the Lombards had confiscated. John is credited with having prevailed upon the Anglo-Saxon clergy resident in Rome

to renounce their secular style of dress, and with having written to those in England bidding them follow this example. John died in the palace he had built near the Palatine, and was buried in the oratory he had erected in St. Peter's.

HORACE K

Pope John VIII

Pope John VIII

(Reigned 872-82)

A Roman and the son of Gundus. He seems to have been born in the first quarter of the ninth century; d. 16 Dec., 882. In 853 and 869 he appears as archdeacon of the Roman Church, and it was as such that he became pope (14 Dec., 872). His election was opposed by Formosus, who remained in opposition to him throughout the whole of his pontificate. All modern historians are agreed that John was one of the greatest of the great popes who sat on the chair of Peter during the ninth century. Some, however, on what would seem to be insufficient grounds, regard him as cruel, passionate, worldly-minded, and inconstant. The more important acts of John's reign may be divided into four groups, according as they relate to the affairs of Eastern Europe, to the empire of the West, to Southern Italy and the Saracens, or to those persons with whom he came into more frequent contact.

A year or two before John became pope, St. Methodius, the brother of St. Cyril, who had died in Rome (869), had been sent back to Moravia as an archbishop to continue his work for the conversion of the Slavs. He had received permission to use the Slavonic language in the liturgy of the Church. This action of Pope Hadrian II did not please either the German princes or bishops. The former had designs on the political, the latter on the ecclesiastical, independence of the Moravians. Methodius was seized and imprisoned (871), and it was not till 873 that any hint of his treatment and his appeal to Rome reached John. Though for the moment, in deference to German opposition, the pope prohibited the use of the Slavonic tongue in the liturgy, he insisted on the immediate restoration of Methodius. After his orders were obeyed, John bade the archbishop come to Rome, as fresh accusations had been brought against him. A careful examination convinced John of the orthodoxy of Methodius, who was sent

back to Moravia with permission to use the Slavonic tongue in the liturgy. By the pope's help the saint overcame all opposition, and continued his work of conversion till his death (6 April, 885). One result of John's work among the Slavs was that several of their tribes placed themselves under the protection of the Holy See. John also had much communication with the Eastern Slavs of Bulgaria. He strove to bring them back again under the direct jurisdiction of the Holy See. Papal rights in that country had been usurped by the patriarchs of Constantinople, and, though their faith and his, as John told the Bulgarian king Boris, were the same, he justly feared that their proneness to heresy and schism would ultimately lead the Bulgarians into both. But the Bulgarians gave no lasting heed to the exhortations of the pope, and what he foretold them would happen actually came to pass. When Basil the Macedonian mounted the throne of Constantinople, he restored St. Ignatius to his see, and banished the usurper Photius (867). During his banishment, however, adroit flattery enabled the exile to win the emperor's favour, and, on the death of St. Ignatius (877), he was acknowledged as his successor. He then spared no pains to induce John to communicate with him. This at length he agreed to do on certain conditions. But, as Photius failed to observe them, he was solemnly condemned by the pope (881).

Louis II, though not even master of Italy, bore at this time the title of Emperor of the Romans. To him, as a prince of character, John gave his support. He endeavoured to induce Charles the Bald, King of France, to yield up to him the kingdom of Lothaire; he aided him in his efforts against the Saracens, and, after his death (875), strove to comfort his widow Engelberga. When Louis II died, John's support of Charles the Bald resulted in his receiving the imperial crown (25 Dec., 875), and in the discomfiture of his rivals. Charles was not ungrateful for the pope's assistance, and not only decreed that the Roman Church, as head of all the Churches, must be obeyed by all, but in 876 waived in John's behalf many of "the rights and customs of the empire." John, however, did not obtain much practical help from him. Charles was a man who attempted to do great things, but knew not how to adapt his means to the ends he had in view. He did at last, however, come to help John against the Saracens, who distressed him throughout the whole of his pontificate. His expedition was, however, a failure, and, before he could renew his attempt, he died (6 Oct., 877). Among the candidates for the vacant imperial throne, John thought that the only suitable one was Boso, soon to be King of Provence. But Boso would not move in the matter, so that at length the pope, setting aside the claims of Carloman on the ground of his ill-health which had forced him to entrust the care "of the Kingdom of Italy" to John himself, fixed upon Charles the Fat as the imperial successor of Charles the Bald, successfully established his candidate on the imperial throne, and crowned him in February, 881.

Before John died, Charles had become in name, at least, the recognized sovereign of most of the states over which Charlemagne had held sway. But he was physically and mentally unfit for his position; yet John was in great need of help. From the first year of his reign to the last, he was harassed by the Saracens, and was worried by the unpatriotic conduct of some of the princes of Southern Italy, by intrigues at home, and by the encroachments of Guido II, Duke of Spoleto. In 840, colonies of Saracens had begun to establish themselves in South Italy. John had to write "that all our coasts have been plundered, and the Saracens are as much at home in Fundi and Terracina as in Africa." To make head against these terrible enemies of Christianity John spared not his person, his time, nor his money. He never ceased striving to stir up the emperors to take a high view of their position and responsibilities, to put aside their miserable ambitions, and to take the field against the unrelenting foes of their faith and country. By conferences with the petty princes of Southern Italy, and by gifts of money to them, he endeavoured to detach them from alliance with the Saracens, or to unite them in battle against them. But he was not content with urging others to take action against them. He himself assumed the duties both of a general and an admiral. He fortified St. Paul's Outside-the-Walls, where his works were so extensive that they deserved to be called after his name "Johannipolis." The new fortification was over two miles in circumference. To guard the "city of the old dotard Peter," as the Saracens contemptuously called Rome, John himself patrolled the coast. He overtook the pirate fleet of the Saracens off the promontory of Circe, and was completely victorious over them (876). But knowing they were but scotched, he implored the emperor to help him to make his victory of permanent value. Charles the Bald was not unwilling to help, but died (877) before he could effect anything. John had therefore to go on fighting single-handed against the Saracens till his death.

During the whole period of his pontificate, John was troubled almost as much by enemies in and around Rome as he was by the Saracens. When he mounted the throne of Peter, he found many of the chief offices of the Church in the hands of disreputable nobles, most of them connected with one another, and with a number of women who were as bad as themselves. Among the former were Gregory, the primicerius of the Roman Church, a shameless peculator; his brother Stephen, the secundicerius, as deep in crime as himself, and his infamous son-in-law, the murderer and adulterer, George of the Aventine. Allied with these, by crime at least, were Sergius and Constantiana. With some of these men, Formosus, Bishop of Porto, had the misfortune to be linked by some ties of friendship. The death of the Emperor Louis II (August, 875), who had been a patron of some of this nefarious clique, left John more at liberty to deal with them. When he began to proceed against them, they succeeded for a time in avoiding appearing before him. Meanwhile they hatched plots against him, and sought to obtain

the aid of the Saracens. Finding at last that the pope was too strong for them, they fled from the city, carrying with them the treasures of the Church. Unfortunately for his reputation, Formosus fled with them. Failing to appear for trial, the exiles were degraded and excommunicated. When in France, whither Formosus had fled, John caused the sentence passed against Gregory and his party to be repeated, and insisted on Formosus's signing a declaration that he would never return to Rome (878). John had not gone to France altogether of his own free will. Acting ostensibly in the interests of Carloman of Bavaria, who was aspiring to the empire, Lambert, Duke of Spoleto, put all the pressure he could on the pope, constantly harrying his territory (876). At length he seized Rome itself (878). Unable to endure the persecution of this petty tyrant, and anxious at the same time to come into personal contact with the different candidates for the imperial throne, vacant since the death of Charles the Bald (6 Oct., 877), John went to France. While there he crowned Louis as king (Sept., 878), but was unable to effect anything in the way of obtaining a suitable candidate for the empire.

John's action was not confined to Italy, Germany, and France. In Spain we find him constituting Oviedo a metropolitan see. By his influence, also, a law against sacrilege was added to the Gothic Code of Spain. John received in Rome Burhred (Burgraed), King of Mercia, whom the miseries which the Danes were causing throughout England had driven to seek peace at the shrine of the Apostles. Edred, Archbishop of Canterbury, also turned to the pope for consolation. He was distressed by the Danes and worried by King Alfred, who in his youth was not the wise monarch he afterwards became. John wrote to commiserate with him, and told him that he had written to urge the king to offer proper obedience to him. Most contemporary historians tell us simply that John died on 16 Dec., 882. One, however, who wrote in distant Fulda, has given certain terrible details which are not accepted by the best modern historians. According to the annals of that monastery, one of John's relations, who wished to seize his treasures, tried to poison him. Finding, however, that the drug was doing its work too slowly, he killed him by striking him on the head with a hammer. Then, terrified by the hostility which was at once manifested towards him, he fell dead without any one laying a hand upon him. This introduction of the marvellous and the wrong date which the Fulda annals assign to John's death have justly rendered this narrative suspected.

Pope John IX

Pope John IX

(898-900).

Not only is the date of John's birth unknown, but the date of his election as pope, and that of his death are alike uncertain. He became pope in the early part of 898, and died in the beginning of the year 900. He was a native of Tivoli, and the son of Ram-poald. Becoming a Benedictine, he was ordained priest by Pope Formosus. At this period factions filled the city of Rome, and one of them tried to force their candidate, Sergius, afterwards Sergius III, on the papal throne in opposition to John. Perhaps because he was favoured by the ducal House of Spoleto, John was able to maintain his position, and Sergius was driven from the city and excommunicated. With a view to diminish the violence of faction in Rome, John, who is acknowledged to have been both intelligent and moderate, held several synods in Rome and elsewhere (898). In them the ghastly synod of Stephen (VI) VII was condemned, and its Acts were burnt. Re-ordinations were forbidden, and those of the clergy who had been degraded by Stephen were restored to the ranks from which he had deposed them. The barbarous custom of plundering the palaces of bishops or popes on their death was ordered to be put down both by the spiritual and temporal authorities. The Synod of Rome also declared itself for Emperor Lambert and against his rival Berenger, and at the same time decided that the pope-elect was not to be consecrated except in the presence of the imperial envoys. This canon was decreed in the hope that it might lessen the evils caused by the Roman factions. A synod which John held at Ravenna decreed that steps should be taken to put an end to the deeds of violence which were being perpetrated everywhere. To keep their independence, which was threatened by the Germans, the Slavs of Moravia appealed to John to let them have a hierarchy of their own. Not heeding the hectoring letters with which some of the German bishops endeavoured to dissuade him from hearkening to the Moravians, John sanctioned the consecration of a metropolitan and three bishops for the Church of the Moravians. On John's coins the name of the emperor (Lambert) figures along with his own. He was buried just outside St. Peter's.

HORACE K. MANN

Pope John X

Pope John X

Born at Tossignano, Romagna; enthroned, 914; died at Rome, 928. First a deacon, he became Archbishop of Ravenna about 905, as successor of Kailo. In a document dated 5 February, 914, he still appears as archbishop. Shortly afterwards, owing to the influence of the nobles dominant in Rome, he was made pope in succession to Lando. The real head of this aristocratical faction was the elder Theodora, wife of the Senator Theophylactus. Liutprand of Cremona ("Antapodosis," II, ed. in "Mon. Germ. Hist.: Script.," II, 297) affirms that Theodora supported John's election in order to cover more easily her illicit relations with him. This statement is, however, generally and rightly rejected as a calumny. Liutprand wrote his history some fifty years later, and constantly slandered the Romans, whom he hated. At the time of John's election Theodora was advanced in years, and is lauded by other writers (e.g. Vulgarius). John was a relative of Theodora's family, and this explains sufficiently why she secured his election. The new pope was an active and energetic ruler, and exerted himself especially to put an end to the Saracen invasions. He brought about an alliance between Prince Landulph of Beneventum, Berengarius of Friuli, King of the Lombards, and other Italian rulers, and, when Berengarius came to Rome in 915, the pope crowned him emperor. John himself led against the Saracens a large army gathered by the allied Italian princes. The Saracens had built fortresses on the river Garigliano, but in August, 916, John completely routed them near the mouth of that river.

Concerning the ecclesiastical administration of this pope we possess many particulars. He sent to Germany his trusted friend Petrus, Bishop of Orte, who held in 916 a synod at Hohenaltheim (near Noerdlingen), and entered into friendly relations with King Conrad. John also concerned himself with affairs in France, where Count Heribert of Aquitaine held King Charles a prisoner, and demanded the election of his five-year-old son, Hugh of Vermandois, as Archbishop of Reims. John unhappily confirmed this choice after Heribert had promised the king's release. He further sought to bring the Slavs of Dalmatia into closer relations with Rome, and strove to induce the Archbishop of Spalato to adopt Latin as the liturgical language. His efforts to promote a more intimate union between the Bulgarians and Rome were frustrated by the oppos-

ition of the Patriarch of Constantinople. Another opportunity offered, when later the Byzantine patriarch, Nicolaus Mysticus, sought the aid of the pope. The patriarch had been deposed by a synod, because he would not recognize the fourth marriage of Emperor Leo VI. Before his death, however, Leo restored Nicolaus to his office, and the new emperor (Alexander) was also on his side. But many bishops were yet opposed to the patriarch on account of his deposition by the earlier synod. Under these circumstances Nicolaus wished to have the decree of deposition declared invalid by another council, and towards this end desired the assistance of John. But John remained true to the discipline of the Western Church, which permitted as valid even a fourth marriage. Meanwhile, he was active in the political life of Italy. After the murder of King Berengarius in 924 the pope supported Hugh of Burgundy, and, when the latter landed in Pisa, John sent his legate to meet him and form an alliance. The dominant Roman faction disliked these measures. Foremost among them was the elder Marozia, daughter of Theophylactus and Theodora. After the death of her first husband Alberic, Marozia had married (926) Guido, the powerful Margrave of Tuscany. The alliance of John and Hugh of Burgundy seemed to endanger her power in Rome, and so with her husband's aid she decided to remove John. Petrus, Prefect of Rome and brother of the pope, was murdered in June, 928. The pontiff himself was seized and cast into prison, where he died shortly after. According to a rumour recorded by Liutprand, and thus little to be relied on, he was smothered in his bed. Flodoard of Reims asserts that he died of anxiety. He was probably buried in the Lateran, for the restoration of which he had been particularly zealous.

J.P. KIRSCH

Pope John XI

Pope John XI

Date of birth unknown, became pope in 931; d. 936. He was the son of Marozia by her first marriage with Alberic; some, taking Liutprand and the "Liber Pontificalis" as their authority, assert that he was the natural son of Sergius III ("Johannes, natione Romanus ex patre Sergio papa", "Liber Pont." ed. Duchesne, II, 243). Through the intrigues of his mother, who ruled at that time in Rome, he was raised to the Chair of Peter, and was completely under the influence of the *Senatrix et Patricia* of Rome. To

strengthen her own power Marozia married her brother-in-law Hugh, King of Provence and Italy, whose reign in Rome was so tyrannical that a strong opposition party sprang up among the nobles under the leadership of Alberic II, the younger son of Marozia. This party succeeded in overthrowing the rule of Marozia and Hugh; Marozia was cast into prison, but her husband escaped from the city. In this way Alberic became ruler of Rome, and the pope, who suffered by his mother's fall, now became almost entirely subject to his brother, being only free in the exercise of his purely spiritual duties. All other jurisdiction was exercised through Alberic. This was not only the case in secular, but also in ecclesiastical affairs. It was at the instance of Alberic that the pallium was given to Theophylactus, Patriarch of Constantinople (935), and also to Artold, Archbishop of Reims (933). It was this pope who sat in the Chair of Peter during its deepest humiliation, but it was also he who granted many privileges to the Congregation of Cluny, which was later on so powerful an agent of Church reform.

Liber Pontificalis, ed. Duchesne, II, 243; Jaffé, *Regesta* (2nd ed.), I, 454 sq.; Langen, *Gesch. der röm. Kirche*, II, 329-31; Reumont, *Gesch. der Stadt Rom*, II, 231 sqq.

J.P. KIRSCH

Pope John XII

Pope John XII

Date of birth unknown; reigned 955-64.

The younger Alberic, after the downfall of his mother, Marozia (932), was absolute ruler at Rome. Before his death he administered an oath (954) to the Roman nobles in St. Peter's, that on the next vacancy of the papal chair his only son, Octavius, should be elected pope. After the death of the reigning pontiff, Agapetus II, Octavius, then eighteen years of age, was actually chosen his successor on 16 December, 955, and took the name of John. The temporal and spiritual authority in Rome were thus again united in one person -- a coarse, immoral man, whose life was such that the Lateran was spoken of as a brothel, and the moral corruption in Rome became the subject of general odium. War and the chase were more congenial to this pope than church government. He was defeated in the war against Duke Pandulf of Capua, and at the same time the Ecclesiastical States were occupied by Berengarius, King of Italy, and his son Adalbert. In this dilemma the pope had recourse to the German king, Otto I, who then appeared in Italy at the head of a powerful army. Berengarius, however, did not risk an encounter, but retired to the fortified castles. On 31 January, 962, Otto reached Rome. He took an oath to recognize John as pope and ruler of Rome; to issue no decrees without the pope's consent; and, in case of his delivering the command in Italy to any one else, to exact from such person an oath to defend to the utmost of his

ability the pope and the patrimony of St. Peter. The pope on his part swore to keep faith with Otto and to conclude no alliance with Berengarius and Adalbert. On 2 February, 962, Otto was solemnly crowned emperor by the pope. On the twelfth a Roman synod took place, at which John, at Otto's desire, founded the Archbishopric of Magdeburg and the Bishopric of Morseburg, bestowed the pallium on the Archbishops of Salzburg and Trier, and confirmed the appointment of Rother as Bishop of Verona. The next day, the emperor issued a decree, the famous *Diploma Ottonianum*, in which he confirmed the Roman Church in its possessions, particularly those granted by Pepin and Charlemagne, and provided at the same time that in future the popes should be elected in canonical form, though their consecration was to take place only after the necessary pledges had been given to the emperor or his ambassadors. The authenticity of the contents of this much-discussed document is certain, even should the extant document be only a duplicate of the original (Sickel, "Das Privilegium Ottos I, für die römische Kirche", Innsbruck, 1883). On 14 February the emperor marched out of Rome with his army to resume the war against Berengarius and Adalbert. The pope now quickly changed his mind, while Otto on his part urged the imperial authority to excessive limits. John began secret negotiations with Adalbert, son of Berengarius, and sent envoys with letters to Hungary and to Constantinople for the purpose of inciting a war against Otto. They were, however, seized by the imperial soldiers, and the emperor thus learned of the pope's treachery. John now sent an embassy to Otto to propitiate the latter, and at the same time to explain the pope's grievance, which was that the emperor had received for himself the oath of allegiance from those cities of the Ecclesiastical States, which he had reconquered from Berengarius. Otto sent an embassy to refute this accusation. At the same time Adalbert came in person to Rome, and was ceremoniously received by the pope. The faction of the Roman nobles which sympathized with the emperor now broke into revolt against John. Otto appeared for the second time in Rome (2 November, 963), while John and Adalbert fled to Tivoli. In the emperor's entourage was Liutprand, Bishop of Cremona, who thus describes the occurrences as an eyewitness. Otto now probably renewed and extended the settlement formerly effected, by obtaining from the nobles a promise on oath not to elect or consecrate a pope without the consent of the emperor.

On 6 November a synod composed of fifty Italian and German bishops was convened in St. Peter's; John was accused of sacrilege, simony, perjury, murder, adultery, and incest, and was summoned in writing to defend himself. Refusing to recognize the synod, John pronounced sentence of excommunication (*ferendæ sententia*) against all participators in the assembly, should they elect in his stead another pope. The emperor now came forward to accuse John of having broken the agreement ratified by oath, betrayed him, and called in Adalbert. With the imperial consent the synod deposed

John on 4 December, and elected to replace him the *protoscriniarius* Leo, yet a layman. The latter received all the orders uncanonically without the proper intervals (*interstitia*), and was crowned pope as Leo VIII. This proceeding was against the canons of the Church, and the enthroning of Leo was almost universally regarded as invalid. Most of the imperial troops now departing from Rome, John's adherents rose against the emperor, but were suppressed on 3 January, 964, with bloodshed. Nevertheless, at Leo's request, Otto released the hundred hostages whom he had called for, and marched from Rome to meet Adalbert in the field. A new insurrection broke out in the city against the imperial party; Leo VIII fled, while John XII re-entered Rome, and took bloody vengeance on the leaders of the opposite party. Cardinal-Deacon John had his right hand struck off, Bishop Otgar of Speyer was scourged, a high palatine official lost nose and ears. On 26 February, 964, John held a synod in St. Peter's in which the decrees of the synod of 6 November were repealed; Leo VIII and all who had elected him were excommunicated; his ordination was pronounced invalid; and Bishop Sico of Ostia, who had consecrated him, was deprived forever of his dignities. The emperor, left free to act after his defeat of Berengarius, was preparing to re-enter Rome, when the pope's death changed the situation. John died on 14 May, 964, eight days after he had been, according to rumour, stricken by paralysis in the act of adultery. Luitprand relates that on that occasion the devil dealt him a blow on the temple in consequence of which he died.

J.P. Kirsch

Pope John XIII

Pope John XIII

Date of birth unknown; enthroned on 1 Oct., 965; d. 6 Sept., 972. After the death of John XII in 964 Benedictus Grammaticus was elected his successor as Benedict V. But Otto I brought back to Rome the antipope Leo VIII, whom he had set up in 963, and banished Benedict to Hamburg. Leo VIII died in March, 965, whereupon the Romans requested the emperor to send Benedict back to them as pope. But Otto refused, and Benedict died shortly after in July, 965. In presence of the imperial envoys, Liutprand, Bishop of Cremona, and Otgar, Bishop of Speyer, the emperor's candidate, John, Bishop of Narni, was elected pope, and crowned on 1 October, 965, as John XIII.

He belonged to the family of the elder Theodora, who by her marriage with the senator Theophylactus had, besides Marozia, another daughter, the younger Theodora, who married the consul John. This John later entered the ecclesiastical state and became a bishop. From his union with Theodora sprang two daughters and three sons, among the latter one called John, who, while still in his youth, entered the priesthood at Rome, and later became Bishop of Narni. It was on this scion of the Roman nobility that the choice of the electors fell. Some of the nobles were hostile to the new pope, because he was the imperial candidate, and, when he endeavoured to repress their encroachments, they plotted against him, and in December, 965, succeeded in getting possession of his person. They shut him up in the Castle of Sant' Angelo, and subsequently removed him to a fortified place in Campagna. John succeeded, however, in escaping from his prison, and found welcome and protection with Prince Pandulf of Capua. At Rome a reaction set in towards the exiled pope, and, when in 966 Emperor Otto undertook another expedition to Italy, the Romans were terrified and permitted John to return to the city on 14 November. In December the emperor arrived and dispensed stern justice to the conspirators, some of whom were hanged and others banished.

The pope now allied himself closely with the emperor. On 11 January, 967, a synod was held in St. Peter's, concerning the results of which nothing is known. John travelled with Otto to Ravenna, where in April, 967, he held another synod in which the elevation of Magdeburg to metropolitan dignity was confirmed, disputes were decided, privileges conferred upon churches and convents, and Ravenna with its territory restored to the pope as part of the Ecclesiastical States. Relations between John and the emperor continued cordial. On Christmas Day, 967, the latter's thirteen-year-old son, Otto II, came to Rome, and was crowned joint emperor with his father. Shortly after, at one of the synods held in Rome, the monastery which the emperor had founded at Meissen in Saxony was made a see. John also favoured the negotiations held with the Byzantines for a matrimonial alliance between Otto II and the Princess Theophano. The marriage took place at Rome, and was blessed by the pope himself on 14 April, 972. After the death of Archbishop William of Mainz and Bishop Bernard of Halberstadt in 968, the new metropolitan see at Magdeburg in Slavic territory, for which the emperor had worked zealously and which had been confirmed by the pope, was finally realized. On Christmas Day, 968, Abbot Adalbert was consecrated first Archbishop of Magdeburg, and in turn consecrated the first Bishops of Merseburg, Meissen, and Zeitz. The pope was also active in extending the hierarchy in other countries. Early in his pontificate he had raised Capua to metropolitan rank in gratitude for the shelter which Prince Pandulf had afforded him. At a Roman synod in 969 Benevento received the same dignity. He confirmed the decrees of synods held in England and France. Privileges were granted to churches and convents, especially to Cluny, and the pope decided

numerous questions of ecclesiastical law, referred to him from various countries. The plan of the Bohemian Duke Boleslaus II for the foundation of a see at Prague, though approved by the pope, had to be deferred to a later date. John XIII was succeeded by Benedict VI.

Pope John XIV

Pope John XIV

Date of birth unknown; d. 984. After the death of Benedict VII, Bishop Peter Campanora of Pavia, earlier imperial chancellor of Italy, was elected pope with the consent of Emperor Otto II, and was crowned at the end of November onr beginning of December, 983, when he took the name of John. On 7 December of the same year the young emperor, Otto II, died at Rome, prepared for death by the pope, and was buried in the vestibule of St. Peter's. When the antipope Boniface VII, created in 974 by the Roman adherents of Crescentius, received at Constantinople news of the emperor's death, he returned to Rome (April, 984), and with the aid of his followers made Pope John a prisoner, threw him into the dungeons of the Castle of Sant' Angelo, and mounted the papal throne. After four months the unhappy John XIV died in prison on 20 August, 984, either from starvation and misery or murdered by order of Boniface.

Pope John XV (XVI)

Pope John XV (XVI)

Enthroned 985; d. April, 996. After John XIV had been removed by force, the usurper, Boniface VII, reigned eleven months, dying in July, 985. A Roman named

John, the son of a Roman presbyter Leo, was then elected pope, and crowned between 6 August and 5 September, 985. A few later chroniclers (Marianus Scotus, Godfrey of Viterbo) and some papal catalogues give as the immediate successor of Boniface another John, son of Robert, who is supposed to have reigned four months, and is placed by a few historians in the list of popes as John XV. Although this alleged Pope John never existed, still the fact that he has been catalogued by these historians has thrown into disorder the numeration of the popes named John, the true John XV being often called John XVI. At this time the patrician John Crescentius, son of Duke Crescentius, with the help of his adherents, had obtained entire control of the temporal power in Rome. According to some chroniclers the ascendancy of Crescentius became so irksome to the pope, to whom he even forbade access except in return for bribes, that John fled to Tuscany and sought aid from the Empress Theophano, but allowed himself to be induced by the promises of Crescentius to return to Rome. As a matter of fact, John remained throughout his pontificate under the influence of the powerful *patricius*, though he maintained friendly relations with the German court and with both empresses—Adelaide, widow of Otto I, and Theophano, widow of Otto II. The pope's mediation was sought by England in the quarrel between King Æthelred and Richard of Normandy. The papal legate, Leo of Trevi, brought about between the parties the Peace of Rouen (1 March, 991), which was ratified by a papal Bull.

A serious dispute occurred during this pontificate over the archiepiscopal See of Reims, the pope's interference leading at first to no definite result. Hugh Capet, who had been raised to the throne of France, made Arnulf, a nephew of Duke Charles of Lorraine, Archbishop of Reims in 998. Charles was an adversary of Hugh Capet, and succeeded in taking Reims and making the archbishop a prisoner. Hugh, however, considered Arnulf a traitor, and demanded his deposition by the pope. Before the latter's answer was received, Hugh Capet captured both Duke Charles and Archbishop Arnulf, and called a synod at Reims in June, 991, which deposed Arnulf and chose as his successor Abbot Gerbert (afterwards Pope Sylvester II). These proceedings were repudiated by Rome, although a synod at Chela had sanctioned the decrees of that of Reims. The pope summoned the French bishops to hold an independent synod at Aachen to reconsider the case. When they refused, he called them to a synod at Rome, but they urged the unsettled conditions in France and Italy as a reason for not obeying this summons. The pope then sent Abbot Leo of St. Boniface to France as legate, with instructions to call a council of French and German bishops at Mousson. At this council only the German bishops appeared, the French being stopped on the way by Kings Hugh and Robert. Gerbert tried to exculpate himself at the synod convened on 2 June, 995, but was condemned and suspended until 1 July, when a new synod was held at Reims. Through the exertions of the legate, the deposition of Arnulf was pronounced

illegal. After Hugh Capet's death (23 October, 996), Arnulf was released from his imprisonment, and in 997 the Holy See secured his restoration to all his dignities. Gerbert set out for the imperial court at Magdeburg, and became the preceptor of Otto III. At a Roman synod held in the Lateran on 31 January, 993, Bishop Ulrich of Augsburg was solemnly canonized, an event which the pope announced to the French and German bishops in a Bull dated 3 February. This was the first time that a solemn canonization had been made by a pope. John conferred many privileges on churches and convents, and was a patron and protector of the monks of Cluny. In 996 Emperor Otto undertook a journey to Italy to obtain imperial coronation from the pope, but John died early in April, while Otto lingered until 12 April in Pavia, where he celebrated Easter.

John XVI (XVII), Antipope

John XVI (XVII)

Antipope 997-998; d. probably in 1013. After the death of John XV, Bruno, a relative of Otto III and his chaplain, was raised through the royal influence to the papal throne as Gregory V, and crowned on 3 May, 996. On 21 May the new pope placed the imperial crown on the young King Otto III in Rome. After Otto's departure the *patricius* Crescentius and his followers rose against the pope, and in September, 996, drove him out of the city. In the following May (997) Archbishop John Philagathus of Piacenza, who had returned shortly before from a mission to Constantinople whither he had been sent by Otto III, was made antipope by Crescentius. John was a native of Rossano in Calabria, at that time a part of the Byzantine Empire. He became a monk and was closely connected with Empress Theophano, through whose influence he received the Abbey of Nonantola from Otto II. He was the godfather of the imperial Prince Otto, afterwards emperor. After the death of Otto II he remained the trusted adviser of the empress dowager who, in 988, promoted him to the episcopal See of Piacenza, raised for him to an archbishopric, though later restored to its original rank. At the court of Otto III he retained his influential position. The king sent him at the end of 995 to Constantinople to arrange a matrimonial alliance between the sovereign and a Byzantine princess. Notwithstanding this proof of favour on the part of the imperial family, John allowed himself on his return from Constantinople to be won over

to the projects of Crescentius, who wished through him to bring about an alliance with Byzantium against the German Emperor. St. Nilus of Rossano, the famous abbot and a compatriot of John, sought to dissuade him from the usurpation of the papal throne, but without avail.

At the Synod of Pavia held by Gregory V at Pentecost, 997, Crescentius was excommunicated, and in July the pope issued a decree bringing Piacenza once more under the jurisdiction of the Archbishop of Ravenna. In the following winter Otto III returned to Italy at the head of an army, and in February, 998, entered Rome, while the antipope fled, and Crescentius entrenched himself in the Castle of Sant' Angelo. John XVI was captured by the imperial soldiers, deprived of his sight, and, his nose and ears having been mutilated, was brought in this condition to Rome. At the Lenten Synod of 998, held shortly after in Rome, Gregory V formally deposed the antipope, who, at the intercession of St. Nilus, was removed from prison to a monastery. When, in spite of all this, John again appeared before Gregory in episcopal robes, these were torn from him, and he was led through the streets of Rome on an ass amid the popular derision. According to the unreliable "Vita" of St. Nilus, he was thrown back into prison; while other sources relate that he was again confined in the monastery, where he died. The "Annales Fuldenses" record his death under date of 2 April, 1013. At Easter, 998, Otto III took the Castle of Sant' Angelo, and on 29 April Crescentius was beheaded.

Pope John XVII (XVIII)

Pope John XVII (XVIII)

Date of birth unknown; d. 6 Nov., 1003. When Sylvester II died on 12 May, 1003, there was no actual authority in Rome which could curb the nobles. Thus the faction of Crescentius again won the upper hand, and John Crescentius, son of the *patricius* whom Otto III had defeated and put to death, seized the authority for himself. The three following popes were indebted to him for their elevation, and were made to feel his supremacy. A Roman, Sicco, was first elected, and consecrated on 13 June as John XVII, but died on 6 November. Before taking orders he had been married, and had three sons who also became ecclesiastics. Concerning his activities during the few months of his pontificate nothing has come down to us.

Pope John XVIII (XIX)

Pope John XVIII (XIX)

Successor of John XVII, consecrated Christmas, 1003; d. June, 1009. He was the son of a Roman priest named Leo, and, before his elevation to the papacy, his name was Phasianus. He, too, owed his elevation to the influence of Crescentius. The accounts of his pontificate consist almost exclusively of details of ecclesiastical administration. He confirmed the possessions and privileges of several churches and convents; sanctioned different gifts to religious institutions; conferred ecclesiastical privileges on the re-established See of Merseburg; gave his consent at the Roman Synod of June, 1007, to the establishment of the See of Bamberg, founded and endowed by the German king, Henry II; and conferred the pallium on Archbishops Meingaudus of Trier and Elphege of Canterbury. John XVIII energetically opposed the pretensions of Archbishop Letericus of Sens and Bishop Fulco of Orléans, who refused to allow the Abbot of Fleury, Goslin, to make use of the privileges granted him by Rome, and tried to make him burn the papal charters. The pope complained of this to the emperor, and called both bishops to his tribunal under threat of ecclesiastical censures for the entire kingdom. In Constantinople he was recognized as Bishop of Rome. His epitaph relates that he subdued the Greeks and dislodged schism. His name appears on the diptychs of the Byzantine Church. According to one catalogue of popes, he died as a monk at St. Paul's near Rome in June, 1009.

Pope John XIX (XX)

Pope John XIX (XX)

Enthroned in 1024; d. 1032. After the death of the last *patricius* of the House of Crescentius, the counts of Tusculum seized the authority in Rome, a scion of this family was raised to the papal throne as Benedict VIII, while his brother, Romanus, exercised the temporal power in the city as consul and senator. After Benedict's death

Romanus, though a layman, was elected pope between 12 April and 10 May, 1024, immediately after which he received all the orders in succession, took the name of John, and sought by lavish expenditure to win the Romans to his cause. Soon after his elevation the Byzantine Emperor, Basil II, sent ambassadors to Rome to request in his name that the pope would recognize the title of oecumenical patriarch, which the patriarchs of Byzantium had assumed, thus sanctioning the latter's headship of all the Oriental Churches. Rich presents brought by the envoys were intended to win over the pope, and indeed he seemed not disinclined to accede to the Byzantine wishes. Though the negotiations were kept secret the affair became public, and roused to action the religiously minded circles, especially the promoters of ecclesiastical reform in Italy and France. Public opinion compelled the pope to refuse the Byzantine requests and gifts, whereupon Patriarch Eustachius of Constantinople caused the pope's name to be erased from the diptychs of his churches. John invited the celebrated musician, Guido of Arezzo, to visit Rome and explain the musical notation invented by him. In Germany, after the death of Henry II (1 July, 1024), Conrad the Salian was elected king, and was invited by the pope and also by Archbishop Heribert of Milan, to come to Italy. In 1026 he crossed the Alps, received the iron crown of Lombardy, and proceeded to Rome, where on 26 March, 1027, he was crowned emperor. Two kings, Rudolph of Burgundy and Canute of Denmark and England, took part in this journey to Rome.

On 6 April a great synod was held in the Lateran basilica, where the dispute between the Patriarchs of Aquileia and Grado was decided, through the emperor's influence, in favour of the former. Poppo of Aquileia was to be sole patriarch, with the Bishop of Grado under his jurisdiction. Moreover, the Patriarch of Aquileia was to take precedence over all the Italian bishops. Two years later (1029) John XIX revoked this decision, and at a new synod restored to the Patriarch of Grado all his former privileges. King Canute of Denmark and England obtained from the pope a promise that his English and Danish subjects should not be annoyed by customs duties on their way to Italy and Rome, and that the archbishops of his kingdom should not be so heavily taxed for the bestowal of the pallium. John granted the Bishop of Silva Candida, near Rome, a special privilege to say Mass in St. Peter's on certain days. A dispute regarding precedence between the Archbishops of Milan and Ravenna was settled by the pope in favour of the former. He took the Abbey of Cluny under his protection, and renewed its privileges in spite of the protests of Goslin, Bishop of Macon; at the same time he rebuked Abbot Odilo of Cluny for not accepting the See of Lyons. The feast of St. Martial, reputed disciple of the Apostles and founder of the church of Limoges, was raised by John to the rank of the feast of an Apostle. In the case of certain French bishops the pope maintained the rights of the Holy See. He seems to have been the

first pope to grant an indulgence in return for alms bestowed. He died towards the end of 1032, probably on 6 November.

J.P. KIRSCH

Pope John XXI (XX)

Pope John XXI (XX)

Born at Lisbon between 1210 and 1220; enthroned, 1276; died at Viterbo, 20 May, 1277. The son of one Julianus, he was baptized Peter, and was known as Petrus Juliani or Petrus Hispanus. After his earlier studies in the cathedral school at Lisbon, he entered the University of Paris and attended lectures on dialectics, logic, and, more particularly, those on Aristotelean physics and metaphysics then being given by Albertus Magnus. The natural philosophy of Aristotle had a special attraction for Peter. He zealously pursued the study of medicine, and also that of theology, attaching himself especially to the Minorite *magister*, John of Parma. On completing his studies, he was called in 1247 as professor of medicine to the University of Siena, which was at that time being greatly enlarged. Here he wrote his "Summulæ logicales", for almost three hundred years the favourite textbook on logic. Stapper's investigations (see below) have now established beyond question the authorship of this work. In the fifteenth century the "Summulæ" was translated into Greek by George Scholarius, and was also translated into other languages. In content and form the book is based on the method current at the University of Paris, and on the compendium of William Shyreswood, Peter's professor there. While teaching at Siena, he also made a collection of medical prescriptions.

About 1261 Peter appears in the retinue of Cardinal Ottoboni Fieschi; towards this time also he was made deacon of the Church of Lisbon, an office which he later exchanged for the archidiaconate of Vermuy in the Diocese of Braga. From this period probably dates his acquaintance with Teobaldo Visconti. When, in 1272, Teobaldo came to Viterbo after his election to the papacy as Gregory X, he appointed Petrus Hispanus his physician in ordinary. While occupying this position, the latter wrote his "Thesaurus pauperum", in which he gives a remedy for the diseases of every part

of the body. This book was widely used, but was in time variously interpolated. Peter's wide reputation for learning led to his selection as Archbishop of Braga by the cathedral chapter in spring, 1273. Shortly afterwards Gregory X appointed him Cardinal-Bishop of Tusculum, and as such he is referred to on 5 June, 1273. But he continued to govern temporarily the See of Braga until 23 May, 1275, when the pope appointed another archbishop. In June, 1273, Peter accompanied Gregory X to the General Council of Lyons, where he was consecrated bishop. Gregory X's two successors in the Holy See, Innocent V and Adrian V, ruled only a very short time. The latter died at Viterbo on 18 August, 1276, having been elected on the preceding 11 July. In a consistory of cardinals, he had spoken of an alteration in the decrees of Lyons concerning the papal conclave, and had suspended them temporarily. After the death of Adrian V, the conclave in Viterbo was protracted, in consequence of which disturbances broke out in the town, thus hastening the election, so that in the week following 13 September Petrus Juliani, Cardinal-Bishop of Tusculum, was chosen pope, and crowned as John XXI (really XX) the following Sunday (20 September). The new pope wished forthwith to arrange the rules for the conclave. In the Bull "*Licet felicis recordationis*", ratifying his predecessor's decision, he also suspended with the consent of the cardinals the decrees issued at Lyons, and declared his intention of issuing in the near future the new regulations. On the same day (20 September, 1276) he issued another Bull, directed against those who had taken part in the disturbances during the last council (*see CONCLAVE*).

The pope was now in a position to turn his attention to the political situation. Since 1263, when Urban IV had bestowed the Kingdom of Sicily upon Charles of Anjou, the latter had tried little by little to strengthen his political power in Rome and the Papal States. Charles himself went to Viterbo to win over the new pope, but the latter did not assent to his plans. On 7 October, the king took the oath of fealty for Sicily, in which it was provided that Sicily should never be united with Tuscany or Lombardy, nor yet with the Roman Empire. The pope, however, did not reappoint him Roman senator, neither did he make him Vicar of Tuscany or Lombardy, honours which Innocent IV had bestowed upon him. In November, John sent an ambassador with letters to Rudolf of Hapsburg, inviting him to send a plenipotentiary to the Curia to negotiate with the plenipotentiary sent by Charles of Anjou concerning the conclusion of peace. As soon as this should be accomplished, Rudolf was to set out for Rome to receive the imperial crown. Soon after, John began negotiations with Rudolf relative to Romagna, the ancient Exarchate of Ravenna, which he wished definitely restored to the Papal States, as Innocent V had already claimed. Concerning the collection and employment of the tithes levied on all ecclesiastical benefices, which the Council of Lyons had ordered in preparation for a crusade, the pope issued various instructions for the dif-

ferent countries. The cross had been taken by Philip III of France and Alfonso of Castile and Leon, and in February, 1276, Philip solemnly declared that he would lead the army in person against the Saracens. But the two kings found themselves involved in a quarrel over the Kingdom of Navarre. The pope laboured to avert the outbreak of hostilities by sending, in November, 1276, legates to both kings, and by remonstrating with the parties in earnest and urgent letters. Soon after this Philip had to disband the large army he had assembled, and a treaty was arranged between the rulers. But in the spring of 1277 the two kings began again to make preparations for war, and again the pope was obliged to send his legates to mediate, wherein they were again successful.

John also endeavoured to secure from the King of Portugal an amelioration of the ecclesiastical conditions in that country, but his pontificate was too short to witness the realization of his purpose. He demanded from Edward I of England the arrears of tribute which that country had owed the Holy See since the reign of King John (1215). He also sought the release of Eleanor, Countess of Montfort, and her brother Amaury, whom King Edward held prisoners. Many letters were sent by the pope to the king and the English bishops relative to this matter. The envoys sent out by the Byzantine emperor, Michael Palæologus, to the Council of Lyons swore that the emperor had renounced the schism, and wished to return to the obedience of the Holy See. In this way the emperor sought to obtain the pope's protection against the Western princes, who threatened his domination. An embassy from Constantinople had already been sent to the Curia in Innocent V's reign, and that pontiff had appointed an envoy to the Byzantine Court, but died before the latter left Italy. Pope John appointed other envoys, two bishops and two Dominicans, and furnished them with minute instructions, as well as with letters for the Emperor Michael, his son Andronicus, and the Greek clergy. In April, 1277, a synod was held at Constantinople under the presidency of the new patriarch, John Beccus, who was an earnest supporter of the union of the Churches. At this synod the emperor and his son embraced the Roman Catholic Faith, and ratified all the promises previously made in their name at the Council of Lyons. The bishops assembled at the synod acknowledged the papal primacy and the doctrine of the Roman Church, and the patriarch addressed a letter to the pope, in which all minor discrepancy in teaching was satisfactorily explained. The messenger, who had charge of this epistle as well as of the documents drawn up by the emperor, did not arrive until after John's death. From the Far East, ambassadors came to the pope from Abaga, Khan of Tatar, who had also sent an embassy to the Council of Lyons. The khan wished to enter into an alliance with the Crusaders and to give them his support; he also asked to have missionaries sent to him. The pope sent the ambassadors to Charles of Sicily, Peter of Aragon, Philip of France, and Edward of England, but none of these sovereigns had

any serious intention of undertaking a crusade. John himself appointed missionaries to go to Tatar, but died before they set out on their journey.

Although John showed especial favour towards the University of Paris, he took care to exclude all erroneous teaching from this famous seat of ecclesiastical learning. Some chroniclers maintain that this pope was an enemy of the monks and friars. However, among the documents sent from the papal chancellery under John XXI, there are numerous letters in which he grants privileges and ratifies donations to monasteries. On many occasions, also, he gave evidence of his great respect for the monastic orders. On what particular act of the pope's this adverse criticism is based, is unknown; however, in the most trustworthy accounts of his life, no foundation is found for this reproach. During this pontificate Cardinal Giovanni Gaetano Orsini, who later ascended the papal throne as Nicholas III, exercised a great influence on the government of the Church. Amid the cares of the papacy John found time for his scientific studies, which were more congenial to him than the business of the Curia. To secure the necessary quiet for these studies, he had an apartment added to the papal palace at Viterbo, to which he could retire when he wished to work undisturbed. On 14 May, 1277, while the pope was alone in this apartment, it collapsed; John was buried under the ruins, and died on 20 May in consequence of the serious injuries he had received. Soon after the death of this scholarly pope, various rumours were circulated, based upon his great medical learning; he was even accused of dealing in the magic arts. A few monastic chroniclers, seeing in him an enemy, contributed to these baseless tales, and thus an undeserved stigma was cast upon the memory of John XXI.

J.P. KIRSCH

Pope John XXII

Pope John XXII

(JACQUES D'EUSE)

Born at Cahors in 1249; enthroned, 5 September, 1316; died at Avignon, 4 December, 1334. He received his early education from the Dominicans in his native town, and later studied theology and law at Montpellier and Paris. He then taught both canon and civil law at Toulouse and Cahors, came into close relations with Charles II of Naples, and on his recommendation was made Bishop of Frejus in 1300. In 1309 he was appointed chancellor of Charles II, and in 1310 was transferred to the See of Avignon. He delivered legal opinions favourable to the suppression of the Templars, but he also defended Boniface VIII and the Bull "Unam Sanctam". On 23 December, 1312, Clement V made him Cardinal-Bishop of Porto. After the death of Clement V (20 April, 1314) the Holy See was vacant for two years and three and a half months. The cardinals assembled in Carpentras for the election of a pope were divided into two violent factions, and could come to no agreement. The electoral college was composed of eight Italian cardinals, ten from Gascony, three from Provence, and three from other parts of France. After many weeks of unprofitable discussion as to where the conclave should be held, the electoral assembly was entirely dissolved. Ineffectual were the efforts of several princes to induce the cardinals to undertake an election: neither party would yield. After his coronation Philip V of France was finally able to assemble a conclave of twenty-three cardinals in the Dominican monastery at Lyons on 26 June, 1316, and on 7 August, Jacques, Cardinal-Bishop of Porto, was chosen pope. After his coronation at Lyons on 5 September as John XXII, the pope set out for Avignon, where he fixed his residence.

His vast correspondence shows that John XXII followed closely the political and religious movements in all countries, and sought on every possible occasion the advancement of ecclesiastical interests. Nor was he less insistent than his predecessors on the supreme influence of the papacy in political matters. For this reason he found himself involved in grievous disputes which lasted throughout the greater portion of his pontificate. Great difficulties were also raised for the pope by the controversies among the Franciscans, which Clement V had tried in vain to settle. A number of Franciscans, the so-called "Spirituals," or "Fratricelli," adherents of the most rigorous views, refused to submit to that pope's decision, and after the deaths of Clement V and Gonzalvez, General of the Minorites, they rebelled, especially in the South of France and in Italy, declaring that the pope had no power to dispense them from their rule, since this was nothing other than the Gospel. They then proceeded to drive the Con-

ventuals from their houses, and take possession of the same, thereby causing scandal and much disorder. The new general, Michael of Cesena, appealed to John, who in 1317 ordered the refractory friars to submit to their superiors, and caused the doctrines and opinions of the Spirituals to be investigated. On 23 January, 1318, many of their doctrines were declared erroneous. Those who refused to yield were treated as heretics: many were burned at the stake, and some escaped to Sicily.

These troubles among the Franciscans were increased by the quarrel about evangelical poverty which broke out among the Conventuals themselves. The general chapter of Perugia, through their general, Michael of Cesena, and other learned men of the order (including William Occam), defended the opinion of Berenger Talon, that Christ and His Apostles had no possessions either individually or in common. In 1322 Pope John declared this statement null and void, and in 1323 denounced as heretical the assertion that Christ and the Apostles had no possessions either individually or in common, and could not even legitimately dispose of what they had for personal use. Not only the Spirituals, but also the adherents of Michael of Cesena and William Occam, protested against this decree, whereupon in 1324 the pope issued a new Bull, confirming his former decision, setting aside all objections to it, and declaring those who opposed this decision heretics and enemies of the Church. Summoned to appear at Avignon, Michael of Cesena obeyed the summons, but refused to yield and, when threatened with imprisonment, sought safety in flight. Leaving Avignon on 25 May, 1328, and accompanied by William Occam and Bonagratia di Bergamo, he betook himself to Louis of Bavaria for protection.

Political conditions in Germany and Italy moved the pope to assert over the latter far-reaching political claims, and similarly with regard to the German Crown, because of the latter's union with the imperial office. On this score a violent quarrel broke out between the pope and King Louis of Bavaria. During the vacancy that followed the death of Clement V, there had arisen a disputed election for the throne of Germany, Louis of Bavaria having been crowned at Aachen, and Frederick of Austria at Bonn (25 Nov., 1314). The electors of both candidates wrote to the future pope to obtain recognition of their choice, and also to seek for him imperial coronation. On the day of his coronation (5 Sept., 1315) John wrote to both Louis and Frederick and also to the other German princes, admonishing them to settle their disputes amicably. As there was no universally acknowledged German king, and the pope had not given preference to either candidate, neither could hope to exercise imperial authority. Nevertheless, in 1315 Louis appointed Jean de Belmont imperial vicar for Italy, and at the same time supported Galeazzo Visconti of Milan, then in open opposition to the pope. The latter maintained (13 March, 1317) that, by reason of the vacancy of the Roman Empire, all imperial jurisdiction resided with the pope, and, following the ex-

ample of his predecessor Clement V, he appointed King Robert of Sicily imperial vicar for Italy (July, 1317). On 28 September, 1322, Louis of Bavaria informed the pope that he had overcome his opponent, Frederick of Austria, upon which John wrote him a friendly letter.

Louis, however, took no further steps to effect a reconciliation with the pope. On the contrary, he supported in their opposition to the papal legates the excommunicated Visconti of Milan and the Italian Ghibellines, acted as legitimate emperor, and proclaimed, on 2 March, 1323, Berthold von Neiffen imperial vicar for Italy. Thereupon John, following the precedent of Gregory VII and Innocent III, warned Louis of Bavaria that the examination and approval of the chosen German king with a view to the consequent bestowal of the imperial dignity belonged to the pope; that he must refrain from exercising royal rights until the legitimacy of his election had been settled; that he must recall all commands already issued, give no further aid to the enemies of the Church — especially the Visconti of Milan, condemned as heretics — and within three months present himself before the pope. Should Louis not submit to this admonition, he was threatened with excommunication. The subsequent behaviour of Louis was very equivocal. He sent an embassy to the pope, asking for and obtaining a delay of two months before appearing in the papal presence. At the same time he declared at Nuremberg on 16 November, 1323, that he did not recognize the pope's action or his claim to examine into the election of a German king; he also accused John of countenancing heretics, and proposed the calling of a general council to sit in judgment on him. During this respite, lengthened at his own request, Louis took no steps towards a reconciliation, and on 23 March, 1324, John pronounced on the king the sentence of excommunication. On the other hand the latter published at Sachsenhausen on 22 May, 1324, an appeal in which he accused the pope of enmity to the empire, of heresy and protection of heretics, and appealed from John's decision to a general council. An open breach henceforth existed, followed by disastrous results. Louis persecuted the few German cardinals, who recognized the papal Bull, whereupon John on 11 July, 1324, declared all his rights to imperial recognition forfeited. The pope further ratified the treaty between Duke Leopold of Austria and Charles I of France, in which the former promised to help the latter to the title of German King, and then of Roman Emperor. However, as Leopold died on 28 Feb., 1326, and Louis of Bavaria and Frederick of Austria became reconciled, the king's power in Germany became firmly established.

The quarrel between John XXII and Louis of Bavaria stirred up a vigorous literary feud concerning the relations of Church and State. Louis was supported by the Franciscan Spirituals, e.g. Ubertino da Casale, Michael of Cesena, William Occam, Bonagratia di Bergamo, and many others whose extreme ideas on the question of religious

poverty had been condemned by the pope; also by two theologians of the University of Paris, Marsilius of Papua and John of Gentian (de Gentian), joint authors of the famous "Defensor Paces," which was intended to prove that the only way to maintain peace is by the complete subordination of the ecclesiastical power to that of the State. Denying the primacy of the pope, the authors asserted that the emperor alone could authorize ecclesiastics to exercise criminal jurisdiction, that all temporal goods of the Church belonged to the emperor, etc. Other theologians — e.g. Henry von Kelheim, provincial of the Minorites, Ulrich Hanganöer, the king's private secretary, Abbot Engelbert of Admont, Lupold of Bebenburg, afterwards Bishop of Bamberg, and William Occam, though not so extreme in their views as the authors of the "Defensor Paces," willingly exalted the imperial above the papal power. It was unfortunate for the fickle and, in theological matters, inexperienced king that he fell into the hands of such advisers. The "Defensor Paces" was anathematized by a papal Bull of 23 October, 1327, and some of its theses were condemned as heretical by the University of Paris. Many theologians in their writings defended the ecclesiastical hierarchy and the primacy of the pope, among them the Augustinian Alexander a Sancto Elpidio, later Archbishop of Ravenna, the Minorite, Alvarius Pelagius, the Augustinian Augustinus Triumphus of Ancona, and Conrad of Megenberg. On their side, however, the defence was carried too far, some of them even extolling the pope as absolute ruler of the world.

When Louis of Bavaria saw his power firmly established in Germany, he set out early in 1327 for Italy, where in February, with the chiefs of the Italian Ghibellines, he held a congress at Trent. In March he passed through Bergamo on his way to Milan. On 3 April John XXII declared forfeited all rights of Louis to the German Crown, also to all fiefs held from the Church and from former sovereigns, and finally to the Duchy of Bavaria. Moreover, he summoned Louis to appear before the Holy See within six months, and accused him of heresy for defending a doctrine which the Head of the Church had repudiated, and for taking under his protection the heretics, Marsilius and John of Gentian. Louis paid no attention to this notice, which indeed only aggravated his opposition to the pope. In Milan he received (30 May) the crown of Lombardy from the hands of two deposed bishops, and arbitrarily appointed several new bishops. The pope on his side appointed bishops to sees falling vacant within the empire, and continued to fill the various reserved prelacies, so that an open schism henceforth existed. In 1328 Louis set out for Rome, where the Guelphs had been overthrown with their senator, King Robert of Naples. On 17 January, 1328, the excommunicated German king received in Rome the imperial crown from Sciarra Colonna, who on 18 April, after a farcical proceeding, and in the name of Louis of Bavaria, proclaimed John XXII a heretic, usurper, and oppressor of the Church, and deprived him of all his papal dignities. A straw image of the pope was publicly burned in Rome, and on

12 May the Franciscan Spiritual, Pietro Rainalducci of Corbario, was proclaimed anti-pope by Louis, taking at his consecration (22 May) the name of Nicholas V.

But Louis had made himself so universally obnoxious in Italy, on account of his tax levies, that the position of the antipope was untenable. Many Ghibelline cities and rulers became reconciled with the pope, and finally Pietro of Corbario himself wrote to John, asking for pardon and absolution. At Avignon on 25 August, 1330, he publicly acknowledged his guilt in the presence of the pope and the cardinals, whereupon the former gave him absolution and the kiss of peace. Nevertheless, Pietro was not allowed to leave the city, where he spent the three remaining years of his life in voluntary penance and study. By degrees the whole of Italy returned to the obedience of the legitimate pope. The latter meanwhile had renewed his sentence against Louis of Bavaria, and proclaimed in Italy a crusade against him (1328). At the same time he summoned the German princes to hold another election, and excommunicated Michael of Cesena, William Occam, and Bonagratia. The adherents of Louis in Lombardy soon dwindled away, and he returned to Germany in the beginning of 1330. Here too, the people were weary of the long conflict, and wished for peace, so that Louis was compelled to take steps towards a reconciliation with the pope. In May, 1330, he entered into negotiations with Avignon through the mediation of Archbishop Baldwin of Trier, King John of Bohemia, and Duke Otto of Austria. The pope demanded from Louis renunciation of all claims on the imperial title. Louis on that occasion refused to entertain the idea, but was later (1333) willing to discuss the project of his abdication. The matter, however, was then postponed. Whether John XXII arbitrarily severed Italy from the empire has never been definitely settled, for the authenticity of the Bull "Ne praetereat" is not certain.

In the last years of John's pontificate there arose a dogmatic conflict about the Beatific Vision, which was brought on by himself, and which his enemies made use of to discredit him. Before his elevation to the Holy See, he had written a work on this question, in which he stated that the souls of the blessed departed do not see God until after the Last Judgment. After becoming pope, he advanced the same teaching in his sermons. In this he met with strong opposition, many theologians, who adhered to the usual opinion that the blessed departed did see God before the Resurrection of the Body and the Last Judgment, even calling his view heretical. A great commotion was aroused in the University of Paris when the General of the Minorites and a Dominican tried to disseminate there the pope's view. Pope John wrote to King Philip IV on the matter (November, 1333), and emphasized the fact that, as long as the Holy See had not given a decision, the theologians enjoyed perfect freedom in this matter. In December, 1333, the theologians at Paris, after a consultation on the question, decided in favour of the doctrine that the souls of the blessed departed saw God immediately

after death or after their complete purification; at the same time they pointed out that the pope had given no decision on this question but only advanced his personal opinion, and now petitioned the pope to confirm their decision. John appointed a commission at Avignon to study the writings of the Fathers, and to discuss further the disputed question. In a consistory held on 3 January, 1334, the pope explicitly declared that he had never meant to teach aught contrary to Holy Scripture or the rule of faith and in fact had not intended to give any decision whatever. Before his death he withdrew his former opinion, and declared his belief that souls separated from their bodies enjoyed in heaven the Beatific Vision.

The Spirituals, always in close alliance with Louis of Bavaria, profited by these events to accuse the pope of heresy, being supported by Cardinal Napoleon Orsini. In union with the latter, King Louis wrote to the cardinals, urging them to call a general council and condemn the pope. The incident, however, had no further consequences. With untiring energy, and in countless documents, John followed up all ecclesiastical or politico-ecclesiastical questions of his day, though no particular grandeur is remarkable in his dealings. He gave salutary advice to ruling sovereigns, especially to the Kings of France and of Naples, settled the disputes of rulers, and tried to restore peace in England. He increased the number of sees in France and Spain, was generous to many scholars and colleges, founded a law library at Avignon, furthered the fine arts, and dispatched and generously maintained missionaries in the Far East. He caused the works of Petrus Olivi and Meister Eckhardt to be examined, and condemned the former, while he censured many passages in the latter's works. He published the "Clementines" as the official collection of the "Corpus Juris Canonici," and was the author of numerous decretals ("Extravagantes Johannis XXII" in "Corp. Jur. Can."). He enlarged and partly reorganized the papal Curia, and was particularly active in the administration of ecclesiastical finances.

The usual revenues of the papacy grew very meagre, owing to the disturbed condition of Italy, especially of the Papal States, consequent on the removal of the Papacy from its historic seat at Rome. Moreover, since the end of the thirteenth century the College of Cardinals had enjoyed one half of the large income from tributary kingdoms, the *servitia communia* of the bishops, and some less important sources. Pope John, on the other hand, had need of large revenues, not only for the maintenance of his Court, but particularly for the wars in Italy. Since the thirteenth century the papal treasury had exacted from the minor benefices, when conferred directly by the pope, a small tax (*annata*). — See ANNATES; APOSTOLIC CAMERA). In 1319 John XXII reserved to himself all minor benefices falling vacant in the Western Church during the succeeding three years, and in this way collected from each of them the aforesaid annates, as often as they were conferred by the pope. Moreover, many foreign benefices were

already canonically in the papal gift, and the annates from them were paid regularly into the papal treasury. John also made frequent use of the right known as *jus spoli*, or right of spoils, which permitted him under certain circumstances to divert the estate of a deceased bishop into the papal treasury. He procured further relief by demanding special subsidies from various archbishops and their suffragans. France, in particular, furnished him the most financial aid. The extensive reservation of ecclesiastical benefices was destined to exercise a prejudicial influence on ecclesiastical life. The centralized administration took on a highly bureaucratic character, and the purely legal standpoint was too constantly in evidence. The pope's financial measures, however, were highly successful at the time, though in the end they evoked no little resistance and dissatisfaction. In spite of the large expenditures of his pontificate, John left an estate of 800,000 gold florins — not five millions as stated by some chroniclers.

John XXII died on 4 December, 1334, in the eighty-fifth year of his age. He was a man of serious character, of austere and simple habits, broadly cultivated, very energetic and tenacious. But he held too persistently to canonico-legal traditions, and centralized overmuch the ecclesiastical administration. His financial measures, more rigorously applied by his successors, made the Curia of Avignon generally detested. The transfer of the papacy from Rome to Avignon was esteemed to have taken place in the interests of France, which impression was strengthened by the preponderance of French cardinals, and by the long-continued conflict with King Louis of Bavaria. In this way was aroused a widespread distrust of the papacy, which could not fail to result in consequences detrimental to the interior life of the Church.

J.P. KIRSCH

Antipope John XXIII

John XXIII

Antipope of the Pisan party (1400-15), b. about 1370; d. 22 November, 1419. Cardinal Baldassare Cossa was one of the seven cardinals who, in May, 1408, deserted Gregory XII, and, with those belonging to the obedience of Benedict XIII (see Pedro de Luna), convened the Council of Pisa, of which Cossa became the leader.

Descended from a noble but impoverished Neapolitan family, he embraced in his youth a military career, but later forsook it for the service of the Church. Endowed with great energy and very talented, he studied law at Bologna, where he took his

doctor's degree, and then entered the service of the papal curia. On 27 February, 1402, Boniface IX made him Cardinal-Deacon of St. Eustachius, and in the following year appointed him legate of Romandiola. On 17 March, 1403, he set out for Bologna, where, until 1408, he proved himself an astute financial administrator of the papal territory, as well as a skilful statesman and able commander. At the same time he was utterly worldly-minded, ambitious, crafty, unscrupulous, and immoral, a good soldier but no churchman. He played an important part in the Council of Pisa (1409), and, when the two popes, Gregory XII of Rome and Benedict XIII of Avignon, were deposed, he conducted the election of Pietro Philarghi, who was elevated to the papacy and crowned as Alexander V. The new pope was entirely under the influence of Baldassare Cossa. The latter supported Louis of Anjou in a military expedition against Ladislaus of Naples. Louis seized on several fortresses in the Ecclesiastical States, and in 1400 captured Rome. Alexander V was now proclaimed pope at Rome, but refused to leave Bologna, where he died on 3 May, 1410. In the hope of procuring an understanding with that pope, Prince Malatesta of Rimini, protector of Gregory XII, begged the cardinals of the Pisan obedience to defer a new election. These cardinals assembled at Bologna would not consent, but, supported by Louis of Anjou and the city of Florence, elected Baldassare Cossa, 17 May, 1410. On 24 May Cossa was ordained priest, and on the following day was consecrated and crowned pope, taking the name of John XXIII.

Soon after he ascended the throne, John received an ambassador from Sigismund of Hungary, who wished to confer with him about the political and religious affairs of his kingdom. On 18 May King Ruprecht of Germany, the firm supporter of Gregory XII, died. The electors of Mainz and Cologne wrote informing John that they intended to elect Sigismund, King of Hungary, as King of Germany. As Sigismund had, even before he heard of Ruprecht's death, entered into negotiations with the Pisan pope, John exerted himself all the more readily on his behalf, and on 21 July Sigismund, who had become reconciled with his brother Wenzel of Bohemia, was chosen King of Germany. Sigismund's election was also recognized by Gregory XII. In April, 1411, John XXIII advanced with Louis of Anjou upon Rome, where they vigorously prosecuted the war against Ladislaus of Naples, and completely routed him at the battle of Roccasecca (19 May, 1411), but made no use of their victory. Soon afterwards, Louis of Anjou returned to France, thus enabling Ladislaus to rally his troops and strengthen his positions. Subsequently, John began negotiations with Ladislaus in spite of the excommunication of 11 August, 1411. Ladislaus thereupon abandoned the cause of Gregory, and acknowledged John as legitimate pope, in recognition of which the latter withdrew his excommunication, enfeoffed Ladislaus with the Kingdom of Naples,

consented to his conquest of Sicily, appointed him *gonfalonier*, or standard-bearer, of the Roman Church, and gave him financial aid (16 October, 1412).

In conformity with a resolution passed at the Council of Pisa, John had summoned a new council to meet at Rome on 29 April, 1412, for the purpose of carrying out ecclesiastical reforms. He also appointed a number of new cardinals, among whom were many able men, such as Francesco Zarabella of Florence, Pierre d'Ailly, Bishop of Cambrai, Guillaume Fillastre, dean of Reims, and Robert Hallam, Bishop of Salisbury. From the beginning of 1412 conferences and meetings of the clergy had been held throughout France in preparation for this council, among the representatives appointed by the king being Cardinal Pierre d'Ailly and Patriarch Cramaud, created cardinal in 1413. But, when the council was opened in April, there were so very few participants that it had to be prorogued several times. When the sessions finally began, the only thing accomplished was the condemnation of the writings of Wycliff, the council being dissolved in March, 1413. John's regrettable weakness in dealing with Ladislaus of Naples soon led to another attack by the latter upon papal territory. In May, 1413, he invaded the Roman province, and John was compelled to fly with his cardinals. He escaped to Florence, where he sought the protection of Sigismund, King of Germany, then labouring in Northern Italy for the convocation of a general council to put an end to the unfortunate schism. John's legates were authorized to come to an understanding with Sigismund on this matter, and Sigismund took advantage of the pope's predicament to insist on the selection of Constance as the meeting-place of the council. On 30 October, 1413, Sigismund invited Popes Gregory XII and Benedict XIII and all Christendom to attend, and prevailed on John XXIII, with whom he had a meeting at Lodi towards the end of November, to issue the Convocation Bull (9 December, 1413) of the general council to be opened at Constance on 1 November, 1414.

By the sudden death of Ladislaus (6 August, 1414) John's position in Italy was improved, and he could now return to Rome. But the cardinals urgently protested that his presence was needed at the Council of Constance, and that he must adhere to his promise of presiding in person, and direct there the treatment of all ecclesiastical matters. On 1 October, 1414, John set out for Constance with a large following and supplied with ample means, but with heavy heart and anxious forebodings. Timidity and suspicion had replaced the warlike spirit he had shown as cardinal. On his way through the Tyrol he formed an alliance with Frederick of Austria, who was on terms of enmity with Sigismund. John and his nine cardinals made their entry into Constance on 29 October, 1414, and on 5 November the council was opened. The prospects of the Pisan pope became daily more hopeless. The emperor had not bound himself by any permanent obligation towards John. He had needed this pope, as possessing the largest obedience, to bring about the council, but, from the summer of 1413, he had

come to the conclusion that unity could be promoted only by the abdication or the deposal of all three claimants of the papacy. John at first dominated the council, while he endeavoured to increase his adherents by presents, and, by the aid of spies, to learn the temper of the members. However, the hostility of the council towards him became ever more apparent. The chief spokesmen among his cardinals were Pierre d'Ailly and Fillastre; after Sigismund's arrival even these plainly expressed their opinion that the only way to put an end to the schism was by the abdication of all three popes.

In the second session of the council, John was persuaded to read aloud a formal promise of voluntary abdication of the papacy (2 March, 1415), and to repeat this promise in a Bull of 8 March. But on 20 March he fled secretly from Constance to Schaffhausen in the territory of Duke Frederick of Austria, and thence to Freiburg im Breisgau, which belonged to the Duke of Burgundy, also his adherent. John's flight, in consequence of the great difficulties it caused the council, only increased the hostility towards him, and, while he himself tried to negotiate further concerning his abdication, his supporters were obliged to submit to Sigismund. Formally deposed in the twelfth session (29 May, 1415), John made his submission and commended himself to the mercy of the council. John was accused of the gravest offences in several inimical writings as well as in the formal charges of the council. Undeniably secular and ambitious, his moral life was not above reproach, and his unscrupulous methods in no wise accorded with the requirements of his high office. On the other hand, the heinous crimes of which his opponents in the council accused him were certainly gravely exaggerated. After his abdication he was again known as Baldassare Cossa, and was given into the custody of the Palatine Louis, who had always been his enemy. The latter kept him confined in different places (Rudolfzell, Gottlieben, Heidelberg, and Mannheim). At the forty-second session of the council, 28 Dec., 1417, after Martin V had been elected, the release of Cossa was decreed. It was not, however, till the following year that he recovered his liberty. He then set out for Florence, where Martin V was staying, and did homage to him as the Head of the Church. On 23 June, 1419, the new pope made him Cardinal-Bishop of Tusculum. But Cossa was completely crushed, and died a few months later at Florence, where he was buried in the baptistery beside the cathedral. Cosimo de Medici erected a magnificent tomb to his memory.

J.P. Kirsch

Epistles of Saint John

Epistles of Saint John

Three canonical books of the New Testament written by the Apostle St. John.

The subject will be treated under the following heads:

FIRST EPISTLE

I. Authenticity

II. Canonicity

III. Integrity

IV. Author

V. Time and Place

VI. Destination and Purpose

VII. Argument

SECOND EPISTLE

THIRD EPISTLE

FIRST EPISTLE

I. Authenticity

A. External evidence

The very brevity of this letter (105 verses divided into five chapters) and the lateness of its composition might lead us to suspect no traces thereof in the Apostolic Fathers. Such traces there are, some unquestionable. St. Polycarp (A.D. 110-117, according to Harnack, whose chronology we shall follow in this article) wrote to the Philippians: "For whosoever confesseth not that Jesus Christ is come in the Flesh is Antichrist" (c. vi; Funk, "Patres Apostolici", I, 304). Here is an evident trace of I John, iv, 2-3; so evident that Harnack deems this witness of Polycarp conclusive proof that the first Epistle and, consequently, the Gospel of John were written toward the end of the reign of Trajan, i.e. not later than A.D. 117 (cf. *Chronologie der Altchristlichen Litteratur*, I, 658). It is true that Polycarp does not name John nor quote word for word; the Apostolic Fathers cite from memory and are not wont to name the inspired writer

whom they cite. The argument from Polycarp's use of I John is strengthened by the fact that he was, according to Irenæus, the disciple of St. John. The distinctively Johannine phrase "come in the Flesh" (*en sarki eleluthota*) is also used by the Epistle of Barnabas (v, 10; Funk, op. cit., I, 53), which was written about A.D. 130. We have it on the authority of Eusebius (Hist. eccl., V, xx) that this First Epistle of John was cited by Papias, a disciple of John and fellow of Polycarp (A.D. 145-160). Irenæus (A.D. 181-189) not only cites I John ii, 18, and v, 1 but attributes the citation to John the Lord's disciple ("Adv. Hær." 3, 16; Eusebius, "Hist. eccl.", V, viii). The Muratorian Canon (A.D. 195-205) tells the story of the writing of John's Gospel consequent upon a revelation made to the Apostle Andrew, and adds: "What wonder, then, that John so often in his letters gives us details of his Gospel and says of himself, etc." -- here I John. i, 1, is quoted. St. Clement of Alexandria (A.D. 190-203) quotes v, 3, with his usual indubitable accuracy, and expressly assigns the words to John ("Pædag.", III, xi; Kirch. Comm., ed. I, p. 281). Tertullian (A.D. 194-221, according to Sunday) tells us that John, in his Epistle, brands as Antichrist those who deny that Christ is come in the flesh (De Præscrip. 33), and clearly attributes to "John the author of the Apocalypse" several passages of the First Epistle (cf. "Adv. Marc.", III, 8, and V, 16, in P. L., II, 359 and 543; "Adv. Gnost.", 12, in P. L., II, 169; "Adv. Prax.", 15, in P. L., II, 196).

B. Internal evidence

So striking is the internal evidence in favour of common authorship of the Gospel and First Epistle of John, as to be almost universally admitted. It cannot be by accident that in both documents we find the ever-recurring and most distinctive words light, darkness, truth, life, and love; the strictly Johannine phrases "to walk in the light", "to be of the truth", "to be of the devil", "to be of the world", "to overcome the world", etc. Only such erratic and sceptical critics as Holtzmann and Schmiedel deny the forcefulness of this argument from internal evidence; they conclude that the two documents come from the same school, not from the same hand.

II. Canonicity

The foregoing citations, the fact that there never was any controversy or doubt among the Fathers in the matter of the canonicity of the First Epistle of John, the existence of this document in all the ancient translations of the New Testament and in the great uncial manuscripts (Sinaitic, Alexandrian, etc.) -- these are arguments of overwhelming cumulative force to establish the acceptance of this letter by the primitive Church as canonical Scripture, and to prove that the inclusion of the First Epistle of John in the Canon of Trent was only a conciliar acceptance of an existing fact -- the fact that the letter had always been among the Homologoumena of Holy Writ.

III. Integrity

The only part of the letter concerning the authenticity and canonicity whereof there is serious question is the famous passage of the three witnesses: "And there are three who give testimony (in heaven, the Father, the Word, and the Holy Ghost. And these three are one. And there are three that give testimony on earth): the spirit, and the water, and the blood: and these three are one" (I John, v, 7-8). Throughout the past three hundred years, effort has been wade to expunge from our Clementine Vulgate edition of canonical Scripture the words that are bracketed. Let us examine the facts of the case.

A. Greek Manuscripts

The disputed part is found in no uncial Greek manuscripts and in only four rather recent cursives -- one of the fifteenth and three of the sixteenth century. No Greek epistolary manuscript contains the passage.

B. Versions

No Syriac manuscript of any family -- Peshito, Philoxenian, or Harklean -- has the three witnesses; and their presence in the printed Syriac Gospels is due to translation from the Vulgate. So too, the Coptic manuscripts -- both Sahidic and Bohairic -- have no trace of the disputed part, nor have the Ethiopic manuscripts which represent Greek influence through the medium of Coptic. The Armenian manuscripts, which favour the reading of the Vulgate, are admitted to represent a Latin influence which dates from the twelfth century; early Armenian manuscripts are against the Latin reading. Of the Itala or Old Latin manuscripts, only two have our present reading of the three witnesses: Codex Monacensis (q) of the sixth or seventh century; and the Speculum (m), an eighth or ninth century manuscript which gives many quotations from the New Testament. Even the Vulgate, in the majority of its earliest manuscripts, is without the passage in question. Witnesses to the canonicity are: the Bible of Theodulph (eighth century) in the National Library of Paris; Codex Cavensis (ninth century), the best representative of the Spanish type of text: Toletanus (tenth century); and the majority of Vulgate manuscripts after the twelfth century. There was some dispute as to the canonicity of the three witnesses as early as the sixth century: for the preface to the Catholic Epistles in Codex Fuldensis (A.D. 541-546) complains about the omission of this passage from some of the Latin versions.

C. The Fathers

(1) Greek Fathers, until the twelfth century, seem one and all to have had no knowledge of the three witnesses as canonical Scripture. At times they cite verses 8 and 9 and omit the disputed portions of verses 7 and 8. The Fourth Lateran (A.D. 1215), in its decree against Abbot Joachim (see Denzinger, 10th ed., n. 431) quotes the disputed passage with the remark "sicut in quibusdam codicibus invenitur". Thereafter, we find the Greek Fathers making use of the text as canonical. (2) The Syriac Fathers

never use the text. (3) The Armenian Fathers do not use it before the twelfth century. (4) The Latin Fathers make much earlier use of the text as canonical Scripture. St. Cyprian (third century) seems undoubtedly to have had it in mind, when he quotes John, x, 30, and adds: "Et iterum de Patre et Filio et Spiritu Sancto scriptum est -- Et hi tres unum sunt" (De Unitate Ecclesiae, vi). Clear also is the witness of St. Fulgentius (sixth century, "Responsio contra Arianos" in P. L., LXV, 224), who refers to the above witness of St. Cyprian. In fact, outside of St. Augustine, the Fathers of the African Church are to be grouped with St. Cyprian in favour of the canonicity of the passage. The silence of the great and voluminous St. Augustine and the variation in form of the text in the African Church are admitted facts that militate against the canonicity of the three witnesses. St. Jerome (fourth century) does not seem to know the text. After the sixth century, the disputed passage is more and more in use among the Latin Fathers; and, by the twelfth century, is commonly cited as canonical Scripture.

D. Ecclesiastical Documents

Trent's is the first certain ecumenical decree, whereby the Church established the Canon of Scripture. We cannot say that the decree of Trent on the Canon necessarily included the three witnesses. For in the preliminary discussions signs that led up to the canonizing of "the entire books with all their parts, as these have been wont to be read in the Catholic Church and are contained in the old Latin Vulgate", there was no reference whatsoever to this special part; hence this special part is not canonized by Trent, unless it is certain that the text of the three witnesses has "been wont to be read in the Catholic Church and is contained in the old Latin Vulgate". Both conditions must be verified before the canonicity of the text is certain. Neither condition has as yet been verified with certainty; quite the contrary, textual criticism seems to indicate that the *Comma Johanninum* was not at all times and everywhere wont to be read in the Catholic Church and is not contained in the original old Latin Vulgate. However, the Catholic theologian must take into account more than textual criticism; to him the authentic decisions of all Roman Congregations are guiding signs in the use of the Sacred Scripture, which the Church and only the Church has given to him as the Word of God. He cannot pass over the disciplinary decision of the Holy Office (13 January, 1897), whereby it is decreed that the authenticity of the *Comma Johanninum* may not with safety (*tuto*) be denied or called into doubt. This disciplinary decision was approved by Leo XIII two days later. Though his approval was not *in forma specifica*, as was Pius X's approval of the Decree "Lamentabili", all further discussion of the text in question must be carried on with due deference to this decree. (See "Revue Biblique", 1898, p. 149; and Pesch, "Prælectiones Dogmaticæ", II, 250.)

IV. Author

It was of chief moment to determine that this letter is authentic, i.e., belongs to the Apostolic age is Apostolic in its source, and is trustworthy. Among those who admit the authenticity and canonicity of the letter, some hold that its sacred writer was not John the Apostle but John the Presbyter. We have traced the tradition of the Apostolic origin of the letter back to the time of St. Irenæus. Harnack and his followers admit that Irenæus, the disciple of Polycarp, assigns the authorship to St. John the Apostle; but have the hardihood to throw over all tradition, to accuse Irenæus of error in this matter, to cling to the doubtful witness of Papias, and to be utterly regardless of the patent fact that throughout three centuries no other ecclesiastical writer knows anything at all of this John the Presbyter. The doubtful witness of Papias is saved for us by Eusebius ("Hist. eccl." III, xxxix, Funk, "Patres Apostolici", I, p. 350): "And if any one came my way who had been a follower of the elders, I enquired the sayings of the elders -- what had Andrew, or what had Peter said, or what Philip, or what Thomas or James, or what John (*he ti Ioannes*) or Matthew or any one else of the disciples of the Lord; and what were Aristion and John the elder, the disciples of the Lord, saying?" (*a te Apistion kai ho presbuteros Ioannes, oi tou kuriou mathetai legousin*). Harnack insists that Eusebius read his sources thoroughly; and, on the authority of Eusebius and of Papias, postulates the existence of a disciple of the Lord named John the Elder, who was distinct from John the Apostle; and to this fictitious John the Elder assigns all the Johannine writings. (See *Geschichte der Altchristliche Litteratur*, II, i, 657.) With all Catholic authors, we consider that either Eusebius alone, or Papias and Eusebius, erred, and that Irenæus and the rest of the Fathers were right, in fact we lay the blame at the door of Eusebius. As Bardenhewer (*Geschichte der Altkirchlichen Literatur*, I, 540) says, Eusebius set up a straw man. There never was a John the Elder. So think Funk (*Patres Apostolici*, I, 354), Dr. Salmon (*Dictionary of Christian Biography*, III, 398), Hausleiter (*Theol. Litteraturblatt*, 1896), Stilting, Guerike, and others.

Eusebius is here a special pleader. He opposes the millennium. Wrongly fancying that the Apocalypse favours the Chiliasts, he assigns it to this John the Elder and tries to rob the work of its Apostolic authority, the clumsiness of expression of Papias gives occasion to Eusebius in proof of the existence of two disciples of the Lord named John. To be sure, Papias mentions two Johns -- one among the Apostles, the other in a clause with Aristion. Both are called elders; and elders here (*presbuteroi*) are admitted by Eusebius to be Apostles, since he admits that Papias got information from those who had met the Apostles (substituting *ton apostolon* for *ton presbuteron*; see *Hist. eccl.*, III, xxxix, 7). Hence it is that Papias, in joining John with Aristion, speaks of John the Elder and not of Aristion the Elder; Aristion was not an elder or Apostle. The reason for joining the Aristion with John at all is that they were both witnesses of the present to Papias, whereas all the Apostles were witnesses of the past generation. Note that the

second aorist (*eipen*) is used in regard to the group of witnesses of the past generation, since there is question of what *they had said*, whereas the present (*legousin*) is used in regard to the witnesses of the present generation, i.e. Aristion and John the Elder, since the question is what they *are now saying*. The Apostle John was alive in the time of Papias. He and he alone can be the elder of whom Papias speaks. How is it, then, that Papias mentions John twice? Hausleiter conjectures that the phrase *he ti Ioannes* is a gloss (Theol. Litteraturblatt, 1896). It is likelier that the repetition of the name of John is due to the clumsiness of expression of Papias. He does not mention all the Apostles, but only seven; though he undoubtedly means them all. His mention of John is quite natural in view of the relation in which he stood to that Apostle. After mention of the group that were gone, he names the two from whom he now receives indirect information of the Lord's teaching; these two are the disciple Aristion and John the Apostle.

V. Time and Place

Irenæus tells us the letter was written by St. John during his stay in Asia (Adv. Hær., III, i). Nothing certain can be determined in this matter. The arguments are probable in favour of Ephesus and also for the last few years of the first century.

VI. Destination and Purpose

The form is that of an encyclical letter. Its destination is clearly the churches which St. John evangelized, he speaks to his "little children", "beloved", "brethren", and is affectionate and fatherly throughout the entire letter. The purpose is identical with the purpose of the Fourth Gospel -- that his children may believe in Jesus Christ, the Son of God, and that believing may have life eternal in His name (I John, v, 13; John, xx, 31).

VII. Argument

A logical analysis of the letter would be a mistake. The thought is built up not analytically but synthetically. After a brief introduction, St. John works up the thought that God is Light (i, 5); so, too, should we walk in the light (i, 7), keep from sin (i, 6-ii, 6), observe the new commandment of love (ii, 7), since he that loves is in the light and he that hates is in darkness (ii, 8-iii). Then follows the second leading Johannine thought that God is Love (iii-v, 12). Love means that we are sons of God (iii, 1-4); Divine sonship means that we are not in sin (iii, 4-13), that we love one another (iii, 13-44), that we believe in Jesus Christ the Son of God (iv, 5, 6); for it was love that impelled God to give us His only son (iv, 7-v, 12). The conclusion (v, 13-end) tells the reader that the purpose of the letter is to inculcate faith in Jesus Christ, since this faith is life eternal. In this conclusion as well as in other parts of the letter, the same salient and leading Johannine thoughts recur to defy analysis. John had two or three things to say; he said these two or three things over and over again in ever varying form.

SECOND EPISTLE

These thirteen verses are directed against the same Docetic errors and germs of Gnosticism which St. John strives to uproot in his Gospel and First Epistle. Harnack and some others, who admit the canonicity of the Second and Third Epistles, assign them to the authorship of John the Elder; we have shown that this John the Elder never existed. The authenticity of this second letter is attested by very early Fathers. St. Polycarp ("Phil.", VII, i; Funk, "Patres Apostolici", I, 304) cites rather II John, 7, than I John, 4. St. Irenæus expressly quotes II John, 10, as the words of "John the Disciple of the Lord". The Muratorian Canon speaks of two Epistles of John. St. Clement of Alexandria speaks of the larger Epistle of John; and, as a consequence, knows at least two. Origen hears witness to the two shorter letters, which "both together do not contain a hundred lines" and are not admitted by all to be authentic. The canonicity of these two letters was long disputed. Eusebius puts them among the Antilegomena. They are not found in the Peshito. The Canon of the Western Church includes them after the fourth century; although only Trent's decree set the question of their canonicity beyond the dispute of such men as Cajetan. The Canon of the Eastern Church, outside that of Antioch, includes them after the fourth century. The style and manner of the second letter are very like to those of the first. The destination of the letter has been much disputed. The opening words are variously interpreted -- "The ancient to the lady Elect, and her children" (*ho presbuteros eklekte kuria kai tois teknois autes*). We have seen that the elder means the Apostle. Who is the lady elect? Is she the elect Kyria? The lady Eklekte? A lady named Eklekte Kyria? A lady elect, whose name is omitted? A Church? All these interpretations are defended. We consider, with St. Jerome, that the letter is addressed to a particular church, which St. John urges on to faith in Jesus Christ, to the avoidance of heretics, to love. This interpretation best fits in with the ending to the letter -- "The children of thy sister Elect salute thee."

THIRD EPISTLE

Fourteen verses addressed to Gaius, a private individual. This Gaius seems to have been not an ecclesiastic but a layman of means. He is praised by John for his hospitality to visiting brethren (verses 2-9). The Apostle then goes on: "I had written perhaps to the church; but Diotrephes, who loveth to have the pre-eminence among them, doth not receive us" (verse 9). This Diotrephes may have been the bishop of the Church. He is found fault with roundly, and Demetrius is set up for an example. This short letter, "twin sister", as St. Jerome called it, to the second of John's letters, is entirely a personal affair. No doctrine is discussed. The lesson of hospitality, especially of care for the preachers of the Gospel is insisted on. The earliest certain recognition of this letter as Apostolic is by St. Denis of Alexandria (third century). Eusebius refers to the letters called "the second and third of John, whether these chance to belong to the

evangelist or to someone else with a name like to his" ("Hist. eccl.", III xxv; Schwartz, II, 1, p. 250). The canonicity of the letter has already been treated. The greeting and ending of this letter are internal evidence of composition by the author of the previous Johannine letter. The simple and affectionate style, the firmness of the rebuke of Diotrophes are strictly Johannine. Nothing certain is known as to time and place of writing; but it is generally supposed that the two small letters were written by John towards the end of his long life and in Ephesus.

WALTER DRUM

Gospel of Saint John

Gospel of St. John

This subject will be considered under the following heads:

- I. Contents and Scheme of the Gospel;
- II. Distinctive Peculiarities;
- III. Authorship;
- IV. Circumstances of the Composition;
- V. Critical Questions Concerning the Text;
- VI. Historical Genuineness;
- VII. Object and Importance.

I. CONTENTS AND SCHEME OF THE GOSPEL

According to the traditional order, the Gospel of St. John occupies the last place among the four canonical Gospels. Although in many of the ancient copies this Gospel was, on account of the Apostolic dignity of the author inserted immediately after or even before the Gospel of St. Matthew, the position it occupies today was from the beginning the most usual and the most approved. As regards its contents, the Gospel of St. John is a narrative of the life of Jesus from His baptism to His Resurrection and His manifestation of Himself in the midst of His disciples. The chronicle falls naturally into four sections:

- *the prologue* (i, 1-18), containing what is in a sense a brief epitome of the whole Gospel in the doctrine of the Incarnation of the Eternal Word;
- *the first part* (i, 19-xii, 50), which recounts the public life of Jesus from His baptism to the eve of His Passion,
- *the second part* (xiii-xxi, 23), which relates the history of the Passion and Resurrection of the Saviour;

- *a short epilogue* (xxi, 23-25), referring to the great mass of the Saviour's words and works which are not recorded in the Gospel.

When we come to consider the arrangement of matter by the Evangelist, we find that it follows the historical order of events, as is evident from the above analysis. But the author displays in addition a special concern to determine exactly the time of the occurrence and the connection of the various events fitted into this chronological framework. This is apparent at the very beginning of his narrative when, as though in a diary he chronicles the circumstances attendant on the beginning of the Saviour's public ministry, with four successive definite indications of the time (i, 29, 35, 43, ii, 1). He lays special emphasis on the first miracles: "This beginning of miracles did Jesus in Cana of Galilee" (ii, 11), and "This *is* again the second miracle that Jesus did, when he was come out of Judea into Galilee" (iv, 54). Finally, he refers repeatedly throughout to the great religious and national festivals of the Jews for the purpose of indicating the exact historical sequence of the facts related (ii, 13; v, 1; vi, 4; vii, 2; x, 22; xii, 1, xiii, 1).

All the early and the majority of modern exegetes are quite justified, therefore, in taking this strictly chronological arrangement of the events as the basis of their commentaries. The divergent views of a few modern scholars are without objective support either in the text of the Gospel or in the history of its exegesis.

II. DISTINCTIVE PECULIARITIES

The Fourth Gospel is written in Greek, and even a superficial study of it is sufficient to reveal many peculiarities, which give the narrative a distinctive character. Especially characteristic is the vocabulary and diction. His vocabulary is, it is true, less rich in peculiar expressions than that of Paul or of Luke: he uses in all about ninety words not found in any other hagiographer. More numerous are the expressions which are used more frequently by John than by the other sacred writers. Moreover, in comparison with the other books of the New Testament, the narrative of St. John contains a very considerable portion of those words and expressions which might be called the common vocabulary of the Four Evangelists.

What is even more distinctive than the vocabulary is the grammatical use of particles, pronouns, prepositions, verbs, etc., in the Gospel of St. John. It is also distinguished by many peculiarities of style, -- asyndeta, reduplications, repetitions, etc. On the whole, the Evangelist reveals a close intimacy with the Hellenistic speech of the first century of our era. which receives at his hands in certain expressions a Hebrew turn. His literary style is deservedly lauded for its noble, natural, and not inartistic

simplicity. He combines in harmonious fashion the rustic speech of the Synoptics with the urban phraseology of St. Paul.

What first attracts our attention in the subject matter of the Gospel is the confinement of the narrative to the chronicling of events which took place in Judea and Jerusalem. Of the Saviour's labours in Galilee John relates but a few events, without dwelling on details, and of these events only two -- the multiplication of the loaves and fishes (vi, 1-16), and the sea-voyage (vi, 17-21) -- are already related in the Synoptic Gospels.

A second limitation of material is seen in the selection of his subject-matter, for compared with the other Evangelists, John chronicles but few miracles and devotes his attention less to the works than to the discourses of Jesus. In most cases the events form, as it were, but a frame for the words, conversation, and teaching of the Saviour and His disputations with His adversaries. In fact it is the controversies with the Sanhedrists at Jerusalem which seem especially to claim the attention of the Evangelist. On such occasions John's interest, both in the narration of the circumstances and in the recording of the discourses and conversation of the Saviour, is a highly theological one. With justice, therefore, was John conceded even in the earliest ages of Christianity, the honorary title of the "theologian" of the Evangelists. There are, in particular, certain great truths, to which he constantly reverts in his Gospel and which may be regarded as his governing ideas, special mention should be made of such expressions as the Light of the World, the Truth, the Life, the Resurrection, etc. Not infrequently these or other phrases are found in pithy, gnomic form at the beginning of a colloquy or discourse of the Saviour, and frequently recur, as a *leitmotif*, at intervals during the discourse (e. g. vi, 35, 48, 51, 58; x, 7, 9; xv, 1, 5; xvii, 1, 5; etc.).

In a far higher degree than in the Synoptics, the whole narrative of the Fourth Gospel centres round the Person of the Redeemer. From his very opening sentences John turns his gaze to the inmost recesses of eternity, to the Divine Word in the bosom of the Father. He never tires of portraying the dignity and glory of the Eternal Word Who vouchsafed to take up His abode among men that, while receiving the revelation of His Divine Majesty, we might also participate in the fullness of His grace and truth. As evidence of the Divinity of the Saviour the author chronicles some of the great wonders by which Christ revealed His glory, but he is far more intent on leading us to a deeper understanding of Christ's Divinity and majesty by a consideration of His words, discourses, and teaching, and to impress upon our minds the far more glorious marvels of His Divine Love.

III. AUTHORSHIP

If we except the heretics mentioned by Irenaeus (*Adv. haer.*, III, xi, 9) and Epiphanius (*Haer.*, li, 3), the authenticity of the Fourth Gospel was scarcely ever seriously

questioned until the end of the eighteenth century. Evanson (1792) and Bretschneider (1820) were the first to run counter to tradition in the question of the authorship, and, since David Friedrich Strauss (1834-40) adopted Bretschneider's views and the members of the Tübingen School, in the wake of Ferdinand Christian Baur, denied the authenticity of this Gospel, the majority of the critics outside the Catholic Church have denied that the Fourth Gospel was authentic. On the admission of many critics, their chief reason lies in the fact that John has too clearly and emphatically made the true Divinity of the Redeemer, in the strict metaphysical sense, the centre of his narrative. However, even Harnack has had to admit that, though denying the authenticity of the Fourth Gospel, he has sought in vain for any satisfactory solution of the Johannine problem: "Again and again have I attempted to solve the problem with various possible theories, but they led me into still greater difficulties, and even developed into contradictions." (*"Gesch. der altchristl. Lit."*, I, pt. ii, Leipzig, 1897, p. 678.)

A short examination of the arguments bearing on the solution of the problem of the authorship of the Fourth Gospel will enable the reader to form an independent judgment.

Direct Historical Proof

If, as is demanded by the character of the historical question, we first consult the historical testimony of the past, we discover the universally admitted fact that, from the eighteenth century back to at least the third, the Apostle John was accepted without question as the author of the Fourth Gospel. In the examination of evidence therefore, we may begin with the third century, and thence proceed back to the time of the Apostles.

The ancient manuscripts and translations of the Gospel constitute the first group of evidence. In the titles, tables of contents, signatures, which are usually added to the text of the separate Gospels, John is in every case and without the faintest indication of doubt named as the author of this Gospel. The earliest of the extant manuscripts, it is true, do not date back beyond the middle of the fourth century, but the perfect unanimity of all the codices proves to every critic that the prototypes of these manuscripts, at a much earlier date, must have contained the same indications of authorship. Similar is the testimony of the Gospel translations, of which the Syrian, Coptic, and Old Latin extend back in their earliest forms to the second century.

The evidence given by the early ecclesiastical authors, whose reference to questions of authorship is but incidental, agrees with that of the above mentioned sources. St. Dionysius of Alexandria (264-5), it is true, sought for a different author for the Apocalypse, owing to the special difficulties which were being then urged by the Millennarians in Egypt; but he always took for granted as an undoubted fact that the Apostle John was the author of the Fourth Gospel. Equally clear is the testimony of Origen (d.

254). He knew from the tradition of the Church that John was the last of the Evangelists to compose his Gospel (Eusebius, "Hist. eccl.", VI, xxv, 6), and at least a great portion of his commentary on the Gospel of St. John, in which he everywhere makes clear his conviction of the Apostolic origin of the work has come down to us. Origen's teacher, Clement of Alexandria (d. before 215-6), relates as "the tradition of the old presbyters", that the Apostle John, the last of the Evangelists, "filled with the Holy Ghost, had written a spiritual Gospel" (Eusebius, op. cit., VI, xiv, 7).

Of still greater importance is the testimony of St. Irenaeus, Bishop of Lyons (d. about 202), linked immediately with the Apostolic Age as he is, through his teacher Polycarp, the disciple of the Apostle John. The native country of Irenaeus (Asia Minor) and the scene of his subsequent ministry (Gaul) render him a witness of the Faith in both the Eastern and the Western Church. He cites in his writings at least one hundred verses from the Fourth Gospel, often with the remark, "as John, the disciple of the Lord, says". In speaking of the composition of the Four Gospels, he says of the last: "Later John, the disciple of the Lord who rested on His breast, also wrote a Gospel, while he was residing at Ephesus in Asia" (Adv. Haer., III, i, n. 2). As here, so also in the other texts it is clear that by "John, the disciple of the Lord," he means none other than the Apostle John.

We find that the same conviction concerning the authorship of the Fourth Gospel is expressed at greater length in the Roman Church, about 170, by the writer of the Muratorian Fragment (lines 9-34). Bishop Theophilus of Antioch in Syria (before 181) also cites the beginning of the Fourth Gospel as the words of John (Ad Autolyicum, II, xxii). Finally, according to the testimony of a Vatican manuscript (Codex Regius Suedicus seu Alexandrinus, 14), Bishop Papias of Hierapolis in Phrygia, an immediate disciple of the Apostle John, included in his great exegetical work an account of the composition of the Gospel by St. John during which he had been employed as scribe by the Apostle.

It is scarcely necessary to repeat that, in the passages referred to, Papias and the other ancient writers have in mind but one John, namely the Apostle and Evangelist, and not some other Presbyter John, to be distinguished from the Apostle. (See JOHN THE EVANGELIST, SAINT.)

Indirect External Evidence

In addition to the direct and express testimony, the first Christian centuries testify indirectly in various ways to the Johannine origin of the Fourth Gospel. Among this indirect evidence the most prominent place must be assigned to the numerous citations of texts from the Gospel which demonstrate its existence and the recognition of its claim to form a portion of the canonical writings of the New Testament, as early as the beginning of the second century. St. Ignatius of Antioch, who died under Trajan (98-117), reveals in the quotations, allusions, and theological views found in his Epistles,

an intimate acquaintance with the Fourth Gospel. In the writings of the majority of the other Apostolic Fathers, also, a like acquaintance with this Gospel can scarcely be disputed, especially in the case of Polycarp, the "Martyrium of Polycarp", the "Epistle to Diognetus", and the "Pastor" of Hermas (cf. the list of quotations and allusions in F. X. Funk's edition of the Apostolic Fathers).

In speaking of St. Papias, Eusebius says (Hist. eccl., III, xxxix, 17) that he used in his work passages from the First Epistle of St. John. But this Epistle necessarily presupposes the existence of the Gospel, of which it is in a way the introduction or companion work. Furthermore, St. Irenaeus (Adv. Haer., V, xxxii, 2) cites a sentence of the "presbyters" which contains a quotation from John, xiv, 2, and, according to the opinion of those entitled to speak as critics, St. Papias must be placed in the front rank of the presbyters.

Of the second-century apologists, St. Justin (d. about 166), in an especial manner, indicates by his doctrine of the Logos, and in many passages of his apologies the existence of the Fourth Gospel. His disciple Tatian, in the chronological scheme of his "Diatessaron", follows the order of the Fourth Gospel, the prologue of which he employs as the introduction to his work. In his "Apology" also he cites a text from the Gospel.

Like Tatian, who apostatized about 172 and joined the Gnostic sect of the Encratites, several other heretics of the second century also supply indirect testimony concerning the Fourth Gospel. Basilides appeals to John, i, 8, and ii, 4. Valentine seeks support for his theories of the ons in expressions taken from John; his pupil Heracleon composed, about 160, a commentary on the Fourth Gospel, while Ptolemy, another of his followers, gives an explanation of the prologue of the Evangelist. Marcion preserves a portion of the canonical text of the Gospel of St. John (xiii, 4-15; xxxiv, 15, 19) in his own apocryphal gospel. The Montanists deduce their doctrine of the Paraclete mainly from John, xv and xvi. Similarly in his "True Discourse" (about 178) the pagan philosopher Celsus bases some of his statements on passages of the Fourth Gospel.

On the other hand, indirect testimony concerning this Gospel is also supplied by the oldest ecclesiastical liturgies and the monuments of early Christian art. As to the former, we find from the very beginning texts from the Fourth Gospel used in all parts of the Church, and not infrequently with special predilection. Again, to take one example, the raising of Lazarus depicted in the Catacombs forms, as it were, a monumental commentary on the eleventh chapter of the Gospel of St. John.

The Testimony of the Gospel Itself

The Gospel itself also furnishes an entirely intelligible solution of the question of authorship.

(1) The general character of the work

In the first place from the general character of the work we are enabled to draw some inferences regarding its author. To judge from the language, the author was a Palestinian Jew, who was well acquainted with the Hellenic Greek of the upper classes. He also displays an accurate knowledge of the geographical and social conditions of Palestine even in his slightest incidental references. He must have enjoyed personal intercourse with the Saviour and must even have belonged to the circle of his intimate friends. The very style of his chronicle shows the writer to have been an eyewitness of most of the events. Concerning the Apostles John and James the author shows a thoroughly characteristic reserve. He never mentions their names, although he gives those of most of the Apostles, and once only, and then quite incidentally, speaks of "the sons of Zebedee" (xxi, 2). On several occasions, when treating of incidents in which the Apostle John was concerned, he seems intentionally to avoid mentioning his name (John, i, 37-40; xviii, 15, 16; cf. xx, 3-10). He speaks of John the precursor nine times without giving him the title of "the Baptist", as the other Evangelists invariably do to distinguish him from the Apostle. All these indications point clearly to the conclusion that the Apostle John must have been the author of the Fourth Gospel.

(2) The express testimony of the author

Still clearer grounds for this view are to be found in the express testimony of the author. Having mentioned in his account of the Crucifixion that the disciple whom Jesus loved stood beneath the Cross beside the mother of Jesus (John, xix, 26 sqq.), he adds, after telling of the Death of Christ and the opening of His side, the solemn assurance: "And he that saw it hath given testimony; and his testimony is true. And he knoweth that he saith true: that you also may believe" (xix, 35). According to the admission of all John himself is the "disciple whom the Lord loved". His testimony is contained in the Gospel which for many consecutive years he has announced by word of mouth and which he now sets down in writing for the instruction of the faithful. He assures us, not merely that this testimony is true, but that he was a personal witness of its truth. In this manner he identifies himself with the disciple beloved of the Lord who alone could give such testimony from intimate knowledge. Similarly the author repeats this testimony at the end of his Gospel. After again referring to the disciple whom Jesus loved, he immediately adds the words: "This is that disciple who giveth testimony of these things, and hath written these things; and we know that his testimony is true" (John, xxi, 24). As the next verse shows, his testimony refers not merely to the events just recorded but to the whole Gospel. It is more in accordance with the text and the general style of the Evangelist to regard these final words as the author's own composition, should we prefer, however, to regard this verse as the addition of the first reader and disciple of the Apostle, the text constitutes the earliest and most venerable evidence of the Johannine origin of the Fourth Gospel.

(3) Comparison of the Gospel to the Johannine epistles

Finally we can obtain evidence concerning the author from the Gospel itself, by comparing his work with the three Epistles, which have retained their place among the Catholic Epistles as the writings of the Apostle John. We may here take for granted as a fact admitted by the majority of the critics, that these Epistles are the work of the same writer, and that the author was identical with the author of the Gospel. In fact the arguments based on the unity of style and language, on the uniform Johannine teaching, on the testimony of Christian antiquity, render any reasonable doubt of the common authorship impossible. At the beginning of the Second and Third Epistles the author styles himself simply "the presbyter" -- evidently the title of honour by which he was commonly known among the Christian community. On the other hand, in his First Epistle, he emphasizes repeatedly and with great earnestness the fact that he was an eyewitness of the facts concerning the life of Christ to which he (in his Gospel) had borne testimony among the Christians: "That which was from the beginning, which we have heard, which we have seen with our eyes, which we have looked upon and our hands have handled, of the word of life: for the life was manifested; and we have seen and do bear witness, and declare unto you the life eternal, which was with the Father, and hath appeared to us: that which we have seen and have heard, we declare unto you" (I John, i, 1-3; cf. iv, 14). This "presbyter" who finds it sufficient to use such an honorary title without qualification as his proper name, and was likewise an eye- and earwitness of the incidents of the Saviour's life, can be none other than the Presbyter John mentioned by Papias, who can in turn be none other than John the Apostle (cf. JOHN THE EVANGELIST, SAINT).

We can therefore, maintain with the utmost certainty that John the Apostle, the favourite disciple of Jesus, was really the author of the Fourth Gospel.

IV. CIRCUMSTANCES OF THE COMPOSITION

Passing over the intimate circumstances with which early legend has clothed the composition of the Fourth Gospel, we shall discuss briefly the time and place of composition, and the first readers of the Gospel.

As to the date of its composition we possess no certain historical information. According to the general opinion, the Gospel is to be referred to the last decade of the first century, or to be still more precise, to 96 or one of the succeeding years. The grounds for this opinion are briefly as follows:

- the Fourth Gospel was composed after the three Synoptics;
- it was written after the death of Peter, since the last chapter - especially xxi, 18-19 presupposes the death of the Prince of the Apostles;

- it was also written after the destruction of Jerusalem and the Temple, for the Evangelist's references to the Jews (cf. particularly xi, 18; xviii, 1; xix, 41) seem to indicate that the end of the city and of the people as a nation is already come;
- the text of xxi, 23, appears to imply that John was already far advanced in years when he wrote the Gospel;
- those who denied the Divinity of Christ, the very point to which St. John devotes special attention throughout his Gospel, began to disseminate their heresy about the end of the first century;
- finally, we have direct evidence concerning the date of composition. The so-called "Monarchian Prologue" to the Fourth Gospel, which was probably written about the year 200 or a little later, says concerning the date of the appearance of the Gospel: "He [sc. the Apostle John] wrote this Gospel in the Province of Asia, after he had composed the Apocalypse on the Island of Patmos". The banishment of John to Patmos occurred in the last year of Domitian's reign (i.e. about 95). A few months before his death (18 September, 96), the emperor had discontinued the persecution of the Christians and recalled the exiles (Eusebius, "Hist. eccl.", III, xx, nn. 5-7). This evidence would therefore refer the composition of the Gospel to A.D. 96 or one of the years immediately following.

The place of composition was, according to the above-mentioned prologue, the province of Asia. Still more precise is the statement of St. Irenaeus, who tells us that John wrote his Gospel "at Ephesus in Asia" (Adv. haer., III, i, 2). All the other early references are in agreement with these statements.

The first readers of the Gospel were the Christians of the second and third generations in Asia Minor. There was no need of initiating them into the elements of the Faith; consequently John must have aimed rather at confirming against the attacks of its opponents the Faith handed down by their parents.

V. CRITICAL QUESTIONS CONCERNING THE TEXT

As regards the text of the Gospel, the critics take special exception to three passages, 5:3-4; 7:53-8:11; and 21.

[John 5:3-4](#)

The fifth chapter tells of the cure of the paralytic at the pool of Bethesda in Jerusalem. According to the Vulgate the text of the second part of verse three and verse four runs as follows: ". . . waiting for the moving of the water. And an angel of the Lord descended at certain times into the pond, and the water was moved. And he that went down first into the pond after the motion of the water, was made whole, of

whatsoever infirmity he lay under." But these words are wanting in the three oldest manuscripts, the Codex Vaticanus (B), Codex Sinaiticus (*aleph*), and Codex Bezae (D), in the original text of the palimpsest of St. Ephraem (C), in the Syrian translation of Cureton, as well as in the Coptic and Sahidic translations, in some minuscules, in three manuscripts of the Itala, in four of the Vulgate, and in some Armenian manuscripts. Other copies append to the words a critical sign which indicates a doubt as to their authenticity. The passage is therefore regarded by the majority of modern critics, including the Catholic exegetes, Schegg, Schanz, Belser, etc., as a later addition by Papias or some other disciple of the Apostle.

Other exegetes, e.g. Corluy, Comely, Knabenbauer, and Murillo, defend the authenticity of the passage urging in its favour important internal and external evidence. In the first place the words are found in the Codex Alexandrinus (A), the emended Codex Ephraemi (C), in almost all minuscule manuscripts, in six manuscripts of the Itala, in most of the Bibles of the Vulgate, including the best, in the Syrian Peshito, in the Syrian translation of Philoxenus (with a critical mark), in the Persian, Arabic, and Slavonic translations, and in some manuscripts of the Armenian text. More important is the fact that, even before the date of our present Bibles, the words were found by many of the Greek and Latin Fathers in the text of the Gospel. This is clear from Tertullian [De bapt., i (before 202)], Didymus of Alexandria [De Trin., II, xiv (about 381)], St. John Chrysostom, St. Cyril of Alexandria, St. Ambrose, St. Augustine [Sermo xv (al. xii), De verbis Evangelii S. Joannis], although the last-mentioned, in his tractate on the Gospel of St. John, omits the passage.

The context of the narrative seems necessarily to presuppose the presence of the words. The subsequent answer of the sick man (v. 7), "Sir, I have no man, when the water is troubled, to put me into the pond. For whilst I am coming, another goeth down before me", could scarcely be intelligible without verse 4, and the Evangelist is not accustomed to omit such necessary information from his text. Thus both sides have good grounds for their opinions, and no final decision on the question, from the standpoint of the textual critic, seems possible.

[John 7:53-8:11](#)

This passage contains the story of the adulteress. The external critical evidence seems in this case to give still clearer decision against the authenticity of this passage. It is wanting in the four earliest manuscripts (B, A, C, and *aleph*) and many others, while in many copies it is admitted only with the critical mark, indicative of doubtful authenticity. Nor is it found in the Syrian translation of Cureton, in the Sinaitic, the Gothic translation, in most Bibles of the Peshito, or of the Coptic and Armenian translations, or finally in the oldest manuscripts of the Itala. None of the Greek Fathers

have treated the incident in their commentaries, and, among Latin writers, Tertullian, Cyprian, and Hilary appear to have no knowledge of this pericope.

Notwithstanding the weight of the external evidence of these important authorities, it is possible to adduce still more important testimony in favour of the authenticity of the passage. As for the manuscripts, we know on the authority of St. Jerome that the incident "was contained in many Greek and Latin codices" (*Contra Pelagium*, II, xvii), a testimony supported today by the Codex Beza of Canterbury (D) and many others. The authenticity of the passage is also favoured by the Vulgate, by the Ethiopians Arabic, and Slavonic translations, and by many manuscripts of the Itala and of the Armenian and Syrian text. Of the commentaries of the Greek Fathers, the books of Origen dealing with this portion of the Gospel are no longer extant; only a portion of the commentary of St. Cyril of Alexandria has reached us, while the homilies of St. John Chrysostom on the Fourth Gospel must be considered a treatment of selected passages rather than of the whole text. Among the Latin Fathers, Sts. Ambrose and Augustine included the pericope in their text, and seek an explanation of its omission from other manuscripts in the fact that the incident might easily give rise to offense (cf. especially Augustine, "*De coniugiis adulteris*", II, vii). It is thus much easier to explain the omission of the incident from many copies than the addition of such a passage in so many ancient versions in all parts of the Church. It is furthermore admitted by the critics that the style and mode of presentation have not the slightest trace of apocryphal origin, but reveal throughout the hand of a true master. Too much importance should not be attached to variations of vocabulary, which may be found on comparing this passage with the rest of the Gospel, since the correct reading of the text is in many places doubtful, and any such differences of language may be easily harmonized with the strongly individual style of the Evangelist.

It is thus possible, even from the purely critical standpoint, to adduce strong evidence in favour of the canonicity and inspired character of this pericope, which by decision of the Council of Trent, forms a part of the Holy Bible.

[John 21](#)

Concerning the last chapter of the Gospel a few remarks will suffice. The last two verses of the twentieth chapter indicate clearly indeed that the Evangelist intended to terminate his work here: "Many other signs also did Jesus in the sight of his disciples, which are not written in this book. But these are written, that you may believe that Jesus is the Christ, the Son of God: and that believing, you may have life in his name" (xx, 30 sq.). But the sole conclusion that can be deduced from this is that the twenty-first chapter was afterwards added and is therefore to be regarded as an appendix to the Gospel. Evidence has yet to be produced to show that it was not the Evangelist, but another, who wrote this appendix. The opinion is at present fairly general, even

among critics, that the vocabulary, style, and the mode of presentation as a whole, together with the subject-matter of the passage reveal the common authorship of this chapter and the preceding portions of the Fourth Gospel.

VI. HISTORICAL GENUINENESS

Objections Raised against the Historical Character of the Fourth Gospel

The historical genuineness of the Fourth Gospel is at the present time almost universally denied outside the Catholic Church. Since David Friedrich Strauss and Ferdinand Christian Baur this denial has been postulated in advance in most of the critical inquiries into the Gospels and the life of Jesus. Influenced by this prevailing tendency, Alfred Loisy also reached the point where he openly denied the historicity of the Fourth Gospel; in his opinion the author desired, not to write a history, but to clothe in symbolical garb his religious ideas and theological speculations.

The writings of Loisy and their rationalistic prototypes, especially those of the German critics, have influenced many later exegetes, who while wishing to maintain the Catholic standpoint in general, concede only a very limited measure of historical genuineness to the Fourth Gospel. Among this class are included those who acknowledge as historical the main outlines of the Evangelist's narrative, but see in many individual portions only symbolical embellishments. Others hold with H. J. Holtzmann that we must recognize in the Gospel a mixture of the subjective, theological speculations of the author and the objective, personal recollections of his intercourse with Christ, without any possibility of our distinguishing by sure criteria these different elements. That such a hypothesis precludes any further question as to the historical genuineness of the Johannine narrative, is evident, and is indeed candidly admitted by the representatives of these views.

On examining the grounds for this denial or limitation of the historical genuineness of John we find that they are drawn by the critics almost exclusively from the relation of the Fourth Gospel to the Synoptic narrative. On comparison three points of contrast are discovered: (1) with respect to the events which are related; (2) in regard to the mode of presentation; and (3) in the doctrine which is contained in the narrative.

(1) The events related

As regards the events related, the great contrast between John and the Synoptists in the choice and arrangement of materials is especially accentuated. The latter show us the Saviour almost exclusively in Galilee, labouring among the common people: John, on the other hand, devotes himself chiefly to chronicling Christ's work in Judea, and His conflicts with the Sanhedrists at Jerusalem. An easy solution of this first difficulty is found in the special circumstances attending the composition of the Fourth Gospel. John may - in fact must - have assumed that the Synoptic narrative was known to his readers at the end of the first century. The interest and spiritual needs of these

readers demanded primarily that he supplement the evangelical story in such a manner as to lead to a deeper knowledge of the Person and Divinity of the Saviour, against which the first heresies of Cerinthus, the Ebionites, and the Nicolaites were being already disseminated in Christian communities. But it was chiefly in His discussions with the Scribes and Pharisees at Jerusalem that Christ had spoken of His Person and Divinity. In his Gospel, therefore John made it his primary purpose to set down the sublime teachings of Our Saviour, to safeguard the Faith of the Christians against the attacks of the heretics. When we come to consider the individual events in the narrative, three points in particular are brought forward:

- the duration of Christ's public ministry extends in the Fourth Gospel over at least two years, probably indeed over three years, and some months. However, the Synoptic account of the public life of Jesus can by no means be confined within the narrow space of one year, as some modern critics contend. The three earliest Evangelists also suppose the space of at least two years and some months.
- The purification of the Temple is referred by John to the beginning of the Saviour's ministry, while the Synoptists narrate it at the close. But it is by no means proven that this purification occurred but once. The critics bring forward not a single objective reason why we should not hold that the incident, under the circumstances related in the Synoptics, as well as those of the Fourth Gospel, had its historical place at the beginning and at the end of the public life of Jesus.
- Notwithstanding all the objections brought forward, John is in agreement with the Synoptists as to the date of the Last Supper. It occurred on Thursday, the thirteenth day of Nisan, and the Crucifixion took place on Friday, the fourteenth. The fact that according to John, Christ held the Supper with His Apostles on Thursday, while, according to the Synoptists, the Jews ate the paschal lamb on Friday, is not irreconcilable with the above statement. The most probable solution of the question lies in the legitimate and widespread custom, according to which, when the fifteenth of Nisan fell on the Sabbath, as it did in the year of the Crucifixion, the paschal lamb was killed in the evening hours of the thirteenth of Nisan and the paschal feast celebrated on this or the following evening, to avoid all infringement of the strict sabbatic rest.

(2) The mode of presentation

As regards the mode of presentation, it is especially insisted that the great sublimity of the Fourth Gospel is difficult to reconcile with the homely simplicity of the Synoptics. This objection, however, entirely disregards the great differences in the circumstances

under which the Gospels were written. For the Christians of the third generation in Asia living in the midst of flourishing schools, the Fourth Evangelist was forced to adopt an entirely different style from that employed by his predecessors in writing for the newly-converted Jews and pagans of the earlier period.

Another difficulty raised is the fact that the peculiar Johannine style is found not only in the narrative portions of the Gospel, but also in the discourses of Jesus and in the words of the Baptist and other personages. But we must remember that all the discourses and colloquies had to be translated from Aramaic into Greek, and in this process received from the author their distinctive unity of style. Besides in the Gospel, the intention is by no means to give a verbatim report of every sentence and expression of a discourse, a sermon, or a disputation. The leading ideas alone are set forth in exact accordance with the sense, and, in this manner, also, they come to reflect the style of the Evangelist. Finally, the disciple surely received from his Master many of the distinctive metaphors and expressions which imprint on the Gospel its peculiar character.

(3) The doctrinal content

The difference in doctrinal content lies only in the external forms and does not extend to the truths themselves. A satisfactory explanation of the dogmatic character of John's narrative, as compared with the stress laid on the moral side of the discourses of Jesus by the Synoptists, is to be found in the character of his first readers, to which reference has already been repeatedly made. To the same cause, also, must be ascribed the further difference between the Gospels namely, why John makes his teaching centre around the Person of Jesus, while the Synoptics bring into relief rather the Kingdom of God. At the end of the first century there was no need for the Evangelist to repeat the lessons concerning the Kingdom of Heaven, already amply treated by his predecessors. His was the especial task to emphasize, in opposition to the heretics, the fundamental truth of the Divinity of the Founder of this Kingdom, and by chronicling those words and works of the Redeemer in which He Himself had revealed the majesty of His glory, to lead the faithful to a more profound knowledge of this truth.

It is superfluous to say that in the teaching itself, especially regarding the Person of the Redeemer, there is not the slightest contradiction between John and the Synoptists. The critics themselves have to admit that even in the Synoptic Gospels Christ, when He speaks of His relations with the Father, assumes the solemn "Johannine" mode of speech. It will be sufficient to recall the impressive words: "And no one knoweth the Son, but the Father: neither doth any one know the Father, but the Son, and he to whom it shall please the Son to reveal *him*" (Matt., xi, 27; Luke, x, 22).

(4) Positive Evidence for the Historical Genuineness of the Gospel

The reasons urged against the genuineness of the Fourth Gospel are devoid of all conclusive force. On the other hand, its genuineness is vouched for by the whole

character of the narrative. From the very beginning the events are portrayed with the precision of an eyewitness; the most minute subsidiary circumstances are mentioned; not the least suggestion can be found that the author had any other object in mind than the chronicling of the strict historical truth. A perusal of the passages describing the call of the first disciples (i, 35-51), the Marriage at Cana (ii, 1-11), the conversation with the Samaritan woman (iv, 3-42), the healing of the man born blind (ix, 1-41), the raising of Lazarus (xi, 1-47), is sufficient to convince one that such a chronicle must necessarily lead the readers into error, if the events which are described be otherwise than true in the historical sense.

To this must be added the express assertion made repeatedly by the Evangelist that he speaks the truth and claims for his words unqualified belief (xix, 35; xx, 30 sq.; xxi, 24; I John, i, 1-4). To reject these assurances is to label the Evangelist a worthless impostor, and to make of his Gospel an unsolvable historical and psychological enigma.

And finally, the verdict of the entire Christian past has certainly a distinct claim to consideration in this question, since the Fourth Gospel has always been unhesitatingly accepted as one of the chief and historically credible sources of our knowledge of the life of Jesus Christ. With entire justice, therefore, have the contrary views been condemned in clauses 16-18 of the Decree "Lamentabili" (3 July, 1907) and in the Decree of the Biblical Commission of 29 May, 1907.

VII. OBJECT AND IMPORTANCE

The intention of the Evangelist in composing the Gospel is expressed in the words which we have already quoted: "But these are written that you may believe that Jesus is the Christ, the Son of God" (xx, 31). He wished also by his work to confirm the faith of the disciples in the Messianic character and the Divinity of Christ. To attain his object, he selected principally those discourses and colloquies of Jesus in which the self-revelation of the Redeemer laid clearest emphasis on the Divine Majesty of His Being. In this manner John wished to secure the faithful against the temptations of the false learning by means of which the heretics might prejudice the purity of their faith. Towards the narrative of the earlier Evangelists John's attitude was that of one who sought to fill out the story of the words and works of the Saviour, while endeavouring to secure certain incidents from misinterpretation. His Gospel thus forms a glorious conclusion of the joyous message of the Eternal Word. For all time it remains for the Church the most sublime testimony of her faith in the Son of God, the radiant lamp of truth for her doctrine, the never-ceasing source of loving zeal in her devotion to her Master, Who loves her even to the end.

Commentaries on the Gospel of St. John. In early Christian times: the Homilies of ST. JOHN CHRYSOSTOM and the Tractates of ST. AUGUSTINE; the extant portions of the commentaries of ORIGEN and ST. CYRIL OF ALEXANDRIA; the expos-

itions of THEOPHYLACTUS and EUTHYMIUS, who generally follow Chrysostom, and the exegetical works of ST. BEDE, who follows Augustine. In the Middle Ages: the interpretations of ST. THOMAS AQUINAS and ST. BONAVENTURE, of Blessed ALBERTUS MAGNUS, RUPERT of DEUTZ, and ST. BRUNO OF SEGNI.

LEOPOLD FONCK

Sts. John and Paul

Sts. John and Paul

Martyred at Rome on 26 June. The year of their martyrdom is uncertain according to their Acts, it occurred under Julian the Apostate (361-3). In the second half of the fourth century, Byzantius, the Roman senator, and Pammachius, his son, fashioned their house on the Caelian Hill into a Christian basilica. In the fifth century the *presbyteri tituli Byzantii* (priests of the church of Byzantius) are mentioned in an inscription and among the signatures of the Roman Council of 499. The church was also called the *titulus Pammachii* after Byzantius's son, the pious friend of St. Jerome. In the ancient apartments on the ground-floor of the house of Byzantius, which were still retained under the basilica, the tomb of two Roman martyrs, John and Paul, was the object of veneration as early as the fifth century. The *Sacramentarium Leonianum* already indicates in the preface to the feast of the saints, that they rested within the city walls ("Sac. Leon.", ed. Feltoe, Cambridge, 1896, 34), while, in one of the early itineraries to the tombs of the Roman martyrs, their grave is assigned to the church on the Caelian (De rossi, "Roma sotterranea", I, 138, 175). The *titulus Byzantii* or *Pammachii* was consequently known at a very early date by the names of the two martyrs (*titulus SS. Joannis et Pauli*). That the two saints are martyrs of the Roman Church, is historically certain; as to how and when their bodies found a resting-place in the house of Pammachius under the basilica, we only know that it certainly occurred in the fourth century. The year and circumstances of their martyrdom are likewise unknown. According to their Acts, which are of a purely legendary character and without historical foundation, the martyrs were eunuchs of Constantina, daughter of Constantine the Great, and became acquainted with a certain Gallicanus, who built a church in Ostia. At the command of Julian the Apostate, they were beheaded secretly by Terentianus in their house on the Caelian, where their church was subsequently erected, and where they themselves were buried. The rooms on the ground-floor of the above-mentioned house of Pammachius were rediscovered under the Basilica of SS. Giovanni e Paolo in Rome. They are decorated with important and interesting frescoes, while the original tomb (*confessio*) of Sts. John and Paul is covered with paintings of which the martyrs are the subject. The rooms and the tomb form one of the most important early Christian

memorials in Rome. Since the erection of the basilica, the two saints have been greatly venerated, and their names have been inserted in the Canon of the Mass. Their feast is kept on 26 June.

J. P. KIRSCH

St. John Baptist de la Salle

St. John Baptist de la Salle

Founder of the Institute of the Brothers of the Christian Schools, educational reformer, and father of modern pedagogy, was born at Reims, 30 April, 1651, and died at Saint-Yon, Rouen, on Good Friday, 7 April, 1719. The family of de la Salle traces its origin to Johan Salla, who, in the early part of the ninth century, was Commander-in-chief of the Royal forces of Alfonso the Chaste. It was not, however, until about 1350 that the younger branch of this family, from which our saint is descended, removed to France and settled in Champagne. John Baptist was the eldest child of Louis de la Salle and Nicolle de Moet de Brouillet. His parents were very solicitous in the care they bestowed upon their child, especially in regard to his moral and intellectual development. After due preparation, he was sent to the College des Bons Enfants, where he pursued the higher studies and, on 10 July, 1669, he took the degree of Master of Arts. Canon Pierre Dozet, chancellor of the University of Reims, was the presiding officer at the academic sessions, and in the discharge of his function had opportunity to study the character of his young cousin, de la Salle, with the result that he determined on resigning his canonry in his favour. Louis de la Salle, however, cherished the hope that John Baptist would select the profession of law, and thereby maintain the family tradition. But young de la Salle insisted that he was called to serve the Church, and accordingly he received the tonsure 11 March, 1662, and was solemnly installed as a canon of the metropolitan See of Reims, 7 January, 1667.

When de la Salle had completed his classical, literary, and philosophical courses and had read the Schoolmen, he was sent to Paris to enter the Seminary of Saint-Sulpice on 18 October, 1670. While residing here he attended the lectures in theology at the Sorbonne. There, under the direction of Louis Tronson, he made such rapid progress in virtue, that M. Lechassier, superior general of the Congregation of Saint-Sulpice,

renders this testimony of him: "De la Salle was a constant observer of the rule. His conversation was always pleasing and above reproach. He seems never to have given offence to any one, nor to have incurred any one's censure." While at the seminary de la Salle distinguished himself by his piety as well as by the vigour of his intellectual progress and the ability with which he handled theological subjects. Nine months after his arrival in Paris, his mother died, 19 July, 1671, and on 9 April, 1672, his father died. This circumstance obliged him to leave Saint-Sulpice, 19 April, 1672. He was now twenty-one, the head of the family, and as such had the responsibility of educating his brothers and sisters. His whole attention was devoted to his domestic affairs, and he provided for every circumstance by his discreet, businesslike administration. Canon Blain says that he underwent at this time many mental struggles. Distrusting his own lights, de la Salle had recourse to prayer and the guidance of discreet advisers, among them, Nicolas Roland, canon and theologian of Reims, a man of great spiritual discernment. Acting upon the advice of the latter, the future founder was ordained subdeacon at Cambrai, by Archbishop Ladislas Jonnart, 2 June, 1672.

When not occupied with the duties of his canonry or with his theological studies, he was engaged in good works, under the guidance of his spiritual director. After four years, he was ordained deacon at Paris, 21 March, 1676, by Francois Batailler, Bishop of Bethlehem. On this occasion de la Salle sought to obtain the permission of Maurice Le Tellier, Archbishop of Reims, to resign his canonry and prepare for parish work. Nicolas Roland urged him to take this step, alleging that a rich canonry was little in harmony with youthful zeal and activity. His archbishop, however refused his request. With humble submission, de la Salle accepted the decision and returned to Reims to pursue his studies and to make final preparations for his ordination to the priesthood. He was ordained priest by the Archbishop of Reims, on Holy Saturday, 9 April, 1678. The young priest was a model of piety, and his biographers say that persons went to assist at his Mass to be edified, and to share his piety. After Mass there were many who sought his counsel and put themselves under his spiritual guidance. De la Salle never omitted Holy Mass, save when prevented by sickness. In June, 1680, he submitted to his final examination and took his doctorate in theology. At this period of his life de la Salle evinced a docility of spirit, a self-diffidence, that bespoke the character of the man and saint. In physical appearance he was of commanding presence, somewhat above the medium height, and well-proportioned. He had large, penetrating blue eyes and a broad forehead. His portraits present a picture of sweetness and dignity, beaming with intelligence and breathing an air of modesty and refined grace. A smile plays about the finely chiseled lips and illumines a countenance to which the large lustrous eyes give an air of commanding intelligence.

During the few years that intervened between his ordination to the priesthood and the establishing of the institute, de la Salle was occupied in carrying out the last will and testament of Nicolas Roland, who, when dying, had confided to him the newly established Congregation of the Sisters of the Child Jesus. "Your zeal will bring it to prosperity", said Nicolas Roland to him. "You will complete the work which I have begun. In all this, Father Barre will be your model and guide." Thus was de la Salle imperceptibly drawn towards his life-work. "The idea never occurred to me", de la Salle wrote in a memoir. "If I had ever thought that what I did out of pure charity for the poor school teachers would make it incumbent upon me to live with them, I would have given it up at once." This sentiment he again expressed towards the close of his life in these emphatic words: "If God had revealed to me the good that could be accomplished by this institute, and had likewise made known to me the trials and sufferings which would accompany it, my courage would have failed me, and I would never have undertaken it." At this period de la Salle was still occupied with his functions as canon. He was, however, aroused to the higher calling by a message from Madame Maillefer, in March, 1679, requesting him to aid Adrien Nyel in opening a free school at Reims. But hardly had he succeeded in establishing the school of St-Maurice when he quietly withdrew from the work, as if it were not his mission. Shortly afterwards the opening of another free school in St-Jacques parish lured him again from his seclusion, but he soon retired again.

Although instrumental in opening these elementary free schools at Reims, de la Salle seemed to allow Adrien Nyel to share all the honours resulting therefrom, while he was content to labour assiduously for the real progress of both schools. He was unconsciously attracted to the work. Daily he visited the teachers to encourage them or suggest practical methods to attain definite results. But when he found that the teachers became discouraged, owing to the lack of proper guidance after school hours, he undertook to house them, that he might be able to direct them and give them practical lessons in the useful employment of time, and to prevent weariness and disgust. Not only did he aid them in class and after class, but he made good any deficit in the cost of living. He even admitted them to his own table and later on sheltered them under his roof. Thus was he drawn closer and closer to them, forming an intimate fellowship with the teachers of the poor. "It was, indeed", says Mgr. Guibert, "his love that induced de la Salle to devote himself to the young teachers of Reims. They were like abandoned sheep without a shepherd. He assumed the responsibility of uniting them." As yet de la Salle had no definitive plans for the future, even as late as 2 June, 1682, when he transferred his little community to the vicinity of rue Neuve. He simply kept himself in readiness to follow the guidance of Providence. He resigned his canonry in July, 1683, and he distributed his fortune to the poor in the winter of 1684, thus giving con-

vincing proofs that he would not hesitate to make any sacrifices necessary to complete the good work he had begun. Pere Barre counselled de la Salle to give up whatever might divert his attention from procuring God's glory. In reply to the earnest remonstrances of his friends and kinsfolk, he meekly answered: "I must do the work of God, and if the worst should come to pass, we shall have to beg alms." Reliance upon Providence was henceforth to be the foundation of the Christian Schools.

Up to this period (1684) the institute had lacked the characteristics of a permanent organization. From 1694 to 1717, the struggle for existence was most critical. In 1692 the institute was so weakened by deaths and defections that de la Salle could hardly find two Brothers who were willing to bind themselves by vow to maintain the free schools. The death of Henri L'Heureux in December, 1690, materially affected the rules of the Brothers of the Christian Schools. De la Salle, intending this gifted young Brother to be the future superior of the congregation, entertained the hope of having him ordained priest, and with this view he sent him to Paris to pursue his theological studies at the Sorbonne. After a brilliant course, Brother Henri L'Heureux was ready for ordination, but before this event took place the young candidate fell sick and died. The loss of this Brother was a blow to the founder. After passing the whole night in prayer, he rose up, not only comforted but strengthened, but also enlightened as to the character of his future institute. He then determined that there should be no priests among the members of his institute. Although there were priests and lay brothers in nearly all existing religious orders, de la Salle was convinced that the time had come for a change in this matter in the new congregation. Brother Lucard, the Annalist of the institute, thus sums up the matter: "Since the death of Henri L'Heureux, de la Salle was firmly convinced that his institute was to be founded on simplicity and humility. No Brother could, without compromising his congregation, allow himself to be diverted from his functions as a teacher, by devoting himself to special studies, the saying of the Divine Office, or the fulfillment of other duties obligatory on the sacred ministry." Therefore, no Brother can aspire to the priesthood nor perform any priestly function, and no ecclesiastic can become a member of the institute. This is the new rule that de la Salle added, and it is embodied in the Constitution of the institute.

From 1702 the founder began to endure a long period of trial, aggravated by persecution on the part of certain ecclesiastical authorities. In November, 1702, he was deposed by Cardinal de Noailles, and supplanted for a time by the Rev. B. Bricot. In 1703 one of his most trusted disciples, Nicolas Vuyart, treacherously deserted him. For the next ten years the holy founded was engaged in a series of struggles for the preservation of his institute, in the course of which his name was attacked, and justice denied him before the civil tribunals. After thirty-five years of hard labour, his work seemed to be almost on the verge of ruin. His confidence in God was so firm and un-

shaken that he was never really discouraged. In 171 he convoked a chapter for the purpose of solidifying the work and for the election of a superior general. His aim was to have a Brother elected during his lifetime and thus perfect the government of the institute in accordance with the rule he had formulated. The choice of the assembled Brothers fell upon Brother Barthelemy, a man whom all esteemed for his learning and virtue. The institute was now an accomplished fact. And from the first interview with Adrien Nyel, in 1679, de la Salle belonged wholly to the Brothers, sharing with them the burden of labour and observing the common rule. He never left them to engage in other works.

De la Salle was too prudent and too well inspired by God, not to give his institute a positive character in its twofold object: the Christian education of youth and the cultivation of that spirit of faith, piety, mortification, and obedience which should characterize its members. His gift of gaining souls to God, and of leading them to make great sacrifices, was supplemented by the splendid executive ability that enabled him to found an institute and to supervise and direct its gradual development. A study of the extraordinary religious, social, and educational conditions, at the time the institute was founded by de la Salle, will show the peculiar character of the difficulties he had to encounter and overcome. Jansenism had gained the ascendancy in France and spread broadcast its pernicious doctrines; it fostered internal dissensions and promoted Gallicanism, to the great detriment of the Faith and of loyalty to the Holy See. In the social order, a spirit of exaggerated independence was abroad, condemning authority or thrusting it aside. When such conditions prevailed in the upper classes, one may well ask, what must have been the condition of the masses? The incessant foreign and internal wars, with their consequent evils, told with disastrous effect upon the people. Exorbitant demands on the part of army officials, the violence of the soldiery, the rapine of supervisors, the wholesale plunder of crops, followed by famine and ruin, left whole provinces of France under the weight of terrible sufferings and untold misery. The peasants frequently had no bread, and when they had it the circumstances were such as to deprive them of any hope of sustenance for the morrow. Even when the gloom of internal turmoil had been momentarily brightened by the splendid victories abroad, the sad effect of the glory of the reign of Louis XIV made the mourning in cottages only the more bitter owing of the loss of the loved ones on foreign battlefields. Evidently, morals among the masses under these dire circumstances were threatened with ruin, as were the social and economic conditions; for false doctrines were spread and took hold among the people, destroying their faith and stultifying their consciences. Schools there were, but they were poorly attended and shamefully neglected. The children and the people generally were ignorant, and vice, according to contemporary authorities, was rampant among all classes. De la Salle carefully studied these conditions

and, moved to compassion for the poor, resolved to improve their social and moral status. The founder grasped the situation and proposed as a remedy, popular free schools thoroughly graded and supplied with zealous teachers, who would implant in the hearts of the children the germs of those virtues that would tend towards the regeneration of both the pupils and the parents. He saw that a religious congregation composed of enlightened men, eager for the salvation of souls, could alone stem the tide of irreligion, vice, and ignorance. He clearly perceived that, in the peculiar conditions which surround any institute at the period of its origin, the work proposed to be done should embody in its ends the special requirements of the age in which it originates. He also foresaw that, while the guiding spirit of such an institute must ever remain fundamentally the same, its scope, as a permanent organization working for the welfare of humanity, should have the character of a social force answering to the needs and conditions of any age and country.

The various educational reforms which de la Salle introduced prove that he legislated wisely. The courses of study for elementary free schools, technical schools, and colleges are evidences of his broad culture and wide grasp of educational problems. Hence, if the needs of a certain locality called for special branches, or if the times and conditions demanded certain advanced studies, de la Salle was not slow in responding nor in giving these subjects a place commensurate in importance with their educational value. De la Salle, furthermore, displayed his genius in giving his institute a distinctive character, that of a teaching body, consecrated to the work of popular education. Thus he became the author of a system of psychologic pedagogy which included the essential principles adopted by later workers in the field of educational reforms, notably by Pestalozzi, Fröbel, Herbart, and others. In making the vernacular the basis of all instruction, de la Salle appealed to the intelligence of the child, prepared the way for the study of national literature, and opened up to the grown man those avenues of real knowledge and delight that had hitherto been closed against the eager multitude. With true scientific insight he perceived the absurdity of retaining Latin texts to teach the art of reading. For this change he gave the following reasons:

- The teaching of the art of reading, in primary and elementary schools, through the vernacular, is of greater and wider utility than by Latin texts.
- The vernacular is more easily taught to children, who already possess some knowledge of it, than the Latin of which they are wholly ignorant.
- It requires considerably less time to learn the art of reading through the vernacular than through a foreign tongue.

- The boys and girls attending the primary and elementary schools, can spend only a few years under instruction. Now, if they are taught reading from a Latin text, they generally leave school without being able to read the vernacular, and with only an imperfect knowledge of how to read the Latin. Hence, they will soon forget the little they have learned, and, perhaps, even how to read the vernacular.
- Reading is one of the most efficacious means of acquiring knowledge. With due care in the selection of books, children who can read in the vernacular could spread the Christian doctrine in the family circle, and, on evenings, read some useful or instructive books to the assembled household; whereas, if they could read the Latin only, without understanding it, they would be deprived of many valuable benefits resulting from the intelligent reading of a good book.
- It is impossible for children in primary and elementary schools to master the reading of Latin texts, because they are not acquainted with its subject matter. It is, therefore, the part of wisdom to train children thoroughly to the intelligent reading of works written in the vernacular. Thus, having mastered the art of reading in the vernacular, a few months would suffice to make them read the Latin fluently, whereas, if the traditional method were followed, it would require at least several years [Annales de l'Institut, I (1883), pp. 140, 141].

This fact proves that de la Salle was a profound thinker, a genius in the work of popular education. He embraced all classes, all conditions of society. By making the free schools popular, he grasped the growing needs of society in his own day and for all times. No phase of the educational problem escaped his penetrating vision.

As de la Salle is especially identified with the "Simultaneous Method" of teaching, an explanation of the method and its history will prove of interest to the educator. By the "Simultaneous Method" the pupils are graded according to their capacity, putting those of equal attainments in the same class, giving them the same text-books, and requiring them to follow the same lesson under one and the same teacher. This method has best stood the test of time and experience, and is that which the Brothers of the Christian Schools employ in all grades of instruction even at the present day. Like all fruitful ideas, the "Simultaneous Method" is not the exclusive property of any one man. Others besides de la Salle discerned its value, and even partially applied its essential principles, long before the founder of the Christian Schools made it live in his institute. It had no place in the university system of the Middle Ages. The plan adopted in those times was that which prevails to a great extent in the universities of our own day, namely, listening to lectures, taking notes thereon, and holding disputations upon the subject-matter. The Jesuits organized each class in subdivisions; each

division being headed by an advanced pupil called a *decurion*, to whom the boys recited their lessons at stated times, while the teacher corrected exercises or heard the lessons of particular pupils. The whole class afterwards received explanations from the teacher. St. Peter Fourier (1565-1640) saw in Christian education the remedy for many of the disorders existing among the poor and labouring class. He was far-seeing, and anticipated more than one of our modern educational improvements. Indeed, he was one of the first to apply some of the principles of the "Simultaneous Method". In his constitutions he prescribes that, as far as it can possibly be carried out, all the pupils of the same mistress shall have each the same book, in order to learn and read therein the same lesson; so that, whilst one is reading hers in an audible and intelligible voice before the mistress, all the others, hearing her and following this lesson in their books at the same time, may earn it sooner, more readily, and more perfectly. Herein the principle of the "Simultaneous Method" is for the first time, clearly stated. Yet, when he enters into the details of practice he seems to lose sight of the principle which he lays down. In the very next paragraph of the Constitutions, it is provided that the mistress shall call up two pupils at a time, and place them one at each side of her desk. The more advanced pupil shall read her lesson; the other shall listen to her, shall correct all the faults she may make, in the use of words, in pronunciation, or in the observance of pauses. This is the individual method. For the smaller pupils he recommends that four or six at a time come to her desk, and to make use of some graded cards, containing letters and syllables. (Sommaire des Constitutions des Religieuses de la Congrégation de Notre-Dame, 1649, 3rd part.)

Cornelius (or Amos Komensky, 1592-1674), in his "Didactica Magna", requires the teacher to instruct his pupils *semel et omnes simul*, "all together at one and the same time" (edit. 1647, cap. xix, Probl. I, Col, 102, 103). Mgr. de Nesmond (1629-1715) divided the class into four or five groups, each having the same book, "in order that all the children of the same group or bench may receive the same lesson, and when one begins to read, the others are to read in a low voice at the same time" (*Méthode pour instruire en peu de temps les Enfants*, p. 59). About 1674, Charles Démié, of Lyons, adopted the method of Mgr. de Nesmond. Like him, he gave the same reading-book to each group, requiring that each one follow, holding his finger or a marker on the words that are being read. The immediate precursor of St. John Baptist de la Salle was a theorist, the anonymous author of "Avis touchant les Petites Ecoles" (Bibl. Nat., 40 R. 556). In this little work, which Leopold Delisle places prior to 1680, the author complains of the condition of the primary schools and proposes a method by which a large number of pupils might be taught, by one teacher, one book, and one voice. The school, he tells us, should be so regulated that one and the same book, one and the same teacher, one and the same lesson, one and the same correction, should serve

for all, so that each pupil would thereby possess his teacher wholly and entirely, and occupy all his care, all his time, and all his attention, as if he were the only pupil (pp. 14 and 19). It is reasonable to presume that de la Salle frequented the schools taught by the Congregation of Notre-Dame, which were founded at Reims in 1634, and observed the method of teaching employed in that congregation. We can have no doubt that he was equally well acquainted with the defects which rendered such methods useless. In 1682 de la Salle had organized the Brothers of the Christian Schools, and had given them the "Simultaneous Method". Brother Azarias says: "What St. Peter Fourier touched, what Komensky and Mgr. de Nesmond and Charles Démia had glimmerings of, what the anonymous author could nowhere find and thought to realize, had become a fact". De la Salle applied the Simultaneous Method not only to reading, as was done by his predecessors, but also to catechism, writing, spelling, and arithmetic in the elementary classes, and then to all the specialties taught in the colleges which he founded. He is, therefore, the genius who introduced and perfected the Simultaneous Method in all its practical details. De la Salle definitely points out the "Simultaneous Method" as the one which he wished his disciples to follow. It is no longer the one teacher governing a whole school; it is two or three, or more, according to the number of pupils, each taking those of the same capacity and teaching them together. His instructions on these heads are exact:

The Brothers shall pay special attention to three things in class: (1) During the lessons, to correct every word that the pupil who is reading pronounces badly; (2) To make all who read in the same lesson to follow therein; (3) To have silence strictly observed in the school. (Common Rules)

The pupils follow in the same lesson, they observe strict silence, the teacher in correcting one, is correcting all. Here is the essence of the "Simultaneous Method". De la Salle generalizes the principles for all lessons, thus:

in all the lessons from alphabet-cards, syllabaries, and other books, whether French or Latin, and even during arithmetic, while one reads, all the others of the same lesson shall follow; that is, they shall read to themselves from their books without making noises with their lips, what the one reading pronounces aloud from his book. (Conduite des ecoles chrétiennes, Avignon, 1724)

With truth has Matthew Arnold said, in speaking of this handbook of Method: "Later works on the same subject have little improved the precepts, while they entirely lack

the unction." In the management of Christian schools, de la Salle states concisely the following practical rules for teaching methodically:

1. The teacher determines the relative intelligence of every pupil in his class.
2. He adapts his language and explanations to the capacity of his class, and is careful never to neglect the duller pupils.
3. He makes sure that the pupils know the meaning of the words they employ.
4. He advances from the simple to the complex, from the easy to the difficult.
5. He makes it a special point to insist greatly on the elementary part of each subject; not to advance until the pupils are well grounded on what goes before . . .
9. To state but few principles at a time, but to explain them well . . .
10. To speak much to the eyes of the pupils, making sue of the blackboard . . .
11. To prepare every lesson carefully.
12. To place no faulty models or standards before the pupils; always to speak to them in a sensible manner, expressing one's self in correct language, good English, and with clearness and precision.
13. To employ none but exact definitions and well-founded divisions . . .
18. To assert nothing without being positively certain of its truth, especially as regards facts, definitions, or principles.
19. To make frequent use of the system of question and answer. (Chap. V, art. ii, pp. 31-33)

It is true that de la Salle, in establishing his institute, had in mind principally the primary and elementary school, which was the real *raison d'être* for the existence of the Brothers of the Christian Schools. He was the organizer of the public instruction of his time, and no master of pedagogical science will deny him that distinction. But, if the primary and elementary school was the principal masterwork of de la Salle, there was yet another field of labour which likewise reveals his creative genius. At the opening of the eighteenth century, he was confronted with singularly perplexing conditions. The rising generation was weary of past glories, disgusted with the present and was ambitious to achieve renown in hitherto unexplored fields of activity. As education was gradually extending to the masses, with the light of instruction came new ideas, new occupations, new ventures, and a breaking away from the old civilization, with the desire to wrestle with the problems born of the new conditions. Even those who were trained in traditional methods became aware of a mighty change in men and things. They felt that there was a desideratum in the actual educational system. With their sons, they experienced the world-spirit breathing upon the moribund civilization of Louis XIV. The political horizon had changed, society became more degenerate, the intellectual world was awakened and cast off its lethargy, assuming a bolder attitude and aspiring to greater freedom in the realm of thought and research.

De la Salle had been struck with the serious hiatus in the instruction reserved for the wealthy children, who were destined for the liberal professions. So, while organizing the primary and elementary school, he also created, in 1705, a special establishment until then unknown in the educational world. This new creation was the boarding college at Saint-Yon, wherein he inaugurated the system of modern secondary instruction. Saint-Yon became the type of all such colleges, and that of Passy, Paris, became the modern exemplar of similar institutions in France and elsewhere. M. Drury, in his report upon technical education, states that France is indebted to de la Salle for the practical installation and popularization of that form of instruction.

Hence, from the origin of the institute, there was a constant adaptation of programmes to the needs created by the social transformations which were taking place. This flexibility, which contrasted with the fixedness of the university programmes, excited surprise and no little opposition among the representatives of academic authority in those days. The instruction given in the college founded by de la Salle and his successors was peculiarly adapted of the needs of a very interesting class of young men. The educational reforms thus planned and carried out by him give unmistakable evidence that Providence had raised him up to be the lawgiver of primary and elementary teaching, as well as the creator of a new system of intellectual training, combining the precision of the traditional method with the wider scope of the new one. It was but natural that de la Salle, who had assimilated the best that the seventeenth century could give, and who had become cognizant of the inefficiency of the old system to meet the requirements of the new conditions, should create schools which were then, and have been since, the admiration of educators. The boarding colleges founded by de la Salle for the modern secondary instruction are, therefore, a distinct creation. The date of the Saint-Yon college is 1705. He later added a technical school to develop the mechanical skill of the students, and also a special garden for botany.

There were Sunday schools prior to the seventeenth century. But the Christian Academy, founded by de la Salle for adults in the parish of Saint-Sulpice, in 1699, was of a different character, the first of its kind in the history of education. The programme of this academy, or Sunday school, included not only the ordinary branches taught in the other Sunday schools, but it added geometry, architecture, and drawing.

Alain claims that the first normal schools were the novitiates of the teaching orders. But there were no normal schools for lay teachers. De la Salle had been frequently asked by clergy to send a Brother to take charge of their school. This request was refused, for he had established the rule that not less than two Brothers teach in any school. Accordingly, he offered to open a seminary for teachers, an institution in which young men would be trained in the principles and practices of the new method of teaching. The normal school was opened at Reims in 1684. Indeed, thirteen years before

Francke organized his teachers' class at Halle, and fifty years before Hecker founded the Prussian normal college at Stettin, de la Salle had given a programme which is even today deemed excellent. In the same year he established for youths who were destined to enter the brotherhood, a Christian academy, or preparatory novitiate, in which they were taught the sciences, literature, and the principles of scientific pedagogy.

De la Salle is entitled to be ranked among the advanced educators of the eighteenth century and among the greatest thinkers and educational reformers of all time. His system embraces the best in the modern educational methods. He gave an impetus to the higher educational progress which is the distinctive mark of modern times, and bequeathed to his own disciples, and to educators in general, a system of teaching which is adaptable to the wants of school-going youth in every country. But it was especially as a priest that John Baptist de la Salle loved his vocation as an educator. Like St. Ignatius Loyola, he taught letters that he might have the right to teach Christian doctrine. In claiming this privilege de la Salle was actuated by the highest and purest motives. There was nothing narrow in his educational plans. He was too wise not to realize the necessity that the truest and best children of the Church should be among the most skilled in human affairs. His view was from the summit, therefore, broad and comprehensive. Intellectual training was supplemented by a complete course of Christian morals. Man had a destiny, and the teacher was to inculcate this truth by cultivating and developing the theological virtues in the souls of the children.

This thought seemed to be uppermost in the mind and to haunt the soul of de la Salle, when he drew up those excellent programmes for his schools, colleges, and technical institutions. His pedagogic principle was that nothing human should be foreign to the students, and the teaching of science and letters appeared to him to take nothing from the teacher in his ministry as an apostle. In September, 1713, Clement XI issued the Bull "Unigenitus", condemning the errors of Quesnel, culled from his "Moral Reflections". M. de Montmartin, Bishop of Grenoble, promulgated the Bull in a circular letter, in February, 1714. De la Salle was then making a retreat at Parmenie. When he left this place, he entered the arena to defend the Church against Jansenism. He assembled the Brothers of Grenoble and explained the meaning of the Bull, in order to safeguard the purity of their faith. Not satisfied with this manifestation of loyalty, he published several articles in defence of the true doctrine. This irritated the Jansenists, but their opposition only served to give greater lustre to the purity of his faith and zeal. He was a fearless and uncompromising champion, and he seemed to forget his habitual calm and reserve when there was question of the integrity and purity of the Faith. To show his inviolable attachment to the Church and to the Sovereign Pontiff, he always signed himself *Roman Priest*. "Hold fast to what is of faith", he writes to the Brothers; "shun novelties; follow the traditions of the Church; receive only what she receives;

condemn what she condemns; approve what she approves, either by her Councils or by the Sovereign Pontiffs. In all things render her prompt obedience". He was even eager to go to Rome to cast himself at the feet of the pope and request his blessing for the institute. However, not being able to go himself, he sent Brother Gabriel Drolin to establish a school there in 1700. Even the consolation of seeing his rule approved by the Holy See was denied the saint, for he had been dead nearly six years when, on 26 February, 1725, Benedict XIII, by his Bull, "In apostolicae dignitatis solio", placed the seal of approbation upon the institute, empowering the members to teach and explain Christian doctrine, and constituting them a religious congregation.

The last years of de la Salle were spent in close retirement at Saint-Yon. There he revised his rule before giving it to Brother Barthélemy, the first superior general. During the last days of his life he showed the same spirit of sacrifice which had marked his earlier years. In Holy Week of 1719, he gave unmistakable signs that the end was near. On Holy Thursday, at the request of Brother Barthelemy, he blessed the Brothers assembled at his bedside, and gave them his last words of counsel. His final words were: "In all things I adore the will of God in my regard." On Good Friday morning, 7 April, 1719, he breathed his soul into the hands of his Creator. He was canonized by Leo XIII on 24 May 1900. His feast is celebrated on 15 May.

The principal writings which he has bequeathed to his spiritual children are: "Conduite des écoles" (1717), a treatise on pedagogic method, presenting fundamental principles in a scientific manner. It is remarkable that the methods herein given have not been considerably changed since the time of its author, and that the principles laid down are as applicable today as when they were written. "Les Règles de la bienséance et de la civilité chrétiennes", is a volume written in 1695, and used as a treatise on politeness and as a text in the reading of manuscripts. The style is simple and direct. It contains excellent rules for cultured manners. "Les devoirs du chrétien" (73), a simple and precise exposition of Christian doctrine is remarkable for its accuracy, and for the practical lessons it inculcates. It was intended as a reader and a catechism. It still retains its place in many schools and colleges. "Recueil de différents petits traités à Pusage des Frères des Ecoles chrétiennes" (1711) is a noteworthy treatise, stating in remarkably simple terms the fundamental principles of the religious life. It abounds in Scriptural quotations and is a valuable guide for persons striving after perfection. "Explication de la méthode d'oraison" (1st printed ed., 1739). In point of clearness and adaptation, this method of mental prayer is eminently suited to the needs of the Brothers. It appeals to every degree of capacity, for all can find therein the spiritual food necessary for their special condition and state of perfection. "Méditations pour le temps de la Retraite" (1st printed ed. 1730), written for the exercises of the annual retreat, and, combining he principles of the spiritual life with pedagogics, tends to promote the Christian

Apostolate in the school. These méditations contain some of the soundest principles of pedagogy ever enunciated. "Meditations pour tous les Dimanches de Panée, avec les Evangiles de tous les Dimanches; Meditations pour les principales fetes de Panee" (Rouen, 1710?), is an epitome of spiritual doctrine, based upon the Gospels of the year and applied to the needs of the teaching profession and the principles of the religious life. This treatise reveals the greatness of de la Salle and shows him to be a man of deep religious conviction. His language is always simple, direct, and vigorous.

The spirit of de la Salle has even permeated other religious families, either in giving them a special character or suggesting their rules. Thus, the Brothers of St. Gabriel, founded by Blessed Grignon de Montfort and M. Deshayes, in 1795 and 1821; The Brothers of Christian Instruction of Ploërmel, founded by J.-M. de Lamennais, in 1816; The Brothers of Christian Doctrine of Nancy, founded by Father Fréchar, in 1817; The Little Brothers of Mary (Marists), founded by Père Champagnat, in 1817; The Brothers of the Sacred Heart of Paradis, founded by Father Coindre, in 1821; The Brothers of the Society of Mary, founded by Père Chaminade, in 1817; The Brothers of the Holy Family, founded by Brother Gabriel Taborin, in 1821; The Brothers of the Cross of Jesus, founded by Père Bochard, in 1824; The Clerics of St-Viateur, founded by Père Guerbes, in 1829; The Congregation of the Holy Cross, founded by M. Moreau and M. Dujarris, in 1835; The Congregation of the Holy Ghost and the Sacred Heart of Mary, founded by Father Liebermann, in 1841; The Brothers of Mercy, founded by M. Delamare, in 1842; The Christian Brothers of Ireland, founded by Brother Ignatius Rice, in 1805; and the Institute of the Sisters of the Christian Schools of Mercy, founded by Ven. Julie Postel, in 1802—all exemplify in the character of their work and in the rules adopted, a striking similarity to the methods and aims proposed by Saint John Baptist de la Salle in founding the Institute of the Brothers of the Christian Schools.

BLAIN, *Vie de M. BROTHER CONSTANTIUS

John Baptist de Rossi

St. John Baptist de Rossi

(De Rubeis).

Born at Voltaggio in the Diocese of Genoa, 22 February, 1698; died at Rome, 23 May, 1764; feast on 23 May. His parents, Charles de Rossi and Frances Anfossi, were not rich in earthly goods, but had solid piety and the esteem of their fellow-citizens. Of their four children, John excelled in gentleness and piety. At the age of ten he was taken to Genoa by friends for his education. There he received news of the death of his father. After three years he was called to Rome by a relative, Lorenzo de Rossi, who was canon at St. Mary in Cosmedin. He pursued his studies at the Collegium Romanum under the direction of the Jesuits, and soon became a model by his talents, application to study, and virtue. As a member of the Sodality of the Blessed Virgin and of the

Ristretto of the Twelve Apostles established at the college, he led the members in the meetings and pious exercises, in visits to the sick in the hospitals and in other works of mercy, and merited even then the name of apostle. At the age of sixteen he entered the clerical state. Owing to indiscreet practices of mortification he contracted spells of epilepsy, notwithstanding which he made his course of scholastic philosophy and theology, in the college of the Dominicans, and, with dispensation, was ordained priest on 8 March, 1721. Having reached the desired goal, he bound himself by vow to accept no ecclesiastical benefice unless commanded by obedience. He fulfilled the duties of the sacred ministry by devoting himself to the labourers, herds, and teamsters of the Campagna, preaching to them early in the morning, or late in the evening, at the old Forum Romanum (Campo Vaccino), and by visiting, instructing, and assisting the poor at the hospital of St. Galla. In 1731 he established near St. Galla another hospital as a home of refuge for the unfortunates who wander the city by night ("Rom. Brev.", tr. Bute, Summer, 573). In 1735 he became titular canon at St. Mary in Cosmedin, and, on the death of Lorenzo two years later, obedience forced him to accept the canonry. The house belonging to it, however, he would not use, but employed the rent for good purposes.

For a number of years John was afraid, on account of his sickness, to enter the confessional, and it was his custom to send to other priests the sinners whom he had brought to repentance by his instructions and sermons. In 1738 a dangerous sickness befell him, and to regain his health he went to Civit  Castellana, a day's journey from Rome. The bishop of the place induced him to hear confessions, and after reviewing his moral theology he received the unusual faculty of hearing confessions in any of the churches of Rome. He showed extraordinary zeal in the exercise of this privilege, and spent many hours every day in hearing the confessions of the illiterate and the poor whom he sought in the hospitals and in their homes. He preached to such five and six times a day in churches, chapels, convents, hospitals, barracks, and prison cells, so that he became the apostle of the abandoned, a second Philip Neri, a hunter of souls. In 1763, worn out by such labours and continued ill-health, his strength began to ebb away, and after several attacks of paralysis he died at his quarters in Trinit  de' Pellegrini. He was buried in that church under a marble slab at the altar of the Blessed Virgin. God honoured his servant by miracles, and only seventeen years after his death the process of beatification was begun, but the troubled state of Europe during the succeeding years prevented progress in the cause until it was resumed by Pius IX, who on 13 May, 1860, solemnly pronounced his beatification. As new signs still distinguished him, Leo XIII, on 8 December, 1881, enrolled him among the saints.

HERBERT, St. John B. de Rossi (New York, 1906), Roman Breviary; SEEB CK, Herrlichkeit der kath. Kirche (Innsbruck 1900), 1; BELLESHEIM, Der hl. Joh. B, de

Rossi (Mainz, 1882): CORMIER (Rome, 1901); Theol. prakt. Quartal-Schrift, XXV, 752.

FRANCIS MERSHMAN

St. John Berchmans

St. John Berchmans

Born at Diest in Brabant, 13 March, 1599; died at Rome, 13 August, 1621. His parents watched with the greatest solicitude over the formation of his character. He was naturally kind, gentle, and affectionate towards them, a favourite with his playmates, brave and open, attractive in manner, and with a bright, joyful disposition. Yet he was also, by natural disposition, impetuous and fickle. Still, when John was but seven years of age, M. Emmerick, his parish priest, already remarked with pleasure that the Lord would work wonders in the soul of the child. Many are the details that reveal him to us as he was in the Society of Jesus. He was but nine years of old when his mother was stricken with a long and serious illness. John would pass several hours each day by her bedside, and console her with his affectionate though serious, words. Later, when he lived with some other boys at M. Emmerick's house, he would undertake more than his share of the domestic work, selecting by preference the more difficult occupations. If he was loved by his comrades, he repaid their affection by his kindness, without, however, deviating from the dictates of his conscience. It was noticed even that he availed himself discreetly of his influence over them to correct their negligences and to restrain their frivolous conversation. Eager to learn, and naturally endowed with a bright intellect and a retentive memory, he enhanced the effect of these gifts by devoting to study whatever time he could legitimately take from his ordinary recreation.

What, however, distinguished him most from his companions was his piety. When he was hardly seven years old, he was accustomed to rise early and serve two or three Masses with the greatest fervour. He attended religious instructions and listened to Sunday sermons with the deepest recollection, and made pilgrimages to the sanctuary of Montaigu, a few miles from Diest, reciting the rosary as he went, or absorbed in meditation. As soon as he entered the Jesuit college at Mechlin, he was enrolled in the Society of the Blessed Virgin, and made a resolution to recite her Office daily. He would, moreover, ask the director of the sodality every month to prescribe for him some special acts of devotion to Mary. On Fridays, at nightfall, he would go out barefooted and make the Stations of the Cross in the town. Such fervent, filial piety won for him the grace of a religious vocation. Towards the end of his rhetoric course, he felt a distinct call to the Society of Jesus. His family was decidedly opposed to this, and on 24 September, 1616, he was received into the novitiate at Mechlin. After two years

passed in Mechlin he made his simple vows, and was sent to Antwerp to begin the study of philosophy. Remaining there only a few weeks, he set out for Rome, where he was to continue the same study. After the journeying three hundred leagues on foot, carrying a wallet on his back, he arrived at the Roman College, he studied for two years and passed on to the third year class in philosophy in the year 1621. One day early in August of that same year he was selected by the prefect of studies to take part in a philosophical disputation at the Greek College, at that time under the charge of the Dominicans. He opened the discussion with great perspicuity and erudition, but, on returning to his own college, he was seized with a violent fever of which he died, on 13 August, at the age of twenty-two years and five months.

During the second part of his life, John offered the type of the saint who performs ordinary actions with extraordinary perfection. In his purity, obedience, and admirable charity he resembled many religious, but he surpassed them all by his intense love for the rules of his order. The Constitutions of the Society of Jesus lead those who observe them exactly to the highest degree of sanctity, as has been declared by Pope Julius III and his successors. The attainment of that ideal was what John proposed to himself. "If I do not become a saint when I am young", he used to say "I shall never become one". That is why he displayed such wisdom in conforming his will to that of his superiors and to the rules. He would have preferred death to the violation of the least of the rules of his order. "My penance", he would say, "is to live the common life... I will pay the greatest attention to the least inspiration of God." He observed this fidelity in the performance of all his duties till the last day of his life, as is attested by Fathers Bauters, Cepari, Ceccoti, Massucci, and Piccolomini, his spiritual directors. When he died, a large multitude crowded for several days to see him and to invoke his intercession. The same year, Phillip, Duke of Aerschot, had a petition presented to Pope Gregory XV for the taking of information with a view to his beatification. John Berchmans was declared Blessed in 1865, and was canonized in 1888. His statues represent him with hands clasped, holding his crucifix, his book of rules, and his rosary.

H. DEMAIN

Ven. John Buckley

Venerable John Buckley

(*Alias* John Jones; *alias* John Griffith; in religion, Godfrey Maurice). Priest and martyr, born at Clynog Fawr, Carnarvonshire, Wales, England, 12 July 1598.

There is much confusion between the above and Robert (or Herbert; in religion, Sigebert) Buckley, the monk of Westminster who was the sole connecting link between the pre- and post-Reformation English Benedictines. This accounts for any apparent

discrepancy in John's history. Thus it is said that he was a native of Shropshire, also that he was imprisoned in the Marshalsea, 1582-4, both of which statements are incorrect. He was of a good Welsh family, which had remained faithful to the Church. As a youth, he entered the Franciscan convent at Greenwich; at its dissolution in 1559 he went to the Continent, and was professed at Pontoise, France. After many years he journeyed to Rome, where he stayed at the Ara Coeli convent of the Observantines. Although he was a Conventual, he joined the Roman province of the Reformati in 1591, as he had become imbued with the ideals of the Strict Observance. He then begged to be allowed to go upon the English mission, which his superiors permitted, and he also received a special blessing and commendation from Clement VIII. He reached London about the end of 1592, and stayed temporarily at the house which Father John Gerard had provided for missionary priests; he then laboured in different parts of the country, and his brother Franciscans in England elected him their provincial.

In 1596 the priest-catcher Topcliffe was informed by a spy that Buckley had visited two Catholics and had said Mass in their house, but it was afterwards shown that these people were in prison when the alleged offence took place. However, Father Buckley was promptly arrested and severely tortured. He was also cruelly scourged, and Topcliffe took him to his house and practised unspeakable barbarities upon him, all of which he endured with a surprising fortitude. He was then imprisoned for nearly two years, and on 3 July, 1598, was tried on the charge of "going over the seas in the first year of Her majesty's reign (1558) and there being made a priest by the authority from Rome and then returning to England contrary to statute" (27 Eliz. c. 2). He was convicted of high treason and sentenced to be hanged, drawn, and quartered.

As by this time the people had grown tired of these butcheries, the execution was arranged for a early hour in the morning. The place was St. Thomas's Watering, in what is now the Old Kent Road, at the site of the junction of the old Roman road to London with the main line of Watling Street. Such ancient landmarks had been immemorially used as places of execution, Tyburn itself being merely the point where Watling Street crossed the Roman road to Silchester. In spite of the earliness of the hour, a large crowd had gathered. On the gallows he declared that he was dying for his Faith, and he was innocent of any political offence, in which declaration the people clearly showed their belief and sympathy. The usual atrocities were carried out; his dismembered remains were fixed on the poles on the roads to Newington and Lambeth (now represented by Tabard Street and Lambeth Road respectively); they were removed by some young Catholic gentlemen, one of whom suffered a long imprisonment for this offence alone. One of the relics eventually reached Pontoise, where the martyr had been professed. He was declared Venerable by Leo XIII.

C. F. WEMYSS BROWN

St. John Cantius

St. John Cantius

Born at Kenty, near Oswiecim, Diocese of Krakow, Poland, 1412 (or 1403); died at Krakow, 1473, and was buried there under the church of St. Anne; his feast is on 20 October. He was the son of Stanislaus and Anne who were pious country people; he received his primary education at his native town, and then being sent by his parents to the Academy of Krakow, he soon impressed his professors and colleagues with his pleasant and amiable disposition; always happy, but serious, humble, and godly, he won the hearts of all who came in contact with him,. Having made excellent progress in the study of philosophical and theological sciences, he was graduated first as bachelor, then as master and doctor, was ordained priest and then appointed professor of theology at the Academy of Krakow, from where he was sent, after a short time, by his superiors to olkusz, Diocese of Krakow, to be parish priest. Being afraid of the great responsibility of parish work, he very soon left the parish, and was again appointed professor of Sacres Scripture at the Academy of Krakow, which position he held without interruption until his death. As testified by Michael Miechowita, the medieval Polish historian and the saint's first biographer, extreme humility and charity were conspicuous in his life; he took as his motto:

Conturbare cave: non est placare suave,
Infamare cave; nam revocare grave.

He distributed to the poor all the money and clothes he had, retaining only what was absolutely necessary to support himself. He slept but little, and on the floor, ate very sparingly, and was a total abstainer from meat after he became a doctor. He made one pilgrimage to Jerusalem with the desire of becoming a martyr among the Turks, and four pilgrimages to Rome on foot. Durng his life he performed various miracles, which were multiplied after his death at his tomb. He was canonized by Clement XIII in 1767. The Roman Breviary distinguishes him with three hymns; he is the only confessor not a bishop who is thus honoured.

J. GODRYCZ

St. John Capistran

St. John Capistran

Born at Capistrano, in the Diocese of Sulmona, Italy, 1385; died 23 October, 1456. His father had come to Naples in the train of Louis of Anjou, hence is supposed to have been of French blood, though some say he was of German origin. His father dying early, John owed his education to his mother. She had him at first instructed at home and then sent him to study law at Perugia, where he achieved great success under the eminent legist, Pietro de Ubaldis. In 1412 he was appointed governor of Perugia by Ladislaus, King of Naples, who then held that city of the Holy See. As governor he set himself against civic corruption and bribery. War broke out in 1416 between Perugia and the Malatesta. John was sent as ambassador to propose peace to the Malatesta, who however cast him into prison. It was during this imprisonment that he began to think more seriously about his soul. He decided eventually to give up the world and become a Franciscan Friar, owing to a dream he had in which he saw St. Francis and was warned by the saint to enter the Franciscan Order. John had married a wealthy lady of Perugia immediately before the war broke out, but as the marriage was not consummated he obtained a dispensation to enter religion, which he did 4 October, 1416.

After he had taken his vows he came under the influence of St. Bernardine of Siena, who taught him theology: he had as his fellow-student St. James of the Marches. He accompanied St. Bernardine on his preaching tours in order to study his methods, and in 1420, whilst still in deacon's orders, was himself permitted to preach. But his apostolic life began in 1425, after he had received the priesthood. From this time until his death he laboured ceaselessly for the salvation of souls. He traversed the whole of Italy; and so great were the crowds who came to listen to him that he often had to preach in the public squares. At the time of his preaching all business stopped. At Brescia on one occasion he preached to a crowd of one hundred and twenty-six thousand people, who had come from all the neighbouring provinces. On another occasion during a mission, over two thousand sick people were brought to him that he might sign them with the sign of the Cross, so great was his fame as a healer of the sick. Like St. Bernardine of Siena he greatly propagated devotion to the Holy Name of Jesus, and, together with that saint, was accused of heresy because of this devotion. While he was thus carrying on his apostolic work, he was actively engaged in assisting St. Bernardine in the reform of the Franciscan Order. In 1429 John, together with other Observant friars, was cited to Rome on the charge of heresy, and he was chosen by his

companions to defend their cause; the friars were acquitted by the commission of cardinals.

After this, Pope Martin V conceived the idea of uniting the Conventual Friars Minor and the Observants, and a general chapter of both bodies of Franciscans was convoked at Assisi in 1430. A union was effected, but it did not last long. The following year the Observants held a chapter at Bologna, at which John was the moving spirit. According to Gonzaga, John was about this time appointed commissary general of the Observants, but his name does not appear among the commissaries and vicars in Holzapfel's list (*Manuale Hist. Ord. FF. Min.*, 624-5) before 1443. But it was owing to him that St. Bernardine was appointed vicar-general in 1438. Shortly after this, whilst visiting France he met St. Colette, the reformer of the Second Franciscan Order or Poor Clares, with whose efforts he entirely sympathized. He was frequently employed on embassies by the Holy See. In 1439 he was sent as legate to Milan and Burgundy, to oppose the claims of the antipope Felix V; in 1446 he was on a mission to the King of France; in 1451 he went at the request of the emperor as Apostolic nuncio to Austria. During the period of his nunciature John visited all parts of the empire, preaching and combatting the heresy of the Hussites; he also visited Poland at the request of Casimir IV. In 1454 he was summoned to the Diet at Frankfort, to assist that assembly in its deliberation concerning a crusade against the Turks for the relief of Hungary: and here, too, he was the leading spirit. When the crusade was actually in operation John accompanied the famous Hunyady throughout the campaign: he was present at the battle of Belgrade, and led the left wing of the Christian army against the Turks. He was beatified in 1694, and canonized in 1724. He wrote many books, chiefly against the heresies of his day.

Three lives written by the saint's companions, NICHOLAS OF FARA, CHRISTOPHER OF VARESE, and JEROME OF UNDINE, are given by the Bollandists, *Acta SS.* X, October; WADDING, *Annales*, IX-XIII; GUIRARD, *St. Jean de Capistran et son temps* (Bourges, 1865); JACOB, *Johannes von Capistrano* (Doagh, 1903); ALLIES, *Three Catholic Reformers* (London, 1872); PASTOR, *History of the Popes*, II (London, 1891); LEO, *Lives of the Saints and Blessed of the three Orders of St. Francis*, III (Taunton, 1886).

FATHER CUTHBERT

St. John Chrysostom

St. John Chrysostom

(*Chrysostomos*, "golden-mouthed" so called on account of his eloquence).

Doctor of the Church, born at Antioch, c. 347; died at Commana in Pontus, 14 September, 407.

John -- whose surname "Chrysostom" occurs for the first time in the "Constitution" of Pope Vigilius (cf. P.L., LX, 217) in the year 553 -- is generally considered the most prominent doctor of the Greek Church and the greatest preacher ever heard in a Christian pulpit. His natural gifts, as well as exterior circumstances, helped him to become what he was.

I. LIFE

(1) Boyhood

At the time of Chrysostom's birth, Antioch was the second city of the Eastern part of the Roman Empire. During the whole of the fourth century religious struggles had troubled the empire and had found their echo at Antioch. Pagans, Manichaeans, Gnostics, Arians, Apollinarians, Jews, made their proselytes at Antioch, and the Catholics were themselves separated by the schism between the bishops Meletius and Paulinus. Thus Chrysostom's youth fell in troubled times. His father, Secundus, was an officer of high rank in the Syrian army. On his death soon after the birth of John, Anthusa, his wife, only twenty years of age, took the sole charge of her two children, John and an elder sister. Fortunately she was a woman of intelligence and character. She not only instructed her son in piety, but also sent him to the best schools of Antioch, though with regard to morals and religion many objections could be urged against them. Beside the lectures of Andragatius, a philosopher not otherwise known, Chrysostom followed also those of Libanius, at once the most famous orator of that period and the most tenacious adherent of the declining paganism of Rome. As we may see from the later writings of Chrysostom, he attained then considerable Greek scholarship and classical culture, which he by no means disowned in his later days. His alleged hostility to classical learning is in reality but a misunderstanding of certain passages in which he defends the *philosophia* of Christianity against the myths of the heathen gods, of which the chief defenders in his time were the representatives and teachers of the *sophia ellenike* (see A. Naegele in "Byzantin. Zeitschrift", XIII, 73-113; Idem, "Chrysostomus und Libanius" in *Chrysostomika*, I, Rome, 1908, 81-142).

(2) Chrysostom as Lector and Monk

It was a very decisive turning-point in the life of Chrysostom when he met one day (about 367) the bishop Meletius. The earnest, mild, and winning character of this man captivated Chrysostom in such a measure that he soon began to withdraw from classical and profane studies and to devote himself to an ascetic and religious life. He studied Holy Scriptures and frequented the sermons of Meletius. About three years later he received Holy Baptism and was ordained lector. But the young cleric, seized by the desire of a more perfect life, soon afterwards entered one of the ascetic societies

near Antioch, which was under the spiritual direction of Carterius and especially of the famous Diodorus, later Bishop of Tarsus (see Palladius, "Dialogus", v; Sozomenus, "Hist. eccles.", VIII, 2). Prayer, manual labour and the study of Holy Scripture were his chief occupations, and we may safely suppose that his first literary works date from this time, for nearly all his earlier writings deal with ascetic and monastic subjects [cf. below Chrysostom writings: (1) "Opuscula"]. Four years later, Chrysostom resolved to live as an anchorite in one of the caves near Antioch. He remained there two years, but then as his health was quite ruined by indiscreet watchings and fastings in frost and cold, he prudently returned to Antioch to regain his health, and resumed his office as lector in the church.

(3) Chrysostom as Deacon and Priest at Antioch

As the sources of the life of Chrysostom give an incomplete chronology, we can but approximately determine the dates for this Antiochene period. Very probably in the beginning of 381 Meletius made him deacon, just before his own departure to Constantinople, where he died as president of the Second Ecumenical Council. The successor of Meletius was Flavian (concerning whose succession see F. Cavallera, "Le Schisme d'Antioche", Paris, 1905). Ties of sympathy and friendship connected Chrysostom with his new bishop. As deacon he had to assist at the liturgical functions, to look after the sick and poor, and was probably charged also in some degree with teaching catechumens. At the same time he continued his literary work, and we may suppose that he composed his most famous book, "On the Priesthood", towards the end of this period (c. 386, see Socrates, "Hist. eccl.", VI, 3), or at latest in the beginning of his priesthood (c. 387, as Nairn with good reasons puts it, in his edition of "De Sacerd.", xii-xv). There may be some doubt if it was occasioned by a real historical fact, viz., that Chrysostom and his friend Basil were requested to accept bishoprics (c. 372). All the earliest Greek biographers seem not to have taken it in that sense. In the year 386 Chrysostom was ordained priest by Flavian, and from that dates his real importance in ecclesiastical history. His chief task during the next twelve years was that of preaching, which he had to exercise either instead of or with Bishop Flavian. But no doubt the larger part of the popular religious instruction and education devolved upon him. The earliest notable occasion which showed his power of speaking and his great authority was the Lent of 387, when he delivered his sermons "On the Statues" (P.G., XLVIII, 15, xxx.). The people of Antioch, excited by the levy of new taxes, had thrown down the statues of Emperor Theodosius. In the panic and fear of punishment which followed, Chrysostom delivered a series of twenty or twenty-one (the nineteenth is probably not authentic) sermons, full of vigour, consolatory, exhortative, tranquilizing, until Flavian, the bishop, brought back from Constantinople the emperor's pardon. But the usual preaching of Chrysostom consisted in consecutive explanations of Holy

Scripture. To that custom, unhappily no longer in use, we owe his famous and magnificent commentaries, which offer us such an inexhaustible treasure of dogmatic, moral, and historical knowledge of the transition from the fourth to the fifth century. These years, 386-98, were the period of the greatest theological productivity of Chrysostom, a period which alone would have assured him for ever a place among the first Doctors of the Church. A sign of this may be seen in the fact that in the year 392 St. Jerome already accorded to the preacher of Antioch a place among his *Viri illustres* ("De Viris ill.", 129, in P.L., XXIII, 754), referring expressly to the great and successful activity of Chrysostom as a theological writer. From this same fact we may infer that during this time his fame had spread far beyond the limits of Antioch, and that he was well known in the Byzantine Empire, especially in the capital.

(4) St. Chrysostom as Bishop of Constantinople

In the ordinary course of things Chrysostom might have become the successor of Flavian at Antioch. But on 27 September 397, Nectarius, Bishop of Constantinople, died. There was a general rivalry in the capital, openly or in secret, for the vacant see. After some months it was known, to the great disappointment of the competitors, that Emperor Areadius, at the suggestion of his minister Eutropius, had sent to the Prefect of Antioch to call John Chrysostom out of the town without the knowledge of the people, and to send him straight to Constantinople. In this sudden way Chrysostom was hurried to the capital, and ordained Bishop of Constantinople on 26 February, 398, in the presence of a great assembly of bishops, by Theophilus, Patriarch of Alexandria, who had been obliged to renounce the idea of securing the appointment of Isidore, his own candidate. The change for Chrysostom was as great as it was unexpected. His new position was not an easy one, placed as he was in the midst of an upstart metropolis, half Western, half Oriental, in the neighbourhood of a court in which luxury and intrigue always played the most prominent parts, and at the head of the clergy composed of most heterogeneous elements, and even (if not canonically, at least practically) at the head of the whole Byzantine episcopate. The first act of the new bishop was to bring about a reconciliation between Flavian and Rome. Constantinople itself soon began to feel the impulse of a new ecclesiastical life.

The necessity for reform was undeniable. Chrysostom began "sweeping the stairs from the top" (Palladius, *op. cit.*, v). He called his *oekonomus*, and ordered him to reduce the expenses of the episcopal household; he put an end to the frequent banquets, and lived little less strictly than he had formerly lived as a priest and monk. With regard to the clergy, Chrysostom had at first to forbid them to keep in their houses *syneisactoe*, i.e. women housekeepers who had vowed virginity. He also proceeded against others who, by avarice or luxury, had given scandal. He had even to exclude from the ranks of the clergy two deacons, the one for murder and the other for adultery. Of the monks,

too, who were very numerous even at that time at Constantinople, some had preferred to roam about aimlessly and without discipline. Chrysostom confined them to their monasteries. Finally he took care of the ecclesiastical widows. Some of them were living in a worldly manner: he obliged them either to marry again, or to observe the rules of decorum demanded by their state. After the clergy, Chrysostom turned his attention to his flock. As he had done at Antioch, so at Constantinople and with more reason, he frequently preached against the unreasonable extravagances of the rich, and especially against the ridiculous finery in the matter of dress affected by women whose age should have put them beyond such vanities. Some of them, the widows Marsa, Castricia, Eugraphia, known for such preposterous tastes, belonged to the court circle. It seems that the upper classes of Constantinople had not previously been accustomed to such language. Doubtless some felt the rebuke to be intended for themselves, and the offence given was the greater in proportion as the rebuke was the more deserved. On the other hand, the people showed themselves delighted with the sermons of their new bishop, and frequently applauded him in the church (Socrates, "Hist. eccl." VI). They never forgot his care for the poor and miserable, and that in his first year he had built a great hospital with the money he had saved in his household. But Chrysostom had also very intimate friends among the rich and noble classes. The most famous of these was Olympias, widow and deaconess, a relation of Emperor Theodosius, while in the Court itself there was Brison, first usher of Eudoxia, who assisted Chrysostom in instructing his choirs, and always maintained a true friendship for him. The empress herself was at first most friendly towards the new bishop. She followed the religious processions, attended his sermons, and presented silver candlesticks for the use of the churches (Socrates, *op. cit.*, VI, 8; Sozomenus, *op. cit.*, VIII, 8).

Unfortunately, the feelings of amity did not last. At first Eutropius, the former slave, now minister and consul, abused his influence. He deprived some wealthy persons of their property, and prosecuted others whom he suspected of being adversaries of rivals. More than once Chrysostom went himself to the minister (see "Oratio ad Eutropium" in P.G., Chrys. Op., III, 392) to remonstrate with him, and to warn him of the results of his own acts, but without success. Then the above-named ladies, who immediately surrounded the empress, probably did not hide their resentment against the strict bishop. Finally, the empress herself committed an injustice in depriving a widow of her vineyard (Marcus Diac., "Vita Porphyrii", V, no. 37, in P.G., LXV, 1229). Chrysostom interceded for the latter. But Eudoxia showed herself offended. Henceforth there was a certain coolness between the imperial Court and the episcopal palace, which, growing little by little, led to a catastrophe. It is impossible to ascertain exactly at what period this alienation first began; very probably it dated from the beginning of the year 401. But before this state of things became known to the public there

happened events of the highest political importance, and Chrysostom, without seeking it, was implicated in them. These were the fall of Eutropius and the revolt of Gainas.

In January, 399, Eutropius, for a reason not exactly known, fell into disgrace. Knowing the feelings of the people and of his personal enemies, he fled to the church. As he had himself attempted to abolish the immunity of the ecclesiastical asylums not long before, the people seemed little disposed to spare him. But Chrysostom interfered, delivering his famous sermon on Eutropius, and the fallen minister was saved for the moment. As, however, he tried to escape during the night, he was seized, exiled, and some time later put to death. Immediately another more exciting and more dangerous event followed. Gainas, one of the imperial generals, had been sent out to subdue Tribigild, who had revolted. In the summer of 399 Gainas united openly with Tribigild, and, to restore peace, Arcadius had to submit to the most humiliating conditions. Gainas was named commander-in-chief of the imperial army, and even had Aurelian and Saturninus, two men of the highest rank at Constantinople, delivered over to him. It seems that Chrysostom accepted a mission to Gainas, and that, owing to his intervention, Aurelian and Saturninus were spared by Gainas, and even set at liberty. Soon afterwards, Gainas, who was an Arian Goth, demanded one of the Catholic churches at Constantinople for himself and his soldiers. Again Chrysostom made so energetic an opposition that Gainas yielded. Meanwhile the people of Constantinople had become excited, and in one night several thousand Goths were slain. Gainas however escaped, was defeated, and slain by the Huns. Such was the end within a few years of three consuls of the Byzantine Empire. There is no doubt that Chrysostom's authority had been greatly strengthened by the magnanimity and firmness of character he had shown during all these troubles. It may have been this that augmented the jealousy of those who now governed the empire -- a clique of courtiers, with the empress at their head. These were now joined by new allies issuing from the ecclesiastical ranks and including some provincial bishops -- Severian of Gabala, Antiochus of Ptolemais, and, for some time, Acacius of Beroea -- who preferred the attractions of the capital to residence in their own cities (Socrates, *op. cit.*, VI, 11; Sozomenus, *op. cit.*, VIII, 10). The most intriguing among them was Severian, who flattered himself that he was the rival of Chrysostom in eloquence. But so far nothing had transpired in public. A great change occurred during the absence of Chrysostom for several months from Constantinople. This absence was necessitated by an ecclesiastical affair in Asia Minor, in which he was involved. Following the express invitation of several bishops, Chrysostom, in the first months of 401, had come to Ephesus, where he appointed a new archbishop, and with the consent of the assembled bishops deposed six bishops for simony. After having passed the same sentence on Bishop Gerontius of Nicomedia, he returned to Constantinople.

Meanwhile disagreeable things had happened there. Bishop Severian, to whom Chrysostom seems to have entrusted the performance of some ecclesiastical functions, had entered into open enmity with Serapion, the archdeacon and *oeconomus* of the cathedral and the episcopal palace. Whatever the real reason may have been, Chrysostom, found the case so serious that he invited Severian to return to his own see. It was solely owing to the personal interference of Eudoxia, whose confidence Serapion possessed, that he was allowed to come back from Chalcedon, whither he had retired. The reconciliation which followed was, at least on the part of Severian, not a sincere one, and the public scandal had excited much ill-feeling. The effects soon became visible. When in the spring of 402, Bishop Porphyrius of Gaza (see Marcus Diac., "Vita Porphyrii", V, ed. Nuth, Bonn, 1897, pp. 11-19) went to the Court at Constantinople to obtain a favour for his diocese, Chrysostom answered that he could do nothing for him, since he was himself in disgrace with the empress. Nevertheless, the party of malcontents were not really dangerous, unless they could find some prominent and unscrupulous leader. Such a person presented himself sooner than might have been expected. It was the well-known Theophilus, Patriarch of Alexandria. He appeared under rather curious circumstances, which in no way foreshadowed the final result. Theophilus, toward the end of the year 402, was summoned by the emperor to Constantinople to apologize before a synod, over which Chrysostom should preside, for several charges, which were brought against him by certain Egyptian monks, especially by the so-called four "tall brothers". The patriarch, their former friend, had suddenly turned against them, and had them persecuted as Origenists (Palladius, "Dialogus", xvi; Socrates, *op. cit.*, VI, 7; Sozomenus, *op. cit.*, VIII, 12).

However, Theophilus was not easily frightened. He had always agents and friends at Constantinople, and knew the state of things and the feelings at the court. He now resolved to take advantage of them. He wrote at once to St. Epiphanius at Cyprus, requesting him to go to Constantinople and prevail upon Chrysostom at to condemn the Origenists. Epiphanius went. But when he found that Theophilus was merely using him for his own purposes, he left the capital, dying on his return in 403. At this time Chrysostom delivered a sermon against the vain luxury of women. It was reported to the empress as though she had been personally alluded to. In this way the ground was prepared. Theophilus at last appeared at Constantinople in June, 403, not alone, as he had been commanded, but with twenty-nine of his suffragan bishops, and, as Palladius (ch. viii) tells us, with a good deal of money and all sorts of gifts. He took his lodgings in one of the imperial palaces, and held conferences with all the adversaries of Chrysostom. Then he retired with his suffragans and seven other bishops to a villa near Constantinople, called *epi dryn* (see Ubaldi, "La Synodo ad Quercum", Turin, 1902). A long list of the most ridiculous accusations was drawn up against Chrysostom

(see Photius, "Bibliotheca", 59, in P.G., CIII, 105-113), who, surrounded by forty-two archbishops and bishops assembled to judge Theophilus in accordance with the orders of the emperor, was now summoned to present himself and apologize. Chrysostom naturally refused to recognize the legality of a synod in which his open enemies were judges. After the third summons Chrysostom, with the consent of the emperor, was declared to be deposed. In order to avoid useless bloodshed, he surrendered himself on the third day to the soldiers who awaited him. But the threats of the excited people, and a sudden accident in the imperial palace, frightened the empress (Palladius, "Dialogus", ix). She feared some punishment from heaven for Chrysostom's exile, and immediately ordered his recall. After some hesitation Chrysostom re-entered the capital amid the great rejoicings of the people. Theophilus and his party saved themselves by flying from Constantinople. Chrysostom's return was in itself a defeat for Eudoxia. When her alarms had gone, her rancour revived. Two months afterwards a silver statue of the empress was unveiled in the square just before the cathedral. The public celebrations which attended this incident, and lasted several days, became so boisterous that the offices in the church were disturbed. Chrysostom complained of this to the prefect of the city, who reported to Eudoxia that the bishop had complained against her statue. This was enough to excite the empress beyond all bounds. She summoned Theophilus and the other bishops to come back and to depose Chrysostom again. The prudent patriarch, however, did not wish to run the same risk a second time. He only wrote to Constantinople that Chrysostom should be condemned for having re-entered his see in opposition to an article of the Synod of Antioch held in the year 341 (an Arian synod). The other bishops had neither the authority nor the courage to give a formal judgment. All they could do was to urge the emperor to sign a new decree of exile. A double attempt on Chrysostom's life failed. On Easter Eve, 404, when all the catechumens were to receive baptism, the adversaries of the bishop, with imperial soldiers, invaded the baptistery and dispersed the whole congregation. At last Arcadius signed the decree, and on 24 June, 404, the soldiers conducted Chrysostom a second time into exile.

(5) Exile and Death

They had scarcely left Constantinople when a huge conflagration destroyed the cathedral, the senate-house, and other buildings. The followers of the exiled bishop were accused of the crime and prosecuted. In haste Arsacius, an old man, was appointed successor of Chrysostom, but was soon succeeded by the cunning Atticus. Whoever refused to enter into communion with them was punished by confiscation of property and exile. Chrysostom himself was conducted to Cucusus, a secluded and rugged place on the east frontier of Armenia, continually exposed to the invasions of the Isaurians. In the following year he had even to fly for some time to the castle of Arabissus to

protect himself from these barbarians. Meanwhile he always maintained a correspondence with his friends and never gave up the hope of return. When the circumstances of his deposition were known in the West, the pope and the Italian bishops declared themselves in his favour. Emperor Honorius and Pope Innocent I endeavoured to summon a new synod, but their legates were imprisoned and then sent home. The pope broke off all communion with the Patriarchs of Alexandria, Antioch (where an enemy of Chrysostom had succeeded Flavian), and Constantinople, until (after the death of Chrysostom) they consented to admit his name into the diptychs of the Church. Finally all hopes for the exiled bishop had vanished. Apparently he was living too long for his adversaries. In the summer, 407, the order was given to carry him to Pithyus, a place at the extreme boundary of the empire, near the Caucasus. One of the two soldiers who had to lead him caused him all possible sufferings. He was forced to make long marches, was exposed to the rays of the sun, to the rains and the cold of the nights. His body, already weakened by several severe illnesses, finally broke down. On 14 September the party were at Comanan in Pontus. In the morning Chrysostom had asked to rest there on the account of his state of health. In vain; he was forced to continue his march. Very soon he felt so weak that they had to return to Comana. Some hours later Chrysostom died. His last words were: *Doxa to theo panton eneken* (Glory be to God for all things) (Palladius, xi, 38). He was buried at Comana. On 27 January, 438, his body was translated to Constantinople with great pomp, and entombed in the church of the Apostles where Eudoxia had been buried in the year 404 (see Socrates, VII, 45; Constantine Prophyrogen., "Cæremoniale Aul Byz.", II, 92, in P.G., CXII, 1204 B).

II. THE WRITINGS OF ST. CHRYSOSTOM

Chrysostom has deserved a place in ecclesiastical history, not simply as Bishop of Constantinople, but chiefly as a Doctor of the Church. Of none of the other Greek Fathers do we possess so many writings. We may divide them into three portions, the "opuscula", the "homilies", and the "letters". (1) The chief "opuscula" all date from the earlier days of his literary activity. The following deal with monastical subjects: "Comparatio Regis cum Monacho" ("Opera", I, 387-93, in P.G., XLVII-LXIII), "Adhortatio ad Theodorum (Mopsuestensem?) lapsum" (ibid., 277-319), "Adversus oppugnatores vitae monasticae" (ibid., 319-87). Those dealing with ascetical subjects in general are the treatise "De Compunctione" in two books (ibid., 393-423), "Adhortatio ad Stagirium" in three books (ibid., 433-94), "Adversus Subintroductas" (ibid., 495-532), "De Virginitate" (ibid., 533-93), "De Sacerdotio" (ibid., 623-93). (2) Among the "homilies" we have to distinguish commentaries on books of Holy Scripture, groups of homilies (sermons) on special subjects, and a great number of single homilies. (a) The chief "commentaries" on the Old Testament are the sixty-seven homilies "On

Genesis" (with eight sermons on Genesis, which are probably a first recension) (IV, 21 sqq., and *ibid.*, 607 sqq.); fifty-nine homilies "On the Psalms" (4-12, 41, 43-49, 108-117, 119-150) (V, 39-498), concerning which see Chrys. Baur, "Der urspr ngliche Umfang des Kommentars des hl. Joh. Chrysostomus zu den Psalmen" in *Chrysostomika*, fase. i (Rome, 1908), 235-42, a commentary on the first chapters of "Isaias" (VI, 11 sqq.). The fragments on Job (XIII, 503-65) are spurious (see Haidacher, "Chrysostomus Fragmente" in *Chrysostomika*, I, 217 sq.); the authenticity of the fragments on the Proverbs (XIII, 659-740), on Jeremias and Daniel (VI, 193-246), and the Synopsis of the Old and the New Testament (*ibid.*, 313 sqq.), is doubtful. The chief commentaries on the New Testament are first the ninety homilies on "St. Matthew" (about the year 390; VII), eighty-eight homilies on "St. John" (c. 389; VIII, 23 sqq. -- probably from a later edition), fifty-five homilies on "the Acts" (as preserved by stenographers, IX, 13 sqq.), and homilies "On all Epistles of St. Paul" (IX, 391 sqq.). The best and most important commentaries are those on the Psalms, on St. Matthew, and on the Epistle to the Romans (written c. 391). The thirty-four homilies on the Epistle to the Galatians also very probably comes to us from the hand of a second editor. (b) Among the "homilies forming connected groups", we may especially mention the five homilies "On Anna" (IV, 631-76), three "On David" (*ibid.*, 675-708), six "On Ozias" (VI, 97-142), eight "Against the Jews" (II, 843-942), twelve "De Incomprehensibili Dei Natur" (*ibid.*, 701-812), and the seven famous homilies "On St. Paul" (III, 473-514). (c) A great number of "single homilies" deal with moral subjects, with certain feasts or saints. (3) The "Letters" of Chrysostom (about 238 in number: III, 547 sqq.) were all written during his exile. Of special value for their contents and intimate nature are the seventeen letters to the deaconess Olympias. Among the numerous "Apocrypha" we may mention the liturgy attributed to Chrysostom, who perhaps modified, but did not compose the ancient text. The most famous *apocryphon* is the "Letter to C sarius" (III, 755-760). It contains a passage on the holy Eucharist which seems to favour the theory of "impanatio", and the disputes about it have continued for more than two centuries. The most important spurious work in Latin is the "Opus imperfectum", written by an Arian in the first half of the fifth century (see Th. Paas, "Das Opus impefectum in Matthæum", Tübingen, 1907).

III. CHRYSOSTOM'S THEOLOGICAL IMPORTANCE

(1) Chrysostom as Orator

The success of Chrysostom's preaching is chiefly due to his great natural facility of speech, which was extraordinary even to Greeks, to the abundance of his thoughts as well as the popular way of presenting and illustrating them, and, last but not least, the whole-hearted earnestness and conviction with which he delivered the message which he felt had been given to him. Speculative explanation did not attract his mind,

nor would they have suited the tastes of his hearers. He ordinarily preferred moral subjects, and very seldom in his sermons followed a regular plan, nor did he care to avoid digressions when any opportunity suggested them. In this way, he is by no means a model for our modern thematic preaching, which, however we may regret it, has to such a great extent supplanted the old homiletic method. But the frequent outbursts of applause among his congregation may have told Chrysostom that he was on the right path.

(2) Chrysostom as an exegete

As an exegete Chrysostom is of the highest importance, for he is the chief and almost the only successful representative of the exegetical principles of the School of Antioch. Diodorus of Tarsus had initiated him into the grammatico-historical method of that school, which was in strong opposition to the eccentric, allegorical, and mystical interpretation of Origen and the Alexandrian School. But Chrysostom rightly avoided pushing his principles to that extreme to which, later on, his friend Theodore of Mopsuestia, the teacher of Nestorius, carried them. He did not even exclude all allegorical or mystical explanations, but confined them to the cases in which the inspired author himself suggests this meaning.

(3) Chrysostom as Dogmatic Theologian

As has already been said, Chrysostom's was not a speculative mind, nor was he involved in his lifetime in great dogmatic controversies. Nevertheless it would be a mistake to underrate the great theological treasures hidden in his writings. From the very first he was considered by the Greeks and Latins as a most important witness to the Faith. Even at the Council of Ephesus (431) both parties, St. Cyril and the Antiochians, already invoked him on behalf of their opinions, and at the Seventh Ecumenical Council, when a passage of Chrysostom had been read in favour of the veneration of images, Bishop Peter of Nicomedia cried out: "If John Chrysostom speaks in the way of the images, who would dare to speak against them?" which shows clearly the progress his authority had made up to that date.

Strangely enough, in the Latin Church, Chrysostom was still earlier invoked as an authority on matters of faith. The first writer who quoted him was Pelagius, when he wrote his lost book "De Naturæ" against St. Augustine (c. 415). The Bishop of Hippo himself very soon afterwards (421) claimed Chrysostom for the Catholic teaching in his controversy with Julian of Eclanum, who had opposed to him a passage of Chrysostom (from the "Hom. ad Neophytos", preserved only in Latin) as being against original sin (see Chrys. Baur, "L'entrée littéraire de St. Jean Chrys. dans le monde latin" in the "Revue d'histoire ecclés.", VIII, 1907, 249-65). Again, at the time of the Reformation there arose long and acrid discussions as to whether Chrysostom was a Protestant or a Catholic, and these polemics have never wholly ceased. It is true that Chrysostom

has some strange passages on our Blessed Lady (see Newman, "Certain difficulties felt by Anglicans in Catholic Teachings", London, 1876, pp. 130 sqq.), that he seems to ignore private confession to a priest, that there is no clear and any direct passage in favour of the primacy of the pope. But it must be remembered that all the respective passages contain nothing positive against the actual Catholic doctrine. On the other side Chrysostom explicitly acknowledges as a rule of faith tradition (XI, 488), as laid down by the authoritative teaching of the Church (I, 813). This Church, he says, is but one, by the unity of her doctrine (V, 244; XI, 554); she is spread over the whole world, she is the one Bride of Christ (III, 229, 403; V, 62; VIII, 170). As to Christology, Chrysostom holds clearly that Christ is God and man in one person, but he never enters into deeper examination of the manner of this union. Of great importance is his doctrine regarding the Eucharist. There cannot be the slightest doubt that he teaches the Real Presence, and his expressions on the change wrought by the words of the priest are equivalent to the doctrine of transubstantiation (see Naegle, "Die Eucharistielehre des hl. Joh. Chry.", 74 sq.).

A complete analysis and critique of the enormous literature on Chrysostom (from the sixteenth century to the twentieth) is given in BAUR, S. Jean Chrysostome et ses oeuvres dans l'histoire littéraire (Paris and Louvain, 1907), 223-297.

(1) LIFE OF CHRYSOSTOM. (a) Sources. -- PALLADIUS, Dialogue cum Theodoro, Ecclesiae Romanae Diacono, de vita et conversatione b. Joh. Chrysostomi (written c. 408; best source; ed. BIGOT, Paris, 1680; P.G., XLVII, 5-82) MARTYRIUS, Panegyricus in S. Joh. Chrysostomum (written c. 408; ed. P.G., loc. cit., XLI-LII); SOCRATES, Hist. Eccl., VI, 2-23, and VII, 23, 45 (P.G., LXVII, 661 sqq.); SOZOMENUS, Hist. eccl., VIII, 2-28 (P.G., *ibid.*, 1513 sqq.), more complete than Socrates, on whom he is dependent; THEODORET, Hist. eccl., V, 27-36; P.G., LXXXII, 1256-68, not always reliable; ZOSIMUS, V, 23-4 (ed. BEKKER, p. 278-80, Bonn. 1837), not trustworthy.

(b) Later Authors. -- THEODORE OF THRIMITUS, (P.G., XLVII, col. 51-88), without value, written about the end of the seventh century; (PSEUDO-) GEORGIUS ALEXANDRINUS, ed. SAVILE, Chrys. opera omnia (Eton, 1612), VIII, 157-265 (8th - 9th century); LEO IMPERATOR, Laudatio Chrys. (P.G., CVII, 228 sqq.); ANONYMUS, (ed. SAVILE, loc. cit., 293-371); SYMEON METAPHRASTES, (P.G., CXIV, 1045-1209).

(c) Modern Biographies. -- English: STEPHENS, Saint John Chrysostom, his life and times, a sketch of the Church and the empire in the fourth century (London, 1871; 2nd ed., London, 1880), the best English biography, but it anglicanizes the doctrine of Chrysostom; BUSH, The Life and Times of Chrysostom (London, 1885), a popular treatise. French: HERMANT, La Vie de Saint Jean Chrysostome . . . divisée en 12 livres (Paris, 1664; 3rd ed., Paris, 1683), the first scientific biography; DE TILLEMONT, M

moires pour servir l'histoire eccl siastique des six premiers si cles, XI, 1-405, 547-626 (important for the chronology); STILTING, De S. Jo. Chrysostomo . . . Commentarius historicus in Acta SS., IV, Sept., 401-700 (1st ed., 1753), best scientific biography in Latin; THIERRY, S. Jean Chrysostome et l'imp ratrice Eudoxie (Paris, 1872; 3rd ed., Paris, 1889), "more romance than history"; PUECH, Saint Jean Chrysostome (Paris, 1900); 5th ed., Paris, 1905), popular and to be read with caution. German: NEANDER, Der hl. Joh. Chrysostomus und die Kirche, besonders des Orients, in dessen Zeitalter, 2 vols. (Berlin, 1821 - 22; 4th ed., Berlin 1858); first vol., translated into English by STAPLETON (London, 1838), gives an account of the doctrine of Chrysostom with Protestant views; LUDWIG, Der hl. Joh. Chrys. in seinem Verh liniss zum byzantinischen Hof. (Braunsberg, 1883), scientific. Chrysostom as orator: ALBERT, S. Jean Chrysostome consid r comme orateur populaire (Paris, 1858); ACKERMANN, Die Beredsamkeit des hl. Joh. Chrys. (W rzburg, 1889); cf. WILLEY, Chrysostom: The Orator (Cincinnati, 1908), popular essay.

(2) CHRYSOSTOM'S WRITINGS. (a) Chronology. -- See TILLEMONT, STILTING, MONTFAUCON, Chrys. Opera omnia; USENER, Religionsgeschichtliche Untersuchungen, I (Bonn, 1889), 514-40; RAUSCHEN, Jahrb cher der christl. Kirche unter dem Kaiser Theodosius dem Grossen (Freiburg im Br., 1897), 251-3, 277-9, 495-9; BATIFFOL, Revue bibl., VIII, 566-72; PARGOIRE, Echos d'Orient, III 151-2; E. SCHATZ, J dische und chrisl. Ostertafeln (Berlin, 1905), 169-84.

(b) Authenticity. -- HAIDACHER, Zeitschr. f r Kath. Theologie, XVIII-XXXII; IDEM, Deshl. Joh. Chrys. Buchlein ber Hoffart u. Kindererziehung (Freiburg, im Br., 1907).

(3) CHRYSOSTOM'S DOCTRINE. MAYERUS, Chrysostomus Lutheranus (Grimma, 1680; Wittenberg, 1686); HACKI, D. Jo. Chrysostomus . . . a Lutheranismo . . . vindicatus (Oliva, 1683); FRSTER, Chrysostomus in seinem Verh ltniss zur antiochen. Schule (Gotha, 1869); CHASE, Chrysostom, A Study in the History of Biblical Interpretation (London, 1887); HAIDACHER, Die Lehre des hl. Joh. Chrys. ber die Schriftinspiration (Salzburg, 1897); CHAPMAN, St. Chrysostom on St. Peter in Dublin Review (1903), 1-27; NAEGLE, Die Eucharistielehre des hl. Johannes Chrysostomus, des Doctor Eucharisti (Freiburg im Br., 1900).

(4) EDITIONS. (a) Complete. -- SAVILE (Eton, 1612), 8 volumes (the best text); DUCAEUS, (Paris, 1609-1636), 12 vols.; DE MONTFAUCON, (Paris, 1718-1738), 13 vols.; MIGNE, P.G., XLVII - LXIII.

(b) Partial. -- FIELD, Homilies in Matth. (Cambridge, 1839), 3 vols., best actual text reprinted in MIGNE, LVII - LVIII; IDEM, Homilioe in omnes epistolas Pauli (Oxford, 1845-62), VII. The last critical edition of the De Sacerdotio was edited by NAIRN (Cambridge, 1906). There exist about 54 complete editions (in five languages),

86 percent special editions of *De Sacerdotio* (in twelve languages), and the whole number of all (complete and special) editions is greatly over 1000. The oldest editions are the Latin; of which forty-six different incunabula editions (before the year 1500) exist. See DIODORUS OF TARSUS, METETIUS OF ANTIOCH, ORIGENISTS, PALLADIUS, THEODORE OF MOPSUESTIA.

CHRYS. BAUR.

St. John Climacus

St. John Climacus

Also surnamed SCHOLASTICUS, and THE SINAITA, b. doubtlessly in Syria, about 525; d. on Mount Sinai. 30 March, probably in 606, according the credited opinion -- others say 605. Although his education and learning fitted him to live in an intellectual environment, he chose, while still young, to abandon the world for a life of solitude. The region of Mount Sinai was then celebrated for the holiness of the monks who inhabited it; he betook himself thither and trained himself to the practice of the Christian virtues under the direction of a monk named Martyrius. After the death of Martyrius John, wishing to practise greater mortifications, withdrew to a hermitage at the foot of the mountain. In this isolation he lived for some twenty years, constantly studying the lives of the saints and thus becoming one of the most learned doctors of the Church.

In 600, when he was about seventy-five years of age, the monks of Sinai persuaded him to put himself at their head. He acquitted himself of his functions as abbot with the greatest wisdom, and his reputation spread so far that the pope (St. Gregory the Great) wrote to recommend himself to his prayers, and sent him a sum of money for the hospital of Sinai, in which the pilgrims were wont to lodge. Four years later he resigned his charge and returned to his hermitage to prepare for death.

St. John Climacus has left us two important works: the "Scala [*Klimax*] Paradisi", from which his surname comes, composed at the request of John, Abbot of Raithu, a monastery situated on the shores of the Red Sea; and the "Liber ad Pastorem". The "Scala", which obtained an immense popularity and has made its author famous in the Church, is addressed to anchorites and cenobites, and treats of the means by which the highest degree of religious perfection may be attained. Divided into thirty parts, or "steps", in memory of the thirty years of the hidden life of Christ, the Divine model of the religious, it presents a picture of all the virtues and contains a. great many parables and historical touches, drawn principally from the monastic life, and exhibiting the practical application of the precepts. At the same time, as the work is mostly written in a concise, sententious form, with the aid of aphorisms, and as the reasonings are

not sufficiently closely connected, it is at times somewhat obscure. This explains its having been the subject of various commentaries, even in very early times. The most ancient of the manuscripts containing the "Scala" is found in the Bibliothèque Rationale in Paris, and was probably brought from Florence by Catharine de' Medici. In some of these manuscripts the work bears the title of "Spiritual Tables" (*Plakes pneumatikai*). It was translated into Latin by Ambrogio the Camaldolese (Ambrosius Camaldulensis) (Venice, 1531 and 1569; Cologne, 1583, 1593, with a commentary by Denis the Carthusian; and 1601, 8vo). The Greek of the "Scala", with the *scholia* of Elias, Archbishop of Crete, and also the text of the "Liber ad Pastoem", were published by Matthæus Raderus with a Latin translation (fol., Paris, 1633). The whole is reproduced in P.G., LXXXVIII (Paris, 1860), 5791248. Translations of the "Scala" have been published in Spanish by Louis of Granada (Salamanca, 1551), in Italian (Venice, 1585), in modern Greek by Maximus Margunius, Bishop of Cerigo (Venice, 1590), and in French by Arnould d'Andilly (12mo, Paris, 1688). The last-named of these translations is preceded by a life of the saint by Le Maistre de Sacy. There is also in existence an ancient life of the saint by a monk named Daniel.

Acta SS., III, March, 834-5; CEILLIER Hist. Gén. des auteurs sacrés et ecclés., XVII (Paris, 1750), 569-96; FABRICIUS, Bibl. Græca, VIII (Hamburg, 1717), 615-20; KRUMBACHER, Gesch byz. Litt. (Munich, 1897), 143-4; SURIUS, Vitæ SS., II (Vernice, 1681), 133.

LÉON CLUGNET

Bl. John Colombini

Blessed John Colombini

Founder of the Congregation of Jesuati; b. at Siena, Upper Italy, about 1300; d. on the way to Acquapendente, 31 July, 1367. There was nothing in his early life to indicate the presence in his character of any unusual seeds of holiness. Belonging to an old patrician family, he devoted himself, like thousands of his class in Italy, to commerce, swelled his already substantial fortune, and rose to a position of great prominence and influence among his fellow-citizens, who on several occasions elected him *gonfalonier*. Fortunate in his marriage, of which two children -- Peter and Angela -- were the fruit, his private life was marred by his avarice, his ambition, and his proneness to anger. One day, while still suffering under a sense of mortification after one of his passionate outbursts occasioned by a petty domestic disappointment, he chanced to take up a biography of St. Mary of Egypt, whose later life had been as conspicuous for penance as her earlier had been for sin. The perusal of this narrative brought a new light into his life; henceforth ambition and anger gave way to an almost incredible humility and

meekness. The great transformation of his life extended to his business affairs, and excited in the purely mercenary-minded a ridicule easy to understand. Heedless, however, of raillery, he did not rest content with selling cheaper than any other merchant, but persisted in paying more for his purchases than the sum demanded. With the consent of his wife he soon abandoned his former patrician associates, visited hospitals, tended the sick, and made large donations to the poor. Then casting aside the clothes usual to his station, he assumed the garments of the most indigent, and, having fallen ill and believing himself treated with too much delicacy at home, deserted his luxurious house for the ordinary ward of a poor hospital. His relations urged him to return, and finally elicited his consent on the condition that thenceforth he would be given only the coarser forms of nourishment. Nursed back to health, he insisted on making his house the refuge of the needy and the suffering, washing their feet with his own hands, dispensing to them bodily and spiritual comfort, leaving nothing undone that the spirit of charity could suggest. Among the wonders recorded to have taken in this abode of Christian mercy was the miraculous disappearance of a leper, leaving the room permeated with an indescribable fragrance.

It required eight years to render his wife reconciled to the extraordinary philanthropy of her husband. His son having meanwhile died and his daughter taken the veil, Colombini with the approval of his wife, on whom he first settled a life-annuity, divided his fortune into three parts: the first went to endow a hospital, the second and third to two cloisters. Together with his friend Francisco Mini, who had been associated with him in all charitable labours, Colombini lived henceforward a life of apostolic poverty, begged for his daily bread, and esteemed it a favour to be allowed to wait on the sick poor, while in public and in their dwellings he stimulated the people to penance. He was soon joined by three of the Piccolomini and by members of other patrician families, who likewise distributed all their goods among the poor. Alarmed at these occurrences, many of the Sieneſe now raised an outcry, complaining that Colombini was inciting all the most promising young men of the city to "folly", and succeeded in procuring his banishment. Accompanied by twenty-five companions, Colombini left his native city without a protest and visited in succession Arezzo, Città di Castello, Pisa and many other Tuscan cities, making numerous conversions, reconciling sundered friends, and effecting the return of much property to its rightful owners. An epidemic which broke out at Siena shortly after his departure, was generally regarded as a heavenly chastisement for his banishment, and there was a universal clamour for his recall. Regardless alike of derision and insult, he resumed on his return his former charitable occupations, in his humility rejoicing to perform the most menial services at houses where he had once been an honoured guest.

On the return of Urban V from Avignon to Rome (1367), Colombini and his followers hastened to meet him, and begged him to sanction the foundation of their Institution. A commission appointed by Urban and presided over by Cardinal William Sudre, Bishop of Marseilles, having attested their freedom from every taint of the error of the Fraticelli, whose views some evil-intentioned people had accused them of holding, the pope gave his consent to the foundation of their congregation. The name *Jesuati* (Jesuites) had already been given them by the populace of Viterbo because of their constant use of the ejaculation "Praise be to Jesus Christ." From the very beginning they had a special veneration for St. Jerome, and, to this fact and to the apostolic life they led, they are indebted for their longer title, *Clerici apostolici s. Hieronymi* (Apostolic Clerics of St. Jerome). Urban appointed as their habit a white soutan, a white four-cornered hood hanging round the neck and falling in folds over the shoulders, and a mantle of a dun colour; the soutan was encircled by a leathern girdle, and sandals were worn on the feet. Their occupations were to be the care of the sick, particularly the plague-stricken, the burial of the dead, prayer, and strict mortification (including daily scourging). Their statutes were at first based on the Rule of St. Benedict, modified to suit the aims of the congregation, but the Rule of St. Augustine was later adopted. Colombini died a week after the foundation of his institute, having appointed Mini his successor. After many miracles had occurred at his tomb, Gregory XIII inserted Colombini's name in the Roman Martyrology, fixing 31 July for the celebration of his feast, which is of obligation at Siena. Under Mini and his successor, Blessed Jerome Dasciano, the Jesuati spread rapidly over Italy. and in 1606 the Holy See allowed the reception of priests into the congregation. Abuses, however, crept in subsequently, and the congregation was suppressed by Clement IX in 1668 as of little advantage to the interests of the Church.

The Jesuatesses or Sisters of the Visitation of Mary, founded about 1367 at the suggestion of Colombini by his cousin Blessed Catharine Colombini of Siena (d. 20 October, 1387), spoke as little as possible, fasted very strictly, and chastised their bodies twice daily. The also spread very rapidly, and survived in Italy until 1872.

THOMAS KENNEDY

Ven. John Cornelius and Companions

Venerables John Cornelius and Companions

John Cornelius (called also Mohun) was born of Irish parents at Bodmin, in Cornwall, on the estate of Sir John Arundell, of Lanherne, in 1557; martyred at Dorchester, 4 July, 1594. Sir John Arundell took an interest in the talented boy and sent him to Oxford. Not satisfied with the new religion taught there, John Cornelius went to the great "seminary of martyrs", then at Reims, and a little later, on 1 April, 1580, entered the English College, Rome, to pursue his theological studies. After his ordination he was sent as a missionary to England and laboured there for nearly ten years. He practised mortification, was devoted to meditation, and showed much zeal in the ministry. While acting as chaplain to Lady Arundell, he was arrested on 24 April, 1594, at Chideock Castle, by the sheriff of Dorsetshire. He was met on the way by Thomas Bosgrave, a relative of the Arundell family, who offered him his own hat, as he had been dragged out bareheaded. Thereupon Bosgrave was arrested. Two servants of the castle, John (or Terence) Carey and Patrick Salmon, natives of Dublin, shared the same fate. When they reached the sheriff's house a number of Protestant clergymen heaped abuse upon the Catholic religion, but were so well answered that the sheriff stopped the disputation. The missionary was sent to London and brought before the Lord Treasurer, the Archbishop of Canterbury, and others, who, by words and torture, tried in vain to obtain the names of such as had given him shelter or assistance. He was brought back to Dorchester and with his three companions condemned to death, 2 July, 1594. He was accused of high treason, because he was a priest and had returned to England; the others were charged with felony, for having rendered assistance to one whom they knew to be a priest; but all were assured that their lives would be spared if they embraced Protestantism.

While in prison, John Cornelius was admitted to membership in the Society of Jesus. On the way to execution none of the confessors showed signs of fear. The first to ascend the scaffold was John Carey; he kissed the rope, exclaiming "O precious collar", made a solemn profession of faith and died a valiant death. Before his execution Patrick Salmon, a man much admired for his virtues, exhorted the spectators to embrace the Faith, for which he and his companions were giving their lives. Then followed Thomas Bosgrave, a man of education, who delivered a stirring address on the truth of his belief. The last to suffer was John Cornelius, who kissed the gallows with the words of St. Andrew, "O Cross, long desired", etc. On the ladder he tried to speak to the multitude, but was prevented. After praying for his executioners and for the welfare of the queen, John Cornelius also was executed. The body was taken down and

quartered, his head was nailed to the gibbet, but soon removed. The bodies were buried by the Catholics.

FRANCIS MERSHMAN

Saint John Damascene

St. John Damascene

Born at Damascus, about 676; died some time between 754 and 787. The only extant life of the saint is that by John, Patriarch of Jerusalem, which dates from the tenth century (P.G. XCIV, 429-90). This life is the single source from which have been drawn the materials of all his biographical notices. It is extremely unsatisfactory from the standpoint of historical criticism. An exasperating lack of detail, a pronounced legendary tendency, and a turgid style are its chief characteristics. Mansur was probably the name of John's father. What little is known of him indicates that he was a sterling Christian whose infidel environment made no impression on his religious fervour. Apparently his adherence to Christian truth constituted no offence in the eyes of his Saracen countrymen, for he seems to have enjoyed their esteem in an eminent degree, and discharged the duties of chief financial officer for the caliph, Abdul Malek. The author of the life records the names of but two of his children, John and his half-brother Cosmas. When the future apologist had reached the age of twenty-three his father cast about for a Christian tutor capable of giving his sons the best education the age afforded. In this he was singularly fortunate. Standing one day in the market-place he discovered among the captives taken in a recent raid on the shores of Italy a Sicilian monk named Cosmas. Investigation proved him to be a man of deep and broad erudition. Through the influence of the caliph, Mansur secured the captive's liberty and appointed him tutor to his sons. Under the tutelage of Cosmas, John made such rapid progress that, in the enthusiastic language of his biographer, he soon equalled Diophantus in algebra and Euclid in geometry. Equal progress was made in music, astronomy, and theology.

On the death of his father, John Damascene was made *protosymbulus*, or chief councillor, of Damascus. It was during his incumbency of this office that the Church in the East began to be agitated by the first mutterings of the Iconoclast heresy. In 726, despite the protests of Germanus, Patriarch of Constantinople, Leo the Isaurian issued his first edict against the veneration of images. From his secure refuge in the caliph's court, John Damascene immediately entered the lists against him, in defence of this ancient usage of the Christians. Not only did he himself oppose the Byzantine monarch, but he also stirred the people to resistance. In 730 the Isaurian issued a second edict, in which he not only forbade the veneration of images, but even inhibited their exhib-

ition in public places. To this royal decree the Damascene replied with even greater vigour than before, and by the adoption of a simpler style brought the Christian side of the controversy within the grasp of the common people. A third letter emphasized what he had already said and warned the emperor to beware of the consequences of this unlawful action. Naturally, these powerful apologies aroused the anger of the Byzantine emperor. Unable to reach the writer with physical force, he sought to encompass his destruction by strategy. Having secured an autograph letter written by John Damascene, he forged a letter, exactly similar in chirography, purporting to have been written by John to the Isaurian, and offering to betray into his hands the city of Damascus. The letter he sent to the caliph. Notwithstanding his councillor's earnest avowal of innocence, the latter accepted it as genuine and ordered that the hand that wrote it be severed at the wrist. The sentence was executed, but, according to his biographer, through the intervention of the Blessed Virgin, the amputated hand was miraculously restored.

The caliph, now convinced of John's innocence, would fain have reinstated him in his former office, but the Damascene had heard a call to a higher life, and with his foster-brother entered the monastery of St. Sabas, some eighteen miles south-east of Jerusalem. After the usual probation, John V, Patriarch of Jerusalem, conferred on him the office of the priesthood. In 754 the pseudo-Synod of Constantinople, convened at the command of Constantine Copronymus, the successor of Leo, confirmed the principles of the Iconoclasts and anathematized by name those who had conspicuously opposed them. But the largest measure of the council's spleen was reserved for John of Damascus. He was called a "cursed favourer of Saracens", a "traitorous worshipper of images", a "wronger of Jesus Christ", a "teacher of impiety", and a "bad interpreter of the Scriptures". At the emperor's command his name was written "Manzer" (*Manzeros*, a bastard). But the Seventh General Council of Nicea (787) made ample amends for the insults of his enemies, and Theophanes, writing in 813, tells us that he was surnamed Chrysorrhoeas (golden stream) by his friends on account of his oratorical gifts. In the pontificate of Leo XIII he was enrolled among the doctors of the Church. His feast is celebrated on 27 March.

John of Damascus was the last of the Greek Fathers. His genius was not for original theological development, but for compilation of an encyclopedic character. In fact, the state of full development to which theological thought had been brought by the great Greek writers and councils left him little else than the work of an encyclopedist; and this work he performed in such manner as to merit the gratitude of all succeeding ages. Some consider him the precursor of the Scholastics, whilst others regard him as the first Scholastic, and his "De fide orthodoxa" as the first work of Scholasticism. The Arabians too, owe not a little of the fame of their philosophy to his inspiration. The

most important and best known of all his works is that to which the author himself gave the name of "Fountain of Wisdom" (*pege gnoseos*). This work has always been held in the highest esteem in both the Catholic and Greek Churches. Its merit is not that of originality, for the author asserts, at the end of the second chapter of the "Dialectic", that it is not his purpose to set forth his own views, but rather to collate and epitomize in a single work the opinions of the great ecclesiastical writers who have gone before him. A special interest attaches to it for the reason that it is the first attempt at a *summa theologica* that has come down to us.

The "Fountain of Wisdom" is divided into three parts, namely, "Philosophical Chapters" (*Kephalalaia philosophika*), "Concerning Heresy" (*peri aipeseon*), and "An Exact Exposition of the Orthodox Faith" (*Ikhdosis akribes tes orthodoxou pisteos*). The title of the first book is somewhat too comprehensive for its contents and consequently is more commonly called "Dialectic". With the exception of the fifteen chapters that deal exclusively with logic, it has mostly to do with the ontology of Aristotle. It is largely a summary of the Categories of Aristotle with Porphyry's "Isagoge" (*Eisagoge eis tas kategorias*). It seems to have been John Damascene's purpose to give his readers only such philosophical knowledge as was necessary for understanding the subsequent parts of the "Fountain of Wisdom". For more than one reason the "Dialectic" is a work of unusual interest. In the first place, it is a record of the technical terminology used by the Greek Fathers, not only against the heretics, but also in the exposition of the Faith for the benefit of Christians. It is interesting, too, for the reason that it is a partial exposition of the "Organon", and the application of its methods to Catholic theology a century before the first Arabic translation of Aristotle made its appearance. The second part, "Concerning Heresy", is little more than a copy of a similar work by Epiphanius, brought up to date by John Damascene. The author indeed expressly disclaims originality except in the chapters devoted to Islamism, Iconoclasm, and Aposchitae. To the list of eighty heresies that constitute the "Panarion" of Epiphanius, he added twenty heresies that had sprung up since his time. In treating of Islamism he vigorously assails the immoral practices of Mohammed and the corrupt teachings inserted in the Koran to legalize the delinquencies of the prophet. Like Epiphanius, he brings the work to a close with a fervent profession of Faith. John's authorship of this book has been challenged, for the reason that the writer, in treating of Arianism, speaks of Arius, who died four centuries before the time of Damascene, as still living and working spiritual ruin among his people. The solution of the difficulty is to be found in the fact that John of Damascene did not epitomize the contents of the "Panarion", but copied it verbatim. Hence the passage referred to is in the exact words of Epiphanius himself, who was a contemporary of Arius.

"Concerning the Orthodox Faith", the third book of the "Fountain of Wisdom", is the most important of John Damascene's writings and one of the most notable works of Christian antiquity. Its authority has always been great among the theologians of the East and West. Here, again, the author modestly disavows any claim of originality -- any purpose to essay a new exposition of doctrinal truth. He assigns himself the less pretentious task of collecting in a single work the opinions of the ancient writers scattered through many volumes, and of systematizing and connecting them in a logical whole. It is no small credit to John of Damascus that he was able to give to the Church in the eighth century its first summary of connected theological opinions. At the command of Eugenius III it was rendered into Latin by Burgundio of Pisa, in 1150, shortly before Peter Lombard's "Book of Sentences" appeared. This translation was used by Peter Lombard and St. Thomas Aquinas, as well as by other theologians, till the Humanists rejected it for a more elegant one. The author follows the same order as does Theodoret of Cyrus in his "Epitome of Christian Doctrine". But, while he imitates the general plan of Theodoret, he does not make use of his method. He quotes, not only from the pages of Holy Writ, but also from the writings of the Fathers. As a result, his work is an inexhaustible thesaurus of tradition which became the standard for the great Scholastics who followed. In particular, he draws generously from Gregory of Nazianzus, whose works he seems to have absorbed, from Basil, Gregory of Nyssa, Cyril of Alexandria, Leo the Great, Athanasius, John Chrysostom, and Epiphanius. The work is divided into four books. This division, however, is an arbitrary one neither contemplated by the author nor justified by the Greek manuscript. It is probably the work of a Latin translator seeking to accommodate it to the style of the four books of Lombard's "Sentences".

The first book of "The Orthodox Faith" treats of the essence and existence of God, the Divine nature, and the Trinity. As evidence of the existence of God he cites the concurrence of opinion among those enlightened by Revelation and those who have only the light of reason to guide them. To the same end he employs the argument drawn from the mutability of created things and that from design. Treating, in the second book, of the physical world, he summarizes all the views of his times, without, however, committing himself to any of them. In the same treatise he discloses a comprehensive knowledge of the astronomy of his day. Here, also, place is given to the consideration of the nature of angels and demons, the terrestrial paradise, the properties of human nature, the foreknowledge of God, and predestination. Treating of man (c.xxvii), he gives what has been aptly called a "psychology *in nuce*". Contrary to the teachings of Plotinus, the master of Porphyry, he identifies mind and soul. In the third book the personality and two-fold nature of Christ are discussed with great ability. This leads up to the consideration of the Monophysite heresy. In this connexion he

deals with Peter the Fuller's addition to the "Trisagion", and combats Anastasius's interpretation of this ancient hymn. The latter, who was Abbot of the monastery of St. Euthymius in Palestine, referred the "Trisagion" only to the Second Person of the Trinity. In his letter "Concerning the Trisagion" John Damascene contends that the hymn applies not to the Son alone, but to each Person of the Blessed Trinity. This book also contains a spirited defence of the Blessed Virgin's claim to the title of "Theotokos." Nestorius is vigorously dealt with for trying to substitute the title of "Mother of Christ" for "Mother of God". The Scriptures are discussed in the fourth book. In assigning twenty-two books to the Old Testament Canon he is treating of the Hebrew, and not the Christian, Canon, as he finds it in a work of Epiphanius, "De ponderibus et mensuris". His treatment in this book of the Real Presence is especially satisfactory. The nineteenth chapter contains a powerful plea for the veneration of images.

The treatise, "Against the Jacobites", was written at the request of Peter, Metropolitan of Damascus, who imposed on him the task of reconciling to the Faith the Jacobite bishop. It is a strong polemic against the Jacobites, as the Monophysites in Syria were called. He also wrote against the Manicheans and Monothelites. The "Booklet Concerning Right Judgment" is little more than a profession of Faith, confirmed by arguments setting forth the mysteries of the Faith, especially the Trinity and the Incarnation. Though John of Damascus wrote voluminously on the Scriptures, as in the case of so much of his writing, his work bears little of the stamp of originality. His "Select Passages" (*Loci Selecti*), as he himself admits, are taken largely from the homilies of St. John Chrysostom and appended as commentaries to texts from the Epistles of St. Paul. The commentary on the Epistles to the Ephesians, Philippians, Colossians, and Thessalonians is taken from Cyril of Alexandria. The "Sacred Parallels" (*Sacra parallela*) is a kind of topical concordance, treating principally of God, man, virtues, and vices.

Under the general title of "Homilies" he wrote fourteen discourses. The sermon on the Transfiguration, which Lequien asserts was delivered in the church on Mt. Tabor, is of more than usual excellence. It is characterized by dramatic eloquence, vivid description, and a wealth of imagery. In it he discourses on his favorite topic, the twofold nature of Christ, quotes the classic text of Scripture in testimony of the primacy of Peter, and witnesses the Catholic doctrine of sacramental Penance. In his sermon on Holy Saturday he descants on the Easter duty and on the Real Presence. The Annunciation is the text of a sermon, now extant only in a Latin version of an Arabic text, in which he attributes various blessings to the intercession of the Blessed Virgin. The second of his three sermons on the Assumption is especially notable for its detailed account of the translation of the body of the Blessed Virgin into heaven, an account, he avers, that is based on the most reliable and ancient tradition. Both Liddledale and Neale regard John of Damascus as the prince of Greek hymnodists. His hymns are

contained in the "Carmina" of the Lequien edition. The "canons" on the Nativity, Epiphany, and Pentecost are written in iambic trimeters. Three of his hymns have become widely known and admired in their English version -- "Those eternal bowers", "Come ye faithful raise the strain", and "'Tis the Day of Resurrection". The most famous of the "canons" is that on Easter. It is a song of triumph and thanksgiving -- the "Te Deum" of the Greek Church. It is a traditional opinion, lately controverted, that John Damascene composed the "Octoëchos", which contains the liturgical hymns used by the Greek Church in its Sunday services. Gerbet, in his "History of Sacred Music", credits him with doing for the East what Gregory the Great accomplished for the West -- substitution of notes and other musical characters for the letters of the alphabet to indicate musical quantities. It is certain he adapted choral music to the purposes of the Liturgy.

Among the several works that are dubiously attributed to John Damascene the most important is the romance entitled "Barlaam and Josaphat". Throughout the Middle Ages it enjoyed the widest popularity in all languages. It is not regarded as authentic by Lequien, and the discovery of a Syriac version of the "Apology of Aristides" shows that what amounts to sixteen printed pages of it was taken directly from Aristides. The panegyric of St. Barbara, while accepted as genuine by Lequien, is rejected by many others. The treatise entitled "Concerning those who have died in the Faith" is rejected as spurious by Suarez, Bellarmine, and Lequien, not only on account of its doctrinal discrepancies, but for its fabulous character as well. The first Greek edition of any of the works of John Damascene was that of the "Exact Exposition of the Orthodox Faith" brought out at Verona (1531) under the auspices of John Matthew Gibertus, Bishop of Verona. Another Greek edition of the same work was published at Moldavia (1715) by John Epnesinus. It was also printed in a Latin edition at Paris (1507), by James Faber. Henry Gravius, O.P., published a Latin edition at Cologne (1546) which contained the following works: "Dialectic", "Elementary and Dogmatic Instruction", "Concerning the two Wills and Operations", and "Concerning Heresy". A Greek-Latin edition with an introduction by Mark Hopper made its appearance at Basle (1548). A similar edition, but much more complete was published at the same place in 1575. Another Latin edition, constituting a partial collection of the author's works is that by Michael Lequien, O.P., published at Paris (1717) and Venice (1748). To the reprint of this edition, P.G., XCIV-XCVI (Paris, 1864), Migne has added a supplement of works attributed by some to the authorship of John Damascene.

JOHN B. O'CONNOR

Bl. John de Britto

Blessed John de Britto

Martyr; born in Lisbon, 1 March, 1647, and was brought up in court; martyred in India 11 February, 1693.

Entering the Society of Jesus at fifteen, he obtained as his mission-field Madura in southern India. In September, 1673, he reached Goa. Before taking up his work he spent thirty days in the Exercises of St. Ignatius at Ambalacate near Cranganore. De Britto apparently entered the Kshatriyas, a noble caste. His dress was yellow cotton; he abstained from every kind of animal food and from wine. Setting out early in 1674, he traversed the Ghauts on foot and reached Colei in the Cauvery Delta, where he perfected himself in the language. He journeyed northward at least as far as Madras and Vellore, but Cauvery Delta, Tanjore, Madura, and Marava, between Madura and the sea, were his chief field. In 1684 he was imprisoned in Marava, and, though freed by the king, he was expelled from the country. In 1688 he was sent to Europe as deputy to the triennial Congregation of Procurators. Resisting urgent attempts to keep him in Portugal, and refusing the Archbishopric of Cranganore, he returned in 1691 to the borders of Madura and Marava. Having converted Teriadeven, a Maravese prince, he required him to dismiss all his wives but one. Among them was a niece of the king, who took up her quarrel and began a general persecution. De Britto and others were taken and carried to the capital, Ramnad, the Brahmins clammering for his death. Thence he was led to Oreiour, some thirty miles northward along the coast, where his head was struck off, 11 February, 1693.

He had wrought many conversions during his life, established many stations, and was famous for his miracles before and after his death. He was beatified by Pius IX, 21, August, 1853.

H. WOODS

Bl. John Felton

Blessed John Felton

Martyr, date and place of birth unknown, was executed in St. Paul's Churchyard, London, 8 August, 1570, for having, about eleven o'clock at night on the previous 24 May, affixed a copy of the Bull of St. Pius V excommunicating the queen to the gates of the Bishop of London's palace near St. Paul's. His daughter, Frances Salisbury, says that this exploit actually took place between two and three on the morning of the next

day, on which that year the feast of Corpus Christi happened to fall. The MS. which preserves her narrative contains a blank where the age of her father should be recorded, but she gives us other particulars fully. He was a wealthy gentleman of Norfolk extraction, and lived at Bermondsey Abbey near Southwark. He had married a lady who had been maid of honour to Queen Mary and playmate of Queen Elizabeth, and who was the widow of an auditor of the former queen. He himself "was a man of stature little and of complexion black". Of the copies of the Bull which he had received at Calais he had given one to William Mellowes of Lincoln's Inn, a special friend of his. This copy was discovered on 25 May, and Mellowes on the rack confessed to having received it from him. On 26 May he was arrested and taken to the Tower, where he was thrice racked, though he from the first confessed and gloried in his deed. He was condemned on 4 August and executed four days later. He was cut down alive, and his daughter says that he uttered the holy name of Jesus once or twice when the hangman had his heart in his hand.

JOHN B. WAINWRIGHT

St. John Fisher

St. John Fisher

Cardinal, Bishop of Rochester, and martyr; born at Beverley, Yorkshire, England, 1459 (?1469); died 22 June, 1535. John was the eldest son of Robert Fisher, merchant of Beverley, and Agnes his wife. His early education was probably received in the school attached to the collegiate church in his native town, whence in 1484 he removed to Michaelhouse, Cambridge. He took the degree of B.A. in 1487, proceeded M.A. in 1491, in which year he was elected a fellow of his college, and was made Vicar of Northallerton, Yorkshire. In 1494 he resigned his benefice to become proctor of his university, and three years later was appointed Master of Michaelhouse, about which date he became chaplain and confessor to Margaret Beaufort, Countess of Richmond and Derby, mother of King Henry VII. In 1501 he received the degree of D.D., and was elected Vice-Chancellor of Cambridge University. Under Fisher's guidance, the Lady Margaret founded St. John's and Christ's Colleges at Cambridge, and also the two "Lady Margaret" professorships of divinity at Oxford and Cambridge respectively, Fisher himself being the first occupant of the Cambridge chair.

By Bull dated 14 October, 1504, Fisher was advanced to the Bishopric of Rochester, and in the same year was elected Chancellor of Cambridge University, to which post he was re-elected annually for ten years and then appointed for life. At this date also

he is said to have acted as tutor to Prince Henry, afterwards Henry VIII. As a preacher his reputation was so great that in 1509, when King Henry VII and the Lady Margaret died, Fisher was appointed to preach the funeral oration on both occasions; these sermons are still extant. In 1542 Fisher was nominated as one of the English representatives at the Fifth Council of Lateran, then sitting, but his journey to Rome was postponed, and finally abandoned. Besides his share in the Lady Margaret's foundations, Fisher gave further proof of his genuine zeal for learning by inducing Erasmus to visit Cambridge. The latter indeed (Epist., 6:2) attributes it to Fisher's protection that the study of Greek was allowed to proceed at Cambridge without the active molestation that it encountered at Oxford. He has also been named, though without any real proof, as the true author of the royal treatise against Luther entitled "Assertio septem sacramentorum", published in 1521, which won the title *Fidei Defensor* for Henry VIII. Before this date Fisher had denounced various abuses in the Church, urging the need of disciplinary reforms, and in this year he preached at St. Paul's Cross on the occasion when Luther's books were publicly burned.

When the question of Henry's divorce from Queen Catherine arose, Fisher became the Queen's chief supporter and most trusted counsellor. In this capacity he appeared on the Queen's behalf in the legates' court, where he startled his hearers by the directness of his language and most of all by declaring that, like St. John the Baptist, he was ready to die on behalf of the indissolubility of marriage. This statement was reported to Henry VIII, who was so enraged by it that he himself composed a long Latin address to the legates in answer to the bishop's speech. Fisher's copy of this still exists, with his manuscript annotations in the margin which show how little he feared the royal anger. The removal of the cause to Rome brought Fisher's personal share therein to an end, but the king never forgave him for what he had done. In November, 1529, the "Long Parliament" of Henry's reign began its series of encroachments on the Church. Fisher, as a member of the upper house, at once warned Parliament that such acts could only end in the utter destruction of the Church in England. On this the Commons, through their speaker, complained to the king that the bishop had disparaged Parliament. Dr. Gairdner (*Lollardy and the Reformation*, I, 442) says of this incident "it can hardly be a matter of doubt that this strange remonstrance was prompted by the king himself, and partly for personal uses of his own".

The opportunity was not lost. Henry summoned Fisher before him, demanding an explanation. This being given, Henry declared himself satisfied, leaving it to the Commons to declare that the explanation was inadequate, so that he appeared as a magnanimous sovereign, instead of Fisher's enemy.

A year later (1530) the continued encroachments on the Church moved the Bishops of Rochester, Bath, and Ely to appeal to the Apostolic see. This gave the king his op-

portunity. An edict forbidding such appeals was immediately issued, and the three bishops were arrested. Their imprisonment, however, can have lasted a few months only, for in February, 1531, Convocation met, and Fisher was present. This was the occasion when the clergy were forced, at a cost of 1000,000 pounds, to purchase the king's pardon for having recognized Cardinal Wolsey's authority as legate of the pope; and at the same time to acknowledge Henry as Supreme Head of the Church in England, to which phrase, however, the addition "so far as God's law permits" was made, through Fisher's efforts.

A few days later, several of the bishop's servants were taken ill after eating some porridge served to the household, and two actually died. Popular opinion at the time regarded this as an attempt on the bishop's life, although he himself chanced not to have taken any of the poisoned food. To disarm suspicion, the king not only expressed strong indignation at the crime, but caused a special Act of Parliament to be passed, whereby poisoning was to be accounted high treason, and the person guilty of it boiled to death. This sentence was actually carried out on the culprit, but it did not prevent what seems to have been a second attempt on Fisher's life soon afterwards.

Matters now moved rapidly. In May, 1532, Sir Thomas More resigned the chancellorship, and in June, Fisher preached publicly against the divorce. In August, Warham, Archbishop of Canterbury, died, and Cranmer was at once nominated to the pope as his successor. In January, 1533, Henry secretly went through the form of marriage with Anne Boleyn; Cranmer's consecration took place in March of the same year, and, a week later, Fisher was arrested. It seems fairly clear that the purpose of this arrest was to prevent his opposing the sentence of divorce which Cranmer pronounced in May, or the coronation of Anne Boleyn which followed on 1 June; for Fisher was set at liberty again within a fortnight of the latter event, no charge being made against him. In the autumn of this year (1533), various arrests were made in connexion with the so-called revelations of the Holy Maid of Kent (see BARTON, ELIZABETH), but as Fisher was taken seriously ill in December, proceedings against him were postponed for a time. In March, 1534, however, a special bill of attainder against the Bishop of Rochester and others for complicity in the matter of the Nun of Kent was introduced and passed. By this Fisher was condemned to forfeiture of all his personal estate and to be imprisoned during the king's pleasure. Subsequently a pardon was granted him on payment of a fine of 300 pounds.

In the same session of Parliament was passed the Act of Succession, by which all who should be called upon to do so were compelled to take an oath of succession, acknowledging the issue of Henry and Anne as legitimate heirs to the throne, under pain of being guilty of misprision of treason. Fisher refused the oath and was sent to the Tower of London, 26 April, 1534. Several efforts were made to induce him to

submit, but without effect, and in November he was a second time attained of misprision of treason, his goods being forfeited as from 1 March preceding, and the See of Rochester being declared vacant as from 2 June following. A long letter exists, written from the Tower by the bishop to Thomas Cromwell, which records the severity of his confinement and the sufferings he endured.

In May, 1535, the new pope, Paul III, created Fisher Cardinal Priest of St. Vitalis, his motive being apparently to induce Henry by this mark of esteem to treat the bishop less severely. The effect was precisely the reverse. Henry forbade the cardinal's hat to be brought into England, declaring that he would send the head to Rome instead. In June a special commission for Fisher's trial was issued, and on 17 June he was arraigned in Westminster Hall on a charge of treason, in that he denied the king to be supreme head of the Church. Since he had been deprived of his bishopric by the Act of Attainder, he was treated as a commoner, and tried by jury. He was declared guilty, and condemned to be hanged, drawn, and quartered at Tyburn, but the mode of execution was changed, and instead he was beheaded on Tower Hill. The martyr's last moments were thoroughly in keeping with his previous life.

He met death with a calm dignified courage which profoundly impressed all present. His headless body was stripped and left on the scaffold till evening, when it was thrown naked into a grave in the churchyard of Allhallows, Barking. Thence it was removed a fortnight later and laid beside that of Sir Thomas More in the church of St. Peter ad Vincula by the Tower. His head was stuck upon a pole on London Bridge, but its ruddy and lifelike appearance excited so much attention that, after a fortnight, it was thrown into the Thames, its place being taken by that of Sir Thomas More, whose martyrdom occurred on 6 July next following.

Several portraits of Fisher exist, the best being by Holbein in the royal collection; and a few secondary relics are extant. In the Decree of 29 December, 1886, when fifty-four of the English martyrs were beatified by Leo XIII, the best place of all is given to John Fisher. [He was canonized in 1935 by Pope Pius XI -- *Ed.*]. A list of Fisher's writings will be found in Gillow, "Bibliographical Dictionary of the English Catholics" (London, s.d.), II, 262-270. There are twenty-six works in all, printed and manuscript, mostly ascetical or controversial treatises, several of which have been reprinted many times. The original editions are very rare and valuable. The principal are:

- "Treatise concernynge...the seven penytencyall Psalms" (London, 1508);
- "Sermon...agayn ye pernycious doctrin of Martin Luther" (London, 1521);
- "Defensio Henrici VIII" (Cologne, 1525);

- "De Veritate Corporis et Sanguinis Christi in Eucharistia, adversus Johannem Oecolampadium" (Cologne, 1527);
- "De Causa Matrimonii...Henrici VIII cum Catharina Aragonensi" (Alcalá de Henares, 1530);
- "The Wayes to Perfect Religion" (London, 1535);
- "A Spirituall Consolation written...to hys sister Elizabeth" (London, 1735).

G. ROGER HUDLESTON

Bl. John Forest

Blessed John Forest

Born in 1471, presumably at Oxford, where his surname was then not unknown; suffered 22 May, 1538. At the age of twenty he received the habit of St. Francis at Greenwich, in the church of the Friars Minor of the Regular Observance, called for brevity's sake "Observants". Nine years later we find him at Oxford, studying theology. He is commonly styled "Doctor" though, beyond the steps which he took to qualify as bachelor of divinity, no positive proof of his further progress has been found. Afterwards he became one of Queen Catherine's chaplains, and was appointed her confessor. In 1525 he appears to have been provincial, which seems certain from the fact that he threatened with excommunication the brethren who opposed Cardinal Wolsey's legatine powers. Already in 1531 the Observants had incurred the king's displeasure by their determined opposition to the divorce; and no wonder that Father Forest was soon singled out as an object of wrath. In November, 1532, we find the holy man discoursing at Paul's Cross on the decay of the realm and pulling down of churches. At the beginning of February, 1533 an attempt at reconciliation was made between him and Henry: but a couple of months later he left the neighbourhood of London, where he was no longer safe. He was probably already in Newgate prison 1534, when Father Peto his famous sermon before the king at Greenwich. In his confinement Father Forest corresponded with the queen and Blessed Thomas Abel and wrote a book or treatise against Henry, which began with the text: "Neither doth any man take the honour to himself, but he that is called by God as Aaron was.

On 8 April, 1538, the holy friar was taken to Lambeth, where, before Cranmer, he was required to make an act of abjuration. This, however, he firmly refused to do; and it was then decided that the sentence of death should be carried out. On 22 May following he was taken to Smithfield to be burned. The statue of "Darvell Gatheren" which

had been brought from the church of Llanderfel in Wales, was thrown on the pile of firewood; and thus, according to popular belief, was fulfilled an old prophecy, that this holy image would set a forest on fire. The holy man's martyrdom lasted two hours, at the end of which the executioners threw him, together with the gibbet on which he hung, into the fire. Father Forest, together with fifty-three other English martyrs, was declared Blessed by Pope Leo XIII, on 9 December, 1886, and his feast is kept by the Friars Minor on 22 May. Some years ago rumour was current that the relics of the martyr had been taken to Spain, and were preserved at a residence of the Friars Minor somewhere in the north of that country. In 1904 the writer of this article made inquiries, to which the Provincial of Cantabria replied that the fathers there were not aware of the existence of the holy relics in any part of Spain, and that they thought the rumour was unfounded. It seems therefore most probable that the mortal remains of Father Forest still lie hidden at Smithfield, near the corner of St. Bartholomew's Hospital, opposite the gate of the ancient priory.

FATHER THADDEUS

St. John Francis Regis

St. John Francis Regis

Born 31 January, 1597, in the village of Fontcouverte (department of Aude); died at la Louvesc, 30 Dec., 1640. His father Jean, a rich merchant, had been recently ennobled in recognition of the prominent part he had taken in the Wars of the League; his mother, Marguerite de Cugunhan, belonged by birth to the landed nobility of that part of Languedoc. They watched with Christian solicitude over the early education of their son, whose sole fear was lest he should displease his parents or his tutors. The slightest harsh word rendered him inconsolable, and quite paralyzed his youthful faculties. When he reached the age of fourteen, he was sent to continue his studies in the Jesuit college at Béziers. His conduct was exemplary and he was much given to practices of devotion, while his good humour, frankness, and eagerness to oblige everybody soon won for him the good-will of his comrades. But Francis did not love the world, and even during the vacations lived in retirement, occupied in study and prayer. On one occasion only he allowed himself the diversions of the chase. At the end of his five years' study of the humanities, grace and his ascetic inclinations led him to embrace the religious life under the standard of St. Ignatius Loyola. He entered the Jesuit

novitiate of Toulouse on 8 December, 1616, the Feast of the Immaculate Conception of Mary. Here he was distinguished for an extreme fervour, which never afterwards flagged, neither at Cahors, where he studied rhetoric for a year (Oct., 1618-Oct., 1619), nor during the six years in which he taught grammar at the colleges of Billom (1619-22), of Puy-en-Velay (1625-27), and of Auch (1627-28), nor during the three years in which he studied philosophy in the scholasticate at Tournon (Oct., 1622-Oct., 1625). During this time, although he was filling the laborious office of regent, he made his first attempts as a preacher. On feast-days he loved to visit the towns and villages of the neighbourhood, and there give an informal instruction, which never failed--as attested by those who heard him--to produce a profound impression on those present.

As he burned with the desire to devote himself entirely to the salvation of his neighbour, he aspired with all his heart to the priesthood. In this spirit he began in October, 1628, his theological studies. The four years he was supposed to devote to them seemed to him so very long that he finally begged his superiors to shorten the term. This request was granted, and in consequence Francis said his first Mass on Trinity Sunday, 15 June, 1631; but on the other hand, in conformity with the statutes of his order, which require the full course of study, he was not admitted to the solemn profession of the four vows. The plague was at that time raging in Toulouse. The new priest hastened to lavish on the unfortunate victims the first-fruits of his apostolate. In the beginning of 1632, after having reconciled family differences at Fontcouverte, his birthplace, and having resumed for some weeks a class in grammar at Pamiers, he was definitively set to work by his superiors at the hard labour of the missions. This became the work of the last ten years of his life. It is impossible to enumerate the cities and localities which were the scene of his zeal. On this subject the reader must consult his modern biographer, Father de Curley, who has succeeded best in reconstructing the itinerary of the holy man. We need only mention that from May, 1632, to Sept., 1634, his head-quarters were at the Jesuit college of Montpellier, and here he laboured for the conversion of the Huguenots, visiting the hospitals, assisting the needy, withdrawing from vice wayward girls and women, and preaching Catholic doctrine with tireless zeal to children and the poor. Later (1633-40) he evangelized more than fifty districts in le Vivarais, le Forez, and le Velay. He displayed everywhere the same spirit, the same intrepidity, which were rewarded by the most striking conversions. "Everybody", wrote the rector of Montpellier to the general of the Jesuits, "agrees that Father Regis has a marvellous talent for the Missions" (Daubenton, "La vie du B. Jean-François Régis", ed. 1716, p. 73). But not everyone appreciated the transports of his zeal. He was reproached in certain quarters with being impetuous and meddlesome, with troubling the peace of families by an indiscreet charity, with preaching not evangelical sermons, but satires and invectives which converted no one. Some priests, who felt

their own manner of life rebuked, determined to ruin him, and therefore denounced him to the Bishop of Viviers. They had laid their plot with such perfidy and cunning that the bishop permitted himself to be prejudiced for a time. But it was only a passing cloud. The influence of the best people on the one hand, and on the other the patience and humility of the saint, soon succeeded in confounding the calumny and caused the discreet and enlightened ardour of Regis to shine forth with renewed splendour (Daubenton, loc. cit., 67- 73). Less moderate indeed was his love of mortification, which he practiced with extreme rigour on all occasions, without ruffling in the least his evenness of temper. As he returned to the house one evening after a hard day's toil, one of his confrères laughingly asked: "Well, Father Regis, speaking candidly, are you not very tired?" "No", he replied, "I am as fresh as a rose." He then took only a bowl of milk and a little fruit, which usually constituted both his dinner and supper, and finally, after long hours of prayer, lay down on the floor of his room, the only bed he knew. He desired ardently to go to Canada, which at that time was one of the missions of the Society of Jesus where one ran the greatest risks. Having been refused, he finally sought and obtained from the general permission to spend six months of the year, and those the terrible months of winter, on the missions of the society. The remainder of the time he devoted to the most thankless labour in the cities, especially to the rescue of public women, whom he helped to persevere after their conversion by opening refuges for them, where they found honest means of livelihood. This most delicate of tasks absorbed a great part of his time and caused him many annoyances, but his strength of soul was above the dangers which he ran. Dissolute men often presented a pistol at him or held a dagger to his throat. He did not even change colour, and the brightness of his countenance, his fearlessness, and the power of his words caused them to drop the weapons from their hands. He was more sensitive to that opposition which occasionally proceeded from those who should have seconded his courage. His work among penitents urged his zeal to enormous undertakings. His superiors, as his first biographers candidly state, did not always share his optimism, or rather his unshaken faith in Providence, and it sometimes happened that they were alarmed at his charitable projects and manifested to him their disapproval. This was the cross which caused the saint the greatest suffering, but it was sufficient for him that obedience spoke: he silenced all the murmurs of human nature, and abandoned his most cherished designs. Seventy-two years after his death a French ecclesiastic, who believed he had a grievance against the Jesuits, circulated the legend that towards the end of his life St. John Francis Regis had been expelled from the Society of Jesus. Many different accounts were given, but finally the enemies of the Jesuits settled on the version that the letter of the general announcing to John his dismissal was sent from Rome, but that it was late in reaching its destination, only arriving some days after the death of the saint. This calumny will

not stand the slightest examination. (For its refutation see de Curley, "St. Jean-François Régis", 336-51; more briefly and completely in "Analecta Bollandiana", XIII, 78-9.) It was in the depth of winter, at la Louvesc, a poor hamlet of the mountains of Ardèche, after having spent with heroic courage the little strength that he had left, and while he was contemplating the conversion of the Cévennes, that the saint's death occurred, on 30 December, 1640. There was no delay in ordering canonical investigations. On 18 May, 1716, the decree of beatification was issued by Clement XI. On 5 April, 1737, Clement XII promulgated the decree of canonization. Benedict XIV established the feast-day for 16 June. But immediately after his death Régis was venerated as a saint. Pilgrims came in crowds to his tomb, and since then the concourse has only grown. Mention must be made of the fact that a visit made in 1804 to the blessed remains of the Apostle of Vivarais was the beginning of the vocation of the Blessed Curé of Ars, Jean-Baptiste Vianney, whom the Church has raised in his turn to her altars. "Everything good that I have done", he said when dying, "I owe to him" (de Curley, op. cit., 371). The place where Régis died has been transformed into a mortuary chapel. Near by is a spring of fresh water to which those who are devoted to St. John Francis Régis attribute miraculous cures through his intercession. The old church of la Louvesc has received (1888) the title and privileges of a basilica. On this sacred site was founded in the beginning of the nineteenth century the Institute of the Sisters of St. Régis, or Sisters of Retreat, better known under the name of the Religious of the Cenacle; and it was the memory of his merciful zeal in behalf of so many unfortunate fallen women that gave rise to the now flourishing work of St. Francis Régis, which is to provide for the poor and working people who wish to marry, and which is chiefly concerned with bringing illegitimate unions into conformity with Divine and human laws.

Besides the biographies mentioned in CARAYON, *Bibliographic historique de la Compagnie de Jésus*, nn. 2442-84, must be mentioned the more recent lives: DE CURLEY, *St. Jean-François Régis* (Lyons, 1893), which, together with DAUBENTON'S work--often reprinted--is the most complete history of Régis; CROS, *Saint Jean-François Régis* (Toulouse, 1894), in which the new portion consists of unedited papers regarding the saint's family. Among the early biographers LABRONE, a pupil of the saint, occupies an unparalleled place for the charm, the sincerity, and the documentary value of the relation. His book appeared in 1690, ten years after the death of the saint.

FRANCIS VAN ORTROY

Blessed John Houghton

Blessed John Houghton

Protomartyr of the persecution under Henry VIII, b. in Essex, 1487; d. at Tyburn, 4 May, 1535. He was educated at Cambridge, graduating LL.B. about 1497, and later LL.D. and D.D.; he was ordained priest in 1501 and entered the Carthusian novitiate at the London Charterhouse in 1505, where he was professed in 1516. He filled the office of sacristan, 1523-28; of procurator, 1528-31; of prior of Beauvale, Nottinghamshire, from June to November, 1531; of prior of the London Charterhouse, 1531-35; and of provincial visitor, 1532-35. He was imprisoned in the Tower for about a month, with the procurator, Blessed Humphrey Middlemore, for refusing to swear that the king's marriage with Queen Catharine was invalid, but took the oath of succession under the condition *quatenus licitum esset*, with some of his monks, 29 May, 1534, the others being sworn 6 June. On or about 13 April, 1535, he was committed again to the Tower for refusing the oath of supremacy. With him were sent Blessed Robert Laurence, who had succeeded him as prior of Beauvale, and had previously been chaplain to the Duke of Norfolk and then a monk of the London Charterhouse; and Blessed Augustine Webster, prior of Axholme, Lincolnshire, formerly a monk of Sheen. These priors, who were on a visit to the London Charterhouse, had not had the oath tendered to them, but were brought before the Rolls for that purpose on 20 April, and, on refusing it, were sent back to the Tower. There they were joined by Blessed Richard Reynolds, a Brigittine of Syon, born about 1492, educated at Christ's and Corpus Christi colleges, Cambridge, Fellow of Corpus Christi, 1510, B.D. 1513, subsequently D.D. He became a Brigittine in 1513, and was considered one of the foremost scholars of his day. All four were indicted 28 April, 1535, under 26 Henry VIII, c. 1, for refusing the oath of supremacy. The jury at first refused to find them guilty, but were intimidated by Cromwell into doing so the next day. All were hanged in their habits without being previously degraded, and all were disembowelled while fully conscious, Houghton being the first to suffer and Reynolds the last.

With them died a secular priest, Blessed John Hale, LL.B., Fellow of King's Hall, Cambridge, and Vicar of Isleworth, Middlesex, since 13 August, 1521. He took this living in exchange for the Rectory of Cranford, Middlesex, which he had held since 11 September, 1505. There is nothing to identify him with the Rector of Chelmsford of 1492. He may possibly be the person of this name who became scholar of Eton in 1485. He was indicted 20 April, 1535, with the perpetual curate of Teddington, Middlesex, named Robert Feron, for offenses against 25 Henry VIII, c. 22. Both pleaded guilty and were condemned; but Feron was pardoned. Hale was the fourth to suffer.

JOHN B. WAINEWRIGHT

St. John Joseph of the Cross

St. John Joseph of the Cross

Born on the Island of Ischia, Southern Italy, 1654; d. 5 March, 1739. From his earliest years he was given to prayer and virtue. So great was his love of poverty that he would always wear the dress of the poor, though he was of noble birth. At the age of sixteen years he entered the Order of St. Francis at Naples, amongst the Friars of the Alcantarine Reform, being the first Italian to join this reform which had been instituted in Spain by St. Peter of Alcantara. Throughout his life he was given to the greatest austerity: he fasted constantly, never drank wine, and slept but three hours each night. In 1674 he was sent to found a friary at Afilia, in Piedmont; and he assisted with his own hands in the building. Much against his will, he was raised to the priesthood. As superior, he always insisted upon performing the lowliest offices in the community. In 1702 he was appointed Vicar Provincial of the Alcantarine Reform in Italy. He was favoured in a high degree with the gift of miracles, people of every condition being brought to him in sickness. His zeal for souls was such that even in sickness he would not spare any labour for them. His great devotion was to our Blessed Lady, and he was urgent with his penitents that they also should cultivate this. He was beatified in 1789, and canonized in 1839.

Compendium Vitae. . . B. Joannis Josephi a Cruce (Rome, 1839); *Vita di S. Gian Giuseppe della Croce*, dal P. Diodata dell' Assunta (Rome, 1839); MANNING, *Lives of the Saints and Blessed of the Three Orders of St. Francis* (London, 1886).

FATHER CUTHBERT

Bl. John Larke

Bl. John Larke

English martyr; died at Tyburn, 7 March, 1543-4. He was rector of St. Ethelburga's Bishopsgate, London, from 30 January, 1504-5, till his resignation in 1542; rector of Woodford, Essex, 18 January, 1526-7, till his resignation in the following April; and rector of Chelsea (on the presentation of Bl. Thomas More, [Tr. note: Thomas More was subsequently canonized] then lord chancellor, whose parish priest and personal friend he became) from 29 March, 1530, till his attainder. Cresacre More styles him doctor, but it is not known in what faculty he obtained this degree. He was indicted 15 February, 1543-44, with another priest and two laymen. The priest was Ven. John Ireland, of whom nothing is known, save that, having been chaplain of the Roper chantry annexed to St. Dunstan's, Canterbury, for a year (1535-36), he became vicar of Eltham, Kent, and, as such, parish priest to Bl. Thomas More's son-in-law, William Roper of Well Hall. Of the laymen the more prominent is Bl. German Gardiner, a kinsman (probably either cousin or nephew) to Stephen Gardiner, Bishop of Winchester, whose secretary he was. Educated at Cambridge, probably at Trinity Hall, he wrote against John Frith in 1534, and gave evidence against Cranmer in 1543. He resided at Southwark. The other layman was John Heywood, or Hayward, of London. All were condemned, but Heywood recanted on the hurdle, and made his recantation public at Paul's Cross on 6 July following. The other three suffered together, in the company of Robert Singleton, a priest, the cause of whose execution is uncertain, and their heads and quarters were buried under the gallows.

JOHN B. WAINEWRIGHT

John Malalas

John Malalas

A Monophysite Byzantine chronicler of the sixth century, born at Antioch where he spent most if not the whole of his life. His surname Malalas, from the Syriac malâlâ, "the rhetor", points to a Syrian origin. John Malalas was a contemporary of Emperors

Anastasius I, Justin I, Justinian I, and Justin II. His "Chronographia" if, for which he is famous, was originally but a chronicle of the city of Antioch, expanded later by the author himself into a general history of the world up to the last years of Justinian (d. 565). It is divided into eighteen books, the last of which, however, originally a chronicle of Constantinople, cannot be ascribed to John Malalas, being evidently the work of an orthodox writer. Giving up the Hellenic and Byzantine traditions John Malalas struck a new path in historiography, and created the type of the Byzantine chronicle. He wrote not for the cultured public but for the bulk of the lay-men and monks, seeking to gratify their naive curiosity in matters of history and narrating such facts only and in such manner as could interest the people. The "Chronographia" is uncritical and teems with legends, anachronisms, repetitions, and inconsistencies, and its style and language are in keeping with the nature of the concept of history it exhibits; it is the earliest important monument of low Greek. In spite of the many authors he so ostentatiously names, it is highly probable that, beyond the archives of the city of Antioch and the current ecclesiastical and civil calendars, John Malalas had but very few reliable written sources. If he used at all Julius Africanus, it must have been through the now lost chronicles of Nestorianus, Pausanias, Domninus, Theophilus, and Timotheus whom he frequently cites. John Malalas enjoyed great authority with subsequent generations of Byzantine chroniclers who quote him quite freely and often worked whole books of his "Chronographia" into their own compositions. Such is the case with John of Ephesus and through him Bar-Hebraeus (two Syrian writers) the church historian Evagrius, the author of the "Tusculan Fragments", John of Antioch, and especially the author of the "Chronicon Paschale", John of Nikiu, the author of the "Chronicon Palatinum", Theophanes, George the Monk, Cedrenus, the author of the "Excerpta Constantiniana" and the authors of several similar compilations. John Malalas's work had the honour of a Slavonic translation (now lost) from which it passed into several Slavonic chronicles; it was also translated into Georgian. It is from those various sources that it was reconstructed, for strange to say for such a popular work, independently of the above-named writings it has been preserved only in a single manuscript (Baroccianus, 128, c. 12, Oxford, Bodleian Library; mutilated at both ends) and that in the shape of an epitome. The "Chronographia" was first edited by Edm. Chilmead (Oxford, 1691), with a Latin translation and a commentary by the editor, a treatise of H. Hody, and a letter from R. Bentley to J. Mill. A new critical and complete up-to-date edition is highly desirable.

H. HYVERNAT

Blessed John Nelson

Blessed John Nelson

English Jesuit martyr, b. at Skelton, four miles from York, in 1534; d. at Tyburn, 3 February, 1577-78. He went to Douay in 1573, and two of his four brothers followed his example and became priests. He was ordained priest at Binche, in Hainault, by Mgr Louis de Berlaymont, Archbishop of Cambrai, 11 June, 1576. He was sent on the mission on 7 November following, and appears to have laboured in London. His apprehension took place 1 December, 1577, "late in the evening as he was saying the Nocturne of the Matins for the next day following", and he was committed to Newgate as a suspected Papist. His arrest and its issue had been foretold by a demon he had exercised a week before. The High Commissioners in a few days by cross-examination induced him to say that the queen was a schismatic. This constituted high treason under the legislation of 1571. He was providentially enabled to say Mass in Newgate, 30 January, 1577-8, and two days later he was brought to the bar and condemned. Thenceforward he was confined "in a most filthy underground dungeon", doubtless the Pit of the Tower, preparing by prayer and fasting for his end. He was cut down alive, and his last words, when the hangman plucked out his heart, are reported to have been: "I forgive the queen and all the authors of my death." The date and place of his admission to the Society of Jesus are unknown.

JOHN B. WAINWRIGHT

St. John Nepomucene

St. John Nepomucene

Born at Nepomuk about 1340; died 20 March, 1393. The controversy concerning the identity of John of Pomuk or Nepomuk (a small town in the district of Pilsen, Bohemia), started in the eighteenth century, is not yet decided. The principal question at issue is whether there was only one John of Nepomuk, or whether two persons of that name lived in Prague in the second half of the fourteenth century and met with precisely the same fate. This inquiry leads naturally to the further question, as to the true cause of John's violent death. In a controversy of this character it is of primary importance to set down clearly the information given in the original sources. Extant

documents, ecclesiastical records, and contemporaneous accounts of the second half of the fourteenth century relate in unmistakable fashion that in 1393 a certain John of Nepomuk was Vicar-General of the Archdiocese of Prague, and that on 20 March of the same year by command of King Wenceslaus IV of Bohemia he was thrown into the Moldau and drowned. This John was the son of Welflin (or Wölflin), a burger of Pomuk (Nepomuk), and studied theology and jurisprudence at the University of Prague. In 1373 he took orders and became public notary in the archiepiscopal chancery, and in 1374 was made prothonotary and first secretary of Archbishop John of Jenzenstein (Jenstein). In 1389 he received the parish of St. Gallus in Prague, and, continuing meanwhile his studies of jurisprudence at the university, was promoted in 1387 to the doctorate of canon law. He was also a canon in the church of St. Ægidius in Prague, and became in 1389 canon of the cathedral in Wyschehrad. In 1390 he gave up the parish of St. Gallus to become Archdeacon of Sasz, and at the same time canon of the Cathedral of St. Vitus, without receiving however any cathedral benefice. Shortly afterwards the archbishop named him president of the ecclesiastical court, and in 1393 his vicar-general. King Wenceslaus IV of Bohemia, wishing to found a new bishopric for one of his favourites, ordered that at the death of Abbot Rarek of Kladrau no new abbot should be elected, and that the abbey church should be turned into a cathedral. The archbishop's vicar-general, however, interposed energetically on this occasion in defence of canon law. When Abbot Rarek died in 1393, the monks of Kladrau immediately held a new election, the choice falling on the monk Odelenus, and John, as vicar-general, promptly confirmed this election without referring to the wishes of the king. Upon hearing this Wenceslaus fell into a violent rage, and had the vicar-general, the cathedral official, Provost Wenceslaus of Meissen, the archbishop's steward, and later the dean of the cathedral thrown into prison. The first four were even tortured on 4 March, but, although the others were thus brought to acquiesce in the wishes of the king and the official even proposed everlasting secrecy concerning all that had occurred, John of Nepomuk resisted to the last. He was made to undergo all manner of torture, including the burning of his sides with torches, but even this could not move him. Finally, the king ordered him to be put in chains, to be led through the city with a block of wood in his mouth, and to be thrown from the Karlsbrücke into the river Moldau. This cruel order was executed on 20 March, 1393.

We possess four contemporaneous accounts concerning these proceedings. First of all, the extant bill of indictment against the king, presented to Benedict IX by Archbishop John of Jenzenstein, who went to Rome with the new Abbot of Kladrau on 23 April, 1393 (Pubitschka, *Gesch.*, IV, app.; ed. Pelzel, "Geschichte König Wenzels", I: "Urkundenbuch", 143-63). Some years later Abbot Ladolf of Sagan gives an account of it in a somewhat abbreviated form in the catalogue of the Abbots of Sagan completed

in 1398 (ed. Stenzel in "Script. rerum Silesiacarum", I, 1835, pp. 213 sqq.), as well as in the treatise "De longævo schismate", lib. VII, c. xix (Archiv für österreichische Geschichte, LX, 1880, pp. 418 sq.). A fourth reference is to be found in the "Chronik des Deutschordens", a chronicle of the Teutonic Knights which was compiled by John of Posilge who died in 1405 ("Scriptores rerum Prussicarum", III, Leipzig, 1860–, 87). For the discussion of the question it is important to remark that Archbishop John of Jenzenstein in his above-mentioned indictment (art. 26) calls John of Nepomuk "martyr sanctus", and that, in the biography of John of Jenzenstein by his chaplain, John of Nepomuk is described as "gloriosum Christi martyrem miraculisque coruscum". It is thus clear that his contemporaries had already begun to honour as a martyr and a saint the vicar-general put to death by the cruel and licentious tyrant for his defence of the law of the Church. The body of John of Nepomuk was drawn out of the Moldau and entombed in the cathedral of Prague, where in fact, as is proved by later documents, his grave was honoured.

In his "Chronica regum Romanorum", finished in 1459, Thomas Ebendorfer (d. 1464) relates that King Wenceslaus had Magister John, the father confessor of his wife, drowned in the Moldau, not only because he had said that "only he who rules well is worthy of the name of king", but also because he had refused to violate the seal of the confessional. The refusal to violate the seal of the confessional is here for the first time given as the reason for John's violent death. The chronicler, who speaks of only the one John drowned by order of King Wenceslaus, evidently refers to the John of Pomuk put to death in 1393. In the other chronicles written in the second half of the fifteenth century, we find the reason regularly assigned for the execution of John, that he had refused to tell the king what the queen had confessed to him.

Paul Zidek's "Instructions for the King" (sc. George of Podiebrad), completed in 1471, contains still more details (cf. Schmude in "Zeitschrift für kathol. Theologie", 1883, 90 sqq.). He says that King Wenceslaus suspected his wife, who was accustomed to confess to Magister John, and called upon the latter to declare the name of her paramour. On John's refusal to say anything, the king ordered him to be drowned. In this old account we do not find the name of the queen or any date assigned to this occurrence; a little later the year 1383 is given, when Wenceslaus's first wife, Johanna (d. 1389), still lived.

In his "Annales Bohemorum" ("Kronika česká", first printed in Bohemian, Prague, 1541; translated into Latin and published by Gel. Dobner in 6 vols., Prague, 1761-83) the Bohemian historian, Hajek von Liboczan (d. 1553), in view of these varying accounts, is the first to speak of two Johns of Nepomuk, who were put to death by order of King Wenceslaus: one, the queen's confessor, and martyred for refusing to violate the secret of the confessional, having been thrown into the Moldau in 1383; the other,

auxiliary Bishop of Prague, drowned in 1393 because he confirmed the election of the monk Albert as Abbot of Kladrau. The later historians of the sixteenth and seventeenth centuries give more or less legendary details of the universally accepted martyrdom of John, because he refused to violate the secret of the confessional. Bohuslav Balbinus, S.J., in his "Vita b. Joannis Nepomuceni martyris" (Prague, 1670; "Acta SS.", III, May, 668-80) gives the most complete account. He relates with many details how on 16 May, 1383 (this date is already found in old accounts), John of Nepomuk, because he steadily refused to betray the confession of Queen Johanna to King Wenceslaus, was by order of the latter thrown into the Moldau and drowned. From the year 1675 the cathedral chapter of Prague repeatedly petitioned Rome for the canonization of Blessed John of Nepomuk, who enjoyed special veneration in Bohemia. In the years 1715-20 evidence was gathered and the cause examined; in 1721 followed the beatification, and in 1729 the canonization. The acts of the canonization are based on the statements, according to which John died on 16 May, 1383, a martyr to the secrecy of the confessional. But ever since 1777, when the Augustinian Hermit, Athanasius a Sancto Josepho, sought to prove by the testimony of Archbishop Jenzenstein's written accusation, which did not become known till 1752, that John of Pomuk was put to death by Wenceslaus in 1393 for the reason given above, the controversy has never ceased.

We still find defenders of the opinion advanced by Hajek, that there are two Johns of Pomuk. Most modern historians, however, are probably correct in regarding the vicar-general murdered in 1393 as the only historical personage. A few of these, however, do not look upon the confirmation of the election of the Abbot of Kladrau as the true reason for John's murder; they hold that Wenceslaus IV was already exasperated against John, because he would not violate the secret of the queen's confession, and took this opportunity for revenge. These details can in no way affect the validity of the canonization of the vicar-general, who had been recognized as a martyr immediately after his death. Consequently, when Protestant historians, as Abel, assert that the veneration of St. John Nepomucene was first introduced by the Jesuits to banish the cult of John Hus from Bohemia, their contention is both unhistorical and without justification: the veneration of John of Nepomuk was widespread long before the Jesuits ever existed. St. John Nepomucene is patron saint of Bohemia. When in 1719 his grave in the Prague cathedral was opened, his tongue was found to be uncorrupted though shrivelled. His feast is celebrated on 16 May.

J.P. KIRSCH

John of Antioch

John of Antioch

There are four persons commonly known by this name.

I. John, Patriarch of Antioch (428-41) at the time of the Council of Ephesus. He was a friend and had been a fellow-student of Nestorius. When the trouble about the word *theotokos* began, he wrote and warned Nestorius not to make a disturbance, showing that this title of the Blessed Virgin had been constantly used, by orthodox Fathers. Later, Nestorius wrote to him enclosing Cyril of Alexandria's twelve anathemas and some of his own sermons, and defending himself. John then decided for his friend against his natural rival, "the Egyptian". He was summoned to Ephesus by the emperor in November, 430, with all the other bishops. But when the council was opened in June, 431, he had not come. The Fathers waited for him some time; then two of his metropolitans (those of Apamea and Hierapolis) declared in his name that the council was to begin without him. It was thought that he did not wish to be present at the condemnation of the friend, so the first session was held in his absence. Six days later John arrived with a great number of his bishops, refused all invitations to take part in the council, and opened at his own lodging a rival synod, which defended Nestorius and condemned Cyril. This rival assembly (in which the emperor's commissioner, Candidian, took part) caused the great trouble at Ephesus (see EPHEBUS, COUNCIL OF). From this time John took the side of Nestorius, declared his deposition unjust, refused to acknowledge the new Bishop of Constantinople, Maximian, and was in schism with Alexandria and Rome. Later, he held a synod at Antioch, in which he anathematized Cyril and all his partisans. Eventually, however, he was reconciled. Emperor Theodosius II (408-50) sent a tribune, Aristolas, to Antioch and then to Alexandria to make peace. John was persuaded to send one of his bishops, Paul of Emsa, to Alexandria with an orthodox profession of faith in 433. Cyril accepted Paul's message

and allowed him to preach at Alexandria. After a few more disputes about minor points, John, in April, 433, signed a formula, prepared by Cyril, condemning Nestorius; so that Cyril was able to write to Pope Pope Sixtus III (432-40) that peace was restored between the two Eastern patriarchates. The result of this was that many bishops in Syria declared that John had fallen away from the Faith, and broke communion with him. Towards these bishops (the first founders of the Nestorian Church in East Syria) John used a policy of moderation and concession, as far as was possible without sacrificing the Faith of Ephesus, from which he did not again swerve. On the other hand there were Catholics, such as the deacon Maximus, who thought that the patriarch was too conciliatory to the heretics, and who threatened to make a schism on their side too. Cyril wrote to warn these zealots not to cause further complications, and loyally helped John to reconcile the Nestorian party by his letters. John did not again tamper with Nestorianism. When a definite Nestorian schism organized itself at Edessa, it was by renouncing the obedience of Antioch. John even invoked the civil power to put an end to the schism, and so began the persecution of the Nestorians that ended an their escaping across the frontier to Persia. John died unimpeachably orthodox in 441. (For all this see EPHESUS, COUNCIL OF, and NESTORIANISM.) Four letters of this John of Antioch are extant (Mansi, "Conc. Coll.", V, 813-14; cf. P.G., LXXVII, 1449-58).

II. John of Antioch, chronicler in the seventh century. He was a monk, apparently contemporary with Emperor Heraclius (610-41). He composed a chronicle (*Historia chronike*) from Adam to the death of Phokas (610), using for this purpose Sextus Julius Africanus, Eusebius, Ammianus Marcellinus, and other standard authorities. It is one of the many adaptations and imitations of the better known chronicle of John Malalas. Only fragments of it remain. Gelzer (Sextus Julius Africanus 41) identifies the author with the Monophysite Patriarch John of Antioch, who ruled from 630 to 648. The fragments of the chronicle are contained in two collections, the Codex Parisinus, 1763, written Salmasius and the encyclopedia of history made by order of Constantine VII, Porphyrogenitus (912-59), in fifty-three chapters, or titles with different headings. Of this collection of excerpts only parts remain (Krumbacher, "Byz. Litt.", 258-60). Two titles: "Of Virtue and Vice" and "Of Conspiracies against Emperors" contain the literary remains of John of Antioch. A difficulty arises from the fact that a great part of the extracts (from the Roman Commonwealth of Justin I) differs considerably from the corresponding quotations in the Salmasian collection. The Constantinian passages are of the nature old the old Hellenic writing of history, the Salmasian ones are rather Byzantine and Christian. The Salmasian compilation is older, and so appears to be the original text; the other is no doubt a re-arrangement made under the influence of the

Hellenic Renaissance since Photius. But some authorities see in them two different originals and speak of a "Constantinian" and a "Salmasian" John of Antioch.

The Salmasian excerpts are edited by Cramer, "Anecdota Graeca e cod. mss. regiae Parisiensis", II, Oxford 1839, 383-401. Both series of fragments are in C. Muller, "Fragmenta Historicorum Graecorum", IV Paris, 1883, 535-622; V, 27-8.

III. John Scholasticus of Antioch, the canonist, afterwards Patriarch of Constantinople (565-77). (See JOHN SCHOLASTICUS.)

IV. John of Antioch, Orthodox patriarch at the time of Alexius I Comnenus (1081-1118), formerly a monk in Oxia one of the Echinades Islands in the Ionian Sea. He was a reformer of monasticism and a deserving ascetic writer. Towards the end of the tenth century a custom grew up in the East of bequeathing property to a monastery on condition that some prominent layman should be its patron or guardian (*ephoros*). The monastery then owed something like feudal service to its protector. Such benefices were called *charistikaria*. The result was that frequently the lay "ephoros" misused the property of the monastery for his own enrichment. Against this abuse John wrote a work "Of the (true) Teaching concerning Monasteries" (*peri monastikes didaskalias*), in which he shows its evils in a tone of dignified indignation. Theodore Balsamon in the twelfth century refers to this work in his commentary on the "Nomocanon". John also wrote a work of anti-Latin controversy, "Of Azymes", that is still unedited. Leo Allatius quotes a passage from a letter from John of Antioch to Theodore of Ephesus ("De aetate et interstitiis in collatione ordinum etiam apud Graecos servandis", Rome, 1638, 215). The work about monasteries is in P.G., CXXXII, 1117-49.

II. GELZER, Sextus Julius Africanus (Leipzig 1898); IDEM in *Byzantinische Zeitschrift* (1894), 394; KOCHER, *De Joannis Antiocheni fontium auctoritate* (Bonn 1871); KRUMBACHER, *Byzantinische Litteraturgeschichte* (Munich, 1897), 334-36. For his identification with the Monophysite patriarch, see GELZER, *Die politische and kirchliche Stellung und Byzans* (Proceeding of the thirty-third congress of German philologists at Gera) (Leipzig, 1879), 47 sq.

IV. KRUMBSCHER, *Byzantinische Litteraturgeschichte* (Munich, 1897), 156.

ADRIAN FORTESCUE

Bl. John of Avila

Bl. John of Avila

Apostolic preacher of Andalusia and author, b. at Almodóvar del Campo, a small town in the diocese of Toledo, Spain, 6 January, 1500; d. at Montilla, 10 May, 1569. At the age of fourteen he was sent to the University of Salamanca to study law. Conceiving a distaste for jurisprudence he returned after a year to his father's home, where

he spent the next three years in the practice of most austere piety. His wonderful sanctity impressed a Franciscan journeying through Almodóvar, and at the friar's advice he took up the study of philosophy and theology at Alcalá, where he was fortunate to have as his teacher the famous Dominican De Soto. His parents died while he was a student and after his ordination he celebrated his first Mass in the church where they were buried, sold the family property and gave the proceeds to the poor. He saw in the severing of natural ties a vocation to foreign missionary work and made preparation to go to Mexico in America. While awaiting, at Seville in 1527, a favorable opportunity to start for his new field of labour, his extraordinary devotion in celebrating Mass attracted the attention of Hernando de Contreras, a priest of Seville, who reported his observations to the archbishop and general inquisitor, Don Alphonso Manrique. The archbishop saw in the young missionary a powerful instrument to stir up the faith of Andalusia, and after considerable persuasion Blessed John was induced to abandon his journey to America. His first sermon was preached on 22 July, 1529, and immediately his reputation was established; crowds thronged the churches at all his sermons. His success, however, brought with it the hatred of a certain class, and while living at Seville he was brought before the inquisitor and charged with exaggerating the dangers of wealth and closing the gates of heaven to the rich. His innocence of the charges was speedily proved, and by special invitation of the court he was appointed to preach the sermon on the next great feast in the church of San Salvador, in Seville. His appearance was a cause of public rejoicing. He began his career as apostolic preacher of Andalusia at the age of thirty. After nine years in that province he returned to Seville only to depart for the wider fields of Cordova, Granada, Bolza, Montilla, and Zafra. For eighteen years before his death he was the victim of constant illness, the results of the hardships of his apostolate of forty years. He was declared Venerable by Clement XIII, 8 Feb., 1799, and beatified by Leo XIII, 12 Nov., 1893.

Among the disciples drawn to him by his preaching and saintly reputation may be named St. Theresa, St. John of God, St. Francis Borgia, and Ven. Louis of Granada. The spread of the Jesuits in Spain is attributed to his friendship for that body. Blessed John of Avila's works were collected at Madrid in 1618, 1757, 1792, 1805; a French translation by d'Andilly was published at Paris in 1673; and a German translation by Schermer in six volumes was issued at Ratisbon between 1856 and 1881. His best known works are the "Audi Fili" (English translation, 1620), one of the best tracts on Christian perfection, and his "Spiritual Letters" (English translation, 1631, London, 1904) to his disciples.

IGNATIUS SMITH

Saint John of Beverley

St. John of Beverley

Bishop of Hexham and afterwards of York; b. at Harpham, in the East Riding of Yorkshire; d. at Beverley, 7 May, 721. In early life he was under the care of Archbishop Theodore, at Canterbury, who supervised his education, and is reputed to have given him the name of John. He became a member of the Benedictine Order, and for a time was an inmate of St. Hilda's monastery at Streaneshaleh (Whitby). Afterwards he won renown as a preacher, displayed marked erudition in expounding Scripture, and taught amongst other subjects. On 25 August, 687 was consecrated Bishop of Hexham, a district with which he was not unfamiliar, as he had for a period led a life of retreat at Erneshowe (Herneshou), on the opposite bank of the Tyne. Here, too, he was afterwards wont to resort for seclusion, especially during Lent, when the cares of his episcopal ministration permitted of his so doing. John was present at the synod on the Nidd in 705, convened by Osred, King Of Northumbria, to decide on Wilfrid's case. In the same year (703), on the death of Bosa, John was translated to York after eighteen years of labour in the See of Hexham, where he was succeeded by Wilfrid. Of his new activity little is known beyond that he was diligent in visitation, considerate towards the poor, and exceedingly attentive to the training of students whom he maintained under his personal charge. His little company of pupils is said to have included: Bede, whom he ordained; Berethume, afterwards Abbot of Beverley; Herebald, Abbot of Tynemouth; and Wilfrid "the Younger", John's successor (718) in the See of York. Having purchased a place called Inderawood, to which a later age has given the name of Beverley, John established a monastery there and also handsomely endowed the place, which became even in its founder's day an important ecclesiastical centre. To this monastery of Beverley, after resigning the See of York to his pupil Wilfrid, John retired and spent the remainder of his life with Abbot Berethune, a one time favourite scholar. In 1037 he was canonized by Benedict IX; His bones were translated by Ælfric, Archbishop of York, and placed in a costly shrine. A second translation took place in 1197. The remains were discovered in 1664 and again brought to light in 1736. (See BEVERLEY MINSTER.)

Acta SS. Bolland., II, 165 sqq.; Sanct. Dunelm. et Beverlac., edited by SURTEES SOCIETY, P. 98; DUGDALE, Monasticon, II, 127; WILKINS, Concilia, III, 379; RAINE in Dict. Christ. Biog., s. v. Joannes Beverlacensis, JOCHAM in Kirchenlex., s. v. Johannes von Beverley; HUNT in Dict. Nat. Biog., s. v.; BIHLMEYFR in BUCHBERGER, Kirchliches Handlex., s. v. J. v. Beverley. The authenticity of the works ascribed to John of Beverley in BALE, Script. Illustr. Brit. Catal., is doubtful.

P.J. MACAULEY

John of Biclaro

John of Biclaro

(Johannes Biclariensis.)

Chronicler, born in Portugal, probably about the middle of the sixth century; died after 621. He was educated at Constantinople, where he devoted at least seven years to the study of Latin and Greek. When he returned an attempt was made to force him to join the State Church, then Arian in character. As he staunchly resisted, he was banished by King Leovigild to Barcelona. After Leovigild's death in 586, John founded the Benedictine monastery of Biclaro, the site of which has not yet been exactly determined, and presided over it as abbot for several years, until he was appointed Bishop of Gerona (the bishop known as "Johannes Gerundensis" seems to have been an early successor of the chronicler). John took part in the synod of Saragossa (592), of Barcelona (599), and of Egara (614). His chronicle reaches to the year 590, and is a continuation (from 567) of the chronicle of Victor of Tunnuna, in Africa (*Chronicon continuans Victorem Tunnunensem*). It was edited by H. Canisius (Ingolstadt, 1600), by Scaliger in "Thesaurus Temporum" (Leyden, 1606), and in Migne, P. L., LXXII (1849). The best edition, with copious prolegomena, is by Mommsen in "Mon. Germ. Hist.: Auct. ant.", XI (1893), 211-220. This chronicle is the most complete and reliable authority on the stormy period of Leovigild's reign, and on the Visigothic conversion from Germanizing Arianism to Romanizing Catholicism. The narrative is religiously impartial, despite the preceding bitter religious conflicts during which the writer himself had to suffer.

PATRICIUS SCHLAGER

John of Cornwall

John of Cornwall

(JOHANNES CORNUBIENSIS, JOHANNES DE SANCTO GERMANO).

John of Cornwall lived about 1176. He was the author of a treatise written against the doctrine of Abelard, "Eulogium ad Alexandrum Papam III, quod Christus sit aliquis homo". Scarcely anything is known of his life except the few facts to which he alludes by chance in this work. Though he is claimed by some French writers as a Bas-Breton, it appears certain from the varied forms of his name that he was a native of St. German's

in Cornwall. He was a student under Peter Lombard and Robert of Melum at Paris, and subsequently became a teacher himself. From Peter Lombard he seems to have derived the view which that scholar held for a time, that Christ's humanity was but the vesture or garment wherewith the Logos was clothed; but he abandoned this doctrine, which was condemned at the Council of Tours held by Alexander III in 1163, and advocated the orthodox teaching. In support of this he wrote the "Eulogium", though not for many years after the council, since a reference in the preface to William, formerly Archbishop of Sens, as being then Archbishop of Reims, shows that it could not have been written before 1176, in which year the translation took place. It was first published by Martène in the "Thesaurus novus anecdotum" (Paris, 1717), and is reprinted in Migne, P.L., CXCIX. This is the only work which was certainly written by him. The "Apologia de Christi Incarnatione", usually attributed to Hugh of St. Victor, has been assigned to John without sufficient grounds, as also a treatise "Summa qualiter fiat Sacramentum Altaris per virtutem sanctae crucis et de septem canonibus vel ordinibus Missae" (Migne, P.L. CLXXVII). There is at Magdalen College, Oxford, a "Commentarius in Aristotelis libros duo analyticorum posteriorum", which may be his, and the Latin hexameters "Merlini prophetia cum expositione", written at the request of Bishop Warelwast of Exeter, have been ascribed to him by reason of the references to Cornwall it contains. Nothing is known of his death, nor can he be identified with the John of Cornwall who was archdeacon of Worcester in 1197.

EDWIN BURTON

John of Ephesus

John of Ephesus

(Also known as JOHN OF ASIA).

The earliest, and a very famous, Syriac historian. He was born at Amida (Diarbekir, on the upper Tigris), about 505; d. about 585. In 529 he was ordained deacon in St. John's monastery of the same city, but on account of his monophysitic doctrine was soon obliged to take refuge in Palestine, where we find him in 534; thence he came to Constantinople, driven from Palestine by the great pestilence of 534-7. In the capital he found a friend in Jacob Baradaeus, the organizer of the Jacobite Church; a protector

in Justinian; and a life-long collaborator in a certain Deuterius. The emperor placed him at the head of the Monophysite community of Constantinople, and soon entrusted him with the mission of converting the heathens of Asia proper and the neighbouring provinces. Eventually John was consecrated (by Jacob Baradaeus), Bishop of Ephesus, the heart of the Monophysite territory, but his official residence, it seems, was always Constantinople. In 546 he helped Justinian to search out and quash the secret practice of idolatry in the capital and its surroundings. Hence his beloved titles of "Teacher of the Heathens", and "Idol-breaker." Soon after Justinian's death (565), John's fortunes began to decline. When the persecution broke out in 571 he was one of its very first victims, and had to suffer imprisonment, banishment, and all sorts of vexations at the hands of the orthodox patriarchs. He soon resigned, in favour of Deuterius, his position as head of the communities he had converted from heathenism, and consecrated Deuterius Bishop of Caria. We do not know where nor exactly when he died, it must have been shortly after 585, for his history comes to an end with that year, and he was then about eighty years of age.

His principal work was an "Ecclesiastical History", from Julius Caesar to A.D. 585. It was divided into three parts of six books each. The first part has entirely perished; of the second part we have copious excerpts in two manuscripts in the British Museum, and possibly the whole of it in the third part of the "Chronicle" of Denys of Tell-Mahre. These excerpts have been edited by Land (*Anecdota Syriaca*; Leyden, 1868, II, 289-329, 385-390), and translated into Latin by von Douwen and Land (*Joannis Episcopi Ephesi, Syri Monophysitae Commentarii de Beatis Orientalibus et Historia Ecclesiasticae fragmenta*, Amsterdam, 1889). The third part, which opens with the beginning of the persecution under Justin II (571), has come down to us, though not without some important gaps. There is an edition of it by Cureton (*The Third Part of the Ecclesiastical History of John, Bishop of Ephesus*, Oxford, 1853), also two translations, one English by Payne Smith (1860), and another in German by Schonfelder (1862). John of Ephesus is also the author of the "Biographies of the Eastern Saints", written at different times and gathered into a "corpus" about 569. They were published by Land (*op. et loc. cit.*, pp. 2-228), and done into Latin by von Douwen and Land (*ibid.*). Both works are of the greatest importance for the history of the writer's times. He evidently strove to be impartial, for which he is very much to be commended, considering the part he played in the events he related; he is also accurate and full of details. The troubled times in which he wrote the third part of the "History" and his unsettled condition during that period of his life easily explain the disorder and repetitions to be found in the last six books. They account also for the style, which is rude, entangled, and abounds with Greek words and phrases; besides, we must not overlook the fact that the water spent most of his life outside the zone of spoken Syriac.

H. HYVERNAT

John of Falkenberg

John of Falkenberg

Author, b. at Falkenberg, Pomerania, Prussia, date unknown; d. about 1418 in Italy—or, according to other accounts, in his native town. Of his early life little is known, save that he entered the Order of St. Dominic and spent his novitiate in the convent at Kammin, a town of the above-named province. The fact that he was a master in Sacred Theology indicates that for a number of years he taught philosophy and theology in his order. His prominence in medieval history is due partly to the share he took in the great papal schism which wrought such confusion in the Church during the first part of the fifteenth century, but chiefly to his involving himself in the long-standing troubles between the Teutonic Order of Knights of Livonia and the King of Poland. In opposition to the general of his order, Bernard de Datis, and to many of the brethren of his province who were firm adherents of the antipopes Alexander V and John XXIII, he was a strong and ardent adherent of Gregory XII, the legitimate pope; and, being of a quick and passionate temperament, he carried his opposition so far as to refuse publicly in the Council of Constance to acknowledge Bernard as his superior. In the protracted and disastrous conflict between the Teutonic Order of Knights and Prussia on the one side and King Wladislaw of Poland and Duke Withold of Lithuania on the other, his sympathies for the former found expression in a book in which he undertook to show that the King of Poland and his adherents were idolators and unbelievers and that the opposition against them was noble and praiseworthy. In this violent work he maintained the principles of the licitness of tyrannicide, advocated by the Franciscan, Jean Petit: that it was lawful to kill the King of Poland and his associates (Mansi, "Conc." XXVII, 765). A little later he wrote "Tres tractatuli" (given as appendix to the works of Gerson in the edition of Dupin, V, 1013-32) in justification of his position and against Gerson, d'Ailly, and other doctors of the University of

Paris, who had condemned the works of Jean Petit. In this work, moreover, he denied the bishops the right to declare his book or any part of it heretical, claiming that in matters of faith the pope and general councils alone are infallible. By order of Nicolaus, Archbishop of Gnesen, Falkenberg was thrown into prison. The committee appointed to examine the work recommended that it be burned. A similar verdict was given by a chapter of his order assembled at Strasburg from 30 May to June, 1417 which besides condemned the author to life imprisonment. The Poles earnestly demanded the condemnation of Falkenberg by the council, but in vain. When finally in the forty-fifth (last) session they attempted to force Martin V to give a definitive sentence, he imposed silence on their representatives and declared that in matters of faith and in this particular matter he would approve only what had been decided by the general council *conciliariter*. On his return to Rome, Martin V took Falkenberg with him and kept him for several years in close confinement. Whether he eventually regained his liberty or died there is uncertain.

JOSEPH SCHROEDER

John of Fecamp

John of Fécamp

(Also known as JEANNELIN on account of his diminutive stature).

Ascetic writer, b. near Ravenna about the beginning of the eleventh century; d. at Fécamp, Normandy, 22 February, 1079. He studied at Dijon under his compatriot William, Abbot of St. Benignus, whom he had accompanied to France. Under this skilled master John acquired an extensive acquaintance with all the sciences, making a special study of medicine, of which he is reckoned by Bernier among the cleverest exponents trained in the monastic schools of the Middle Ages. When William was commissioned to reform the Abbey of Fécamp and to establish there a colony of Benedictine monks, John again accompanied him and discharged under him the office of prior until 1028. In this year, worn out by his labours in the service of the Church, and seeking a more tranquil refuge for his old age, William appointed John his successor as abbot and retired to Italy. Taking his master for his model, John succeeded in winning an almost equal renown, and, if his authority was exercised with an defending the privileges of his house against every attack. In 1052, on the elevation of Helinard to the archiepiscopal See of Lyons, John was invited to succeed him as Abbot of Dijon. At first he retained also the abbacy of Fécamp, but, finding himself unable to carry the

double burden, he resigned this office in 1056. Towards the close of his life he undertook a pilgrimage to the Holy Land, desiring to see before his death the sanctified places towards which his thoughts had so often turned during his meditations. Seized and thrown into prison by the Turks, it was only in 1076 that he could return to France. He then retired to Fécamp.

As Abbot of St. Benignus John had been brought into close relations with Emperor Henry III—after 1038 also King of Burgundy—and with his spouse, Agnes of Poitiers. After Henry's death his widow placed herself entirely under the spiritual guidance of the abbot, and for her John composed a series of ascetical works. These were entitled the "Liber precum variarum", "De divina contemplatio Christique amore", "De superna Hierusalem," "De institutione viduae," "De vita et moribus virginum", "De eleemosynarum dispensatione" (P.L., CXLVII, 147 sqq., 445 sqq.). A good indication of John's value as a writer is afforded by the fact that the "De divina contemplatione" was for a long time regarded as a work of St. Augustine, although it is now certain that it was composed either wholly or partly by John. Some letters dealing with incidents in the life of the cloisters are also collected in P.L. loc. cit., 153 sq.

THOMAS KENNEDY

Blessed John of Fermo

Blessed John of Fermo

More often called JOHN OF LA VERNA, from his long sojourn on that holy mountain, b. at Fermo in the Marches, 1259; d. at La Verna in Tuscany, 10 August, 1322. After a youth of precocious piety, he was received at the age of ten among the Canons of St. Peter's at Fermo. Three years later, desirous of leading a more austere life, he entered the Order of Friars Minor, and under the direction of the celebrated brother, James of Fallerone, soon made rapid progress in perfection. Shortly after his profession, John was sent by the minister general to Mount La Verna, where St. Francis had received the stigmata, and there he spent many years in solitude, penance, and contemplation, being favoured with ecstasies and celestial visions. His late years, however, were devoted to the Apostolic ministry, and he preached at Florence, Pisa, Siena, Arezzo, Perugia, and many other towns of northern and central Italy, working wonders everywhere. His contemporaries relate much of Blessed John: they tell us that he enjoyed the gift of infused science, and that prelates and princes alike were astounded at his learning. He was linked in bonds of the warmest friendship with Jacopone of Todi, and administered the last sacraments to the dying poet in 1306. John

is said to have composed the preface which is said in the Mass of St. Francis. Feeling the approach of death at Cortona while on his way to Assisi, John returned to La Verna and died there at the age of sixty-three. He was buried on the holy mountain, where many miracles were wrought through his intercession, and where his cell is still shown. The immemorial cultus of Blessed John was approved by Leo XIII in 1880, and his feast is kept in the Order of Friars Minor on 9 August.

Acta SS., August, II, 453 sqq., give a contemporary life of Blessed John by an anonymous biographer with a Comment, Præv. by the Bollandist CUYPERS. Other early lives are found in the Chron. XXIV Generalium, in Anal. Francisc, III (1897), 439 sqq.; BARTHOLOMEW OF PISA, Liber de Conformitate in Anal. Francisc., IV (1906), 255 sqq. See also Bibl. Hag. Lat., I, 650; SABATIER in Collection d'études etc., II (1900), 59 sqq., IV (1902), ch. xl, sqq.; Fioretti di S. Francesco, ch. xlix, sqq.; LEMMENS, Catalogus Sanct. Frat. Minor. (1903), 15; CLARY, Lives of the Saints and Blessed of the Three Orders of St. Francis, II (1886), 553 sqq.; MENCHERINI, Guida Illustrata della Vernā (2nd ed., Quaracchi, 1907), passim.

PASCHAL ROBINSON

John of Genoa

John of Genoa

(Often called Balbi, or de Balbis.)

Grammarian; born at Genoa, date unknown; died there about 1298. Of his early life and education nothing is known. He distributed his wealth among the poor of the city, and entered the Order of St. Dominic, apparently at a somewhat advanced age. His noted work, the "Summa Grammaticalis", more commonly known as the "Catholicon", has made his name widely celebrated. The work comprises treatises on orthography, etymology, grammar, prosody, rhetoric, and an etymological dictionary of the Latin language (*primae, mediae et infimae Latinitatis*). The great number of manuscripts in which the "Catholicon" still exists, and the numerous editions through which it passed during the first seventy-five years after the invention of printing, attest the wide acceptance accorded it and the popularity it long enjoyed. For more than a century it was highly esteemed as a textbook. It has been the subject at once of excessive criticism and excessive praise. Erasmus, the most conspicuous of its critics, speaks of it in caustic terms in his "De Ratione Studiorum" and "Colloquia". Leander Alberti ("Viri Illustres Ord. Praed." and "Discrittione di tutta Italia") defends it against the aspersions of the humanist. If we bear in mind the materials the author had at his disposal, the purpose of the work, and the needs of the time, it must be conceded that the "Catholicon" possessed considerable merit. That it met the demands of the age is attested by its

popularity. The author by his own assertion refuted those who would have made him an adept in Greek. Besides the "Catholicon", he wrote "Liber Theologiae qui vocatur Dialogus de Quaestionibus Animae ad Spiritum" and "Quoddam opus ad inveniendum festa mobilia". A "Postilla super Joannem" and a "Tractatus de Omnipotentia Dei" are also attributed to John of Genoa.

Quétif-Echard, *SS. Ord. Praed.*, I (Paris, 1719), 462; *Nouvelle bibliographie générale*, s. v.

VICTOR F. O'DANIEL

St. John of God

St. John of God

Born at Montemor o Novo, Portugal, 8 March, 1495, of devout Christian parents; died at Granada, 8 March, 1550. The wonders attending the saint's birth heralded a life many-sided in its interests, but dominated throughout by implicit fidelity to the grace of God. A Spanish priest whom he followed to Oropeza, Spain, in his ninth year left him in charge of the chief shepherd of the place, to whom he gradually endeared himself through his punctuality and fidelity to duty, as well as his earnest piety. When he had reached manhood, to escape his mastery well-meant, but persistent, offer of his daughter's hand in marriage, John took service for a time in the army of Charles V, and on the renewal of the proposal he enlisted in a regiment on its way to Austria to do battle with the Turks. Succeeding years found him first at his birthplace, saddened by the news of his mother's premature death, which had followed close upon his mysterious disappearance; then a shepherd at Seville and still later at Gibraltar, on the way to Africa, to ransom with his liberty Christians held captive by the Moors. He accompanied to Africa a Portuguese family just expelled from the country, to whom charity impelled him to offer his services. On the advice of his confessor he soon returned to Gibraltar, where, brief as had been the time since the invention of the printing-press, he inaugurated the Apostolate of the printed page, by making the circuit of the towns and villages about Gibraltar, selling religious books and pictures, with practically no margin of profit, in order to place them within the reach of all.

It was during this period of his life that he is said to have been granted the vision of the Infant Jesus, Who bestowed on him the name by which he was later known, John of God, also bidding him to go to Granada. There he was so deeply impressed by the preaching of Blessed John of Avila that he distributed his worldly goods and went through the streets of the city, beating his breast and calling on God for mercy. For some time his sanity was doubted by the people and he was dealt with as a madman, until the zealous preacher obliged him to desist from his lamentations and take some

other method of atoning for his past life. He then made a pilgrimage to the shrine of Our Lady of Guadeloupe, where the nature of his vocation was revealed to him by the Blessed Virgin. Returning to Granada, he gave himself up to the service of the sick and poor, renting a house in which to care for them and after furnishing it with what was necessary, he searched the city for those afflicted with all manner of disease, bearing on his shoulders any who were unable to walk.

For some time he was alone in his charitable work soliciting by night the needful supplies, and by day attending scrupulously to the needs of his patients and the rare of the hospital; but he soon received the co-operation of charitable priests and physicians. Many beautiful stories are related of the heavenly guests who visited him during the early days of herculean tasks, which were lightened at times by St. Raphael in person. To put a stop to the saint's habit of exchanging his cloak with any beggar he chanced to meet, Don Sebastian Ramirez, Bishop of Tuy, had made for him a habit, which was later adopted in all its essentials as the religious garb of his followers, and he imposed on him for all time the name given him by the Infant Jesus, John of God. The saint's first two companions, Antonio Martin and Pedro Velasco, once bitter enemies who had scandalised all Granada with their quarrels and dissipations, were converted through his prayers and formed the nucleus of a flourishing congregation. The former advanced so far on the way of perfection that the saint on his death-bed commended him to his followers as his successor in the government of the order. The latter, Peter the Sinner, as he called himself, became a model of humility and charity.

Among the many miracles which are related of the saint the most famous is the one commemorated in the Office of his feast, his rescue of all the inmates during a fire in the Grand Hospital at Granada, he himself passing through the flames unscathed. His boundless charity extended to widows and orphans, those out of employment, poor students, and fallen women. After thirteen years of severe mortification, unceasing prayer, and devotion to his patients, he died amid the lamentations of all the inhabitants of Granada. His last illness had resulted from an heroic but futile effort to save a young man from drowning. The magistrates and nobility of the city crowded about his death-bed to express their gratitude for his services to the poor, and he was buried with the pomp usually reserved for princes. He was beatified by Urban VIII, 21 September, 1638, and canonized by Alexander VIII, 16 October, 1690. Pope Leo XIII made St. John of God patron of hospitals and the dying. (See also BROTHERS HOSPITALLERS OF ST. JOHN OF GOD.)

F.M. RUDGE

John of Hauteville

John of Hauteville

Moralist and satirical poet of the twelfth century (flourished about 1184). Little is known of his life. There is not much probability in the opinion that he was born in England, and he was not a Benedictine monk. The only work that can be attributed to him with certainty has for its title the name of its hero "Archithrenius" (*The Prince of Lamentations*). It is a Latin poem in eight cantos. In a prose prologue the hero deplores the unmerited woes of men, beginning with his own, and announces that he is going to Nature to seek the remedy for them. He begins by entering the palace of Venus and describes the beauty of one of the members of the goddess's retinue (I). Thence he passes to the Land of Gorging, inhabited by the Belly-worshippers (*Ventricoloe*), and to the prevailing sensuality he opposes the sobriety of the "White Brothers" (II). He comes to Paris and delivers a pompous eulogy of that city, describing, in contrast, the wretchedness of the students -- a valuable piece of first-hand evidence in regard to the period when the University of Paris was laboriously developing itself (III). Archithrenius then visits the Mountain of Ambition, which is situated in Macedon, near Pella, the birthplace of Alexander, greatest of conquerors, and is crowned with the palaces of kings (IV). The Mountain of Presumption forms a pendant to this, and is inhabited mostly by ecclesiastics and monks. A eulogy of Henry II, King of England and Duke of Normandy, is here dragged in clumsily. But the hero discovers a gigantic monster, Cupidity, and the encounter calls forth a picture of the greediness of prelates. In another digression the hero contrives to relate the fabulous history of the Kings of Britain, in the main following Geoffrey of Monmouth (V). In the next canto we come to Thule, the abode of the philosophers and sages of ancient Greece, and they vie with each other in declaiming against vices (VI-VIII). Lastly, Archithrenius meets Nature on a flowery plain, surrounded by a brilliant throng of attendants. He falls at her feet. She begins with a complete course of cosmography and astronomy in five hundred lines, and ends by listening to the request of Archithrenius. For remedy, she prescribed for him marriage with a young girl whose physical beauty is minutely described. In the prologue this damsel was Moderation, but here there is nothing abstract about her, and Nature instructs her disciple in his conjugal duties (IX). These and other passages in the work exhibit a certain degree of sensuality. The imitation of the Latin poets is betrayed in the plagiarizing of whole verses at a time. John of Hauteville dedicated his work to Gautier de Coutances just when the latter had left the See of Lincoln for that of Rouen (1184). The poem had a great success. It was frequently copied and commented before being published in 1517, at Paris, by Jodocus Badius Ascencius.

The latest edition is that of Th. Wright in "Latin Satirical Poets of the Twelfth Century" (Rolls Series, London, 1872).

GIGNUENÉ in *Histoire littéraire de la France*, XIV (Paris, 1817), 569; BULÆUS (DU BOULAY), *Historia universitatis Parisiensis*, II (Paris, 1665), 750. For a supplementary bibliography see CHEVALIER, *Bio-bibliographie*, II 242.

PAUL LEJAY

John of Janduno

John of Janduno

An Averroistic philosopher, theologian, and political writer of the fourteenth century. John of Janduno (Johannes de Genduno, de Ganduno, and de Gandavo) and John of Gand (or less correctly, of Ghent) are now generally said to have been two different persons. The former was born about the year 1300, graduated in arts at the College of Navarre (University of Paris), wrote a work entitled "De Laudibus Parisiis," and, in collaboration with Marsilius of Padua, composed the celebrated "Defensor pacis," directed against Pope John XXII, for which the authors were condemned in 1327. John of Gand was born about 1270 or 1280, studied theology at the Sorbonne, and after having served as *curé* at Kieldrecht was made a canon of the cathedral of Paris. These facts seem to be clearly established. However, there are extant a number of works, mostly philosophical, which are ascribed to Johannes de Genduno, Ganduno, or Gandavo, and it is difficult to say whether they were written by John of Janduno or by John of Gand.

These works include commentaries on Peter Lombard's "Books of Sentences," on Aristotle's "Physics," "Metaphysics," and "The Soul," also a treatise entitled "Quaestio in Averroem de substantia orbis." The author is strongly inclined towards the doctrines of Averroes. He defends the principle of twofold truth, according to which what is false in philosophy may be true in theology, or vice versa. Thus, he says, the eternity of the world is demonstrated in philosophy to be true and yet in theology it is false; according to this principle, we are to believe that the world was made, while we know that it was not made. Again, he holds the Averroistic doctrine that there is only one intellect, which is common to all men, and is in no sense a part of the individual soul. Consequently, he is obliged to maintain that the immortality of the individual soul cannot be proved in philosophy. In his discussion of the nature and operations of the human mind he takes sides with the determinists, who deny that the will is free. Finally, the Averroist author of these commentaries is no friend of the Thomistic school. He tries to belittle the reputation of St. Thomas, and to prove him inferior to Averroes. Considering, therefore, the spirit and tendency of these works, one is inclined to assign

them to the turbulent, anti-papal author of the "Defensor pacis," and not to the theologian and canon who, for all we know, troubled himself as little about the intellectual warfare going on between Thomists and Averroists as he did about the political conflict between Pope John XXII and Louis of Bavaria. The commentaries mentioned above and the "Quaestio" were published in Venice, 1497, 1525, etc.

WILLIAM TURNER

John of Montecorvino

John of Montecorvino

A Franciscan and founder of the Catholic mission in China, b. at Montecorvino in Southern Italy, in 1246; d. at Peking, in 1328. Being a member of a religious order which at that time was chiefly concerned with the conversion of unbelievers, and was commissioned by the Holy See to preach Christianity especially to the Asiatic hordes then threatening the West, he devoted himself to the Eastern missions, first that of Persia. In 1286 Argun, the khan or ruler of this kingdom, sent a request to the pope through the Nestorian bishop, Bar Sauma, to send Catholic missionaries to the Court of the great Chinese emperor, Kúblai Khan (1260-94), who was well disposed towards Christianity. About that time John of Montecorvino came to Rome with similar promising news, and Nicholas IV entrusted him with the important mission to Farther China, where about this time Marco Polo, the celebrated traveller, still lingered. He started on his journey in 1289, provided with letters to the Khan Argun, to the great Emperor Kublai Khan, to Kaidu, Prince of the Tatars, to the King of Armenia and to the Patriarch of the Jacobites. His companions were the Dominican Nicholas of Pistoia and the merchant Peter of Lucalongo. From Persia he went by sea to India, in 1291, where he preached for thirteen months and baptized about one hundred persons. Here also his companion, Nicholas, died. Travelling by sea from Meliapur, he reached China in 1294, only to find that Kúblai Khan had just died, and Timurleng (1294-1307) had succeeded to the throne. Though the latter did not embrace Christianity, he threw no obstacles in the way of the zealous missionary, who, in spite of the opposition of the Nestorians already settled there, soon won the confidence of the ruler. In 1299 he built a church at Peking and in 1305 a second opposite the imperial palace, together with workshops and dwellings for two hundred persons. He gradually bought from heathen parents about one hundred and fifty boys, from seven to eleven years of age, instructed

them in Latin and Greek, wrote psalms and hymns for them and then trained them to serve Mass and sing in the choir. At the same time he familiarized himself with the native language, preached in it, and translated into Chinese the New Testament and the Psalms. Among the six thousand converts of John of Montecorvino was a Nestorian king named George, of the race of the priest John, a vassal of the great khan, mentioned by Marco Polo. After he had worked alone for eleven years, a German associate, Arnold of Cologne, was sent to him (1304). In 1307 Clement V, highly pleased with the missionary's success, sent seven Franciscans who were commissioned to consecrate John of Montecorvino Archbishop of Peking and chief archbishop (*summus archiepiscopus*) of all those countries; they were themselves to be his suffragan bishops. Only three of these envoys arrived safely: Gerardus, Peregrinus, and Andrew of Perugia. They consecrated John in 1308 and succeeded each other in the See of Zaiton, established by Montecorvino. In 1312 three more Franciscans arrived from Rome as suffragans. John of Montecorvino departed this life (1328) honoured as a saint by Christian and heathen.

Our chief information about him and his work is found in two letters written in 1305 and 1306, printed in WADDING, *Annales Minorum*, VI (Rome, 1733), 69-72, and MOSHEIM, *Historia Tartarorum* (Helmstadt, 1741), append. n. 44 and 45. There is an English translation of these letters in YULE, *Cathay and the Way Thither*, I (London, 1866), 197-209. Biographical notices are to be found, moreover, in REMUS-AT, *Nouveaux melanges asiatiques*, II (Paris, 1829), 193-98; KUNSTMANN, *Die Missionen in Indien und China im 14. Jahrhundert* in *Hist.-polit-Blätter*, XXXVII (Munich, 1856), 229-41; HUC, *Le Christianisme en Chine*, I (Paris, 1857), 383-433; HEYD, *Die Kolonien der roemischen Kirche in den Tartarenlaendem im 13. u. 24. Jahrh.* in *Zeitschrift fuer die histor. Theol.*, XXVIII (Gotha, 1858), 286-96.

OTTO HARTIG

John of Montesono

John of Montesono

Theologian and controversialist, born at Monzón, Spain; dates of birth and death unknown. He joined the Dominicans probably in Valencia. In 1383 he was lecturing on theology at the cathedral in that city. Thence he went to Paris, taught in the convent of St. James there, and obtained the mastership of theology in 1387. Here he entered the field of controversy on the question of the Immaculate Conception, which was not then defined. Maintaining the proposition that the Blessed Virgin was conceived without sin was heretical, he aroused against him the faculty of the Paris university. They condemned fourteen propositions from his lectures, warned him, first privately,

then publicly, to retract, and when he refused carried the matter to Pierre Orgement, Bishop of Paris, who promulgated a decree of excommunication against all who should defend the forbidden theses; and the faculty issued letters condemnatory of Montesono's errors and conduct, which Denifle conjectures, from their acerbity of speech, were written by Pierre d'Ailly. Denifle also says Montesono would not have been condemned had he not declared the doctrine of the Immaculate Conception heretical. Montesono appealed to Clement VIII, who cited him and the university faculty to Avignon. Later, foreseeing that the case was going against him, Montesono, despite the command under pain of excommunication to remain at Avignon, secretly withdrew into Aragon, then went to Sicily, changing his allegiance to Urban VI, Clement's rival. There and in Spain, wither he afterwards returned, he filled several important positions. In 1412 Alfonso, Duke of Gandia, chose him as head of a legation sent to defend his claim to the crown of Aragon. Besides four works against Clement's claim as pope, he wrote: "Tractatus de Conceptione B. Virginis", a number of sermons, and various *opuscula* in the vernacular.

V.F. O'DANIEL

John of Nikiu

John of Nikiû

An Egyptian chronicler who flourished in the latter part of the seventh century. The little we know of his life is gathered from the "History of the Patriarchs" by Severus of Ashmunein. He lived under John of Semnud, Isaac, and Simeon, respectively fortieth, forty-first, and forty-second patriarchs, and seems to have played an important part in the affairs of the Egyptian Church both as Bishop of Nikiû (Coptic, Pshati in the Delta) and as general administrator of the monasteries of Egypt. But having disciplined a monk guilty of a grave offense against morals so severely that he died ten days later, he was deposed from both offices by the patriarch Simeon, and reduced to the rank of a simple monk. His "Chronicle", composed very likely before his deposition, is a work of no mean value, extending from Adam to the end of the Arabic conquest. In many respects it does not materially differ from the Byzantine chronicles, which the author often copies, especially those of John Malalas, and the monk John of Antioch. But it has preserved some local traditions, not to be found elsewhere, on the ancient history of Egypt, also some details otherwise unknown, and apparently authentic, on certain periods of Eastern Empire, in particular on the revolution which brought about the fall of Phocas and the accession of Herclius I, and the condition of Egypt during

the seventh century. The last chapters contain a relation of the conquest of Egypt by the Arabs, but little posterior to the events.

This chronicle was originally written in Greek, with the exception of some of the chapters concerning Egypt, which were very probably written in Coptic. It has come down to us in an Ethiopic version made in 1602 by an Abyssinian scholar, with the assistance of an Egyptian monk on a much older Arabic text non lost like the original. The text, unfortunately, has suffered much at the hands of the translators and copyists, especially in passing into Arabic. Such as it is, it has been the subject of a careful study and analysis by H. Zotenberg, in the "Journal Asiatique", 7th series, vols. X, XII, XIII (Paris, 1877-79), "La Chronique de Jean de Nikioû, notice et extraits" (also in book form, Paris, 1879); later it was published in its entirety, with a French version, by the same scholar; "La Chronique de Jean de Nikioû" (Paris, 1883), in "Notices et Extraits des manuscrits de la Bibliothèque Nationale", t. XXIV, I, pp. 125-605) (also separately, Paris, 1883).

The two above-named publications of ZOTENBERG; cf. the reviews of NOLDEKE, Gittlinger gelehrte Anzeigen (Gottingen, 1881), 587- 594; DROUIN, Le Museon, III (Louvain, 1884), 235-268.

H. HYVERNAT

John of Paris

John of Paris

(*Called also Quidort and de Soardis*).

Theologian and controversialist; born at Paris, date unknown; died at Bordeaux, 22 September, 1306. Having obtained the degree of Master of Arts with distinction, he joined the Dominican Order, when about twenty years of age, at the convent of St. James in his native city. There he taught philosophy and theology, and obtained the degree of Master of Theology. He was endowed with great ability, was the most subtle dialectician of the age, possessed great literary and linguistic attainments, and was considered one of the best theologians of the university. Some ten of his works on theology, physics, and metaphysics, still exist in manuscript; two others, "De Antichristo" and "De modo existendi corporis Christi in sacramento altaris", appeared in print centuries after his death. A treatise, "Contra corruptorem Sancti Thomae", published in 1516 under the name of Aegidius Romanus, is commonly attributed to John of Paris; it was certainly not written by Aegidius. All these show vast erudition. In his work on the temporal and spiritual power, "De potestate regia et papali", written during the controversy between Boniface VIII and Philip the Fair, he favours the king, and advances some untenable propositions. He holds, for instance, that the pope, for grave

crimes, e.g. heresy, may be deposed. The treatise on the Blessed Sacrament, in which he maintained that the Body of Christ is, or might be, present by assumption (I. e. by the body of Christ assuming the bread and wine), and that the doctrine of transubstantiation was not of faith, brought him into trouble. The faculty of the university reported the error to William of Baufet, Bishop of Paris, who forbade him under penalty of excommunication to defend such a doctrine, and deprived him of the offices of lecturing, preaching, and hearing confessions. John appealed to the Holy See, but died soon after, and the case was dropped. In justice to him, it must be said that he advanced these propositions tentatively; for in the beginning of the treatise he writes that he believes in the Catholic doctrine of transubstantiation, and if it is shown that transubstantiation is of faith, or should it be defined, he will willingly retract.

Quétif and Echard, *Scriptures Ord. Præd.*, I (Paris, 1719), 500; Natalis Alexander, *Hist. Eccl.*, VII (Paris, 1714), 149; Hurter, *Nomenclator*, II (3rd ed.), 477-9.

VICTOR F. O'DANIEL

Blessed John of Parma

Blessed John of Parma

Minister General of the Friars Minor (1247-1257), b. at Parma about 1209; d. at Camerino 19 Mar., 1289. His family name was probably Buralli. Educated by an uncle, chaplain of the church of St. Lazarus at Parma, his progress in learning was such that he quickly became a teacher of philosophy (*magister logicæ*). When and where he entered the Order of Friars Minor, the old sources do not say. Affò (*Vita*, p. 18, see below) assigns 1233 as the year, and Parma as the probable place. Ordained priest he taught theology at Bologna and at Naples, and finally read the "Sentences" at Paris, after having assisted at the First Council of Lyons, 1245. Through his great learning and sanctity, John gained many admirers, and at the general chapter of the order at Lyons in July, 1247, was elected minister general, which office he held till 2 Feb., 1257. We may judge of the spirit that animated the new general, and of his purposes for the full observance of the rule, from the joy felt (as recorded by Angelus Clarenus) by the survivors of St. Francis's first companions at his election, though Brother Giles's words sound somewhat pessimistic: "Welcome, Father, but you come late" (*Archiv. Litt.*, 11, 263). John set to work immediately. Wishing to know personally the state of the order, he began visiting the different provinces. His first visit was to England, with which he was extremely satisfied, and where he was received by Henry III (*Anal. Franc.*, I, 252). At Sens in France St. Louis IX honoured with his presence the provincial chapter held by John. Having visited the provinces of Burgundy and of Provence, he set out in Sept., 1248, for Spain, whence Innocent IV recalled him to entrust him with an embassy to

the East. Before departing, John appears to have held the General Chapter of Metz in 1249 (others put it after the embassy, 1251). It was at this chapter that John refused to draw up new statutes to avoid overburdening the friars (Salimbene, "Mon. Germ. Hist. Script.", XXXII, 300). Only some new rubrics were promulgated, which in a later chapter (Genoa, 1254) were included in the official ceremonial of the order, beginning: *Ad omnes horas canonicas* (last published by Golubovich in "Archivum Franc. Hist.", III, Quaracchi, 1910). The object of John's embassy to the East was the reunion of the Greek Church, whose representatives he met at Nice, and who saluted him as "angel of peace". John's mission bore no immediate fruit, though it may have prepared the way for the union decreed at the Council of Lyons in 1274.

In his generalate occurred also the famous dispute between the Mendicants and the University of Paris. According to Salimbene (op. cit., XXXII, 299 sqq.), John went to Paris (probably in 1253), and by his mild yet strenuous arguments strove to secure peace. It been in connection with this attack on the Preachers and the Minors that John of Parma and Humbert of Romans, Master General of the Dominicans, published at Milan in 1255 a letter recommending peace and harmony between the two orders (text in Wadding, 111, 380). The "Introductorius in Evangelium Æternum" of Gerard of S. Donnino (1254), John's friend, having been denounced by the professors of Paris and condemned by a commission at Anagni in 1256 (Denifle, "Arch. f. Litt.", I, 49 sqq.), John himself was in some way compromised--a circumstance which, combined with others, finally brought about the end of his generalate. He convoked a general chapter at Rome, 2 Feb., 1257. If Peregrinus of Bologna [Bulletino critico di cose francescane, I (1905), 46] be right, Alexander IV secretly intimated to John that he should resign, and decline re-election should it be offered him. On the contrary, Salimbene (l. c., 301 sqq.) insists that John resigned of his own free will. The pope may have exerted some pressure on John, who was only too glad to resign, seeing himself unable to promote henceforth the good of the order. Questioned as to the choice of a successor, he proposed St. Bonaventure, who had succeeded him as professor at Paris. John retired to the Hermitage of Greccio near Rieti, memorable for the Christmas celebrated there by St. Francis. There he lived in voluntary exile and complete solitude; his cell near a rock is still shown. But another hard trial awaited him. Accused of Joachimism, he was submitted to a canonical process at Città della Pieve (Umbria), presided over by St. Bonaventure and Cardinal John Gaetano Orsini, protector of the order. The mention of this cardinal as protector brings us to a chronological difficulty, overlooked by all modern writers, who assign the process against John to 1257; for Alexander IV (1254-61) retained the protectorship (Anal. Franc., 696, 710; Mon. Germ. Hist.: Scr., XXXIII, 663, 681-2); and Cardinal Orsini became protector, at the earliest, at the end of 1261; see Olier in "Arch. Francisc. Hist.", III, 346.

Angelus Clarenus tells us that the concealed motive of this process was John's attachment to the literal observance of the rule, the accusation of Joachimism, against which he professed his Catholic Faith, being only a pretext. Other sources, however (Anal. Franc., 111, 350, 698), speak of retraction. The same Clarenus relates that John would have been condemned had it not been for the powerful intervention of Innocent IV's nephew, Cardinal Ottoboni Fioschi, later Hadrian V (concerning whose letter to the judges see Arch. f. Litt., II, 286; Orbis Seraphicus, I, 120). John certainly did not profess the dogmatical errors of Joachimism, though he may have held some of its apocalyptic ideas. Upon his acquittal he returned to Greccio, and continued his life of prayer and work. It was there that an angel once served his Mass (Salimbene, l.c., 310; Anal. Franc., 111, 289), and that in 1285 he received the visit of Ubertin of Casale, who has left a touching account of this meeting ("Arbor Vitæ", Venice, 1485, V, 3). Hearing that the Greeks were abandoning the union agreed upon in 1274, John, now 80 years old, desired to use his last energies in the cause of union. He obtained permission of Nicolas IV to go to Greece, but only travelled as far as Camerino (Marches of Ancona), where he died in the convent of the friars, 19 March, 1289. He was beatified 1777; his feast is kept 20 March.

With the exception of his letters scarcely any literary work can with surety be attributed to John. He is certainly not the author of the "Introductorius in Evang. Æternum", nor of the "Visio Fr. Johannis de Parma" (Anal. Franc., 111, 646-49). With more probability can we attribute to John the "Dialogus de vitia ss. Fratrum Minorum", partly edited by L. Lemmens, O.F.M. (Rome, 1902). The "Chronicle of the XXIV Generals" (Anal. Franc., III, 283) ascribes to John the allegoric treatise on poverty: "Sacrum commercium B. Francisci cum Domina Paupertate" (ed. Milan, 1539), edited by Ed. d'Alençon (Paris and Rome, 1900), who ascribes it (without sufficient reason) to John Parent. Carmichael has translated this edition: "The Lady Poverty, a thirteenth-century allegory" (London, 1901); another English translation is by Rawnsly (London, 1904); a good introduction and abridged version is given by Macdonell, "Sons of Francis", 189-213. Other works are mentioned by Sbaralea, "Suppl. ad Script." (Rome, 1806), 398.

I. ORIGINAL, SOURCES.-SALIMBENE, *Chronica* (Parma, 1857), ed. also by HOLDER-EGGER in *Mon. Gern. There are three Italian lives with the title *Vita del Beato Giovanni da Parma*, by CAMERINI (Ravenna, 1730), by AFFÒ (Parma, 1777), and by LUIGI DA PARMA, 2nd ed. (Quaracchi, 1900)--1st ed. had appeared in the review *Beato Giovanni da Parma*, *Periodico Bimensile* (Parma, 1888-9); JACOBILLI, *Vile de' Santi e Beati dell' Umbria*, I (Foligno, 1647), 329-34; AFFÒ in *Memorie degli Scrittori c Letterati Parmigiani*, I (Parma, 1789), 129-45; DAUNOU in *Histoire Littéraire de la France*, XX (Paris, 1842), 23-36 (antiquated); FÉRET, *La Faculté, de Théologie de Paris, Moyen Age*, II (Paris, 1895), 94-9; PICCONI, *Serie Cronologico-Bioqrafica dei Ministri e Vicari Prov. della Minoritica Provincia di Bologna* (Parma, 1908), 43-44; HOLZAPFEL, *Manuale Historiæ Ordinis Fratrum, Minorum* (Freiburg im Br., 1909), 25-30; German edition (Freiburg im Br., 1909), 28 33; RENÉ DE NANTES, *Histoire des Spirituels* (Paris, 1909), 145 205.

LIVARIUS OLIGER

John of Ragusa

John of Ragusa

(Sometimes confounded with John of Segovia, q.v.).

A Dominican theologian, president of the Council of Basle, legate to Constantinople, b. at Ragusa about 1380; d. at Argos, in the Peloponnesus, probably 1443. He entered the Dominican Order and devoted himself to the observance of the rule of his order and the study of the sacred sciences. By reason of his great attainments in theology, Scripture, and the Oriental languages, he was considered an oracle in his native Dalmatia. At the University of Paris he shone conspicuously and there received the doctor's cap about the beginning of the fifteenth century. In the year 1426 he was appointed procurator general of the Dominican Order, and went to reside at Rome under Pope Martin V. There he received marks of honour and esteem from the pope and the College of Cardinals, and the former eventually named him papal theologian for the General Council of Basle. John was, moreover, chosen to open the council, in place of Cardinal Julian Cesarini, who was detained by other business. Arriving at Basle on 19 May, 1431, he on the same day arranged with the Bishop of Basle for the opening of the council on the 23rd of the same month. The opening did not take place, however, until 23 July, 1431, in the cathedral church, when John preached from the

text: "Et angelus testamenti, quem vos vultis. Ecce venit" (Mal., iii, 1). In the council he exonerated the absent cardinals from the charge of contempt (Feb., 1433). On eight mornings he spoke against the doctrines of the Hussites and crushed all that was reprehensible in that heresy.

Having been sent as a legate of the council to Constantinople to urge the reunion of the Eastern and Western Churches, John of Ragusa induced the Emperor John Paleologus and the Patriarch Joseph to send an embassy to the council through the treaty which they made with Pope Eugenius IV was broken by the Greeks. John afterwards sojourned at Constantinople to study the Greek language and to become better acquainted with the situation of ecclesiastical affairs. Here he completed an etymological work bearing upon the Greek text of Scripture and destined to be of service to Catholic controversialists in treating of the doctrine of the Procession of the Holy Ghost against the Greek schismatics. He returned to Bologna as a member of a deputation, to obtain from Eugenius IV an assurance that the pope would be present at the council. Having acceded to this request, Eugenius employed John once more to be the bearer of a document (dated 15 July, 1437) to the Greek emperor in which the emperor's assistance was invited at a meeting of the council to be held in some Italian city. John's subsequent course has been a subject of dispute: some authors assert that he remained in sympathy with the council, while others insist that he allied himself with Eugenius IV, who made him Bishop of Argos. It is probable that he took the side of Eugenius. His extant writings are: (1) Discourse against the Hussites delivered at the Council of Basle; (2) the Acts, or Reports, of his embassies to Constantinople, to be found among the Acts of the Council of Basle; (3) an account of his travels in the East, preserved by Leo Allatius. His work on Greek indeclinable nouns and Scriptural Greek etymology seems to have been lost.

TOURON, *Histoire des hommes illustres de l'Ordre de Saint Dominique* (Paris, 1746); QUÉTIF AND ECHARD, *Script. Ord. Praedicatorum* (Paris, 1719).

ALBERT REINHART

John of Roquetaillade (De Rupescissa)

John of Roquetaillade (de Rupescissa)

Franciscan alchemist, date of birth unknown; d. probably at Avignon, 1362. After pursuing the study of philosophy for five years at Toulouse, he entered the Franciscan monastery at Orléans, where he continued his studies for five years longer. His experiments in distillation led to the discovery of what he termed *aqua vitæ*, or usually *quinta essentia*, and commended as a panacea for all disease. His work as an alchemist forms the subject-matter of "De consideratione quintæ essentiæ" (Basle, 1561) and

"De extractione quintæ essentiæ"; likewise "Libellus de conficiendo vero lapide philosophico ad sublevandam inopiam papæ et cleri in tempore tribulationis" (Strasburg, 1659). His false prophecies and violent denunciation of ecclesiastical abuses brought him into disfavour with his superiors, resulting in his imprisonment by Clement VI (1345) and Innocent VI (1356). While there he wrote in 1349 his "Visiones seu revelationes", and in 1356 "Vade Mecum in tribulatione" and "Ostensor" (in Brown, "Fascicula rerum expetendarum et fugiendarum", III, London, 1640). His other works include commentaries on the Sentences and on the "Oraculum Cyrilli", "Fragmenta revelationum", "Apologus propheticus", "De famulatu philosophiæ ad theologiam".

SBARALEA, *Suppl. ad script. Ord. Min.* (Rome, 1806); JEILER in *Kirchenlex.*, s. v. *Johannes von Roquetaillade*; SCHNÜRER in *Kirchliches Handlex.*.

F. M. RUDGE

John of Rupella

John of Rupella

Franciscan theologian, b. at La Rochelle (Rupella), towards the end of the twelfth century; d. 1245 (al., 1271). He seems to have entered the Franciscan Order at an early age, and was sent to the house of studies at Paris. There he was a disciple of Alexander of Hales, by whom he was presented for the bachelorship of theology. He was the first Franciscan to receive that degree at the University of Paris. In 1238 he was already a master of theology, with his own pupils, for his name is to be found in the list of masters convoked in that year by William, Bishop of Paris, to discuss the vexed question of ecclesiastical benefices. John was of the number of those who declared against the general lawfulness of plurality, and who afterwards taught the same doctrine in their schools. He appears henceforward to have enjoyed a very considerable reputation, and is described by Bernard of Besse as a professor of great fame for holiness and learning, whose writings were both solid and extremely useful. The same writer also declares him to be the best preacher of his day. This judgment should perhaps be tempered by the consideration of Bernard's anxiety to prove that the greatest theologian (Alexander of Hales), the greatest warrior (John of Brienne), and the greatest preacher, all three belonged to his own Franciscan Order.

In the dissensions which already rent the order, John was one of the most determined opponents of Brother Elias, and with Alexander of Hales placed himself at the head of the movement which brought about Elias's downfall in 1239. At the command of Haymo of Faversham, who succeeded Elias as general, he collaborated with Alexander of Hales, Robert of Bastia, Richard of Cornwall, and several others less important, on an explanation of the Rule of St. Francis. The work received the approbation of the

chapter (probably definitorial) of the order held at Bologna in 1242, and subsequently became known as the "Exposition of the Four Masters." Wadding and the majority of succeeding writers place John of Rupella's death in 1271, but a letter of Robert Grosseteste, Bishop of Lincoln, written in Sept. or Oct., 1245, speaks of him as being then already dead: "mortuis fratribus Alexandro de Hales, et Joanne de Rupellis." The date according to Denifle was 3 Feb., but according to du Boulay, 27 Oct. The first date would preclude all possibility of attendance at the Council of Lyons; and Luguet's assertion is probably thus without foundation. It is interesting, however, to note in this connection that a manuscript published in resume by Father Fidelis a Fanna ("Ratio Novae collectionis omnium operum S. Bonaventurae," Turin, 1874, 98) contains a sermon preached by Master John de Rupella in the Dominican Monastery of Lyons, before the Roman Court.

No complete edition of the works of John of Rupella has ever been published. The "Exposition of the Four Masters" was printed at Venice in 1513, in the "Firmamentum Trium Ordinum," pars 3a, p. 15b-19a. Two priests of the Diocese of La Rochelle, Canon Cholet and Fr. Grasilier, had already in 1875 prepared for the press the following: "Tractatus de anima"; "De Articulis fidei," or "Summa Theologica"; "De decem praeceptis"; "Commentaria in Matthaeum"; "Postillae in Epistolas Pauli"; "De vitiis"; "Sermones." Nothing has yet resulted from their enterprise. They had also catalogued as belonging to the same author: "Postillae super Daniele"; "in Marcum"; "in Lucam"; "in Apocalypsim." Du Boulay attributed to him a "Commentaria in quatuor Libros Sententiarum," and says he was the first to write such a commentary. His best known work is the "Summa de Anima." Father Fidelis a Fanna (op.cit., 82) says that no work on the same subject is to be found so frequently in MSS. of the thirteenth and fourteenth century in the many European libraries he searched. The author avails himself fully of the teaching of Aristotle and Avicenna, and touches upon all the important questions of psychology afterwards to be treated by the great Scholastics. The work was edited with an introduction and studies, in 1882, by Father Theophilus Domenichelli, O.F.M., from a MS. of the Biblioteca Nazionale at Florence, collated principally with two others (A, IV, 25, now no. 1288, and B, IV, 4, now no. 581) of the Casanatense, Rome.

BRENDAN JENNINGS

Saint John of Sahagun

St. John of Sahagun

Hermit, b. 1419, at Sahagun (or San Fagondez) in the Kingdom of Leon, in Spain; d. 11 June, 1479, at Salamanca; feast 12 June. In art he is represented holding a chalice and host surrounded by rays of light. John, the oldest of seven children, was born of pious and respected parents, John Gonzalez de Castrillo and Sancia Martinez. He received his first education from the Benedictines of his native place. According to the custom of the times, his father procured for him the benefice of the neighbouring parish Dornillos, but this caused John many qualms of conscience. He was later introduced to Alfonso de Cartagena, Bishop of Burgos (1435-1456) who took a fancy to the bright, high-spirited boy, had him educated at his own residence, gave him several prebends, ordained him priest in 1445, and made him canon at the cathedral. Out of conscientious respect for the laws of the Church, John resigned all and retained only the chaplaincy of St. Agatha, where he laboured zealously for the salvation of souls.

Finding that a more thorough knowledge of theology would be beneficial, he obtained permission to enter the University of Salamanca, made a four years' course, and merited his degree in divinity. During this time he exercised the sacred ministry at the chapel of the College of St. Bartholomew (parish of St. Sebastian), and held the position for nine years. He was then obliged to undergo an operation for stone, and during his illness vowed that if his life were spared, he would become a religious. On his recovery in 1463, he applied for admission to the Order of Hermits of St. Augustine, at the church of St. Peter, at Salamanca, and on 28 Aug., 1464, he made his profession.

He made such progress in religious perfection that he was soon appointed master of novices, and in 1471 prior of the community. Great was his devotion to the Blessed Sacrament, and at Mass he frequently saw the Sacred Host resplendent in glory. He was gifted with special power to penetrate the secrets of conscience, so that it was not easy to deceive him, and sinners were almost forced to make good confessions; he obtained wonderful results in doing away with enmities and feuds. In his sermons he, like another St. John the Baptist, fearlessly preached the word of God and scourged the crimes and vices of the day, though thereby the rich and noble were offended. He soon made many enemies, who even hired assassins, but these, awed by the serenity and angelic sweetness of his countenance, lost courage. Some women of Salamanca, embittered by the saint's strong sermon against extravagance in dress, openly insulted him in the streets and pelted him with stones until stopped by a patrol of guards. His scathing words on impurity produced salutary effects in a certain nobleman who had been living in open concubinage, but the woman swore vengeance, and it was popularly believed that she caused the saint's death by poison (this statement is found only in later biographies). Soon after death his veneration spread in Spain.

The process of beatification began in 1525, and in 1601 he was declared Blessed. New miracles were wrought at his intercession, and on 16 Oct., 1690, Alexander VIII entered his name in the list of canonized saints. Benedict XIII fixed his feast for 12 June. His relics are found in Spain, Belgium, and Peru. His life written by John of Seville towards the end of the fifteenth century with additions in 1605 and 1619, is used by the Bollandists in "Acta SS.", Jun., III, 112.

FRANCIS MERSHMAN

John of Salisbury

John of Salisbury

(JOHANNES DE SARESBERIA, surnamed PARVUS).

Born about 1115; died 1180; a distinguished philosopher, historian, churchman, and scholar. Born near Salisbury, he went at an early age to Paris, where he studied arts and philosophy (1136-38) under Peter Abelard, Alberic of Reims, and Robert of Melun; then under William of Conches, Richard l'Evêque, and Theoderic of Chartres at the famous school at this latter town (1138-40); finally again at Paris, completing his studies in theology under Gilbert de La Porrée, Robert Pullus, and Simon of Poissy

(1141-45). This solid education, under such brilliant masters, he perfected by some private teaching, perhaps with his lifelong friend Peter, Abbot of Moutier La Celle, near Troyes, with whom he was living in 1148. At the Council of Reims in this year, he was introduced to Theobald, Archbishop of Canterbury, by St. Bernard. After spending a few years at the papal Court at Rome, whither he went from Reims with Pope Eugene III, he returned to England and acted as private secretary to Theobald for several years, during which period he was repeatedly sent on delicate and important diplomatic missions to the Holy See, in 1159 he had "ten times crossed the Alps on his road from England" (*Metalogicus*, iii, prol., p. 113).

He was thus brought into intimate relations with princes and popes, especially with Henry II and his chancellor, Thomas à Becket, and with Pope Adrian IV, also an Englishman. In defending the rights of the Church, he incurred the king's displeasure in 1159 — when his forced seclusion enabled him to complete his two principal works the "*Policraticus*" and the "*Metalogicus*", both dedicated to Thomas à Becket — and again in 1163, when he was obliged to quit England. The next six years he spent with his friend Peter of La Celle, now Abbot of St. Remigius at Reims. Here he wrote "*Historia Pontificalis*". Thomas à Becket, who had succeeded Theobald as Archbishop of Canterbury in 1162, was soon obliged to follow John into exile. The latter steadily endeavoured to promote the cause of peace between the English king on the one hand and his archbishop and the Holy See on the other. Apparent success crowned those efforts in 1170, when both exiles returned. In a few months (29 Dec.) John witnessed the tragic murder of the saintly archbishop in the cathedral at Canterbury. In 1174 John became treasurer of Exeter cathedral. In 1176 he was appointed Bishop of Chartres. He attended the Third Lateran Council in 1179 and died the next year. He was interred in the monastery of St. Josaphat, near Chartres.

John of Salisbury was one of the most cultured scholars of his day. Notwithstanding the engrossing cares of his diplomatic career, his great learning and indefatigable industry enabled him to carry on an extensive and lifelong correspondence on literary, educational, and ecclesiastical topics with the leading scholars of Europe. His collected letters (over 300 in number), no less than his other works, form an invaluable source of the history of thought and activity in the twelfth century. His fine taste and superior training made him the most elegant Latin writer of his time. He is equally distinguished as an historian and as a philosopher: he was the first medieval writer to emphasize the importance of historical studies in philosophy and in all other branches of learning. Naturally of an eclectic turn, he displayed in philosophy a remarkably sound and judicious critical spirit. Familiar with all the phases of contemporary scholastic controversies, he was himself among the first to formulate clearly the solution known as "mod-

erate realism" in answer to the fundamental philosophical problem of the value and significance of universal ideas.

Works

The "Metalogicus" is a philosophical treatise in four books, in defence of the study of logic and philosophy, against a group of obscurantists whom he nicknamed *Cornificians*. It is the first medieval treatise to show acquaintance with the whole of Aristotle's "organon". The "Policraticus", in eight books, deals, as its sub-title (*De nugis curialium et vestigiis philosophorum*) indicates, partly with philosophy and learning and readable miscellaneous compilation. The "Entheticus" (*De dogmate philosophorum*) is a Latin elegiac poem of 1852 lines, apparently intended as an introduction to the "Policraticus", and covering practically the same ground in briefer form. The authenticity of the "De Septem Septenis", a brief on the seven liberal arts, is doubted by Hauréau (*Nouvelle Biographie Générale*, xxv, 539, 1858) and Schaarschmidt (pp. 278 sq.) The "Historia Pontificalis" was first published by Arndt (*Monumenta Germaniae Historica*, xx, 517-45, 1868), and identified as the work of John, by Giesebrecht (*Bay. Akad. d. Wissensch.*, Munich, 1873, 124). The actual MS. carries on the Gembloux continuation of Sigebert from 1148 to 1152. It was written about 1164, and dedicated to Peter of La Celle. John also wrote a "Vita Sti. Anselmi" (1163), a "Vita Sti. Thomae Cantuar." (1171), and the letters already referred to. All these works (except "Hist Pont.") were edited by Giles, 5 vols., London, 1848, reprinted in P.L. .CXCIX; "Policraticus, also ed. C.C.J. Webb (2 vols., Oxford, 1909). The materials for John's biography are contained mainly in his own letters and other works, and on the letters of Peter of La Celle.

For John of Salisbury and the Bull "Laudabiliter", see ADRIAN IV.

Materials for Hist. Thomas Becket, ed. ROBERTSON AND SHEPPARD, (7 vols., R. S. London); SCHAARSCHMIDT, *Jonnes Saresberiensis nach Leben und Studien, Schriften und Philosophie* (Leipzig, 1862), a good critical appreciation of John's attainments as a scholar, but biography needs modification; DEMIMUID, *Jean de Salisbury* (Paris, 1873), good on Correspondence; PAULI in DOVE AND FRIEDBERG, *Zeitschrift f. Kirchenrecht*, XVI (1881), 271, POOLE, *Illustrations of the History of Medieval Thought* (London, 1884), IDEM in *Dictionary of National Biography*, s. v. NORGATE, *England under the Angevin Kings* (London, 1887), STUBBS, *Lectures on the Study of Med. and Mod. Hist.*, I (London, 1886), vi and vii; WEBB in *Proceedings of Aristotelean Society* (London, 1894), p. 91; DE WULF, *Histoire de la philosophie medievale* (Louvain, 1905), pp. 217 sqq.; HAUREAU, *Hist. philos. scol.* (Paris, 1872); TURNER, *History of Philosophy* (Boston, 1903), 299 sqq.

P. COFFEY

John of Segovia

John of Segovia

A Spanish theologian, b. at Segovia towards the end of the fourteenth century; d. probably in 1458. Nothing is known of him before he took part in the Council of Basle, except that he was archdeacon at Villaviciosa, canon at Toledo, and professor of theology at the University of Salamanca. In 1432 the University of Salamanca and King John II of Castile sent him as their representative to the Council of Basle, where he was one of the ablest defenders of the superiority of the council over the pope. At first he endeavoured to mitigate the conflict between the council and Pope Eugene IV, with whom he spent some time at Florence in 1435, but afterwards he became one of the chief supporters of the revolutionary party at the council. He took part in the twenty-eighth session (1 October, 1437) at which Eugene IV was declared contumacious, and in the thirty-third session (16 May, 1439) at which the pope was declared a heretic. In March, 1439, John of Segovia represented the council at the Diet of Mainz. After Eugene IV was deposed by the council on 25 June, 1439, John of Segovia was appointed one of the committee whose duty it was to select a number of theologians to elect the new pope. He was one of the thirty-three who on 5 November, 1439, elected the antipope Felix V. In recognition for his services he was created cardinal by the antipope on 12 October, 1440. He represented Felix V at the Parliament of Bourges in 1440, at the Diet of Mainz in 1441, and that of Frankfort in 1442. At the end of the schism in 1449 he resigned the cardinalate, was appointed titular Bishop of Caesarea by Eugene IV, and retired to a Spanish monastery.

His most important literary work is an extensive history of the Council of Basle, "Historia generalis concilii Basiliensis. Libri XVIII", edited by Birk and Beer in "Monumenta conciliorum generalium saeculi deeimi quinti: Scriptor.", II-IV (Vienna, 1873-96). His other works are a treatise in favour of the Immaculate Conception of our Lady, printed at Brussels in 1664; a refutation of the Koran, entitled "De mittendo gladio in Saracenos"; a defense of the "Filioque" against the Greeks entitled "De processu Spiritus Sancti" (Basle, 1476); a Biblical concordance, "Concordantiae biblicae vocum indeclinabilium" (Basle, 1476); and a few works defending the superiority of a general council over the pope.

ZIMMERMANN, Juan de Segovia (Breslau 1882), ANTONIO, Bibliotheca Hispana Vetus, II (Madrid. 1788), 225-34; HALLER, Concilium Basiliense, Studien und Dokumente, I (Basle, 1896), 19-52.

MICHAEL OTT

John of St. Thomas

John of St. Thomas

(Family name John Poinso), theologian, born at Lisbon, 9 June, 1589; died at Fraga, Spain, 17 June, 1644. Of noble parentage, he was sent early to the University of Coimbra, displayed talents of the first order, completed his humanities and philosophy, and obtained the degree of Master of Arts. He then entered the University of Louvain. Here, too, he showed remarkable ability, and won the title of Bachelor of Theology at an early age. He joined the Dominicans at Madrid in 1612 or 1613, taking the name of John of St. Thomas, by which he is known to history. As professor of philosophy and theology in a monastery at Alcalá, he soon took rank among the most learned men of the time, and was placed successively (1630 and 1640) in charge of the two principal chairs of theology in the university of that city. His renown drew the largest number of scholars that had ever attended its theological faculties. No man enjoyed a greater reputation in Spain, or was more frequently consulted on points of doctrine and ecclesiastical matters. His theological and philosophical writings, which have gone through many editions, are among the best expositions of St. Thomas's doctrine, of which he is acknowledged to be one of the foremost interpreters. Though he took an active part in the scholastic discussions of his times, his courtesy was such that he is said never to have hurt an opponent's feelings. So faithful was he to the traditions of his order and the principles of the Angelic Doctor that in his last illness he could declare that, in all the thirty years he had devoted to teaching and writing, he had not taught or written anything contrary to St. Thomas. His humility and his devotion to education caused him to refuse many dignities offered him by the Church and his order. In 1643 Philip IV offered him the office of royal confessor, a position which only religious obedience could induce him to accept. His writings comprise: "Cursus philosophicus Thomisticus" (9 vols.); "Cursus Theologicus" (9 vols.)--a commentary on the "Summa Theologica" of St. Thomas; "Tractatus de Approbatione, Auctoritate, et Puritate Doctrinae D. Thomae Aquinatis"; a "Compendium of Christian Doctrine" (in Spanish); and a "Treatise on a Happy Death" (in Spanish), written at the command of Philip IV.

Quétif and Echard, *Scriptores Ord. Praed.*, II (Paris, 1721), 538; Touron, *Hommes illustres de l'ordre de St. Dominique*, V (Paris, 1749), 248; Hurter, *Nomenclator*, I (2nd ed., Innsbruck, 1892), 375; *Année Dominicaine*, II June, 358-365.

VICTOR F. O'DANIEL

St. John of the Cross

St. John of the Cross

Founder (with St. Teresa) of the Discalced Carmelites, doctor of mystic theology, b. at Hontoveros, Old Castile, 24 June, 1542; d. at Ubeda, Andalusia, 14 Dec., 1591. John de Yepes, youngest child of Gonzalo de Yepes and Catherine Alvarez, poor silk weavers of Toledo, knew from his earliest years the hardships of life. The father, originally of a good family but disinherited on account of his marriage below his rank, died in the prime of his youth; the widow, assisted by her eldest son, was scarcely able to provide the bare necessities. John was sent to the poor school at Medina del Campo, whither the family had gone to live, and proved an attentive and diligent pupil; but when apprenticed to an artisan, he seemed incapable of learning anything. Thereupon the governor of the hospital of Medina took him into his service, and for seven years John divided his time between waiting on the poorest of the poor, and frequenting a school established by the Jesuits. Already at that early age he treated his body with the utmost rigour; twice he was saved from certain death by the intervention of the Blessed Virgin. Anxious about his future life, he was told in prayer that he was to serve God in an order the ancient perfection of which he was to help bring back again. The Carmelites having founded a house at Medina, he there received the habit on 24 February, 1563, and took the name of John of St. Matthias. After profession he obtained leave from his superiors to follow to the letter the original Carmelite rule without the mitigations granted by various popes. He was sent to Salamanca for the higher studies, and was ordained priest in 1567; at his first Mass he received the assurance that he should preserve his baptismal innocence. But, shrinking from the responsibilities of the priesthood, he determined to join the Carthusians.

However, before taking any further step he made the acquaintance of St. Teresa, who had come to Medina to found a convent of nuns, and who persuaded him to remain in the Carmelite Order and to assist her in the establishment of a monastery of friars carrying out the primitive rule. He accompanied her to Valladolid in order to gain practical experience of the manner of life led by the reformed nuns. A small house having been offered, St. John resolved to try at once the new form of life, although St. Teresa did not think anyone, however great his spirituality, could bear the discomforts of that hovel. He was joined by two companions, an ex-prior and a lay brother, with whom he inaugurated the reform among friars, 28 Nov., 1568. St. Teresa has left a classical description of the sort of life led by these first Discalced Carmelites, in chaps. xiii and xiv of her "Book of Foundations". John of the Cross, as he now called himself, became the first master of novices, and laid the foundation of the spiritual edifice which

soon was to assume majestic proportions. He filled various posts in different places until St. Teresa called him to Avila as director and confessor to the convent of the Incarnation, of which she had been appointed prioress. He remained there, with a few interruptions, for over five years. Meanwhile, the reform spread rapidly, and, partly through the confusion caused by contradictory orders issued by the general and the general chapter on one hand, and the Apostolic nuncio on the other, and partly through human passion which sometimes ran high, its existence became seriously endangered.

St. John was ordered by his provincial to return to the house of his profession (Medina), and, on his refusing to do so, owing to the fact that he held his office not from the order but from the Apostolic delegate, he was taken prisoner in the night of 3 December, 1577, and carried off to Toledo, where he suffered for more than nine months close imprisonment in a narrow, stifling cell, together with such additional punishment as might have been called for in the case of one guilty of the most serious crimes. In the midst of his sufferings he was visited with heavenly consolations, and some of his exquisite poetry dates from that period. He made good his escape in a miraculous manner, August, 1578. During the next years he was chiefly occupied with the foundation and government of monasteries at Baeza, Granada, Cordova, Segovia, and elsewhere, but took no prominent part in the negotiations which led to the establishment of a separate government for the Discalced Carmelites. After the death of St. Teresa (4 Oct., 1582), when the two parties of the Moderates under Jerome Gratian, and the Zelanti under Nicholas Doria struggled for the upper hand, St. John supported the former and shared his fate. For some time he filled the post of vicar provincial of Andalusia, but when Doria changed the government of the order, concentrating all power in the hands of a permanent committee, St. John resisted and, supporting the nuns in their endeavour to secure the papal approbation of their constitutions, drew upon himself the displeasure of the superior, who deprived him of his offices and relegated him to one of the poorest monasteries, where he fell seriously ill. One of his opponents went so far as to go forth to monastery gathering materials in order to bring grave charges against him, hoping for his expulsion from the order which he had helped to found.

As his illness increased he was removed to the monastery of Ubeda, where he at first was treated very unkindly, his constant prayer, "to suffer and to be despised", being thus literally fulfilled almost to the end of his life. But at last even his adversaries came to acknowledge his sanctity, and his funeral was the occasion of a great outburst of enthusiasm. The body, still incorrupt, as has been ascertained within the last few years, was removed to Segovia, only a small portion remaining at Ubeda; there was some litigation about its possession. A strange phenomenon, for which no satisfactory explanation has been given, has frequently been observed in connexion with the relics

of St. John of the Cross: Francis de Yepes, the brother of the saint, and after him many other persons have noticed the appearance in his relics of images of Christ on the Cross, the Blessed Virgin, St. Elias, St. Francis Xavier, or other saints, according to the devotion of the beholder. The beatification took place on 25 Jan., 1675, the translation of his body on 21 May of the same year, and the canonization on 27 Dec., 1726.

He left the following works, which for the first time appeared at Barcelona in 1619.

- 1 "The Ascent of Mount Carmel", an explanation of some verses beginning: "In a dark night with anxious love inflamed". This work was to have comprised four books, but breaks off in the middle of the third.
- 2 "The Dark Night of the Soul", another explanation of the same verses, breaking off in the second book. Both these works were written soon after his escape from prison, and, though incomplete, supplement each other, forming a full treatise on mystic theology.
- 3 An explanation of the "Spiritual Canticle", (a paraphrase of the Canticle of Canticles) beginning "Where hast Thou hidden Thyself?" composed part during his imprisonment, and completed and commented upon some years later at the request of Venerable Anne of Jesus.
- 4 An explanation of a poem beginning: "O Living Flame of Love", written about 1584 at the bidding of Dona Ana de Penalosa.
- 5 Some instructions and precautions on matters spiritual.
- 6 Some twenty letters, chiefly to his penitents. Unfortunately the bulk of his correspondence, including numerous letters to and from St. Teresa, was destroyed, partly by himself, partly during the persecutions to which he fell a victim.
- 7 "Poems", of which twenty-six have been hitherto published, viz., twenty in the older editions, and recently six more, discovered partly at the National Library at Madrid, and partly at the convent of Carmelite nuns at Pamplona.
- 8 "A Collection of Spiritual Maxims" (in some editions to the number of one hundred, and in others three hundred and sixty-five) can scarcely count as an independent work, as they are culled from his writings.

It has been recorded that during his studies St. John particularly relished psychology; this is amply borne out by his writings. He was not what one would term a scholar, but he was intimately acquainted with the "Summa" of St. Thomas Aquinas,

as almost every page of his works proves. Holy Scripture he seems to have known by heart, yet he evidently obtained his knowledge more by meditation than in the lecture room. But there is no vestige of influence on him of the mystical teaching of the Fathers, the Aeropagite, Augustine, Gregory, Bernard, Bonaventure, etc., Hugh of St. Victor, or the German Dominican school. The few quotations from patristic works are easily traced to the Breviary or the "Summa". In the absence of any conscious or unconscious influence of earlier mystical schools, his own system, like that of St. Teresa, whose influence is obvious throughout, might be termed empirical mysticism. They both start from their own experience, St. Teresa avowedly so, while St. John, who hardly ever speaks of himself, "invents nothing" (to quote Cardinal Wiseman), "borrows nothing from others, but gives us clearly the results of his own experience in himself and others. He presents you with a portrait, not with a fancy picture. He represents the ideal of one who has passed, as he had done, through the career of the spiritual life, through its struggles and its victories".

His axiom is that the soul must empty itself of self in order to be filled with God, that it must be purified of the last traces of earthly dross before it is fit to become united with God. In the application of this simple maxim he shows the most uncompromising logic. Supposing the soul with which he deals to be habitually in the state of grace and pushing forward to better things, he overtakes it on the very road leading it, in its opinion to God, and lays open before its eyes a number of sores of which it was altogether ignorant, viz. what he terms the spiritual capital sins. Not until these are removed (a most formidable task) is it fit to be admitted to what he calls the "Dark Night", which consists in the passive purgation, where God by heavy trials, particularly interior ones, perfects and completes what the soul had begun of its own accord. It is now passive, but not inert, for by submitting to the Divine operation it co-operates in the measure of its power. Here lies one of the essential differences between St. John's mysticism and a false quietism. The perfect purgation of the soul in the present life leaves it free to act with wonderful energy: in fact it might almost be said to obtain a share in God's omnipotence, as is shown in the marvelous deeds of so many saints. As the soul emerges from the Dark Night it enters into the full noonlight described in the "Spiritual Canticle" and the "Living Flame of Love". St. John leads it to the highest heights, in fact to the point where it becomes a "partaker of the Divine Nature". It is here that the necessity of the previous cleansing is clearly perceived the pain of the mortification of all the senses and the powers and faculties of the soul being amply repaid by the glory which is now being revealed in it.

St. John has often been represented as a grim character; nothing could be more untrue. He was indeed austere in the extreme with himself, and, to some extent, also with others, but both from his writings and from the depositions of those who knew

him, we see in him a man overflowing with charity and kindness, a poetical mind deeply influenced by all that is beautiful and attractive.

The best life of St. John of the Cross was written by JEROME DE SAN JOSÉ (Madrid, 1641), but, not being approved by the superiors, it was not incorporated in the chronicles of the order, and the author lost his position of annalist on account of it.

BENEDICT ZIMMERMAN

John of Victring

John of Victring

(JOHANNES VICTORENSIS or DE VICTORIA).

Chronicler, b. probably between 1270 and 1280; d. at Victring, Austria, 12 November, 1347. Nothing is known of his early life. In 1307 he became abbot of the Cistercian monastery of Victring, in Karinthia (Austria), and was later both chaplain and confidential secretary to Duke Henry of Karinthia. On the latter's death in 1335, John journeyed to Linz at the request of the duke's daughter, Margaretha Maultasch, to defend before Louis IV her claims to her father's estates. But the two dukes, Albert II and Otto of Austria, took possession of the contested lands in her stead, and thus became the lords of Victring. They likewise soon learned to value the great ability of the abbot, and consulted him in all the more important matters of government. He frequently tarried in Vienna as their confidential secretary until 1341, when he withdrew finally to the quiet of his monastery to write the history of his own time. His chronicle, to which he himself gave the title of "*Liber certarum historiarum*," has come down to us under various forms. In its original form, as preserved in a manuscript at Munich, it is a history of Austria and Karinthia from 1231 to 1341, and is based for the earlier period on the rhyming chronicle of Ottocar of Styria, while the rest was written from data which he himself had collected in the course of his travels.

This work was enlarged the following year (1342) into a chronicle of the empire, which began with the year 1217 (published by Boehmer, "*Fontes rerum Germanicarum*," I, 271-450; German translation by Friedensburg in the "*Geschichtsschreiber der duetschen Vorzeit*," Leipzig, 1888). Once more he rewrote it in 1343, and this time he began with the Carovingian period. This revised work has only reached us through a later compilation, the so-called "*Chronicon Anonymi Leobiensis*," published by Pez, "*Scriptores rerum Austriacarum*," I, 751-966. John ranks among the most important chroniclers of the end of the Middle Ages. He was a very learned man and well acquainted with the Latin and Greek poets. His narrative is lucid, and his judgments on the events of his own time show great impartiality. He is influenced by Otto of Freising,

and condemns in his chronicle the anti-Roman policy of Emperor Louis the Bavarian (1314-47).

MAHREHOLTZ, Ueber Johann von Victring als Historiker in Forschungen zur deutschen Geschichte, XIII (Berlin, 1873), 535 sqq.; FORNIER, Abt Johann von Viktring (Berlin, 1874); IDEM in Allgemeine Deutsche Biographie, XIV (Munich, 1881), 476 sqq.

PATRICIUS SCHLAGER

John of Winterthur

John of Winterthur

(Johannes Vitoduranus.)

Historian, born about 1300 at Winterthur (Switzerland); died subsequently to 1348, probably at Zurich. All that is known of his life is that he attended the school of his native town from 1309 to 1315, and that as a Franciscan he lived at Basle in 1328, at Villingen in 1336, and at Lindau from 1343 onwards. His chronicle (*Chronicon a Friderico II Imperatore ad annum 1348*) was at first published by Eccard, *"Corpus hist. medii ævi"*, I (1723); a better rendition was provided by Füsslin, *"Thesaurus historiæ Helveticæ"* (1735), but the best edition was given by Wyss in *"Archiv für schweizerische Geschichte"*, XI (1856). It was translated into German by Freuler (*Johannsvon Winterthur Chronik*", 1866). It was begun in 1340, and is a full history of events to that year. His record of the following years consists of notes or annals; whether he revised it later, remains to this day a matter of uncertainty. It is at any rate a fruitful source of information on the first half of the fourteenth century, and gives us in particular a clear idea of the conflicts which arose between the cities and the nobles of Upper Swabia. At the same time it affords us a general view of events in the empire, especially of Louis the Bavarian's conduct toward the papacy and of the attitude assumed in these controversies by the Franciscan Order, which he championed with great ardour. He was a man of culture, well-versed in spiritual and in secular literature, but he not infrequently showed great credulity, and took delight in reporting at length the observations of others, which fact has made his work of great value to the history of civilization.

PATRICIUS SCHLAGER

John Parvus

John Parvus

Called in his day, JEHAN PETIT or LE PETIT.

A French theologian and professor in the University of Paris; b. most likely at Brachy, Caux, in Normandy, and certainly in the Diocese of Rouen, about 1360; d. 15 July, 1411. Some historians (Duboulay, Wadding) say he was a Friar Minor, others that he was a Dominican: as a matter of fact, he never was a member of any religious order. He owed his education to the generosity of the Duke of Burgundy, who granted him a pension. In the first extant document that records his name, he is called master of arts (16 August, 1385). Two years later his name occurs in the list sent by the University of Paris (31 July, 1387) to Pope Clement VII, recommending its masters for vacant benefices.

The Church at that time was torn by the great Western Schism. France sided with Clement VII, but every one was anxious for reunion. John Parvus gave expression to this desire in his "Complainte de l'Eglise," a poem, which has been recently discovered in the National Library at Paris. This poem of 322 verses was composed in 1394. He had already written four others, the "Disputation des pastourelles" (1388), wherein he defends the Immaculate Conception of the Blessed Virgin; the "Livre du champ d'or"; the "Livre du miracle de Basqueville" (1389); and the "Vie de Monsieur saint Léonard," about the same time. The last three works have recently been published. They do not display much literary talent, but their sentiment is dignified and delicate; they offer an unflattering picture of the society of the day, and they form a useful contribution to the study of contemporary manners. He became a licentiate in theology in May, 1400, and received the degree of Doctor before 1403, since he is mentioned in that year on the roll of the university as an active member of the theological faculty of Paris. In April, 1407, he formed part of the imposing embassy sent by Charles VI to urge Benedict XIII and Gregory XII to abdicate and thus reunite Christendom. This embassy had just returned to Paris, after a fruitless journey, when an event took place that gave John Parvus a great notoriety in history.

On 23 November, 1407, the Duke of Orléans, brother of King Charles VI, was murdered by assassins in the pay of John the Fearless, Duke of Burgundy. The Duke of Orléans was unpopular with the people and was held responsible for the disorders and the taxations under which the kingdom groaned, during the madness of the king, his brother. The University of Paris was bitterly opposed to him for having renewed obedience to Benedict XIII. The Duke of Burgundy, on the contrary, was very popular; he was regarded as a friend of the commoners and an opponent of taxation and abuses,

while the university was grateful to him for his lack of sympathy with the Avignon pope. Being excluded from the royal council after the assassination, he withdrew to his estates in Flanders, raised an army, and called around him several of the university professors, including John Parvus, who for three years had been attached to his suite and was receiving a pension from him. Reassured, doubtless, by the talents of his defender, he declared that he would go to Paris and justify himself. In vain the royal council forbade him to enter the capital; he came, and was received with acclamations by the populace. He demanded an audience with the king. It was granted him on 8 March, 1408, in the Hôtel de St-Paul, where the court habitually resided.

There, in presence of the Dauphin, of the Duke of Anjou, King of Sicily, of Cardinal de Bar, of the Dukes of Berry, Brittany, Bar, and Lorraine, of the rector of the University of Paris, and of many counts, barons, knights, and citizens, John Parvus delivered on behalf of his client a pedantic address, bristling with propositions, syllogisms, Scriptural texts, and examples from Holy Writ. His argument may be expressed in the following syllogism: Whosoever is guilty of high treason and becomes a tyrant, deserves to be punished with death, all the more so when he is a near relative of the king; and in that case the natural, moral, and Divine laws allow any subject whatever, without any command or public authorization, to kill him or to have him killed openly, or by stealth; and the more closely the author of the slaying is related to the king the more meritorious the act. Now, the Duke of Orléans — so ran the minor proposition — a slave to the passion of greed, the source of all evil, was guilty of high treason, and was a tyrant; which was proved by holding him guilty of all the pretended crimes which popular imagination and the partisans of the Duke of Burgundy laid to his charge. The conclusion was therefore that the Duke of Burgundy not only should not be punished or blamed for what had been done to the Duke of Orléans, but rather should be rewarded. This thesis seemed preposterous to the more rational members of the assembly; but the Duke of Burgundy was present with his troops, ready to suppress any attempt at reply, and further he was in the good graces of the university; so he had no difficulty in obtaining letters of pardon from the king. As for John Parvus, who in his address was not ashamed to admit that he was receiving, and expected still to receive, a pension from the Duke of Burgundy, he found it more prudent to withdraw from Paris and retire to the estate of the Duke of Burgundy at Hesdin, Artois, where he died in a house of his protector, regretting, it is said, that he had ever allowed himself to defend such a proposition.

The interest it excited was not to die with him. As long as the Duke of Burgundy was all-powerful in Paris, the argument could not be attacked publicly, but when he was expelled, Gerson, in a sermon delivered before the king, strongly denounced seven propositions of John Parvus as heretical and scandalous (1413). Shortly afterwards the

king asked the Bishop of Paris, Gerard de Montaigu, and the inquisitor of France to examine them and to take whatever action they judged proper — without however mentioning the name of John Parvus. The bishop and the inquisitor with sixty doctors went into what was called a "Council of the Faith." After several sittings the speech of John Parvus and nine propositions, said to have been extracted from it, were condemned (23 February, 1414) by decree of the Bishop of Paris and of the inquisitor, and the book containing them was publicly burnt three days later. In the month of March following, the Duke of Burgundy appealed from the decision of the Bishop of Paris to Pope John XXIII. The pontiff entrusted the investigation to three cardinals. On the other hand, Gerson and the ambassadors of the King of France brought the affair before the council. At this juncture, Pope John XXIII left Constance (20 March, 1415) and withdrew from the council, while the King of France and the Duke of Burgundy made peace by the Treaty of Arras (22 February, 1415). Thereupon Charles VI ordered his representatives to take no action at the council against John Parvus, provided the Duke of Burgundy would also let the matter rest. Gerson broke the agreement by trying to obtain from the council a declaration that the writings of John Parvus contained numerous errors in matters of faith. The Duke of Burgundy replied by a letter in which, while disavowing the general principles that formed the major proposition of the argument of John Parvus, he maintained that the propositions condemned by the Bishop of Paris were not contained in the discourse. Thereupon the three cardinals, entrusted with the duke's appeal, cited the Bishop of Paris to appear before them, and as he failed to do so, they reversed his decision, declaring at the same time that they did not intend thereby to approve of the propositions condemned by him, but only wished to do justice to the Duke of Burgundy, who had not been heard at the trial. From that moment the trial of John Parvus became the battleground of the ambassadors of France and of the Duke of Burgundy, and even of the Emperor Sigismund. The council had no intention of lending its authority to any political party, and in its fifteenth session, 6 July, 1415, contented itself with a general condemnation of tyrannicide as upheld in the following proposition: "A tyrant may be licitly and meritoriously, and rightly put to death by any vassal or subject, even by resorting to secret plots, adulation, and feigned friendship, notwithstanding any oath of fealty to him or treaty concluded with him, without any judicial decree or order." But John Parvus was not mentioned and the council avoided saying that any such proposition was contained in his address, and no further decision was pronounced by the council on the particular case of John Parvus. After securing the condemnation of John Parvus in August, 1416, King Charles VI two years later disavowed Gerson and his supporters (6 October, 1418), and on 3 November, 1418, he rehabilitated John Parvus and annulled the sentences pronounced against him. This perhaps was the fairest settlement of the case

against him. His venal and odious defence of the assassination is worthy of all censure, but in justice it must be admitted that the propositions attributed to him by his adversaries are not contained in his discourse, at least in the form in which it has reached us.

ANTOINE DEGERT

Bl. John Payne

Bl. John Payne

Born in the Diocese of Peterborough; died at Chelmsford, 2 April, 1582. He went to Douai in 1574, was ordained priest by the Archbishop of Cambrai on 7 April, 1576, and left for England with Blessed Cuthbert Mayne on 24 April. He resided for the most part with Anne, widow of Sir William Petre, and daughter of Sir William Browne, sometime Lord Mayor of London, at Ingatestone, Essex, but also in London. Shortly after his arrival he reconciled George Godsalue, B.A. Oxon., a Marian deacon, of Bath diocese, whom he sent to Douai to be prepared for the priesthood, which he received at Cambrai on 20 December, 1576. John was arrested and imprisoned early in 1577, but, being not long afterwards discharged, came back to Douai in November. He probably returned to Ingatestone before Christmas, 1579. Early in July, 1581, he and Godsalue, who had come to England in June, 1577, were arrested in Warwickshire through the instrumentality of "Judas" Eliot, and, after being examined by Walsingham at Greenwich, were committed to the Tower on 14 July. There Blessed John was racked on 14 August, and again on 31 October. Eliot had accused him of plotting to kill the queen and her three most trusted statesmen. On this charge he was indicted at Chelmsford on 23 March, and, though no attempt was made to corroborate Eliot's story, the jury gave the verdict expected of them. At his execution the crowd interfered to prevent the infliction of the last barbarities until he was dead.

JOHN B. WAINWRIGHT

Bl. John Rochester

Bl. John Rochester

Priest and martyr, born probably at Terling, Essex, England, about 1498; died at York, 11 May, 1537. He was the third son of John Rochester, of Terling, and Grisold, daughter of Walter Writtle, of Bobbingworth. He joined the Carthusians, was a choir monk of the Charterhouse in London, and strenuously opposed the new doctrine of the royal supremacy. He was arrested and sent a prisoner to the Carthusian convent at Hull. From there he was removed to York, where he was hung in chains. With him there suffered one James Walworth (?Wannert; Walwerke), Carthusian priest and martyr, concerning whom little or nothing is known. He may have been the "Jacobus Walwerke" who signed the Oath of Succession of 1534. John Rochester was beatified in 1888 by Leo XIII.

His elder brother, Sir Robert Rochester, K.G. (b. about 1494; d. 28 Nov., 1557), was a zealous Catholic. Before 1551 he had received the appointment of comptroller of the household to Princess Mary Tudor. In that year the Privy Council ordered him to prevent any priest saying Mass in the princess's household, but he refused to interfere in any way with her private devotions, and was accordingly sent to the Tower. The next year he was allowed to retire to the country on account of his health, and was soon permitted to take up the post of comptroller once more. When the princess ascended the throne as Mary I, she remembered Rochester's faithful service. He was made chancellor of the Duchy of Lancaster; and he entered the inner circle of the Privy Council. He was one of the parliamentary representatives of Essex, 1553-5. He was buried at the Charterhouse at Sheen.

C.F. WEMYSS BROWN

Bl. John Sarkander

Bl. John Sarkander

Martyr of the seal of confession, born at Skotschau in Austrian Silesia, 20 Dec., 1576; died at Olmütz, 17 March, 1620. In 1603 he merited the title of master of philosophy at Prague, and after four years' study of theology was ordained priest at Graz.

He exercised his sacred functions in several places in the Diocese of Olmütz, and was made parish priest (1613) of Boskowitz, and (1616) of Holeschau in Moravia. Since the fifteenth century the sects of the Hussites and of the Bohemian (or United) Brethren had spread rapidly and taken possession of the churches and institutions of the Catholics, but when (1604) Ladislaus Poppel of Lobkowitz bought the estates of Holleschau, he gave the church to the Catholics, and made a Jesuit college out of the house occupied by the Bohemian Brethren. With the aid of the Jesuits, John Sarkander converted two hundred and fifty of the strayed sheep, but thereby drew upon himself the hatred of the neighbouring landlord, Bitowsky of Bistritz. In 1618 the Protestants took control of Moravia, and John left Holleschau, made a pilgrimage to the shrine of Our Lady of Czentoschau and passed a few weeks of retreat with the Minims, who had a house there. He spent some months at Krakow and (1619) returned to Holleschau. In February of the following year the Polish auxiliary troops sent to the emperor by King Sigismund, passed through Moravia and committed many depredations on the lands of the Protestants, but spared Holleschau when John met them with the Blessed sacrament in his hands. Bitowsky threw suspicions upon John Sarkander as if he, in conspiracy with Lobkowitz, had brought the enemy into the territory. John was taken prisoner and brought to Olmütz. The commission appointed for the trial was made up entirely of Protestants, but the Catholic city judge Johann Scintilla was forced to attend. He made a report of the whole transaction to the bishop, Franz Cardinal von Dietrichstein (1625). The questions put were: who had called the troops into the country; what underhand dealings John had practiced in Poland; what had been confided to him by Lobkowitz, whose confessor he was, and whose secret plans he therefore knew. Because John would not violate the secrets of the holy tribunal the rack was used on 13, 17 and 18 February. On each of the latter days the torture lasted for two and three hours, lighted candles and feathers soaked in oil, pitch, and sulphur were strewn over his body and ignited. He lingered from the effects for a month and died in prison. The people immediately began to venerate John Sarkander and to ask for his beatification. The process was opened under Benedict XIV but was interrupted. It was brought to a close by Pius IX, who pronounced the solemn beatification 6 May, 1860. The relics are in an altar dedicated to his name in the cathedral of Olmütz.

FRANCIS MERSHMAN

John Scholasticus

John Scholasticus

(*ho Scholastikos*; also called John of Antioch)

Patriarch of Constantinople (John III, 565-77), the author of an important collection of ecclesiastical laws; b. at Sirimis near Antioch; d. 577. Of his life there is little to say. He had been a lawyer before his ordination. He then became a priest in the Antiochene patriarchate; he was sent by his patriarch as legate (*apocrisarius*) to Constantinople in the reign of Justinian I (527-65). In 565 Eutychius I of Constantinople was deposed, and John succeeded him. When John died in 577, Eutychius was restored. Before his elevation to the patriarchate John had already made a collection of canons. There were such collections in use before his time; at first the decrees of the more important synods had been put together in loose collections, such as the "Codex canonum" used by the Council of Chalcedon (451). Since the fifth century these collections had increased, and at last attempts were made to replace the merely chronological order by a systematic one. Of such systematic arrangements that of John Scholasticus was, if not absolutely the first, at any rate the first of any importance. Between the years 540 and 560 he made what he called *Synagogy kanonon*. Pope Nicholas I (858-67), writing to Photius, alludes to it as "Concordia canonum." The work contained fifty titles, each with the canons concerning the subject of the title. For instance, the first title is: "Of the honour towards patriarchs ordained by the Canons." This is established by canons vii and vi of Nicaea, ii of Constantinople I, viii of Ephesus. Altogether the compiler quotes the Apostolic canons, those of ten synods, and sixty-eight canons from St. Basil's second and third letters to Amphilochius. It is the first attempt to collect canons from the letters of Fathers. The first edition contains 377 canons, arranged under fifty titles. After he became patriarch, John III enlarged his collection to sixty titles, and added to it eighty-seven chapters from the "Novellae" of Justinian. Towards the end of the sixth century another author added twenty-five more chapters taken from both the Codex and the "Novellae," concerning civil laws that affect Church matters. So the collection grew till it was finally enlarged into the "*Nomocanon*" of Photius.

VOELLUS AND JUSTELLUS, *Bibliotheca iuris canonici veteris*, II (Paris, 1661), 499-602, contains the text of the Concordia canonum; HEIMBACH, 'Anekdotia, II (Leipzig, 1840), 202-34, re-edits the text with variants and additions; PITRA, *Iuris eccles. Graecorum historia*, II (Rome, 1868), 368 sqq.; HERGENROETHER, *Das griechische Kirchenrecht in Archiv fuer katholisches Kirchenrecht*, XXIII (1870), 208 sqq.; IDEM, *Photius*, III (Ratisbon, 1869), 92-9; LE QUIEN, *Oriens Christianus*, I (Paris, 1740), 225.

ADRIAN FORTESCUE

Richard Malcolm Johnston

Richard Malcolm Johnston

Educator, author, b. 8 March, 1822, at Powellton, Georgia, U.S.A.; d. at Baltimore, Maryland, 23 September, 1898. His father was a Baptist minister, and his early education was received at a country school and finished at Mercer College. After graduating there he spent a year teaching and then took up the study of law and was admitted to the Bar in 1843. In 1857, he accepted an appointment to the chair of belles-lettres in the State University of Georgia, retaining it until the opening of the Civil War, when he began a school for boys on his farm near Sparta. This he kept going during the war, serving also for a time on the staff of General J.E. Brown, and helping to organize the state militia. At the close of the war he moved to Maryland, where he opened the Penn Lucy School for boys near Baltimore. One of his teaching staff here was the poet Sidney Lanier, who persuaded him to begin to write for publication, although he was then over fifty years old. His first stories were sent to the "Southern Magazine"; others to "The Century" followed, and became immediately popular. He had the knack of story-telling that depicted the homely children of the soil, quaint characters that filled the memories of his youth, and he embalmed their fading images with facility and a faithful regard to accuracy that preserved the bourgeois type of old Middle Georgia. His style was serene and facile, mingling humour with moral philosophy. As a critic he had poetic sympathy with wise discrimination.

Johnston became a Catholic in 1875, accepting the truth after long hesitation. His wife Frances Manfield, of old New England stock, had been received into the Church six months previously. He relates that he was thirty years old when he first saw a priest, and that his first investigations into the Faith were during the "Know-Nothing" campaign of 1855, when he read some of Bishop England's and Newman's works to confute a political opponent. With his conversion the attendance at his school, which was long associated with Baptist patronage, declined, and he gave it up and devoted himself entirely to literature — his popularity as a story writer having steadily increased — and to lecturing on literary topics. His published works include: "Dukesborough Tales" (1871-81), in which the impressions of his early school days in Georgia were elaborated; "Old Mark Langston" (1884); "Two Gray Tourists" (1885); "Mr. Absolom Billingslea and Other Georgia Folks" (1888); "The Primes" (1891); "Widow Guthrie" (1890); "Ogeechee Cross Firings" (1889); "Old Times in New Georgia" (1897); a "Life of Alexander H. Stephens" with whom he had been associated in law practice (1878). A collection of "Essays" was published in 1881 and he prepared a "Historical Sketch of English

Literature" (1872), a text-book for advanced students, used in Johns Hopkins University, and other institutions at which he gave lecture courses.

ARMSTRONG, in *The Catholic World Magazine* (New York, November, 1898); ALLIBONE, *Dictionary of Authors*, supplement, s.v.; *National Cyclopaedia of American Biography*, s.v.; *The Catholic News* (New York, September, 1898), files.

THOMAS F. MEEHAN

Bl. John Stone

Bl. John Stone

English martyr, executed at the Dane-John, Canterbury, probably in December, 1539, for denying the royal supremacy. He was an Austin Friar of Canterbury, and a doctor of divinity. He is probably the Austin Friar of whom Bishop Ingworth complained on 14 December, 1538, that "at all times he still held and still desired to die for it, that the king may not be head of the Church of England". When in prison before his martyrdom "after an uninterrupted fast of three days, he heard a voice, but without seeing the presence of anyone, calling him by name and exhorting him to be of good courage and not to hesitate to suffer with constancy for the truth of the opinion which he had professed".

Camm, *Lives of the English Martyrs*, I (London, 1904-5), 269; Gasquet, *Henry VIII and the English Monasteries* (London, 1906); Stanton, *Menology of England and Wales* (London and New York, 1887), 228, 647.

JOHN B. WAINEWRIGHT

Bl. John Story

Bl. John Story

(*Or Storey.*)

Martyr; born 1504; died at Tyburn, 1 June, 1571. He was educated at Oxford, and was president of Broadgates Hall, now Pembroke College, from 1537 to 1539. He entered Parliament as member for Hindon, Wilts, in 1547, and was imprisoned for opposing the Bill of Uniformity, 24 Jan.-2 March, 1548-9. On his release he retired with his family to Louvain, but after the accession of Queen Mary he returned to England (Aug., 1553), and became chancellor to Bishop Bonner. From 1553 to 1560 he sat for one or other parliamentary division of Wiltshire, and in the latter year he incurred the displeasure of Elizabeth for his outspoken opposition to the Bill of Supremacy. He was committed to the Fleet, 20 May, 1560, but escaped, was re-arrested

and imprisoned in the Marshalsea (1563). He once more made good his escape to Antwerp, where he renounced his English allegiance and became a Spanish subject. Under the Duke of Alva he held a position in the customs of Flanders until August, 1570, when he was kidnapped at Bergen-op-Zoon by Cecil's agents. He was brought to London and imprisoned in the Tower, where he was frequently racked, and on 26 May, 1571, he was indicted in Westminster Hall for having conspired against the queen's life and for having while at Antwerp assisted the Northern rebels. The saintly martyr bore his tortures with fortitude, asserted over and over his innocence of the charges, but refused to make any further plea, on the ground that he was a Spanish subject, and that consequently his judges had no jurisdiction. The spectacle of this trial moved Edmund Campion, who was present in the Hall, to reconsider his own position and opened his eyes to his duty as a Catholic. Blessed John Story was condemned 27 May, and spent his last night in the Tower, preparing for a death which his persecutors made as barbarously cruel as it was possible.

Camm, *Lives of the English Martyrs*, II (London, 1904-5), 14; Pollard in *Dict. Nat. Biog.*, s. v.

JOHN B. WAINESWRIGHT

John Talaia

John Talaia

Orthodox Patriarch of Alexandria (481-482) at the time of the Monophysite troubles. He had been a monk in the Canopis and administrator (*megas oikonomos*) of the diocese under the Patriarch Timothy Salofaciolus, who had sent him with Gennadius of Hermopolis as legate to the Emperor Zeno (474-491). Zeno was on very good terms with John Talaia, in whom every one foresaw the future Patriarch of Alexandria (Evagrius, "H.E.," III, xii; Felix III, Ep. i, 10, ii, 4, in Thiel, "Epist. Rom. Pont.," Braunsberg, 1867). It was said by his enemies that he was vain and ambitious, that he spent large sums of money in bribing courtiers and behaved as if he were already patriarch. He quarrelled with Acacius of Constantinople (471-489) however, who became his implacable enemy. Acacius afterwards said that Talaia had sworn that he would not accept the patriarchate. Just before his death, Timothy Salofaciolus again sent John Talaia to Constantinople with the petition that when he, Timothy, died he might have a Catholic (Chalcedonian) successor. This time, too, Talaia enjoyed the Emperor's favour. Zeno promised all he asked and spoke with great admiration of Timothy's pious legate. But Talaia ignored Acacius, who shut himself up and awaited his chance of revenge. Talaia made friends among the courtiers, ingratiating himself especially with a certain Illus, administrator of the palace. As soon as Timothy died (481) the Catholics

of Alexandria chose John Talaia to succeed him. Unfortunately the new patriarch then offended the emperor and gave Acacius his chance. He announced his succession at once to Rome and Antioch, according to custom. But he sent no announcement to the Patriarch of Constantinople, only writing to Illus begging him to tell the emperor. Illus was away at Antioch; so people at Constantinople heard the news before the official announcement arrived. This Zeno took as a personal affront. Acacius stepped in to take advantage of the situation. He persuaded Zeno that Talaia had broken his oath in accepting election and had advised his clergy to restore the name of the great Monophysite champion, Dioscorus, to their diptychs. This accusation was sheer calumny. Talaia was always unimpeachably orthodox. Zeno then refused to acknowledge Talaia and supported his rival Peter Mongus.

Peter Mongus (*Moggos*, hoarse) was a Monophysite who had already been set up as patriarch by his party when Timothy Ailuros died (477). During the life of Salofaciolus he had not made much headway; but now he was again brought forward by the Monophysites as rival patriarch to Talaia. Acacius had formerly been an enemy of Mongus; now he and the emperor supported him. The situation was further complicated by the publication of the famous "Henoticon" (482), by which Zeno and Acacius hoped to conciliate the Monophysites (see HENOTICON). Peter Mongus accepted it at once, whereas Talaia rejected it. Zeno then wrote to the pope (Simplicius, 463-483), saying that Talaia was unworthy of the See of Alexandria, being a perjurer and friend of Dioscorus, that Mongus was the right man to be patriarch. A result of this letter was that the Holy See did not at once acknowledge Talaia. But the pope answered the emperor, refusing to admit Mongus as patriarch in any case. Zeno, however, ordered the governor (*dux*) of Egypt to expel Talaia and establish Mongus in his place. Mongus then sent notice of his succession to Rome, Antioch, and Constantinople. Acacius acknowledged him and inserted his name in the Byzantine diptychs. Talaia, expelled from Alexandria, fled to Rome in 483. He there explained the whole situation to the pope and persuaded him to write two letters to Acacius denouncing Mongus. So also he was the adviser of the next pope, Felix II (or III, 483-492), in the great controversy about Mongus and the "Henoticon" that led to the Acacian schism. Mongus from this time became the great subject of dispute. Communion with him meant Monophysitism. John Talaia practically disappeared from the field. He stayed at Rome under the pope's protection (always of course opposed to Mongus and the "Henoticon") helping the papal court with his advice and knowledge of Eastern affairs. Liberatus thinks he became Bishop of Nolana in the Campagna, Le Quien thinks this unlikely (*Oriens Christ.*, II 419). Under Gelasius I (492-496) Talaia's name still occurs as that of a counsellor whose advice the pope willingly followed. He was never able to go back to his own see and died at Rome at a date unknown.

It may be of interest to note that Paul Drews ("Zur Entstehungsgeschichte des Kanons in der röm. Messe," Tübingen, 1902) attributes the present arrangement of the Canon of the Mass in some measure to John Talaia of Alexandria. His thesis is this: Originally the order of the Canon corresponded to the Antiochene Anaphora. It was re-arranged in the fifth century to make it conform more or less to the Alexandrine Liturgy, most probably by Gelasius I by the advice of his influential guest (op. cit., p. 38).

LE QUIEN, *Oriens Christianus*, II (Paris, 1740), 417-419. All the histories of Monophysitism and the Acacian schism contain some account of Talaia. ADRIAN FORTESCUE

St. John the Almsgiver

St. John the Almsgiver

(JOANNES ELEEMOSYNARIUS; JOANNES MISERICORS).

Patriarch of Alexandria (606-16), b. at Amathus in Cyprus about 550; d. there, 616. He was the son of one Epiphanius, governor of Cyprus, and was of noble descent; in early life he was married and had children, but they and his wife soon died, whereupon he entered the religious life.

On the death of the Patriarch Theodorus, the Alexandrians besought Emperor Phocas to appoint John his successor, which was accordingly done. In his youth John had had a vision of a beautiful maiden with a garland of olives on her head, who said that she was Compassion, the eldest daughter of the Great King. This had evidently made a deep impression on John's mind, and, now that he had the opportunity of exercising benevolence on a large scale, he soon became widely known all over the East for his munificent liberality towards the poor. One of the first steps he took was to make a list of several thousand needy persons, whom he took under his especial care. He always referred to the poor as his "lords and masters", because of their mighty influence at the Court of the Most High. He assisted people of every class who were in need. A shipwrecked merchant was thus helped three times, on the first two occasions apparently without doing him much good; the third time however, John fitted him out with a ship and a cargo of wheat, and by favourable winds he was taken as far as Britain, where, as there was a shortage of wheat, he obtained his own price. Another person, who was not really in need, applied for alms and was detected by the officers

of the palace; but John merely said "Give unto him; he may be Our Lord in disguise." He visited the hospitals three times every week, and he freed a great many slaves. He was a reformer who attacked simony, and fought heresy by means of improvements in religious education. He also reorganized the system of weights and measures for the sake of the poor, and put a stop to corruption among the officials. He increased the number of churches in Alexandria from seven to seventy.

John is said to have devoted the entire revenues of his see to the alleviation of those in need. A rich man presented him with a magnificent bed covering; he accepted it for one night, but then sold it, and disposed of the money in alms. The rich man "bought in" the article, and again presented it to John, with the same result. This was repeated several times; but John drily remarked: "We will see who tires first." It was not John. Another instance of his piety was that he caused his own grave to be dug, but only partly so, and appointed a servant to come before him on all state occasions and say "My Lord, your tomb is unfinished; pray give orders for its completion, for you know not the hour when death may seize you." When the Persians sacked Jerusalem in 614, John sent large supplies of food, wine, and money to the fleeing Christians. But eventually the Persians occupied Alexandria, and John himself in his old age was forced to flee to his native country, where he died.

His body was brought to Constantinople, thence to Ofen by King Matthias Corvinus of Hungary; thence in 1530 to Toll near Presburg, and finally in 1632 to Presburg cathedral. He was the original patron saint of the Hospitallers, and was commemorated by the Greeks on 12 Nov. His life, written by Leontius of Neapolis, in Cyprus, was translated into Latin by Anastasius the Librarian in the ninth century and was referred to at the Seventh General Council.

C.F. WEMYSS BROWN

St. John the Baptist

St. John the Baptist

The principal sources of information concerning the life and ministry of St. John the Baptist are the canonical Gospels. Of these St. Luke is the most complete, giving as he does the wonderful circumstances accompanying the birth of the Precursor and items on his ministry and death. St. Matthew's Gospel stands in close relation with that of St. Luke, as far as John's public ministry is concerned, but contains nothing in

reference to his early life. From St. Mark, whose account of the Precursor's life is very meagre, no new detail can be gathered. Finally, the fourth Gospel has this special feature, that it gives the testimony of St. John after the Saviour's baptism. Besides the indications supplied by these writings, passing allusions occur in such passages as Acts, xiii, 24; xix, 1-6; but these are few and bear on the subject only indirectly. To the above should be added that Josephus relates in his Jewish Antiquities (XVIII, v, 2), but it should be remembered that he is woefully erratic in his dates, mistaken in proper names, and seems to arrange facts according to his own political views; however, his judgment of John, also what he tells us regarding the Precursor's popularity, together with a few details of minor importance, are worthy of the historian's attention. The same cannot be said of the apocryphal gospels, because the scant information they give of the Precursor is either copied from the canonical Gospels (and to these they can add no authority), or else is a mass of idle vagaries.

Zachary, the father of John the Baptist, was a priest of the course of Abia, the eighth of the twenty-four courses into which the priests were divided (I Par., xxiv, 7-19); Elizabeth, the Precursor's mother, "was of the daughters of Aaron", according to St. Luke (I, 5); the same Evangelist, a few verses farther on (I, 26), calls her the "cousin" (*syggenis*) of Mary. These two statements appear to be conflicting, for how, it will be asked, could a cousin of the Blessed Virgin be "of the daughters of Aaron"? The problem might be solved by adopting the reading given in an old Persian version, where we find "mother's sister" (*metradelphe*) instead of "cousin". A somewhat analogous explanation, probably borrowed from some apocryphal writing, and perhaps correct, is given by St. Hippolytus (in Nicephor., II, iii). According to him, Mathan had three daughters: Mary, Soba, and Ann. Mary, the oldest, married a man of Bethlehem and was the mother of Salome; Soba married at Bethlehem also, but a "son of Levi", by whom she had Elizabeth; Ann wedded a Galilean (Joachim) and bore Mary, the Mother of God. Thus Salome, Elizabeth, and the Blessed Virgin were first cousins, and Elizabeth, "of the daughters of Aaron" on her father's side, was, on her mother's side, the cousin of Mary. Zachary's home is designated only in a vague manner by St. Luke: it was "a city of Juda", "in the hill-country" (I, 39). Reland, advocating the unwarranted assumption that *Juda* might be a misspelling of the name, proposed to read in its stead *Jutta* (Jos., xv, 55; xxi, 16; D.V.; Jota, Jeta), a priestly town south of Hebron. But priests did not always live in priestly towns (Mathathias's home was at Modin; Simon Machabeus's at Gaza). A tradition, which can be traced back to the time before the Crusades, points to the little town of Ain-Karim, five miles south-west of Jerusalem.

The birth of the Precursor was announced in a most striking manner. Zachary and Elizabeth, as we learn from St. Luke, "were both just before God, walking in all the commandments and justifications of the Lord without blame; and they had no

son, for that Elizabeth was barren" (i, 6-7). Long they had prayed that their union might be blessed with offspring; but, now that "they were both advanced in years", the reproach of barrenness bore heavily upon them. "And it came to pass, when he executed the priestly function in the order of his course before God, according to the custom of the priestly office, it was his lot to offer incense, going into the temple of the Lord. And all the multitude of the people was praying without, at the hour of incense. And there appeared to him an angel of the Lord, standing on the right side of the altar of incense. And Zachary seeing him, was troubled, and fear fell upon him. But the angel said to him: Fear not, Zachary, for thy prayer is heard; and they wife Elizabeth shall bear thee a son, and thou shalt call his name John: and thou shalt have joy and gladness, and many shall rejoice in his nativity. For he shall be great before the Lord; and shall drink no wine nor strong drink: and he shall be filled with the Holy Ghost, even from his mother's womb. And he shall convert many of the children of Israel to the Lord their God. And he shall go before him in the spirit and power of Elias; that he may turn the hearts of the fathers unto the children, and the incredulous to the wisdom of the just, to prepare unto the Lord a perfect people" (i, 8-17). As Zachary was slow in believing this startling prediction, the angel, making himself known to him, announced that, in punishment of his incredulity, he should be stricken with dumbness until the promise was fulfilled. "And it came to pass, after the days of his office were accomplished, he departed to his own house. And after those days, Elizabeth his wife conceived, and hid herself five months" (i, 23-24).

Now during the sixth month, the Annunciation had taken place, and, as Mary had heard from the angel the fact of her cousin's conceiving, she went "with haste" to congratulate her. "And it came to pass, that when Elizabeth heard the salutation of Mary, the infant" -- filled, like the mother, with the Holy Ghost -- "leaped for joy in her womb", as if to acknowledge the presence of his Lord. Then was accomplished the prophetic utterance of the angel that the child should "be filled with the Holy Ghost even from his mother's womb". Now as the presence of any sin whatever is incompatible with the indwelling of the Holy Ghost in the soul, it follows that at this moment John was cleansed from the stain of original sin. When "Elizabeth's full time of being delivered was come, . . . she brought forth a son" (i, 57); and "on the eighth day they came to circumcise the child, and they called him by his father's name Zachary. And his mother answering, said: Not so, but he shall be called John. And they said to her: There is none of thy kindred that is called by this name. And they made sign to his father, how he would have him called. And demanding a writing table, he wrote, saying: John is his name. And they all wondered" (i, 59-63). They were not aware that no better name could be applied (John, Hebr.; *Jehohanan*, i.e. "Jahweh hath mercy") to him who, as his father prophesied, was to "go before the face of the Lord to prepare his ways; to

give knowledge of salvation to his people, unto remission of their sins: through the bowels of the mercy of our God" (i, 76- 78). Moreover, all these events, to wit, a child born to an aged couple, Zachary's sudden dumbness, his equally sudden recovery of speech, his astounding utterance, might justly strike with wonderment the assembled neighbours; these could hardly help asking: "What an one, think ye, shall this child be?" (i, 66).

As to the date of the birth of John the Baptist, nothing can be said with certainty. The Gospel suggests that the Precursor was born about six months before Christ; but the year of Christ's nativity has not so far been ascertained. Nor is there anything certain about the season of Christ's birth, for it is well known that the assignment of the feast of Christmas to the twenty-fifth of December is not grounded on historical evidence, but is possibly suggested by merely astronomical considerations, also, perhaps, inferred from astronomico-theological reasonings. Besides, no calculations can be based upon the time of the year when the course of Abia was serving in the Temple, since each one of the twenty- four courses of priests had two turns a year. Of John's early life St. Luke tell us only that "the child grew, and was strengthened in spirit; and was in the deserts, until the day of his manifestation to Israel" (i, 80). Should we ask just when the Precursor went into the wilderness, an old tradition echoed by Paul Warnefried (Paul the Deacon), in the hymn, "Ut queant laxis", composed in honour of the saint, gives an answer hardly more definite than the statement of the Gospel: "Antra deserti teneris sub annis. . .petiit . . ." Other writers, however, thought they knew better. For instance, St. Peter of Alexandria believed St. John was taken into the desert to escape the wrath of Herod, who, if we may believe report, was impelled by fear of losing his kingdom to seek the life of the Precursor, just as he was, later on, to seek that of the new-born Saviour. It was added also that Herod on this account had Zachary put to death between the temple and the altar, because he had prophesied the coming of the Messiah (Baron., "Annal. Apparat.", n. 53). These are worthless legends long since branded by St. Jerome as "apocryphorum somnia".

Passing, then, with St. Luke, over a period of some thirty years, we reach what may be considered the beginning of the public ministry of St. John (see CHRONOLOGY, BIBLICAL). Up to this he had led in the desert the life of an anchorite; now he comes forth to deliver his message to the world. "In the fifteenth year of the reign of Tiberius Caesar. . .the word of the Lord was made unto John, the son of Zachary, in the desert. And he came into all the country about the Jordan, preaching" (Luke, iii, 1-3), clothed not in the soft garments of a courtier (Matt., xi, 8; Luke, vii, 24), but in those "of camel's hair, and a leather girdle about his loins"; and "his meat" -- he looked as if he came neither eating nor drinking (Matt., xi, 18; Luke, vii, 33)-"was locusts and wild honey" (Matt. iii, 4; Mark, i, 6); his whole countenance, far from suggesting the idea of a reed

shaken by the wind (Matt., xi, 7; Luke, vii, 24), manifested undaunted constancy. A few incredulous scoffers feigned to be scandalized: "He hath a devil" (Matt. xi, 18). Nevertheless, "Jerusalem and all Judea, and all the country about Jordan" (Matt., iii, 5), drawn by his strong and winning personality, went out to him; the austerity of his life added immensely to the weight of his words; for the simple folk, he was truly a prophet (Matt., xi, 9; cf. Luke, i, 76, 77). "Do penance: for the kingdom of heaven is at hand" (Matt., iii, 2), such was the burden of his teaching. Men of all conditions flocked round him.

Pharisees and Sadducees were there; the latter attracted perhaps by curiosity and scepticism, the former expecting possibly a word of praise for their multitudinous customs and practices, and all, probably, more anxious to see which of the rival sects the new prophet would commend than to seek instruction. But John laid bare their hypocrisy. Drawing his similes from the surrounding scenery, and even, after the Oriental fashion, making use of a play on words (*abanimbanium*), he lashed their pride with this well-deserved rebuke: "Ye brood of vipers, who hath shewed you to flee from the wrath to come? Bring forth therefore fruits worthy of penance. And think not to say within yourselves, We have Abraham for our father. For I tell you that God is able of these stones to raise up children to Abraham. For now the axe is laid to the root of the trees. Every tree therefore that doth not yield good fruit, shall be cut down, and cast into the fire" (Matt., iii, 7-10; Luke, iii, 7-9). It was clear something had to be done. The men of good will among the listeners asked: "What shall we do?" (Probably some were wealthy and, according to the custom of people in such circumstances, were clad in two tunics.-Joseph., "Antiq.", XVIII, v, 7). "And he answering, said to them: He that hath two coats, let him give to him that hath none; and he that hath meat, let him do in like manner" (Luke, iii, 11). Some were publicans; on them he enjoined not to exact more than the rate of taxes fixed by law (Luke, iii, 13). To the soldiers (probably Jewish police officers) he recommended not to do violence to any man, nor falsely to denounce anyone, and to be content with their pay (Luke, iii, 14). In other words, he cautioned them against trusting in their national privileges, he did not countenance the tenets of any sect, nor did he advocate the forsaking of one's ordinary state of life, but faithfulness and honesty in the fulfillment of one's duties, and the humble confession of one's sins.

To confirm the good dispositions of his listeners, John baptized them in the Jordan, "saying that baptism was good, not so much to free one from certain sins [cf. St. Thom., "Summ. Theol.", III, A. xxxviii, a. 2 and 3] as to purify the body, the soul being already cleansed from its defilements by justice" (Joseph., "Antiq.", XVIII, vii). This feature of his ministry, more than anything else, attracted public attention to such an extent that he was surnamed "the Baptist" (i. e. Baptizer) even during his lifetime (by Christ, Matt.,

xi, 11; by his own disciples, Luke, vii, 20; by Herod, Matt., xiv, 2; by Herodias, Matt., xiv, 3). Still his right to baptize was questioned by some (John, i, 25); the Pharisees and the lawyers refused to comply with this ceremony, on the plea that baptism, as a preparation for the kingdom of God, was connected only with the Messiah (Ezech., xxxvi, 25; Zach., xiii, 1, etc.), Elias, and the prophet spoken of in Deut., xviii, 15. John's reply was that he was Divinely "sent to baptize with water" (John, i, 33); to this, later on, our Saviour bore testimony, when, in answer to the Pharisees trying to ensnare him, he implicitly declared that John's baptism was from heaven (Mark, xi, 30). Whilst baptizing, John, lest the people might think "that perhaps he might be the Christ" (Luke, iii, 15), did not fail to insist that his was only a forerunner's mission: "I indeed baptize you with water; but there shall come one mightier than I, the latchet of whose shoes I am not worthy to loose: he shall baptize you with the Holy Ghost and with fire: whose fan is in his hand and he will purge his floor; and will gather the wheat into his barn, but the chaff he will burn with unquenchable fire" (Luke, iii, 16, 17). Whatever John may have meant by this baptism "with fire", he, at all events, in this declaration clearly defined his relation to the One to come.

Here it will not be amiss to touch on the scene of the Precursor's ministry. The locality should be sought in that part of the Jordan valley (Luke, iii, 3) which is called the desert (Mark, i, 4). Two places are mentioned in the Fourth Gospel in this connection: Bethania (John, i, 28) and Ennon (A. V. AEnon, John, iii, 23). As to Bethania, the reading Bethabara, first given by Origen, should be discarded; but the Alexandrine scholar perhaps was less wrong in suggesting the other reading, *Bethara*, possibly a Greek form of *Betharan*; at any rate, the site in question must be looked for "beyond the Jordan" (John, i, 28). The second place, Ennon, "near Salim" (John, iii, 23), the extreme northern point marked in the Madaba mosaic map, is described in Eusebius's "Onomasticon" as being eight miles south of Seythopolis (Beisan), and should be sought probably at Ed-Deir or El-Ftur, a short distance from the Jordan (Lagrange, in "Revue Biblique", IV, 1895, pp. 502-05). Moreover, a long-standing tradition, traced back to A.D. 333, associates the activity of the Precursor, particularly the Baptism of the Lord, with the neighbourhood of Deir Mar-Yuhanna (Qasr el- Yehud).

The Precursor had been preaching and baptizing for some time (just how long is not known), when Jesus came from Galilee to the Jordan, to be baptized by him. Why, it might be asked, should He "who did no sin" (I Pet., ii, 22) seek John's "baptism of penance for the remission of sins" (Luke, iii, 3)? The Fathers of the Church answer very appropriately that this was the occasion preordained by the Father when Jesus should be manifested to the world as the Son of God; then again, by submitting to it, Jesus sanctioned the baptism of John. "But John stayed him, saying: I ought to be baptized by thee, and comest thou to me?" (Matt., iii, 14). These words, implying, as

they do, that John knew Jesus, are in seeming conflict with a later declaration of John recorded in the Fourth Gospel: "I knew him not" (John, i, 33). Most interpreters take it that the Precursor had some intimation of Jesus being the Messiah: they assign this as the reason why John at first refused to baptize him; but the heavenly manifestation had, a few moments later, changed this intimation into perfect knowledge. "And Jesus answering, said to him: Suffer it to be so now. For so it becometh us to fulfil all justice. Then he suffered him. And Jesus being baptized, forthwith came out of the water: and lo, the heavens were opened to him. . . And, behold, a voice from heaven, saying: This is my beloved Son, in whom I am well pleased" (Matt., iii, 15-17).

After this baptism, while Jesus was preaching through the towns of Galilee, going into Judea only occasionally for the feast days, John continued his ministry in the valley of the Jordan. It was at this time that "the Jews sent from Jerusalem priests and Levites to him, to ask him: Who are thou? And he confessed, and did not deny: and he confessed: I am not the Christ. And they asked him: What then? Art thou Elias? And he said: I am not. Art thou the prophet? And he answered: No. They said, therefore, unto him: Who are thou, that we may give an answer to them that sent us? What sayest thou of thyself? He said: I am the voice of one crying in the wilderness, make straight the way of the Lord, as said the prophet Isaias" (John, i, 19-23). John denied he was Elias, whom the Jews were looking for (Matt., xvii, 10; Mark, ix, 10). Nor did Jesus admit it, though His words to His disciples at first sight seem to point that way; "Elias indeed shall come, and restore all things. But I say to you, that Elias is already come" (Matt., xvii, 11; Mark, ix, 11-12). St. Matthew notes "the disciples understood, that he had spoken to them of John the Baptist" (Matt., xvii, 13). This was equal to saying, "Elias is not to come in the flesh." But, in speaking of John before the multitude, Jesus made it plain that he called John Elias figuratively: "If you will receive it, he is Elias that is to come. He that hath ears to hear, let him hear" (Matt., xi, 14, 15). This had been anticipated by the angel when, announcing John's birth to Zachary, he foretold that the child would go before the Lord "in the spirit and power of Elias" (Luke, i, 17). "The next day, John saw Jesus coming to him and he saith: Behold the Lamb of God, behold him who taketh away the sin of the world. This is he of whom I said: After me there cometh a man, who is preferred before me: because he was before me. . . that he may be made manifest in Israel, therefore am I come baptizing with water.. . And I knew him not; but he who sent me to baptize with water, said to me: He upon whom thou shalt see the Spirit descending, and remaining upon him, he it is that baptizeth with the Holy Ghost. And I saw, and I gave testimony, that this is the Son of God" (John, i, 20-34).

Among the many listeners flocking to St. John, some, more deeply touched by his doctrine, stayed with him, thus forming, as around other famous doctors of the law,

a group of disciples. These he exhorted to fast (Mark, ii, 18), these he taught special forms of prayer (Luke, v, 33; xi, 1). Their number, according to the pseudo-Clementine literature, reached thirty (Hom. ii, 23). Among them was Andrew of Bethsaida of Galilee (John, i, 44). One day, as Jesus was standing in the distance, John, pointed Him out, repeated his previous declaration: "Behold the Lamb of God". Then Andrew, with another disciple of John, hearing this, followed Jesus (John, i, 36-38). The account of the calling of Andrew and Simon differs materially from that found in St. Matthew, St. Mark, and St. Luke; yet it should be noticed that St. Luke, in particular, so narrates the meeting of the two brothers with the Saviour, as to let us infer they already knew Him. Now, on the other hand, since the Fourth Evangelist does not say that Andrew and his companions forthwith left their business to devote themselves exclusively to the Gospel or its preparation, there is clearly no absolute discordance between the narration of the first three Gospels and that of St. John.

The Precursor, after the lapse of several months, again appears on the scene, and he is still preaching and baptizing on the banks of the Jordan (John, iii, 23). Jesus, in the meantime, had gathered about Himself a following of disciples, and He came "into the land of Judea: and there He abode with them, and baptized" (John, iii, 22), -- "though Jesus himself did not baptize, but his disciples" (John, iv, 2). -- "There arose a question between some of John's disciples and the Jews [the best Greek texts have "a Jew"] concerning purification" (John, iii, 25), that is to say, as is suggested by the context, concerning the relative value of both baptisms. The disciples of John came to him: "Rabbi, he that was with thee beyond the Jordan, to whom thou gavest testimony, behold he baptizeth, and all men come to him" (John, iii, 26-27). They undoubtedly meant that Jesus should give way to John who had recommended Him, and that, by baptizing, He was encroaching upon the rights of John. "John answered and said: A man cannot receive anything, unless it be given him from heaven. You yourselves do bear me witness, that I said, I am not Christ, but that I am sent before him. He that hath the bride is the bridegroom: but the friend of the bridegroom, who standeth and heareth him, rejoiceth with joy because of the bridegroom's voice. This my joy, therefore, is fulfilled. He must increase, but I must decrease. He that cometh from above, is above all. He that is of the earth, of the earth he is, and of the earth he speaketh. He that cometh from heaven, is above all. And what he hath seen and heard, that he testifieth. . ." (John, iii, 27-36).

The above narration recalls the fact before mentioned (John, i, 28), that part of the Baptist's ministry was exercised in Perea: Ennon, another scene of his labours, was within the borders of Galilee; both Perea and Galilee made up the tetrarchy of Herod Antipas. This prince, a son worthy of his father Herod the Great, had married, likely for political reasons, the daughter of Aretas, king of the Nabathaeans. But on a visit

to Rome, he fell in love with his niece Herodias, the wife of his half-brother Philip (son of the younger Mariamne), and induced her to come on to Galilee. When and where the Precursor met Herod, we are not told, but from the synoptic Gospels we learn that John dared to rebuke the tetrarch for his evil deeds, especially his public adultery. Herod, swayed by Herodias, did not allow the unwelcome reprovener to go unpunished: he "sent and apprehended John and bound him in prison". Josephus tells us quite another story, containing perhaps also an element of truth. "As great crowds clustered around John, Herod became afraid lest the Baptist should abuse his moral authority over them to incite them to rebellion, as they would do anything at his bidding; therefore he thought it wiser, so as to prevent possible happenings, to take away the dangerous preacher. . .and he imprisoned him in the fortress of Machaerus" (*Antiq.*, XVIII, v, 2). Whatever may have been the chief motive of the tetrarch's policy, it is certain that Herodias nourished a bitter hatred against John: "She laid snares for him: and was desirous to put him to death" (*Mark*, vi, 19). Although Herod first shared her desire, yet "he feared the people: because they esteemed him as a prophet" (*Matt.*, xiv, 5). After some time this resentment on Herod's part seems to have abated, for, according to *Mark*, vi, 19,20, he heard John willingly and did many things at his suggestion.

John, in his fetters, was attended by some of his disciples, who kept him in touch with the events of the day. He thus learned of the wonders wrought by Jesus. At this point it cannot be supposed that John's faith wavered in the least. Some of his disciples, however, would not be convinced by his words that Jesus was the Messiah. Accordingly, he sent them to Jesus, bidding them say: "John the Baptist hath sent us to thee, saying: Art thou he that art to come; or look we for another? (And in that same hour, he cured many of their [the people's] diseases, and hurts, and evil spirits; and to many that were blind he gave sight.) And answering, he said to them: Go and relate to John what you have heard and seen: the blind see, the lame walk, the lepers are made clean, the deaf hear, the dead rise again, to the poor the gospel is preached: and blessed is he whosoever shall not be scandalized in me" (*Luke*, vii, 20-23; *Matt.*, xi, 3-6).

How this interview affected John's disciples, we do not know; but we do know the encomium it occasioned of John from the lips of Jesus: "And when the messengers of John were departed, he began to speak to the multitudes concerning John. What went ye out into the desert to see? A reed shaken with the wind?" All knew full well why John was in prison, and that in his captivity he was more than ever the undaunted champion of truth and virtue.-"But what went you out to see? A man clothed in soft garments? Behold they that are in costly apparel, and live delicately, are in the houses of kings. But what went you out to see? A prophet? Yea, I say to you, and more than a prophet. This is he of whom it is written: Behold, I send my angel before thy face, who shall prepare thy way before thee. For I say to you: Amongst those that are born

of women, there is not a greater prophet than John the Baptist" (Luke, vii, 24-28). And continuing, Jesus pointed out the inconsistency of the world in its opinions both of himself and his precursor: "John the Baptist came neither eating bread nor drinking wine; and you say: He hath a devil. The Son of man is coming eating and drinking; and you say: Behold a man that is a glutton and a drinker of wine, a friend of publicans and sinners. And wisdom is justified by all her children" (Luke, vii, 33-35).

St. John languished probably for some time in the fortress of Machaerus; but the ire of Herodias, unlike that of Herod, never abated: she watched her chance. It came at the birthday feast which Herod, after Roman fashion, gave to the "princes, and tribunes, and chief men of Galilee. And when the daughter of the same Herodias [Josephus gives her name: Salome] had come in, and had danced, and pleased Herod and them that were at table with him, the king said to the damsel: Ask of me what thou wilt, and I will give it thee. . . Who when she was gone out, said to her mother, what shall I ask? But she said: The head of John the Baptist. And when she was come in immediately with haste to the king, she asked, saying: I will that forthwith thou give me in a dish, the head of John the Baptist. And the king was struck sad. Yet because of his oath, and because of them that were with him at table, he would not displease her: but sending an executioner, he commanded that his head should be brought in a dish: and gave it to the damsel, and the damsel gave it to her mother" (Mark, vi, 21-28). Thus was done to death the greatest "amongst them that are born of women", the prize awarded to a dancing girl, the toll exacted for an oath rashly taken and criminally kept (St. Augustine). At such an unjustifiable execution even the Jews were shocked, and they attributed to Divine vengeance the defeat Herod sustained afterwards at the hands of Aretas, his rightful father-in-law (Joseph., loc. cit.). John's disciples, hearing of his death, "came, and took his body, and laid it in a tomb" (Mark, vi, 29), "and came and told Jesus" (Matt., xiv, 12).

The lasting impression made by the Precursor upon those who had come within his influence cannot be better illustrated than by mentioned the awe which seize upon Herod when he heard of the wonders wrought by Jesus who, in his mind, was not other than John the Baptist come to life (Matt., xiv, 1, 2, etc.). The Precursor's influence did not die with him. It was far-reaching, too, as we learn from Acts, xviii, 25; xix, 3, where we find that proselytes at Ephesus had received from Apollo and others the baptism of John. Moreover, early Christian writers speak of a sect taking its name from John and holding only to his baptism. The date of John the Baptist's death, 29 August, assigned in the liturgical calendars can hardly be relied upon, because it is scarcely based upon trustworthy documents. His burial-place has been fixed by an old tradition at Sebaste (Samaria). But if there be any truth in Josephus's assertion, that John was put to death at Machaerus, it is hard to understand why he was buried so far from the

Herodian fortress. Still, it is quite possible that, at a later date unknown to us, his sacred remains were carried to Sebaste. At any rate, about the middle of the fourth century, his tomb was there honoured, as we are informed on the testimony of Rufinus and Theodoretus. These authors add that the shrine was desecrated under Julian the Apostate (c. A.D. 362), the bones being partly burned. A portion of the rescued relics were carried to Jerusalem, then to Alexandria; and there, on 27 May, 395, these relics were laid in the gorgeous basilica just dedicated to the Precursor on the site of the once famous temple of Serapis. The tomb at Sebaste continued, nevertheless, to be visited by pious pilgrims, and St. Jerome bears witness to the miracles there wrought. Perhaps some of the relics had been brought back to Sebaste. Other portions at different times found their way to many sanctuaries of the Christian world, and long is the list of the churches claiming possession of some part of the precious treasure. What became of the head of the Precursor is difficult to determine. Nicephorus (I, ix) and Metahraustes say Herodias had it buried in the fortress of Machaerus; others insist that it was interred in Herod's palace at Jerusalem; there it was found during the reign of Constantine, and thence secretly taken to Emesa, in Phoenicia, where it was concealed, the place remaining unknown for years, until it was manifested by revelation in 453. In the many and discordant relations concerning this relic, unfortunately much uncertainty prevails; their discrepancies in almost every point render the problem so intricate as to baffle solution. This signal relic, in whole or in part, is claimed by several churches, among them Amiens, Nemours, St-Jean d'Angeli (France), S. Silvestro in Capite (Rome). This fact Tillemont traces to a mistaking of one St. John for another, an explanation which, in certain cases, appears to be founded on good grounds and accounts well for this otherwise puzzling multiplication of relics.

The honour paid so early and in so many places to the relics of St. John the Baptist, the zeal with which many churches have maintained at all times their ill-founded claims to some of his relics, the numberless churches, abbeys, towns, and religious families placed under his patronage, the frequency of his name among Christian people, all attest the antiquity and widespread diffusion of the devotion to the Precursor. The commemoration of his Nativity is one of the oldest feasts, if not the oldest feast, introduced into both the Greek and Latin liturgies to honour a saint. But why is the feast proper, as it were, of St. John on the day of his nativity, whereas with other saints it is the day of their death? Because it was meant that the birth of him who, unlike the rest, was "filled with the Holy Ghost even from his mother's womb", should be signalized as a day of triumph. The celebration of the Decollation of John the Baptist, on 29 August, enjoys almost the same antiquity. We find also in the oldest martyrologies mention of a feast of the Conception of the Precursor on 24 September. But the most solemn celebration in honour of this saint was always that of his Nativity, preceded until re-

cently by a fast. Many places adopted the custom introduced by St. Sabas of having a double Office on this day, as on the day of the Nativity of the Lord. The first Office, intended to signify the time of the Law and the Prophets which lasted up to St. John (Luke, xvi, 16), began at sunset, and was chanted without Alleluia; the second, meant to celebrate the opening of the time of grace, and gladdened by the singing of Alleluia, was held during the night. The resemblance of the feast of St. John with that of Christmas was carried farther, for another feature of the 24th of June was the celebration of three masses: the first, in the dead of night, recalled his mission of Precursor; the second, at daybreak, commemorated the baptism he conferred; and the third, at the hour of Terce, honoured his sanctity. The whole liturgy of the day, repeatedly enriched by the additions of several popes, was in suggestiveness and beauty on a part with the liturgy of Christmas. So sacred was St. John's day deemed that two rival armies, meeting face to face on 23 June, by common accord put off the battle until the morrow of the feast (Battle of Fontenay, 841). "Joy, which is the characteristic of the day, radiated from the sacred precincts. The lovely summer nights, at St. John's tide, gave free scope to popular display of lively faith among various nationalities. Scarcely had the last rays of the setting sun died away when, all the world over, immense columns of flame arose from every mountain-top, and in an instant, every town, and village, and hamlet was lighted up" (Guéranger). The custom of the "St. John's fires", whatever its origin, has, in certain regions, endured unto this day.

CHARLES L. SOUVAY

John the Deacon

John the Deacon

(Johannes Diaconus).

Among the writers of the Middle Ages who bear this name, four historians deserve particular mention on account of the importance of their work. In chronological order they are as follows:

(1) John, deacon of Rome, date of birth unknown; d. before 882. Johannes, surnamed Hymonides, was towards the middle of the ninth century a monk of Monte Cassino, and later a deacon of the Roman Church. Possessed of no inconsiderable

learning, he was closely associated with the learned Anastasius, Librarian of the Roman Church (d. 879), and at the instance of John VII (872-82) wrote a life of St. Gregory the Great, making use of the works of this pope and of extracts made at an earlier date from the pope's letters in the archives of the Roman Church. The work is divided into four books: in the first he gives an account of the life of Gregory up to the time of his pontificate; in the second, of his activities as pope; in the third, of his teachings; and in the fourth, of his progress in perfection. The life is edited by Mabillon ("Acta SS. ord. S. Benedicti", I, 398-496; "Acta SS.", March, II, 137-211; P.L., LXXV, 50 sqq.). He intended to write also a detailed history of the Church, and at his request the aforesaid Anastasius compiled a history in three parts (*tripartita*) from Greek sources for the use of John, whose purpose, however, was never executed. On the invitation of Bishop Gaudericus of Velletri (867-79), he undertook to re-edit the "Gesta Clementis", a life of Clement I (d. about end of first century), but did not live to finish the work, which Gaudericus undertook to complete, though it never appeared in full. It is said that in the Bibliotheque Nationale at Paris there is yet in manuscript a short commentary on the Heptateuch based on patristic sources and written by this John. A letter from a certain Johannes Diaconus to Senarius, "vir illustris", treats of the ceremonies of baptism; it is not however, the work of the John treated here, but of an older deacon of this name (ed. P.L., LIX, 399-408).

(2) John, deacon of Naples, d. after 910. This deacon, or head of a *diaconia* at the church of St. Januarius of Naples, flourished towards the end of the ninth and the beginning of the tenth century, and from his writings appears to have been a very learned and accomplished cleric. We owe to him several historical works, which are among the most important sources of information for the history of his time. He first wrote a continuation of the diocesan history of his time. He first wrote a continuation of the diocesan history of Naples (*Gesta episcoporum Neapolitanorum*), begun by another cleric, but which he brings down from 762 to 872. He makes use of both written and oral tradition, and contributes from personal knowledge. The narrative is graphic and spirited, and impresses the reader as a frank and accurate story (ed. Waitz in "Mon. Germ. Hist.: Script. Langobardorum", 398 sqq.; ed. Capasso, "Monumenta ad Neapolitani ducatus historiam pertinentia", I, Naples, 1881, pp. 307 sqq.). He also wrote a history of the translation in the fifth century of the remains of St. Severinus, the Apostle of Noricum, from the Castellum Lucullanum near Naples to a new monastery within the city. This work contains the important account of the destruction of Taormina in Sicily by the Saracens under Ibrahim, and of the martyrdom of Bishop Procopius (ed. "Acta SS.", January, I, 1098 sqq.; ed. Waitz in "Mon. Germ. Hist.", loc. cit., 452-9). When in 910 the relics of St. Sossius, a companion of St. Januarius, were transferred from the ruined Messina to the same monastery at Naples, John wrote a

history of St. Januarius and his companions, in which as an eyewitness he describes the aforesaid transfer (Acta SS., Sept., VI, 874 sqq.; the text of the "Translatio" alone is found in Waitz, loc. cit., 459-63). A biography of St. Nicholas of Mira (ed. Cardinal Mai in "Spicilegium Romanum", IV, 323 sqq.) is not by this John but by another author of the same name.

(3) John, deacon of Venice, d. after 1008. The oldest chronicle of Venice, formerly known as the "Chronicon Sagonini", was compiled by a deacon John, the chaplain and perhaps a relative of Doge Peter II Urseolus (991-1009). John enjoyed the confidence of this great doge, and was often sent as his ambassador to Emperors Otto III and Henry II. In the first part of his chronicle, which deals with the early period of the republic, the narrative is often confused and deficient; later it becomes more accurate and complete, and for the time in which the writer himself lived it is particularly valuable. He carries the narrative to 1008 and treats in detail of the reign of Doge Peter Urseolus [ed. Pertz, "Mon. Germ. Hist.: SS.", VII, 1-36; ed. Monticolo, "Cronache Veneziane antichissime", I (1890), 59-171, in "Fonti per la storia d' Italia", IX]. John has also been credited, but erroneously, with the "Chronicon Gradense", which is in the manuscripts usually given with "Chronicon Venetum".

(4) John, a Roman deacon, lived in the second half of the twelfth century. This deacon and canon of the Lateran compiled a work on this papal basilica, and dedicated it, in the preface, to Alexander III (1159-81), thereby indicating the date of its composition. It was obviously a secondary object of the author in composing this work to support the canons of the Lateran in their dispute for precedence with the canons of St. Peter's (ed. Mabillon, "Iter Italicum", II, 560-76; P.L., CXCIV, 1543-50).

St. John the Evangelist

St. John the Evangelist

I. New Testament Accounts II. The Alleged Presbyter John

III. The Later Accounts of John IV. Feasts of St. John V. St. John in Christian Art

I. NEW TESTAMENT ACCOUNTS

John was the son of Zebedee and Salome, and the brother of James the Greater. In the Gospels the two brothers are often called after their father "the sons of Zebedee" and received from Christ the honourable title of *Boanerges*, i.e. "sons of thunder" (Mark, iii, 17). Originally they were fishermen and fished with their father in the Lake of Genesareth. According to the usual and entirely probable explanation they became, however, for a time disciples of John the Baptist, and were called by Christ from the circle of John's followers, together with Peter and Andrew, to become His disciples (John, i, 35-42). The first disciples returned with their new Master from the Jordan to Galilee and apparently both John and the others remained for some time with Jesus (cf. John ii, 12, 22; iv, 2, 8, 27 sqq.). Yet after the second return from Judea, John and his companions went back again to their trade of fishing until he and they were called by Christ to definitive discipleship (Matt., iv 18-22; Mark, i, 16-20). In the lists of the Apostles John has the second place (Acts, i, 13), the third (Mark, iii, 17), and the fourth (Matt., x, 3; Luke, vi, 14), yet always after James with the exception of a few passages (Luke, viii, 51; ix, 28 in the Greek text; Acts, i, 13).

From James being thus placed first, the conclusion is drawn that John was the younger of the two brothers. In any case John had a prominent position in the Apostolic body. Peter, James, and he were the only witnesses of the raising of Jairus's daughter (Mark, v, 37), of the Transfiguration (Matt., xvii, 1), and of the Agony in Gethsemani (Matt., xxvi, 37). Only he and Peter were sent into the city to make the preparation for the Last Supper (Luke, xxii, 8). At the Supper itself his place was next to Christ on Whose breast he leaned (John, xiii, 23, 25). According to the general interpretation John was also that "other disciple" who with Peter followed Christ after the arrest into the palace of the high-priest (John, xviii, 15). John alone remained near his beloved Master at the foot of the Cross on Calvary with the Mother of Jesus and the pious women, and took the desolate Mother into his care as the last legacy of Christ (John, xix, 25-27). After the Resurrection John with Peter was the first of the disciples to hasten to the grave and he was the first to believe that Christ had truly risen (John, xx, 2-10). When later Christ appeared at the Lake of Genesareth John was also the first of the seven disciples present who recognized his Master standing on the shore (John,

xxi, 7). The Fourth Evangelist has shown us most clearly how close the relationship was in which he always stood to his Lord and Master by the title with which he is accustomed to indicate himself without giving his name: "the disciple whom Jesus loved". After Christ's Ascension and the Descent of the Holy Spirit, John took, together with Peter, a prominent part in the founding and guidance of the Church. We see him in the company of Peter at the healing of the lame man in the Temple (Acts, iii, 1 sq.). With Peter he is also thrown into prison (Acts, iv, 3). Again, we find him with the prince of the Apostles visiting the newly converted in Samaria (Acts, viii, 14).

We have no positive information concerning the duration of this activity in Palestine. Apparently John in common with the other Apostles remained some twelve years in this first field of labour, until the persecution of Herod Agrippa I led to the scattering of the Apostles through the various provinces of the Roman Empire (cf. Acts, xii, 1-17). Notwithstanding the opinion to the contrary of many writers, it does not appear improbable that John then went for the first time to Asia Minor and exercised his Apostolic office in various provinces there. In any case a Christian community was already in existence at Ephesus before Paul's first labours there (cf. "the brethren", Acts, xviii, 27, in addition to Priscilla and Aquila), and it is easy to connect a sojourn of John in these provinces with the fact that the Holy Ghost did not permit the Apostle Paul on his second missionary journey to proclaim the Gospel in Asia, Mysia, and Bithynia (Acts, xvi, 6 sq.). There is just as little against such an acceptance in the later account in Acts of St. Paul's third missionary journey. But in any case such a sojourn by John in Asia in this first period was neither long nor uninterrupted. He returned with the other disciples to Jerusalem for the Apostolic Council (about A.D. 51). St. Paul in opposing his enemies in Galatia names John explicitly along with Peter and James the Less as a "pillar of the Church", and refers to the recognition which his Apostolic preaching of a Gospel free from the law received from these three, the most prominent men of the old Mother-Church at Jerusalem (Gal., ii, 9). When Paul came again to Jerusalem after the second and after the third journey (Acts, xviii, 22; xxi, 17 sq.) he seems no longer to have met John there. Some wish to draw the conclusion from this that John left Palestine between the years 52 and 55.

Of the other New-Testament writings, it is only from the three Epistles of John and the Apocalypse that anything further is learned concerning the person of the Apostle. We may be permitted here to take as proven the unity of the author of these three writings handed down under the name of John and his identity with the Evangelist. Both the Epistles and the Apocalypse, however, presuppose that their author John belonged to the multitude of personal eyewitnesses of the life and work of Christ (cf. especially I John, i, 1-5; iv, 14), that he had lived for a long time in Asia Minor, was thoroughly acquainted with the conditions existing in the various Christian communit-

ies there, and that he had a position of authority recognized by all Christian communities as leader of this part of the Church. Moreover, the Apocalypse tells us that its author was on the island of Patmos "for the word of God and for the testimony of Jesus", when he was honoured with the heavenly Revelation contained in the Apocalypse (Apoc., i, 9).

II. THE ALLEGED PRESBYTER JOHN

The author of the Second and Third Epistles of John designates himself in the superscription of each by the name (*ho presbyteros*), "the ancient", "the old". Papias, Bishop of Hierapolis, also uses the same name to designate the "Presbyter John" as in addition to Aristion, his particular authority, directly after he has named the presbyters Andrew, Peter, Philip, Thomas, James, John, and Matthew (in Eusebius, "Hist. eccl.", III, xxxix, 4). Eusebius was the first to draw, on account of these words of Papias, the distinction between a Presbyter John and the Apostle John, and this distinction was also spread in Western Europe by St. Jerome on the authority of Eusebius. The opinion of Eusebius has been frequently revived by modern writers, chiefly to support the denial of the Apostolic origin of the Fourth Gospel. The distinction, however, has no historical basis. First, the testimony of Eusebius in this matter is not worthy of belief. He contradicts himself, as in his "Chronicle" he expressly calls the Apostle John the teacher of Papias ("ad annum Abrah 2114"), as does Jerome also in Ep. lxxv, "Ad Theodoram", iii, and in "De viris illustribus", xviii. Eusebius was also influenced by his erroneous doctrinal opinions as he denied the Apostolic origin of the Apocalypse and ascribed this writing to an author differing from St. John but of the same name. St. Irenaeus also positively designates the Apostle and Evangelist John as the teacher of Papias, and neither he nor any other writer before Eusebius had any idea of a second John in Asia (Adv. haer., V, xxxiii, 4). In what Papias himself says the connection plainly shows that in this passage by the word *presbyters* only Apostles can be understood. If John is mentioned twice the explanation lies in the peculiar relationship in which Papias stood to this, his most eminent teacher. By inquiring of others he had learned some things indirectly from John, just as he had from the other Apostles referred to. In addition he had received information concerning the teachings and acts of Jesus directly, without the intervention of others, from the still living "Presbyter John", as he also had from Aristion. Thus the teaching of Papias casts absolutely no doubt upon what the New-Testament writings presuppose and expressly mention concerning the residence of the Evangelist John in Asia.

III. THE LATER ACCOUNTS OF JOHN

The Christian writers of the second and third centuries testify to us as a tradition universally recognized and doubted by no one that the Apostle and Evangelist John

lived in Asia Minor in the last decades of the first century and from Ephesus had guided the Churches of that province. In his "Dialogue with Tryphon" (Chapter 81) St. Justin Martyr refers to "John, one of the Apostles of Christ" as a witness who had lived "with us", that is, at Ephesus. St. Irenæus speaks in very many places of the Apostle John and his residence in Asia and expressly declares that he wrote his Gospel at Ephesus (*Adv. haer.*, III, i, 1), and that he had lived there until the reign of Trajan (*loc. cit.*, II, xxii, 5). With Eusebius (*Hist. eccl.*, III, xiii, 1) and others we are obliged to place the Apostle's banishment to Patmos in the reign of the Emperor Domitian (81-96). Previous to this, according to Tertullian's testimony (*De praescript.*, xxxvi), John had been thrown into a cauldron of boiling oil before the Porta Latina at Rome without suffering injury. After Domitian's death the Apostle returned to Ephesus during the reign of Trajan, and at Ephesus he died about A.D. 100 at a great age. Tradition reports many beautiful traits of the last years of his life: that he refused to remain under the same roof with Cerinthus (Irenæus "*Ad. haer.*", III, iii, 4); his touching anxiety about a youth who had become a robber (Clemens Alex., "*Quis dives salvetur*", xiii); his constantly repeated words of exhortation at the end of his life, "Little children, love one another" (Jerome, "*Comm. in ep. ad. Gal.*", vi, 10). On the other hand the stories told in the apocryphal Acts of John, which appeared as early as the second century, are unhistorical invention.

IV. FEASTS OF ST. JOHN

St. John is commemorated on 27 December, which he originally shared with St. James the Greater. At Rome the feast was reserved to St. John alone at an early date, though both names are found in the Carthage Calendar, the Hieronymian Martyrology, and the Gallican liturgical books. The "departure" or "assumption" of the Apostle is noted in the Menology of Constantinople and the Calendar of Naples (26 September), which seems to have been regarded as the date of his death. The feast of St. John before the Latin Gate, supposed to commemorate the dedication of the church near the Porta Latina, is first mentioned in the Sacramentary of Adrian I (772-95).

V. ST. JOHN IN CHRISTIAN ART

Early Christian art usually represents St. John with an eagle, symbolizing the heights to which he rises in the first chapter of his Gospel. The chalice as symbolic of St. John, which, according to some authorities, was not adopted until the thirteenth century, is sometimes interpreted with reference to the Last Supper, again as connected with the legend according to which St. John was handed a cup of poisoned wine, from which, at his blessing, the poison rose in the shape of a serpent. Perhaps the most natural explanation is to be found in the words of Christ to John and James "My chalice indeed you shall drink" ([Matthew 20:23](#)).

LEOPOLD FONCK

John the Faster

John the Faster

(*‘o nesteutés, jejunator*)

Patriarch of Constantinople (John IV, 582-595), famous chiefly through his assumption of the title "œcumenical patriarch"; d. 2 September, 595. He was brought up (apparently also born) at Constantinople. Under the Patriarch John III (Scholasticus, 565-577) he was deacon at the Hagia Sophia church; then he became *sakellarios* (an official who acts as patriarchal vicar for monasteries). He had little learning, but was so famous for his ascetical life that he was already called "the Faster". Under Eutychius I (restored to the patriarchate when John III died, 577-582) he became an important person among the clergy of the city. At Eutychius's death he was made patriarch by the Emperor Tiberius II (578-582). Under the next emperor, Maurice (582-602), he was still a favourite at court. There is little to tell of his life besides the great question of the title. He is said to have been tolerant towards the Monophysites; but he persuaded Maurice to have a certain wizard, Paulinus, burnt. He had always a great reputation for asceticism and charity to the poor.

The dispute about the title was this: it was not new in John IV's time; till then the Bishop of Constantinople had commonly been called *‘archiepískopos dai patriárches*, but at various times he (and other patriarchs) had been addressed as *o‘ikoumenikòs patriárches*. H. Gelzer (*Der Streit um den Titel des ökumenischen Patriarchen*) thinks that it became usual in the time of the Acacian schism (484-519). The first known use of it applied to Constantinople is in a letter from the monks of Antioch to John II (518-520) in 518. Before that the Patriarch of Alexandria had been so called by one of his bishops at the Robber Synod of Ephesus (in the year 449; Gelzer, *op. cit.*, p. 568). Since 518 the whole combination, *‘archiepískopos kai o‘ikoumenikòs patriárches*, is not uncommonly used in addresses to the Byzantine patriarchs. But they had not called themselves so before John IV. There is a real difference between these two uses of a title. In addresses to other people, particularly superiors, one may always allow a margin for compliment—especially in Byzantine times. But when a man uses a title himself he sets up a formal claim to it. In 588 John the Faster held a synod at Constantinople to examine certain charges against Gregory, Patriarch of Antioch (in this fact already one sees a sign of the growing ambition of Constantinople. By what right could Constantinople discuss the affairs of Antioch?). The Acts of this synod appear to have been sent to Rome; and Pope Pelagius II (579-590) saw in them that John was described as "archbishop and œcumenical patriarch". It may be that this was the first time that the use of the title was noticed at Rome; it appears, in any case, to be the first

time it was used officially as a title claimed—not merely a vague compliment. Pelagius protested against the novelty and forbade his legate at Constantinople to communicate with John. His letter is not extant. We know of it from Gregory's letters later (Epp., V, xliii, in P. L., LXXVII, 771).

St. Gregory I (599-604), who succeeded Pelagius II, was at first on good terms with John IV. He had known him at Constantinople while he had been legate (*apocrisarius*) there (578-584), and had sent him notice of his succession as pope in a friendly letter (Epp., I, iv, in P. L., LXXVII, 447). It has been thought that the John to whom he dedicates his "Regula pastoralis" is John of Constantinople (others think it to be John of Ravenna, Bardenhewer, "Patrology", tr Shahan, St. Louis, 1908, p. 652). But in 593 this affair of the new and arrogant title provoked a serious dispute. It should be noticed that Gregory was still old-fashioned enough to cling to the theory of three patriarchates only, although officially he accepted the five (Fortescue, "Orthodox Eastern Church", p. 44). He was therefore not well-disposed towards Constantinople as a patriarchate at all. That it should claim to be the universal one seemed to him unheard-of insolence. John had cruelly scourged two priests accused of heresy. They appealed to the pope. In the correspondence that ensued John assumed this title of œcumenical patriarch "in almost every line" of his letter (Epp., V, xviii, in P. L., LXXVII, 738). Gregory protested vehemently against it in a long correspondence addressed first to John, then to the Emperor Maurice, the Empress Constantina, and others. He argues that "if one patriarch is called universal the title is thereby taken from the others" (Epp., V, xviii, *ibid.*, 740). It is a special effrontery for the Byzantine bishop, whose existence as a patriarch at all is new and still uncertain (Rome had refused to accept the third canon of the First Council of Constantinople and the twenty-eighth canon of Chalcedon), to assume such a title as this. It further argues independence of any superior; whereas, says Gregory, "who doubts that the Church of Constantinople is subject to the Apostolic See?" (Epp., IX, xii, *ibid.*, 957); and again: "I know of no bishop who is not subject to the Apostolic See" (*ibid.*).

The pope expressly disclaims the name "universal" for any bishop, including himself. He says that the Council of Chalcedon had wanted to give it to Leo I, but he had refused it (Epp., V, xviii, *ibid.*, 740, xx, 747, etc.). This idea rests on a misconception (Hefele-Leclercq, "Histoire des Conciles", II, Paris, 1908, pp. 834-5), but his reason for resenting the title in any bishop is obvious throughout his letters. "He understood it as an exclusion of all the others [*privative quoad omnes alios*] so that he who calls himself œcumenic, that is, universal, thinks all other patriarchs and bishops to be private persons and himself the only pastor of the inhabited earth" (so Horace Giustiniani at the Council of Florence; Hergenröther, "Photius", I, 184). For this reason Gregory does not spare his language in denouncing it. It is "diabolical arrogance" (Epp.,

V, xx, in P. L., XXVII, 746, xxi, 750, etc.); he who so calls himself is antichrist. Opposed to it Gregory assumed the title borne ever since by his successors. "He refuted the name 'universal' and first of all began to write himself 'servant of the servants of God' at the beginning of his letters, with sufficient humility, leaving to all his successors this hereditary evidence of his meekness" (Johannes Diaconus, "Vita S. Gregorii", II, i, in P. L., LXV, 87). Nevertheless the patriarchs of Constantinople kept their "œcumenical" title till it became part of their official style. The Orthodox patriarch subscribes himself still "Archbishop of Constantinople, New Rome, and Œcumenical Patriarch". But it is noticeable that even Photius (d. 891) never dared use the word when writing to Rome. The Catholic Church has never admitted it. It became a symbol of Byzantine arrogance and the Byzantine schism. In 1024 the Emperor Basil II (963-1025) tried to persuade Pope John XIX (1024-1033) to acknowledge it. The pope seems to have been ready to do so, but an outburst of indignation throughout the West and a stern letter from Abbot William of Dijon made him think better of it (Fortescue, "Orthodox Eastern Church", p. 167). Later again, at the time of the final schism, Pope Leo IX writes to Michael Cærularius of Constantinople (in 1053): "How lamentable and detestable is the sacrilegious usurpation by which you everywhere boast yourself to be the Universal Patriarch" (op. cit., p. 182). No Catholic bishop since then has ever dared assume this title.

With regard to the issue, one should note first that Gregory knew no Greek. He saw the words only in a Latin version: *Patriarcha universalis*, in which they certainly sound more scandalous than in Greek. How he understood them is plain from his letters. They seem to mean that all jurisdiction comes from one bishop, that all other bishops are only his vicars and delegates. Catholic theology does not affirm this of the pope or anyone. Diocesan bishops have *ordinary*, not *delegate*, jurisdiction; they receive their authority immediately from Christ, though they may use it only in the communion of the Roman See. It is the whole difference between diocesan ordinaries and vicars Apostolic. All bishops are not Apostolic vicars of the pope. Nor has any pope ever assumed the title "universal bishop", though occasionally they have been so called in complimentary addresses from other persons. The accusation, then, that Gregory's successors have usurped the title that he so resented is false.

Whether John IV or other patriarchs of Constantinople really meant to advance so arrogant a claim is another question. *O'ikoumenikòs patriárches* in Greek is susceptible of a milder interpretation. *Ἡ Ὀ'ikoumènes chóra* was long a name for the civilized, cultivated land of the Greeks, as opposed to the wild country of the barbarians. It was then often used for the Roman Empire. It is at least probable that the clause *ὑπὲρ τῆς Ὀ'ikouménes* in the Greek Intercession of the Byzantine Liturgy means the "empire" (Fortescue, "Liturgy of St. Chrysostom", London, 1908, p. 106). It may be, then that

o'ikoumenikòs patriárches meant no more than "imperial patriarch", as the Greeks of Constantinople told Anastasius Bibliothecarius of the time of Photius (see his statement in Gelzer, op. cit., p. 572). Kattenbusch (*Konfessionskunde*, I, 116) thinks it should be translated *Reichspatriarch*. Even so it is still false. The Patriarch of Constantinople had no sort of claim over the whole empire. The most that can be allowed is that if "œcumenical" means only "imperial", and if "imperial" means only "of the imperial court", the title (in this case equal to "court patriarch") is no worse than a foolish example of vanity. But even in Greek this interpretation is by no means obvious. In Greek, too, an "œcumenical synod" is one that has authority for the whole Church; the "œcumenic doctors" (St. Basil, St. Gregory of Nazianzus, St. John Chrysostom) are those whose teaching must be followed by all. Pichler's comparison with the form "catholic bishop" ("*Geschichte der kirchlichen Trennung*", II, Munich, 1865, pp. 647 sq.) is absurd. The humblest member of the Church is (in any language) a Catholic; in no language could he be called œcumenical.

Another dispute between John and Gregory was about some relics, especially the head of St. Paul, that the Court of Constantinople wanted the pope to send to them. Gregory would not part with them; eventually he sent part of St. Paul's chains. The works in Migne attributed to John the Faster [a treatise on Confession (P. G., LXXXVIII, 1889-1918), a shorter work on the same subject (ibid., 1919-1932), "Of Penance, Temperance, and Virginité" (ibid., 1937-1978)] are not authentic. No authentic works of his are extant. He has often been confused with a certain Cappadocian monk, John the Faster, who came to Constantinople about the year 1100. The patriarch, at his death, left no property but a cloak, a blanket, and a praying-stool, which the emperor kept as relics. The Orthodox Church has canonized him and keeps his feast on 2 September.

One of his clergy, Protinos, wrote his life soon after his death. Fragments of this are preserved in the Acts of the Second Council of Nicæa, for which see Mansi, XIII, 80-85; Lequien, *Oriens Christianus*, I (Paris, 1740), 226; Gedeon, *Patriarchikoi Pinakes* (Constantinople, 1890), 232-36; Hergenröther, *Photius*, I (Ratisbon, 1867), 178-90; Grisar, *Oekumenischer Patriarch und Diener der Diener Gottes in Zeitschrift für kath. Theologie*, IV (Innsbruck, 1880), 468-523; Gelzer, *Der Streit um den Titel des ökumenischen Patriarchen in Jahrbücher für prot. Theologie*, XIII (1887), 549-584; Kattenbusch, *Konfessionskunde*, I (Freiburg im Br., 1892), 111-17.

Adrian Fortescue.

John the Silent

St. John the Silent

(Hesychastes, Silentarius).

Bishop of Colonia, in Armenia, b. at Nicopolis, Armenia, 8 Jan., 452; d. 558. His parents, Encratius and Euphemia, wealthy and honoured, belonged to families that had done great service in the State and had given to it renowned generals and governors, but they were also good Christians, and gave their son a holy education. After their death in 471, John distributed his inheritance among his relatives, retaining only a small share, with which he built a church and a monastery. Here, with ten congenial companions, he began a life of mortification and self-denial, wonderful traits of which are recorded by his biographer. The Bishop of Sebaste drew him out of his solitude and made him Bishop of Colonia (Taxara) in 481, against which promotion John vainly struggled. In his new dignity he preserved the monastic spirit entire, and the austerities and exercises as far as was compatible with duty. His brother-in-law Pasinius oppressed the Church to such an extent that John had to call upon the Emperor Zeno for assistance. As soon as matters had been properly arranged, John left his see, went to the Laura, near Jerusalem, and placed himself under the obedience of St. Sabas, without revealing his identity. In course of time Sabas, who had subjected John to all kinds of trials and had found him ready to perform even the most common and menial labours, thought him worthy of receiving priesthood, and for this purpose sent him to Elias, the Patriarch of Jerusalem. John now revealed all, and Elias informed Sabas that John had confided to him things which forbade his ordination. Sabas at first felt very sad, but was comforted by a vision in which the true state of affairs was made known to him. John with the permission of his superior entered a hut built against the face of a rock in the desert, and here passed the remainder of his days in seclusion and perpetual silence, whence his surname. A contemporary, Cyril of Scythopolis, wrote his life. His feast is on 13 May.

FRANCIS MERSHMAN

Jean, Sire de Joinville

Jean, Sire de Joinville

Seneschal of Champagne, historian, b in 1225; d. at Joinville, 1317. His family held an important place in the feudal system of Champagne in the eleventh century. His father, Simon de Joinville, hereditary Seneschal of Champagne, defended Troyes in 1230 against the enemies of Count Thibaut IV. Simon having died in 1233, Jean was reared by his mother, Beatrix, daughter of the Count of Burgundy. He received the knightly education of the times, learned to read and write, and even a little Latin. In 1241, Jean de Joinville appeared for the first time at the French Court on the occasion of the festival given at Saumur for the knighthood of Alfonso of Poitou, brother of the king. He afterwards made a pilgrimage to the shrine of St. James at Compostela. In 1248, Joinville took the cross, following the example of St. Louis, but refused to be sworn by the king, as he was not his "man." He took at his own expense two bannerets and ten knights and allied himself with his cousin Jean d'Apremont, Count of Saarbruecken. His little troop went down the Saône and the Rhone by boat and embarked at Marseilles (August, 1248). In three weeks they arrived at Limassol, in Cyprus, where Louis IX was. He welcomed Joinville and took him into his pay.

Joinville took part in the Crusade of Egypt, where he conducted himself valiantly; he was in grave danger at Mansourah (Feb., 1250), fell ill in his tent, and was taken prisoner with the king. Having been liberated in May, 1250, he followed Louis IX to Saint Jean d'Acre despite the advice of powerful barons who counselled him to remain in Palestine until all the prisoners should have been freed. A "Chanson d'Acre," of which he is probably the author, makes allusion to these facts ("Romania," 1893, 544). The king, who was charmed, made him henceforth his familiar friend, and gave him command over fifty knights. In 1253 he granted him in fief a rental of 200 pounds (4053 francs).

Having returned to France with the king and queen in 1254, Joinville thenceforth divided his time between the management of his estates and the court of his royal friend. However, in 1267, despite the solicitations of St. Louis, he refused to take the cross and disapproved of the Crusade of Tunis: "Je entendî que tuit cil firent péchié mortel qui li loierent l'alée" (ed. Natalis de Wailly, 262). After the death of St. Louis in 1282, he was one of the witnesses heard in the inquiry of canonization, and he erected an altar to the saint in his chapel of St. Laurent at Joinville. Under Philip the Fair, Joinville played an important part in Champagne and did not conceal his dislike for the new methods of government. In 1314 he entered the league of the nobility of

Champagne. In 1315 he wrote a letter of reconciliation to Louis X. He died at Joinville, where he was buried.

Joinville is the author of a new explanation of the Creed, composed at Acre in 1250-51, which contains information concerning his captivity (ed. Natalis de Wailly, at the end of the history of St. Louis). But his chief work is "Le livre des saintes paroles et des bonnes actions de St Louis," composed at the request of Jeanne of Navarre, wife of Philip the Fair (d. 1305). The work is divided into two unequal parts; the first, which is very short, comprises anecdotes concerning St. Louis's manner of life and his familiar speech; the second, which is very much longer, is a real autobiography of Joinville during the Egyptian Crusade. Gaston Paris ("Romania," 1894, 508-524) supposes that this portion was written by Joinville as early as 1273, because there is no allusion to subsequent events.

Joinville appears to have written from personal recollections. Beginning with 1254, he is satisfied with making extracts from the "Chronique de France." The book concludes with an abridgment of the instructions given by St. Louis to his son, and with details concerning his canonization. The original MS., which was presented to the king and preserved in the *librairie* of Charles V, no longer exists. The two principal MSS. are: that of Brussels (Paris, Bib. Nat. fr., 13568), written under Charles V; and that of Lucca (Paris, Bib. Nat. fr., 10148), copied from the original at the Château of Joinville about 1550. The first edition (Antoine-Pierre de Rieux, Poitiers, 1547) was made from a poor copy and was reproduced many times until the discovery of the two above-mentioned manuscripts. The text has been studied and amended by Natalis de Wailly (editions of 1868, Société de l'Histoire de France of 1874, of 1881). The history of St. Louis is rightly regarded as one of the masterpieces of French literature in the Middle Ages; it constitutes besides an inappreciable testimony concerning the personality of one of the best sovereigns who ever reigned. The figure of St. Louis is most vividly portrayed in Joinville's book. Moreover, few personal memoirs possess the same note of sincerity. In depicting himself, Joinville discloses to us the soul of a perfect knight of the thirteenth century; the book is thus an important witness concerning French society of the Middle Ages.

NATALIS DE WAILLY, Prefaces to editions mentioned and articles in *Bibliothèque de l'Ecole des Chartes* (1857), 557-608; (1868), 329-478; (1872), 386-423; (1874), 217-248; PARIS, *Le texte de Joinville in Romania*, XXIII, 508-524; SIMONNET, *Essai sur l'histoire et la genealogie des Sires de Joinville* (Langres, 1876); DELABORDE, *Recherches critiques sur les premiers seigneurs de Joinville in Bib. LOUIS BREHIER

Louis Joliet

Louis Joliet

(Or JOLLIET).

Louis Joliet, a discoverer and the son of a wagon-maker, was born at Quebec, Canada, on 21 September 1645; d. in Canada, May 1700. He gave great promise of scholarship, especially in mathematics, in the Jesuits' school at Quebec, and received minor orders in 1663. But caught with the adventure spirit of the times, he early abandoned his studies and became a rover in the Canadian wilderness and a trader with the Indians. A fleeting glimpse is caught of Joliet searching for a copper mine on the borders of Lake Superior, in 1669; and again in 1671, he is seen standing by the side of Saint-Lusson as he plants the arms of France at Sault Sainte Marie. In 1672, upon the advice of the intendant, Talon, Joliet was dispatched by Governor Frontenac to explore the *grande rivière* beyond the Lakes, which the Indians alleged flowed into the southern sea. In the order the French governor refers to Joliet as one "experienced in these kinds of discoveries and who had been already very near the river". In December of the same year Joliet reached the Straits of Mackinaw, where, with Père Marquette, he spent the winter and the early spring in questioning the Indians and preparing maps for the journey.

In May of the following year, 1673, the historic quest began. With five *voyageurs* and two canoes, Joliet and Marquette in June reached the Fox River. A few leagues beyond, a short portage was found by which they reached the Wisconsin, down the tortuous course of which they glided until, on 17 June, the little party drifted into the waters of the great Mississippi. For a month the paddled Southward, passing a great river from the west which the Indians assured them flowed into the Vermeille Sea -- the Gulf of California -- and, near it, a little village whose inhabitants, they were told, traded with the Indians on the Pacific coast. Joliet descended the river to 30° 40', christening rivers, plateaus, and elevations with Indian and French names which were destined to endure no longer than La Salle's great dream of the "Empire of New France."

Having established beyond doubt the important fact that the great river emptied into the Gulf of Mexico, the expedition returned, arriving at Green Bay in September, after having paddled 2500 miles. Here Marquette remained while Joliet hurried to Quebec, where he arrived the middle of August, 1674, after having lost all his documents and maps by the upsetting of his canoe in the lachine Rapids. Whether or not Joliet

was the first Frenchman to have gazed upon the Great River, the reports that he laid before the governor and his establishment of the fact that the Mississippi was a highway to the sea led to the immediate formation of plans on the part of Canadian merchants and officers for the settlement of the Mississippi Valley, though Joliet's offer to plant a colony among the Illinois was refused by the French Government. Shortly after his return Joliet was married to Claire-Francoise Bissot. In 1680 he was granted the Island of Anticosti, where he erected a fort, which was subsequently captured by the English in 1690, upon which occasion his wife was taken prisoner. The restless spirit of the explorer persevered in Joliet to the end, for mention is made, within a few years of his death, of extensive wanderings in Labrador. In 1693 he was appointed royal hydrographer, and, on 30 April, 1697, he was granted the seigniorship of Joliet, south of Quebec, which is still in the possession of his descendants. He died in Canada in May, 1700, one of the first native Americans to have achieved historical distinction.

Map drawn by Joliet in the Fox River valley on the eve of the Mississippi expedition in SHEA, *Discovery and Explorations of the Mississippi Valley* (New York, 1852). Maps, drawn from memory, as presented to Governor Frontenac, on his return, are now in the Archives de la Marine, Paris. For question as to priority of discovery between Marquette, Joliet, and La Salle, see *Mémoire de Nicolas Perrot*, vol. III of the *Bibliotheca Americana* (Paris and Leipzig, 1864); PARKMAN, *La Salle* (1869); MARGRY, *Mémoires et Documents* (Paris, 1876-86); and SHEA, *Bursting of Pierre Margry's La Salle Bubble* (New York, 1879). For general bibliography, consult WINSOR, *Narrative and Critical History of America* (Boston, 1884-7).

JARVIS KEILEY

Diocese of Joliette

Joliette

(JOLIETTENSIS).

Diocese created by Pius X, 27 January, 1904 by division of the Archdiocese of Montreal; comprises three counties, Joliette, Berthier, and Montcalm, with four parishes of L'Assomption County. It forms a rectangle 105 miles long by about 45 wide.

(1) Religious Organization

The total population is 63,500 souls, of whom 1200 are non-Catholics. This population is divided into thirty-eight canonically erected parishes and four with resident priests. According to its need each parish has one or another of the following associations or confraternities: the Third Order of St. Francis; the League of the Sacred Heart of Jesus, for men and children; the Congregation of the Most Blessed Virgin, for men, youths and young women; the Confraternities of Mount Carmel; Of the Holy Rosary;

of the Bona Mors; of the Holy Angels; the Association for Daily Adoration of the Most Blessed Sacrament; the Association of the Way of the Cross; the Society of St. Vincent de Paul; and the Temperance Society. The last-named, established in each parish, gives good results. Frequent communion is observed in the diocese, and the faithful generally acquit themselves well of their religious duties. There are four vicariates-forane. Ecclesiastical conferences are held twice yearly in each vicariate. The bishop is assisted by a chapter composed of eight titular canons, a vicar-general, and archdeacon for parochial affairs, a procurator for the administration of episcopal revenue, an assistant procurator for diocesan works, and a chancellor for matrimonial affairs and the duties of a secretary. There are 115 priests in the diocese, 104 of whom are secular and 11 religious. The religious in all number 134 men and 390 women. The religious institutions of men are those of the Clerics of St. Viateur (novitiate at Joliette), Brothers of the Sacred Heart, Brothers of Christian Instruction, and Brothers of St. Gabriel. The nuns are Sisters of Charity of Providence, Sisters of the Congregation of Notre-Dame, Sisters of the Holy Names of Jesus and Mary, Sisters of St. Anne, Sisters of the Holy Cross and of the Seven, Dolours, Sisters of the Sacred Hearts of Jesus and Mary, and Sisters Adorers of the Precious Blood.

(2) Educational Institutions

The diocese contains 1 seminary, 3 commercial colleges, 3 commercial academies, 21 boarding-schools for young women, 5 academies, 25 model schools, and 230 elementary schools. There are in these 288 institutions 600 professors, 11 of whom are priests, 9 seminarians, 75 religious, 225 nuns, and 280 lay persons; 15,108 pupils receive instruction in the various institutions, 6067 being under the direction of religious men and women, and 9041 under that of lay teachers. The communities of men and women in the diocese which are charged with education are those mentioned above, with the exception of the Sisters Adorers of the Precious Blood, who lead a contemplative life.

(3) Charitable Institutions

In the diocese there are: 1 hospital, 5 homes for the aged, 5 orphanages for girls, 1 orphanage for boys. These institutions are under the direction of the Sisters of Providence. There are, besides, 6 associations of Ladies

(4) Progress of the Diocese

The first bishop of the Diocese of Joliette is Mgr. Joseph Alfred Archambault. Born at L'Assomption, 23 May, 1859, he made his classical studies at the College of L'Assomption and Laval University, Quebec, and his theological studies at the Grand Séminaire of Montreal. He received at Rome the degrees of Doctor of Theology and of Canon Law, and on his return taught philosophy at the College of L'Assomption (1885-88). He was made vice-chancellor of the Archdiocese of Montreal (1888-92); chancellor (1892-97); titular canon of the cathedral of Montreal (1891-1904); ecclesi-

astical superior of the Sisters of Providence (1891-1901); vicegerent and archdeacon (1897-1904), vice-rector of Laval University, Montreal (1901-04) appointed prothonotary Apostolic, 15 December, 1902, and Bishop of Joliette, 27 June, 1904. He was consecrated 24 August, 1904, in the cathedral of Joliette by Mgr. Bruchesi, Archbishop of Montreal, and preconized in public consistory 14 November in the same year. Since his consecration the diocesan educational and charitable institutions have multiplied and improved.

F.X. PIETTE

Jolly, Philipp Johann Gustav Von

Philipp Johann Gustav von Jolly

German physicist, born at Mannheim, 26 September, 1809; died at Munich, 24 December, 1884. His family came originally from France at the end of the seventeenth century. After attending the gymnasium and lyceum at Mannheim, Jolly went to the University of Heidelberg in 1829, where he studied chiefly mathematics and physics. From 1832 to 1833 he was at Vienna, taking up the technological branches, working as a mechanic, and visiting factories and mining plants. Returning to Heidelberg in 1834, he took the degree of Doctor of Philosophy and began his career as a teacher of mathematics, physics, and technology. He became extraordinary professor of mathematics in 1839, and ordinary professor of physics in 1846. In 1854 he was called to the University of Munich to succeed Ohm as professor of physics. His principal work was in experimental physics, for which he devised numerous new apparatus, and modified and improved the older forms. His studies of osmosis, of the problems of gravitation, of the density of the earth, of the composition of the air, et., suggested the design of the Jolly balance (1864), of a special eudiometer (1879), of an improved mercury air-pump, of the Jolly air thermometer. The following are some of his published works:

- "De Euleri merito de functionibus circularibus" (prize essay, Heidelberg, 1834);
- "Antleitung zur Differential- und Integralrechnung" (Heidelberg, 1846);
- "Die Prinzipien der Mechanik" (Stuttgart, 1852);
- "Physik der Molecularkräfte" (Munich, 1857).

- Contributions to Poggendorff's "Annalen", "Heidelberger Jahrbücher", and "Berichte der Mühener Akademie der Wissenschaften".

WILLIAM FOX

Jonah

Jonah

The fifth of the Minor Prophets. The name is usually taken to mean "dove", but in view of the complaining words of the Prophet (Jonah, iv), it is not unlikely that the name is derived from the root *Yanah* = to mourn, with the signification *dolens* or "complaining". This interpretation goes back to St. Jerome (Comm. on Jonah, iv, 1). Apart from the book traditionally ascribed to him, Jonah is mentioned only once in the Old Testament, IV Kings, xiv, 25, where it is stated that the restoration by Jeroboam II (see Jeroboam) of the borders of Israel against the incursions of foreign invaders was a fulfillment of the "word of the Lord the God of Israel, which he spoke by his servant Jonah the son of Amathi, the prophet, who was of Geth, which is in Opher". This last is but a paraphrastic rendering of the name Gath-Hepher, a town in the territory of Zabulon (Josephus, "Antiq.", XIX, xiii), which was probably the birthplace of the Prophet, and where his grave was still pointed out in the time of St. Jerome. Mention is made of Jonah in Matt., xii, 39 sqq., and in xvi, 4, and likewise in the parallel passages of Luke (xi, 29, 30, 32), but these references add nothing to the information contained in the Old Testament data. According to an ancient tradition mentioned by St. Jerome (Comm., in Jonah, Prol., P.L., XXV, 118), and which is found in Pseudo-Epiphanius (De Vitis Prophetarum, xvi, P.L., XLIII, 407), Jonah was the son of the widow of Sarephta whose resuscitation by the Prophet Elias is narrated in III Kings, xvii, but this legend seems to have no other foundation than the phonetic resemblance between the proper name Amathi, father of the Prophet, and the Hebrew word *Emeth*, "truth", applied to the word of God through Elias by the widow of Sarephta (III Kings, xvii, 24).

The chief interest in the Prophet Jonah centres around two remarkable incidents narrated in the book which bears his name. In the opening verse it is stated that "the word of the Lord came to Jonah the son of Amathi, saying: Arise and go to Ninive, the great city, and preach in it: for the wickedness thereof is come up before me." But the Prophet, instead of obeying the Divine command, "rose up to flee into Tharsis from the face of the Lord" that he might escape the task assigned to him. He boards a ship bound for that port, but a violent storm overtakes him, and on his admission that he is the cause of it, he is cast overboard. He is swallowed by a great fish providentially

prepared for the purpose, and after a three day's sojourn in the belly of the monster, during which time he composes a hymn of thanksgiving, he is cast upon dry land. After this episode he again receives the command to preach in Ninive, and the account of his second journey is scarcely less marvellous than that of the first. He proceeds to Ninive and enters "after a day's journey" into it, foretelling its destruction in forty days. A general repentance is immediately commanded by the authorities, in view of which God relents and spares the wicked city. Jonah, angry and disappointed, wishes for death. He expostulates with the Lord, and declares that it was in anticipation of this result that on the former occasion he had wished to flee to Tharsis. He withdraws from Ninive and, under a booth which he has erected, he awaits the destiny of the city. In this abode he enjoys for a time the refreshing shade of a gourd which the Lord prepares for him. Shortly, however, the gourd is stricken by a worm and the Prophet is exposed to the burning rays of the sun, whereupon he again murmurs and wishes to die. Then the Lord rebukes him for his selfish grief over the withering of a gourd, while still desiring that God should not be touched by the repentance of a city in which "there are more than a hundred and twenty thousand persons that know not how to distinguish between their right hand and their left, and many beasts." Apart from the hymn ascribed to Jonah (ii, 2-11) the contents of the book are prose.

HISTORICITY

Catholics have always looked upon the Book of Jonah as a fact-narrative. In the works of some recent Catholic writers there is a leaning to regard the book as fiction. Only Simon and Jahn, among prominent Catholic scholars, have clearly denied the historicity of Jonah; and the orthodoxy of these two critics may no longer be defended: "Providentissimus Deus" implicitly condemned the ideas of both in the matter of inspiration, and the Congregation of the Index expressly condemned the "Introduction" of the latter.

Reasons for the traditional acceptance of the historicity of Jonah:

I. Jewish Tradition

According to the Septuagint text of the Book of Tobias (xiv, 4), the words of Jonah in regard to the destruction of Ninive are accepted as facts; the same reading is found in the Aramaic text and one Hebrew manuscript. The apocryphal III Mach., vi, 8, lists the saving of Jonah in the belly of the fish along with the other wonders of Old Testament history. Josephus (Ant. Jud., IX, 2) clearly deems the story of Jonah to be historical.

II. The Authority of Our Lord

This reason is deemed by Catholics to remove all doubt as to the fact of the story of Jonah. The Jews asked a "sign" -- a miracle to prove the Messiahship of Jesus. He made answer that no "sign" would be given them other than the "sign of Jonah the

Prophet. For as the Jonah was in the whale's belly three days and three nights: so shall the Son of man be in the heart of the earth three days and three nights. The men of Ninive shall rise in judgment with this generation and shall condemn it: because they did penance at the preaching of Jonah. And behold a greater than Jonah here" (Matt., xii, 40-1; xvi, 4; Luke, xi, 29-32). The Jews asked for a *real* miracle; Christ would have deceived them had He presented a *mere fancy*. He argues clearly that *just* as Jonah was in the whale's belly three days and three nights *even so* He will be in the heart of the earth three days and three nights. If, then, the stay of Jonah in the belly of the fish be only a fiction, the stay of Christ's body in the heart of the earth is only a fiction. If the men of Ninive will really not rise in judgment, neither will the Jews really rise. Christ contrasts fact with fact, not fancy with fancy, nor fancy with fact. It would be very strange, indeed, were He to say that He was greater than a fancy-formed man. It would be little less strange were he to berate the Jews for their real lack of penance by rating this lack in contrast with the penance of Ninive which never existed at all. The whole force of these striking contrasts is lost, if we admit that the story of Jonah is not fact-narrative. Finally, Christ makes no distinction between the story of the Queen of Sheba and that of Jonah (see Matt., xii, 42). He sets the very same historical value upon the Book of Jonah as upon the Third Book of Kings. Such is the very strongest argument that Catholics offer for the firm stand they take upon the ground of the fact-narrative of the story of Jonah.

III. The Authority of the Fathers

Not a single Father has ever been cited in favor of the opinion that Jonah is a fancy-tale and no fact-narrative at all. To the Fathers Jonah was a fact and a type of the Messiah, just such a one as Christ presented to the Jews. Saints Jerome, Cyril, and Theophilus explain in detail the type-meaning of the facts of the Book of Jonah. St. Cyril even forestalls the objections of the Rationalists of today: Jonah flees his ministry, bewails God's mercy to the Ninivites, and in other ways shows a spirit that ill becomes a Prophet and an historical type of Christ. Cyril admits that in all this Jonah failed and is not a type of Christ, but does not admit that these failures of Jonah prove the story of his doings to have been a mere fiction.

To the Rationalist and to the advanced Protestant Biblical scholar these arguments are of no worth whatsoever. They find error not only in Jewish and Christian tradition but in Christ Himself. They admit that Christ took the story of Jonah as a fact-narrative, and make answer that Christ erred; He was a child of His time and represents to us the ideas and errors of His time. The arguments of those who accept the inerrancy of Christ and deny the historicity of Jonah are not conclusive.

- Christ spoke according to the ideas of the people, and had no purpose in telling them that Jonah was really not swallowed by the fish. We ask: Did Christ speak of

the Queen of Sheba as a fact? If so, then He spoke of Jonah as a fact -- unless there be some proof to the contrary.

- Were the book historical in its narrative, certain details would not be omitted, for instance, the place where the Prophet was vomited forth by the sea-monster, the particular sins of which the Ninivites were guilty, the particular kind of calamity by which the city was to be destroyed, the name of the Assyrian king under whom these events took place and who turned to the true God with such marvellous humility and repentance.

We answer, these objections prove that the book is not an historical account done according to later canons of historical criticism; they do not prove that the book is no history at all. The facts narrated are such as suited the purpose of the sacred writer. He told a story of glory unto the God of Israel and of downfall to the gods of Ninive. It is likely that the incidents took place during the period of Assyrian decadence, i.e., the reign of either Asurdanil or Asurnirar (770-745 B.C.). A pest had ravaged the land from 765 till 759 B.C. Internal strife added to the dismay caused by the deadly disease. The king's power was set at naught. Such a king might seem too little known to be mentioned. The Pharaoh of Mosaic times is not deemed to have been a fiction merely because his name is not given.

Jewish tradition assumed that the Prophet Jonah was the author of the book bearing his name, and the same has been generally maintained by the Christian writers who defend the historical character of the narrative. But it may be remarked that nowhere does the book itself claim to have been written by the Prophet (who is supposed to have lived in the eighth century B.C.), and most modern scholars, for various reasons, assign the date of the composition to a much later epoch, probably the fifth century B.C. As in the case of other Old Testament personages, many legends, mostly fantastic and devoid of critical value, grew up around the name Jonah. They may be found in the "Jewish Encyclopedia".

JAMES F. DRISCOLL

Jonas of Bobbio

Jonas of Bobbio

(Or *Jonas of Susa*)

Monk and hagiographer, b. about the close of the sixth century at Sigusia (Susa) in Piedmont; d. after 659. In 618 he entered the monastery of Bobbio in the province of Pavia where he was soon appointed to a position of confidence, probably that of

secretary to the abbots Attala (d. 627) and Bertulf. He accompanied the latter on a journey to Rome in 628, and after his return took up his permanent abode in Gaul. Appealed to by St. Amandus for assistance in his missionary work among the heathen, he laboured in what is now Belgium and Northern France. His presence in this district was the occasion of his composition of the life of St. Vaast, the first Frankish Bishop of Arras (Pas-de-Calais). Owing to a promise made to the local monks during a short visit to the monastery of Bobbio in 639, he wrote between 640 and 643 his principal literary work, the "Life of St. Columbanus." In 659, when he was sent by the queen-regent Bathildis on a mission to Chalon-sur-Saône, he was abbot of a monastery which cannot now be determined. During this journey he sojourned for a few days at the monastery of St. John of Réomé (now Moutier-Saint-Jean) in the Diocese of Langres. To comply with a request made by the monks on this occasion he wrote the life of their founder, St. John. The work to which Jonas chiefly owes his literary fame comprises, besides the "Life of St. Columbanus," the lives of the abbots Attala and Bertulf of Bobbio, Eustace of Luxeuil, and the Abbess Burgundofara (or Fara) of Evoriac (now Faremoutiers). The biographies of Columbanus and his successors, though written in a bombastic style, contain invaluable historical information. Jonas arrived at Bobbio but three years after Columbanus's death, and based his invaluable account of the great Irish saint on the testimony of persons who had known him intimately. Eustace, Attala, and Bertulf, he knew personally. Bede incorporated these lives into his ecclesiastical history, while Flodoard turned that of St. Columbanus into hexameter verse. The "Life of St. Fara" is chiefly an account of the miraculous events alleged to have occurred during this saint's rule at Evoriac. The works of Jonas, exclusive of the "Life of St. Vaast," are printed in P.L. LXXXVII, 1011-88; better edition by Krusch in "Mon. Germ. Hist.: Script. Rer. Mer.," III, 406-13, 505-17; IV, 61-152 (Hannover, 1896 and 1902).

Columbani in the Transactions of the Royal Irish Academy, XXXII, sect. C, part I (Dublin, 1903); SEEBASS in Realencyk. fuer prof. Theol., s.v. Jonas von Bobbio; WATTENBACH, Deutschlands Geschichtsquellen, I (7th ed.), 132.

N.A. WEBER

Jonas of Orleans

Jonas of Orléans

Bishop and ecclesiastical writer, born in Aquitaine; died in 843 or 844. From 818, when he succeeded Bishop Theodulf in the See of Orléans, until the time of his death

he played an important role in the ecclesiastical affairs of France. He was present in 825 at the so-called Council of Paris, at which the question of the veneration of images was again discussed, and Jonas was one of the messengers sent by the emperor to submit to Pope Eugene II excerpts from the acts of the meeting. He also attended the Council of Paris in 829, which treated of reforms to be introduced in Church and State, and drew up the report of the proceedings of the Synod of Thionville (835) concerning the deposition of Ebbo of Reims. His good will toward monastic institutions was demonstrated by the restoration of the monastery of Saint-Mesmin in his diocese.

Jonas left the following writings: (1) "De Institutione laicali" (rules of Christian life for laymen); (2) "De Institutione regiâ" (rules of Christian life for princes); (3) "De Cultu imaginum" (on the veneration of images); (4) a recension of the "Vita" of St. Hubert. The first of these was destined for Matfrid, Count of Orléans, and is almost entirely made up of citations from the Scriptures and the Fathers. To the second work of Jonas, which bears no inscription in the manuscript, d'Achéry has appropriately prefixed the title "De Institutione regia." It was destined for Pepin, King of Aquitaine, son of Louis the Pious. A sort of supplement to the bishop's first work, it follows the same method and bears the same character. The fact that the acts of the Council of Paris (829) and the contents of these two treatises of Jonas are largely identical has raised the question of their priority. The view, at one time more commonly held (d'Achéry, Bähr, Knust, Himly, Duemmler), that the synodal acts borrowed from the "De Institutions regia" of Jonas, has been abandoned by several recent scholars who have reversed the relationship of dependence (Waitz, Simson, Ebert).

In spite of the difference of opinion in this regard, it is generally conceded that Jonas is the author of both the acts and the treatises. The work on the veneration of images was written at the request of Louis the Pious in refutation of the Iconoclastic views of Claudius, Bishop of Turin. Jonas wrote it without having read the writings of Claudius, which he knew only through an extract sent to him by Louis the Pious. He maintains that images are justified for purposes of commemoration, instruction, and ornament, but does not seem to admit the lawfulness of their veneration. The work first appeared in print at Cologne in 1554. We owe to Jonas also the recension of the "Vita S. Huberti" and a short history of the transfer of this saint's relics to the monastery of Andoin. The fact that Bishop Walcaud of Liège besought him to present this life of St. Hubert in a more elegant literary form is evidence of the reputation which Jonas enjoyed as a writer. For the works of Jonas see Migne, P.L., CVI, 121-394; the life of St. Hubert is found in Arndt, "Kleine Denkmaeler aus der Merovingerzeit" (Hannover, 1874).

N.A. WEBER

Jonathan

Jonathan

(Hebrew, "Yahweh hath given", cf. Theodore; Sept. *Ionáthan*.)

Name of several persons mentioned in the Old Testament.

Among these may be mentioned the following:

(1) Jonathan, the son of Gersam the son of Moses, mentioned by name in Judges, xviii, 30, and as a young Levite in xvii, 7 sqq. Having left Bethlehem, his native town, he came to Mt. Ephraim, where he was induced by a certain Michas to remain as priest of an idol. This idol was afterwards seized by the Danites and carried to Lais, whither Jonathan accompanied them, and he and his descendants acted as priests of the idol until the days of the Captivity.

(2) Jonathan (Vulg. Jonathas), eldest son of Saul by Achinoam (I Kings, xiv, 49, 50). He first appears as taking part with his father in the struggle against the Philistines, and such was his bravery that Saul confided to him the command of a thousand soldiers in Gabaa. Jonathan's defeat of the garrison of the Philistines in Gabaa, and his subsequent victory on the confines of the same town are narrated in I Kings, xiii, xiv. Through an intervention regarded as miraculous (xiv, 15) the latter combat resulted in a general rout of the Philistines, and Saul in the excitement of the pursuit proclaimed a rash oath, saying: "Cursed be the man that shall eat food till evening, till I be revenged of my enemies." The course of the flight led through a forest where wild honey appeared upon the ground, but the people tasted it not for they feared the oath. But Jonathan, not having heard his father's pronouncement, innocently tasted the honey, and, when a halt was called in the evening and the priest consulted Yahweh as to a further pursuit of the enemy, no answer was given. Saul immediately assumed that some sin had been committed against the Lord, and again he rashly swore that, even should the guilt be found on his son Jonathan, he should surely die. The lots having indicated Jonathan as the guilty one, he confessed to having tasted the honey, and was saved only by the intervention of the people (I Kings, xiv, 45). When, after his victory over Goliath, the youthful David appeared at the court of Saul, a most deep and loyal friendship sprang up between him and Jonathan, who more than once was instrumental in saving his

friend from Saul's envious wrath (I Kings, xviii sqq.). But Saul, though having several times relented, finally became implacable, and Jonathan, seeing his efforts useless, sent his friend away to Nob after a renewal of the mutual covenant of friendship between themselves and their posterity (I Kings, xx). Jonathan cheerfully renounced in favour of his friend his right to the throne of his father, counting himself happy to be second to him in the kingdom. This covenant was renewed later when David after the siege of Ceila withdrew into the desert of Ziph (I Kings, xxiii, 15-18), but Jonathan was not destined to share in the ultimate triumph of his friend. In a battle against the Philistines in Mount Gelboe he was slain together with his two brothers Abinadab and Melchisus, and Saul his father. Their bodies were piously buried by the inhabitants of Jabes Galaad (I Kings, xxxi).

(3) Jonathan, son of the high priest Abiathar and faithful servant of King David. He was instrumental in saving the king's life by securing for David information concerning the plans of his enemies.

(4) Jonathan, (surnamed Apphus), youngest son of Mathathias and brother of Judas Machabeus. The patriotic exploits of this family of Jewish heroes are narrated in the First and Second Books of the Machabees and also in the works of Josephus (Antiquities, XIII). After the defeat and death of Judas (about 161 b.c.) Jonathan was chosen leader of the patriotic band, at the time hard-pressed and obliged to retire beyond the Jordan. But the death of the unworthy high priest Alcimus brought about a change in public sentiment, and the invading general Bacchides withdrew into Syria giving the Jews a respite of two years. Encouraged by the party of the Hellenists or apostate Jews, however, he made a new attempt to subjugate the country. This attempt was foiled by Jonathan, and the result of the short campaign was a treaty whereby the latter remained practically master of Judea. This state of things continued for six years with a continued increase of power and influence on the part of the Machabeans, so that an alliance with their party was solicited by Bales and Demetrius, the two competitors for the Syrian throne. Jonathan decided in favour of Bales who, having vanquished his rival, bestowed upon Jonathan not only the title of High Priest, but also that of *Strategus* of his country and that of Ruler of a part of the Syrian empire (I Mach., x, 1-66). After many military exploits (I Mach., xi, 60-74) Jonathan sent ambassadors to Rome to renew the treaty made by Judas with the Roman Senate, and he also entered into an alliance with the Spartans (I Mach., xii, 1-23). For a time it seemed as if he were destined to restore his country to complete independence, but Tryphon, the aspirant to the throne of Syria, recognizing in Jonathan his chief obstacle, made him a prisoner by foul treachery and put an end to his career by casting him into a dungeon (I Mach., xii, 24-54). The rule of Jonathan extended from 161 to 143 b.c.

JAMES F. DRISCOLL

Ven. Edward Jones

Ven. Edward Jones

Priest and martyr, b. in the Diocese of St. Asaph, Wales, date unknown; d. in London, 6 May 1590. Bred an Anglican, he was received into the Church at the English College, Reims, 1587; he was ordained priest in 1588, and went to England in the same year. In 1590 he was arrested by a priest-catcher, who pretended to be a Catholic, in a shop in Fleet Street. He was imprisoned in the Tower and brutally tortured by Topcliffe, finally admitting he was a priest and had been an Anglican. These admissions were used against him at his trial, but he made a skillful and learned defense, pleading that a confession elicited under torture was not legally sufficient to ensure a conviction. The court complimented him on his courageous bearing, but of course he was convicted of high treason as a priest coming into England. On the same day he was hanged, drawn, and quartered, opposite the grocer's shop where he had been captured, in Fleet Street near the Conduit. On the same day there suffered Anthony Middleton, priest and martyr, born probably at Middleton-Tyas, Yorkshire, date unknown, son of Ambrose Middleton of Barnard Castle, Durham, and Cecil, daughter of Anthony Crackenthorpe of Howgill Castle, Westmoreland. He entered the English College at Reims 9 Jan., 1582; was ordained 30 May 1586, and went to England in the same year. His work lay in London and the neighbourhood and he laboured very successfully; he was captured at a house in Clerkenwell (London) by the same artifice which was practiced on Father Jones. On the ladder he said: "I call God to witness I die merely for the Catholic Faith, and for being a priest of the true Religion"; and someone present called out, "Sir, you have spoken very well". The martyr was cut down and disemboweled while yet alive.

C.F. WEMYSS BROWN

Inigo Jones

Inigo Jones

A famous English architect, b. 15 July, 1573, in London; d. 21 June, 1652, and was buried in the chancel of St. Benet's, Paul's Wharf, London. His father was a clothworker in the neighbourhood of St. Paul's, and a Catholic; the son adhered to his father's faith throughout his life. Little is known of the first thirty years of his life. Towards the end of the sixteenth century he went to Italy and lived there for many years, principally in Venice. Christian IV, King of Denmark, induced him to leave Italy and accept an appointment at the Danish Court. Buildings are named both in Italy and Denmark as having been designed by Jones, but seemingly without proof. He returned to England in 1601, and for some time was engaged in designing the costly scenery and machinery of the court masques. About 1614 he again went to Italy, and his notes show that he studied the writings of Serlio, Vignola, Fontana, Labacco, and Philibert de l'Orme, and was acquainted with the most famous architects then living in Rome. He also studied the style of Renaissance architecture known as Palladian. On his return to England he was appointed surveyor to the king. Jones designed the queen's house, Greenwich, the banqueting house, Whitehall, St. Paul's church and the piazza of Covent Garden (burnt to the ground 1795), a portico to old St. Paul's cathedral, parts of Somerset House, the Barber Surgeon's Hall (almost entirely destroyed now), Lindsey House, Shaftesbury House, etc. The Grange, Hants, and other country mansions at Coleshill, Berks, Amesbury, Wilts, Wilton and Raynham Hall, Norfolk. He designed the garden front of St. John's College, Oxford, and laid out Lincoln's Inn (the first of the London squares). Jones's later days were filled with adversity, and he died worn out with grief and disappointment. Of his genius as an architect there can be no question, nor can there be any as to his vast influence on the course of architecture in England; but as to the quality of his work and the effect of his influence, opinions differ very widely. His theory of architecture was that "it should be solid, proportional according to the rules, masculine and unaffected". Much of his work, however, is classed as theatrical and his designs were never truly classical. At the request of the king, Jones wrote a book entitled "Stone-Heng Restored" in which he reaches the astonishing conclusion that Stonehenge is the remains of a Roman Temple of the Tuscan order.

THOMAS H. POOLE

The Jordan

The Jordan

(In Hebrew *Yâdên*, from the root *Yârâd*, to descend).

The difference of elevation between the highest point of this river (1847 feet above the sea-level) and the lowest (1286 feet below the sea-level) is 3133 feet. It issues from the side of Mount Hermon by three principal sources: the Nahr el Hasbâni, coming from Hasbeya; the Nahr el Leddân, which rises at Tell el Qâdi (the ancient Laïs-Dan); and the Nahr Baniyas, the glory of what was Cæsarea Philippi. Formed at a point about five and a half miles below Baniyas, by the junction of these three streams, the Jordan enters Lake Hûleh about nine and a third miles lower down. This lake, which is probably "the waters of Merom", is rather more than three and a half miles in length. Between the Bahrat el Hûleh and the Lake of Tiberias, nearly ten miles, the Jordan is clear, and in some places reaches a width of over twenty yards and a depth of nearly seventeen feet. It is crossed by a bridge which connects Damascus with Galilee, the Jisr Benât Yaqûb. Near et Tell, which is Bethsaida Julias, the river enters the Sea of Genesareth, which is 682 feet below the level of the Mediterranean and is more than thirteen miles in length. Leaving the lake towards Samakh, the Jordan commences its innumerable wanderings. The direct distance from the Lake of Tiberias to the Dead Sea is sixty-five miles, but the Jordan, owing to its sinuosities, has a course of 200 miles. At a little distance from where it leaves the lake there are remains of two bridges, Jisr es Semakh and Jisr es Sidd, and in this reach of the river it is still fordable at many points. At about six and a quarter miles from the lake, after receiving the Yarmuk, it passes under an old Arab basalt bridge, the Jisr el Mûdjamieh, and the bridge of the railroad from Caïffa to Damascus.

Beyond the Wadi `Arab is the ford of Abâh, where some locate the Bethbera of the story of Gedeon (Judges, vii, 24). At five and a half miles from the mouth of the Jalûd, which passes Beisân (Scythopolis), the Jordan passes between Tell es Sârem (Salim) and Tabaqât Tahil (Pella). It receives, three and threequarters miles from Salim, the water of such important springs as the Bêda and `Ain esh Shemsieh, where the first Christian tradition placed Ennon: "John also was baptizing in Ennon near Salim" (John, iii, 23). Umm el Amdân, which is very near, was supposed, in the fourth century, to be the Salem of Melchisedech. Over against these springs the Wâdi Yabîs rushes down precipitately, the name of which recalls Jabes Galaad, delivered by Saul (I Kings, xi). From the lake to this point the whole valley is cultivated; thence to Sartabeh, the mountains of Samaria reach to the river. Opposite Sartabeh is the confluence of the Nahr es Zerqa (Jabbok), and just below are to be seen the ruins of the Roman bridge

of Damieh, and the ford of the same name which must have played a part in the well-known episode of Sibboleth (Judges, xii, 5, 6). The utensils and the columns of the Temple of Solomon were cast near here (III Kings, vii, 46). From Damieh onwards the valley ceases to be cultivated; the waters of the Jordan, disturbed by rapids, become yellow and muddy. A two-hours' journey north-east of Jericho are to be found the wooden bridge and the ford of Ghôranieh, where the great highways of Galaad and Moab meet. The Greek monastery of Qars el Yehûd, two and a half miles farther down the river, marks the traditional scene of the passage of the Hebrews (Jos., iii, 9-13) and of the baptism of Christ (Matt., iii). The scene of the ministrations of St. John the Baptist, however, has been very plausibly placed at the ford of the Ghôranieh, which has always been more frequented. In its lower portion the river is swelled by many affluents, which formerly watered a part of the Kikkar, whither Lot came when he parted from Abraham; these affluents are the Wâdi Kefren, and the Wâdi Nimrin.

The Jordan, called by the Arabs *esh Sheriat el Kebir* (the great drinking-place), flows between steep banks of rather brittle clay. The lower part of its basin is called the *Zôr*, the bottom of the valley is the *Ghôr*. It is fringed with trees and shrubs—poplar, tamarisk, rhododendron, agnus castus, apple of Sodom—and its waters contain a great many fish—various species of *capocta*, the *barbus canis*, the *cyprinodon*, and a kind of catfish (*silurus*). Vipers, scorpions, porcupines, jackals, wild boars, ibexes, panthers (*nimr*), and a great variety of birds are found in the neighbouring thickets. A tropical temperature predominates. The water of the Jordan contains a saline residuum, chlorine, sodium, sulphuric acid, and magnesia. The floods of the river occur from February to May. Its width is very variable: at Ghôranieh scarcely more than twenty-seven yards; at the ford of el Henû as much as fortyfive to fifty-five yards; at its mouth about eighty yards. The volume of water brought to the Dead Sea by the Jordan is calculated to be, on the average, 883 cubic feet per second.

F.M. Abel

Jordanis (Jornandes)

Jordanis (Jornandes)

Historian, lived about the middle of the sixth century in the Eastern Roman Empire. His family was of high standing, either Goth or Alanic, and his grandfather was notary to Candac, King of the Alani in Mæsia. He himself held for a time the office of notary, though under what circumstances is not well known. He was later "converted", that is, he took orders. Everything else that is reported of his life rests on more or less plausible conjecture. It is not really proven, for example, that he bore "before his conversion" the martial name of Jornandes (i.e. bold as a boar), nor that after this conversion he became a monk in Thrace or in Mæsia. It is also uncertain whether he was Bishop of Croton, and whether the Vigilius, to whom he dedicated his second work, was Pope Vigilius, who from 547 to 554 lived in exile, chiefly at Constantinople. Two of his historical works have come down to us. The one is a history of the Goths, or, perhaps it would be better to say, of Mæsia, it is now commonly entitled: "Do origine actibusque Getarum" and is dedicated to his friend Castulus (Castalius), at whose instance it was begun about 551. It is substantially an extract from the Gothic history of Cassiodorus Senator, which probably bore the same title. But as this latter work was lost at a very early date, this excerpt becomes of almost inestimable value in determining a series of facts in the history of the Goths and of popular migrations. Naturally, Jordanis transplanted into his work the fundamental idea of Cassiodorus, namely the conviction that the only way to secure for the Gothic race a prosperous future was to bring about its peaceful absorption into the Roman Empire as the centre of Catholicism and of civilization. The second of his works is sometimes called "De summa temporum, vel origine actibusque gentis Romanorum", sometimes "De regnorum et temporum successione", at other times "Liber de origine mundi et actibus Romanorum ceterarumque gentium", and again "De gestis Romanorum". Jordanis served as a source of information for the geographers of Ravenna, for Paul the Deacon, for Hermann Contractus, Hugh of Flavigny, and others. The following, among some forty editions, are worth noting: Augsburg 1015, of the recension of Conrad Peutinger; Migne P.L. LXIX; Mommsen in "Monumenta Germ. Auctores antigenssimi" V; Germ. tr. in the "Geschichtsschreiber der deutschen Vorzeit", V; Fr. tr. by Savagner (Paris, 1842 and 1883); Swedish translation by Peringskiöld (Stockholm, 1719).

PATRICIUS SCHLAGER

Jordanus of Giano

Jordanus of Giano

(DE JANO).

Italian Minorite, b. at Giano in the Valley of Spoleto, c. 1195; d. after 1262. About the year 1220 he entered the Franciscan Order and a year later was sent to Germany with a few other members of his order under the leadership of Cæsarius of Speyer, the first Minorite provincial of Germany. In 1223 he was ordained priest, and in 1225 he became guardian at Mainz and custos of the Minorite houses in Thuringia. He did much for the spread of his order in Northern Germany. In 1230, and again in 1238, he was sent to Italy on business relating to his order. He was present at a chapter of German Franciscans held at Halberstadt in 1262. On this occasion he dictated the early memoirs of the Franciscans in Germany (*De primitivorum Fratrum in Theutoniâ missorum et conversatione et vita*) to a certain Brother Baldwin of Brandenburg. The memoirs begin with the year 1207 and are one of the chief sources for Franciscan history in Germany. The only extant manuscript breaks off abruptly at the year 1238, and has been carefully edited in "*Analecta Franciscana*", I (Quaracchi, 1885), 1-19. A German translation with many erroneous annotations was published by Voigt in "*Abhandlungen der philologisch-historischen Klasse der sächsischen Gesellschaft der Wissenschaften*", V (Leipzig, 1870).

DENIFLE. in *Archiv für Literatur- und Kirchengeschichte des Mittelalters*, I (Berlin, 1885), 630-40; FELDER, *Geschichte der wissenschaftlichen Studien im Franziskaner Orden bis zur Mitte des 18. Jahrh.* (Freiburg, 1904), passim; French tr. (Bar-le-Duc and Paris, 1908).

MICHAEL OTT

Joseph Edmund Jorg

Joseph Edmund Jörg

Historian and politician, b. 23 Dec., 1819 at Immenstadt (Ahgau); d. at Landshut, 18 Nov., 1901. The son of a subaltern, he first studied theology, then philology and history at Munich. He was a pupil of Döllinger, and was for years his collaborator in his "*Geschichte der Reformation*". In 1852 he was engaged in the Bavarian Record Office, and undertook in the same year the editorship of the "*Historisch-politische Blätter*" I which he retained (from 1857 with Franz Binder) till a short time before his

death. For decades his "Zeitläufte", which appeared in this periodical, attracted great attention. On account of his opposition to the Government, he was transferred to Neuburg on the Danube, but was elected in 1863 a substitute member of the Bavarian Lower House, to which he belonged till 1881. He was promoted in 1866 to the position of district archivist at Landshut; from 1868 to 1869 he was a member of the German Zollparlament, and from 1874 to 1879 a member of the German Reichstag. His first work, "Deutschland in der Revolutionsperiode, 1522-26" (1851), a history of the German War of the Peasants, was a work of great literary excellence. The later books, "Geschichte des Protestantismus in seiner neuesten Entwicklung" (1858) and "Die Rene Aera in Preussen" (1860), are a collection of separate essays published in the paper "Historisch-politische Blätter". He was one of the first to realize the true meaning of the development of socialism, and as early as 1867 his "Geschichte der sozialpolitischen Parteien in Deutschland" appeared, having originated in his "Aphorismen" on the socialist movement Published in the "Historisch-politische Blätter". Jörg was a conservative a "Great German" a convinced Bavarian monarchist and a determined but honest opponent of the Bavarian Liberal party and of the subordination of Bavaria to Prussia. The Bavarian "Volkspartei" (People's Party) grew with his cooperation in a few years from a modest group to a majority in the House (1869).

Under King Max II, Jörg was violently opposed to the ministry of von der Pfordten, as he was also to the alliance made with Prussia (22 August) after the unfortunate issue of the war of 1866. His address to the House in Jan., 1870, occasioned the resignation of Prince Hohenlohe with a part of his cabinet. But henceforth events took their course uninfluenced by Jörg. At tile outbreak of the Franco-German War, he advocated the armed neutrality of Bavaria, but was deserted in the House by a number of his party; he was thus unable to prevent his country's participation in the war and the entrance of Bavaria by the Treaty of Versailles, into the new German Empire. However, he afterwards loyally accepted the new order of things. In the Reichstag his proposal to call a meeting of the committee for foreign affairs under the presidency of Bavaria gave rise to a violent conflict with Bismarck on 4 December, 1874. His attack on the Lutz ministry in 1875 failed because of the opposition of the Crown. He left the Reichstag in 1879, and two years later the Bavarian House, thereby ending his public life. The last twenty years of his life were passed on the Burg Trausnitz near Landshut (whence he was known as the "Hermit of the Trausnitz"), and the remainder of his days was devoted to his journalistic work arid his duties in the district archives of Landshut. A man of stainless honour, a Catholic of firm faith, a prominent politician, a sound political writer and thorough scholar, he was a strongly marked personality, and is acknowledged as such even by his opponents. Besides his above-named works his "Memoirs" also deserve mention.

Obituary by BINDER in *Historisch-polit. Blätter*, CXXVIII (1901), 77:3. For a list of the other scanty sources see DÖBERL in *Biograph. Jahrbuch u. deutscher Nekrolog*, VI (1904); cf. *Totenliste*, *ibid.*, 52.

HERMANN CARDAUNS

Josaphat

Josaphat

(Hebrew for "Yahweh hath judged"; Sept. *'Iosaphát*).

Fourth King of Juda after the schism of the Ten Tribes. He was the son and successor of Asa, whose virtuous reign had established good traditions to which the new king endeavoured to remain faithful. He ascended the throne at the age of thirty-five and reigned twenty-three years (914-889 b.c.; 877-53 according to the Assyrian chronology). His zeal in suppressing the idolatrous worship of the "high places" is commended (II Par., xvii, 6), but it was only partially successful (III Kings, xxii, 44). In the third year of his reign he sent throughout the country a missionary expedition to instruct the people in the Law and exhort them to its faithful observance. He is reproached with contracting an alliance with Achab, King of Israel, the results of which were disastrous for the Kingdom of Juda. In the eighteenth year of his reign Josaphat visited Achab in Samaria, and nearly lost his life accompanying his treacherous ally to the siege of Ramoth Galaad (III Kings, xxii). He subsequently continued his policy of reform, exercised a personal supervision over its execution, and established for the same purpose in the royal city a tribunal of priests, levites, and elders (II Par., xix, 4-11). About the twentieth year of his reign he repulsed more by prayers than by force of arms a formidable army of the Moabites, Maonites, and the Children of Ammon (II Par., xx, 1-30). Ochozias having succeeded Achab in the Northern Kingdom, Josaphat joined him in a mercantile enterprise having for object the construction of a fleet at Asiongaber, but the project was displeasing to the Lord and proved a failure (II Par., xx, 35-37).

James F. Driscoll

Valley of Josaphat

Valley of Josaphat

(JEHOSHAPHAT).

Mentioned in only one passage of the Bible (Joel, iii-Heb. text, iv). In Verse 2 we read: "I will gather together all nations, and will bring them down into the valley of Josaphat: and I will plead with them there for my people, and for my inheritance Israel, whom they have scattered among the nations" (cf. verse 12). According to one interpretation which has gained currency, the prophet has presented as the scene of Jahveh's judgment on the Gentiles that valley where, in the presence of Josaphat, King of Juda, He annihilated the coalition of Moab, Ammon, and Edom. This Valley of the desert of Teqo'a, which was called by the Jews *êmêq Berâkâh*, that is, "valley of blessing", is to be sought in the vicinity of the Khirbet Berêkût, some distance to the west of the Khirbet Teqû'a (about eleven miles from Jerusalem). It is also credible that the prophet meant to designate an ideal, indeterminate valley -- the valley of judgment, and no more -- for Josaphat signifies "Jahveh judges". This valley is, in fact, spoken of under the name of "valley of destruction" (A. V. valley of decision") in verse 14 of the same chapter. According to the context, the Divine judgment will be exercised upon the nations who afflicted Juda and Jerusalem at the time of the captivity and the return from exile.

In the fourth century, with the Pilgrim of Bordeaux, the Cedron takes the name of Valley of Josaphat. Eusebius and St. Jerome strengthen this view (Onomasticon, s.v.), while Cyril of Alexandria appears to indicate a different place; early Jewish tradition denied the reality of this valley. Subsequently to the fourth century, Christians, Jews, and, later, Mussulmans regard Cedron as the place of the last judgment. What has lent colour to this popular belief is the fact that since the time of the kings of Juda, Cedron has been the principal necropolis of Jerusalem. Josias scattered upon the tombs of the children of Israel the ashes of the idol of Astarte which he burned in Cedron (IV Kings, xxiii, 4). It was in Cedron that the "hand" of Absalom was set up, and the monument of St. James, and of Zachary. The ornamental facade of the tomb said to be that of Josaphat has been completely walled up by the Jews, who have their cemeteries on the flanks of the Valley of Cedron. They wish to stand in the first rank on the day when God shall appear in the Valley of Josaphat.

F.M. ABEL

St. Josaphat Kuncevyč

St. Josaphat Kuncevyč

Martyr, b. in the little town of Volodymyr in Lithuania (Volyn) in 1580 or -- according to some writers -- 1584; d. at Vitebsk, Russia, 12 November, 1623. The saint's birth occurred in a gloomy period for the Ruthenian Church. Even as early as the beginning of the sixteenth century the Florentine Union had become a dead-letter; in the case of the Ruthenian Church, complete demoralization followed in the wake of its severance from Rome, and the whole body of its clergy became notorious alike for their gross ignorance and the viciousness of their lives. After the Union of Berest' in 1596 the Ruthenian Church was divided into two contending parties -- the uniates and those who persevered in schism -- each with its own hierarchy. Among the leaders of the schismatic party, who laboured to enkindle popular hatred against the Uniates, Meletius Smotryckyj was conspicuous, and the most celebrated of his victims was Josaphat. Although of a noble Ruthenian stock, Josaphat's father had devoted himself to commercial pursuits, and held the office of town-councilor. Both parents contributed to implant the seeds of piety in the heart of their child. In the school at Volodymyr Josaphat -- Johannes was the saint's baptismal name -- gave evidence of unusual talent; he applied himself with the greatest zeal to the study of ecclesiastical Slav, and learned almost the entire *casoslov* (breviary), which from this period he began to read daily. From this source he drew his early religious education, for the unlettered clergy seldom preached or gave catechetical instruction. Owing to the straitened circumstances of his parents, he was apprenticed to the merchant Popovyc at Vilna. In this town, remarkable for the corruption of its morals and the contentions of the various religious sects, he seemed specially guarded by Providence, and became acquainted with certain excellent men (e.g. Benjamin Rutski), under whose direction he advanced in learning and in virtue. At the age of twenty-four (1604) he entered the Basilian monastery of the Trinity at Vilna. The fame of his virtues rapidly spread, and distinguished people began to visit him. After a notable life as a layman, Rutski also joined the order, bringing with him a wide erudition. When Josaphat reached the diaconate, regular services and labour for the salvation of souls had been already begun; the number of novices steadily increased, and under Rutski -- who had meanwhile been ordained priest -- there began the regeneration of religious life among the Ruthenians. In 1609, after private study under the Jesuit Fabricius, Josaphat was ordained priest. He subsequently became superior in several monasteries, and on 12 November, 1617, was reluctantly consecrated Bishop of Vitebsk, with right of succession to the Archbishopric of Polotsk. He became archbishop in 1618. While each succeeding year saw fresh

evidence of his fruitful labours, it also witnessed the steady growth of the hatred of the schismatic party. Finally on 12 November, 1623, an axe-stroke and a bullet brought Josaphat his martyr's crown. After numerous miracles had occurred, a commission was appointed by Urban VIII in 1628 to inquire into the cause of Josaphat, and examined on oath 116 witnesses. Although five years had elapsed since Josaphat's death, his body was still incorrupt. In 1637 a second commission investigated the life of the martyr, and in 1643 -- twenty years after his death -- Josaphat was beatified. His canonization took place in 1867.

Great were the virtues of the saint. As a boy he shunned the usual games of childhood, prayed much, and lost no opportunity of assisting at the Divine services. Children especially regarded him with the greatest affection, and found in him a worthy model. As an apprentice, he devoted every leisure hour to prayer and study. At first Popovyc viewed this behaviour with displeasure, but Josaphat gradually won such a position in his esteem, that Popovyc offered him his entire fortune and his daughter's hand. But Josaphat's love for the religious life never wavered. At first without a human guide along the paths of virtue, he received all spiritual direction immediately from the Holy Ghost. His favourite pious exercise was to make a *poklony* (i.e. a reverence, in which the head touches the ground) with the ejaculation: "Jesus Christ, Son of God, have mercy on me, a poor sinner." Never eating meat, he fasted much, wore a hair-shirt and an angular chain, slept on the bare floor, and chastised his body until the blood flowed. The Jesuits frequently urged him to set some bounds to his austerities. From his zealous study of the liturgical books he drew many proofs of Catholic truth, using his knowledge in the composition of several works -- "On the Baptism of St. Volodymyr"; "On the Falsification of the Slavic Books by the Enemies of the Metropolitan"; "On Monks and their Vows". As deacon, priest, and bishop, he was distinguished by his extraordinary zeal in the service of souls. Not alone in the church did he preach and hear confessions, but likewise in the fields, hospitals, prisons, and even on his journeys. Even where his words of instruction might by themselves have failed, his entreaties and tears ensured him success. This zeal, united with his kindness and extraordinary love for the poor, won numbers to the Catholic Faith. Among his converts were included many important personages such as Ignatius, Patriarch of Moscow, and Emmanuel Cantacuzenus, who belonged to the family of the Greek Emperor Palæologus. As archbishop he restored the churches; issued a catechism to the clergy with instructions that it should be learned by heart; composed rules for the priestly life, entrusting to the deacons the task of superintending their observance; assembled synods in various towns in the dioceses, and firmly opposed the Imperial Chancellor Sapieha, when he wished to make many concessions in favour of the schismatics. Throughout all his strivings and all his occupations, he continued his exemplary life as a religious, and never abated his zeal for self-

mortification and prayer. He awaited death with a certain yearning, refusing to avail himself of the opportunity of flight afforded him. After his death his influence was still greater: conversions were numerous, and veneration for him continued to extend. His feast is kept on the first Sunday after 12 November, according to the Julian Calendar.

Josaphat J. Markevyc

St. Joseph

St. Joseph

Spouse of the Blessed Virgin Mary and foster-father of Our Lord Jesus Christ.

LIFE

Sources. The chief sources of information on the life of St. Joseph are the first chapters of our first and third Gospels; they are practically also the only reliable sources, for, whilst, on the holy patriarch's life, as on many other points connected with the Saviour's history which are left untouched by the canonical writings, the apocryphal literature is full of details, the non-admittance of these works into the Canon of the Sacred Books casts a strong suspicion upon their contents; and, even granted that some of the facts recorded by them may be founded on trustworthy traditions, it is in most instances next to impossible to discern and sift these particles of true history from the fancies with which they are associated. Among these apocryphal productions dealing more or less extensively with some episodes of St. Joseph's life may be noted the so-called "Gospel of James", the "Pseudo-Matthew", the "Gospel of the Nativity of the Virgin Mary", the "Story of Joseph the Carpenter", and the "Life of the Virgin and Death of Joseph".

Genealogy. St. Matthew (1:16) calls St. Joseph the son of Jacob; according to St. Luke (3:23), Heli was his father. This is not the place to recite the many and most various endeavours to solve the vexing questions arising from the divergences between

both genealogies; nor is it necessary to point out the explanation which meets best all the requirements of the problem (see Genealogy of Christ); suffice it to remind the reader that, contrary to what was once advocated, most modern writers readily admit that in both documents we possess the genealogy of Joseph, and that it is quite possible to reconcile their data.

Residence. At any rate, Bethlehem, the city of David and his descendants, appears to have been the birth-place of Joseph. When, however, the Gospel history opens, namely, a few months before the Annunciation, Joseph was settled at Nazareth. Why and when he forsook his home-place to betake himself to Galilee is not ascertained; some suppose -- and the supposition is by no means improbable -- that the then moderate circumstances of the family and the necessity of earning a living may have brought about the change. St. Joseph, indeed, was a *tekton*, as we learn from [Matthew 13:55](#), and [Mark 6:3](#). The word means both mechanic in general and carpenter in particular; St. Justin vouches for the latter sense (*Dial. cum Tryph.*, lxxxviii, in P.G., VI, 688), and tradition has accepted this interpretation, which is followed in the English Bible.

Marriage. It is probably at Nazareth that Joseph betrothed and married her who was to become the Mother of God. When the marriage took place, whether before or after the Incarnation, is no easy matter to settle, and on this point the masters of exegesis have at all times been at variance. Most modern commentators, following the footsteps of St. Thomas, understand that, at the epoch of the Annunciation, the Blessed Virgin was only affianced to Joseph; as St. Thomas notices, this interpretation suits better all the evangelical data.

It will not be without interest to recall here, unreliable though they are, the lengthy stories concerning St. Joseph's marriage contained in the apocryphal writings. When forty years of age, Joseph married a woman called Melcha or Escha by some, Salome by others; they lived forty-nine years together and had six children, two daughters and four sons, the youngest of whom was James (the Less, "the Lord's brother"). A year after his wife's death, as the priests announced through Judea that they wished to find in the tribe of Juda a respectable man to espouse Mary, then twelve to fourteen years of age, Joseph, who was at the time ninety years old, went up to Jerusalem among the candidates; a miracle manifested the choice God had made of Joseph, and two years later the Annunciation took place. These dreams, as St. Jerome styles them, from which many a Christian artist has drawn his inspiration (see, for instance, Raphael's "Espousals of the Virgin"), are void of authority; they nevertheless acquired in the course of ages some popularity; in them some ecclesiastical writers sought the answer to the well-known difficulty arising from the mention in the Gospel of "the Lord's brothers"; from them also popular credulity has, contrary to all probability, as well as to the tradition

witnessed by old works of art, retained the belief that St. Joseph was an old man at the time of marriage with the Mother of God.

The Incarnation. This marriage, true and complete, was, in the intention of the spouses, to be virgin marriage (cf. St. Aug., "De cons. Evang.", II, i in P.L. XXXIV, 1071-72; "Cont. Julian.", V, xii, 45 in P.L. XLIV, 810; St. Thomas, III:28; III:29:2). But soon was, the faith of Joseph in his spouse to be sorely tried: she was with child. However painful the discovery must have been for him, unaware as he was of the mystery of the Incarnation, his delicate feelings forbade him to defame his affianced, and he resolved "to put her away privately; but while he thought on these things, behold the angel of the Lord appeared to him in his sleep, saying: Joseph, son of David, fear not to take unto thee Mary thy wife, for that which is conceived in her, is of the Holy Ghost. . . And Joseph, rising from his sleep, did as the angel of the Lord had commanded him, and took unto him his wife" ([Matthew 1:19, 20, 24](#)).

The Nativity and the Flight to Egypt. A few months later, the time came for Joseph and Mary to go to Bethlehem, to be enrolled, according to the decree issued by Caesar Augustus: a new source of anxiety for Joseph, for "her days were accomplished, that she should be delivered", and "there was no room for them in the inn ([Luke 2:1-7](#)). What must have been the thoughts of the holy man at the birth of the Saviour, the coming of the shepherds and of the wise men, and at the events which occurred at the time of the Presentation of Jesus in the Temple, we can merely guess; St. Luke tells only that he was "wondering at those things which were spoken concerning him" (2:33). New trials were soon to follow. The news that a king of the Jews was born could not but kindle in the wicked heart of the old and bloody tyrant, Herod, the fire of jealousy. Again "an angel of the Lord appeared in sleep to Joseph, saying: Arise, and take the child and his mother, and fly into Egypt: and be there until I shall tell thee" ([Matthew 2:13](#)).

Return to Nazareth. The summons to go back to Palestine came only after a few years, and the Holy Family settled again at Nazareth. St. Joseph's was henceforth the simple and uneventful life of an humble Jew, supporting himself and his family by his work, and faithful to the religious practices commanded by the Law or observed by pious Israelites. The only noteworthy incident recorded by the Gospel is the loss of, and anxious quest for, Jesus, then twelve years of old, when He had strayed during the yearly pilgrimage to the Holy City ([Luke 2:42-51](#)).

Death. This is the last we hear of St. Joseph in the sacred writings, and we may well suppose that Jesus's foster-father died before the beginning of Savior's public life. In several circumstances, indeed, the Gospels speak of the latter's mother and brothers ([Matthew 12:46](#); [Mark 3:31](#); [Luke 8:19](#); [John 7:3](#)), but never do they speak of His father in connection with the rest of the family; they tell us only that Our Lord, during His

public life was referred to as the son of Joseph ([John 1:45](#); [6:42](#); [Luke 4:22](#)) the carpenter ([Matthew 13:55](#)). Would Jesus, moreover, when about die on the Cross, have entrusted His mother to John's care, had St. Joseph been still alive? According to the apocryphal "Story of Joseph the Carpenter", the holy man reached his hundred and eleventh year when he died, on 20 July (A. D. 18 or 19). St. Epiphanius gives him ninety years of age at the time of his demise; and if we are to believe the Venerable Bede, he was buried in the Valley of Josaphat. In truth we do not know when St. Joseph died; it is most unlikely that he attained the ripe old age spoken of by the "Story of Joseph" and St. Epiphanius. The probability is that he died and was buried at Nazareth.

DEVOTION TO SAINT JOSEPH

Joseph was "a just man". This praise bestowed by the Holy Ghost, and the privilege of having been chosen by God to be the foster-father of Jesus and the Spouse of the Virgin Mother, are the foundations of the honour paid to St. Joseph by the Church. So well-grounded are these foundations that it is not a little surprising that the cult of St. Joseph was so slow in winning recognition. Foremost among the causes of this is the fact that "during the first centuries of the Church's existence, it was only the martyrs who enjoyed veneration" (Kellner). Far from being ignored or passed over in silence during the early Christian ages, St. Joseph's prerogatives were occasionally descanted upon by the Fathers; even such eulogies as cannot be attributed to the writers among whose works they found admittance bear witness that the ideas and devotion therein expressed were familiar, not only to the theologians and preachers, and must have been readily welcomed by the people. The earliest traces of public recognition of the sanctity of St. Joseph are to be found in the East. His feast, if we may trust the assertions of Papebroch, was kept by the Copts as early as the beginning of the fourth century. Nicephorus Callistus tells likewise -- on what authority we do not know -- that in the great basilica erected at Bethlehem by St. Helena, there was a gorgeous oratory dedicated to the honour of our saint. Certain it is, at all events, that the feast of "Joseph the Carpenter" is entered, on 20 July, in one of the old Coptic Calendars in our possession, as also in a Synazarium of the eighth and ninth century published by Cardinal Mai (*Script. Vet. Nova Coll.*, IV, 15 sqq.). Greek menologies of a later date at least mention St. Joseph on 25 or 26 December, and a twofold commemoration of him along with other saints was made on the two Sundays next before and after Christmas.

In the West the name of the foster-father of Our Lord (*Nutritor Domini*) appears in local martyrologies of the ninth and tenth centuries, and we find in 1129, for the first time, a church dedicated to his honour at Bologna. The devotion, then merely private, as it seems, gained a great impetus owing to the influence and zeal of such saintly persons as St. Bernard, St. Thomas Aquinas, St. Gertrude (d. 1310), and St. Bridget of Sweden (d. 1373). According to Benedict XIV (*De Serv. Dei beatif.*, I, iv, n.

11; xx, n. 17), "the general opinion of the learned is that the Fathers of Carmel were the first to import from the East into the West the laudable practice of giving the fullest cultus to St. Joseph". His feast, introduced towards the end shortly afterwards, into the Dominican Calendar, gradually gained a foothold in various dioceses of Western Europe. Among the most zealous promoters of the devotion at epoch, St. Vincent Ferrer (d. 1419), Peter d'Ailly (d. 1420), St. Bernadine of Siena (d. 1444), and Jehan Charlier Gerson (d. 1429) deserve an especial mention. Gerson, who had, in 1400, composed an Office of the Espousals of Joseph particularly at the Council of Constance (1414), in promoting the public recognition of the cult of St. Joseph. Only under the pontificate of Sixtus IV (1471-84), were the efforts of these holy men rewarded by Roman Calendar (19 March). From that time the devotion acquired greater and greater popularity, the dignity of the feast keeping pace with this steady growth. At first only a *festum simplex*, it was soon elevated to a double rite by Innocent VIII (1484-92), declared by Gregory XV, in 1621, a festival of obligation, at the instance of the Emperors Ferdinand III and Leopold I and of King Charles II of Spain, and raised to the rank of a double of the second class by Clement XI (1700-21). Further, Benedict XIII, in 1726, inserted the name into the Litany of the Saints.

One festival in the year, however, was not deemed enough to satisfy the piety of the people. The feast of the Espousals of the Blessed Virgin and St. Joseph, so strenuously advocated by Gerson, and permitted first by Paul III to the Franciscans, then to other religious orders and individual dioceses, was, in 1725, granted to all countries that solicited it, a proper Office, compiled by the Dominican Pierto Aurato, being assigned, and the day appointed being 23 January. Nor was this all, for the reformed Order of Carmelites, into which St. Teresa had infused her great devotion to the foster-father of Jesus, chose him, in 1621, for their patron, and in 1689, were allowed to celebrate the feast of his Patronage on the third Sunday after Easter. This feast, soon, adopted throughout the Spanish Kingdom, was later on extended to all states and dioceses which asked for the privilege. No devotion, perhaps, has grown so universal, none seems to have appealed so forcibly to the heart of the Christian people, and particularly of the labouring classes, during the nineteenth century, as that of St. Joseph.

This wonderful and unprecedented increase of popularity called for a new lustre to be added to the cult of the saint. Accordingly, one of the first acts of the pontificate of Pius IX, himself singularly devoted to St. Joseph, was to extend to the whole Church the feast of the Patronage (1847), and in December, 1870, according to the wishes of the bishops and of all the faithful, he solemnly declared the Holy Patriarch Joseph, patron of the Catholic Church, and enjoined that his feast (19 March) should henceforth be celebrated as a double of the first class (but without octave, on account of Lent). Following the footsteps of their predecessor, Leo XIII and Pius X have shown an equal

desire to add their own jewel to the crown of St. Joseph: the former, by permitting on certain days the reading of the votive Office of the saint; and the latter by approving, on 18 March, 1909, a litany in honour of him whose name he had received in baptism.

CHARLES L. SOUVAY

Joseph

Joseph

The eleventh son of Jacob, the firstborn of Rachel, and the immediate ancestor of the tribes of Manasses and Ephraim. His life is narrated in Gen., xxx, 22-24; xxxvii; xxxix-1, wherein contemporary scholars distinguish three chief documents (J, E, P). (*See Abraham*) The date of his eventful career can be fixed only approximately at the present day, for the Biblical account of Joseph's life does not name the particular Pharaoh of his time, and the Egyptian customs and manners therein alluded to are not decisive as to any special period in Egyptian history. His term of office in Egypt falls probably under one of the later Hyksos kings (*see EGYPT*). His name, either contracted from *Jehoseph* (Ps. lxxxix, 6, in the Heb.) or abbreviated from *Joseph-El* (cf. Karnak inscription of Thothmes III, no. 78), is distinctly connected in Gen., xxx, 23, 24, with the circumstances of his birth and is interpreted: "may God add". He was born in Haran, of Rachel, Jacob's beloved and long-barren wife, and became the favourite son of the aged patriarch. After Jacob's return to Chanaan, various circumstances made Joseph the object of the mortal hatred of his brothers. He had witnessed some very wicked deed of several among them, and they knew that it had been reported to their father. Moreover, in his partiality to Joseph, Jacob gave him an ample garment of many colours, and this manifest proof of the patriarch's greater love for him aroused the jealousy of Joseph's brothers to such an extent that "they could not speak peaceably to him". Finally, with the imprudence of youth, Joseph told his brothers two dreams which clearly portended his future elevation over them all, but which, for the present, simply caused them to hate him all the more (Gen., xxxvii, 1-11). In this frame of mind, they seized upon the first opportunity to get rid of the one of whom they spoke as "the dreamer". As they fed their father's flocks in Dothain (now Tell Dothain, about fifteen miles north of Sichem), they saw from afar Joseph, who had been sent by Jacob to inquire about their welfare, coming to them, and they at once resolved to reduce to naught all his dreams of future greatness. At this point the narrative in Genesis combines two distinct accounts of the manner in which the brothers of Joseph actually carried out their intention of avenging themselves upon him. These accounts present slight variations, which are examined in detail by recent commentators on Genesis, and which, far from destroying, rather confirm the historical character of the fact that,

through the enmity of his brothers, Joseph was brought down to Egypt. To protect themselves they dipped Joseph's fine garment into the blood of a kid, and sent it to their father. At the sight of this blood-stained garment, Jacob naturally believed that a wild beast had devoured his beloved son, and he gave himself up to the most intense grief (xxxvii, 12-35).

While thus bewailed as dead by his father, Joseph was sold into Egypt, and treated with the utmost consideration and the greatest confidence by his Egyptian master, to whom Gen., xxxvii, 36, gives the name of *Putiphar* ["He whom Ra (the sun-god) gave"] and whom it describes as Pharaoh's eunuch and as the captain of the royal body-guard (cf. xxxix, 1). Quick and trustworthy, Joseph soon became his master's personal attendant. He was next entrusted with the superintendence of his master's house, a most extensive and responsible charge, such as was unusual in large Egyptian households. With Yahweh's blessing, all things, "both at home and in the field", became so prosperous under Joseph's management that his master trusted him implicitly, and "knew not any other things, save the bread which he ate". While thus discharging with perfect success his manifold duties of *major-domo* (Egyp. *mer-per*), Joseph was often brought in contact with the lady of the house, for at that time there was as much free intercourse between men and women in Egypt as there is among us in the present day. Oftentimes she noticed the youthful and handsome Hebrew overseer, and carried away by passion, she repeatedly tempted him to commit adultery with her, till at length, resenting his virtuous conduct, she accused him of those very criminal solicitations wherewith she had herself pursued him. The credulous master believed the report of his wife, and in his wrath cast Joseph into prison. There also Yahweh was with His faithful servant: He gave him favour with the keeper of the prison, who soon placed in Joseph implicit confidence, and even committed to his charge the other prisoners (xxxix, 2-23). Shortly afterwards two of Pharaoh's officers, the chief butler and chief baker, having incurred the royal displeasure for some reason unknown to us, were put in ward in the house of the captain of the guard. They also were placed under Joseph's charge, and as he came in to them one morning, he noticed their unusual sadness. They could not catch the meaning of a dream which each had had during the night, and there was no professional interpreter of dreams near at hand. Then it was that Joseph interpreted their dreams correctly, bidding the chief butler to remember him when restored to his office, as indeed he was three days after, on Pharaoh's birthday (xl). Two years rolled by, after which the monarch himself had two dreams, the one of the fat and lean kine, and the other of the full and withered ears. Great was Pharaoh's perplexity at these dreams, which no one in the realm could interpret. This occurrence naturally reminded the chief butler of Joseph's skill in interpreting dreams, and he mentioned to the king what had happened in his own case and in that of the chief baker. Summoned before Pharaoh,

Joseph declared that both dreams signified that seven years of plenty would immediately be followed by seven years of famine, and further suggested that one-fifth of the produce of the years of plenty be laid by as provision for the years of famine. Deeply impressed by the clear and plausible interpretation of his dreams, and recognizing in Joseph a wisdom more than human, the monarch entrusted to him the carrying out of the practical measure which he had suggested. For this purpose he raised him to the rank of keeper of the royal seal, invested him with an authority second only to that of the throne, bestowed on him the Egyptian name of *Zaphenath-paneah* ("God spoke, and he came into life"), and gave him to wife Aseneth, the daughter of Putiphares, the priest of the great national sanctuary at On (or Heliopolis, seven miles north east of the modern Cairo).

Soon the seven years of plenty predicted by Joseph set in, during which he stored up corn in each of the cities from which it was gathered, and his wife, Aseneth, bore him two sons whom he called Manasses and Ephraim, from the favorable circumstances of the time of their birth. Next came the seven years of dearth, during which by his skilful management Joseph saved Egypt from the worst features of want and hunger, and not only Egypt, but also the various countries around, which had to suffer from the same grievous and protracted famine (xli). Among these neighbouring countries was counted the land of Chanaan where Jacob had continued to dwell with Joseph's eleven brothers. Having heard that corn was sold in Egypt, the aged patriarch sent his sons thither to purchase some, keeping back, however, Rachel's second child, Benjamin, "lest perhaps he take harm in the journey". Admitted into Joseph's presence, his brothers failed to recognize in the Egyptian grandee before them the lad whom they had so cruelly treated twenty years before. He roughly accused them of being spies sent to discover the undefended passes of the eastern frontier of Egypt, and when they volunteered information about their family, he, desirous of ascertaining the truth concerning Benjamin, retained one of them as hostage in prison and sent the others home to bring back their youngest brother with them. On their return to their father, or at their first lodging-place on the way, they discovered the money which Joseph had ordered to be placed in their sacks. Great was their anxiety and that of Jacob, who for a time refused to allow his sons to return to Egypt in company with Benjamin. At length he yielded under the pressure of famine, sending, at the same time, a present to conciliate the favour of the Egyptian prime minister. At the sight of Benjamin Joseph understood that his brothers had told him the truth at their first appearance before him, and he invited them to a feast in his own house. At the feast he caused them to be seated exactly according to their age, and he honoured Benjamin with "a greater mess", as a mark of distinction (xlii-xliii). Then they left for home, unsuspecting that at Joseph's order his divining cup had been hidden in Benjamin's sack. They were soon

overtaken, charged with theft of that precious cup, which, upon search, was found in the sack where it had been hidden. In their dismay they returned in a body to Joseph's house, and offered to remain as his bondmen in Egypt, an offer which Joseph declined, declaring that he would only retain Benjamin. Whereupon Juda pleads most pathetically that, for the sake of his aged father, Benjamin be dismissed free, and that he be allowed to remain in his brother's place as Joseph's bondman. Then it was that Joseph disclosed himself to his brothers, calmed their fears, and sent them back with a pressing invitation to Jacob to come and settle in Egypt (xliv-xlv, 24).

It was in the land of Gessen, a pastoral district about forty miles north-east of Cairo, that Joseph called his father and brothers to settle. There they lived as prosperous shepherds of the king, while in their misery the Egyptians were gradually reduced to sell their lands to the Crown, in order to secure their subsistence from the all-powerful prime minister of Pharaoh. And so Joseph brought it to pass that the former owners of landed property — with the exception, however, of the priests — became simple tenants of the king and paid to the royal treasury, as it were, an annual rent of one-fifth of the produce of the soil (xlvi, 28-xlvii, 26). During Jacob's last moments, Joseph promised his father that he would bury him in Chanaan, and caused him to adopt his two sons, Manasses and Ephraim (xlvii, 25-xlviii). After his father's demise, he had his body embalmed and buried with great pomp in the Cave of Machpelah (l, 1-14). He also allayed the fears of his brothers who dreaded that he should now avenge their former ill-treatment of him. He died at the age of 110, and his body was embalmed and put in a coffin in Egypt (l, 15-25). Ultimately, his remains were carried into Chanaan and buried in Sichem (Exod., xiii, 19; Josue, xxiv, 32).

Such, in substance, is the Biblical account of Joseph's career. In its wonderful simplicity, it sketches one of the most beautiful characters presented by Old-Testament history. As a boy, Joseph has the most vivid horror for the evil done by some of his brothers; and as a youth, he resists with unflinching courage the repeated and pressing solicitations of his master's wife. Cast into prison, he displays great power of endurance, trusting to God for his justification. When raised to the rank of viceroy of Egypt, he shows himself worthy of that exalted dignity by his skilful and energetic efforts to promote the welfare of his adopted countrymen and the extension of his master's power. A character so beautiful made Joseph a most worthy type of Christ, the model of all perfection, and it is comparatively easy to point out some of the traits of resemblance between Jacob's beloved son and the dearly beloved Son of God. Like Jesus, Joseph was hated and cast out by his brethren, and yet wrought out their salvation through the sufferings they had brought upon him. Like Jesus, Joseph obtained his exaltation only after passing through the deepest and most undeserved humiliations; and, in the kingdom over which he ruled, he invited his brethren to join those whom

heretofore they had looked upon as strangers, in order that they also might enjoy the blessings which he had stored up for them. Like the Saviour of the world, Joseph had but words of forgiveness and blessing for all who, recognizing their misery, had recourse to his supreme power. It was to Joseph of old, as to Jesus, that all had to appeal for relief, offer homages of the deepest respect, and yield ready obedience in all things. Finally, to the Patriarch Joseph, as to Jesus, it was given to inaugurate a new order of things for the greater power and glory of the monarch to whom he owed his exaltation.

While thus recognizing the typical meaning of Joseph's career, one should not for a moment lose sight of the fact that one is in presence of a distinctly historical character. Efforts have indeed been made in certain quarters to transform the history of Joseph into a story of a tribe of the same name which, at some remote period, would have attained to great power in Egypt, and which, at a much later date, popular imagination would have simply pictured as an individual. But such a view of the Biblical account is decidedly inadmissible. To careful scholars it will always appear more difficult to think of Joseph as a tribe that rose to power in Egypt than as an individual who actually passed through the experiences which are described in Genesis. Again, they will always look upon the incidents narrated in the sacred record as too natural, and too closely related, to be entirely the product of fiction. The same historical character of the Biblical narrative is powerfully confirmed by the substantial agreement which contemporary critics feel bound to admit between the two principal documents (J, E), which, according to them, have been used in its composition: such an agreement points manifestly to an earlier oral tradition, which, when committed to writing in two distinct forms, was not materially affected by the altered circumstances of a later age. It is finally put beyond the possibility of a doubt by the Egyptian colouring which is common to both these documents, and which will be presently described. This Egyptian element is no mere literary dress with which the popular fancy of a later date and in a distant land could have vested more or less happily the incidents narrated. It belongs to the very core of the history of Joseph, and is plainly a direct reflection of the manners and customs of ancient Egypt. Its constant truthfulness to things Egyptian proves the existence of an ancient tradition, dating as far back as the Egyptian period, and faithfully preserved in the composite account of Genesis.

The extent of the Egyptian colouring just referred to in the history of Joseph has been closely investigated by recent scholars. The brown-skinned children of Israel, who brought camels richly laden from the East to the Nile, are drawn to life on the Egyptian monuments, and the three kinds of spices they were carrying into Egypt are precisely those which would be in demand in that country for medicinal, religious, or embalming purposes. The existence of various overseers in the houses of Egyptian grandees is in perfect harmony with ancient Egyptian society, and the *mer-per* or su-

perintendent of the house, such as Joseph was, is in particular often mentioned on the monuments. To the story of Joseph and his master's wife, there is a remarkable and well-known parallel in the Egyptian "Tale of the Two Brothers". The functions and dreams of the chief butler and chief baker are Egyptian in their minute details. In the seven cows which Pharaoh saw feeding in the meadow, we have a counterpart of the seven cows of Athor, pictured in the vignette of chapter cxlviii of the "Book of the Dead". Joseph's care to shave and change his raiment before appearing in the presence of Pharaoh, is in agreement with Egyptian customs. His advice to gather corn during the seven years of plenty falls in with Egyptian institutions, since all important cities were supplied with granaries. Joseph's investiture, his change of name at his elevation, can be easily illustrated by reference to the Egyptian monuments. The occurrence of famines of long duration, the successful efforts made to supply the corn to the people year after year while they lasted, find their parallels in recently discovered inscriptions. The charge of being spies, made by Joseph against his brothers, was most natural in view of the precautions known to have been taken by the Egyptian authorities for the safety of their Eastern frontier. The subsequent history of Joseph, his divining cup, his giving to his brothers changes of garments, the land of Gessen being set apart for his father and brethren, because the shepherd was an abomination to the Egyptians, Joseph's embalming of his father, the funeral procession for Jacob's burial, etc., exhibit in a striking manner the great accuracy of the Biblical account in its numerous and oftentimes passing references to Egyptian habits and customs. Even the age of 110 years, at which Joseph died, appears to have been regarded in Egypt — as is shown by several papyri — as the most perfect age to be desired.

FRANCIS E. GIGOT

Joseph of Issachar

Joseph of Issachar

A man of the tribe of Issachar, and the father of Igal who was one of the spies sent by Moses to traverse Chanaan and report on the country ([Numbers 13:8](#)).

FRANCIS E. GIGOT

Joseph II

Joseph II

(1741-90).

German Emperor (reigned 1765-90), of the House of Hapsburg-Lorraine, son and successor of Maria Theresa and Francis I.

I. DEVELOPMENT OF CHARACTER

Of his mother's sixteen children he was the most difficult to manage, and her attempts to frighten him by threats of the spirit-world only laid the foundations of his religious scepticism. A soldier-tutor employed in vain the severity of a martinet; a Jesuit instructed him in religion, Latin, mathematics, and military science, but the pedantic nature of the training deprived him of all disposition for religion and earnest studies; another tutor, who wrote fifteen large volumes for the prince's instruction in history, destroyed all his respect for the historical characters of the past. Flatterers, and even the tutor himself, stimulated the extravagant imperiousness of the crown-prince, while Martini (professor of natural law) found in him an eager student of physiocracy--a doctrine which affected profoundly Joseph's mind, firing him with an enthusiasm for current views, the "rights of man", and the welfare of the people. French "enlightenment" also influenced him, especially in the persons of Voltaire and his royal adept, Frederick the Great. Joseph viewed with jealous discontent the intellectual superiority of the Protestant North of Germany, then first dominant over the Catholic South: he also reflected with chafing impatience on Frederick's victories and talent for government, and thence conceived a definite aim in life. But when he ascended the throne, his plans failed utterly.

II. AS RULER

After 1765 Joseph acted as emperor and co-regent with his mother, but administered only the business routine and the military affairs of the empire. Finally, resenting the manner in which his hands were tied by his prudent parent, he took to travel in Italy, France, and the Crown Lands. Twice he met Frederick the Great, and in 1780 Catherine II of Russia. In the same Year his mother, Empress Maria Theresa, died, and Joseph was free.

(a) In the Empire

Joseph applied himself with the best intentions, among other matters, to the reform of imperial jurisprudence. But difficulties from within and without checked his fiery enthusiasm. Although a Liberal and an imperialist, whenever the interests of the Hapsburgs were in question, he allowed the imperial power to be lessened after the fashion of other German princes. Ecclesiastical politics also played a considerable rôle in the empire. Joseph tried to secure German ecclesiastical preferments for Austrian princes, urged obsolete imperial privileges, e.g. the so-called *Panisbriefe*, to provide for the support of his lay adherents in imperial monasteries. By cutting off the Austrian territory of such great metropolitan sees as Salzburg and Passau, he severed the last

tie which united Austria with the empire. Though not in itself conflicting with German interests, his scheme of exchanging the Austrian Netherlands for the neighbouring Bavaria on the occasion of the impending change of dynasty, led to the Bavarian War of Succession. In 1785 Prussia opposed the revival of this scheme by forming the "League of Princes". Joseph now endeavoured to expand his dominions in the north and east, and to make Austria dominant in Central Europe. He obtained a considerable increase of territory in the First Partition of Poland (1773), and concluded a defensive alliance with Russia, which led to great schemes for a larger gain of territory in the east. In the Austro-Russian war against the Turks (1788), however, though Joseph's army took Belgrade, Catherine obtained all the fruits of the campaign.

(b) In Austria

In home affairs, Joseph sought to weld the fundamentally differing peoples of the Austrian State-Germans, Slavs, Hungarians, Belgians, Italians-into one compact nation. So he began to level and centralize great and small things in every direction and in the greatest haste. Frederick II said of Joseph: "He takes the second step before the first." Joseph's predecessor had not been heedless of the new tendencies. She had set the machine of state running in a modern groove. In church affairs she had resorted to strict measures to regulate disorders, but Joseph saw in these only "half measures and inconsistencies", and, in the glow of conviction, "desired by hot-house methods to bring his mother's incipient reforms to maturity" (Krones). He united the administration of all the provinces in the central council at Vienna, of which he himself was the head, while he abolished their diets or paralysed them by the provincial executive authorities. Though a professed enemy of every irregularity, he often undertook to decide matters belonging to the central government at Vienna. German became the official language in all the countries subject to his rule; the courts of justice were independent and impartial to noble and peasant. Serfdom and the right of the landed nobles to punish their tenants ceased; the codification of the civil and criminal laws, begun in 1753, was furthered, and the death penalty was abolished. In his *Ehepatent* Joseph created the Austrian marriage law; he subjected the nobility and clergy to state taxation, and opened up new sources of revenue; he abolished the censorship and permitted freedom of speech, a measure which loosed a flood of pamphlets of the most pernicious kind, especially in ecclesiastical polemics.

III. ECCLESIASTICAL POLICY

(a) Its Development

Joseph was the father of Josephinism, which is nothing else than the highest development of the craving common among secular princes after an episcopal and territorial church. Its beginnings can be traced in Austria to the thirteenth century, and it became clearly marked in the sixteenth, especially so far as the administration of church

property was concerned. It was fostered in the second half of the eighteenth century by the spread of Febronian and Jansenist ideas, based on Gallican principles. These notions were by no means new to wide circles of German Catholics or at the court of Vienna. Prince Kaunitz, the chancellor of state, who directed Austrian politics for forty years from 1753, was a personal friend of Voltaire, and thus a zealous champion of Gallicanism. The Jansenist, Van Swieten (court-physician to Maria Theresa), was president of the imperial commission on education. At the university, "enlightenment" had powerful advocates in Martini, Sonnenfels, and Riegger, and it was there that Joseph's idea of a national state church received its legal basis. According to natural law, the chief object of a state ought to be the greatest possible happiness of its subjects. The chief obstacles, neglect of duty and lack of mutual goodwill in individuals, religion alone can remove by its appeals to conscience. Hence the State recognizes religion as the principal factor in education: "The Church is a department of police, which must serve the aims of the State until such time as the enlightenment of the people permit of its relief by the secular police" (Sonnenfels). The canonist Riegger derived the supremacy of the State over the Church from the theory of an original compact (*pactum unionis*), in virtue of which the Government exercises in the name of all individuals a certain ecclesiastical jurisdiction, the *Jura circa sacra*. Another canonist (Gmeiner) formulated the following theory: Any canonical legislation that conflicts with the interests of the State is opposed to natural law, and therefore to the will of Christ; consequently the Church has no right to enact such laws, nor can the State accept them. Kaunitz reduced these principles to practice: "The supremacy of the State over the Church extends to all ecclesiastical laws and practices devised and established solely by man, and whatever else the Church owes to the consent and sanction of the secular power. Consequently, the State must always have the power to limit, alter, or annul its former concessions, whenever reasons of state, abuses, or altered circumstances demand it." Joseph raised these propositions to principles of government, and treated ecclesiastical institutions as public departments of the State. Maria Theresa has been incorrectly represented as favouring Josephinism. Most of the measures that presaged Josephinism in the latter part of her reign had not her approval. Joseph's entire policy was the embodiment of his idea of a centralized empire developing from within and in which all public affairs, political and ecclesiastico-political, were treated as an indivisible whole. His reforms, a medley of financial, social reformatory, and ecclesiastico-reformatory ideas, have no solid foundation.

(b) The Reforms

Bishoprics, religious orders, and benefices were limited by the Austrian boundary. Non-Austrian bishops were excluded, which simplified the often very confused overlapping of diocesan authorities. The announcement of papal, in fact of all ecclesiastical,

decrees, was made dependent on imperial approval (see PLACET); decisions on impediments to marriage were referred to the bishops; the communication of the bishops with Rome, and of the religious orders with their generals in foreign countries, was forbidden, partly from considerations of political economy. In 1783, while at Rome, Joseph personally threatened that he would establish an independent state-church; he abolished all exemptions from episcopal authority and by an obligatory oath brought the bishops into dependence on the State. The acceptance of papal titles and attendance at the German College in Rome were forbidden, and a German College was established at Pavia in opposition to the Roman institution. The Edict of Toleration of 1781 granted to all denominations the free exercise of their religion and civil rights; at the same time a series of petty regulations concerning Divine service prescribed the number of the candles, the length and style of the sermons, the prayers, and hymns. All superfluous altars and all gorgeous vestments and images were to be removed; various passages in the Breviary were to have paper pasted over them; dogmatic questions were excluded from the pulpit, from which, on the other hand, all government proclamations were to be announced. "Our Brother the Sacristan", as Frederick the Great named Joseph, sincerely believed that in doing this he was creating a purified Divine service, and never heeded the discontent of his people and the sneers of non-Catholics.

The fundamental idea underlying a state-church is that the State is the administrator of the temporal property of the Church. Joseph embodied this idea in a law merging the funds of all churches, religious houses, and endowments within his territories, into one great fund for the various requirements of public worship, called the *Religionsfonds*. This fund was the pivot measure around which all other reforms turned. Not only ecclesiastical property hitherto devoted to parochial uses, not only the property which the suppressed religious houses had devoted to parochial works, but *all* ecclesiastical property--the still remaining religious houses, chapels, confraternities, and benefices, and all existing religious endowments whatsoever--was held to be part of the new fund. The suppression of the religious houses in 1782 affected at first only the contemplative orders. The Religionsfonds, created out of the property of the monasteries, gave a new direction to Joseph's monastic policy. In the foreground stood "the wealthy prelacies", which from 1783 were the chief object of his suppressions. The journey of Pius VI to Vienna was fruitless, and the laity reacted but feebly against the suppressions. Of the 915 monasteries (762 for men, and 153 for women) existing in 1780 in German Austria (including Bohemia, Moravia, and Galicia), 388 (280 for men, 108 for women) were closed--figures which are often greatly exaggerated. By these suppressions the "religious fund" reached 35,000,000 gulden (\$14,000,000). Countless

works of art were destroyed or found their way to second-hand dealers or the mint, numberless libraries were pitilessly scattered.

The suppression of the ternaries and hermits brought no increase to the fund, and the suppression of the confraternities (1783) was likewise a financial failure. They were looked upon as sources of superstition and religious fanaticism; half their property was allotted to educational purposes, the other half was given over, "with all their ecclesiastical privileges, indulgences, and graces", to a new "Single Charitable Association", which possessed the features of both a confraternity and a charitable institution and was intended to end all social distress. But the people had little taste for this "enlightened confraternity". The suppression of the filial churches and chapels-of-ease permitted the creation of new parishes. In carrying out this measure and in the suppression of the confraternities, Joseph's reforms met with the first popular resistance. The endowments for Masses and altars, for oratories, chapels-of-ease, and confraternities, for processions and pilgrimages, and for devotions no longer permitted in the new arrangement of Divine service, all went to the Religionsfonds, which undertook to satisfy the provisions for Masses, wherever the fact of endowment could be proved. Joseph assigned a definite number as pensions for dispossessed monks and as the stipends of parochial clergy. Benefices without cure of souls, prebends in the larger churches, and all canonries above a fixed number, belonging to collegiate churches and cathedral chapters, were forfeited to the "religious fund", and the incumbents transferred to parochial positions. A maximum was fixed for the endowment of bishoprics, the surplus being turned over to the "religious fund, as were also the incomes of livings during their vacancy.

The first duty of the "religious fund" was to provide for the ex-religious. Their number did not exceed ten thousand. They received a yearly salary of 150 to 200 gulden (\$60 to \$80), and the monks were transferred to parochial and scholastic work. The state-church reached its fullest expression in the parochial organization. The State undertook to train and remunerate the clergy, to present to livings, and to regulate Divine service. No parish church was to be over an hour's walk from any parishioner; and a church was to be provided for every 700 souls. The monasteries which still remained bore the main burden of the parochial organization, and their inmates, as well as the ex-monks, were required to pass a state concursus for the pastoral positions, while only in cases of extreme necessity did the "religious fund" furnish the means for the building of churches and rectories, for the care of cemeteries and the equipment of churches. Naturally, the "religious fund" had to pay the costs of placing the clergy under state control, of the general seminaries and the support of the young clerics, who thus became wholly dependent on the Government, of the institutes for the practical education of the clergy, which were to be established in every diocese, and

of the support of sick and aged priests after the incorporation with the "religious fund" of the funds created for superannuated priests (*Emeritenfonds*) and to supply needed support (*Defizientenfonds*).

The academic reforms of Maria Theresa (*Studienreform*) and of Rautenstrauch (*Studienplan*) in 1776, and the introduction of Riegger's "Manual of Canon Law", paved the way for the creation of the general theological seminaries. Joseph founded twelve: at Vienna, Graz, Prague, Olmütz, Presburg, Pesth, Innsbruck, Freiburg, Lemberg (two for Galicia, Greek and Latin Rites), Louvain, and Pavia. In 1783 all the monastic schools and diocesan houses of studies were suppressed. The "general seminaries" were boarding-houses (*Konvikte*) connected with the universities; some of them, however, had their own theological courses. Five years of study in the seminary were followed by one in the bishop's training-house (*Priesterhaus*) or in a monastery. The principles of the seminary directors were Liberal, in keeping with the rationalistic theology of the State. Sharp opposition arose, especially on the part of the ecclesiastical foundations (*Stifte*) and the monasteries. The novices, educated at their expense in the general seminaries, for the most part lost their monastic vocation. Some of the general seminaries were badly managed, At Innsbruck, Pavia, and Louvain, unsuitable directors were appointed; at Louvain the general seminary was eventually the cause of a civil war and of the revolt of Belgium. However, other seminaries sent forth efficient pastors and learned theologians (Freiburg). The fermentation within the ranks of the clergy of south-west Germany and Austria until after the middle of the nineteenth century came from the Liberal ideas imbibed at this time.

The accounts of the deplorably depraved conditions in the general seminaries, which are met with in earlier Catholic literature (Theiner, S. Brunner, Brück, Stöckl) and occasionally repeated even now, are in part exaggerations of faults and blunders that were real enough; to a considerable extent, however, they are based on forgeries "invented for the purpose of stirring up the smouldering flames of the Belgian Revolution. Seminaries like those of Freiburg and Vienna were counted among the worst, though it has been since proved that they were among the best. The most appalling abuses were reported of a seminary at Rottenburg in the Tyrol, though there was never a seminary in the place. These accusations, true or false, but chiefly the exhaustion of the "religious fund", hastened their suppression in 1790. They became, however, the models of the actual theological *Konvikte* (houses for aspirants to the priesthood after their classical instruction in a state gymnasium) and the programme of studies laid out by Rautenstrauch is to this day the groundwork of the curriculum in the Catholic theological faculties of Germany and Austria. The vesting of all ecclesiastical property in a single treasury was impossible in practice. In the case of monastic property it was capitalized at great loss. The capital of every church and foundation had to be

described publicly, converted into national bonds, and invested in the "religious fund". In this way Joseph to a certain extent satisfied his distrust of the ecclesiastical administration of property, while the same was placed at the service of the heavily encumbered state treasury. But many of the enterprises formerly conducted by the religious foundations could be no longer carried on owing to the slender returns. Still greater was the damage done to the credit and the resources of entire provinces, for hitherto the ecclesiastical institutions (ce.g. the confraternities, chapels and churches in the country districts had been the only moneylenders. Peasants, mechanics, and artisans were now placed at the mercy of usurious Jews and foreigners, while many were forthwith ruined by the sudden demands made on them. A tax was also levied on church property which had escaped complete secularization. From 1788 it was imposed on the still existing religious orders and on the secular clergy. This oppressively high income-tax was meant to divert into the coffers of the "religious fund" all revenues of the aforesaid institutions not absolutely necessary for the support of life.

(c) Historical Importance

The Religionsfonds was not the magnanimous act in favour of the religious needs of the people that it is held to have been. Formed by consolidating almost the entire property of the Church, it undertook only such obligations as it was in any case the duty of the State to fulfill, especially after the suppression of institutions which had previously of their own accord relieved the State of a portion of these burdens. Moreover the "religious fund" was from the first diverted to other reforms, e.g. in education; in time of war it was made to contribute heavy subsidies and suspended almost all its contributions for the religious needs of the people. We can thus easily understand how in the nineteenth century the "religious fund" came to need state-aid, which indeed the State was in justice bound to give in view of the fact that the national bonds, in which the "religious fund" had been chiefly invested, had sunk to one-fifth of their face value. The secularization under Joseph, if less offensive than other well-known secularizations, is nevertheless reprehensible. Joseph undertook his reforms with the best intentions, but left only vague and incomplete semblances of reform. After a reign of ten years and fully aware of his failure, he ended his unhappy and lonely existence (20 February, 1790), leaving even the monarchy itself in peril. Hungary was in a ferment; Belgium had just been lost; other provinces were in a state of violent discontent. But though in general the Josephinist system collapsed, its essential principles remain: the efforts for union among all the lands of Austria are one result of the system; another is the attitude of the nineteenth-century State towards the Church.

Sisters of Saint Joseph

Sisters of Saint Joseph

CONGREGATION OF THE SISTERS OF ST. JOSEPH

Founded at Le Puy, in Velay, France, by the Rev. Jean-Paul Médaille of the Society of Jesus (b. at Carcassonne, 29 January, 1618; d. at Auch, 15 May, 1689). He was admitted into the Society in 1640, became noted as a teacher of rhetoric and philosophy before entering upon his career as a preacher, in which he distinguished himself by his great oratorical power, but most especially by his marvelous influence over souls. He encouraged a few of his most fervent penitents to consecrate themselves to the service of God, and addressed himself to the Bishop of Le Puy, the Right Rev. Henri de Maupas, a friend and disciple of the great St. Vincent de Paul. The bishop invited the aspirants to assemble at Le Puy where shortly afterwards he placed them in charge of the orphan asylum for girls. On 15 October, 1650, he addressed them as a religious community, placed them under the protection of St. Joseph, and ordered that they should be called the Congregation of the Sisters of St. Joseph. As their numbers increased, he gave them rules for their guidance, and as the congregation had been established in the diocese for the Christian education of children, he recommended that the teachers fit themselves especially for this important work. He also prescribed as their religious dress a black habit and veil, a black cincture on which a large rosary is

worn, a band of white linen across the forehead, and a white linen coif fastened under the chin. Later a white linen gimp was added.

In regard to the spirit by which the sisters were to be animated, Bishop de Maupas writes: "As I have found in the Visitation Order a sort of blessed predilection for the exact observance of the holiest laws of humility and charity, I have decided to institute the Congregation of St. Joseph on the same model, and in the same spirit, as the Sisters of the Visitation before they adopted enclosure." The constitutions which Father Médaille wrote for the sisters are borrowed from the rules of St. Ignatius, the saintly founder adding observations from his own experience. According to the rule, each community was to consider as its superior the bishop of the diocese, who was to appoint a spiritual father to accompany him, or, in his absence, to preside at the election of superiors and perform such offices as the necessities of the community might require. Father Médaille prescribed three months, at least, for the probation time of a postulant, and four years for novitiate training, two years preparatory, and two years after the making of the vows, which are final. At her profession, the novice receives a brass crucifix, which the bishop presents with these words: "Receive, my child, the cross of Our Lord Jesus Christ, to which you are affixed by the three vows as by so many nails; wear it openly on your breast as a most sure defense against the enemy; endeavour especially to carry it faithfully in your heart, by loving it tenderly and by bearing with delight and humility this sweet burden, that faithfully living and dying in the love of the cross with Jesus, you may also triumph with Him in glory." The sisters devote three hours a day to their regular devotions. They recite the Office of the Blessed Virgin on Sundays and feasts of obligation. On other days, the Office of the Holy Ghost is substituted.

The successor of Bishop de Maupas, Bishop Armand de Béthune, approved the congregation, 23 September, 1655, and Louis XIV confirmed by letters patent the first establishments of the Sisters of St. Joseph in the cities of Le Puy, St-Didier, and several other places in Velay. They were later introduced into the Dioceses of Clermont, Vienne, Lyons, Grenoble, Embrun, Gap, Sisteron, Vivier, Uges, and almost the whole of France. Foundations were made also in Savoy, Italy, and Corsica.

In 1793 the convents and chapels of the sisters were confiscated, their annals were destroyed, and the religious were obliged to join communities in other countries, or to return to their respective homes in the world. The congregation has had its martyrs, three during the persecution in Dauphiné, for refusing to take the civil oath, and two in another persecution in Haute-Loire. During the reign of terror, several Sisters of St. Joseph died for the Faith, and several others escaped the guillotine only by the fall of Robespierre. Among the latter was Mother St. John Fontbonne, who in her notebook

records the names of four Sisters of St. Joseph imprisoned with her at St-Didier, five others in the dungeon of Feurs, and twenty in Clermont and other parts of France.

The first use Mother St. John made of her liberty was to try to reassemble her dispersed community. She applied in vain to the municipality for the restoration of the convent in which she had invested her dowry, and while awaiting the dawn of a brighter day, returned to her own home. The vicar-general, the Rev. Claude Cholleton, invited Mother St. John to repair, in 1807, to Saint-Etienne to take charge of a little band of religious representing different communities which, like that of St. Joseph, had been disbanded during the Revolution. Other young women joined the little household, all of whom Mother St. John zealously trained according to the life and rules of the first Sisters of St. Joseph. The community prospered. In several places the Government approved of the return of the sisters to their long vacant convents, and in some cases Revolutionary proprietors sold back to the sisters the property which had been confiscated. On reopening the mission at Monistrol, Mother St. John expressed great joy and satisfaction. The work of the congregation continued, the increase in numbers keeping pace with demands now made on every side for convents and Catholic schools. Wherever obedience directed, thither the missionaries hastened, till representatives of the community might be counted in nearly every country in Europe, on the distant shores of Asia, and in the fastnesses of Africa.

The recent upheaval in France is like history repeating itself in the spirit of the Revolution. Hundreds convents, schools, and charitable institutions, belonging to the Sisters of St. Joseph, have been suppressed, and the religious have been obliged to seek safety and shelter in other lands. Consequently many new missions, in the remotest parts of the United States, have been recently opened. In 1903 four sisters who fled from France at the beginning of the troubles there, sought and obtained hospitality at St. Joseph's Convent, Flushing. They remained nearly two years, or until they had sufficiently mastered the English language, and fitted themselves for educational work awaiting them in Minnesota, where they have since opened three little mission houses.

United States

Boston

In 1873 the Sisters of St. Joseph of Brooklyn opened their first school at Jamaica Plain, in the Archdiocese of Boston, and three years later established there a novitiate, which was transferred successively to Cambridge (1885), Brighton, and Canton (1902). The mother-house is still at Brighton. The sisters were soon in demand throughout the archdiocese, and now (1910) number 300, in charge of an academy, 12 parochial schools, a school for the deaf, and an industrial home for girls. They have 7000 children under their care.

Brooklyn

In the spring of 1856 the Right Rev. John Loughlin, first Bishop of Brooklyn, applied to the mother-house at Philadelphia for sisters, and two religious were named for the new mission, joined during the same year by a sister from Buffalo. St. Mary's Academy, Williamsburg, was opened on 8 Sept., 1856, and in the following year a parochial school was inaugurated. In 1860 the mother-house, novitiate, and boarding school were removed to Flushing, Long Island, whence the activity of the sisters was gradually extended over the diocese. In 1903 the mother-house and novitiate were again transferred to Brentwood, New York, where an academy was opened the same year. The community, now (1910) numbering over 600 members, is represented in over 50 parishes of the diocese, in which the sisters preside over 8 academies, 50 parochial schools, 3 orphan asylums, a home for women, and 2 hospitals, having under their care 11,000 children, not including 1300 orphans. They teach Christian doctrine in many Sunday schools besides those attached to the schools under their charge. In nearly all the mission houses are evening classes for adults to whom the sisters give religious instruction. They also visit the sick in the parishes in which they reside.

Buffalo

The Sisters of St. Joseph were introduced into the Diocese of Buffalo in 1854, when three sisters from Carondelet, St. Louis, made a foundation at Canandaigua, New York. Two years later one of these sisters was brought to Buffalo by Bishop Timon to assume charge of Le Couteulx St. Mary's Institution for the instruction of deaf mutes, which had lately been established. The novitiate was removed from Canandaigua to Buffalo in 1861. The community developed rapidly and soon spread through different parts of the diocese. By 1868 the sisters were sufficiently strong to direct their own affairs, and elected their own superior, thus forming a new diocesan congregation. In 1891 the mother-house and novitiate were removed to the outskirts of the city, where an academy was erected. The congregation, which now (1910) numbers 285 members, also has charge of 28 parochial schools in the diocese, 3 orphan asylums, a working boys home, an infants' asylum, and a home for women and working girls. The sisters have under their care 5000 children, not including 470 orphans and deaf mutes and 600 inmates of their various homes.

Burlington

In 1873 the Rev. Charles Boylan of Rutland, Vermont, petitioned the mother-house of the Sisters of St. Joseph at Flushing, Long Island, for sisters to take charge of his school. Several sisters were sent, and a novitiate was opened at Rutland, 15 October, 1876. The congregation now (1910) numbers 75 religious, in charge of an academy attached to the mother-house, 6 parochial schools, one in the Diocese of Pittsburg, and a home for the aged, with 36 inmates. The total number of children under the care of the sisters is 1700.

Chicago

The Sisters of St. Joseph were established at La Grange, Illinois, 9 October, 1899, by two sisters under Mother Stanislaus Leary, formerly superior of the diocesan community at Rochester, New York. On 14 July, 1900, the corner-stone of the mother-house was laid. The sisters who now (1910) number 65, are in charge of an academy with an attendance of 100 and a school for boys.

Cleveland

The Sisters of St. Joseph of the Diocese of Cleveland are chiefly engaged in the parochial schools. They number about 80 and have charge of an academy and 13 parish schools, with an attendance of 4500.

Concordia

In 1883 four Sisters of St. Joseph arrived at Newton, Kansas, from Rochester, New York, and opened their first mission. After remaining there a year they located at Concordia, Kansas, in the fall of 1884, and established the first mother-house in the West, in what was then the Diocese of Leavenworth. The congregation now numbers 240, in charge of 3 academies, 2 hospitals, and 26 schools, in the Archdiocese of Chicago and the Dioceses of Marquette, Rockford, Kansas City, Omaha, Lincoln, and Concordia. The sisters have about 4000 children under their care.

Detroit

In 1889 Sisters of St. Joseph from the Diocese of Ogdensburg established a new congregation at Kalamazoo, Michigan. The novitiate was transferred, in 1897, to Nazareth, a hamlet founded by the sisters on a four-hundred-acre farm. The congregation, which numbers 187, has charge of a hospital, training school for nurses, normal school, a home for feeble-minded children, an orphan asylum, and several other educational institutions, besides supplying teachers for 7 parish schools of the diocese. The sisters have about 1600 children under their care, including 200 orphans.

Erie

This congregation was founded in 1860 by Mother Agnes Spencer of Carondelet, Missouri, who, with two other sisters, took charge of St. Ann's Academy at Corsica, Pennsylvania, where postulants were admitted. In 1864 a hospital was opened at Meadville, and the sisters took charge of the parochial schools of that city. Later an orphan asylum, a hospital, and a home for the aged were erected in the city of Erie. Villa Maria Academy was opened in 1892 and in 1897 was made the novitiate and mother house of the Sisters of St. Joseph in the Erie diocese. The congregation now numbers 210 members, in charge of 14 parochial schools, attended by 3900 children, in addition to the other institutions mentioned above.

Fall River

In 1902 nine Sisters of St. Joseph from the mother-house at Le Puy took charge of the school in the French parish of St-Roch, Fall River, Massachusetts. The accession of other members from the mother-house enabled the community to take charge of three other schools in the city attached to French parishes. In 1906 St. Theresa's Convent was formally opened as the provincial house of the community, which was legally incorporated in the same year, and a novitiate was established. The sisters now number 43, in charge of four parochial schools, with an attendance of about 1200.

Fort Wayne

The Sisters of St. Joseph, with their mother-house at Tipton, number 60, in charge of an academy and 5 parochial schools, with an attendance of 1000.

Ogdensburg

In 1880 several sisters from the mother-house at Buffalo made a foundation at Watertown, New York, which was later strengthened by the accession of another sister from the Erie mother-house. From Watertown as a centre missions were opened in other parts of the diocese. The congregation, which now numbers about 75 members, has charge of several parish schools, the Immaculate Heart Academy at Watertown, which is the mother-house, an orphanage, and a school for boys, having about 1100 children under its care. In 1907 the sisters established a mission at Braddock, Pennsylvania, for work in the parochial schools there.

Philadelphia

In 1847 the Sisters of St. Joseph of Carondelet, in response to an appeal of Bishop Kenrick, sent four members of the community to Philadelphia to take charge of St. John's Orphan Asylum, until that time under the Sisters of Charity.

The Know-Nothing spirit, which had but a short time previously led to the Philadelphia riots, to the burning and desecration of churches and religious institutions, was still rampant, and the sisters had much to suffer from bigotry and difficulties of many kinds. Shortly afterwards they were given charge of several parochial schools, and thus entered on what was to be their chief work in the coming years. By the establishment, in October, 1858, under the patronage of Venerable Bishop Neuman, of a mother-house at Mount St. Joseph, Chestnut Hill, the congregation in Philadelphia began to take a more definite development. When, in 1863, the Sisters of St. Joseph of St. Louis formed a generalate, approved later by the Holy See, the congregation of Philadelphia, by the wish of the bishop, preserved its autonomy. During the Civil War, detachments of sisters nursed the sick soldiers in Camp Curtin and the Church Hospital, Harrisburg; later, under Surgeon General Smith, they had more active duty in the floating hospitals which received the wounded from the southern battle-fields. When the number of religious increased to between three and four hundred, and the works entrusted to them became so numerous and varied as to necessitate an organization

more detailed and definite, steps were undertaken to obtain the papal approbation, which was received in 1895. The Sisters of St. Joseph of Philadelphia now (1910) number 626 professed members, 64 novices, and 31 postulants, in charge of a collegiate institute for the higher education of women, an academy and boarding-school, 42 parish schools, and 2 high schools in the Archdioceses of Philadelphia and Baltimore, and the Dioceses of Newark and Harrisburg, and 4 asylums and homes. The number of children under their care, including those in asylums, is nearly 26,000.

Pittsburg

In 1869, at the petition of the pastor of Ebensburg, Pennsylvania, three sisters were sent there to open a day-school and a boarding-school for boys. The accession of new members enabled the sisters to meet the increasing demands made upon them, and they now number 175, in charge of 23 schools in the Archdiocese of Baltimore and the Dioceses of Pittsburg, Cleveland, and Columbus, with an attendance of 6075; they also conduct a hospital and 2 boarding-schools. In 1901 the mother-house was transferred to Baden, Pennsylvania.

Rochester

In 1864 four Sisters of St. Joseph from Buffalo opened an asylum for orphan boys at Rochester. Three years later the Diocese of Buffalo was divided and that of Rochester created, and the following year, 1868, the Rochester community dissolved its affiliation with the Buffalo mother-house and opened its own novitiate and mother-house at St. Mary's Boys' Orphan Asylum, later transferred to the Nazareth Academy, Rochester. The number of institutions now directed by the Sisters of St. Joseph of Rochester has risen to 50 (1910): 5 private educational institutions, including a conservatory of music and art; 5 charitable institutions, including 3 orphan asylums, a hospital, and a home for the aged; and 40 parochial schools, including one high school. The community numbers 430 members, in charge of 15,000 children.

St. Augustine

In 1866 eight Sisters of St. Joseph from the mother-house at Le Puy were sent to St. Augustine, at the request of Bishop Verot, to teach the coloured people, recently liberated by the Civil War. In 1880 a novitiate was established, and about the same time, owing to the departure of the Sisters of Mercy from the city, the training of the impoverished whites also devolved on the new community. In 1889 connection with the mother-house in France was severed, and many of the French sisters returned to their native land. The sisters now number about 105 in charge of 6 academies, 14 day-schools, and 1 orphanage. They have under their charge about 1438 white and 240 coloured children, and about 35 orphans. The mother-house of the Florida missions is at St. Augustine.

St. Louis

In the year 1834 the Right Rev. Joseph Rosati of St. Louis, Missouri, called at the mother-house of the Sisters of St. Joseph at Lyons and asked Mother St. John Fontbonne, the superior, to send a colony of her daughters to America. The financial aid necessary was obtained through the Countess de Ja Roche Jacquelin. Arrangements were soon perfected, and on 17 January, 1836, six sisters sailed from Havre and, after a perilous voyage of forty-nine days, reached New Orleans, where they were met by the Bishop of St. Louis and Father Timon, afterwards Bishop of Buffalo. They arrived at St. Louis on 25 March. The house, a small log cabin, which was to be the central or mother-house of the future congregation of the Sisters of St. Joseph of Carondelet, was located at Carondelet, a small town six miles south of St. Louis. At the time the sisters arrived at St. Louis, this humble house was occupied by the Sisters of Charity, who there cared for a few orphans soon after transferred to a new building. While waiting for their home, they received a call from Cahokia, Illinois, where a zealous Vincentian missionary desired the help of the sisters in his labours among the French and Creole population of that section. Three religious volunteered for this mission. The people among whom the sisters laboured in St. Louis were poor and rude, and apparently destitute of any taste for either religion or education. These obstacles seemed but to increase the zeal of the sisters, and by degrees postulants were received, parochial schools and asylums opened, and new works begun in various parts of the diocese. As early as 1847 foundations were made in other sections of the United States. In 1837 the first American member of the order, Ann Eliza Dillon, entered the novitiate, proving of great advantage to the struggling community, with her fluency in French and English. She died, however, four years later. The community increasing in proportion to its more extended field of labour, a commodious building was erected to answer the double purpose of novitiate and academy, the latter being incorporated in 1853 under the laws of the State of Missouri.

Because of the rapid growth of the institute and the increasing demand for sisters from all parts of the United States, the superiors of the community were by 1860 forced to consider means best adapted to give stability and uniformity to the growing congregation. A general chapter was convoked in May, 1860, to which representatives from every house of the congregation in America were called. At this meeting a plan for uniting all the communities under a general government was discussed and accepted by the sisters and afterwards by many of the bishops in whose dioceses the sisters were engaged. This plan, together with the constitutions, revised so as to meet the requirements of the new condition, was presented to the Holy See for approval. In September, 1863, Pope Pius IX issued the letter of commendation of the institute and its works, holding the constitutions for examination and revision by the Sacred Congregation of Bishops and Regulars. The first decree of approbation was granted 7 June, 1867,

and ten years later, 16 May, 1877, a decree approving the institute and constitutions was issued by the Sacred Congregation of Bishops and Regulars. On 31 July, 1877, Pius IX, by special Brief, confirmed the institute and constitutions of the Sisters of St. Joseph of Carondelet. Thus, with the sanction of the Church came the unification of communities in various dioceses with the mother-house at Carondelet, now in the city of St. Louis.

The congregation is at present (1910) divided into four provinces: St. Louis, Missouri; St. Paul, Minnesota; Troy, New York; Los Angeles, California. The St. Louis province comprises the houses of the congregation in the Archdioceses of St. Louis and Chicago and the Dioceses of St. Joseph, Kansas City, Indianapolis, Peoria, Belleville, Alton, Denver, Marquette, Green Bay, Mobile, and Oklahoma. The province of St. Paul includes the houses in the Archdiocese of St. Paul, Minnesota, and the Dioceses of Winona and Fargo, North Dakota. The province of Troy is formed of the houses established in the Dioceses of Albany and Syracuse, New York. The province of Los Angeles comprises the houses of the Archdiocese of San Francisco, the Dioceses of Tucson, Arizona, and Los Angeles, California. The superior general and four general councillors, elected every six years by the whole congregation, form the general governing body, assisted by a superior provincial and four provincial councillors in each province. The provincial officers are appointed by the general officers every three years, as also are the local superiors of all the provinces. In each provincial house, as in the mother-house, a novitiate is established. The term, of postulanship extends from three to six months, the term of novitiate two years, after which annual vows are taken for a period of five years, when perpetual vows are taken. All are received on the same footing, all enjoy the same privileges, and all are subject to the same obedience which assigns duties according to ability, talent, and aptitude. Although an interchange of members of the various provinces is allowed and made use of for general or particular needs, the autonomy of each province is safeguarded. The constitutions, while establishing on a solid basis the idea of a general government, allow no small share of local initiative and carefully provide for local needs. In this way too much centralization or peril to establishments working in accordance with local and special exigencies is fully guarded against. The congregation now (1910) numbers 4 provinces, with 1802 sisters, in charge of 125 educational institutions, including colleges, academies, conservatories of music and art, and parochial schools, with an attendance of 40,848; 17 charitable educational institutions, including orphan asylums, Indian, Coloured, and deaf-mute schools, with an attendance of 2121; and 10 hospitals, with an average of 8285 patients.

Savannah

The Sisters of St. Joseph were established at Savannah in 1867, in charge of the boys' orphanage, and soon afterwards were constituted an independent diocesan congregation. In 1876 the orphanage was transferred to Washington, Georgia, and with it the mother-house of the congregation. The sisters now number about 65, in charge of an academy, 2 boarding-schools for small boys, and several parish schools, with a total attendance of over 500.

Springfield

In September, 1880, seven Sisters of St. Joseph were sent from Flushing, Long Island, to take charge of a parochial school at Chicopee Falls, Massachusetts. They were followed, two years later, by seven sisters for Webster, and in 1883 by twelve more for the cathedral parish, Springfield. In 1885 the Springfield mission was constituted the mother-house of an independent diocesan congregation. The sisters are in constant demand for parochial schools and now (1910), with a membership of 300, conduct 19, with an attendance of about 9000. In 1889 they took charge of the school at Windsor Locks in the Diocese of Hartford, from which, in 1908, they were recalled to the Springfield diocese. The curriculum of their boarding-school at Chicopee embraces a normal course. They also visit the sick and take charge of Sunday-school classes. Since 1892 the sisters have devoted themselves particularly to the work of establishing Catholic high schools, and high-school courses are connected with practically all the parochial schools under their supervision.

Wheeling

In 1853 seven sisters from Carondelet, Missouri, opened a private orphanage and hospital in Wheeling, and in 1856 took possession of a building chartered by the Assembly of Virginia for a hospital. From 19 October, 1860, the community was independent of the St. Louis mother-house. During the Civil War the hospital was rented by the Government and the sisters enrolled in government service. After the war and the reorganization of the hospital on its present lines, the sisters extended their activities to various parts of the diocese; they now number over 100, in charge of 3 hospitals, 12 schools and academies, and 2 orphan asylums, with about 1700 children under their care.

Wichita

In August, 1887, four Sisters of St. Joseph were commissioned to go from Concordia, Kansas, to open a parochial school at Abilene, Kansas, at that time in the Diocese of Leavenworth. The following year the Right Rev. L. M. Pink, Bishop of Leavenworth, decided that those sisters should belong to his diocese exclusively, and in so doing they became the nucleus of a new diocesan community of the Sisters of St. Joseph, having their mother-house established at Abilene, under the title of Mount St. Joseph's Academy. The community increased in numbers and soon branched out, doing paro-

chial school work throughout the diocese. In 1892 the name of the Diocese of Leavenworth was changed to Kansas City, Kansas, and for the time being the Sisters of St. Joseph were diocesan sisters of the Diocese of Kansas City. In 1896, when the redivision of the three Kansas dioceses Concordia, Kansas City, and Wichita, was agitated, Bishop Fink of Kansas City, to keep the Sisters of St. Joseph of his diocese within the limit of his jurisdiction, had their mother-house transferred from Abilene to Parsons. But after the division was made, the following year, Abilene was in the Concordia diocese, and Parsons was in the Wichita diocese, and the mother-house of the Sisters of St. Joseph being in Parsons, the community belonged to the Wichita diocese, having mission-houses in both the Diocese of Concordia and the Diocese of Kansas City. Since that time the name of the Diocese of Kansas City has been changed to its original name: Diocese of Leavenworth. In 1907 a colony of these sisters opened a sanitarium at Del Norte, Colorado, in the Diocese of Denver. At the present time (1910), the sisters, who number 200, have charge of 3 hospitals, all in the Diocese of Wichita, and 18 parochial schools, including one in the Diocese of Leavenworth, one in the Diocese of Kansas City, Missouri, and 3 in connection with the sanitarium at Del Norte, Colorado.

Canada

Hamilton

In 1852 five sisters from the mother-house at Toronto established a foundation at Hamilton, where they at once opened an orphanage and began their work in the parochial schools of the city. During the cholera epidemic of 1854 the sisters cared for those afflicted. On the erection of the Diocese of Hamilton in 1856, the community became a separate diocesan congregation, and a few months later a novitiate was established at Hamilton. By the passage of the Separate Schools Bill in 1856 the sisters were given control of the education of the Catholic children of the city. The congregation gradually extended its activities to other parts of the diocese and now (1910) numbers 155 religious in charge of 2 hospitals, 2 houses of providence, and 12 schools, with an attendance of 2300.

London

The community of Sisters of St. Joseph at London was founded in 1868 by five sisters from the mother-house at Toronto, who opened an orphan asylum the following year. On 18 December, 1870, the congregation became independent, with a novitiate of its own, and on 15 February, 1871, the Sisters of St. Joseph of London, Ontario, were legally incorporated. Several missions were opened in various parts of the diocese, and in 1888 a hospital was established at London, to which was attached a training school for nurses. The sisters now (1910) number 131, in charge of 10 mission houses, includ-

ing 9 hospitals, 12 schools, an orphan asylum, and a house of refuge for the aged; they have about 2200 children under their care.

Peterborough

In 1890 several sisters from the mother-house at Toronto established a house at Peterborough, which became in turn the nucleus of a new congregation. The community now (1910) numbers 200 sisters, in 14 houses, in charge of an academy 3 hospitals, 2 orphanages, a home for the aged, and 10 separate schools, in the Dioceses of Peterborough and Sault Ste-Marie. They have over 1000 children under their care.

Toronto

The mother-house of the Sisters of St. Joseph at Toronto was established from Le Puy, France, in 1851. The congregation now comprises 266 members, in charge of 3 academies, 1 high school and 22 separate schools, with a total attendance of 5025; 5 charitable institutions, with 900 inmates; and 1 hospital, with an annual average of 2900.

THE SISTERS OF ST. JOSEPH

England

In England the Sisters of St. Joseph devote themselves entirely to the work of teaching. The mother-house of the English congregation is at Annecy in Savoy, where the sisters possess the very cradle of the Visitation Order. They have Seven houses in England and one in Scotland, under the provincial house and novitiate for England, which was founded in 1864, at Newport, Mon. The congregation now numbers 60, in charge of 10 elementary day and boarding-schools, with an attendance of about 2000. In Scotland, at Blair's College, 15 sisters have charge of the household arrangements and work of the college.

In India the sisters have hospitals, homes, orphanages, etc., just as they have in France, and they also go out to nurse the sick in their own homes. In British India there are about 70 sisters in 7 houses, the provincial house and novitiate being at Waltair, with which are connected a day-school, boarding-school, native orphanage, native day-school, dispensary, and a novitiate for natives. In other parts of India the sisters conduct a primary school, a boarding and day school, an intermediate school for Hindus, with an attendance of 200, a home for Rajpoot widows and another home for widows, a workshop for widows and orphans, and 4 orphanages. At Palconda are two sisters who serve as catechists and sacristans. In all these missions the primary, secondary, and intermediate schools are under the Government. In some the orphanages are aided or wholly supported by the Government. Everywhere remedies are given to the sick natives, and the work of infant baptism of natives is carried on. When natives enter the congregation, the noviceship is made apart from the Europeans, but they are treated in every way as members of the community. The work of the native

novitiate is only in its infancy, and it is hoped that the native sisters will in the future be most useful with the native population. The Indian foundation was made in 1849.

FRANCESCA M. STEELE

Sisters of St. Joseph of Bourg

In 1819 a foundation from the mother-house of the Sisters of St. Joseph at Lyons was made at Belley; a novitiate was opened and houses were established in other parts of the diocese. In 1823, at the desire of the Bishop of Belley, the sisters of the diocese were constituted an independent diocesan congregation. The mother-house was transferred to Ain, in 1825, whence houses were founded at Ferney Gap, Grenoble, Bordeaux, and elsewhere. In 1828 and again in 1853, Bishop Devie obtained the approval of the French Government for the new congregation. By 1865 the number of members had reached 1700, and the congregation was established throughout France, the principal academies being at Bourg, Paris, Boulogne-sur-Seine, and Marseilles.

In 1854 the sisters were sent from Bourg to establish a house at Bay St. Louis, Mississippi, in the Diocese of Natchez. In 1863 a novitiate was opened at New Orleans, and later one was established at Cedar Point, Hamilton County, Ohio. The sisters are now in charge of 15 educational institutions, including several academies, as well as coloured and Indian schools, a home for working girls, and an industrial school, with about 1800 children and young women under their care.

The Sisters of St. Joseph were established at Superior, Wis., in 1907 by seven sisters from Cincinnati. They now number 21, in charge of 3 schools, with an attendance of 225.

In 1904 a colony of French sisters was sent out from Bourg, and schools have since been opened among the French Canadians in Minnesota and Wisconsin. In the Diocese of Duluth they have 2 academies with an attendance of 220.

Sisters of St. Joseph of Chambéry

After the reconstruction of the congregation of the Sisters of St. Joseph at Lyons, by Mother St. John Fontbonne a colony of sisters was sent to Chambéry, in Savoy, in 1812. The tide of anarchy and revolution had wrought awful havoc in France, and the education of youth, especially the children of the working classes, was the special work devolving on the Sisters of St. Joseph. The works of charity, the care of the sick in hospitals, of the aged and orphans, and the visitation of the sick in their homes, were also carried on as prior to the Revolution. The original habit was somewhat modified and became about what it is now in the French houses, consisting of a black dress, veil and underveil, woollen cincture, wooden beads strung on brass and fastened to the cincture, a brass crucifix on the breast, and a linen coronet, front, and gimp. In 1843 Mother St. John Marcoux, superior since 1812, resigned her office, which was assumed by Mother Félicité, under whom the congregation continued its extraordinary devel-

opment. More than eighty houses rose beneath her hand, and when, in 1861, a state normal school was opened at Rumilly, Savoy, it was placed in charge of the sisters.

Meanwhile the Chambéry sisters had been constituted a diocesan congregation, but as years went on a stronger administration became necessary. The rule was therefore revised to meet the requirements of a generalate, and papal approbation was granted in 1874 by rescript of Pius IX. Under the new form of government the congregation is subject to a superior general, whose term of office is six years and is divided into provinces, each possessing a novitiate. The novices, after two years probation, make annual vows for two years, after which they bind themselves by perpetual vows. The rule is based on that of St. Augustine.

The province of Denmark, whither the sisters were sent in 1856, has its seat at Copenhagen, and now numbers 400 members, in charge of flourishing parochial and private schools and a large hospital in the capital, with schools, orphan asylums, and hospitals, on a smaller scale, scattered all over the kingdom. From Copenhagen sisters were sent to Iceland, where they have a school, give religious instruction, visit the sick, and, during the proper seasons, repair to the fisheries on the coast to nurse sick sailors. In 1901 this province opened a house at Brussels, where the sisters have a large public school under the Government. The Brazilian province, founded in 1859, has several flourishing academies, besides day-schools for the upper classes, schools for negroes, hospitals, orphanages and foundling asylums, and one home for lepers. The sisters number about 250, under the provincial house at Itu. In 1862 sisters were sent to establish a school at Stockholm, and in 1876 to Gothenburg. The Norwegian province, dating from 1865, with seat at Christiania, has over 180 sisters. The province of Russia, founded in 1872, with novitiate at Tarnapol, Galicia, outside the frontier, has establishments at St. Petersburg, Moscow, and Odessa: two large academies, a day-school, an orphan asylum, a hospital, a home for the aged, etc. In 1876 the Sisters of St. Joseph of Rome, founded from Turin in 1839, were annexed to the Chambéry branch; the province now (1910) comprises 15 houses, mainly educational institutions. In Rome itself the sisters have an academy, with 100 pupils, 2 day-schools, and one poor school.

At the request of the Congregation of Propaganda, and with the approval of the Bishop of Springfield, five sisters were sent, in 1885, to Lee, Massachusetts, for work in the parochial schools. As their activities developed chiefly in the Diocese of Hartford, the novitiate, which had been temporarily established at Lee, was, in 1898, transferred to Hartford, Connecticut. The number of religious, then 44, has now (1910) reached 155, in charge of 9 schools attended by 2100 pupils, 2 hospitals, with an annual average of 4200 patients. The sisters also instruct about 1000 children in Christian doctrine, and have the domestic care of the Hartford seminary and La Salette College in the same city.

In 1902 many French houses of the order were closed by the Government, in consequence of which a large number of sisters left for the foreign missions chiefly Denmark and Russia. The province of Savoy: previously in charge of 52 establishments, has now but 14. The entire generalate comprises 1670 members.

Sisters of St. Joseph of St-Vallier

In 1683, at the request of Mgr Jean-Baptiste de la Croix Chevrière, Count of St-Vallier, later Bishop of Quebec, two sisters of St. Joseph from Le Puy took charge of a hospital recently founded by him at St-Vallier (Drôme). As the new community grew in numbers, it also devoted its attention to the education of youth. In 1890 the approval of Pope Leo XIII was obtained for the rules of the congregation. When religious teaching was forbidden in France, the sisters, with the permission of Archbishop Begin of Quebec, took refuge in his archdiocese (1903), establishing the Provincial house at St-Jean, Port-Joli, where a boarding-school for girls was opened. The sisters now number about 50, in charge of a hospital, an academy, and 6 model elementary schools. In 1905 they were placed over a model school in the city of Quebec, where they Opened a novitiate, the first reception taking place the following year. The sisters in France are still in charge of 3 hospitals.

THE SISTERS OF ST. JOSEPH

LITTLE DAUGHTERS OF ST. JOSEPH

Established at 45 rue Notre-Dame de Lourdes, Montreal. After the blessing of the bishop of the diocese (Mgr Bourget had been obtained, the institute was founded on 2 April-the feast of the Patronage of St. Joseph 1857, by the Sulpician father, Antoine Mercier. Its object is to aid the clergy in spiritual and temporal matters, both by the ministry of prayer and by discharging certain manual services, such as the manufacture of liturgical vestments and ornaments, and the manufacture, repair, and bleaching of the linen destined for the service of the altars of the various churches, etc. Missionaries without resources and poor seminarians are special objects of the charitable attentions of this community. Always under the direction of the Sulpicians, to whose assistance and devotion it is indebted for its prosperity, this little institute had the consolation of seeing its existence and regulations canonically approved by Mgr Bruchési, Archbishop of -Montreal, on 20 September, 1897. The community at present numbers 65 professed sisters, 6 novices, and 5 postulants.

LITTLE DAUGHTERS OF ST. JOSEPH

POLISH FRANCISCAN SISTERS OF ST. JOSEPH

In 1901 about forty sisters, all of Polish nationality, branched off from the School Sisters of St. Francis whose mother-house is at Milwaukee, and after obtaining the necessary dispensation from the Holy See through the efforts of Archbishop Messmer,

in April, 1902, organized themselves into the Polish Franciscan Sisters of St. Joseph, with their mother-house at Stevens Point in the Diocese of Green Bay. They have since increased to nearly two hundred members, in charge of ten schools. They live under the rule of the Third Order of St. Francis, and their particular object is the education of the young in Catholic schools.

JOSEPH J. FOX

SISTERS OF ST. JOSEPH OF CLUNY

Founded in 1798, by Anne-Marie Javouhey at Seurre, in Burgundy. The foundress was born in 1779, at Chamblanc, near Seurre, and though only ten years old, she frequently fetched priests to the dying, at the risk of her own life, in the Revolution of 1789. Nine years later she, with the help of a Trappist Father, founded a small congregation at Seurre, for the instruction of children and for nursing the sick and taking charge of orphans. The congregation was intended to be on the same lines as the third order of the Trappists. In 1804 Pius VII passed through Seurre, after crowning Napoleon Bonaparte as emperor in Paris, and received Mother Javouhey with three of her community and blessed them. In 1809 Mother Javouhey made her profession, after nine years' preparation, and, having received the habit, was appointed superior-general of the congregation. The novitiate was established at Cluny, and henceforth the congregation was known as the Sisters of St. Joseph of Cluny. Mother Javouhey died in 1851. The sisters undertake all kinds of charitable Works, but they devote themselves especially to missionary labours and the education of the young. Their rule was approved by Pius IX and confirmed by Leo XIII. The foundress was declared Venerable by the Holy See, 11 Feb., 1908. The sisters now number about 4000, and are widely spread over the world. The mother-house is in Paris, and there are numerous houses of the congregation in various parts of France; there are houses also in Italy, Spain, Portugal, Belgium, England, Scotland, Ireland, Chili, Peru, the East and West Indies, India, and Ceylon. In 1816 the congregation spread to the East and West Coasts of Africa, Fiji, New Caledonia, and Victoria (Australia). Altogether 45,000 children are being educated by the sisters, and 70,000 poor and sick are cared for by them in their various institutions, which now (1910) number 385. Thirty-one of the sisters perished in the terrible catastrophe at Martinique, in 1902, when the town of St-Pierre was wrecked by a volcanic eruption. In England the sisters have one house at Stafford, where there is a novitiate for the English-speaking subjects; there is a high-class day-school attached to the convent. There are three houses in Scotland, all in Ayrshire, with which are connected a boarding-school and 4 elementary schools, attended by 500 children. The sisters number 27. In Paris the famous hospital of Pasteur is under the care of forty sisters of this congregation. (See *Life of Rev. Mother Javouhey*, Dublin, 1903.)

FRANCESCA M. STEELE

SISTERS OF ST. JOSEPH OF PEACE

This institution, founded in the year 1884 at Nottingham, England, by the Right Reverend E.G. Bagshawe [then bishop of that diocese, now (1910) Archbishop of Seleucia], with rules and constitutions under the authority of the Holy See, has for its special object the domestic and industrial training of girls (chiefly of the working class) with the view to promote peace and happiness in families, in union with and in imitation of the Holy Family of Nazareth. In addition to this, the sisters are employed in educating the young, instructing converts, visiting the sick poor, and caring for orphans, the blind, and the sick in hospitals. The administrative body is composed of a superior general and five councillors elected for six years. There are no lay sisters. The postulancy lasts for six months and the novitiate for two years, after which vows are taken for three years, and then perpetual vows. The habit is black, with a scapular of the same colour, a black veil and white linen kerchief, domino and forehead band, a leathern cincture, and a five decade rosary beads. A silver ring is given at the final profession. Novices wear a white veil during the novitiate. In March, 1895, the constitutions were submitted to the Sacred Congregation of Propaganda by the founder, and in the September following the Decree "Lauda" was obtained. At present the institute has three houses in England: the mother-house situated at Nottingham, a house at Grimsby in the same diocese, and one at Hanwell in the Archdiocese of Westminster. The sisters teach in the parish elementary schools at Nottingham and Hanwell, and have a middle-class school attached to each convent. In Grimsby, besides a middle-class school, there is a girls' orphanage and a steam laundry, which is a means of maintenance as well as of training in that branch of household work. The younger children attend the parish school.

The first foundation in America was established in 1885 at the request of the Right Reverend Bishop Wigger of the Diocese of Newark, N. J., who became deeply interested in the work of the institute, and was convinced of the great good which could be effected by a community devoted to the protection and training of poor girls for a life of usefulness in the world. The place selected for this object was in St. Peter's Parish, Jersey City, in charge of the Jesuit fathers, where the sisters met with a true friend and supporter in the saintly Father McAtee, S.J. (d. 1904), to whose spiritual direction and kind encouragement were, by the Providence of God, due the successful labours of the young community. St. Joseph's Home, Jersey City, an orphanage, is the principal home of the province: with its novitiate at Englewood, N. J. Here there was a large building erected for the benefit of girls, where they could spend their summer holidays. It is beautifully situated on the Palisades overlooking the Hudson River. The blind were first taken in charge in a small building in Jersey City, on the site of which the present Institute of the Blind stands. The growing needs of this institution obliged the

purchase of other property in the neighbourhood, and now men, women, and children, are cared for in separate buildings. In the school the children are taught by the improved methods of raised letters and the point system, while the older inmates are employed in various branches of industry. For greater facilities and the accommodation for girls a second house was opened in Jersey City, where industrial classes are held on four evenings in the week, and instruction given in plain sewing, dressmaking, millinery, and cooking. The "Orphans' Messenger and Advocate of the Blind", a quarterly magazine, printed premises on the of St. Joseph's Home, by the orphan boys, under the direction of a proficient master, is the chief source of maintenance for these charities, especially for the blind. It has a wide circulation in the United States and Canada. From this province houses were founded on the Pacific Coast, the first (St. Joseph's Hospital) being established in 1890 at Bellingham, Washington (Diocese of Seattle). Later on other foundations were made in British Columbia (Diocese of New Westminster), namely a hospital at Rossland, another at Greenwood, and a day and boarding school at Nelson. Recently a house for girls was opened at Seattle, Washington. The houses in the West form one province, which has its own novitiate.

E.G. BAGSHAWE

SISTERS OF ST. JOSEPH OF ST. HYACINTHE

Founded at St. Hyacinthe, Canada, 12 Sept., 1877, by the bishop of that diocese, Louis-Zéphirin Moreau, for the Christian instruction of children and the visitation and care of the sick. Civil incorporation was granted 30 June, 1881, and canonical institution 19 March, 1882. The activities of the congregation are confined to the Diocese of St. Hyacinthe, in which 180 sisters are engaged, with about 3000 children under their care. *Le Canada Ecclésiastique* (Montreal, 1910).

SISTERS OF ST. JOSEPH OF THE APPARITION

With mother-house at Marseilles, founded at Gaillac, France, in 1830, by Mine Emilie de Vialard, for all kinds of charitable work. The institute spread rapidly from the beginning, and although some of the houses in France were closed during the French Revolution, they now number over 100 in various parts of the world, with over 1000 sisters. The congregation received the approval of the Holy See, 31 March, 1862. The sisters have one house in England, at Whalley Park, Manchester, where 10 sisters devote themselves to the care of invalided ladies, for whom they opened a home there in 1905; they also nurse in private houses. They now have about 20 branch houses in the British colonies, in the principal towns in British Burma, Malta, Cyprus, at Beirut, and in Australia, in all of which places there are high schools, homes for the aged and orphanages under the charge of the sisters. There other branches in Italy, Greece, South Africa, and the Holy Land. The number of sisters varies in each of the colonial

houses from 15 to 20. At the request of the Bishop of Perth, the sisters opened their first house in Western Australia at Freemantle, in 1854, where also later established a novitiate. They now in Western Australia 6 communities with 56 members, in charge of 6 schools, with a total attendance of 1100. The sisters also visit the poor. (See STEELE, *Convents of Great Britain*, St. Louis, 1902; and *Australasian Catholic Directory for 1910*, Sydney.)

SISTERS OF ST. JOSEPH OF THE SACRED HEART

A purely Australian foundation, established at Penola, South Australia, in 1866, by Father Julian Tennison Woods and Miss Mary Mackillop, in religion Mother Mary of the Cross (b. 1832; d. at Sydney, 8 Aug., 1909). Father Woods (d. 1886), a man of burning zeal and a pious director of souls, endeavoured to found two religious congregations, one for men, which failed, and one for women, which succeeded beyond his hopes. About 1866 he placed at the head of the latter Miss Mackillop, whom he sent to the Sisters of St. Joseph at Annecy, Savoy, to learn their rule. As much opposition was raised to his project, the founder went to Rome and obtained papal sanction. Since then the numerous communities of this congregation have been placed by the Holy See under the bishops of the dioceses in which they work. Most of the young men who have risen to parliamentary fame owe their early education to these sisters. Their schools receive no government grant, in spite of which they are superior to the free secular schools. The sisters, in communities of two or three, did the pioneer work in the mission field of Australia, seconding the labours of the clergy so ably that there have been few defections from the Faith. They are the mainstay of missions visited by a priest only once a month or once in three months, In cases where a year has elapsed between the visits of a priest, the sisters have toiled on, keeping up the day-school and on Sundays gathering the children for catechism and the rosary, and the people for the reading of a sermon, thus preparing them to receive the sacraments on the arrival of a priest. The mother-house of the congregation is at Sydney, New South Wales. The sisters number 650, in charge of 117 schools, with an attendance of 12,500, and 12 charitable institutions, including orphanages and refuges, an industrial home, a girls' reformatory, etc. The work of the sisters extends over the Archdioceses of Sydney, Adelaide, Melbourne, and Wellington, the Dioceses of Armidale, Wilcannia, Port Augusta, Bendigo, Sale, Auckland, Christchurch, Dunedin, and Rockhampton, and the Abbey Nullius of New Norcia. The Sisters of St. Joseph of the Sacred Heart of the Diocese of Bathurst, who have their own constitutions, number 250 in 54 houses.

THE SISTERS OF ST. JOSEPH
FRANCESCA M. STEELE
LITTLE DAUGHTERS OF ST. JOSEPH
JOSEPH J. FOX E.G. BAGSHAWE

St. Joseph Calasanctius

St. Joseph Calasanctius

Called in religion "a Matre Dei", founder of the Piarists, b. 11 Sept., 1556, at the castle of Calasanza near Petralta de la Sal in Aragon; d. 25 Aug., 1648, at Rome; feast 27 Aug. His parents, Don Pedro Calasanza and Donna Maria Gastonia, gave Joseph, the youngest of five children, a good education at home and then at the school of Petralta. After his classical studies at Estadilla he took up philosophy and jurisprudence at Lerida and merited the degree of Doctor of Laws, and then with honours completed his theological course at Valencia and Alcalá de Henares. His mother and brother having died, Don Pedro wanted Joseph to marry and perpetuate the family. God interfered by sending a sickness in 1582 which soon brought Joseph to the brink of the grave. On his recovery he was ordained priest 17 Dec., 1583, by Hugo Ambrose de Moncada, Bishop of Urgel. Joseph began his labours as priest in the Diocese of Albaracin, where Bishop della Figuera appointed him his theologian and confessor, synodal examiner, and procurator, and when the bishop was transferred to Lerida his theologian followed him to the new diocese. In 1586 della Figuera was sent as Apostolic visitor to the Abbey of Montserrat, and Joseph accompanied him as secretary. The bishop died the following year and Joseph left, though urgently requested to remain. He hurried to Calasanza only to be present at the death of his father. He was then called by his Bishop of Urgel to act as vicar-general for the district of Trempe. In 1592 he embarked for Rome, where he found a protector in Cardinal Marcantonio Colonna who chose him as his theologian and instructor to his nephew. Rome offered a splendid field for works of charity, especially for the instruction of neglected and homeless children, many of whom had lost their parents. Joseph joined a Confraternity of Christian Doctrine and gathered the boys and girls from the streets and brought them to school. The teachers, being poorly paid, refused to accept the additional labour without remuneration. The pastor of S. Dorotea, Anthony Brendani, offered him two rooms and promised assistance in teaching, and when two other priests promised similar help, Joseph, in November, 1597, opened the first public free school in Europe. Pope Clement VIII gave an annual contribution and many others shared in the good work, so that in a short time Joseph had about a thousand children under his charge. In 1602 he rented a house at S. Andrea della Valle and commenced a community life with his assistants and laid the foundation of the Order of Piarists. Much envy and opposition arose against him and his new institute, but all were overcome in time. In 1612 the school was transferred to the Torres palace adjoining S. Pantaleone. Here Joseph spent the remaining years of his life in his chosen calling. He lived and died a

faithful son of the church, a true friend of forsaken children. His body rests in S. Paltaleone. His beatification was solemnized on 7 Aug., 1748, and his canonization by Clement XIII, 16 July, 1767.

The life of St. Joseph Calasanctius has been written by - Timon-David (Marseilles, 1883); Hubert (Mainz, 1886); Tomaseo (Rome, 1898); Heidenreich (1907). Cf. Hist. polit. Blatter, CXX, 901; Fehr in Kirchenlexicon, s. v.

FRANCIS MERSHMAN

Pious Workers of St. Joseph Calasanctius

Pious Workers of St. Joseph Calasanctius of the Mother of God

Founded at Vienna, 24 November, 1889, by Father Anton Maria Schwartz for all works of charity, but especially the apostolate among workingmen. The members of the congregation, who comprise both priests and lay brothers, follow the Rule of the Piarists, modified in some particulars.

The mother-house is the College of Mary Help of Christians, at Vienna, with which is connected a church. The Pious Workers teach Christian doctrine in schools, establish elementary and trade schools, build homes for apprentices and all workmen, open oratories, form associations of working-men, and promote the diffusion of good literature. At Vienna, which has been so far the chief scene of their activity, in addition to undertaking the works already mentioned, they have taken charge of the reformatory (1904), have opened a public library, and have founded among other associations a Guard of Honour of the Most Blessed Sacrament. They have three colleges at Vienna, and other foundations at Deutsch-Goritz in Styria and Wolfsgraben. The prayer-book for working-men compiled by Father Schwartz has already gone through five editions. Other fathers of the society have published dramas for presentation by clubs under their charge, a book of recitations, and a number of biographies. The organ of the congregation is "St. Calasanctius-Blätter", a monthly issued at Vienna since 1888.

Heimbucher, Orden und Kongregationen, III (Paderborn, 1908), 524 sqq.; Siman, Die Kongr. der frommer Arbeiter (Vienna, 1894).

F.M. RUDGE

Josephites

Josephites

(Sons of St. Joseph)

A congregation devoted to the Christian education of youth, founded in the Diocese of Ghent (Belgium) by Canon van Crombrugghe, in 1817. Father van Crombrugghe was at that time a simple village priest acting as curate at Heusden, when he made the acquaintance of a young man named van den Bossche, of remarkable talent and great piety. Together they conceived the idea of forming a body of men, under the patronage of St. Joseph, to work among the poor. Father Crombrugghe drew up a few rules, which were the basis of the future constitutions, and the first community of Josephites opened at Grammont, 1 May, 1817, a house known as Jerusalem. This was the year of famine, and the poor suffered great privations, which the Josephites were able to relieve in great measure by giving them employment and teaching them to weave. So many now flocked to their protection that on 2 November they rented a part of the old Carmelite monastery. The next year the founder gave a constitution to his religious, and the first Josephites bound themselves by the three customary vows. In 1819 a school for paying students was started next to the free school, but, by order of the Government, the day-school was closed because the congregation was not yet recognized. In 1823, in spite of the proscription, the Josephites for the first time wore their religious habit, but in 1826 were ordered by the Government to close their church, and the following year all religious and novices admitted since 1823 were obliged to leave the community. During the first thirteen years of its existence, between three and four thousand boys had been indebted to it for their education. In 1830, when the Belgians threw off the yoke of Holland, and the National Congress placed liberty of instruction in the new constitution, the Josephites began to take an active part in the work of education. Bishop van de Velde of Ghent approved their rules, and Father Ignatius van den Bossche became the first superior general. On all sides the Sons of St. Joseph were in demand for the direction of schools and colleges, so that the original object of the institute, which had been the instruction of the poor, was gradually modified. The house of Grammont remained the mother-house, appointed as such by the Holy See. A thorough course of professional studies was organized, in accordance with the official government programme, and later on a school of agriculture was added. This latter obtained such success in numerous exhibitions that it was granted the support and recognition of the State.

Under the generalship of Father Ignatius, many new houses were opened, the two most important being those at Melle and Louvain. The college of Melle is established in a former priory of the Canons Regular of St. Augustine, founded in 1431. These canons had a college at Melle in the seventeenth century, but this was closed by order of Joseph II. After passing through several hands, the property at length came into the possession of M. van Wymelbeke, the brother-in-law of Father Crombrugghe, and in 1837 was given over to the Josephites. Here they established for the first time a complete

course of commercial education, which course was afterwards adopted in all the higher schools of commerce. Their museum of commercial products and merchandise has a European reputation. By a royal decree of 11 May, 1901, the Higher School of Commerce of Melle was given the right to confer degrees in commercial science. In 1900 the college of Melle founded a school of industries, with a maritime and a colonial section for the benefit of students who do not intend to pursue university studies. The new University of Louvain was opened by the Belgian bishops in 1835, and seven years later, at the request of Cardinal Sterckx, the Josephites established a course of classical and professional studies at Holy Trinity College, founded by the old university in 1657. Under the direction of Father Remy de Sadeleer, the congregation made great progress and, on 23 Sept., 1863, obtained a laudatory Brief from the Holy See. In 1869 the father general sent a few members of the congregation to England, where they opened a large college at Croydon. On 21 Sept. of the same year, Father Félicien Campe was elected superior general for twelve years and, in accordance with the general desire of the members of the congregation, set to work to obtain from Rome the honour of the priesthood for his spiritual sons. Re-elected in 1881, Father Campe, in 1884, bought from Lord Petre a property of 110 acres, at Weybridge, in the County of Surrey; St. George's College, Croydon, too small for the ever-increasing number of boys, was sold, and the students transferred to Weybridge.

The congregation was declared sacerdotal in March, 1897, by Leo XIII, who appointed Cardinal Svampa protector of the institute. The sixth superior general, Father Félix de Vlieghe, named in January, 1899, opened at the mother-house a "little novitiate", for the training of boys from the age of fourteen, who feel themselves called to the religious life. On 9 July, 1901, Leo XIII solemnly approved of the institute, and in 1907 Cardinal Merry del Val was named protector of the congregation.

J.O. TURNER

Joseph of Arimathea

Joseph of Arimathea

All that is known for certain concerning him is derived from the canonical Gospels. He was born at Arimathea -- hence his surname -- "a city of Judea" (Luke, xxiii, 51), which is very likely identical with Ramatha, the birthplace of the Prophet Samuel, although several scholars prefer to identify it with the town of Ramleh. He was a wealthy Israelite (Matt., xxvii, 57), "a good and a just man" (Luke, xxiii, 50), "who was also himself looking for the kingdom of God" (Mark, xv, 43). He is also called by St. Mark and by St. Luke a *bouleutes*, literally, "a senator", whereby is meant a member of the Sanhedrin or supreme council of the Jews. He was a disciple of Jesus, probably ever

since Christ's first preaching in Judea (John, ii, 23), but he did not declare himself as such "for fear of the Jews" (John, xix, 38). On account of this secret allegiance to Jesus, he did not consent to His condemnation by the Sanhedrin (Luke, xxiii, 51), and was most likely absent from the meeting which sentenced Jesus to death (cf. Mark, xiv, 64).

The Crucifixion of the Master quickened Joseph's faith and love, and suggested to him that he should provide for Christ's burial before the Sabbath began. Unmindful therefore of all personal danger, a danger which was indeed considerable under the circumstances, he boldly requested from Pilate the Body of Jesus, and was successful in his request (Mark, xv, 43-45). Once in possession of this sacred treasure, he -- together with Nicodemus, whom his courage had likewise emboldened, and who brought abundant spices -- wrapped up Christ's Body in fine linen and grave bands, laid it in his own tomb, new and yet unused, and hewn out of a rock in a neighbouring garden, and withdrew after rolling a great stone to the opening of the sepulchre (Matt., xxvii, 59, 60; Mark, xv, 46; Luke, xxiii, 53; John, xix, 38-42). Thus was fulfilled Isaiah's prediction that the grave of the Messiah would be with a rich man (Is., liii, 9). The Greek Church celebrates the feast of Joseph of Arimathea on 31 July, and the Roman Church on 17 March. The additional details which are found concerning him in the apocryphal "Acta Pilati", are unworthy of credence. Likewise fabulous is the legend which tells of his coming to Gaul A.D. 63, and thence to Great Britain, where he is supposed to have founded the earliest Christian oratory at Glastonbury. Finally, the story of the translation of the body of Joseph of Arimathea from Jerusalem to Moyonmonstre (Diocese of Toul) originated late and is unreliable.

FRANCIS E. GIGOT

St. Joseph of Cupertino

St. Joseph of Cupertino

Mystic, born 17 June, 1603; died at Osimo 18 September, 1663; feast, 18 September. Joseph received his surname from Cupertino, a small village in the Diocese of Nardo, lying between Brindisi and Otranto in the Kingdom of Naples. His father Felice Desa, a poor carpenter, died before Joseph was born and left some debts, in consequence of which the creditors drove the mother, Francesca Panara, from her home, and she was obliged to give birth to her child in a stable. In his eighth year Joseph had an ecstatic vision while at school and this was renewed several times; so that the children, seeing him gape and stare on such occasions, lost to all things about him, gave him the sobriquet "Bocca Aperta". At the same time he had a hot and irascible temper which his strict mother strove hard to overcome. He was apprenticed to a shoemaker, but at

the age of seventeen he tried to be admitted to the Friars Minor Conventuals and was refused on account of his ignorance. He then applied to the Capuchins at Martino near Tarento, where he was accepted as a lay-brother in 1620, but his continual ecstasies unfitted him for work and he was dismissed. His mother and his uncles abused him as a good-for-nothing, but Joseph did not lose hope. By his continued prayers and tears he succeeded in obtaining permission to work in the stable as lay help or oblate at the Franciscan convent of La Grotella near Cupertino. He now gave evidence of great virtues, humility, obedience, and love of penance to such an extent that he was admitted to the clerical state in 1625, and three years later, on 28 March he was raised to the priesthood. Joseph was but little versed in human knowledge, for his biographers relate that he was able to read but poorly, yet infused by knowledge and supernatural light he not only surpassed all ordinary men in the learning of the schools but could solve the most intricate questions.

His life was now one long succession of visions and other heavenly favours. Everything that in any way had reference to God or holy things would bring on an ecstatic state: the sound of a bell or of church music, the mention of the name of God or of the Blessed Virgin or of a saint, any event in the life of Christ, the sacred Passion, a holy picture, the thought of the glory in heaven, all would put Joseph into contemplation. Neither dragging him about, buffeting, piercing with needles, nor even burning his flesh with candles would have any effect on him -- only the voice of his superior would make him obey. These conditions would occur at any time or place, especially at Mass or during Divine Service. Frequently he would be raised from his feet and remain suspended in the air. Besides he would at times hear heavenly music. Since such occurrences in public caused much admiration and also disturbance in a community, Joseph for thirty-five years was not allowed to attend choir, go to the common refectory, walk in procession or say Mass in church, but was ordered to remain in his room, where a private chapel was prepared for him. Evil-minded and envious men even brought him before the Inquisition, and he was sent from one lonely house of the Capuchins or Franciscans to another, but Joseph retained his resigned and joyous spirit, submitting confidently to Divine Providence. He practised mortification and fasting to such a degree, that he kept seven Lents of forty days each year, and during many of them tasted no food except on Thursdays and Sundays. His body is in the church at Osimo. He was beatified by Benedict XIV in 1753, and canonized 16 July 1767 by Clement XIII; Clement XIV extended his office to the entire Church. His life was written by Robert Nuti (Palermo, 1678). Angelo Pastrovicchi wrote another in 1773, and this is used by the Bollandist "*Acta SS.*", V, Sept., 992.

FRANCIS MERSHMAN

Joseph of Exeter

Joseph of Exeter

(JOSEPHUS ISCANUS.)

A twelfth-century Latin poet; b. at Exeter, England. About 1180 he went to study at Gueldres, where he began his lifelong intimacy with Guibert, afterwards Abbot of Florennes. Portions of their correspondence have been preserved. In the succeeding years he wrote his most celebrated poem "De bello Trojano" in six books. Much of this must have been written before 1183, as he refers to the young "King Henry" (who predeceased his father Henry II in that year) as still living. But the work must have been completed after 1184 as it is dedicated to his friend Baldwin, Archbishop of Canterbury, who did not succeed to the primacy till that year. When the archbishop set out on the crusade to the Holy Land he induced Joseph to accompany him, but on Baldwin's death in 1190 the poet returned home, commemorating the crusade in verse in his "Antiocheis", a work of which only fragments have been preserved (see Camden's "Remaines", 338-39). The poem on the Trojan war was printed in a very corrupt and mutilated form under the name of "Cornelius Nepos" (Basle, 1558; 1583; Antwerp, 1608; Milan, 1669), and in a somewhat more critical edition by Samuel Dresenius (Frankfort, 1620; 1623). English editions were published in London in 1675 (by J. More) and in 1825. Some other poems now lost have been attributed to him, though on no valid authority. Nothing further is known of his life or death.

JUSSERAND, *De Josepho Exoniensi vel Iscano Thesis* (Paris, 1877); SARRADIN, *De Josepho Iscano, belli Trojani, XIIo post Christum saec. poeta* (Versailles, 1878); HARDY, *Descriptive Catalogue*, II (London, 1865), 559-60; KINGSFORD in *Dict. Nat. Biog.*, s.v.; see CHEVALIER, *Répertoire des sources historiques du moyen age* (Paris, 1905) for list of earlier sources.

EDWIN BURTON

St. Joseph of Leonessa

St. Joseph of Leonessa

In the world named Eufrazio Desiderio, born in 1556 at Leonessa in Umbria; died 4 February, 1612. From his infancy he showed a remarkably religious bent of mind; he used to erect little altars and spend much time in prayer before them, and often he would gather his companions and induce them to pray with him. Whilst yet a boy he used to take the discipline on Fridays in company with the confraternity of St. Saviour.

He was educated by his uncle, who had planned a suitable marriage for him, but in his sixteenth year he fell sick of a fever, and on his recovery, without consulting his relative, he joined the Capuchin reform of the Franciscan Order. He made his novitiate in the convent of the Carcerelle near Assisi. As a religious he was remarkable for his great abstinence. "Brother Ass", he would say to his body, "there is no need to feed thee as a noble horse would be fed: thou must be content to be a poor ass." In 1599, the year before his Jubilee year, he fasted the whole year by way of preparation for gaining the indulgence. In 1587 he was sent by the Superior General of his order to Constantinople to minister to the Christians held captive there. Arrived there he and his companions lodged in a derelict house of Benedictine monks. The poverty in which the friars lived attracted the attention of the Turks, who went in numbers to see the new missionaries. He was very solicitous in ministering to the captive Christians in the galleys. Every day he went into the city to preach, and he was at length thrown into prison and only released at the intervention of the Venetian agent. Urged on by zeal he at last sought to enter the palace to preach before the Sultan, but he was seized and condemned to death. For three days he hung on the gallows, held up by two hooks driven through his right hand and foot; then he was miraculously released by an angel. Returning to Italy, he took with him a Greek archbishop who had apostatized, and who was reconciled to the Church on their arrival in Rome. Joseph now took up the work of home missions in his native province, sometimes preaching six or seven times a day. In the Jubilee year of 1600 he preached the Lent at Orticoli, a town through which crowds of pilgrims passed on their way to Rome. Many of them being very poor, Joseph supplied them with food; he also washed their clothes and cut their hair. At Todi he cultivated with his own hands a garden, the produce of which was for the poor. His feast is kept on 4 February throughout the Franciscan Order. He was canonized by Benedict XIV.

F. CUTHBERT

St. Joseph's Society For Colored Missions

St. Joseph's Society for Colored Missions

This organization began its labours in 1871, when four young priests from Mill Hill were put in charge of St. Francis Xavier's church, with a large congregation of black Catholics, in Baltimore. Other black missions were soon begun at Louisville, Charleston, Washington, Richmond, Norfolk, and other places in the South. The society in the United States increased so rapidly and its missions were so successful that in 1892 it was made independent of Mill Hill and established its headquarters at Baltimore. It soon grew to almost 50 priests, who ran 35 missions throughout the South. The so-

ciety opened numerous educational institutions, including: St. Joseph's Seminary in Baltimore, to train missionaries for the black missions; Epiphany Apostolic College, Walbrook, Baltimore, a preparatory school for St. Joseph's Seminary; St. Joseph's Catechetical College near Montgomery, Alabama, to train young black men as catechists and teachers; and St. Joseph's Industrial School at Clayton, Delaware, an agricultural and trade school for black youth.

MICHAEL OTT

St. Joseph's Society For Foreign Missions

St. Joseph's Society for Foreign Missions

(Mill Hill, London, N.W.)

A society of priests and laymen whose object is to labour for the conversion of heathens in foreign countries. It owes its origin to Cardinal Vaughan (d. 1903) who, when still but a priest, founded in 1866 St. Joseph's Missionary College in a villa near Mill Hill, about ten miles north of London. It was the purpose of this college to train missionaries to propagate the Gospel among unevangelized races beyond Europe, especially the negroes of Africa and the United States of America. On 1 March, 1871, the college was transferred to a larger building erected for the purpose at Mill Hill, and in 1884 St. Peter's School was founded at Freshfield near Liverpool, to serve as a preparatory school to the college at Mill Hill. There are two other branch colleges: St. Joseph's Missiehuis, at Rozendaal, Holland, erected in 1890; and St. Josef's Missionshaus, at Brixen, Tyrol, erected in 1891. St. Joseph's Society, Mill Hill, is under the direction of the superior general, Very Rev. Francis Henry, and comprises at present about 200 priests and 10 lay brothers. About 170 of these priests are engaged as missionaries, the others as teachers in the above named colleges. The following missions are under the care of the Society: the Telugu Mission in the Archdiocese of Madras in British India, since 1875; the Prefecture Apostolic of Labuan and North Borneo, since 1881; the Maori Mission in the Diocese of Auckland, New Zealand, since 1886; the Prefecture Apostolic of Kafiristan and Kashmir in the northern part of India, since 1887; the Vicariate Apostolic of the Upper Nile or Uganda in British East Africa, since 1894; a few stations in the Belgian Congo, since 1903; and in the Diocese of Jaro, in the Philippine Islands, since 1906, there are about thirty priests of the society. The rules and constitutions of the society received the final definite approval of the Holy See, 25 April, 1908.

SISTERS OF ST. JOSEPH'S SOCIETY FOR FOREIGN MISSIONS

Of the Third Order Regular of St. Francis, founded in 1883 by Cardinal Vaughan and Mother Mary Francis Ingham, to co-operate in the work of the Mill Hill Fathers.

The cardinal's idea was that the sisters should stand in the same relation to the fathers of the society as the Sisters of Charity of St. Vincent de Paul to the Lazarist Fathers. They undertake any work, at home or abroad, indicated for them by the superior general or the bishop of the diocese. There are no lay sisters. The novitiate is at Patri-craft, Manchester, where the sisters have also homes for boys and girls and a nursery, with about 200 children under 40 sisters. In addition to their establishments at Mill Hill and Manchester, the congregation has a branch house at Blackburn with boarding-schools for boys and girls of the middle class and an orphanage for children of the poorer class, with 10 sisters in charge of 70 to 80 children; at Blackburn the sisters teach in 3 elementary schools. They have branches also at Freshfield (Liverpool), at Waterford and Cork in Ireland, and at Rozendaal in Holland. In Borneo there are 17 sisters at various mission stations. The total number of professed sisters in the congregation is 120.

St. Joseph's Foreign Missionary Advocate, a quarterly (Mill Hill, 1883—); St. Josefs Missionsblatt, monthly organ of the Tyrolesebranch of the society (Brixen, 1896—); St. Josefs-Missions-Gesellschaft des heiligsten Herzens von Mill Hill (Brixen, 1892); Annalen van het Missiehuis te Rozendaal (monthly).

MICHAEL OTT

Flavius Josephus

Flavius Josephus

Jewish historian, born A.D. 37, at Jerusalem; died about 101. He belonged to a distinguished priestly family, whose paternal ancestors he himself traces back five generations; his mother's family claimed descent from the Machabeans. He received a good education, and association with distinguished scholars developed his intellectual gifts, more especially his memory and power of judgment. He also made himself fully acquainted with and tried the leading politico-religious Jewish parties of his age -- the Essenes, Pharisees, and Sadducees.

Impressed by the outward importance of the Pharisees and hoping to secure through them a position of influence, he attached himself to their party at the age of nineteen, although he shared neither their religious nor political views. He went to Rome in the year 64 with the object of procuring from Nero the release of some imprisoned Jewish priests, who were friends of his. He succeeded in winning the favour of Poppæa Sabina, the emperor's consort, and through her influence gained his cause. But he was dazzled by the brilliant court life in the metropolis of the world, that he became ever more estranged from the spirit of strict Judaism, considering its struggle against paganism as useless. After his return to Jerusalem, the great Jewish revolt broke

out in the year 66. Like most of the aristocratic Jews, Josephus at first discountenanced the rebellion of his countrymen, goaded into activity by their enslaved condition and outraged religious sentiments; when, however, fortune seemed to favour the insurgents, Josephus like the rest of the priestly nobility joined them, and was chosen by the Sanhedrin at Jerusalem to be commander-in-chief in Galilee. As such he established in every city throughout the country a council of judges, the members of which were recruited from those who shared his political views. He guided the diplomatic negotiations as well as the military enterprises with prudence and astuteness. In the beginning the Jews were successful, but later when the Roman General Vespasian advanced with the main army from Antioch to Galilee, burning and murdering, the insurgents either fled or sought shelter in their fortresses. For six weeks Josephus and the boldest spirits among the insurgents defended themselves in the almost impregnable fortress of Jotapata. In the summer of 67, the garrison being now exhausted from lack of water and other necessaries, the Romans stormed the citadel; most of the patriots were put to the sword, but Josephus escaped the massacre by hiding in an inaccessible cistern, and emerged only after receiving an assurance that his life would be spared. Brought before the victorious general, he sought with great shrewdness to ingratiate himself with Vespasian, foretelling his elevation, as well as that of his son Titus, to the imperial dignity. Vespasian, however, kept him as a prisoner, and it was only in the year 69, after he had actually become emperor, that he restored to Josephus his liberty.

As a freedman of Vespasian, Josephus assumed in accordance with the Roman custom the former's family name of Flavianus. He accompanied the emperor as far as Egypt, when the latter had handed over to his son the prosecution of the Jewish War, but then joined the retinue of Titus, and was an eyewitness of the destruction of the Holy City and her Temple. At his personal risk he had tried to persuade the Jews to surrender. After the fall of the city he went to Rome with Titus, and took part in the latter's triumph. But these scenes did not trouble Josephus's sense of national honour; on the contrary, he accepted the privilege of Roman citizenship in recognition of his services, and was granted a yearly stipend and also lands in Judea. The succeeding emperors, Titus and his cruel brother Domitian, also showed themselves kindly disposed towards Josephus, and conferred on him many marks of distinction. At court he was allowed to devote himself unmolested to his literary work until his death, which occurred in the reign of Trajan (probably in 101). In his life, as in his writings, he pursued a policy midway between Jewish and pagan culture, for which he was accused by his Jewish countrymen of being unprincipled and hypocritical. His works were written in elegant Greek, to influence the educated class of his time, and free them from various prejudices against Judaism.

The first work of Josephus was the "Jewish War" (*Peri tou Ioudaikou polemou*) in seven books. This is mainly based on his memoranda made during the war of independence (66-73), on the memoirs of Vespasian, and on letters of King Agrippa. While his story of warlike events is reliable, the account of his own doings is strongly tinged with foolish self-adulation. This work furnishes the historical background for numerous historical romances, among those of modern times "Lucius Flavius" by J. Spillmann, S.J., and "The End of Juda" by Anton de Waal.

Josephus's second work, the "Jewish Antiquities" (*Ioudaike Archaologia*), contains in twenty books the whole history of the Jews from the Creation to the outbreak of the revolt in A.D. 66. Books I-XI are based on the text of the Septuagint, though at times he also repeats traditional explanations current among the Jews in later times. He also quotes numerous passages from Greek authors whose writings are now lost. On the other hand he made allowance for the tastes of his Gentile contemporaries by arbitrary omissions as well as by the free embellishment of certain scenes. Books XII-XX, in which he speaks of the times preceding the coming of Christ and the foundation of Christianity, are our only sources for many historical events. In these the value of the statements is enhanced by the insertion of dates which are otherwise wanting, and by the citation of authentic documents which confirm and supplement the Biblical narrative. The story of Herod the Great is contained in books XV-XVII. Book XVIII contains in chapter iii the celebrated passage in which mention is made of the Redeemer in the following words:

About this time lived Jesus, a man full of wisdom, if indeed one may call Him a man. For He was the doer of incredible things, and the teacher of such as gladly received the truth. He thus attracted to Himself many Jews and many of the Gentiles. He was the Christ. On the accusation of the leading men of our people, Pilate condemned Him to death upon the cross; nevertheless those who had previously loved Him still remained faithful to Him. For on the third day He again appeared to them living, just as, in addition to a thousand other marvellous things, prophets sent by God had foretold. And to the present day the race of those who call themselves Christians after Him has not ceased.

Attempts have been made to refute the objections brought against this passage both for internal and external reasons, but the difficulty has not been definitively settled. The passage seems to suffer from repeated interpolations. The fact that the "Antiquities" testifies to the truth of Divine Revelation among the Jews as among the Christians, and confirms the historical facts related in the Bible by the incontrovertible testimony of pagan authors, renders this work of Josephus of extreme value for the

history of the chosen people. The accounts which he gives of the rise and mutual relations of the different Jewish sects, which are so important in the history and sufferings of the Saviour; his information regarding the corruption of the ancient Jewish customs and institutions; his statement concerning the internal conflicts of the Jews, and lastly his account of the last war with the Romans, which put an end to the national independence of the Jews, are of prime importance as historical sources.

In his "Autobiography" (*phlaouiou Iosepou bios*), written A.D. 90, Josephus seeks, not without attempts at self-glorification, to justify his position at the beginning of the Jewish rising. In plan and language the book is probably influenced by the writings of Nicholas of Damascus, which Josephus had also used in the "Antiquities". His work entitled "Against Apion" (*Kata Apionos*), divided in two books, is a defence of the great antiquity of the Jews and a refutation of the charges which had been brought against them by the grammarian Apion of Alexandria on the occasion of an embassy to the Emperor Caligula.

The early Christians were zealous readers of Josephus's "History of the Jews", and the Fathers of the Church, such as Jerome and Ambrose, as well as the early ecclesiastical historians like Eusebius, are fond of quoting him in their works. St. Chrysostom calls him a useful expounder of the historical books of the Old Testament. The works of Josephus were translated into Latin at an early date. After the art of printing had been discovered, they were circulated in all languages. The first German translation was edited by the Strasburg Reformer Kaspar Hedio, in 1531, and a French translation was issued by Burgoing in Lyons in 1558. Among the best-known translations in English is that by Whiston (London, 1737), revised by Shilleto (5 vols., London, 1888-9). In the middle of the nineteenth century the interest in the "Jewish Antiquities" was revived by a translation which the Society of St. Charles Borromeo induced Professor Konrad Martin, afterwards Bishop of Paderborn, to undertake in collaboration with Franz Kaulen (1st ed., Cologne, 1852-3; 2nd and 3rd ed. by Kaulen, 1883 and 1892). The text of Josephus's works has been published by Dindorf in Greek and Latin (2 vols., Paris, 1845-47) and Bekker (6 vols., Leipzig, 1855-6). There are critical editions by Naber, (Leipzig, 1888-96) and Niese (7 vols., Berlin, 1887-95; text only, 6 vols., Berlin, 1888-95).

KARL HOEBER

Josias

Josias

(Josiah– Hebrew for "Yahweh supports"; Septuagint *Iosías*).

A pious King of Juda (639-608 b.c.), who ascended the throne when he was only eight years of age. He was the son of Amon and the grandson of Manasses. His mother's name is given as Idida, the daughter of Hadaia [IV (II) Kings, xxii, 1]. Of the actual influences under which he grew up nothing is known for certain. His reign of thirty-one years is recorded in the parallel and slightly divergent accounts of IV (II) Kings, xxii-xxiii, 30, and II Paralipomenon (Chronicles), xxxiv-xxxv. The following is a summary of Josias's public acts as they are set forth in the former of these accounts. In the eighteenth year of his rule, the Jewish king undertook to repair the Temple with the help of the high-priest Helcias. During the course of this work, Helcias found "the Book of the Law", and handed it to the royal scribe, Saphan, who read it to Josias. The threats made therein against the transgression of its contents frightened the monarch, who well knew how often these had been disobeyed in the past, and who sent to consult the prophetess Holda then living in Jerusalem. Holda declared that the threatened punishments would indeed take place, but only after Josias's death. Whereupon the king assembled the people, published the Law in their hearing, and they all united with Josias in a solemn vow of obedience to its commands. This was followed by a drastic reformation of worship not only in Juda and in Jerusalem, but also in Northern Israel, which was not strictly a part of Josias's kingdom, but in which the Jewish prince could easily intervene, owing probably to the feeble hold of Assyria at the time upon this distant portion of its territory. The work of reform was concluded by a magnificent celebration of the Pasch.

Of the thirteen years of Josias's reign which followed this important reformation, nothing is said in the narrative of the Fourth Book of Kings. We are simply told of the monarch's exceeding piety towards Yahweh and of his death on the battle-field of Mageddo, where he perished fighting against the Egyptian Pharaoh, Nechao II, who was then on his way to the Euphrates against the Assyrians. Whoever compares carefully and impartially with this first account of Josias's reign the second one given in II Par., xxxiv-xxxv, cannot help being struck with their wonderful substantial agreement. Both Biblical records agree perfectly as to the age of the king at his accession and as to the length of his reign. Like the narrative of Kings, that of Paralipomenon refers to the eighteenth year of Josias's rule the discovery of the "Book of the Law", relates the same circumstances as attending that event, speaks of a work of religious reform as carried out throughout all Israel on account of the contents of that book, and praises the

magnificence of the solemn Pasch celebrated in harmony with its prescriptions. Like the narrative of Kings, too, that of Paralipomenon appreciates in the most favourable manner the king's character and describes his death on the battle-field of Mageddo when fighting against Nechao. In view of this it is plain that the differences, noticeable in their respective accounts of the reign of Josias by the authors of IV Kings and II Paralip., are only slight variations naturally accounted for by the somewhat different purposes which the two inspired. With regard to the exact extent and the Mosaic origin of the "Book of the Law", discovered under Josias, see Pentateuch.

For works on Biblical history, see bibliography to Isaac. Recent Commentaries on Paralipomenon by: Clair* (Paris, 1880); Oettli (Munich, 1889); Bennet (New York, 1894); Barnes (Cambridge, 1899); Neteler* (Münster, 1899); Benzinger (Freiburg, 1901); Kittel (Göttingen, 1902). Names of Catholic authors are marked with an asterisk.

Francis E. Gigot

Josue (Joshua)

Josue (Joshua)

The name of eight persons in the Old Testament, and of one of the Sacred Books.

- 1 (*'Oseé*), a Bethsamite in whose field the ark stood on its way back from the land of the Philistines to Juda (I Kings, vi, 14, 18).
- 2 (*'Iesoûs*), governor of Jerusalem whose idolatrous altars were destroyed by King Josias, during the latter's attempts to undo the evil wrought by his father Amon and grandfather Manasses (IV Kings, xxii, 8).
- 3 (*'Iesoûs*), the son of Josedec and the highpriest who returned with Zorobabel from the Babylonian Captivity to Jerusalem (I Esd., ii, 2; II Esd., vii, 7; xxi, 1). In I and II Esd. the Vulgate calls him Josue; in Agg. and Zach., Jesus. He assisted Zorobabel in rebuilding the Temple, and was most zealous for the restoration of the religion of Israel (I Esd., iii, 2, 8; iv, 3; v, 2). It was he whom Zacharias saw in vision stripped of filthy garments and clothed in clean robes and mitre, while the angel of the Lord proclaimed the highpriest the type of the coming Messiah (Zach., iii).
- 4 (*'Iesoué, 'Iesoû*), a head of the family of Phahath Moab, one of the families named in the list of Israelites that returned from the Babylonian Exile (I Esd., ii, 6; II Esd., vii, 11).
- 5 (*'Iesoî 'Iesoû*), a head of the priestly family of Idaia, maybe the highpriest Josue mentioned above (I Esd., ii, 36; II Esd., vii, 39).

- 6 (*'Iesoûs, 'Iesoû*), the name of a priestly family descended from Oduia, as also of various heads of that family after the Exile (I Esd., ii, 40; iii, 9; viii, 33; II Esd., iii, 19; vii, 43; viii, 7; ix, 4, 5; xii, 8, Vulg. Jesua; xii, 24).
- 7 (*'Iesía*), one of the sons of Herem who were ordered to put away their wives taken from the land of the stranger (I Esd., x, 31).
- 8 (First called Osee; Sept. *'Iesoûs*, first *Aúsé*), the son of Nun; the genealogy of the family is given in I Par., vii, 20-27; it belonged to the tribe of Ephraim. Josue commanded the army of Israel, after the Exodus, in its battle with Amalec (Ex., xvii, 9-13), was called the minister of Moses (xxiv, 13), accompanied the great lawgiver to and from Mount Sinai (xxxii, 17) and into the tabernacle of the covenant (xxxiii, 11), and acted as one of twelve spies whom Moses sent to view the land of Chanaan (Num., xiii, 9). On this occasion Moses changed his servant's name from Osee to Josue (Num., xiii, 17). The new name most likely means "Jahweh is salvation". Josue and Caleb alone spoke well of the land, even though the people wished to stone them for not murmuring and these two lived on (Num., xiv, 38). Josue was chosen by God to succeed Moses. The words of the choice show the character of the chosen (Num., xxvii, 17-18). Before Eleazar and all the assembly of the people Moses laid hands on Josue. Later this soldier was proposed by Moses to the people to lead them into the land beyond the Jordan (Deut., xxxi, 3), and was ordered by the Lord to do so (xxxii, 23). After the death of Moses, Josue was filled with the spirit of wisdom and was obeyed by the children of Israel (Deut., xxxiv, 9). The rest of story of Josue is told in the Book of Josue.

THE BOOK OF JOSHUA

The sixth book of the Old Testament; in the plan of the critics, the last book of the Hexateuch (see **Pentateuch**). In the Fathers, the book is often called "Jesus Nave". The name dates from the time of Origen, who translated the Hebrew "son of Nun" by *υἱὸς Ναυέ* and insisted upon the *Nave* as a type of a ship; hence in the name *Jesus Nave* many of the Fathers see the type of Jesus, the Ship wherein the world is saved.

(1) Contents

The Book of Josue contains two parts: the conquest of the promised land and the division thereof. (a) The Conquest (i- xii). Josue enters the land of promise, after being assured by spies that the way is safe. It is the tenth day of the first month, fortyone years since the Exodus. The channel of the Jordan is dry during the passage of Israel (i-iii) A monument is erected in the midst of the Jordan, and one at Galgal, to commemorate the miracle. Josue camps at Galgal (iv). The Israelites born during the wandering are circumcised; the pasch is eaten the first time in the land of promise; the

manna ceases to fall; Josue is strengthened by the vision of an angel (v). The walls of Jericho fall without a blow; the city is sacked; its inhabitants are put to death; only the family of Rahab is spared (vi). Israel goes up against Hai. The crime of Achan causes defeat. Josue punishes that crime and takes Hai (vii-viii, 29); sets up an altar on Mount Hebal; subjugates the Gabaonites (viii, 30-ix), defeats the kings of Jerusalem, Hebron, Jerimoth, Lachis, and Eglon; captures and destroys Maceda, Lebna, Lachis, Eglon, Hebron, Dabir, and the South even to Gaza; marches North and defeats the combined forces of the kings at the waters of Meron (x-xii). (b) The Division of the Land among the Tribes of Israel (xiii-xxii). Epilogue: last message and death of Josue (xxiii and xxiv).

(2) Canonicity

(a) In the Jewish canon Josue is among the Early Prophets Josue, Judges, and the four Books of Kings. It was not grouped with the Pentateuch, chiefly because, unlike Exodus and Leviticus, it contained no Torah, or law; also because the five books of the Torah were assigned to Moses (see **Pentateuch**). (b) In the Christian canon Josue has ever held the same place as in the Jewish canon.

(3) Unity

Non-Catholics have almost all followed the critics in the question of the "Hexateuch"; even the conservative Hastings, "Dict. of the Bible", ed. 1909, takes it for granted that Josue (Joshua) is a post-Exile patchwork. The first part (i-xii) is made up of two documents, probably J and E (Jehovistic and Elohist elements), put together by J E and later revised by the Deuterocanonical editor (D); to this latter is assigned all of the first chapter. Very little of this portion is the work of P (the compiler of the Priestly Code). In the second part (xiii-xxii) the critics are uncertain as to whether the last editing was the work of the Deuteronomist or the Priestly editor; they agree in this that the same hands those of J, E, D, and P are at work in both parts, and that the portions which must be assigned to P have characteristics which are not at all found in his work in the Pentateuch. The final redaction is post-Exilic a work done about 440-400 b.c. Such in brief is the theory of the critics, who differ here as elsewhere in the matter of the details assigned to the various writers and the order of the editing, which all assume was certainly done. (See G. A. Smith and Welch in Hastings, "Dict. of the Bible", large and small editions respectively, s. v. "Joshua"; Moore in Cheyne, "Encyc. Bibl."; Wellhausen, "Die Composition des Hexateuchs und der historischen Bücher des A. T.", Berlin, 1889; Driver, "Introd. to Lit. of O.T.", New York, 1892, 96.)

The Jews knew no such Hexateuch, no such six books set together by a final editor; they always kept a marked distinction between the Pentateuch and Josue, and rather linked Josue with Judges than with Deuteronomy. The wellknown preface to Ecclus.

(Sept.) separates the "Law" from the "Prophets". The Samaritans have the Torah entirely separate from the recently discovered Samaritan Josue.

Catholics almost universally defend the unity of Josue. It is true that before the decree of the Biblical Commission on the question of the multiple authorship of the Pentateuch, some Catholics assigned Josue, as well as the five Mosaic books, to J, E, D, and P. Catholic Biblical scholars favour the pre-Exilic unity of composition of Josue and its editorial independence of the Pentateuch. This independence is shown by the completeness and originality of the plan of the book. We have seen the unity of this plan Josue's conquest and division of the promised land. The purpose is clear to carry on the history of the chosen people after the death of Moses. The purpose of the Pentateuch was very different to codify the laws of the chosen people as well as to sum up their primitive history. No laws are codified in Josue. The critics argue that the death of Moses leaves a void to be filled up, i. e. the conquest of the land of promise, and therefore postulate this conquest for the historical, if not for the legal, completeness of the Pentateuch. Such an hypothesis would justify one in postulating also that the history of the conquest after the death of Josue be needed for the historical completeness of the Pentateuch. Again, the completeness of Josue's narrative of the conquest of the promised land is clear from the fact that it repeats data which are already given in the Pentateuch and are details of that conquest. The orders of Moses to the children of Ruben and of Gad are clear cut in the Pentateuch (Num., xxxii, 20 sqq.); so, too, is the execution of these orders by the Rubenites and Gadites in the lands of the Amorrites and of Basan (Num., xxxii, 33-38). If Josue is part of the composite and late composition which the critics make the Mosaic books out to be, how comes it that these very data concerning the children of Ruben and of Gad are repeated by the supposititious Deuteronomic D¹ or D² when he comes to set together the J and E and P of Josue? Why does he break in upon his continued narrative (see Jos., i, 12; xiii, 15-28)? Why this useless repetition of the same names, if not because of the unity of composition of Josue? Why are the cities of refuge given again (cf. xx, 8; Deut., iv, 41 sqq.)? To answer these and similar difficulties, the critics have recourse to an uncritical subterfuge D¹ or D² was not brought up in the school of modern criticism; hence his blunderings. We cannot accept so uncritical and free-handed a writer as the God-chosen and inspired editor of the Pentateuch and Josue. For a full refutation of the critics, see Cornely, "Introd. Specialis in Hist. V. T. Libros", II (Paris, 1887, 177).

(4) Authorship

(a) The Book of Josue was certainly written before the time of David, for the Chanaanite still dwelt in Gazer (xvi, 10), the Jebusite in Jerusalem (xv, 63), and Sidon held supremacy in Phoenicia (xiv, 28); whereas, before the time of Solomon, the Egyptians had driven the Chanaanite from Gazer (III Kings, ix, 16), David had captured

Jerusalem in the eighth year of his reign (II Kings, v, 5), and Tyre (twelfth century b.c.) had supplanted Sidon in the supremacy of Phoenicia. Moreover, in David's time, no writer could have set down his allies the Phoenicians among the peoples to be destroyed (xiii, 6). (b) Internal evidence favours the view that the author lived not long after the death of Josue. The territory assigned to each tribe is very exactly described. Only the land allotted to Ephraim is set down (xvi, 5), since occupation was delayed (xvii, 16); on the other hand, we are told not only the portion of land allotted to Juda and Benjamin, but the cities they had captured (xv, 1 sqq.; xviii, 11 sqq.); as for the other tribes, the progress they had made in winning the cities of their lot is told us with an accuracy which could not be explained were we to admit that the narrative is post-Exilic in its final redaction. Only the inadmissible bungling of the uncritical D¹ or D² will serve to explain away this argument. (c) The question remains: Did Josue write all save the epilogue? Catholics are divided. Most of the Fathers seem to have taken it for granted that the author is Josue; still there have ever been Catholics who assigned the work to some one shortly after the death of the great leader. Theodoret (In Jos., q. xiv), Pseudo-Athanasius (Synopsis Sacr. Scrip.), Tostatus (In Jos., i, q. xiii; vii), Maes ("Josue Imperatoris Historia", Antwerp, 1574), Haneberg ("Gesch. der bibl. Offenbarung", Ratisbon, 1863, 202), Danko ("Hist. Rev. Div. V. T.", Vienna, 1862, 200), Meignan ("De Moïse à David", Paris, 1896, 335), and many other Catholic authors admit that the Book of Josue contains signs of later editing; but all insist that this editing was done before the Exile.

(5) Historicity

The Biblical Commission (15 Feb., 1909) has decreed the historicity of the primitive narrative of Gen., i-iii; a fortiori it will not tolerate that a Catholic deny the historicity of Josue. The chief objection of rationalists to the historical worth of the book is the almost overwhelming force of the miraculous therein; this objection has no worth to the Catholic exegete. Other objections are forestalled in the treatment of the authenticity of the work. Full answer to the rationalistic objections will be found in the standard works of Catholics on introduction. Saints Paul (Heb., xi, 30, 31; xiii, 5), James (ii, 25), and Stephen (Acts, vii, 45), the tradition of the Synagogue and of the Church accept the Book of Josue as historical. To the Fathers Josue is an historical person and a type of the Messias. As an antidote to accusations that Josue was cruel and murderous, etc., one should read the Assyrian and Egyptian accounts of the almost contemporary treatment of the vanquished. St. Augustine solved the rationalistic difficulty by saying that the abominations of the Chanaanites merited the punishment which God, as Master of the world, meted out to them by the hand of Israel (In Hept., III, 56; P.L., XXXIV, 702, 816). These abominations of phallic worship and infant sacrifice have been proven by the excavations of the Palestine Exploration Fund at Gazer.

(6) Text

The Septuagint is preserved in two different recensions the Alexandrian (A) and Vatican (B) and varies considerably from the Masorah; the Vulgate often differs from all three (iii, 4; iv, 3, 13; v, 6). The Samaritan Josue recently discovered, resembles the Sept. more closely than the Masorah.

Fathers: Origen, *Eclectum in Jesum Nave* in *P. G.*, XII, 819-825); Augustine, *Quæstiones in Heptateuchum* in *P.L.*, XXXIV, 547). Modern writers: Maes, *op. cit.*; Calmet, *Comm. Lit. in Omnes Libros N. et V. Test.* (Würzburg, 1788); Serarius, *Josue*, etc. (Mainz, 1610); Bonfrère, *Josue, Judices, Ruth* (Paris, 1733); also works mentioned in body of article. Protestant: Speaker's *Bible*, II (London, 1872); KÖnig, *Alltest Studien*, i. *Authentic des Buches Josua* (1836).

WALTER DRUM

Joseph Joubert

Joseph Joubert

French philosopher; b. at Martignac (Dordogne), 7 May, 1754, d. at Villeneuve-le-Roi (Yonne), 4 May 1824. At the age of fourteen, having finished his studies in his native town, he was sent to Toulouse to study law, but after a few months joined the Doctrinaires, a teaching order, and was entrusted with the instruction of lower classes. In 1778 he left the order and went to Paris, where he associated with the most famous literary men of the time, Marmontel, Diderot, and d'Alembert, with whose sentiments he was for some time in sympathy. The French Revolution opened his eyes and made him a strong opponent of the doctrines of the eighteenth century. In 1790 he was elected by his countrymen justice of the peace of the canton of Martignac. When his biennial term expired, he refused to accept re-election and returned to Paris, where in the following year (8 June, 1793) he married Mlle Moreau. Disgusted with the tyranny of the Revolutionists, he retired to Villeneuve-le-Roi. Even after the 9th of Thermidor he preferred to live there rather than in Paris. Chateaubriand, Mme de Beaumont, Fontanes, Molé, and Chênédollé were his frequent visitors. In 1809 he was appointed by Fontanes Inspector General of the University of France, and in spite of his poor health fulfilled his duties with the greatest zeal. When he was compelled to give up his inspectorship, he devoted his time to the education of his son and to his literary works. He was one of the first to understand the movement of the Romanticists and to encourage it. Owing to his kind disposition and his delicate taste, as well as his friendly and cheerful character, he had a strong influence over the young men gathered around him. Aiming at what was perfect in literature, he wrote very little and never published anything. He spent his leisure in thinking, and putting down his thoughts

for himself. His aim was to note in terse and clear sentences the necessity, utility, and beauty of virtue. After his death, all these *papiers de la malle* (scraps of paper), as he called them, aroused the interest and admiration of Chateaubriand, who published a short selection of them for private circulation, under the title of "Recueil des Pensées de M. Joubert" (Paris, 1838). This book was re-edited with many additions by Paul Raynal, a nephew of the author, under the new title of "Pensées, Essais, Maximes et Correspondance de J. Joubert" (Paris, 1842). Many other editions have since been published.

Notice historique sur Joubert by his brother, ARMAND JOUBERT (no date and no place of publication), a very valuable and rare document which has just been reprinted by GIRAUD in his new edition of the *Pensees* (Paris, 1909). PAILHES, *Du nouveau sur Joubert* (Paris, 1900); DE RAYNAL. *Les correspondants de J. Joubert* (Paris, 1885).

LOUIS N. DELAMARRE

Claude-Francois-Dorothee de Jouffroy

Claude-François-Dorothée de Jouffroy

Marquis d'Abbans.

Mechanician, b. at Abbans, near Besançon, 30 Sept., 1751; d. at Paris, 18 July, 1832. He was educated by the Dominicans of Quingey in philosophy and literature, but showed a leaning towards the exact sciences and the mechanical arts. At the age of twenty he was enlisted in the infantry regiment of Bourbon, but numerous infractions of discipline brought upon him in 1772 the punishment of confinement at the prison opposite Cannes. There he began the study of the problems of steam navigation, suggested by the sight of the convicts rowing the galleys. In 1775 he went to Paris to study the Watt steam-engine. He discussed with Perier the application of steam to the propulsion of vessels, and opposed his views. Finally he constructed an experimental boat, and ran it on the River Doubs during June and July, 1776. The system he used then was the palmipede, or web-foot, which proved unsatisfactory. In 1781, being promised the help of the Government, he began the construction of his *pyroscaphe* at Lyons. This vessel was about 140 feet long, 5 feet wide, 3 feet in draught, and 150 tons in displacement. A horizontal steam-engine moved a double rack to and fro; this rack geared with ratchet-wheels on the shaft carrying the paddle wheels. The wheels were thus turned continuously in the same direction.

At a public trial, 15 July, 1783, the vessel ran up the Saône at Lyons against the current with a speed of six miles per hour, in the presence of representative scientific men and thousands of enthusiastic spectators. This steamboat continued to run on the river during sixteen months. In spite of the very favorable report the French

Academy withheld its endorsement, perhaps on account of the jealousy of Perier, giving as an excuse the fact that the experiment had not been made at Paris. Jouffroy, having already spent a fortune, was too poor to continue the struggle, and the guaranteed monopoly was not confirmed. The Revolution setting in, all work was abandoned until the restoration and after Fulton's success. A boat was launched and run on the Seine 20 August, 1816, and at last the patent was granted. Still Jouffroy was opposed and failed to get the necessary financial support. At length in 1831, utterly discouraged and poor, he retired to the Invalides, the home of old soldiers where he died of cholera. He was admitted to the home without difficulty, being chevalier of the Orders of Military Merit, of Saint-George, and of Saint-Louis, and having served eighteen years and during eleven campaigns. Claude de Jouffroy fought constantly on the side of the legitimists and opposed even Napoleon, the "usurper", refusing to submit his invention to him. His religious sentiments are evident from the fact that he entrusted his son to the care of the Abbé Blond. He himself was comforted to the last moment by the presence of a priest. A century later, in 1884, France recognized the originality of the inventor by subscribing to the statue of Jouffroy erected at Besançon. Robert Fulton himself had testified that "if the glory (of imagining the first *pyroscaphe*) belongs to any one man, it belongs to the author of the experiments made on the River Saône at Lyons in 1783".

THURSTON, *Growth of the Steam Engine* (New York, 1878); PROST, *Le marquis de Jouffroy* (Paris, 1889); ARAGO, *L'annuaire du Bureau des Long.* (Paris, 1837); JOUFFROY in *Les Contemporains* (Paris, 1897); WOODCROFT, *Steam Navigation* (London, 1848).

WILLIAM FOX

Jean de Jouffroy

Jean de Jouffroy

French prelate and statesman; b. at Luxeuil (Franche-Comté) about 1412; d. at the priory of Rulli, in the Diocese of Bourges, 24 November, 1473. After studying at Dôle, Cologne, and Pavia, he entered the Benedictine Order, and taught theology and canon law at Pavia (1435-38). Philip the Good, Duke of Burgundy, entrusted him with several diplomatic missions to France, Italy, Portugal and Spain. Abbot of Luxeuil (1450 or 1451) and Bishop of Arras (1453), he became a favorite of the Dauphin, later King Louis XI.

Through the intervention of the Duke of Burgundy, Jouffroy had tried to obtain the cardinalate, and he soon found an opportunity of attaining this end. The Pragmatic Sanction of Bourges (1438), besides asserting the superiority of councils over the Roman

pontiff, had lessened the freedom and independence of the Church in France, and had, to a great extent, withdrawn it from the pope's control. While yet Dauphin, Louis XI had pledged himself to abolish the Pragmatic Sanction in the event of his succession to the throne. Upon his becoming king (1461), negotiations were opened by Pius II, who appointed Jouffroy as his legate. The king showed himself favorably disposed, but, in return, expected that the pope would change his Neapolitan policy, cease to support Ferrante, and recognize John of Calabria as King of Naples. At Rome, however, Jouffroy made no mention of this fact, and simply announced the king's intention of repealing the Pragmatic Sanction. In fact Louis himself wrote to the pope (27 Nov., 1461): "As you require, we set aside and proscribe the Pragmatic Sanction in our whole kingdom, in Dauphine, and all our dominions, in which henceforth your jurisdiction shall be unquestioned." Louis had expressed the desire that Jouffroy be made a cardinal. Notwithstanding the opposition of many in the Sacred College, the pope consented, and on 18 Dec., 1461, Jouffroy was one of the seven newly appointed cardinals. In the beginning of January, 1462, Jouffroy made known to the pope the king's demands concerning Naples. In his memoirs Pius II complains that "after Jouffroy had entered the sure haven of the cardinalate, he brought forward that which he had hitherto concealed, namely, that the Pragmatic Sanction would certainly be repealed only when the king's wishes regarding Naples had been complied with." For some time the pope seemed to be in doubt as to whether it would not be advisable to yield, but finally refused, and Louis XI, disappointed in his hopes and anticipations, became enraged against the pontiff, Jouffroy himself encouraging him in his opposition. The consequence was that, without directly re-establishing the Pragmatic Sanction, the king issued many decrees which practically did away with the concessions made by its revocation. Jouffroy's role in the whole affair is far from praiseworthy, and, in his memoirs, the pope accuses him of deception, false representations, and treachery. Pastor's judgment seems to be fully justified: "King Louis and Cardinal Jouffroy were a well matched pair."

Jouffroy became Bishop of Albi (10 Dec., 1462) and Abbot of St-Denis (1464). Several times he was sent by the king as ambassador to Rome and to Spain. He accompanied the expedition against the Duke of Armagnac besieged in Lectoure, but it is not certain that he took any part in the murder of the duke. Falling sick, he stopped at Rulli where he died. Jouffroy was a good orator, and his sermons were published in D'Achéry's "Spicilegium" (Paris, 1666). He was also a shrewd diplomat, but was not free from selfishness and ambition, which led him to use unfair means in the pursuit of his own ends.

FIERVILLE, *Le cardinal Jean Jouffroy et son temps* (Coutances, 1874); GRAPPIN, *Eloge historique de Jean Jouffroy* (Besancon 1785); PASTOR, tr. ANTROBUS, *History of the Popes, III, IV* (London, 1894); CHEVALIER, *Bio-bibl., II* (Paris, 1907), 2667.

C.A. DUBRAY

Louis Jouin

Louis Jouin

Linguist, philosopher, author, b. at Berlin, 14 June, 1818, d. at New York, 10 June, 1899. He was descended from a French Huguenot family, which had been forced by the Edict of Nantes to take refuge in Prussia. After spending some time in a French school he went to Poland, where he entered the Catholic Church, and determined to embrace the priesthood. With considerable difficulty he secured his release from military service, renounced allegiance to the land of his birth, and made his way to Rome. He was admitted into the Jesuit Order, entering the novitiate of San Andrea, 20 Aug., 1841. He studied philosophy for three years in the famous Jesuit college, called the Roman College, and labored for a time at Reggio, at which place he was ordained priest on 30 April 1848, but was forced by the Revolution to flee the country. Accordingly in October, 1848, he came to America, remained in New York City till 1852, studied theology at Fordham, 1852-56, taught in Fordham College until 1859, and spent the following year at Sault-au Recollet, Canada. Returning to Fordham in 1860, he taught theology in the scholasticate (1860-3), and later (1866-72) filled various positions in the college. After a visit to England in 1872, he went to Guelph, Canada, and remained at this place till 1875. During 1875-6 he was in Montreal and during 1876-9 at St. Francis Xavier's, New York. In 1879 he returned to Fordham, where he remained until his death.

As a teacher he occupied in Italy, Canada, and the United States the chairs of science, mathematics, and theology; but it was to philosophy that he gave the best part of the fifty-eight years he spent in the Society of Jesus, teaching it year after year, especially to young college students, with remarkable conciseness and clearness. Indeed it may be said that his life-work consisted in sowing the seeds of truth in the minds of American youth, and thus guarding them against the insidious errors of the times. For the use of his scholars, he prepared, either in lithograph or in print, various treatises on philosophical and scientific subjects. Unfortunately, only a few of these were given to the public. His published works are: "Elementa Logicae et Metaphysicae" (4th ed., New York, 1884); "Elementa Philosophiae Moralis" (New York, 1886); "Evidences of Religion" (1877); "Logic and Metaphysics", and "What Christ Revealed". Father Jouin was an accomplished linguist, speaking with fluency German, French, Italian, Spanish,

English, Polish, and Latin, besides being well versed in Greek, Hebrew, and Gaelic. He was a skilled moralist, and for many years presided over the theological conferences of the Archdiocese of New York. His practical piety, acquaintance with ascetic literature, and deep knowledge of men caused him to be much sought after as a spiritual director and as a preacher of retreats.

Woodstock Letters, XXIX, 75.

J.H. FISHER

Joseph de Jouvancy

Joseph de Jouvancy

(JOSEPHUS JUVENCIUS).

Poet, pedagogue, philologist, and historian, b. at Paris, 14 September, 1643; d. at Rome, 29 May, 1719. At the age of sixteen he entered the Society of Jesus, and after completing his studies he taught grammar at the college at Compiègne, and rhetoric at Caen and La Fleche. He made his profession at the latter place in 1677 and was afterwards appointed professor at the College Louis-le-Grand at Paris. In 1699 he was called by his superiors to Rome to continue the history of the Society of Jesus begun by Orlandini, and was engaged on this work until his death. Jouvancy wrote largely upon those topics which engaged his attention as a member of the order. He composed about ten tragedies, all of which were published at Paris, and several of which were frequently acted. It is not certain, however, that all the dramas ascribed to Jouvancy were written by him, for some of them are also attributed to other members of the order. Jouvancy also wrote many poems in Latin and Greek for special Occasions. He had a masterly knowledge of classical Latin and procured the translation into Latin of many works in other languages, as the funeral oration over Prince Henri de Bourbon, oldest son of Louis XIV, delivered in December, 1683, at Paris by the celebrated pulpit orator Bourdaloue, "Cleander et Eudoxius", a translation of the "Entretiens de Cléandre et d'Eudoxe" of Father Daniel. This latter work is a refutation of the accusations brought against the Society of Jesus by its enemies; in 1703 it was put on the Index. The translation of the theological letters of Father Daniel to the Dominican Father Alexander Natalis contains a comparison of the teachings of St. Thomas and of the theologians of the Society of Jesus concerning Probabilism and its relation to Divine grace. In 1704 appeared Jouvancy's "Appendix de Diis et heroibus poeticis", a widely read work which was a translation of Father Gautruche's "Histoire poétique pour l'intelligence des poètes et auteurs anciens". Jouvancy also translated into Latin biographies, written by other Jesuits, of the saints of the order, St. Stanislaus Kostka and St. John Francis Regis.

Jouvancy edited a large number of school editions of Latin authors. The text was always revised suitably to school use, was altered in many places with classical elegance, and supplied with learned foot- notes, partly explanatory of the details given by the author, partly on the style and grammatical construction; these editions were frequently reissued both in France and other countries. To some of the later editions translations were added. Worthy of special praise were the editions of the "Comedies" of Terence, the "Odes" and "Liber de arte poetica" of Horace, the "Epigrams" of Martial, the "Metamorphoses" of Ovid, the philosophical writings of Cicero, as "De officiis", "Cato Major", and "Laelius". Jouvancy's "Institutiones poeticae", published in 1718 and often reprinted, was another work intended for use in teaching. A number of editions also appeared of his "Novus apparatus graeco-latinus, cum interpretatione gallica". This work, based on Isocrates, Demosthenes, and the leading Greek authors, was not only much superior to the lexicons then used, but was also intended to encourage the cultivation of the mother tongue, as well as the study of the two classical languages. Jouvancy also delivered many orations and eulogies, for example on Louis XIV, his family, and his government, in externals so brilliant for France, on the churches of Paris and the French nation. These were published in two volumes and from 1701 frequently reprinted.

A work of special importance was Jouvancy's "Christianis litterarum magistris de ratione discendi et docendi" (Paris, 1691). In 1696 he was commissioned by the Fourteenth Congregation of the Society to adapt this work as a guide and method for the classical studies of the members of the Society. After careful examination of the manuscript by a commission of the order, it was published at Florence in 1703 as an official textbook under the title: "Magistris scholarum inferiorum Societatis Jesu de ratione discendi et docendi". This edition was the basis of all later ones. In this pioneer work Jouvancy took the first steps in the method for the study of philology which was developed by the great investigators of antiquity of the nineteenth century at the German universities. Latin is and remains the central point of instruction, even though Greek and the historical branches are not neglected. The art of the teacher may be separated into two main divisions: by the example of his own piety and virtue the teacher is to lead the pupil to the knowledge and service of the Creator; he is to bring the pupil to apply himself to his actual studies by fear of humiliation and an honorable spirit of competition. The principles of the "De ratione discendi et docendi" were used as a standard in all the Jesuit colleges of the German assistance.

After he was called to Rome, Jouvancy labored on the second half of the fifth part of the history of the Society of Jesus, which embraced the period 1591-1616. The work was forbidden in France by decrees of Parlement of 22 February and 24 March, 1715, because it expressed opinions contravening the royal rights of sovereigns, that is, op-

posing the royal absolutism of the Bourbons. In Rome as well the work was placed in part on the Index by decree of 29 July, 1722, because in some passages it contradicted the papal decree "De ritibus Sinensibus" *quibus deletis liber permittitur* (which being destroyed, the book is permitted). According to documents in the archives of the order this part of Jouvancy's book was written before the publication of the papal decree (Reusch, "Index der verbotenen Bücher", 2 vols., I, Bonn, 1885, 772 sq.).

SOMMERVOGEL, *Bibl. de la c. de J.* (Paris, 1893), bibliographies in IX, X; SCHWICKERATH, *Lern- und Lehrmethode von Joseph Juvencius in Bibliothek der katholischen Padagogik*, X (Freiburg im Br., 1898).

KARL HOEBER

Jean Jouvenet

Jean Jouvenet

Surnamed The Great.

French painter, b. at Rouen in 1644, d. at Paris, 5 April, 1717. In his family, of Italian extraction, the painting instinct was hereditary. Noel Jouvenet, his grandfather who had settled in Normandy, is believed to have been the teacher of Poussin, while to Laurent Jouvenet, his father, Jean owed his early instruction in art, before he was sent by him to Paris in 1660. At that time the goldsmiths' guild in the city planted a tree each year on 1 May in the enclosure of Notre Dame, and presented a painting for the altar of Our Lady. The greatest artists of the age painted some of these works, which were known as *mais*. Jouvenet executed the painting for the year 1673, the subject being the "Cure of the Paralytic". His performance attracted the attention of Lebrun, who enrolled the author in the group of artists then engaged in decorating the palace of Versailles, under the direction of the "premier peintre". Jouvenet was elected to the Academy in 1675, and was appointed professor in 1681. However it was not till some time later, after the death of Lebrun (1692), that he came into prominence. In truth, French painting hitherto almost completely under the influence of the Italian schools, and following under Lebrun the tradition of Rome and Bologna, was just commencing to free itself. A new tradition, traceable to Rubens, who had in 1628 painted in the Palais du Luxembourg (the famous *Galerie de Medicis*, now in the Louvre), was daily gaining strength. Artists were divided into "Rubenists" and "Poussinists", the partisans of form and the champions of color. This artistic strife continued during the whole of the latter part of the reign of Louis XIV. Jouvenet played a decisive part in the struggle. Never having been in Italy, he could form an impartial judgment of the merits and claims of the Roman school. With La Fosse and Antoine Coyppel, he was one of those

who contributed most to the work of transformation, which resulted in the rise of the eighteenth century school of artists.

Jouvenet's paintings for the *Salons* of 1699 and 1704 were the manifesto of the new school. The most important of them are preserved in the Louvre. The first is the famous "Descent from the Cross" (1697), which hangs in the Salon Carré—a free translation of Rubens' masterpiece in the cathedral of Antwerp. Eloquent and impressive, distinguished by a sentiment of massiveness and color, and by its tonality at once low and elaborate, it was destined to exert a profound influence on the school. With the painting by Largillière in St-Etienne du Mont (1696), it occupies a most important place in the history of French painting, in which it is one of the principal dates. In the Salon of 1704 Jouvenet presented the four works, each twenty feet long, intended for the church of St-Martin des Champs (but now in the Louvre): "The Repast at the House of Simon", "The Expulsion of the Sellers from the Temple", and especially the "Raising of Lazarus" and the "Miraculous Draught of Fishes". Attention has often been called to the fact that the artist went to Dieppe expressly to prepare himself to execute this last-named picture. We might point out also that it is strongly reminiscent of the Rubens preserved in Mechlin. Louis XIV was so delighted with these works that he had them reproduced in tapestry by the Gobelins, and it was this tapestry that impressed Tsar Peter the Great so much in 1717, that he wished to take it away with him, believing it to be the greatest of masterpieces. Meanwhile Jouvenet, who was now the recognized head of the new school, was selected to work at the two decorative groups which express most accurately the characteristics of the new tradition: the dome of the Hôtel des Invalides (1700-6) and the chapel of Versailles (1709). For the former he painted twelve colossal figures of the Apostles, and for the latter, over the royal tribune, a "Descent of the Holy Ghost".

Jouvenet was director of the Academy from 1705 till 1708. In 1713 he was stricken with apoplexy and his right hand became paralyzed. Far from being discouraged by this, he actually acquired, though now seventy years of age, a facility for painting with his left hand, and thus executed his last two works, the ceiling in the Palais de Justice at Rouen (it has now perished, there remains only a sketch of it preserved in the Louvre) and the "Magnificat" in the choir of Notre-Dame. Jouvenet is far from being a great master, but he is a striking personality in the realms of art. His works, theatrical and often declamatory, but honest and powerful, do not excite emotion, though one can still easily understand their great historic importance. They taught painting to the French school which had forgotten it. The whole body of great decorators in the eighteenth century—men like Coypel, de Troy, Restout, Van Loo, and Doyen—follow in his footsteps, and Ingres was not mistaken in grouping them under the title of the "School of Jouvenet". His chief paintings outside the Louvre are in the galleries of

Amiens, Rouen, Nancy, Grenoble, Nantes, Rennes, and Toulouse. We have still some admirable portraits by him, as that of Fagon, physician to Louis XIV (in the Louvre) and that of Bourdaloue—now only known by the engraving, which has given rise to so much discussion as to whether the great orator preached with his eyes closed.

LOUIS GILLET

Gaspar Melchor de Jovellanos

Gaspar Melchor de Jovellanos

(Also written JOVE-LLANOS).

Spanish statesman and man of letters, at Gijon, Asturias, 5 Jan., 1744, d. at Puerto de Vega on the borders of Asturias, 27 Nov., 1811. Intended at first for the Church, he received his preliminary training at the University of Oviedo, whence he passed to the University of Avila and later to that of Alcalá. In the latter institution he spent two years, continuing his study of canon law. His uncle, the Duke of Losada, did not look with favor on the idea the young man devoting himself to an ecclesiastical career, and advised him to direct his course towards the practice of law as a layman. This he did, after having already received the tonsure, and ere long he was made a judge in the criminal court of Seville, from which post he rose to higher places on the bench. While at Seville, he interested himself in the development of the mechanical, agricultural, and general economic arts, and made earnest endeavors to improve the lot of the laboring man. At the same time he commenced his literary career writing documents embodying his views as to social improvements as well as some occasional lyric verse, his tragedy "Pelayo", and his comedy "El delincuente honrado". With the exception of the "El sí de las niñas" of Moratin, the last-named work was the best play that had appeared in Spanish for many years. Written in prose, it represents the introduction into Spain of that form of the sentimental drama, or melodrama, which had been developed in French, as the *drame larmoyant* or *drame bourgeois*, by Diderot and La Chaussée. The "Pelayo" is a less meritorious work. In 1778 King Carlos III transferred him to the courts in the capital. Verse written at this moment shows the regret which he felt at having to leave Seville for Madrid. Once in the metropolis, he was promptly enrolled in the learned societies, among which were the Academia de la Historia, and the Aca-

demia Española, and his association with these led to the production by him of various scientific and literary compositions. Carlos III died in 1788. A month before that event, Jovellanos had written his "Elogio de Carlos III", in which he did justice to that enlightened monarch's attempts to make the nation prosperous through the adoption of progressive methods.

Like the king, Jovellanos had been deeply interested in the encouraging and bettering of agricultural pursuits, and in his "Informe sobre la ley agraria" set forth the evils that confronted the willing husbandman and the necessary reforms. He had formed a friendship with the statesman Cabarrús, and, when in 1790 the latter incurred disfavor, he was compelled to leave Madrid also. Going into virtual exile, he visited his own Asturian region with the ostensible mission of a commissioner to examine the coal-mining facilities of the district. Remaining several years at home, he there founded the "Real Instituto Asturiano", which still exists. Then, to his great surprise, he was appointed minister of justice, and proceeded to Madrid to take up his portfolio under Godoy. He held it during a good part of 1797-9, but with the fall of Godoy he lost his office and had to return to Gijon. There he was arrested in 1801 and carried off to Majorca where he was kept a prisoner until 1808, in which year he was released by order of Prince Ferdinand. Coming to the mainland, he was notified that Joseph Bonaparte had named him minister of the interior. He refused, accepting instead a place on the national *Junta Central*, as the representative of Asturias. After directing for a while the operations of the Junta, he was obliged to flee before the advance of the French, and embarked at Cadiz on board of a vessel for his native province. He encountered many vicissitudes, and died of pneumonia at one of his landing-places, Puerto de Vega.

J.D.M. FORD

Flavius Claudius Jovianus

Flavius Claudius Jovianus

Roman Emperor, 363-4. After the death of Julian the Apostate (26 June, 363), the army making war on Persia and then in retreat from Assyria proclaimed Jovianus emperor, after the prefect of the guard, Sallustius, a confidant of Julian, had refused the dignity on account of his advanced age. Jovianus was a son of the distinguished Count (*Comes*) Varronianus and a native of Pannonia. Though at that time less than

thirty-three, he held the rank of captain in the imperial bodyguard. His election was hailed with joy by the Christians, since from him they could expect religious toleration. Although Jovianus had a warlike appearance, he lacked the spirit and decision of a soldier and leader of men. Therefore he accepted the conditions of peace offered by Shapur (Sapor), the crafty Persian king, and agreed to restore the boundaries of the empire as they existed before the peace with Diocletian in 297. The four satrapies east of the Tigris, with the fortified cities of Nisibis and Singara, were relinquished contrary to the wishes of the inhabitants, who were hostile to Persia, and the ancient connection between the Roman Empire and Armenia was severed. In return, the Roman army was permitted to retreat to the right bank of the Tigris without molestation. This weak agreement destroyed at one blow the Roman supremacy over the country about the Euphrates and Armenia, and Persia henceforth dominated the hither Orient. Under great difficulties Jovianus marched with the army from Mesopotamia to Antioch and thence to Tarsus, where he caused the mausoleum of his predecessor to be adorned. On 16 February, 364, during the march to Constantinople, the emperor was overtaken by a sudden death in the Bithynian frontier town of Dadastana, having been suffocated by coal gas in his bed-chamber, though possibly assassinated (Socrates, III, xx-xxv; VI, iii-vi). His body was brought to Constantinople and buried in the church of the Apostles beside that of Constantine. Jovianus was a zealous and orthodox Christian. He restored to the Church the privileges granted by Constantine and withdrawn by Julian. Athanasius, then seventy, was permitted to return from exile to Alexandria. In a general edict of toleration, he established freedom for all forms of worship, even paganism, but forbade magical sacrifices, reintroducing the religious toleration proclaimed by Constantine in his Milan Edict of 313.

KARL HOEBER

Jovianus

Jovianus

An opponent of Christian asceticism in the fourth century, condemned as a heretic (390). Our information about him is derived principally from the work of St. Jerome in two books, "Adversus Jovinianum". He was a monk at one time in his life, but sub-

sequently an advocate of anti-ascetical tendencies. He became the head of a party, and in the act condemning him Auxentius, Genialis, Germinator, Felix, Prontinus, Martianus, Januarius and Ingeniosus are designated as his disciples. His views were promulgated in writings which were condemned at a synod held in Rome under Pope Siricius, and subsequently at a synod convened at Milan by St. Ambrose. The writings of Jovinianus were sent to St. Jerome by his friend Pammachius; Jerome replied to them in a long treatise written in 393. From this work it would appear that Jovinianus maintained

- that a virgin as such is no better in the sight of God than a wife;
- abstinence is no better than the partaking of food in the right disposition;
- a person baptized with the Spirit as well as water cannot sin;
- all sins are equal;
- there is but one grade of punishment and one of reward in the future state.

From a letter of the synod at Milan to Pope Siricius (Ambrose, Ep. xlii) and from St. Augustine (lib. I contra Julian., ii) it is clear that Jovinianus denied also the perpetual virginity of the Blessed Virgin Mary. The reply of St. Jerome was couched in language that terrified Pammachius, who found fault with it because it was excessive in praise of virginity and in depreciation of marriage. The efforts to suppress it failed and St. Jerome's work obtained a wide circulation. Nothing is known of the later career of Jovinianus. From a remark in St. Jerome's work against Vigilantius, written in 409, that he "amidst pheasants and pork rather belched out than breathed out his life", it is inferred that he was then dead.

PATRICK J. HEALY

Paulus Jovius

Paulus Jovius

(GIOVIO).

Historian, b. at Como, Italy, 9 April, 1483, d. at Florence, 11 Dec., 1552. Having completed his medical studies at Padua and received the degree of doctor, he was attracted by the princely liberality of Pope Leo X, and betook himself to Rome. Here he practiced his profession, but also devoted himself to historical studies, particularly as to his own time. Knowing how to secure access to rich sources of information, he resolved to utilize his extensive materials in a comprehensive work, which would embrace all the countries of Europe, beginning with the expedition of Charles VIII of France into Italy and the conquest of Naples. Having completed the first part, he managed to obtain permission to read it to the Holy Father. The latter was so struck by the elegance of the language and the skill of the narration that he conferred knighthood on Jovius, and appointed him professor of rhetoric at the Roman University. Adrian VI made him a canon of the cathedral of Como, and Clement VII appointed him Bishop of Nocera in 1528 to compensate him for the substantial loss which he had sustained in consequence of the capture of Rome. He sought under Paul III to be transferred to the See of Como; and, as his efforts to this end remained unavailing, he gave up Nocera in 1543 from sheer vexation, and went to Como, whence in 1550 he made his way to Florence.

He was, as his writings show, a child of his own time. He led a life of pleasure little in accord with Christian precepts, was in active touch with the leading humanists, and was a zealous collector of works of art especially of portraits, which he brought together in a considerable museum. This did not, however, prevent him from laboring steadily on his main work and completing it with new material. Despite all urgings, he did not begin to print it until 1550, but completed this task very shortly before his death. Under the title, "*Historiarum sui temporis libri XLV*", the work appeared in two volumes at Florence, and later at Basle (1560), an Italian translation also appearing in Florence (1551-3). He gives us here a very clear recital of events from 1494 to 1544, and, while he does not always succeed in unveiling the hidden and interwoven causes and effects of things, he shows himself a true historian. Naturally, very different estimates have been formed of his work. It has been at times sharply criticized, chiefly because Jovius is too enamored of himself, and does not hesitate to declare openly that he will dress up a character in gold, brocade, or common cloth, according to the fee which such portrayal may yield him as compensation. However, it is certain that he does not always follow so reprehensible a principle, for he not infrequently tells the bluntest truths to his own greatest benefactors. Of his other works we should mention: "*Vitae virorum illustrium*" (7 vols., Florence, 1549-57); "*Elogia virorum bellica virtute illustrium*" (Florence, 1554). His biography of the art-loving Medici pope is drawn with a background of such glowing colors, that one almost loses sight of the shadows which darken his reign. His Italian letters, in part highly interesting, were published by Domenichi,

"Lettere volgari" (Venice, 1560). His collected works appeared in three folio volumes at Basle in 1678.

PATRICIUS SCHLAGER

Henri, Duc de Joyeuse

Henri, Duc de Joyeuse

Born in 1563 and not, as is mistakenly stated in the "Biographic Michaud", in 1567; died at Rivoli, 28 Sept., 1608. He was the third son of Maréchal Guillaume de Joyeuse, and was a brother of the Admiral Anne de Joyeuse and of the prelate François de Joyeuse. As a young man, when he was known as the Comte de Bouchage, he felt attracted to the religious life and confided this desire to the guardian of the Cordeliers of Toulouse. But yielding to the pressure of his family he married Catherine de la Valette, sister of the Duc d'Epéron; and he fought in Languedoc and Guienne against the Huguenots. His inclination for the religious life endured, however, and he and his wife exchanged a promise that one of them should enter religion on the death of the other. Catherine died, and a few weeks later, 4 September, 1587, Joyeuse received the habit in the convent of the Capuchins in the Rue Saint-Honoré, Paris, from the hands of Father Bernard Dorzimo, taking the name of Père Ange. This step occasioned great stir. The "Venerable" P. Honoré of Paris (Charles Bochart de Champigny) owed to the example of Joyeuse the impulse which caused him to enter the cloister. When in October, 1587, two brothers of Joyeuse were killed at Coutras, he overcame the strong temptation he felt to become a soldier again in order to avenge them. When, after the Day of Barricades (see GUISE, HOUSE OF), 12 May, 1588, the bourgeoisie and people of Paris wished to recover the good graces of Henry III, who had sought refuge at Chartres, they sent as a first embassy a procession of Capuchins, at whose head was Père Ange bearing a cross and flogged by two other monks, while the people implored mercy. On 18 August, 1588, P. Ange, in conformity with the Franciscan rule, drew up his will, which was afterwards ratified on the morrow by Henry III, and which Father Ubald (d'Alençon) has recently recovered and published. This formality finished he was able to make his profession in December, 1588. He was sent to Italy to study Theology.

In 1592 he was guardian of the Capuchins of Arles and on his way to Toulouse when his younger brother, Scipio de Joyeuse, drowned himself in the Tarn after the defeat of Villemur. The Cardinal de Joyeuse, the Parlement, and the clergy all thought

of placing P. Ange in command of the troops against the Huguenots as Governor of Languedoc. The pope released him from his vows. The Capuchin who had once more become a soldier fought valiantly, and then assembled the States of Languedoc at Carcassonne to take measures for bringing about peace. He agreed with the Maréchal de Montmorency, his godfather, on a truce of three years, which was soon followed by a general peace owing to the abjuration of Henry IV. Henry IV named him marshal of France, grand master of the wardrobe, and Governor of Languedoc. But after he had married his daughter to the Duc de Montpensier, recalling the counsel given him in July, 1595, by his dying mother, and sensitive to the words of Henry IV who had called him an "unfrocked Capuchin", Joyeuse joined (8 February, 1599) the Capuchins in the Rue Saint-Honoré. In 1600 he preached again at Paris, notably in Saint-Germain l'Auxerrois, before the king and the court. The discussions which then took place in the pulpit between Père Brulart de Sillery and Père Ange de Joyeuse on the inviolability of marriage, drew upon the Capuchins the displeasure of Henry IV, who had dissolved his marriage with Queen Margaret. In turn guardian of the convent of Toulouse, provincial of France, founder of the Capuchin convent at Nevers, guardian in Paris of the convent in the Rue Saint-Honoré (1606) he went to Rome, in 1608, to attend the general chapter of his order. Here he was made definitor-general and, through the intervention of Cardinal de Givry, obtained permission to leave Rome, where the pope wished to retain him. Having set out 10 August, 1608, he was attacked by fever at Rivoli. He was buried in the church of the Capuchins in the Rue Saint-Honoré. His biographer Jacques Brousse has preserved some fragments of his sermons. Bernard of Bologna, in the "Bibliotheca script. Cap." (1747), mentions one of his works entitled "Flamma divini amoris", which seems to have been lost. The pleasantries of Voltaire's "Henriade" with regard to the "warrior monk" have too often caused the actual facts to be forgotten and have inflicted on an ardent and pious friar an obloquy not sustained by historical truth.

GEORGES GOYAU

Juan Bautista de Toledo

Juan Bautista de Toledo

An eminent Spanish sculptor and architect; b. at Madrid (date not known); d. there 19 May, 1567. In 1547 he went to Rome and studied under the influence of Michelangelo Buonarroti. Afterwards he went to Naples, having been sent for by the Viceroy, Don Pietro de Toledo, who engaged him as architect to the emperor, Charles V. He designed and superintended many important works in that capital. Among others, the Strada di Toledo (since 1870 called Strada di Roma), the church of Santiago or S. Giacomo degli Spagnuoli; the square bastions to the Castello Nuovo; a large palazzo at Poselipo, or Pauselipo, and a number of fountains. In 1559, at the summons of Philip II, he went to Madrid and was appointed architect-in-chief of the royal works in Spain. His yearly salary as architect to the Crown was at first not more than 220 ducats, Philip's policy, with his Spanish artists at least, being to assign them moderate allowances until he had tested their abilities. At Madrid he designed the Casa de la Misericordia and the façade of the church de las Descalzas Reales; works at Aceca; at the palace of Aranjuez; at Martininos de las Posadas, the palace of Cardinal Espinosa, and a villa at Esteban de Ambran for the secretary D. de Vargas. Toledo soon began his plan for the Escorial, of which he saw the first stone laid on 23 April, 1563, and he superintended the work till his death. He was generally considered an architect of much merit, well-versed in philosophy, mathematics, and the belles-lettres, and endowed with all those qualities which Vitruvius considers necessary to form a good architect.

STIRLING-MAXWELL, *Annals of the Artists of Spain* (London, 1891); MILIZIA, *Lives of Celebrated Architects; Dictionary of Architecture*, issued by Architectural Publication Society (London).

THOMAS H. POOLE

Jubilate Sunday

Jubilate Sunday

The third Sunday after Easter, being so named from the first word of the Introit at Mass—" *Jubilate* Deo omnis terra" (ps. Ixv). In the liturgy for this and the two following Sundays, the Church continues her song of rejoicing in the Resurrection. Throughout the whole of Paschaltide both Office and Mass are expressive of Easter joy, Alleluia being added to every antiphon, responsory, and versicle, and repeated

several times in the Introits and other parts of the Mass. The Introit for this day is an invitation to universal joy; the Epistle exhorts all, especially penitents and the newly baptized, to obey loyally the powers that be and to show themselves worthy disciples of the Risen Christ; and the Gospel gives similar advice, encouraging us to bear patiently the trials of this life in view of the heavenly joys that are to come hereafter.

G. CYPRIAN ALSTON

Holy Year of Jubilee

Holy Year of Jubilee

The ultimate derivation of the word *jubilee* is disputed, but it is most probable that the Hebrew word *jobel*, to which it is traced, meant "a ram's horn", and that from this instrument, used in proclaiming the celebration, a certain idea of rejoicing was derived. Further, passing through the Greek *iobelaios*, or *iobelos*, the word became confused with the Latin *jubilo*, which means "to shout", and has given us the forms *jubilatio* and *jubilaeum*, now adopted in most European languages.

OLD TESTAMENT ORIGINS

For the Israelites (see Hebrew Year of Jubilee), the year of Jubilee was in any case preeminently a time of joy, the year of remission or universal pardon. "Thou shalt sanctify the fiftieth year," we read in [Leviticus 25:10](#), "and shalt proclaim remission to all the inhabitants of thy land: for it is the year of jubilee." Every seventh year, like every seventh day, was always accounted holy and set aside for rest, but the year which followed seven complete cycles was to be kept as a sabbatical year of special solemnity. The Talmudists and others afterwards disputed whether the Jubilee Year was the forty-ninth or the fiftieth year, the difficulty being that in the latter case two sabbatical years must have been observed in succession. Further, there are historical data which seem to show that in the age of the Machabees the Jubilee of the fiftieth year could not have been kept, for 164-163 B.C. and 38-37 B.C. were both certainly sabbatical years, which they could not have been if two sabbatical years had been intercalated in the interval. However, the text of Leviticus (25:8-55) leaves no room for ambiguity that the fiftieth year was intended, and the institution evidently bore a close analogy with the feast of Pentecost, which was the closing day after seven weeks of harvest. In any case it is certain that the Jubilee period, as it was generally understood and adopted afterwards in the Christian Church, meant fifty and not forty-nine years; but at the same time the

number fifty was not originally arrived at because it represented half a century, but because it was the number that followed seven cycles of seven.

It was, then, part of the legislation of the Old Law, whether practically adhered to or not, that each fiftieth year was to be celebrated as a jubilee year, and that at this season every household should recover its absent members, the land return to its former owners, the Hebrew slaves be set free, and debts be remitted.

THE CHRISTIAN JUBILEE

The same conception, spiritualized, forms the fundamental idea of the Christian Jubilee, though it is difficult to judge how far any sort of continuity can have existed between the two. It is commonly stated that Pope Boniface VIII instituted the first Christian Jubilee in the year 1300, and it is certain that this is the first celebration of which we have any precise record, but it is also certain that the idea of solemnizing a fiftieth anniversary was familiar to medieval writers, no doubt through their knowledge of the Bible, long before that date. The jubilee of a monk's religious profession was often kept, and probably some vague memory survived of those Roman *ludi saeculares* which are commemorated in the "Carmen Saeculare" of Horace, even though this last was commonly associated with a period of a hundred years rather than any lesser interval. But, what is most noteworthy, the number fifty was specially associated in the early thirteenth century with the idea of remission. The translation of St. Thomas of Canterbury took place in the year 1220, fifty years after his martyrdom. The sermon on that occasion was preached by Stephen Cardinal Lantron, who told his hearers that this accident was meant by Providence to recall "the mystical virtue of the number fifty, which, as every reader of the sacred page is aware, is the number of remission" (P.L., CXC, 421).

We might be tempted to regard this discourse as a fabrication of later date, were it not for the fact that a Latin hymn directed against the Albigenses, and certainly belonging to the early thirteenth century, speaks in exactly similar terms. The first stanza runs thus:

Anni favor jubilaei
Poenarum laxat debitum,
Post peccatorum vomitum
Et cessandi propositum.
Currant passim omnes rei.
Pro mercede regnum Dei
Levi patet expositum.

In the light of this explicit mention of a jubilee with great remissions of the penalties of sin to be obtained by full confession and purpose of amendment, it seems difficult to reject the statement of Cardinal Stefaneschi, the contemporary and counsellor of Boniface VIII, and author of a treatise on the first Jubilee ("De Anno Jubileo" in La Bigne, "Bibliotheca Patrum", VI, 536), that the proclamation of the Jubilee owed its origin to the statements of certain aged pilgrims who persuaded Boniface that great indulgences had been granted to all pilgrims in Rome about a hundred years before. It is also noteworthy that in the Chronicle of Alberic of Three Fountains, under the year 1208 (not, be it noted 1200), we find this brief entry: "It is said that this year was celebrated as the fiftieth year, or the year of jubilee and remission, in the Roman Court" (Pertz, "Mon. Germ. Hist.: Script." XXIII, 889). It is beyond all dispute that on 22 February, 1300, Boniface published the Bull "Antiquorum fida relatio", in which, appealing vaguely the precedent of past ages, he declares that he grants afresh and renews certain "great remissions and indulgences for sins" which are to be obtained "by visiting the city of Rome and the venerable basilica of the Prince of the Apostles". Coming to more precise detail, he specifies that he concedes "not only full and copious, but the most full, pardon of all their sins", to those who fulfill certain conditions. These are, first, that being truly penitent they confess their sins, and secondly, that they visit the basilicas of St. Peter and St. Paul in Rome, at least once a day for a specified time--in the case of the inhabitants for thirty days, in the case of strangers for fifteen. No explicit mention is made of Communion, nor does the word *jubilee* occur in the Bull--indeed the pope speaks rather of a celebration which is to occur every hundred years--but writers both Roman and foreign described this year as *annus jubileus*, and the name *jubilee* (though others, such as the "holy year" or "the golden year" have been used as well) has been applied to such celebrations ever since. Dante, who is himself supposed by some to have visited Rome during this year to gain the Jubilee, refers to it under the name *Giubbileo* in the *Inferno* (xviii, 29) and indirectly bears witness to the enormous concourse of pilgrims by comparing the sinners passing along one of the bridges of Malebolge in opposite directions, to the throngs crossing the bridge of the Castle Sant' Angelo on their way to and from St. Peter's. Similarly, the chronicler Villani was so impressed on this occasion by the sight of the monuments of Rome and the people who flocked thither that he then and there formed the resolution of his great chronicle, in the course of which he gives a remarkable account of what he witnessed. He describes the indulgence as a full and entire remission of all sins *di culpa e di pena*, and he dwells upon the great contentment and good order of the people, despite the fact that during the greater part of that year there were two hundred thousand pilgrims on an average present in Rome over and above the ordinary population. With regard to the phrase just noticed, *a culpa et a poena*, which was often popularly used of the

Jubilee and other similar indulgences, it should be observed that it means no more than what is now understood by a "plenary indulgence". It implied, however, that any approved Roman confessor had faculties to absolve from reserved cases, and that the liberty thus virtually accorded of selecting a confessor was regarded as a privilege. The phrase was an unscientific one, and was not commonly used by theologians. It certainly did not mean, as some have pretended, that the indulgence of itself released from guilt as well as penalty. The guilt was remitted only in virtue of sacramental confession and the sorrow of the penitent. The sovereign pontiff never claimed any power of absolving in grievous matters apart from these. "All theologians", remarks Maldonatus with truth, "unanimously without a single exception, reply that an indulgence is not a remission of guilt but of the penalty." (See Paulus in "Zeitschrift f. kath. Theologie", 1899, pp. 49 sqq., 423 sqq., 743 sqq., and "Dublin Review", Jan., 1900, pp. 1 sqq.)

The Jubilee of 1350. As we have seen, Boniface VIII had intended that the Jubilee should be celebrated only once in a hundred years, but some time before the middle of the fourteenth century, great instances, in which St. Bridget of Sweden and the poet Petrarch amongst others had some share, were made to Pope Clement VI, then residing at Avignon, to anticipate this term, particularly on the ground that the average span of human life was so short as otherwise to render it impossible for many to hope to see any Jubilee in their own generation. Clement VI assented, and in 1350 accordingly, though the pope did not return to Rome himself. Gaetani Cardinal Ceccano was dispatched thither to represent His Holiness at the Jubilee. On this occasion daily visits to the church of St. John Lateran were enjoined, besides those to the basilicas of St. Peter and St. Paul without the walls, while at the next Jubilee, St. Mary Major was added to the list. The visit to these four churches has remained unchanged ever since as one of the primary conditions for gaining the Roman Jubilee.

The Jubilees of 1390 and 1423. The celebration next following was held in 1390, and in virtue of an ordinance of Urban VI, it was proposed to hold a Jubilee every thirty-three years as representing the period of the sojourn of Christ upon earth and also the average span of human life.

Another Jubilee was accordingly proclaimed by Martin V in 1423, but Nicholas V, in 1450, reverted to the quinquagesimal period, while Paul II decreed that the Jubilee should be celebrated every twenty-five years, and this has been the normal rule ever since.

Subsequent Jubilees. The Jubilees of 1450 and 1475 were attended by vast crowds of pilgrims, and that of 1450 was unfortunately made famous by a terrible accident in which nearly two hundred persons were trampled to death in a panic which occurred on the bridge of Sant' Angelo. But even this disaster had its good effects in the pains taken afterwards to widen the thoroughfares and to provide for the entertainment and

comfort of the pilgrims by numerous charitable organizations, of which the Archconfraternity of the Holy Trinity, founded by St. Philip Neri, was the most famous.

On the other hand, it is impossible to doubt the evidence of innumerable witnesses as to the great moral renovation produced by these celebrations. The testimony comes in many cases from the most unexceptionable sources, and it extends from the days of Boniface VIII to the striking account given by Cardinal Wiseman ("Last Four Popes", pp. 270, 271) of the only Jubilee held in the nineteenth century, that of 1825. The omission of the Jubilees of 1800, 1850, and 1875 was due to political disturbances, but with these exceptions the celebration has been uniformly maintained every twenty-five years from 1450 until the present time. The Jubilee of 1900, though shorn of much of its splendour by the confinement of the Holy Father within the limits of the Vatican, was, nevertheless carried out by Pope Leo XIII with all the solemnity that was possible.

CEREMONIAL OF THE JUBILEE

The most distinctive feature in the ceremonial of the Jubilee is the unwalling and the final walling up of the "holy door" in each of the four great basilicas which the pilgrims are required to visit. It was formerly supposed that this rite was instituted by Alexander VI in the Jubilee of 1500, but this is certainly a mistake. Not to speak of a supposed vision of Clement VI as early as 1350, who is said to have been supernaturally admonished to "open the door", we have several references to the "holy door" or the "golden gate" in connection with the Jubilee long before the year 1475. The earliest account seems to be that of the Spanish pilgrim, Pero Tafur, c. 1437. He connects the Jubilee indulgence with the right of sanctuary, which, he maintains, existed in pagan times for all who crossed the threshold of the *puerta tarpea* upon the site of the Lateran. He goes on to say that, at the request of Constantine, Pope Sylvester published a Bull proclaiming the same immunity from punishment for Christian sinners who took sanctuary there. The privilege, however, was grossly abused and the popes consequently ordered the door to be walled up at all seasons save certain times of special grace. Formerly the door was unwalling only once in a hundred years, this was afterwards reduced to fifty, and now it is said to be "opened at the will of the pope." However legendary all this may be, it is hardly possible that the story could have been quite recently fabricated at the time Tafur recorded it. Moreover, a number of witnesses allude to the unwalling of the holy door in connection with the Jubilee of 1450. One of these, the Florentine merchant Giovanni Rucellai, speaks of the five doors of the Lateran basilica,

one of which is always walled up except during the Jubilee year, when it is broken down at Christmas when the Jubilee commences. The devotion which the populace has for the bricks and mortar of which it is composed is such that at the unwalling, the fragments are immediately carried off by the crowd, and the foreigners (*gli oltremontani*) take them home as so many sacred relics. . . . Out of devotion every one who gains the indulgence passes through that door, which is walled up again as soon as the Jubilee is ended. (Archivio di Storia Patria, IV, 569-570)

All this describes a rite which has lasted unchanged to the present day, and which has nearly always supplied the principal subject depicted upon the long series of Jubilee medals issued by the various popes who have opened and closed the holy door at the beginning and end of each Jubilee year. Each of the four basilicas has its holy door. That of St. Peter's is opened on the Christmas Eve preceding the *anno santo* by the pontiff in person, and it is closed by him on the Christmas Eve following. The pope knocks upon the door three times with a silver hammer, singing the versicle "Open unto me the gates of justice". The masonry, which has been loosened beforehand, is made to fall in at the third blow, and, after the threshold has been swept and washed by the Jubilee penitentiaries, the pope enters first. Each of the holy doors at the other basilicas is similarly opened by a cardinal specially deputed for the purpose. The symbolism of this ceremony is probably closely connected with the idea of the exclusion of Adam and Eve from Paradise, and the expulsion and reconciliation of penitents according to the ritual provided in the Pontifical. But it may also have been influenced by the old idea of seeking sanctuary, as Tafur and Rucellai suggest. The sanctuary knocker of Durham Cathedral still remains to remind us of the important part which this institution played in the life of our forefathers.

THE JUBILEE INDULGENCE

This is a plenary indulgence which, as stated by Boniface VIII in Consistory, it is the intention of the Holy See to grant in the most ample manner possible. Of course, when first conceded, such an indulgence, and also the privilege annexed of choosing a confessor who had power to absolve from reserved cases, was a much rarer spiritual boon than it has since become. So preeminent was the favour then regarded that the custom arose of suspending all other indulgences during the Jubilee year, a practice which, with certain modifications, still obtains at the present day. The precise conditions for gaining each Jubilee are determined by the Roman pontiff, and they are usually announced in a special Bull, distinct from that which it is customary to issue on the preceding feast of the Ascension giving notice of the forthcoming celebration. The main conditions, however, which do not usually vary, are three: confession, Commu-

nion and visits to the four basilicas during a certain specified period. The statement made by some, that the Jubilee indulgence, being *a culpa et a paena*, did not of old presuppose either confession or repentance, is absolutely without foundation, and is contradicted by every official document preserved to us. Besides the ordinary Jubilee indulgence, to be gained only by pilgrims who pay a visit to Rome, or through special concession by certain cloistered religious confined within their monasteries, it has long been customary to extend this indulgence the following year to the faithful throughout the world. For this fresh conditions are appointed, usually including a certain number of visits to local churches and sometimes fasting or other works of charity. Further, the popes have constantly exercised their prerogative of conceding to all the faithful indulgences *ad instar jubilaei* (after the model of a jubilee) which are commonly known as "extraordinary Jubilees". On these occasions, as at the Jubilee itself, special facilities are usually accorded for absolution from reserved cases, though on the other hand, the great indulgence is only to be gained by the performance of conditions much more onerous than those required for an ordinary plenary indulgence. Such extraordinary Jubilees are commonly granted by a newly elected pontiff at his accession or on occasions of some unwonted celebration, as was done, for example, at the convening of the Vatican Council, or again at times of great calamity.

HERBERT THURSTON

Year of Jubilee (Hebrew)

Year of Jubilee (Hebrew)

According to the Pentateuchal legislation contained in Leviticus, a Jubilee year is the year that follows immediately seven successive Sabbatic years (the Sabbatic year being the seventh year of a seven-year cycle). Accordingly, the Jubilee year takes place at the end of seven times seven years, i.e. at the end of every forty-nine years, or the fiftieth. Hence, the institution of the Jubilee-year system is but an extension or the working out of the Sabbatic-year legislation, viz. that as at the end of every six years there succeeds a Sabbatic year, so at the end of each seven Sabbatic years there succeeds a Jubilee year. Arguing from the analogous Pentecostal system, it is evident that the actual year in which the Jubilee occurs is not the last of the seventh Sabbatic cycle (i.e. the forty-ninth year), but the year following, namely, the fiftieth. Hence, at the end of each forty-eight years there occur two consecutive fallow years, viz. the forty-ninth, or the Sabbatic year of the seventh Sabbatic cycle and the fiftieth, or the Jubilee year. From the nature and purpose of the Jubilee legislation, it is also evident that the Jubilee Year is to be reckoned with in itself absolutely, and not in relation to the length of time, or duration, of each particular event or contract. So that if, for example, the year

1950 is Jubilee Year, and an Israelite became a slave in the year 1930, this slave is to be set free not in 1980, but in 1950, which is the appointed year of Jubilee.

The term *jubilee year* (Vulg. *annus Jubilei*, or *Jubileus*) is of Hebrew origin, the etymological meaning of which is, in all probability, "ram", which metonymically stands for "the horn of a ram". Thus the name "the year of the blowing of the ram's horn" exactly corresponds to "the day of the blowing of the horn", or the "feast of the new year", and it was, like the latter, announced to the people by the blowing of the horn. In Ezechiel (xlv, 17) the Jubilee Year is called "the year of release"; hence some commentators have derived the Hebrew word for "Jubilee" from the stem which means "to emit", "to liberate". The first derivation, however, is more acceptable.

The legislation concerning the year of Jubilee is found in Leviticus, xxv, 8-54, and xxvii, 16-24. It contains three main enactments:

- rest of the soil;
- reversion of landed property to its original owner, who had been driven by poverty to sell it; and
- the freeing or manumission of those Israelites who, through poverty or otherwise, had become the slaves of their brethren.

The first enactment (contained in Leviticus, xxv, 11-12) enjoins that as in the case of each Sabbatic year, so in each Jubilee year the soil is to be at rest, and that there is to be no tillage nor harvest, but that what the land produces spontaneously and of its own accord is free to be utilized by all Israelites, including, of course, the landlord himself, but only for their own actual and immediate use and maintenance, and, consequently, not to be stored by anyone for any other time or purpose. The object of this law, as well as of the two following, is most commendable, as by it the poor and all those who, mainly on account of poverty, do not actually own any land, are hereby provided for, not only for a whole year every seven years, but also in every fiftieth year.

The second enactment, contained in Leviticus, xxv, 13-34, and xxvii, 16-24, enjoins that any owner of landed property, who, for reason of poverty or otherwise, has been compelled to part with his land, has the right to receive his property back free in the Jubilee year, or to redeem it even before the Jubilee year, if either his own financial circumstances have improved, or if his next of kin will redeem it for him by paying back according to the price which regulated the purchase. Hence, among the ancient Hebrews, the transfer of property was not, properly speaking, the sale of the land but of its produce for a certain number of years, and the price was fixed according to the number of years which intervened between the year of the sale and that of the next

year of jubilee. Accordingly, the right of possession of real estate was inalienable. Whether a landowner was ever allowed to part permanently with his property for speculation, or for any purpose other than poverty, is not explicitly stated, although according to later rabbinical interpretation, this was considered as legally unlawful. Real estate in walled towns was made an exception to this law. An owner who had sold was permitted to redeem his property provided he did so within a year, but not afterwards. Levitical cities, on the other hand, as well as all the property in them, came under the provisions of the general law, reverting back to their original owners in the year of jubilee. Land in the suburbs of such cities could not be disposed of, or traded with in any manner. In case a man dedicated property to the Lord, he was permitted to redeem it, provided he added to it one-fifth of its value as reckoned by the number of crops it would produce before the year of Jubilee, and provided, also, he redeemed it before that period. If not reclaimed then or before that period it was understood to be dedicated forever. The details of these exchanges of property probably varied at different times. Josephus informs us that the temporary proprietor of a piece of land made a settlement with its owner at the year of Jubilee on the following terms: after making a statement of the value of the crops he had obtained from the land, and of what he had expended upon it, if his receipts exceeded the expenses, the owner got nothing; but if the reverse was true, the latter was expected to make good the loss.

The third enactment (contained in Leviticus, xxv, 39-54) enjoins that all those Israelites who through poverty have sold themselves as slaves to their fellow-Israelites or to foreigners resident among them, and who, up to the time of the Jubilee year, have neither completed their six years of servitude, nor redeemed themselves, nor been redeemed by their relatives, are to be set free in the Jubilee year to return with their children to their family and to the patrimony of their fathers. Exception, of course, is made in the case of those slaves who refuse to become free at the expiration of the appointed six years' servitude. In this case they are allowed to become slaves forever and, in order to indicate their consent to this, they are required to submit to the boring of their ears (Ex., xxi, 6). This exception, of course, is in no way in contradiction with the Jubilee-year's enactment. It is not necessary, therefore, in order to explain this apparent contradiction, to maintain that the two legislations belong to two distinct periods, or, still less, to maintain that the two legislations are conflicting, as some modern critics have maintained. It is important, however, to remark that the legislation concerning the various enactments of the Jubilee year contained in Leviticus, is not sufficiently expanded so as to cover all possible hypotheses and cases. This want has been more or less consistently remedied by later Talmudic and rabbinical enactments and legislations.

The design of the Jubilee year is that those of the people of God who, through poverty or other adverse circumstances, had forfeited their personal liberty or property to their fellow brethren, should have their debts forgiven by their co-religionists every half century, on the great day of atonement, and be restored to their families and inheritance as freely and fully as God on that very day forgave the debts of his people and restored them to perfect fellowship with himself, so that the whole community, having forgiven each other and being forgiven by God, might return to the original order which had been disturbed in the lapse of time, and being freed from the bondage of one another, might unreservedly be the servants of him who is their redeemer.

The aim of the jubilee, therefore, is to preserve unimpaired the essential character of the theocracy, to the end that there be no poor among the people of God (Deut. xv, 4). Hence God, who redeemed Israel from the bondage of Egypt to be his peculiar people, and allotted to them the promised land, will not suffer any one to usurp his title as Lord over those whom he owns as his own. It is the idea of grace for all the suffering children of man, bringing freedom to the captive and rest to the weary as well as to the earth, which made the year of jubilee the symbol of the Messianic year of grace ([Isaiah 61:2](#)), when all the conflicts in the universe shall be restored to their original harmony, and when not only we, who have the first-fruits of the Spirit, but the whole creation, which groaneth and travaileth in pain together until now, shall be restored into the glorious liberty of the sons of God (comp. Is. lxi, 1-3; Luke, iv, 21; Rom. viii, 18-23; Heb. iv, 9).

The importance of this institution will be apparent if it is considered what moral and social advantages would accrue to the community from the sacred observance of it.

- It would prevent the accumulation of land on the part of a few to the detriment of the community at large.
- It would render it impossible for any one to be born to absolute poverty, since every one had his hereditary land.
- It would preclude those inequalities which are produced by extremes of riches and poverty, and which make one man domineer over another.
- It would utterly do away with slavery.
- It would afford a fresh opportunity to those who were reduced by adverse circumstances to begin again their career of industry, in the patrimony which they had temporarily forfeited.

- It would periodically rectify the disorders which creep into the state in the course of time, preclude the division of the people into nobles and plebeians, and preserve the theocracy inviolate.

GABRIEL OUSSANI

Book of Jubilees

Book of Jubilees

(*ta Iobelaia*).

An apocryphal writing, so called from the fact that the narratives and stories contained in it are arranged throughout in a fanciful chronological system of jubilee-periods of forty-nine years each; each event is recorded as having taken place in such a week of such a month of such a Jubilee year. The author assumes an impossible solar year of 364 days (i.e. twelve months of thirty days each, and four intercalary days) to which the Jewish ecclesiastical year of thirteen months of twenty-eight days each exactly corresponds. The whole chronology, for which the author claims heavenly authority, is based upon the number seven. Thus the week had 7 days; the month $4 \times 7 = 28$; the year $52 \times 7 = 364$; the year week 7 years; and the Jubilee $7 \times 7 = 49$. It is also called "Little Genesis" (*he Lepte Genesis*), or "Lepto-Genesis," not on account of its size, for it is considerably larger than the Canonical Genesis, but owing to its minor or inferior authority as compared with the latter. It is also called "Apocalypse of Moses," "The Life of Adam," and in Ethiopic it is called "Kufale." In the "Decretum Gelasianum" concerning the canonical and apocryphal books of Scripture, we find among the apocrypha a work entitled "Liber de filiabus Aadae Leptogenesis" (Book of the daughters of Adam Little Genesis), which is probably a combination of two titles belonging to two separate works. The book is also mentioned by Jerome, in his Epistle "ad Fabiolam," in connection with the name of a place called Rissa (Num., xxxiii, 21), and by Epiphanius and by Didymus of Alexandria, which shows that it was well known both in the East and in the West.

The Book of Jubilees was originally written in Hebrew and, according to Charles ("Book of Jubilees," London, 1902), partly in verse; but it has come down to us in its complete form only in Ethiopic, and also in various fragments, Greek and Latin. The Ethiopic text was first edited by Dillmann in 1859 ("Kufale sive Liber Jubilaeorum, aethiopice ad duorum librorum manuscriptorum fidem, primum edidit Dillmann," Kiel, 1859), who in 1850-51 had already published a German version of it in Ewald's "Jahrbücher der Biblischen Wissenschaft," vol. II, 1850, pp. 230-256; vol. III, 1851, pp.1-96. The incomplete Latin version was first discovered and edited in 1861, by the

late Monsignor Ceriani, prefect of the Ambrosiana, in his "Monumenta Sacra et Profana," vol. I, fasc. I, pp. 15-54. The Greek fragments are scattered in the writings of various Byzantine chroniclers such as Syncellus, Cedrenus, Zonaras, and Glycas. The incomplete Latin version, which like the Ethiopic was made from the Greek, was re-edited in 1874 by Rönsch, accompanied with a Latin rendering by Dillmann of the corresponding portion in the Ethiopic version, with a very valuable commentary and several excursus ("Das Buch der Jubiläen oder die kleine Genesis etc.," Leipzig, 1874). In 1900 Dr. Littmann published a newer German version of the Ethiopic text in Kautzsch's "Apocryphen und Pseudoepigraphen," 3rd ed., vol. III, pp. 274 sqq., and, in 1888, Dr. Schodde published the first English version of the book ("Book of Jubilees," Oberlin, Ohio, 1888). In 1895 the Ethiopic text was re-edited in a revised form by Charles, and by him translated into English in 1893-5 in the "Jewish Quarterly Review" (Oct., 1893, July, 1894, January, 1895), and subsequently in a separate volume with many additional notes and discussions ("The Book of Jubilees," London, 1902). A French translation is promised by the Abbé F. Martin, professor of Semitic languages at the Catholic Institute of Paris, in his valuable collection entitled "Documents pour l'Etude de la Bible."

The contents of the Book of Jubilees deal with the facts and events related in the canonical Book of Genesis, enriched by a wealth of legends and stories which had arisen in the course of centuries in the popular imagination of the Jewish people, and written from the rigid Pharisaic point of view of the author and of his age; and as the author seeks to reproduce the history of primitive times in the spirit of his own day, he deals with the Biblical text in a very free fashion. According to him, Hebrew was the language originally spoken by all creatures, animals and man, and is the language of Heaven. After the destruction of the tower of Babel, it was forgotten until Abraham was taught it by the angels. Henoch was the first man initiated by the angels in the art of writing, and wrote down, accordingly, all the secrets of astronomy, of chronology, and of the world's epochs. Four classes of angels are mentioned, viz. angels of the presence, angels of sanctifications, guardian angels over individuals, and angels presiding over the phenomena of nature. As regards demonology the writer's position is largely that of the New Testament and of the Old-Testament apocryphal writings.

All these legendary details, it claims, were revealed by God to Moses through the angel of the presence (probably Michael) together with the Law, all of which was originally known to but few of the Old Testament patriarchs, such as Henoch, Methusala, Noe, Shem, Abraham, Isaac, Jacob, and Levi. It is somewhat difficult to determine the particular Judaistic school its author belonged to; he openly denies the resurrection of the body; he does not believe in the written tradition; he does not reprobate animal sacrifices, etc. . . . and the fact that he wrote in Hebrew excludes the hypothesis of his

Hellenistic tendencies. Equally untenable is the hypothesis advanced by Beer, that he was a Samaritan, for he excludes Mount Garizim, the sacred mount of the Samaritans from the list of the four places of God upon earth, viz. the Garden of Eden, the Mount of the East, Mount Sinai, and Mount Sion. If the author belonged to any particular school he must have been in all probability a Pharisee (Hasidaeen) of the most rigid type of the time of John Hyrcanus, in whose reign scholars generally agree the book was written (135-105 B.C.). Dr. Headlam suggests that the author was a fervent opponent of the Christian Faith (see Hastings, "Dictionary of the Bible"). But if the author, as it is suggested in this rather improbable hypothesis, lived in early Christian times, he must have written his book before the fall of Jerusalem and the destruction of the Temple, since the latter is assumed throughout to be still in existence as the great center of Jewish worship.

Besides the literature mentioned in the body of the article, see the various articles on the subject in the *Dictionaries of the Bible*, and especially Schürer's *History of the Jewish People in the Time of Christ*, tr., V, 134-141.

GABRIEL OUSSANI

Juda

Juda

The name of one of the Patriarchs, the name of the tribe reputed to be descended from him, the name of the territory occupied by the same, and also the name of several persons mentioned in the Old Testament.

1. Juda the Patriarch

The son of Jacob by Lia, whose exclamation on the occasion of his birth: "Now will I praise the Lord" is given as the etymological reason for the name "Juda", which is derived from the Hebrew verb "to praise" (Gen., xxix, 35). It was Juda who interceded with his brethren to save the life of Joseph, proposing that he be sold to the Ismaelites (Gen., xxxvii, 26, 27). Though not the eldest son of Jacob, he is represented as assuming an important and predominating rôle in the family affairs. It is he who, on the occasion of the second journey to Egypt, persuades the afflicted Jacob to consent to the departure of Benjamin (Gen., xliii, 3-10), for whom he pleads most touchingly before Joseph after the incident of the cup, offering himself to be retained as a slave in his stead (Gen., xlv, 18 sqq.). This earnest plea determines Joseph to disclose his identity to his brethren (Gen., xlv, 1 sqq.). Juda is the one chosen by Jacob to precede him into Egypt and announce his coming (Gen., xlvi, 28), and his prestige is further emphasized in the famous prophecy enunciated by Jacob (Gen., xlix, 8-12). To Juda were born five sons, viz., Her, Onan, and Sela by the daughter of Sue, and Phares and Zara by Thamar (Gen.,

xxxviii). It is through Phares, according to the First Gospel, that the Messianic lineage is traced (Matt., i, 3).

2. *Juda, a tribe of Israel*

Named after the son of Jacob. The unquestioned predominance and providential mission of this tribe, foreshadowed in Gen., xlix, 8-10, appear from the time of the Exodus and throughout the subsequent Israelitish history. From the beginning *Juda* predominated in point of numbers. When the first census was taken after the departure from Egypt it numbered 74,600 fighting men, while Dan, the next largest tribe, counted only 62,700 and the smallest, Manasses, only 32,200. The chief of the tribe during the period of the wanderings was Nahasson, son of Aminadab. Among the spies sent to explore the Land of Chanaan, the tribe of *Juda* was represented by Caleb, son of Jephone (Num., xiii, 7). According to the second census of the Israelites taken on the plains of Moab, *Juda* numbered 76,500 fighting men. The names of the principal families of the tribe are given in Num., xxvi, 19-21, and more fully in I Par., ii. Caleb was one of the chiefs selected to settle the division of the land among the tribes, and on the occasion of the passing of the Jordan the tribe of *Juda*, together with those of Simeon, Levi, Issachar, Ephraim and Manasses, was designated to "bless the people" from the top of Mount Garizim (Deut., xxvii, 12). After the death of Josue the tribe of *Juda* was chosen to be the vanguard in the war against the Chanaanites. This honour was probably less a recognition of the numerical strength of the tribe than of the promises it had received (Gen., xlix, 8-10) and the hopes for its glorious destiny founded on these promises (Judges, i, 1-2). *Juda* was again chosen by the Divine oracle to head the attack against Gaba and the Benjamites (Judges, xx, 18). The natural ramparts surrounding their country saved the inhabitants from many of the invasions that troubled their northern brethren; but the children of Ammon, passing over the Jordan, wasted *Juda*, and the mountains proved ineffectual in keeping off the Philistines (Judg., x, 9; I Kings, xvii, 1). In the persecution of David by Saul the tribe of *Juda* showed great loyalty to the former, and soon after the death of Saul David was enthusiastically crowned at Hebron (II Kings, ii, 4, 7, 10) where he reigned seven years (II Kings, v, 5). When the unfortunate schism took place under Roboam only the tribe of *Juda* and of Benjamin remained faithful to the House of David (III Kings, xii, 20), and henceforth the Southern Kingdom was known as that of *Juda*. After the Captivity the members of *Juda* were among the first to return to Jerusalem and begin the reconstruction of the Temple (I Esd., i, 5; iii, 9); in fine, the name "Jews" (*Judæi*), by which the post-Exilic Israelites and their descendants are generally designated, is, of course, derived from *Juda*. Thus the history of the Chosen People is to a great extent the story of the varying vicissitudes of the dominant tribe of *Juda*. Its military ascendancy and glory reached its height in the

person of David, the "lion of Juda". But the true lion of the tribe of Juda is Christ the Son of David (Apoc., v, 5).

3. Territory of Juda

The tribe of Juda occupied a rather extensive territory in the southern part of Palestine. It was bounded on the north by Dan and Benjamin, on the east by the Dead Sea, on the south by Simeon, and on the west by the *Sephela* or plain of the Philistines. The principal cities of Juda are enumerated in Josue (xv, 21-62). The sacred writer divides the cities into four groups, viz., those of the south on the boundary of Idumea, those of the western plain, those of the mountain, and finally those of the desert. In all, mention is made of 134 towns, about one-half of which have been identified or located with a fair degree of certitude. The recently built railroad from Jaffa to Jerusalem passes through a corner of the territory of Juda, the general aspect of which is a series of hills covered in the spring-time with grass and flowers, but bare and arid during the rest of the year. A modern carriage-road runs from Jerusalem to Hebron, which lies in a fertile valley between two ranges of green hills. Here and there cultivated fields greet the eye. The slopes of the hills are dotted with terraced gardens and vineyards, among which are to be found grottoes and labyrinths which formerly served as hiding-places. The Kingdom of Juda, dating from the beginning of the reign of Roboam, was thus called in opposition to the Northern Kingdom of Israel. The capital, Jerusalem, was situated on the boundary line between Juda and Benjamin.

Judaizers

Judaizers

(From Greek *Ioudaizo*, to adopt Jewish customs -- Esth., viii, 17; Gal., ii, 14).

A party of Jewish Christians in the Early Church, who either held that circumcision and the observance of the Mosaic Law were necessary for salvation and in consequence wished to impose them on the Gentile converts, or who at least considered them as still obligatory on the Jewish Christians. Although the Apostles had received the command to announce the Gospel to all the nations, they and their associates addressed themselves at first only to Jews, converts to Judaism, and Samaritans, that is to those who were circumcised and observed the law of Moses. The converts, and the Apostles with them, continued to conform to Jewish customs: they observed the distinction between legally clean and unclean food, refused to eat with Gentiles or to enter their houses, etc. (Acts, x, 14, 28; xi, 3). At Jerusalem they frequented the Temple and took part in Jewish religious life as of old (Acts, ii, 46; iii, 1; xxi, 20-26), so that, judged from

external appearances, they seemed to be merely a new Jewish sect distinguished by the union and charity existing among its members. The Mosaic ceremonial law was not to be permanent indeed, but the time had not yet come for abolishing its observance. The intense attachment which the Jews had for it, amounting to fanaticism in the case of the Pharisees, would have forbidden such a step, had the Apostles contemplated it, as it would have been tantamount to shutting the door of the Church to the Jews.

But sooner or later the Gospel was also to reach the Gentiles, and then the delicate question must immediately arise: What was their position with respect to the Law? Were they bound to observe it? And if not, what conduct should the Jews hold towards them? Should the Jews waive such points of the Law as were a barrier to free relations between Jew and Gentile? To the mind of most Palestinian Jews, and especially of the zealots, only two solutions would present themselves as possible. Either the Gentile converts must accept the Law, or its provisions must be enforced against them as against the other uncircumcised. But national sentiment, as well as love for the Law, would impel them to prefer the first. And yet neither solution was admissible, if the Church was to embrace all nations and not remain a national institution. The Gentiles would never have accepted circumcision with the heavy yoke of Mosaism, nor would they have consented to occupy an inferior position with regard to the Jews, as they necessarily must, if these regarded them as unclean and declined to eat with them or even to enter their houses. Under such conditions it was easy to foresee that the admission of the Gentiles must provoke a crisis, which would clear the situation. When the brethren at Jerusalem, among whom probably were already converts of the sect of the Pharisees, learned that Peter had admitted Cornelius and his household to baptism without subjecting them to circumcision, they loudly expostulated with him (Acts, xi, 1-3). The cause assigned for their complaints is that he "had gone in to men uncircumcised and had eaten with them", but the underlying reason was that he had dispensed with circumcision. However, as the case was an exceptional one, where the will of God was manifested by miraculous circumstances, Peter found little difficulty in quieting the dissatisfaction (Acts, xi, 4-18). But new conversions soon gave rise to far more serious trouble, which for a time threatened to produce a schism in the Church.

COUNCIL OF JERUSALEM (A.D. 50 OR 51)

The persecution that broke out at the time of St. Stephen's martyrdom providentially hastened the hour when the Gospel was to be preached also to the Gentiles. Some natives of Cyprus and Cyrene, driven from Jerusalem by the persecution, went to Antioch, and there began to preach not only to the Jews, but also to the Greeks. Their action was probably prompted by the example set by Peter at Caesarea, which their more liberal views as Hellenists would naturally dispose them to follow. With the help of Barnabas, whom the Apostles sent on hearing that a great number of Gentiles were

converted to the Lord at Antioch, and of the former persecutor Saul, a flourishing church, largely Gentile, was established there (Acts, xi, 20 sqq.). Soon after (between A.D. 45-49) Saul, now called Paul, and Barnabas founded the South Galatian churches of Antioch in Pisidia, Iconium, Derbe, and Perge, thus increasing the Gentile converts (Acts, xiii, 13 -- xiv, 24). Seeing the Gentile element growing so large and threatening to outnumber the Jewish, the zealots of the Law took alarm. Both their national pride and their religious sentiment were shocked. They welcomed the accession of the Gentiles, but the Jewish complexion of the Church must be maintained, the Law and the Gospel must go hand in hand, and the new converts must be Jews as well as Christians. Some went down to Antioch and preached to the Gentile Christians that unless they received circumcision, which as a matter of course would carry with it the observance of the other Mosaic prescriptions, they could not be saved (Acts, xv, 1). As these men appealed to the authority of the Apostles in support of their views, a delegation, including Paul, Barnabas, and Titus, was sent to Jerusalem to lay the matter before the Apostles, that their decision might set at rest the disquieted minds of the Christians at Antioch (Acts, xv, 2).

In a private interview which Paul had with Peter, James (the brother of the Lord), and John, the Apostles then present at Jerusalem, they approved his teaching and recognized his special mission to the Gentiles (Gal., ii, 1-9). But to still the clamours of the converts from Pharisaism who demanded that the Gentile converts "must be circumcised and be commanded to observe the Law of Moses", the matter was discussed in a public meeting. Peter arose and after recalling how Cornelius and his household, though uncircumcised, had received the Holy Ghost as well as they themselves, declared that as salvation is by the grace of the Lord Jesus Christ, the yoke of the Law, which even the Jews found exceedingly heavy, should not be imposed on the Gentile converts. James after him voiced the same sentiment, but asked that the Gentiles should observe these four points, namely "that they refrain themselves from the pollutions of idols, and from fornication, and from things strangled, and from blood". His suggestion was adopted and, with slight change in the wording, incorporated in the decree which "the apostles and ancients, with the whole church" sent to the churches of Syria and Cilicia through two delegates, Judas and Silas, who were to accompany Paul and Barnabas on their return. "Forasmuch as we have heard," so ran the decree, "that some going out from us have troubled you with words, subverting your souls: to whom we gave no commandment; . . . it hath seemed good to the Holy Ghost and to us, to lay no further burden upon you than these necessary things: that you abstain from things sacrificed to idols, and from blood, and from things strangled, and from fornication [by which marriages within certain degrees of kindred are probably meant]; from which things keeping yourselves you shall do well" (Acts, xv, 5-29). These four prohibitions were

imposed for the sake of charity and union. As they forbade practices which were held in special abhorrence by all the Jews, their observance was necessary to avoid shocking the Jewish brethren and to make free intercourse between the two classes of Christians possible. This is the drift of the somewhat obscure reason which St. James adduced in favour of his proposition: "For Moses of old time hath in every city them that preach him in the synagogues, where he is read every sabbath." The four things forbidden are severely prohibited in Lev., xvii, xviii, not only to the Israelites, but also to the Gentiles living among them. Hence the Jewish Christians, who heard these injunctions read in the synagogues, would be scandalized if they were not observed by their Gentile brethren. By the decree of the Apostles the cause of Christian liberty was won against the narrow Judaizers, and the way smoothed for the conversion of the nations. The victory was emphasized by St. Paul's refusal to allow Titus to be circumcised even as a pure concession to the extremists (Gal., ii, 2-5).

THE INCIDENT AT ANTIOCH

The decision of Jerusalem regarded the Gentiles alone, since the only question before the council was whether circumcision and the observance of the Mosaic Law were to be imposed on the Gentiles. Nothing was decided with regard to the observance of the Law by the Jews. Still even they were implicitly and in principle freed from its obligations. For, if the legal observances were not necessary for salvation, the Jew was no more bound by them than the Gentile. Nor was anything explicitly decided as to the relations which were to subsist between the Jews and the Gentiles. Such a decision was not demanded by the circumstances, since at Antioch the two classes lived together in harmony before the arrival of the mischief-makers. The Jews of the Dispersion were less particular than those of Palestine, and very likely some arrangement had been reached by which the Jewish Christians could without scruple eat with their Gentile brethren at the agape. However, the promulgation of the four prohibitions, which were intended to facilitate relations, implied that Jew and Gentile could freely meet. Hence when Peter came to Antioch shortly after the council, he, no less than Paul and Barnabas and the others, "did eat with the Gentiles" (Gal., ii, 12). But the absence of any explicit declaration gave the Judaizers an opportunity to begin a new agitation, which, if successful, would have rendered the decree of Jerusalem nugatory. Foiled in their first attempt, they now insisted that the law of not eating with the Gentiles be strictly observed by all Jews. They very likely expected to reach by indirect methods, what they could not obtain directly. Some zealots came from Jerusalem to Antioch. Nothing warrants the assertion that they were sent by St. James to oppose St. Paul, or to enforce the separation of the Jewish from the Gentile Christians, much less to promulgate a modification of the decree of Jerusalem. If they were sent by St. James -- *pro tou elthein*

tinās apo Iakobou -- probably means simply that they were of James's entourage -- they came on some other commission.

On their arrival Peter, who up to this had eaten with the Gentiles, "withdrew and separated himself, fearing them who were of the circumcision", and by his example drew with him not only the other Jews, but even Barnabas, Paul's fellow-labourer. Foreseeing the consequences of such conduct, Paul publicly rebuked him, because he "walked not uprightly according to the truth of the Gospel". "If thou being a Jew," he said to him, "livest after the manner of the Gentiles, and not as the Jews do, how dost thou compel the Gentiles to live as do the Jews?" This incident has been made much of by Baur and his school as showing the existence of two primitive forms of Christianity, Petrinism and Paulinism, at war with each other. But anyone, who will look at the facts without preconceived theory, must see that between Peter and Paul there was no difference in principles, but merely a difference as to the practical conduct to be followed under the circumstances. "Conversacionis fuit vitium non praedicationis", as Tertullian happily expresses it. That Peter's principles were the same as those of Paul, is shown by his conduct at the time of Cornelius's conversion, by the position he took at the council of Jerusalem, and by his manner of living prior to the arrival of the Judaizers. Paul, on the other hand, not only did not object to the observance of the Mosaic Law, as long as it did not interfere with the liberty of the Gentiles, but he conformed to its prescriptions when occasion required (I Cor., ix, 20). Thus he shortly after circumcised Timothy (Acts, xvi, 1-3), and he was in the very act of observing the Mosaic ritual when he was arrested at Jerusalem (Acts, xxi, 26 sqq.). The difference between them was that Peter, recently come from Jerusalem, thought only of not wounding the susceptibility of the zealots there, and was thus betrayed into a course of action apparently at variance with his own teaching and calculated to promote the designs the Judaizers; whereas Paul, not preoccupied with such a consideration and with more experience among the Gentiles, took a broader and truer view of the matter. He saw that Peter's example would promote the movement to avoid close relations with the Gentiles, which was only an indirect way of forcing Jewish customs upon them. He saw, too, that if such a policy were pursued, the hope of converting the Gentiles must be abandoned. Hence his bold and energetic action. St. Paul's account of the incident leaves no doubt that St. Peter saw the justice of the rebuke. (In the above account Gal., ii, 1-10, is with the large majority of commentators taken to refer to the Council of Jerusalem, and the incident at Antioch is consequently placed after the council. Some few interpreters, however, refer Gal., ii, 1-10, to the time of St. Paul's journey mentioned in Acts, xi, 28-30 [A.D. 44], and place the dispute at Antioch before the council.)

THE JUDAIZERS IN OTHER CHURCHES

After the foregoing events the Judaizers could do little mischief in Syria. But they could carry their agitation to the distant churches founded by St. Paul, where the facts were less well known; and this they attempted to do. The two Epistles to the Corinthians give good reason to believe that they were at work at Corinth. The party or rather faction of Cephas (I Cor., i, 12) very probably consisted of Judaizers. They do not seem, however, to have gone beyond belittling St. Paul's authority and person, and sowing distrust towards him (cf. I Cor., ix, 1-5; II Cor., xi, 5-12; xii, 11-12; i, 17-20; x, 10-13). For while he has much to say in his own defence, he does not attack the views of the Judaizers, as he would certainly have done had they been openly preached. His two letters and his subsequent visit to Corinth put an end to the party's machinations. In the meantime (supposing Gal. To have been written soon after I and II Cor., as it very probably was) Judaizing emissaries had penetrated into the Galatian churches, whether North or South Galatian matters little here (see GALATIANS, EPISTLE TO THE), and by their skillful maneuvers had almost succeeded in persuading the Galatians, or at any rate many of them, into accepting circumcision. As at Corinth they attacked St. Paul's authority and person. He was only a secondary Apostle, subordinate to the Twelve, from whom he had received his instruction in the Faith and from whom he held his mission. To his teaching they opposed the practice and teaching of the pillars of the Church, of those who had conversed with the Lord (Gal., ii, 2 sqq.). He was a time-server, changing his teaching and conduct according to circumstances with the view of ingratiating himself with men (Gal., i, 10; v, 11). They argued that circumcision had been instituted as a sign of an eternal alliance between God and Israel: if the Galatians then wished to have a share in this alliance, with its blessings, if they wished to be in the full sense of the term Christians, they must accept circumcision (Gal., iii, 3 sq.; v, 2). They did not however insist, it would seem, in the observance of the whole Law (v, 3).

On hearing the news of the threatened defection of the churches which he had founded at such cost to himself, St. Paul hastily indited the vigorous Epistle to the Galatians, in which he meets the accusations and arguments of his opponents step by step, and uses all his powers of persuasion to induce his neophytes to stand fast and not to be held again under the yoke of bondage. The letter, as far as we know, produced the desired effect. In spite of its resemblance to the Epistle to the Galatians, the Epistle to the Romans is not, as has been asserted, a polemical writing directed against the Judaizing party at Rome. The whole tone of the Epistle shows this (cf. in particular i, 5-8, 11-12; xv, 14; xvi, 19). If he refers to the Jewish Christians of Rome, it is only to exhort the Gentiles to bear with these weak brethren and to avoid whatever might scandalize them (xiv, 1-23). He would not have shown such forbearance towards the

Judaizers, nor spoken of them in such gentle tones. His purpose in treating of the uselessness of circumcision and legal observances was to forewarn and forearm the Romans against the Judaizing disturbers, should they reach the capital, as he had reason to fear (Rom., xvi, 17-18). After their attempt in Galatia, St. Paul's opponents seem to have relaxed their activity, for in his later letters he rarely alludes to them. In the Epistle to the Philippians he warns against them in very severe terms: "Beware of dogs, beware of evil-workers, beware of the concision" (Phil., iii, 2). They do not seem, however, to have been active in that church at the time. Beyond this only two allusions are found -- one in I Tim., i, 6-7: "From which things some going astray, are turned aside unto vain babbling; desiring to be teachers of the law, understanding neither the things they say, nor whereof they affirm"; the other in Tit., iii, 9: "Avoid foolish questions, and genealogies, and contentions, and strivings about the law. For they are unprofitable things and vain."

FINAL HISTORY

With the disappearance of the Jewish-Christian community of Jerusalem at the time of the rebellion (A.D. 67-70), the question about circumcision and the observance of the Law ceased to be of any importance in the Church, and soon became a dead issue. At the beginning of the second century St. Ignatius of Antioch, it is true, still warns against Judaizers (Magnes., x, 3; viii, 1; Philad., vi, 1), but the danger was probably more a memory than a reality. During the rebellion the mass of the Jewish Christians of Palestine retired beyond the Jordan, where they gradually lost touch with the Gentiles and in the course of time split up into several sects. St. Justin (about 140) distinguishes two kinds of Jewish Christians: those who observe the Law of Moses, but do not require its observance of others -- with these he would hold communion, though in this all his contemporaries did not agree with him -- and those who believe the Mosaic Law to be obligatory on all, whom he considers heretics (Dial. Cum Tryph., 47). If Justin is describing the Jewish Christians of his day, as he appears to do, they had changed little since Apostolic times. The accounts of later Fathers show them divided into three main sects: (a) the Nazarenes, who, while observing the Mosaic Law, seem to have been orthodox. They admitted the Divinity of Christ and the virginal birth; (b) the Ebionites, who denied the Divinity of Christ and virginal birth, and considered St. Paul as an apostate. It should be noted, however, that though the Fathers restrict the name *Ebionite* to the heretical Jewish Christians, the name was common to all; (c) an offshoot of the last infected with Gnosticism (cf. art. EBIONITES). After the middle of the fifth century the Jewish Christians disappear from history.

F. BECHTEL

Judas Iscariot

Judas Iscariot

The Apostle who betrayed his Divine Master. The name Judas (*Ioudas*) is the Greek form of *Judah* (Hebrew "praised"), a proper name frequently found both in the Old and the New Testament. Even among the Twelve there were two that bore the name, and for this reason it is usually associated with the surname Iscariot [Heb. "a man of Kerioth" or Carioth, which is a city of Judah (cf. [Joshua 15:25](#))]. There can be no doubt that this is the right interpretation of the name, though the true origin is obscured in the Greek spelling, and, as might be expected, other derivations have been suggested (e.g. from Issachar).

Very little is told us in the Sacred Text concerning the history of Judas Iscariot beyond the bare facts of his call to the Apostolate, his treachery, and his death. His birthplace, as we have seen, is indicated in his name Iscariot, and it may be remarked that his origin separates him from the other Apostles, who were all Galileans. For Kerioth is a city of Judah. It has been suggested that this fact may have had some influence on his career by causing want of sympathy with his brethren in the Apostolate. We are told nothing concerning the circumstances of his call or his share in the ministry and miracles of the Apostles. And it is significant that he is never mentioned without some reference to his great betrayal. Thus, in the list of the Apostles given in the Synoptic Gospels, we read: "and Judas Iscariot, who also betrayed him". ([Matthew 10:4](#). Cf. [Mark 3:19](#); [Luke 6:16](#)). So again in St. John's Gospel the name first occurs in connection with the foretelling of the betrayal: "Jesus answered them: Have not I chosen you twelve; and one of you is a devil? Now he meant Judas Iscariot, the son of Simon: for this same was about to betray him whereas he was one of the twelve" ([John 6:71-2](#)).

In this passage St. John adds a further particular in mentioning the name of the traitor Apostle's father, which is not recorded by the other Evangelists. And it is he again who tells us that Judas carried the purse. For, after describing the anointing of Christ's feet by Mary at the feast in Bethania, the Evangelist continues:
